The reserve amortization recorded for both periods presented reflects adjustments to the depreciation and fossil dismantlement reserve provided under the 2012 rate agreement. At March 31, 2015, approximately $179 million of this reserve remains available for future amortization. Reserve amortization is recorded as a reduction of regulatory liabilities - accrued asset removal costs on the condensed consolidated balance sheets. For the three months ended March 31, 2015 and 2014, reserve amortization was recorded to achieve the targeted retail regulatory ROE. The increase in other depreciation and amortization expense recovered under base rates for the three months ended March 31, 2015 is due to higher plant in service balances.

Interest Expense
The increase in interest expense for the three months ended March 31, 2015 reflects higher average debt balances and lower AFUDC - debt. The change in AFUDC - debt is due to the same factors as described below in AFUDC - equity.

AFUDC - Equity
The decrease in AFUDC - equity for the three months ended March 31, 2015 is primarily due to lower AFUDC - equity associated with the Riviera Beach power plant which was placed in service in April 2014, partly offset by additional AFUDC - equity recorded on construction expenditures associated with the Port Everglades modernization project.

Capital Initiatives

For the period 2015 through 2018, FPL expects to invest capital of approximately $13.9 billion to $15.6 billion primarily related to projects that are focused on improving reliability, reducing fuel cost and reducing emissions, as well as maintenance of existing assets.

Natural Gas Reserves Project

In March 2015, FPL began investing in long-term natural gas supplies in the Woodford Shale region in southeastern Oklahoma. In March 2015, the Florida Supreme Court dismissed the State of Florida Office of Public Counsel's petition requesting that the Florida

Supreme Court prohibit the FPSC from ruling on FPL's proposed guidelines with regard to future natural gas production projects while appeals concerning FPL's Woodford Shale natural gas reserves project are pending. Also in March 2015, the Florida Supreme Court issued an order relinquishing jurisdiction to the FPSC to rule on FPL's proposed guidelines.

NEER: Results of Operations

NEER's net income less net income attributable to noncontrolling interests for the three months ended March 31, 2015 and 2014 was $278 million and $86 million, respectively, representing an increase of $192 million. The primary drivers, on an after-tax basis, of the change are in the following table.

	Increase (Decrease) From Prior Period
	Three Months Ended March 31, 2015
	(millions)
New investments[a]	$ 42
Existing assets[a]	(76)
Gas infrastructure[b]	9
Customer supply and proprietary power and gas trading[b]	90
Interest expense, differential membership costs and other	(16)
Change in unrealized mark-to-market non-qualifying hedge activity[c][d]	146
Change in OTTI losses on securities held in nuclear decommissioning funds, net of OTTI reversals[d]	(1)
Maine fossil gain[e]	(12)
Operating results of the Spain solar projects[d]	10
Increase in net income less net income attributable to noncontrolling interests	$ 192

(a) Includes PTCs and state ITCs on wind projects and, for new investments, deferred income tax and other benefits associated with convertible ITCs but excludes allocation of interest expense or corporate general and administrative expenses. Results from new projects are included in new investments during the first twelve months of operation. A project's results are included in existing assets beginning with the thirteenth month of operation.
(b) Excludes allocation of interest expense or corporate general and administrative expenses.
(c) See Note 2 and Overview - Adjusted Earnings related to derivative instruments.
(d) See table in Overview - Adjusted Earnings for additional detail. See Note 8 - Spain Solar Projects.
(e) See Note 3 - Nonrecurring Fair Value Measurements and Overview - Adjusted Earnings for additional information.

New Investments

Results from new investments for the three months ended March 31, 2015 increased primarily due to:

- the addition of approximately 1,467 MW of wind generation and 545 MW of solar generation during or after the three months ended March 31, 2014.

Existing Assets

Results from NEER's existing asset portfolio for the three months ended March 31, 2015 decreased primarily due to:

- lower results from wind assets of approximately $59 million primarily due to weaker wind resource, partly offset by favorable pricing, and
- lower results from the nuclear assets of $12 million primarily due to lower gains on sales of securities held in NEER's nuclear decommissioning funds.

Gas Infrastructure

The increase in gas infrastructure results for the three months ended March 31, 2015 is primarily due to gains from exiting the hedged positions on a number of future gas production opportunities, partly offset by increased depreciation expense primarily related to higher depletion rates. NEER continues to monitor its oil and gas producing properties for potential impairments due to low prices for oil and natural gas commodity products.

Customer Supply and Proprietary Power and Gas Trading

Results from customer supply and proprietary power and gas trading increased for the three months ended March 31, 2015 primarily due to improved margins and favorable market conditions compared to losses in 2014 due to the impact of extreme winter weather on the full requirements business.

Interest Expense, Differential Membership Costs and Other

For the three months ended March 31, 2015, interest expense, differential membership costs and other reflects higher borrowing and other costs to support the growth of the business.

Other Factors

Supplemental to the primary drivers of the changes in NEER's net income less net income attributable to noncontrolling interests discussed above, the discussion below describes changes in certain line items set forth in NEE's condensed consolidated statements of income as they relate to NEER.

Operating Revenues
Operating revenues for the three months ended March 31, 2015 increased $426 million primarily due to:

- higher unrealized mark-to-market gains from non-qualifying hedges ($61 million for the three months ended March 31, 2015 compared to $149 million of losses on such hedges for the comparable period in 2014),
- higher revenues from the customer supply and proprietary power and gas trading business of approximately $181 million reflecting favorable market conditions,
- higher revenues from new investments of $73 million, and
- higher revenues from the gas infrastructure business of $48 million reflecting gains recorded upon exiting the hedged positions on a number of future gas production opportunities,

partly offset by,

- lower revenues from existing assets of $88 million reflecting weaker wind resource, lower contracted revenues at Duane Arnold and unfavorable market conditions at Marcus Hook.

Operating Expenses
Operating expenses for the three months ended March 31, 2015 increased $75 million primarily due to:

- higher operating expenses associated with new investments of approximately $30 million,
- higher depreciation associated with the gas infrastructure business of $25 million primarily related to higher depletion rates, and
- higher other operating expenses and taxes other than income taxes and other.

Interest Expense
NEER's interest expense for the three months ended March 31, 2015 decreased $5 million reflecting an approximately $13 million unfavorable change in the fair value of interest rate swaps associated with the Spain solar projects compared to a $27 million unfavorable change in 2014, partly offset by higher average interest rates and debt balances.

Benefits Associated with Differential Membership Interests - net
Benefits associated with differential membership interests - net for both periods presented reflect benefits recognized by NEER as third-party investors received their portion of the economic attributes, including income tax attributes, of the underlying wind projects, net of associated costs.

Gains on Disposal of Assets - net
Gains on disposal of assets - net for the three months ended March 31, 2015 and 2014 primarily reflect gains on sales of securities held in NEER's nuclear decommissioning funds.

Tax Credits, Benefits and Expenses
PTCs from NEER's wind projects are reflected in NEER's earnings. PTCs are recognized as wind energy is generated and sold based on a per kWh rate prescribed in applicable federal and state statutes. A portion of the PTCs have been allocated to investors in connection with sales of differential membership interests. Also see Summary above and Note 4 for a discussion of PTCs and deferred income tax benefits associated with convertible ITCs, as well as benefits associated with differential membership interests - net above.

Capital Initiatives

During the three months ended March 31, 2015, NEER placed into service approximately 104 MW of new Canadian wind generation. For the period 2015 through 2018, NEER expects to invest capital of approximately $13.4 billion to $14.8 billion primarily for new wind projects with generation totaling 3,000 MW to 3,300 MW (including approximately 104 MW added to date) and new solar projects with generation totaling 1,600 MW to 1,800 MW, as well as natural gas infrastructure investments, nuclear fuel and maintenance of existing assets.

Sale of Assets to NEP

In January 2015 and February 2015, indirect subsidiaries of NEER sold a 250 MW wind facility located in Texas and an approximately 20 MW solar facility currently under construction in California, respectively, to indirect subsidiaries of NEP.

On April 28, 2015, an indirect subsidiary of NEER entered into a purchase and sale agreement with an indirect subsidiary of NEP to sell four wind generating facilities with contracted generating capacity totaling approximately 664 MW located in North Dakota, Oklahoma, Washington and Oregon. NEER expects to complete the sale in the second quarter of 2015.

Corporate and Other: Results of Operations

Corporate and Other is primarily comprised of the operating results of NEET, FPL FiberNet and other business activities, as well as corporate interest income and expenses. Corporate and Other allocates a portion of NEECH's corporate interest expense and shared service costs to NEER. Interest expense is allocated based on a deemed capital structure of 70% debt and, for purposes of allocating NEECH's corporate interest expense, the deferred credit associated with differential membership interests sold by NEER's subsidiaries is included with debt. Each subsidiary's income taxes are calculated based on the "separate return method," except that tax benefits that could not be used on a separate return basis, but are used on the consolidated tax return, are recorded by the subsidiary that generated the tax benefits. Any remaining consolidated income tax benefits or expenses are recorded at Corporate and Other. The major components of Corporate and Other's results, on an after-tax basis, are as follows:

	Three Months Ended March 31,	
	2015	2014
	(millions)	
Interest expense, net of allocations to NEER	**$ (21)**	$ (25)
Interest income	**8**	8
Federal and state income tax benefits	**5**	8
Merger-related expenses	**(4)**	—
Other	**25**	6
Net income (loss)	**$ 13**	$ (3)

The decrease in interest expense, net of allocations to NEER, for the three months ended March 31, 2015 reflects lower average debt balances. The federal and state income tax benefits for both periods presented reflect consolidating income tax adjustments. Other includes all other corporate income and expenses, as well as other business activities. The increase for the three months ended March 31, 2015 primarily reflects the absence of investment and debt reacquisition losses recorded in 2014, the pretax amount of which is reflected in other - net in NEE's condensed consolidated statements of income, as well as higher results from the other business activities and lower corporate operating expenses.

Capital Initiatives

For the period 2015 through 2018, businesses within Corporate and Other expect to invest capital of approximately $2.9 billion to $3.1 billion primarily for infrastructure projects through investments in natural gas pipelines and transmission facilities.

LIQUIDITY AND CAPITAL RESOURCES

NEE and its subsidiaries, including FPL, require funds to support and grow their businesses. These funds are used for, among other things, working capital, capital expenditures, investments in or acquisitions of assets and businesses, payment of maturing debt obligations and, from time to time, redemption or repurchase of outstanding debt or equity securities. It is anticipated that these requirements will be satisfied through a combination of cash flows from operations, short- and long-term borrowings, the issuance, from time to time, of short- and long-term debt and equity securities and proceeds from the sale of differential membership interests and of noncontrolling interests in subsidiaries associated with NEP, consistent with NEE's and FPL's objective of maintaining, on a long-term basis, a capital structure that will support a strong investment grade credit rating. NEE, FPL and NEECH rely on access to credit and capital markets as significant sources of liquidity for capital requirements and other operations that are not satisfied by operating cash flows. The inability of NEE, FPL and NEECH to maintain their current credit ratings could affect their ability to raise short- and long-term capital, their cost of capital and the execution of their respective financing strategies, and could require the posting of additional collateral under certain agreements.

Cash Flows

Sources and uses of NEE's and FPL's cash for the three months ended March 31, 2015 and 2014 were as follows:

	NEE		FPL	
	Three Months Ended March 31,		Three Months Ended March 31,	
	2015	2014	**2015**	2014
	(millions)			
Sources of cash:				
Cash flows from operating activities	**$ 1,181**	$ 1,017	**$ 952**	$ 875
Long-term borrowings	**194**	655	**—**	—
Capital contribution from NEE	**—**	—	**550**	100
Issuances of common stock - net	**16**	25	**—**	—
Net increase in short-term debt	**603**	1,179	**—**	120
Other sources - net	**59**	152	**47**	42
Total sources of cash	**2,053**	3,028	**1,549**	1,137
Uses of cash:				
Capital expenditures, independent power and other investments and nuclear fuel purchases	**(1,566)**	(1,866)	**(765)**	(1,067)
Retirements of long-term debt	**(170)**	(717)	**(31)**	(29)
Net decrease in short-term debt	**—**	—	**(722)**	—
Dividends	**(341)**	(315)	**—**	—
Payments to differential membership investors	**(21)**	(22)	**—**	—
Other uses - net	**(63)**	(58)	**(17)**	(22)
Total uses of cash	**(2,161)**	(2,978)	**(1,535)**	(1,118)
Net increase (decrease) in cash and cash equivalents	**$ (108)**	$ 50	**$ 14**	$ 19

NEE's primary capital requirements are for expanding and enhancing FPL's electric system and generating facilities to continue to provide reliable service to meet customer electricity demands and for funding NEER's investments in independent power and other projects. The following table provides a summary of the major capital investments for the three months ended March 31, 2015 and 2014.

	Three Months Ended March 31,	
	2015	2014
	(millions)	
FPL:		
Generation:		
New	**$ 98**	$ 290
Existing	**128**	307

General and other	**63**	30
Other, primarily change in accrued property additions and the exclusion of AFUDC - equity	**107**	84
Total	**765**	1,067
NEER:		
Wind	**317**	505
Solar	**150**	81
Nuclear, including nuclear fuel	**76**	51
Other	**153**	138
Total	**696**	775
Corporate and Other	**105**	24
Total capital expenditures, independent power and other investments and nuclear fuel purchases	**$ 1,566**	$ 1,866

See Note 7 regarding financing activity that occurred in April 2015.

Liquidity

At March 31, 2015, NEE's total net available liquidity was approximately $6.6 billion, of which FPL's portion was approximately $2.8 billion. The table below provides the components of FPL's and NEECH's net available liquidity at March 31, 2015:

				Maturity Date	
	FPL	NEECH	Total	FPL	NEECH
		(millions)			
Bank revolving line of credit facilities[a]	$ 3,000	$ 4,850	$ 7,850	[b]	[b]
Less letters of credit	(4)	(573)	(577)		
	2,996	4,277	7,273		
Revolving credit facilities	235	35	270	May 2015	2020
Less borrowings	—	—	—		
	235	35	270		
Letter of credit facilities[c]	—	650	650		2017
Less letters of credit	—	(305)	(305)		
	—	345	345		
Subtotal	3,231	4,657	7,888		
Cash and cash equivalents	28	441	469		
Less short-term debt	(420)	(1,325)	(1,745)		
Net available liquidity	$ 2,839	$ 3,773	$ 6,612		

(a) Provide for the funding of loans up to $7,850 million ($3,000 million for FPL) and the issuance of letters of credit up to $6,600 million ($2,500 million for FPL). The entire amount of the credit facilities is available for general corporate purposes and to provide additional liquidity in the event of a loss to the companies' or their subsidiaries' operating facilities (including, in the case of FPL, a transmission and distribution property loss). FPL's bank revolving line of credit facilities are also available to support the purchase of $633 million of pollution control, solid waste disposal and industrial development revenue bonds (tax exempt bonds) in the event they are tendered by individual bond holders and not remarketed prior to maturity.
(b) $500 million of FPL's and $750 million of NEECH's bank revolving line of credit facilities expire in 2016; essentially all of the remaining facilities at each of FPL and NEECH expire in 2020.
(c) Only available for the issuance of letters of credit.

Additionally, an indirect wholly-owned subsidiary of NEER has four variable rate Canadian revolving credit agreements with a capacity totaling C$1,000 million and expiration dates ranging from February 2016 to December 2016. These facilities are available for general corporate purposes; however, the current intent is to use these facilities for the purchase, development, construction and/or operation of Canadian renewable generating assets. In order to borrow or issue letters of credit under the terms of these agreements, among other things, NEE is required to maintain a ratio of funded debt to total capitalization that does not exceed a stated ratio. These agreements also contain certain covenants and default and related acceleration provisions relating to, among other things, failure of NEE to maintain a ratio of funded debt to total capitalization at or below the specified ratio. The payment obligations under these agreements are ultimately guaranteed by NEE. As of March 31, 2015, approximately $124 million of capacity remained available under these revolving credit agreements.

Also, an indirect wholly-owned subsidiary of NEER, has a $425 million limited-recourse variable rate construction and term loan facility maturing in 2035 and a $154 million variable rate cash grant bridge loan facility maturing in 2017. Proceeds from the borrowings under the construction and term loan facility and the cash grant bridge loan facility (cash grant loans) are available to fund a portion of the costs associated with the construction and development of a 250 MW solar PV project in California, which is expected to be completed by the end of 2016. The financing documents relating to the facilities contain default and related acceleration provisions relating to, among other things, the failure to make required payments or to observe other covenants in the financing documents (including a requirement that the solar PV project must be completed by a certain date). The payment obligations under the cash grant loans are guaranteed by NEECH, which are in turn guaranteed by NEE. Pursuant to the NEECH guarantee, if NEECH's senior unsecured debt rating falls below a specified threshold, the guaranty shall be replaced by an acceptable guarantee of another person, an acceptable letter of credit, or cash. As of March 31, 2015, approximately $402 million of the construction and term loan facility remained available.

Also, NEP OpCo, an indirect majority-owned subsidiary of NEER, and NEP OpCo's direct subsidiaries (Loan Parties) has a $250 million variable rate, senior secured revolving credit facility that expires in 2019. The revolving credit facility includes borrowing capacity for letters of credit and incremental commitments to increase the revolving credit facility to up to $1 billion in the aggregate, subject to certain conditions. Borrowings under the revolving credit facility can be used by the Loan Parties to fund working capital and expansion projects, to make acquisitions and for general business purposes. The financing documents related to the revolving credit facility contain default and related acceleration provisions relating to the failure to make required payments or to observe

other covenants in the revolving credit facility and related documents. Additionally, NEP OpCo and one of its direct subsidiaries are required to comply with certain financial covenants on a quarterly basis and NEP OpCo's ability to pay cash distributions is subject to certain other restrictions. All borrowings under the revolving credit facility are guaranteed by NEP OpCo and NEP, and must be repaid by the end of the revolving credit term. As of March 31, 2015, $128 million of capacity remained available under the revolving credit facility.

Capital Support

Letters of Credit, Surety Bonds and Guarantees
Certain subsidiaries of NEE, including FPL, obtain letters of credit and surety bonds and issue guarantees to facilitate commercial transactions with third parties and financings. Letters of credit, surety bonds and guarantees support, among other things, the buying and selling of wholesale energy commodities, debt and related reserves, capital expenditures for NEER's wind and solar development, nuclear activities and other contractual agreements. Substantially all of NEE's and FPL's guarantee arrangements are on behalf of their consolidated subsidiaries for their related payment obligations.

In addition, as part of contract negotiations in the normal course of business, NEE and certain of its subsidiaries, including FPL, may agree to make payments to compensate or indemnify other parties for possible future unfavorable financial consequences resulting from specified events. The specified events may include, but are not limited to, an adverse judgment in a lawsuit, the imposition of additional taxes due to a change in tax law or interpretations of the tax law or the non-receipt of renewable tax credits or proceeds from cash grants under the Recovery Act. NEE and FPL are unable to develop an estimate of the maximum potential amount of future payments under some of these contracts because events that would obligate them to make payments have not yet occurred or, if any such event has occurred, they have not been notified of its occurrence.

In addition, NEE has guaranteed certain payment obligations of NEECH, including most of its debt and all of its debentures and commercial paper issuances, as well as most of its payment guarantees and indemnifications, and NEECH has guaranteed certain debt and other obligations of NEER and its subsidiaries.

At March 31, 2015, NEE had approximately $1.1 billion of standby letters of credit ($4 million for FPL), $243 million of surety bonds ($63 million for FPL) and $11.2 billion notional amount of guarantees and indemnifications ($25 million for FPL), of which $6.2 billion of letters of credit, guarantees and indemnifications ($3 million for FPL) have expiration dates within the next five years.

Each of NEE and FPL believe it is unlikely that it would be required to make any payments under these letters of credit, surety bonds, guarantees and indemnifications. At March 31, 2015, NEE and FPL did not have any significant liabilities recorded for these letters of credit, surety bonds, guarantees and indemnifications.

New Accounting Rules and Interpretations

Amendments to the Consolidation Analysis - In February 2015, the FASB issued a new accounting standard that will modify current consolidation guidance. See Note 5 - Amendments to the Consolidation Analysis.

Presentation of Debt Issuance Costs - In April 2015, the FASB issued a new accounting standard which changes the presentation of debt issuance costs in financial statements. See Note 7 - Presentation of Debt Issuance Costs.

ENERGY MARKETING AND TRADING AND MARKET RISK SENSITIVITY

NEE and FPL are exposed to risks associated with adverse changes in commodity prices, interest rates and equity prices. Financial instruments and positions affecting the financial statements of NEE and FPL described below are held primarily for purposes other than trading. Market risk is measured as the potential loss in fair value resulting from hypothetical reasonably possible changes in commodity prices, interest rates or equity prices over the next year. Management has established risk management policies to monitor and manage such market risks, as well as credit risks.

Commodity Price Risk

NEE and FPL use derivative instruments (primarily swaps, options, futures and forwards) to manage the commodity price risk inherent in the purchase and sale of fuel and electricity. In addition, NEE, through NEER, uses derivatives to optimize the value of its power generation and gas infrastructure assets and engages in power and gas marketing and trading activities to take advantage of expected future favorable price movements. See Note 2.

The changes in the fair value of NEE's consolidated subsidiaries' energy contract derivative instruments for the three months ended March 31, 2015 were as follows:

	Trading	Hedges on Owned Assets: Non-Qualifying	Hedges on Owned Assets: FPL Cost Recovery Clauses	NEE Total
		(millions)		
Fair value of contracts outstanding at December 31, 2014	$ 320	$ 898	$ (363)	$ 855
Reclassification to realized at settlement of contracts	(66)	(66)	78	(54)
Inception value of new contracts	5	—	—	5
Net option premium purchases (issuances)	(6)	3	—	(3)
Changes in fair value excluding reclassification to realized	96	143	(86)	153
Fair value of contracts outstanding at March 31, 2015	349	978	(371)	956
Net margin cash collateral paid (received)				(185)
Total mark-to-market energy contract net assets (liabilities) at March 31, 2015	$ 349	$ 978	$ (371)	$ 771

NEE's total mark-to-market energy contract net assets (liabilities) at March 31, 2015 shown above are included on the condensed consolidated balance sheets as follows:

	March 31, 2015
	(millions)
Current derivative assets	$ 774
Noncurrent derivative assets	1,201
Current derivative liabilities	(890)
Noncurrent derivative liabilities	(314)
NEE's total mark-to-market energy contract net assets	$ 771

The sources of fair value estimates and maturity of energy contract derivative instruments at March 31, 2015 were as follows:

	Maturity						
	2015	2016	2017	2018	2019	Thereafter	Total
				(millions)			
Trading:

Significant unobservable inputs	118	49	46	(7)	7	(1)	212
Total	137	102	82	14	13	1	349
Owned Assets - Non-Qualifying:							
Quoted prices in active markets for identical assets	11	—	—	1	1	—	13
Significant other observable inputs	145	178	96	53	45	81	598
Significant unobservable inputs	50	40	33	27	21	196	367
Total	206	218	129	81	67	277	978
Owned Assets - FPL Cost Recovery Clauses:							
Quoted prices in active markets for identical assets	—	—	—	—	—	—	—
Significant other observable inputs	(355)	(15)	—	—	—	—	(370)
Significant unobservable inputs	—	(1)	—	—	—	—	(1)
Total	(355)	(16)	—	—	—	—	(371)
Total sources of fair value	$ (12)	$ 304	$ 211	$ 95	$ 80	$ 278	$ 956

The changes in the fair value of NEE's consolidated subsidiaries' energy contract derivative instruments for the three months ended March 31, 2014 were as follows:

	Trading	Hedges on Owned Assets: Non-Qualifying	Hedges on Owned Assets: FPL Cost Recovery Clauses	NEE Total
		(millions)		
Fair value of contracts outstanding at December 31, 2013	$ 301	$ 563	$ 46	$ 910
Reclassification to realized at settlement of contracts	36	119	(62)	93
Inception value of new contracts	(21)	—	—	(21)
Net option premium purchases (issuances)	4	1	—	5
Changes in fair value excluding reclassification to realized	(3)	(272)	136	(139)
Fair value of contracts outstanding at March 31, 2014	317	411	120	848
Net margin cash collateral paid (received)				(241)
Total mark-to-market energy contract net assets (liabilities) at March 31, 2014	$ 317	$ 411	$ 120	$ 607

With respect to commodities, NEE's EMC, which is comprised of certain members of senior management, and NEE's chief executive officer are responsible for the overall approval of market risk management policies and the delegation of approval and authorization levels. The EMC and NEE's chief executive officer receive periodic updates on market positions and related exposures, credit exposures and overall risk management activities.

NEE uses a value-at-risk (VaR) model to measure commodity price market risk in its trading and mark-to-market portfolios. The VaR is the estimated nominal loss of market value based on a one-day holding period at a 95% confidence level using historical simulation methodology. The VaR figures are as follows:

	Trading			Non-Qualifying Hedges and Hedges in FPL Cost Recovery Clauses[a]			Total		
	FPL	NEER	NEE	FPL	NEER	NEE	FPL	NEER	NEE
				(millions)					
December 31, 2014	$ —	$ 2	$ 2	$ 65	$ 62	$ 24	$ 65	$ 64	$ 24
March 31, 2015	$ —	$ 1	$ 1	$ 44	$ 38	$ 26	$ 44	$ 37	$ 26
Average for the three months ended March 31, 2015	$ —	$ 1	$ 1	$ 53	$ 47	$ 29	$ 53	$ 48	$ 29

(a) Non-qualifying hedges are employed to reduce the market risk exposure to physical assets or contracts which are not marked to market. The VaR figures for the non-qualifying hedges and hedges in FPL cost recovery clauses category do not represent the economic exposure to commodity price movements.

Interest Rate Risk

NEE's and FPL's financial results are exposed to risk resulting from changes in interest rates as a result of their respective issuances of debt, investments in special use funds and other investments. NEE and FPL manage their respective interest rate exposure by monitoring current interest rates, entering into interest rate contracts and using a combination of fixed rate and variable rate debt. Interest rate contracts are used to mitigate and adjust interest rate exposure when deemed appropriate based upon market conditions or when required by financing agreements.

The following are estimates of the fair value of NEE's and FPL's financial instruments that are exposed to interest rate risk:

	March 31, 2015		December 31, 2014	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
	(millions)			
NEE:				
Fixed income securities:				
Special use funds	$ 2,015	$ 2,015 (a)	$ 1,965	$ 1,965 (a)
Other investments:				
Debt securities	$ 133	$ 133 (a)	$ 124	$ 124 (a)
Primarily notes receivable	$ 527	$ 717 (b)	$ 525	$ 679 (b)
Long-term debt, including current maturities	$ 27,716	$ 30,544 (c)	$ 27,876	$ 30,337 (c)
Interest rate contracts - net unrealized losses	$ (256)	$ (256) (d)	$ (216)	$ (216) (d)
FPL:				
Fixed income securities - special use funds	$ 1,610	$ 1,610 (a)	$ 1,568	$ 1,568 (a)
Long-term debt, including current maturities	$ 9,443	$ 11,435 (c)	$ 9,473	$ 11,105 (c)

(a) Primarily estimated using quoted market prices for these or similar issues.
(b) Primarily estimated using a discounted cash flow valuation technique based on certain observable yield curves and indices considering the credit profile of the borrower.
(c) Estimated using either quoted market prices for the same or similar issues or discounted cash flow valuation technique, considering the current credit spread of the debtor.
(d) Modeled internally using discounted cash flow valuation technique and applying a credit valuation adjustment.

The special use funds of NEE and FPL consist of restricted funds set aside to cover the cost of storm damage for FPL and for the decommissioning of NEE's and FPL's nuclear power plants. A portion of these funds is invested in fixed income debt securities primarily carried at estimated fair value. At FPL, changes in fair value, including any OTTI losses, result in a corresponding adjustment to the related liability accounts based on current regulatory treatment. The changes in fair value of NEE's non-rate regulated operations result in a corresponding adjustment to OCI, except for impairments deemed to be other than temporary, including any credit losses, which are reported in current period earnings. Because the funds set aside by FPL for storm damage could be needed at any time, the related investments are generally more liquid and, therefore, are less sensitive to changes in interest rates. The nuclear decommissioning funds, in contrast, are generally invested in longer-term securities, as decommissioning activities are not scheduled to begin until at least 2030 (2032 at FPL).

As of March 31, 2015, NEE had interest rate contracts with a notional amount of approximately $7.1 billion related to long-term debt issuances, of which $2.4 billion are fair value hedges at NEECH that effectively convert fixed-rate debt to a variable-rate instrument. The remaining $4.7 billion of notional amount of interest rate contracts relate to cash flow hedges to manage exposure to the variability of cash flows associated with variable-rate debt instruments, which primarily relate to NEER debt issuances. At March 31, 2015, the estimated fair value of NEE's fair value hedges and cash flow hedges was approximately $46 million and $(302) million, respectively. See Note 2.

Based upon a hypothetical 10% decrease in interest rates, which is a reasonable near-term market change, the net fair value of NEE's net liabilities would increase by approximately $890 million ($488 million for FPL) at March 31, 2015.

Equity Price Risk

NEE and FPL are exposed to risk resulting from changes in prices for equity securities. For example, NEE's nuclear decommissioning reserve funds include marketable equity securities primarily carried at their market value of approximately $2,672 million and $2,634 million ($1,578 million and $1,561 million for FPL) at March 31, 2015 and December 31, 2014, respectively. At March 31, 2015, a hypothetical 10% decrease in the prices quoted on stock exchanges, which is a reasonable near-term market change, would result in a $253 million ($150 million for FPL) reduction in fair value. For FPL, a corresponding adjustment would be made to the related liability accounts based on current regulatory treatment, and for NEE's non-rate regulated operations, a corresponding adjustment would be made to OCI to the extent the market value of the securities exceeded amortized cost and to OTTI loss to the extent the market value is below amortized cost.

Credit Risk

NEE and its subsidiaries are also exposed to credit risk through their energy marketing and trading operations. Credit risk is the risk that a financial loss will be incurred if a counterparty to a transaction does not fulfill its financial obligation. NEE manages counterparty credit risk for its subsidiaries with energy marketing and trading operations through established policies, including counterparty credit limits, and in some cases credit enhancements, such as cash prepayments, letters of credit, cash and other collateral and guarantees.

Credit risk is also managed through the use of master netting agreements. NEE's credit department monitors current and forward credit exposure to counterparties and their affiliates, both on an individual and an aggregate basis. For all derivative and contractual transactions, NEE's energy marketing and trading operations, which include FPL's energy marketing and trading division, are exposed to losses in the event of nonperformance by counterparties to these transactions. Some relevant considerations when assessing NEE's energy marketing and trading operations' credit risk exposure include the following:

- Operations are primarily concentrated in the energy industry.
- Trade receivables and other financial instruments are predominately with energy, utility and financial services related companies, as well as municipalities, cooperatives and other trading companies in the U.S.
- Overall credit risk is managed through established credit policies and is overseen by the EMC.
- Prospective and existing customers are reviewed for creditworthiness based upon established standards, with customers not meeting minimum standards providing various credit enhancements or secured payment terms, such as letters of credit or the posting of margin cash collateral.
- Master netting agreements are used to offset cash and non-cash gains and losses arising from derivative instruments with the same counterparty. NEE's policy is to have master netting agreements in place with significant counterparties.

Based on NEE's policies and risk exposures related to credit, NEE and FPL do not anticipate a material adverse effect on their financial statements as a result of counterparty nonperformance. As of March 31, 2015, approximately 93% of NEE's and 94% of FPL's energy marketing and trading counterparty credit risk exposure is associated with companies that have investment grade credit ratings.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

See Management's Discussion - Energy Marketing and Trading and Market Risk Sensitivity.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

As of March 31, 2015, each of NEE and FPL had performed an evaluation, under the supervision and with the participation of its management, including NEE's and FPL's chief executive officer and chief financial officer, of the effectiveness of the design and operation of each company's disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 Rules 13a-15(e) and 15d-15(e)). Based upon that evaluation, the chief executive officer and the chief financial officer of each of NEE and FPL concluded that the company's disclosure controls and procedures were effective as of March 31, 2015.

(b) Changes in Internal Control Over Financial Reporting

NEE and FPL are continuously seeking to improve the efficiency and effectiveness of their operations and of their internal controls. This results in refinements to processes throughout NEE and FPL. However, there has been no change in NEE's or FPL's internal control over financial reporting (as defined in the Securities Exchange Act of 1934 Rules 13a-15(f) and 15d-15(f)) that occurred during NEE's and FPL's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, NEE's or FPL's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

NEE and FPL are parties to various legal and regulatory proceedings in the ordinary course of their respective businesses. For information regarding legal proceedings that could have a material effect on NEE or FPL, see Item 3. Legal Proceedings and Note 13 - Legal Proceedings to Consolidated Financial Statements in the 2014 Form 10-K and Note 8 - Legal Proceedings herein. Such descriptions are incorporated herein by reference.

Item 1A. Risk Factors

There have been no material changes from the risk factors disclosed in the 2014 Form 10-K. The factors discussed in Part I, Item 1A. Risk Factors in the 2014 Form 10-K, as well as other information set forth in this report, which could materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects should be carefully considered. The risks described in the 2014 Form 10-K are not the only risks facing NEE and FPL. Additional risks and uncertainties not currently known to NEE or FPL, or that are currently deemed to be immaterial, also may materially adversely affect NEE's or FPL's business, financial condition, results of operations and prospects.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(c) Information regarding purchases made by NEE of its common stock during the three months ended March 31, 2015 is as follows:

Period	Total Number of Shares Purchased[a]	Average Price Paid Per Share	Total Number of Shares Purchased as Part of a Publicly Announced Program	Maximum Number of Shares that May Yet be Purchased Under the Program[b]
1/1/15 - 1/31/15	—	$ —	—	13,274,748
2/1/15 - 2/28/15	83,181	$ 103.62	—	13,274,748
3/1/15 - 3/31/15	492	$ 101.27	—	13,274,748
Total	83,673	$ 103.61	—	

(a) Includes: (1) in February 2015, shares of common stock withheld from employees to pay certain withholding taxes upon the vesting of stock awards granted to such employees under the NextEra Energy, Inc. Amended and Restated 2011 Long Term Incentive Plan; and (2) in March 2015, shares of common stock purchased as a reinvestment of dividends by the trustee of a grantor trust in connection with NEE's obligation under a February 2006 grant under the NextEra Energy, Inc. Amended and Restated Long-Term Incentive Plan (former LTIP) to an executive officer of deferred retirement share awards.

(b) In February 2005, NEE's Board of Directors authorized common stock repurchases of up to 20 million shares of common stock over an unspecified period, which authorization was most recently reaffirmed and ratified by the Board of Directors in July 2011.

Item 5. Other Information

(a) None

(b) None

(c) Other events

(i) Reference is made to Item 1. Business - NEE's Operating Subsidiaries - FPL - FPL System Capability and Load in the 2014 Form 10-K.

FPL indicated in its 2015 Ten Year Site Plan filed with the FPSC that it planned to add additional power resources beginning in June 2019. FPL's best self-build generation option for 2019 is a new approximately 1,620 MW natural gas-fired combined-cycle unit in Okeechobee County, Florida. In March 2015, FPL issued an RFP inviting other power suppliers to propose power purchase alternatives to FPL's combined cycle option to meet this generation need. Responses to the RFP will be evaluated against FPL's combined-cycle option. FPL plans to make a decision regarding the best and most cost-effective option to meet its customers' needs for 2019 and beyond, before the end of July 2015.

(ii) Reference is made to Item 1. Business - NEE's Operating Subsidiaries - FPL - FPL Sources of Generation - Fossil Operations (Natural Gas, Coal and Oil) in the 2014 Form 10-K.

In March 2015, FPL announced plans to replace 44 of its 48 gas turbines at its Lauderdale, Port Everglades and Fort Myers facilities, totaling approximately 1,700 MW of capacity, with 7 high efficiency, low-emission combustion turbines at its Lauderdale and Fort Myers facilities, totaling approximately 1,610 MW of capacity, by December 2016. In addition, FPL plans to upgrade 2 additional simple-cycle combustion turbines at its Fort Myers facility, which is expected to add an additional 50 MW of capacity, by December 2016.

(iii) Reference is made to Item 1. Business - NEE's Operating Subsidiaries - FPL - FPL Sources of Generation - Nuclear Operations - Spent Nuclear Fuel in the 2014 Form 10-K.

In February 2015, the NRC rejected all pending petitions related to the Continued Storage of Spent Nuclear Fuel Rule including the petition to suspend final reactor licensing decisions in all open NRC licensing proceedings. The petitions previously filed with the U.S. Court of Appeals for the District of Columbia Circuit challenging the rule are ongoing and briefs are expected to be filed in the summer of 2015.

(iv) Reference is made to Item 1. Business - NEE's Operating Subsidiaries - FPL - FPL Sources of Generation - Nuclear Operations in the 2014 Form 10-K.

The current operating licenses for FPL's nuclear units at the Turkey Point site include, among other things, a requirement that the maximum allowed water temperature in the Turkey Point cooling canal system not exceed approximately 104 degrees. In the summer of 2014, numerous factors contributed to higher-than-normal temperatures in the cooling canal system, including high summer temperatures, lack of rainfall, reduced water levels and the existence of an algae bloom. There remains a potential for higher-than-normal temperatures in the cooling canal system through the summer of 2015, with the temperatures expected to decline in mid-fall 2015. Management is in the process of implementing a comprehensive plan to improve conditions in the cooling canal system and has contingency plans if water temperatures approach the maximum permitted level, including temporarily reducing power output at the nuclear units. However, if the water temperature exceeds the maximum permitted level, FPL will be required to commence shut down of the Turkey Point nuclear units within a certain timeframe until the water temperature returns to below the maximum permitted level, unless relief from the maximum temperature requirement is requested by FPL and granted by the NRC.

*Incorporated herein by reference

NEE and FPL agree to furnish to the SEC upon request any instrument with respect to long-term debt that NEE and FPL have not filed as an exhibit pursuant to the exemption provided by Item 601(b)(4)(iii)(A) of Regulation S-K.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrants have duly caused this report to be signed on their behalf by the undersigned thereunto duly authorized.

Date: April 30, 2015

NEXTERA ENERGY, INC.
(Registrant)

CHRIS N. FROGGATT

Chris N. Froggatt
Vice President, Controller and Chief Accounting Officer
of NextEra Energy, Inc.
(Principal Accounting Officer of NextEra Energy, Inc.)

FLORIDA POWER & LIGHT COMPANY
(Registrant)

KIMBERLY OUSDAHL

Kimberly Ousdahl
Vice President, Controller and Chief Accounting Officer
of Florida Power & Light Company
(Principal Accounting Officer of
Florida Power & Light Company)

Exhibit 12(a)

NEXTERA ENERGY, INC. AND SUBSIDIARIES
COMPUTATION OF RATIO OF EARNINGS TO FIXED CHARGES AND
RATIO OF EARNINGS TO COMBINED FIXED CHARGES AND PREFERRED STOCK DIVIDENDS[a]

	Three Months Ended March 31, 2015
	(millions of dollars)
Earnings, as defined:	
Net income	$ 650
Income taxes	286
Fixed charges included in the determination of net income, as below	337
Amortization of capitalized interest	10
Distributed income of equity method investees	6
Less: Equity in earnings of equity method investees	9
Total earnings, as defined	$ 1,280
Fixed charges, as defined:	
Interest expense	$ 321
Rental interest factor	13
Allowance for borrowed funds used during construction	3
Fixed charges included in the determination of net income	337
Capitalized interest	18
Total fixed charges, as defined	$ 355
Ratio of earnings to fixed charges and ratio of earnings to combined fixed charges and preferred stock dividends[a]	3.61

(a) NextEra Energy, Inc. has no preference equity securities outstanding; therefore, the ratio of earnings to fixed charges is the same as the ratio of earnings to combined fixed charges and preferred stock dividends.

Exhibit 12(b)

FLORIDA POWER & LIGHT COMPANY AND SUBSIDIARIES
COMPUTATION OF RATIO OF EARNINGS TO FIXED CHARGES AND
RATIO OF EARNINGS TO COMBINED FIXED CHARGES AND PREFERRED STOCK DIVIDENDS[a]

	Three Months Ended March 31, 2015
	(millions of dollars)
Earnings, as defined:	
Net income	$ 359
Income taxes	204
Fixed charges, as below	121
Total earnings, as defined	$ 684
Fixed charges, as defined:	
Interest expense	$ 115
Rental interest factor	3
Allowance for borrowed funds used during construction	3
Total fixed charges, as defined	$ 121
Ratio of earnings to fixed charges and ratio of earnings to combined fixed charges and preferred stock dividends[a]	5.65

(a) Florida Power & Light Company has no preference equity securities outstanding; therefore, the ratio of earnings to fixed charges is the same as the ratio of earnings to combined fixed charges and preferred stock dividends.

Exhibit 31(a)

Rule 13a-14(a)/15d-14(a) Certification

I, James L. Robo, certify that:

1. I have reviewed this Form 10-Q for the quarterly period ended March 31, 2015 of NextEra Energy, Inc. (the registrant);

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

MORAY P. DEWHURST

Moray P. Dewhurst
Executive Vice President, Finance
and Chief Financial Officer
of Florida Power & Light Company

Exhibit 32(a)

Section 1350 Certification

We, James L. Robo and Moray P. Dewhurst, certify, pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

(1) The Quarterly Report on Form 10-Q of NextEra Energy, Inc. (the registrant) for the quarterly period ended March 31, 2015 (Report) fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

(2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the registrant.

Dated: April 30, 2015

JAMES L. ROBO

James L. Robo
Chairman, President and Chief Executive Officer
of NextEra Energy, Inc.

MORAY P. DEWHURST

Moray P. Dewhurst
Vice Chairman and Chief Financial Officer,
and Executive Vice President - Finance
of NextEra Energy, Inc.

A signed original of this written statement required by Section 906 has been provided to the registrant and will be retained by the registrant and furnished to the Securities and Exchange Commission or its staff upon request.

The foregoing certification is being furnished as an exhibit to the Report pursuant to Item 601(b)(32) of Regulation S-K and Section 906 of the Sarbanes-Oxley Act of 2002 and, accordingly, is not being filed with the Securities and Exchange Commission as part of the Report and is not to be incorporated by reference into any filing of the registrant under the Securities Act of 1933 or the Securities Exchange Act of 1934 (whether made before or after the date of the Report, irrespective of any general incorporation language contained in such filing).

Exhibit 32(b)

Section 1350 Certification

We, Eric E. Silagy and Moray P. Dewhurst, certify, pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

(1) The Quarterly Report on Form 10-Q of Florida Power & Light Company (the registrant) for the quarterly period ended March 31, 2015 (Report) fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

(2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the registrant.

Dated: April 30, 2015

ERIC E. SILAGY

Eric E. Silagy
President and Chief Executive Officer
of Florida Power & Light Company

MORAY P. DEWHURST

Moray P. Dewhurst
Executive Vice President, Finance and
Chief Financial Officer
of Florida Power & Light Company

A signed original of this written statement required by Section 906 has been provided to the registrant and will be retained by the registrant and furnished to the Securities and Exchange Commission or its staff upon request.

The foregoing certification is being furnished as an exhibit to the Report pursuant to Item 601(b)(32) of Regulation S-K and Section 906 of the Sarbanes-Oxley Act of 2002 and, accordingly, is not being filed with the Securities and Exchange Commission as part of the Report and is not to be incorporated by reference into any filing of the registrant under the Securities Act of 1933 or the Securities Exchange Act of 1934 (whether made before or after the date of the Report, irrespective of any general incorporation language contained in such filing).

Exhibit 3 (d)

Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2015.

UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Juno Beach, Florida 33408
(561) 694-4000

State or other jurisdiction of incorporation or organization: Florida

Indicate by check mark whether the registrants (1) have filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) have been subject to such filing requirements for the past 90 days.

NextEra Energy, Inc. Yes ☑ No ☐ Florida Power & Light Company Yes ☑ No ☐

Indicate by check mark whether the registrants have submitted electronically and posted on their corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months.

NextEra Energy, Inc. Yes ☑ No ☐ Florida Power & Light Company Yes ☑ No ☐

Indicate by check mark whether the registrants are a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Securities Exchange Act of 1934.

NextEra Energy, Inc.	Large Accelerated Filer ☑	Accelerated Filer ☐	Non-Accelerated Filer ☐	Smaller Reporting Company ☐
Florida Power & Light Company	Large Accelerated Filer ☐	Accelerated Filer ☐	Non-Accelerated Filer ☑	Smaller Reporting Company ☐

Indicate by check mark whether the registrants are shell companies (as defined in Rule 12b-2 of the Securities Exchange Act of 1934). Yes ☐ No ☑

Number of shares of NextEra Energy, Inc. common stock, $0.01 par value, outstanding as of June 30, 2015: 452,102,026

Number of shares of Florida Power & Light Company common stock, without par value, outstanding as of June 30, 2015, all of which were held, beneficially and of record, by NextEra Energy, Inc.: 1,000

This combined Form 10-Q represents separate filings by NextEra Energy, Inc. and Florida Power & Light Company. Information contained herein relating to an individual registrant is filed by that registrant on its own behalf. Florida Power & Light Company makes no representations as to the information relating to NextEra Energy, Inc.'s other operations.

Florida Power & Light Company meets the conditions set forth in General Instruction H.(1)(a) and (b) of Form 10-Q and is therefore filing this Form with the reduced disclosure format.

DEFINITIONS

Acronyms and defined terms used in the text include the following:

Term	Meaning
AFUDC	allowance for funds used during construction
AFUDC - equity	equity component of AFUDC
AOCI	accumulated other comprehensive income
Duane Arnold	Duane Arnold Energy Center
EPA	U.S. Environmental Protection Agency
FASB	Financial Accounting Standards Board
FERC	U.S. Federal Energy Regulatory Commission
Florida Southeast Connection	Florida Southeast Connection, LLC, a wholly-owned NEECH subsidiary
FPL	Florida Power & Light Company
FPL FiberNet	fiber-optic telecommunications business
FPSC	Florida Public Service Commission
fuel clause	fuel and purchased power cost recovery clause, as established by the FPSC
GAAP	generally accepted accounting principles in the U.S.
ITC	investment tax credit
kWh	kilowatt-hour(s)
Management's Discussion	Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
MMBtu	One million British thermal units
MW	megawatt(s)
MWh	megawatt-hour(s)
NEE	NextEra Energy, Inc.
NEECH	NextEra Energy Capital Holdings, Inc.
NEER	NextEra Energy Resources, LLC
NEET	NextEra Energy Transmission, LLC
NEP	NextEra Energy Partners, LP
NEP OpCo	NextEra Energy Operating Partners, LP
Note __	Note __ to condensed consolidated financial statements
NRC	U.S. Nuclear Regulatory Commission
O&M expenses	other operations and maintenance expenses in the condensed consolidated statements of income
OCI	other comprehensive income
OTC	over-the-counter
OTTI	other than temporary impairment
PTC	production tax credit
PV	photovoltaic
Recovery Act	American Recovery and Reinvestment Act of 2009, as amended
regulatory ROE	return on common equity as determined for regulatory purposes
RFP	request for proposal
Sabal Trail	Sabal Trail Transmission, LLC, an entity in which a NEECH subsidiary has a 33% ownership interest
Seabrook	Seabrook Station
SEC	U.S. Securities and Exchange Commission
U.S.	United States of America

NEE, FPL, NEECH and NEER each has subsidiaries and affiliates with names that may include NextEra Energy, FPL, NextEra Energy Resources, NextEra, FPL Group, FPL Group Capital, FPL Energy, FPLE and similar references. For convenience and simplicity, in this report the terms NEE, FPL, NEECH and NEER are sometimes used as abbreviated references to specific subsidiaries, affiliates or groups of subsidiaries or affiliates. The precise meaning depends on the context.

TABLE OF CONTENTS

FORWARD-LOOKING STATEMENTS

This report includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Any statements that express, or involve discussions as to, expectations, beliefs, plans, objectives, assumptions, strategies, future events or performance (often, but not always, through the use of words or phrases such as may result, are expected to, will continue, is anticipated, aim, believe, will, could, should, would, estimated, may, plan, potential, future, projection, goals, target, outlook, predict and intend or words of similar meaning) are not statements of historical facts and may be forward looking. Forward-looking statements involve estimates, assumptions and uncertainties. Accordingly, any such statements are qualified in their entirety by reference to, and are accompanied by, the following important factors (in addition to any assumptions and other factors referred to specifically in connection with such forward-looking statements) that could have a significant impact on NEE's and/or FPL's operations and financial results, and could cause NEE's and/or FPL's actual results to differ materially from those contained or implied in forward-looking statements made by or on behalf of NEE and/or FPL in this combined Form 10-Q, in presentations, on their respective websites, in response to questions or otherwise.

Regulatory, Legislative and Legal Risks

- NEE's and FPL's business, financial condition, results of operations and prospects may be materially adversely affected by the extensive regulation of their business.
- NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected if they are unable to recover in a timely manner any significant amount of costs, a return on certain assets or a reasonable return on invested capital through base rates, cost recovery clauses, other regulatory mechanisms or otherwise.
- Regulatory decisions that are important to NEE and FPL may be materially adversely affected by political, regulatory and economic factors.
- FPL's use of derivative instruments could be subject to prudence challenges and, if found imprudent, could result in disallowances of cost recovery for such use by the FPSC.
- Any reductions to, or the elimination of, governmental incentives that support utility scale renewable energy, including, but not limited to, tax incentives, renewable portfolio standards or feed-in tariffs, or the imposition of additional taxes or other assessments on renewable energy, could result in, among other items, the lack of a satisfactory market for the development of new renewable energy projects, NEER abandoning the development of renewable energy projects, a loss of NEER's investments in renewable energy projects and reduced project returns, any of which could have a material adverse effect on NEE's business, financial condition, results of operations and prospects.
- NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected as a result of new or revised laws, regulations or interpretations or other regulatory initiatives.
- NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected if the rules implementing the Dodd-Frank Wall Street Reform and Consumer Protection Act broaden the scope of its provisions regarding the regulation of OTC financial derivatives and make certain provisions applicable to NEE and FPL.
- NEE and FPL are subject to numerous environmental laws, regulations and other standards that may result in capital expenditures, increased operating costs and various liabilities, and may require NEE and FPL to limit or eliminate certain operations.
- NEE's and FPL's business could be negatively affected by federal or state laws or regulations mandating new or additional limits on the production of greenhouse gas emissions.
- Extensive federal regulation of the operations of NEE and FPL exposes NEE and FPL to significant and increasing compliance costs and may also expose them to substantial monetary penalties and other sanctions for compliance failures.
- Changes in tax laws, as well as judgments and estimates used in the determination of tax-related asset and liability amounts, could materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.
- NEE's and FPL's business, financial condition, results of operations and prospects may be materially adversely affected due to adverse results of litigation.

Operational Risks

- NEE's and FPL's business, financial condition, results of operations and prospects could suffer if NEE and FPL do not proceed with projects under development or are unable to complete the construction of, or capital improvements to, electric generation, transmission and distribution facilities, gas infrastructure facilities or other facilities on schedule or within budget.
- NEE and FPL may face risks related to project siting, financing, construction, permitting, governmental approvals and the negotiation of project development agreements that may impede their development and operating activities.
- The operation and maintenance of NEE's and FPL's electric generation, transmission and distribution facilities, gas infrastructure facilities and other facilities are subject to many operational risks, the consequences of which could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

- NEE's and FPL's business, financial condition, results of operations and prospects may be negatively affected by a lack of growth or slower growth in the number of customers or in customer usage.
- NEE's and FPL's business, financial condition, results of operations and prospects can be materially adversely affected by weather conditions, including, but not limited to, the impact of severe weather.
- Threats of terrorism and catastrophic events that could result from terrorism, cyber attacks, or individuals and/or groups attempting to disrupt NEE's and FPL's business, or the businesses of third parties, may materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.
- The ability of NEE and FPL to obtain insurance and the terms of any available insurance coverage could be materially adversely affected by international, national, state or local events and company-specific events, as well as the financial condition of insurers. NEE's and FPL's insurance coverage does not provide protection against all significant losses.
- NEE invests in gas and oil producing assets through NEER's gas infrastructure business. The gas infrastructure business is exposed to fluctuating market prices of natural gas, natural gas liquids, oil and other energy commodities. A prolonged period of low gas and oil prices could impact NEER's gas infrastructure business and cause NEER to delay or cancel certain gas infrastructure projects and for certain existing projects to be impaired, which could materially adversely affect NEE's results of operations.
- If supply costs necessary to provide NEER's full energy and capacity requirement services are not favorable, operating costs could increase and materially adversely affect NEE's business, financial condition, results of operations and prospects.
- Due to the potential for significant volatility in market prices for fuel, electricity and renewable and other energy commodities, NEER's inability or failure to manage properly or hedge effectively the commodity risks within its portfolios could materially adversely affect NEE's business, financial condition, results of operations and prospects.
- Sales of power on the spot market or on a short-term contractual basis may cause NEE's results of operations to be volatile.
- Reductions in the liquidity of energy markets may restrict the ability of NEE to manage its operational risks, which, in turn, could negatively affect NEE's results of operations.
- NEE's and FPL's hedging and trading procedures and associated risk management tools may not protect against significant losses.
- If price movements significantly or persistently deviate from historical behavior, NEE's and FPL's risk management tools associated with their hedging and trading procedures may not protect against significant losses.
- If power transmission or natural gas, nuclear fuel or other commodity transportation facilities are unavailable or disrupted, FPL's and NEER's ability to sell and deliver power or natural gas may be limited.
- NEE and FPL are subject to credit and performance risk from customers, hedging counterparties and vendors.
- NEE and FPL could recognize financial losses or a reduction in operating cash flows if a counterparty fails to perform or make payments in accordance with the terms of derivative contracts or if NEE or FPL is required to post margin cash collateral under derivative contracts.
- NEE and FPL are highly dependent on sensitive and complex information technology systems, and any failure or breach of those systems could have a material adverse effect on their business, financial condition, results of operations and prospects.
- NEE's and FPL's retail businesses are subject to the risk that sensitive customer data may be compromised, which could result in a material adverse impact to their reputation and/or the results of operations of the retail business.
- NEE and FPL could recognize financial losses as a result of volatility in the market values of derivative instruments and limited liquidity in OTC markets.
- NEE and FPL may be materially adversely affected by negative publicity.
- NEE's and FPL's business, financial condition, results of operations and prospects may be materially adversely affected if FPL is unable to maintain, negotiate or renegotiate franchise agreements on acceptable terms with municipalities and counties in Florida.
- Increasing costs associated with health care plans may materially adversely affect NEE's and FPL's results of operations.
- NEE's and FPL's business, financial condition, results of operations and prospects could be negatively affected by the lack of a qualified workforce or the loss or retirement of key employees.
- NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected by work strikes or stoppages and increasing personnel costs.
- NEE's ability to successfully identify, complete and integrate acquisitions is subject to significant risks, including, but not limited to, the effect of increased competition for acquisitions resulting from the consolidation of the power industry.

- NEP's NET Holdings Management, LLC (NET Midstream) acquisition and other future acquisitions by NEP may not be completed and, even if completed, NEE may not realize the anticipated benefits of such acquisitions, which could materially adversely affect NEE's business, financial condition, results of operations and prospects

Nuclear Generation Risks

- The construction, operation and maintenance of NEE's and FPL's nuclear generation facilities involve environmental, health and financial risks that could result in fines or the closure of the facilities and in increased costs and capital expenditures.
- In the event of an incident at any nuclear generation facility in the U.S. or at certain nuclear generation facilities in Europe, NEE and FPL could be assessed significant retrospective assessments and/or retrospective insurance premiums as a result of their participation in a secondary financial protection system and nuclear insurance mutual companies.
- NRC orders or new regulations related to increased security measures and any future safety requirements promulgated by the NRC could require NEE and FPL to incur substantial operating and capital expenditures at their nuclear generation facilities.
- The inability to operate any of NEER's or FPL's nuclear generation units through the end of their respective operating licenses could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.
- Various hazards posed to nuclear generation facilities, along with increased public attention to and awareness of such hazards, could result in increased nuclear licensing or compliance costs which are difficult or impossible to predict and could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.
- NEE's and FPL's nuclear units are periodically removed from service to accommodate normal refueling and maintenance outages, and for other purposes. If planned outages last longer than anticipated or if there are unplanned outages, NEE's and FPL's results of operations and financial condition could be materially adversely affected.

Liquidity, Capital Requirements and Common Stock Risks

- Disruptions, uncertainty or volatility in the credit and capital markets may negatively affect NEE's and FPL's ability to fund their liquidity and capital needs and to meet their growth objectives, and can also materially adversely affect the results of operations and financial condition of NEE and FPL.
- NEE's, NEECH's and FPL's inability to maintain their current credit ratings may materially adversely affect NEE's and FPL's liquidity and results of operations, limit the ability of NEE and FPL to grow their business, and increase interest costs.
- NEE's and FPL's liquidity may be impaired if their credit providers are unable to fund their credit commitments to the companies or to maintain their current credit ratings.
- Poor market performance and other economic factors could affect NEE's defined benefit pension plan's funded status, which may materially adversely affect NEE's and FPL's business, financial condition, liquidity and results of operations and prospects.
- Poor market performance and other economic factors could adversely affect the asset values of NEE's and FPL's nuclear decommissioning funds, which may materially adversely affect NEE's and FPL's liquidity and results of operations.
- Certain of NEE's investments are subject to changes in market value and other risks, which may materially adversely affect NEE's liquidity, financial results and results of operations.
- NEE may be unable to meet its ongoing and future financial obligations and to pay dividends on its common stock if its subsidiaries are unable to pay upstream dividends or repay funds to NEE.
- NEE may be unable to meet its ongoing and future financial obligations and to pay dividends on its common stock if NEE is required to perform under guarantees of obligations of its subsidiaries.
- Disruptions, uncertainty or volatility in the credit and capital markets may exert downward pressure on the market price of NEE's common stock.

These factors should be read together with the risk factors included in Part I, Item 1A. Risk Factors in NEE's and FPL's Annual Report on Form 10-K for the year ended December 31, 2014 (2014 Form 10-K) and in Part II, Item 1A. Risk Factors in this combined Form 10-Q, and investors should refer to those sections of the 2014 Form 10-K and this combined Form 10-Q. Any forward-looking statement speaks only as of the date on which such statement is made, and NEE and FPL undertake no obligation to update any forward-looking statement to reflect events or circumstances, including, but not limited to, unanticipated events, after the date on which such statement is made, unless otherwise required by law. New factors emerge from time to time and it is not possible for management to predict all of such factors, nor can it assess the impact of each such factor on the business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained or implied in any forward-looking statement.

Website Access to SEC Filings. NEE and FPL make their SEC filings, including the annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and any amendments to those reports, available free of charge on NEE's internet website, www.nexteraenergy.com, as soon as reasonably practicable after those documents are electronically filed with or furnished to the SEC. The information and materials available on NEE's website (or any of its subsidiaries' websites) are not incorporated by reference into this combined Form 10-Q. The SEC maintains an internet website that contains reports, proxy and information statements and other information regarding registrants that file electronically with the SEC at www.sec.gov.

This report should be read in conjunction with the Notes herein and the Notes to Consolidated Financial Statements appearing in the 2014 Form 10-K.

The accompanying condensed consolidated financial statements should be read in conjunction with the 2014 Form 10-K. In the opinion of NEE and FPL management, all adjustments (consisting of normal recurring accruals) considered necessary for fair financial statement presentation have been made. Certain amounts included in the prior year's condensed consolidated financial statements have been reclassified to conform to the current year's presentation. The results of operations for an interim period generally will not give a true indication of results for the year.

1. Employee Retirement Benefits

NEE sponsors a qualified noncontributory defined benefit pension plan for substantially all employees of NEE and its subsidiaries and has a supplemental executive retirement plan, which includes a non-qualified supplemental defined benefit pension component that provides benefits to a select group of management and highly compensated employees (collectively, pension benefits). In addition to pension benefits, NEE sponsors a contributory postretirement plan for health care and life insurance benefits (other benefits) for retirees of NEE and its subsidiaries meeting certain eligibility requirements.

The components of net periodic benefit (income) cost for the plans are as follows:

	Pension Benefits		Other Benefits		Pension Benefits		Other Benefits	
	Three Months Ended June 30,		Three Months Ended June 30,		Six Months Ended June 30,		Six Months Ended June 30,

Net periodic benefit (income) cost at FPL	**$ (13)**	$ (12)	**$ 2**	$ 3	**$ (26)**	$ (23)	**$ 5**	$ 6

2. Derivative Instruments

NEE and FPL use derivative instruments (primarily swaps, options, futures and forwards) to manage the commodity price risk inherent in the purchase and sale of fuel and electricity, as well as interest rate and foreign currency exchange rate risk associated primarily with outstanding and forecasted debt issuances and borrowings, and to optimize the value of NEER's power generation and gas infrastructure assets.

With respect to commodities related to NEE's competitive energy business, NEER employs risk management procedures to conduct its activities related to optimizing the value of its power generation and gas infrastructure assets, providing full energy and capacity requirements services primarily to distribution utilities, and engaging in power and gas marketing and trading activities to take advantage of expected future favorable price movements and changes in the expected volatility of prices in the energy markets. These risk management activities involve the use of derivative instruments executed within prescribed limits to manage the risk associated with fluctuating commodity prices. Transactions in derivative instruments are executed on recognized exchanges or via the OTC markets, depending on the most favorable credit terms and market execution factors. For NEER's power generation and gas infrastructure assets, derivative instruments are used to hedge the commodity price risk associated with the fuel requirements of the assets, where applicable, as well as to hedge all or a portion of the expected output of these assets. These hedges are designed to reduce the effect of adverse changes in the wholesale forward commodity markets associated with NEER's power generation and gas infrastructure assets. With regard to full energy and capacity requirements services, NEER is required to vary the quantity of energy and related services based on the load demands of the customers served. For this type of transaction, derivative instruments are used to hedge the anticipated electricity quantities required to serve these customers and reduce the effect of unfavorable changes in the forward energy markets. Additionally, NEER takes positions in the energy markets based on differences between actual forward market levels and management's view of fundamental market conditions, including supply/demand imbalances, changes in traditional flows of energy, changes in short- and long-term weather patterns and anticipated regulatory and legislative outcomes. NEER uses derivative instruments to realize value from these market dislocations, subject to strict risk management limits around market, operational and credit exposure.

Derivative instruments, when required to be marked to market, are recorded on NEE's and FPL's condensed consolidated balance sheets as either an asset or liability measured at fair value. At FPL, substantially all changes in the derivatives' fair value are deferred as a regulatory asset or liability until the contracts are settled, and, upon settlement, any gains or losses are passed through the

fuel clause. For NEE's non-rate regulated operations, predominantly NEER, essentially all changes in the derivatives' fair value for power purchases and sales, fuel sales and trading activities are recognized on a net basis in operating revenues; fuel purchases used in the production of electricity are recognized in fuel, purchased power and interchange expense; and the equity method investees' related activity is recognized in equity in earnings of equity method investees in NEE's condensed consolidated statements of income. Settlement gains and losses are included within the line items in the condensed consolidated statements of income to which they relate. Transactions for which physical delivery is deemed not to have occurred are presented on a net basis in the condensed consolidated statements of income. For commodity derivatives, NEE believes that, where offsetting positions exist at the same location for the same time, the transactions are considered to have been netted and therefore physical delivery has been deemed not to have occurred for financial reporting purposes. Settlements related to derivative instruments are primarily recognized in net cash provided by operating activities in NEE's and FPL's condensed consolidated statements of cash flows.

While most of NEE's derivatives are entered into for the purpose of managing commodity price risk, optimizing the value of NEER's power generation and gas infrastructure assets, reducing the impact of volatility in interest rates on outstanding and forecasted debt issuances and managing foreign currency risk, hedge accounting is only applied where specific criteria are met and it is practicable to do so. In order to apply hedge accounting, the transaction must be designated as a hedge and it must be highly effective in offsetting the hedged risk. Additionally, for hedges of forecasted transactions, the forecasted transactions must be probable. For interest rate and foreign currency derivative instruments, generally NEE assesses a hedging instrument's effectiveness by using nonstatistical methods including dollar value comparisons of the change in the fair value of the derivative to the change in the fair value or cash flows of the hedged item. Hedge effectiveness is tested at the inception of the hedge and on at least a quarterly basis throughout its life. The effective portion of the gain or loss on a derivative instrument designated as a cash flow hedge is reported as a component of OCI and is reclassified into earnings in the period(s) during which the transaction being hedged affects earnings or when it becomes probable that a forecasted transaction being hedged would not occur. The ineffective portion of net unrealized gains (losses) on these hedges is reported in earnings in the current period. At June 30, 2015, NEE's AOCI included amounts related to interest rate cash flow hedges with expiration dates through March 2035 and foreign currency cash flow hedges with expiration dates through September 2030. Approximately $58 million of net losses included in AOCI at June 30, 2015 is expected to be reclassified into earnings within the next 12 months as the principal and/or interest payments are made. Such amounts assume no change in interest rates, currency exchange rates or scheduled principal payments.

Fair Value of Derivative Instruments - The tables below present NEE's and FPL's gross derivative positions at June 30, 2015 and December 31, 2014, as required by disclosure rules. However, the majority of the underlying contracts are subject to master netting agreements and generally would not be contractually settled on a gross basis. Therefore, the tables below also present the derivative positions on a net basis, which reflect the offsetting of positions of certain transactions within the portfolio, the contractual ability to settle contracts under master netting arrangements and the netting of margin cash collateral (see Note 3 - Recurring Fair Value Measurements for netting information), as well as the location of the net derivative position on the condensed consolidated balance sheets.

(c) Reflects the netting of approximately $20 million in margin cash collateral paid to counterparties.
(d) Reflects the netting of approximately $10 million in margin cash collateral paid to counterparties.

At June 30, 2015 and December 31, 2014, NEE had approximately $20 million and $60 million (none at FPL), respectively, in margin cash collateral received from counterparties that was not offset against derivative assets in the above presentation. These amounts are included in current other liabilities on NEE's condensed consolidated balance sheets. Additionally, at June 30, 2015 and December 31, 2014, NEE had approximately $238 million and $122 million (none at FPL), respectively, in margin cash collateral paid to counterparties that was not offset against derivative assets or liabilities in the above presentation. These amounts are included in current other assets on NEE's condensed consolidated balance sheets.

Income Statement Impact of Derivative Instruments - Gains (losses) related to NEE's cash flow hedges are recorded in NEE's condensed consolidated financial statements (none at FPL) as follows:

Gains (losses) reclassified from AOCI to net income	$ (38) (a)	$ (17) (b)	$ (55)	$ (32) (a)	$ 25 (b)	$ (7)

(a) Included in interest expense.
(b) For 2015 and 2014, losses of approximately $6 million and $2 million, respectively, are included in interest expense and the balances are included in other - net.

For the three months ended June 30, 2015 and 2014, NEE recorded a loss of approximately $19 million and a gain of $15 million, respectively, on fair value hedges which resulted in a corresponding decrease and increase, respectively, in the related debt. For the six months ended June 30, 2015 and 2014, NEE recorded a loss of approximately $3 million and a gain of $19 million, respectively, on fair value hedges which resulted in a corresponding decrease and increase, respectively, in the related debt.

Gains (losses) related to NEE's derivatives not designated as hedging instruments are recorded in NEE's condensed consolidated statements of income as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
	(millions)			
Commodity contracts:(a)				
Operating revenues	$ 178	$ (153)	$ 415	$ (425)
Fuel, purchased power and interchange	—	—	2	(4)
Foreign currency swap - other - net	—	(6)	—	(1)
Interest rate contracts - interest expense	24	(8)	11	(35)
Total	$ 202	$ (167)	$ 428	$ (465)

(a) For the three and six months ended June 30, 2015, FPL recorded approximately $23 million of gains and $63 million of losses, respectively, related to commodity contracts as regulatory liabilities and regulatory assets, respectively, on its condensed consolidated balance sheets. For the three and six months ended June 30, 2014, FPL recorded approximately $11 million and $147 million of gains, respectively, related to commodity contracts as regulatory liabilities on its condensed consolidated balance sheets.

Notional Volumes of Derivative Instruments - The following table represents net notional volumes associated with derivative instruments that are required to be reported at fair value in NEE's and FPL's condensed consolidated financial statements. The table includes significant volumes of transactions that have minimal exposure to commodity price changes because they are variably priced agreements. These volumes are only an indication of the commodity exposure that is managed through the use of derivatives. They do not represent net physical asset positions or non-derivative positions and their hedges, nor do they represent NEE's and FPL's net economic exposure, but only the net notional derivative positions that fully or partially hedge the related asset positions. NEE and FPL had derivative commodity contracts for the following net notional volumes:

Commodity Type	June 30, 2015				December 31, 2014			
	NEE		FPL		NEE		FPL	
	(millions)							
Power	(112)	MWh	—		(73)	MWh	—	
Natural gas	1,365	MMBtu	912	MMBtu	1,436	MMBtu	845	MMBtu
Oil	(11)	barrels	—		(11)	barrels	—	

At June 30, 2015 and December 31, 2014, NEE had interest rate contracts with notional amounts totaling approximately $8.5 billion and $7.4 billion, respectively, and foreign currency swaps with notional amounts totaling approximately $683 million and $661 million, respectively.

Credit-Risk-Related Contingent Features - Certain derivative instruments contain credit-risk-related contingent features including, among other things, the requirement to maintain an investment grade credit rating from specified credit rating agencies and certain financial ratios, as well as credit-related cross-default and material adverse change triggers. At June 30, 2015 and December 31,

2014, the aggregate fair value of NEE's derivative instruments with credit-risk-related contingent features that were in a liability position was approximately $2.2 billion ($161 million for FPL) and $2.7 billion ($369 million for FPL), respectively.

If the credit-risk-related contingent features underlying these agreements and other commodity-related contracts were triggered, certain subsidiaries of NEE, including FPL, could be required to post collateral or settle contracts according to contractual terms which generally allow netting of contracts in offsetting positions. Certain contracts contain multiple types of credit-related triggers. To the extent these contracts contain a credit ratings downgrade trigger, the maximum exposure is included in the following credit ratings collateral posting requirements. If FPL's and NEECH's credit ratings were downgraded to BBB/Baa2 (a two level downgrade for FPL and a one level downgrade for NEECH from the current lowest applicable rating), applicable NEE subsidiaries would be required to post collateral such that the total posted collateral would be approximately $370 million ($40 million at FPL) as of June 30, 2015 and $700 million ($130 million at FPL) as of December 31, 2014. If FPL's and NEECH's credit ratings were downgraded to below investment grade, applicable NEE subsidiaries would be required to post additional collateral such that the total posted collateral would be approximately $2.5 billion ($0.6 billion at FPL) and $2.8 billion ($0.7 billion at FPL) as of June 30, 2015 and December 31, 2014, respectively. Some contracts do not contain credit ratings downgrade triggers, but do contain provisions that require certain financial measures be maintained and/or have credit-related cross-default triggers. In the event these provisions were triggered, applicable NEE subsidiaries could be required to post additional collateral of up to approximately $770 million ($165 million at FPL) and $850 million ($200 million at FPL) as of June 30, 2015 and December 31, 2014, respectively.

Collateral related to derivatives may be posted in the form of cash or credit support in the normal course of business. At June 30, 2015, applicable NEE subsidiaries have posted approximately $125 million (none at FPL) in cash which could be applied toward the collateral requirements described above. In addition, at June 30, 2015 and December 31, 2014, applicable NEE subsidiaries have posted approximately $83 million (none at FPL) and $236 million (none at FPL), respectively, in the form of letters of credit which could be applied toward the collateral requirements described above. FPL and NEECH have credit facilities generally in excess of the collateral requirements described above that would be available to support, among other things, derivative activities. Under the terms of the credit facilities, maintenance of a specific credit rating is not a condition to drawing on these credit facilities, although there are other conditions to drawing on these credit facilities.

Additionally, some contracts contain certain adequate assurance provisions where a counterparty may demand additional collateral based on subjective events and/or conditions. Due to the subjective nature of these provisions, NEE and FPL are unable to determine an exact value for these items and they are not included in any of the quantitative disclosures above.

3. Fair Value Measurements

The fair value of assets and liabilities are determined using either unadjusted quoted prices in active markets (Level 1) or pricing inputs that are observable (Level 2) whenever that information is available and using unobservable inputs (Level 3) to estimate fair value only when relevant observable inputs are not available. NEE and FPL use several different valuation techniques to measure the fair value of assets and liabilities, relying primarily on the market approach of using prices and other market information for identical and/or comparable assets and liabilities for those assets and liabilities that are measured at fair value on a recurring basis. NEE's and FPL's assessment of the significance of any particular input to the fair value measurement requires judgment and may affect their placement within the fair value hierarchy levels. Non-performance risk, including the consideration of a credit valuation adjustment, is also considered in the determination of fair value for all assets and liabilities measured at fair value.

Cash Equivalents - Cash equivalents consist of short-term, highly liquid investments with original maturities of three months or less. NEE primarily holds investments in money market funds. The fair value of these funds is calculated using current market prices.

Special Use Funds and Other Investments - NEE and FPL hold primarily debt and equity securities directly, as well as indirectly through commingled funds. Substantially all directly held equity securities are valued at their quoted market prices. For directly held debt securities, multiple prices and price types are obtained from pricing vendors whenever possible, which enables cross-provider validations. A primary price source is identified based on asset type, class or issue of each security. Commingled funds, which are similar to mutual funds, are maintained by banks or investment companies and hold certain investments in accordance with a stated set of objectives. The fair value of commingled funds is primarily derived from the quoted prices in active markets of the underlying securities. Because the fund shares are offered to a limited group of investors, they are not considered to be traded in an active market.

Derivative Instruments - NEE and FPL measure the fair value of commodity contracts using prices observed on commodities exchanges and in the OTC markets, or through the use of industry-standard valuation techniques, such as option modeling or discounted cash flows techniques, incorporating both observable and unobservable valuation inputs. The resulting measurements are the best estimate of fair value as represented by the transfer of the asset or liability through an orderly transaction in the marketplace at the measurement date.

Most exchange-traded derivative assets and liabilities are valued directly using unadjusted quoted prices. For exchange-traded derivative assets and liabilities where the principal market is deemed to be inactive based on average daily volumes and open interest, the measurement is established using settlement prices from the exchanges, and therefore considered to be valued using other observable inputs.

NEE, through its subsidiaries, including FPL, also enters into OTC commodity contract derivatives. The majority of these contracts are transacted at liquid trading points, and the prices for these contracts are verified using quoted prices in active markets from exchanges, brokers or pricing services for similar contracts.

NEE, through NEER, also enters into full requirements contracts, which, in most cases, meet the definition of derivatives and are measured at fair value. These contracts typically have one or more inputs that are not observable and are significant to the valuation of the contract. In addition, certain exchange and non-exchange traded derivative options at NEE have one or more significant inputs that are not observable, and are valued using industry-standard option models.

In all cases where NEE and FPL use significant unobservable inputs for the valuation of a commodity contract, consideration is given to the assumptions that market participants would use in valuing the asset or liability. The primary input to the valuation models for commodity contracts is the forward commodity curve for the respective instruments. Other inputs include, but are not limited to, assumptions about market liquidity, volatility, correlation and contract duration as more fully described below in Significant Unobservable Inputs Used in Recurring Fair Value Measurements. In instances where the reference markets are deemed to be inactive or do not have transactions for a similar contract, the derivative assets and liabilities may be valued using significant other observable inputs and potentially significant unobservable inputs. In such instances, the valuation for these contracts is established using techniques including extrapolation from or interpolation between actively traded contracts, or estimated basis adjustments from liquid trading points. NEE and FPL regularly evaluate and validate the inputs used to determine fair value by a number of methods, consisting of various market price verification procedures, including the use of pricing services and multiple broker quotes to support the market price of the various commodities. In all cases where there are assumptions and

models used to generate inputs for valuing derivative assets and liabilities, the review and verification of the assumptions, models and changes to the models are undertaken by individuals that are independent of those responsible for estimating fair value.

NEE uses interest rate contracts and foreign currency swaps to mitigate and adjust interest rate and foreign currency exposure related primarily to certain outstanding and forecasted debt issuances and borrowings when deemed appropriate based on market conditions or when required by financing agreements. NEE estimates the fair value of these derivatives using a discounted cash flows valuation technique based on the net amount of estimated future cash inflows and outflows related to the agreements.

Recurring Fair Value Measurements - NEE's and FPL's financial assets and liabilities and other fair value measurements made on a recurring basis by fair value hierarchy level are as follows:

	June 30, 2015				
	Level 1	Level 2	Level 3	Netting[a]	Total
			(millions)

(d) See Note 2 - Fair Value of Derivative Instruments for a reconciliation of net derivatives to NEE's and FPL's condensed consolidated balance sheets.

Significant Unobservable Inputs Used in Recurring Fair Value Measurements - The valuation of certain commodity contracts requires the use of significant unobservable inputs. All forward price, implied volatility, implied correlation and interest rate inputs used in the valuation of such contracts are directly based on third-party market data, such as broker quotes and exchange settlements, when that data is available. If third-party market data is not available, then industry standard methodologies are used to develop inputs that maximize the use of relevant observable inputs and minimize the use of unobservable inputs. Observable inputs, including some forward prices, implied volatilities and interest rates used for determining fair value are updated daily to reflect the best available market information. Unobservable inputs which are related to observable inputs, such as illiquid portions of forward price or volatility curves, are updated daily as well, using industry standard techniques such as interpolation and extrapolation, combining observable forward inputs supplemented by historical market and other relevant data. Other unobservable inputs, such as implied correlations, customer migration rates from full requirements contracts and some implied volatility curves, are modeled using proprietary models based on historical data and industry standard techniques.

All price, volatility, correlation and customer migration inputs used in valuation are subject to validation by the Trading Risk Management group. The Trading Risk Management group performs a risk management function responsible for assessing credit, market and operational risk impact, reviewing valuation methodology and modeling, confirming transactions, monitoring approval processes and developing and monitoring trading limits. The Trading Risk Management group is separate from the transacting group. For markets where independent third-party data is readily available, validation is conducted daily by directly reviewing this market data against inputs utilized by the transacting group, and indirectly by critically reviewing daily risk reports. For markets where independent third-party data is not readily available, additional analytical reviews are performed on at least a quarterly basis. These analytical reviews are designed to ensure that all price and volatility curves used for fair valuing transactions are adequately validated each quarter, and are reviewed and approved by the Trading Risk Management group. In addition, other valuation assumptions such as implied correlations and customer migration rates are reviewed and approved by the Trading Risk Management group on a periodic basis. Newly created models used in the valuation process are also subject to testing and approval by the Trading Risk Management group prior to use and established models are reviewed annually, or more often as needed, by the Trading Risk Management group.

On a monthly basis, the Exposure Management Committee (EMC), which is comprised of certain members of senior management, meets with representatives from the Trading Risk Management group and the transacting group to discuss NEE's and FPL's energy risk profile and operations, to review risk reports and to discuss fair value issues as necessary. The EMC develops guidelines required for an appropriate risk management control infrastructure, which includes implementation and monitoring of compliance with Trading Risk Management policy. The EMC executes its risk management responsibilities through direct oversight and delegation of its responsibilities to the Trading Risk Management group, as well as to other corporate and business unit personnel.

The significant unobservable inputs used in the valuation of NEE's commodity contracts categorized as Level 3 of the fair value hierarchy at June 30, 2015 are as follows:

Transaction Type	Fair Value at June 30, 2015		Valuation Technique(s)	Significant Unobservable Inputs	Range
	Assets	Liabilities			
	(millions)				
Forward contracts - power	$ 561	$ 180	Discounted cash flow	Forward price (per MWh)	$2 — $135
Forward contracts - gas	59	38	Discounted cash flow	Forward price (per MMBtu)	$1 — $8
Forward contracts - other commodity related	13	5	Discounted cash flow	Forward price (various)	$(32) — $47
Options - power	171	153	Option models	Implied correlations	(4)% — 99%
				Implied volatilities	2% — 260%
Options - primarily gas	91	169	Option models	Implied correlations	(4)% — 99%
				Implied volatilities	1% — 97%
Full requirements and unit contingent contracts	323	30	Discounted cash flow	Forward price (per MWh)	$(21) — $158
				Customer migration rate[a]	—% — 20%
Total	$ 1,218	$ 575			

(a) Applies only to full requirements contracts.

The sensitivity of NEE's fair value measurements to increases (decreases) in the significant unobservable inputs is as follows:

Significant Unobservable Input	Position	Impact on Fair Value Measurement
Forward price	Purchase power/gas	Increase (decrease)
	Sell power/gas	Decrease (increase)
Implied correlations	Purchase option	Decrease (increase)
	Sell option	Increase (decrease)
Implied volatilities	Purchase option	Increase (decrease)
	Sell option	Decrease (increase)
Customer migration rate	Sell power[a]	Decrease (increase)

(a) Assumes the contract is in a gain position.

In addition, the fair value measurement of interest rate swap liabilities related to the solar projects in Spain of approximately $99 million at June 30, 2015 includes a significant credit valuation adjustment. The credit valuation adjustment, considered an unobservable input, reflects management's assessment of non-performance risk of the subsidiaries related to the solar projects in Spain that are party to the swap agreements.

The reconciliation of changes in the fair value of derivatives that are based on significant unobservable inputs is as follows:

	Three Months Ended June 30,			
	2015		2014	
	NEE	FPL	NEE	FPL
	(millions)			
Fair value of net derivatives based on significant unobservable inputs at March 31	$ 451	$ (1)	$ 460	$ 3
Realized and unrealized gains (losses):				
Included in earnings[a]	224	—	(73)	—
Included in other comprehensive income	(7)	—	—	—
Included in regulatory assets and liabilities	5	5	1	1
Purchases	61	—	10	—
Settlements	(80)	—	38	(1)
Issuances	(112)	—	(75)	—
Transfers in[b]	1	—	9	—
Transfers out[b]	1	—	(16)	—
Fair value of net derivatives based on significant unobservable inputs at June 30	$ 544	$ 4	$ 354	$ 3
The amount of gains (losses) for the period included in earnings attributable to the change in unrealized gains (losses) relating to derivatives still held at the reporting date[c]	$ 206	$ —	$ (73)	$ —

(a) For the three months ended June 30, 2015 and 2014, realized and unrealized gains (losses) of approximately $202 million and $(49) million are reflected in the condensed consolidated statements of income in operating revenues and the balance is reflected in interest expense.
(b) Transfers into Level 3 were a result of decreased observability of market data and transfers from Level 3 to Level 2 were a result of increased observability of market data. NEE's and FPL's policy is to recognize all transfers at the beginning of the reporting period.
(c) For the three months ended June 30, 2015 and 2014, unrealized gains (losses) of approximately $184 million and $(49) million are reflected in the condensed consolidated statements of income in operating revenues and the balance is reflected in interest expense.

	Six Months Ended June 30,			
	2015		2014	
	NEE	FPL	NEE	FPL
	(millions)			
Fair value of net derivatives based on significant unobservable inputs at December 31	$ 622	$ 5	$ 622	$ —
Realized and unrealized gains (losses):				
Included in earnings[a]	254	—	(496)	—
Included in other comprehensive income	8	—	—	—
Included in regulatory assets and liabilities	4	4	5	5
Purchases	83	—	14	—

Issuances	(132)	—	(94)	—
Transfers in[b]	(18)	—	16	—
Transfers out[b]	(10)	—	(17)	—
Fair value of net derivatives based on significant unobservable inputs at June 30	$ 544	$ 4	$ 354	$ 3
The amount of gains (losses) for the period included in earnings attributable to the change in unrealized gains (losses) relating to derivatives still held at the reporting date[c]	$ 224	$ —	$ (260)	$ —

(a) For the six months ended June 30, 2015, realized and unrealized gains of approximately $248 million are reflected in the condensed consolidated statements of income in operating revenues, $5 million in interest expense and the balance is reflected in fuel, purchased power and interchange. For the six months ended June 30, 2014, realized and unrealized losses of approximately $453 million are reflected in the condensed consolidated statements of income in operating revenues, $41 million in interest expense and the balance is reflected in fuel, purchased power and interchange.
(b) Transfers into Level 3 were a result of decreased observability of market data and transfers from Level 3 to Level 2 were a result of increased observability of market data. NEE's and FPL's policy is to recognize all transfers at the beginning of the reporting period.
(c) For the six months ended June 30, 2015 and 2014, unrealized gains (losses) of approximately $219 million and $(219) million are reflected in the condensed consolidated statements of income in operating revenues and the balance is reflected in interest expense.

Nonrecurring Fair Value Measurements - In March 2013, NEER initiated a plan and received internal authorization to pursue the sale of its ownership interests in oil-fired generating plants located in Maine (Maine fossil), which resulted in the recording of a loss

during that period which was reflected within discontinued operations at NEE. In March 2014, NEER decided not to pursue the sale of Maine fossil due to the divergence between the achievable sales price and management's view of the assets' value, which increased as a result of significant market changes. Accordingly, the Maine fossil assets were written-up to management's current estimate of fair value resulting in a gain of approximately $21 million ($12 million after-tax) which is included as a separate line item in NEE's condensed consolidated statements of income. The fair value measurement (Level 3) was estimated using an income approach based primarily on the updated capacity revenue forecasts.

Fair Value of Financial Instruments Recorded at the Carrying Amount - The carrying amounts of cash equivalents and short-term debt approximate their fair values. The carrying amounts and estimated fair values of other financial instruments, excluding those recorded at fair value and disclosed above in Recurring Fair Value Measurements, are as follows:

	June 30, 2015		December 31, 2014	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
	(millions)			
NEE:				
Special use funds[a]	$ 556	$ 556	$ 567	$ 567
Other investments - primarily notes receivable	$ 524	$ 666 [b]	$ 525	$ 679 [b]
Long-term debt, including current maturities	$ 27,998	$ 29,490 [c]	$ 27,876	$ 30,337 [c]
FPL:				
Special use funds[a]	$ 419	$ 419	$ 395	$ 395
Long-term debt, including current maturities	$ 9,529	$ 10,576 [c]	$ 9,473	$ 11,105 [c]

(a) Primarily represents investments accounted for under the equity method and loans not measured at fair value on a recurring basis.
(b) Primarily classified as held to maturity. Fair values are primarily estimated using a discounted cash flow valuation technique based on certain observable yield curves and indices considering the credit profile of the borrower (Level 3). Notes receivable bear interest primarily at fixed rates and mature by 2029. Notes receivable are considered impaired and placed in non-accrual status when it becomes probable that all amounts due cannot be collected in accordance with the contractual terms of the agreement. The assessment to place notes receivable in non-accrual status considers various credit indicators, such as credit ratings and market-related information. As of June 30, 2015 and December 31, 2014, NEE had no notes receivable reported in non-accrual status.
(c) As of June 30, 2015 and December 31, 2014, for NEE, $18,560 million and $19,973 million, respectively, is estimated using quoted market prices for the same or similar issues (Level 2); the balance is estimated using a discounted cash flow valuation technique, considering the current credit spread of the debtor (Level 3). For FPL, estimated using quoted market prices for the same or similar issues (Level 2).

Special Use Funds - The special use funds noted above and those carried at fair value (see Recurring Fair Value Measurements above) consist of FPL's storm fund assets of approximately $75 million at both June 30, 2015 and December 31, 2014 and NEE's nuclear decommissioning fund assets of $5,135 million and $5,091 million at June 30, 2015 and December 31, 2014, respectively ($3,469 million and $3,449 million, respectively, for FPL). The investments held in the special use funds consist of equity and debt securities which are primarily classified as available for sale and carried at estimated fair value. The amortized cost of debt and equity securities is approximately $1,825 million and $1,564 million, respectively, at June 30, 2015 and $1,906 million and $1,366 million, respectively, at December 31, 2014 ($1,406 million and $821 million, respectively, at June 30, 2015 and $1,519 million and $664 million, respectively, at December 31, 2014 for FPL). For FPL's special use funds, consistent with regulatory treatment, changes in fair value, including any other than temporary impairment losses, result in a corresponding adjustment to the related regulatory liability accounts. For NEE's non-rate regulated operations, changes in fair value result in a corresponding adjustment to OCI, except for unrealized losses associated with marketable securities considered to be other than temporary, including any credit losses, which are recognized as other than temporary impairment losses on securities held in nuclear decommissioning funds and included in other - net in NEE's condensed consolidated statements of income. Debt securities included in the nuclear decommissioning funds have a weighted-average maturity at June 30, 2015 of approximately eight years at both NEE and FPL. FPL's storm fund primarily consists of debt securities with a weighted-average maturity at June 30, 2015 of approximately three years. The cost of securities sold is determined using the specific identification method.

Realized gains and losses and proceeds from the sale or maturity of available for sale securities are as follows:

	NEE		FPL		NEE		FPL	
	Three Months Ended June 30,		Three Months Ended June 30,		Six Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	**2015**	2014	**2015**	2014	**2015**	2014
	(millions)							
Realized gains	**$ 50**	$ 71	**$ 34**	$ 56	**$ 91**	$ 148	**$ 45**	$ 88
Realized losses	**$ 19**	$ 83	**$ 9**	$ 76	**$ 32**	$ 105	**$ 15**	$ 93
Proceeds from sale or maturity of securities	**$ 2,201**	$ 813	**$ 1,949**	$ 637	**$ 2,930**	$ 2,214	**$ 2,538**	$ 1,799

Unrealized losses on available for sale debt securities at June 30, 2015 and December 31, 2014 were not material to NEE or FPL. The unrealized gains on available for sale securities are as follows:

	NEE		FPL	
	June 30, 2015	December 31, 2014	**June 30, 2015**	December 31, 2014
	(millions)			
Equity securities	**$ 1,265**	$ 1,267	**$ 899**	$ 896
Debt securities	**$ 22**	$ 66	**$ 17**	$ 54

Regulations issued by the FERC and the NRC provide general risk management guidelines to protect nuclear decommissioning funds and to allow such funds to earn a reasonable return. The FERC regulations prohibit, among other investments, investments in any securities of NEE or its subsidiaries, affiliates or associates, excluding investments tied to market indices or mutual funds. Similar restrictions applicable to the decommissioning funds for NEER's nuclear plants are included in the NRC operating licenses for those facilities or in NRC regulations applicable to NRC licensees not in cost-of-service environments. With respect to the decommissioning fund for Seabrook, decommissioning fund contributions and withdrawals are also regulated by the Nuclear Decommissioning Financing Committee pursuant to New Hampshire law.

The nuclear decommissioning reserve funds are managed by investment managers who must comply with the guidelines of NEE and FPL and the rules of the applicable regulatory authorities. The funds' assets are invested giving consideration to taxes, liquidity, risk, diversification and other prudent investment objectives.

4. Income Taxes

NEE's effective income tax rates for the three months ended June 30, 2015 and 2014 were approximately 28% and 37%, respectively. The rates for both periods reflect the benefit of PTCs of approximately $37 million and $49 million, respectively, related to NEER's wind projects, as well as ITCs and deferred income tax benefits associated with grants under the Recovery Act (convertible ITCs) totaling approximately $34 million and $13 million, respectively, related to certain solar and wind projects at NEER, including, in 2015, the effect of a state income tax law change that extends the ITC carryforward period for certain wind projects.

NEE's effective income tax rates for the six months ended June 30, 2015 and 2014 were approximately 29% and 33%, respectively. The rates for both periods reflect the benefit of PTCs of approximately $75 million and $98 million, respectively, related to NEER's wind projects, as well as ITCs and deferred income tax benefits associated convertible ITCs totaling approximately $52 million and $33 million, respectively, related to certain solar and wind projects at NEER, including, in 2015, the effect of a state income tax law change that extends the ITC carryforward period for certain wind projects.

In addition, the rates for the three and six months ended June 30, 2014 reflect a noncash income tax charge of approximately $45 million associated with structuring Canadian assets in connection with the creation of NEP.

NEE recognizes PTCs as wind energy is generated and sold based on a per kWh rate prescribed in applicable federal and state statutes, which may differ significantly from amounts computed, on a quarterly basis, using an overall effective income tax rate anticipated for the full year. NEE uses this method of recognizing PTCs for specific reasons, including that PTCs are an integral part of the financial viability of most wind projects and a fundamental component of such wind projects' results of operations. PTCs, as well as deferred income tax benefits associated with convertible ITCs, can significantly affect NEE's effective income tax rate depending on the amount of pretax income. The amount of PTCs recognized can be significantly affected by wind generation and by the roll off of PTCs after ten years of production (PTC roll off).

5. Variable Interest Entities (VIEs)

As of June 30, 2015, NEE has nineteen VIEs which it consolidates and has interests in certain other VIEs which it does not consolidate.

FPL - FPL is considered the primary beneficiary of, and therefore consolidates, a VIE that is a wholly-owned bankruptcy remote special purpose subsidiary that it formed in 2007 for the sole purpose of issuing storm-recovery bonds pursuant to the securitization provisions of the Florida Statutes and a financing order of the FPSC. FPL is considered the primary beneficiary because FPL has the power to direct the significant activities of the VIE, and its equity investment, which is subordinate to the bondholder's interest in the VIE, is at risk. Storm restoration costs incurred by FPL during 2005 and 2004 exceeded the amount in FPL's funded storm and property insurance reserve, resulting in a storm reserve deficiency. In 2007, the VIE issued $652 million aggregate principal amount of senior secured bonds (storm-recovery bonds), primarily for the after-tax equivalent of the total of FPL's unrecovered balance of the 2004 storm restoration costs, the 2005 storm restoration costs and to reestablish FPL's storm and property insurance reserve. In connection with this financing, net proceeds, after debt issuance costs, to the VIE (approximately $644 million) were used to acquire the storm-recovery property, which includes the right to impose, collect and receive a storm-recovery charge from all customers receiving electric transmission or distribution service from FPL under rate schedules approved by the FPSC or under special contracts, certain other rights and interests that arise under the financing order issued by the FPSC and certain other collateral pledged by the VIE that issued the bonds. The storm-recovery bonds are payable only from and are secured by the storm-recovery property. The bondholders have no recourse to the general credit of FPL. The assets of the VIE were approximately $251 million and $279 million at June 30, 2015 and December 31, 2014, respectively, and consisted primarily of storm-recovery property, which are included in securitized storm-recovery costs on NEE's and FPL's condensed consolidated balance sheets. The liabilities of the VIE were approximately $307 million and $338 million at June 30, 2015 and December 31, 2014, respectively, and consisted primarily of storm-recovery bonds, which are included in long-term debt on NEE's and FPL's condensed consolidated balance sheets.

FPL entered into a purchased power agreement effective in 1994 with a 250 MW coal-fired qualifying facility and a purchased power agreement effective in 1995 with a 330 MW coal-fired qualifying facility to purchase substantially all of each facility's capacity and electrical output over a substantial portion of their estimated useful life. These facilities are considered VIEs because FPL absorbs a portion of each facility's variability related to changes in the market price of coal through the price it pays per MWh (energy payment). Since FPL does not control the most significant activities of each facility, including operations and maintenance, FPL is not the primary beneficiary and does not consolidate these VIEs. The energy payments paid by FPL will fluctuate as coal prices change. This fluctuation does not expose FPL to losses since the energy payments paid by FPL to each facility are recovered through the fuel clause as approved by the FPSC. See Note 8 - Contracts for a discussion of FPL's pending purchase of the 250 MW coal-fired facility.

NEER - NEE consolidates eighteen NEER VIEs. NEER is considered the primary beneficiary of these VIEs since NEER controls the most significant activities of these VIEs, including operations and maintenance, as well as construction, and through its equity ownership has the obligation to absorb expected losses of these VIEs.

A NEER VIE consolidates two entities which own and operate natural gas/oil electric generating facilities with the capability of producing 110 MW. This VIE sells its electric output under power sales contracts to a third party, with expiration dates in 2018 and 2020. The power sales contracts provide the offtaker the ability to dispatch the facilities and require the offtaker to absorb the cost of fuel. This VIE uses third-party debt and equity to finance its operations. The debt is secured by liens against the generating facilities and the other assets of these entities. The debt holders have no recourse to the general credit of NEER for the repayment of debt. The assets and liabilities of the VIE were approximately $84 million and $50 million, respectively, at June 30, 2015 and $85 million and $55 million, respectively, at December 31, 2014, and consisted primarily of property, plant and equipment and long-term debt.

An indirect subsidiary of NEER contributed, to a NEP subsidiary, a 50% ownership interest in an entity which owns a 250 MW solar PV facility under construction. The entity is considered a VIE since it has insufficient equity at risk, and is consolidated by NEER. The VIE primarily uses third party debt to finance a portion of development and construction activities and may require subordinated financing from NEER to complete construction. This VIE will sell its electric output under a power sales contract to a third party with an expiration date in 2036. The debt balances are secured by liens against the assets of the entity. The debt holders have no recourse to the general credit of NEER. The assets and liabilities of the VIE were approximately $324 million and $310 million, respectively, at June 30, 2015, and consisted primarily of property, plant and equipment and long-term debt.

The other sixteen NEER VIEs consolidate several entities which own and operate wind electric generating facilities with the capability of producing a total of 4,490 MW. These VIEs sell their electric output either under power sales contracts to third parties with expiration dates ranging from 2018 through 2039 or in the spot market. The VIEs use third-party debt and/or equity to finance their operations. Certain investors that hold no equity interest in the VIEs hold differential membership interests, which give them the right to receive a portion of the economic attributes of the generating facilities, including certain tax attributes. The debt is secured by liens against the generating facilities and the other assets of these entities or by pledges of NEER's ownership interest in these

entities. The debt holders have no recourse to the general credit of NEER for the repayment of debt. The assets and liabilities of these VIEs totaled approximately $6.5 billion and $3.8 billion, respectively, at June 30, 2015 and $6.6 billion and $4.1 billion, respectively, at December 31, 2014. At June 30, 2015 and December 31, 2014, the assets and liabilities of the VIEs consisted primarily of property, plant and equipment, deferral related to differential membership interests and long-term debt.

Other - As of June 30, 2015 and December 31, 2014, several NEE subsidiaries have investments totaling approximately $610 million ($502 million at FPL) and $716 million ($606 million at FPL), respectively, in certain special purpose entities, which consisted primarily of investments in mortgage-backed securities. These investments are included in special use funds and other investments on NEE's condensed consolidated balance sheets and in special use funds on FPL's condensed consolidated balance sheets. As of June 30, 2015, NEE subsidiaries, including FPL, are not the primary beneficiary and therefore do not consolidate any of these entities because they do not control any of the ongoing activities of these entities, were not involved in the initial design of these entities and do not have a controlling financial interest in these entities.

Amendments to the Consolidation Analysis - In February 2015, the FASB issued a new accounting standard that will modify current consolidation guidance. The standard makes changes to both the variable interest entity model and the voting interest entity model, including modifying the evaluation of whether limited partnerships or similar legal entities are VIEs or voting interest entities and amending the guidance for assessing how relationships of related parties affect the consolidation analysis of VIEs. The standard is effective for NEE and FPL beginning January 1, 2016. NEE and FPL are currently evaluating the effect the adoption of this standard will have, if any, on their consolidated financial statements.

6. Common Shareholders' Equity

Earnings Per Share - The reconciliation of NEE's basic and diluted earnings per share attributable to NEE is as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	**2015**	2014
	(millions, except per share amounts)			
Numerator - net income attributable to NEE	**$ 716**	$ 492	**$ 1,366**	$ 921
Denominator:				
Weighted-average number of common shares outstanding - basic	**445.5**	434.1	**443.9**	433.8
Equity units, performance share awards, options, forward sale agreement and restricted stock[a]	**3.7**	6.0	**5.1**	5.5
Weighted-average number of common shares outstanding - assuming dilution	**449.2**	440.1	**449.0**	439.3
Earnings per share attributable to NEE:				
Basic	**$ 1.61**	$ 1.13	**$ 3.08**	$ 2.12
Assuming dilution	**$ 1.59**	$ 1.12	**$ 3.04**	$ 2.10

(a) Calculated using the treasury stock method. Performance share awards are included in diluted weighted-average number of common shares outstanding based upon what would be issued if the end of the reporting period was the end of the term of the award.

Common shares issuable pursuant to equity units, stock options and performance shares awards and restricted stock which were not included in the denominator above due to their antidilutive effect were approximately 5.5 million and 0.2 million for the three months ended June 30, 2015 and 2014, respectively, and 2.8 million and 0.2 million for the six months ended June 30, 2015 and 2014, respectively.

Accumulated Other Comprehensive Income (Loss) - The components of AOCI, net of tax, are as follows:

	Accumulated Other Comprehensive Income (Loss)					
	Net Unrealized Gains (Losses) on Cash Flow Hedges	Net Unrealized Gains (Losses) on Available for Sale Securities	Defined Benefit Pension and Other Benefits Plans	Net Unrealized Gains (Losses) on Foreign Currency Translation	Other Comprehensive Income (Loss) Related to Equity Method Investee	Total
			(millions)

(a) Reclassified to interest expense and other - net in NEE's condensed consolidated statements of income. See Note 2 - Income Statement Impact of Derivative Instruments.
(b) Reclassified to gains on disposal of assets - net in NEE's condensed consolidated statements of income.

7. Debt

Long-term debt issuances and borrowings by subsidiaries of NEE during the six months ended June 30, 2015 were as follows:

Date Issued	Company	Debt Issuances/Borrowings	Interest Rate	Principal Amount	Maturity Date
				(millions)	
February - April 2015	NEER subsidiary	Canadian revolving credit agreements	Variable (a)	$ 68	Various
January - February 2015	NEP subsidiary	Senior secured revolving credit facility	Variable (a)	$ 122	2019
February - June 2015	NEER subsidiary	Limited-recourse construction and term loan facility	Variable (a)(b)	$ 100	2035
February 2015	NEER subsidiary	Cash grant bridge loan facility	Variable (a)	$ 29	2017
April 2015	NEER subsidiary	Canadian senior secured limited-recourse term loan	Variable (a)	$ 324	2033
April 2015	NEER subsidiary	Canadian senior secured limited-recourse term loan	Variable (a)	$ 228	2033
April 2015	NEECH	Term loans	Variable (a)	$ 450	2016
May - June 2015	NEER subsidiary	Limited-recourse construction and term loan facility	Variable (a)(b)	$ 269	2035
June 2015	FPL	Industrial development revenue bonds	Variable (c)	$ 85	2045
June 2015	NEP subsidiary	Limited-recourse term loan	4.52%	$ 31	2033

(a) Variable rate is based on an underlying index plus a margin.
(b) Interest rate swap agreements have been entered into with respect to these issuances. See Note 2.
(c) These tax exempt bonds permit individual bond holders to tender the bonds for purchase at any time prior to maturity. In the event the bonds are tendered for purchase, they would be remarketed by a designated remarketing agent in accordance with the related indenture. If the remarketing is unsuccessful, FPL would be required to purchase the bonds. As of June 30, 2015, all bonds tendered for purchase have been successfully remarketed. In the event the bonds are tendered by individual bond holders and not remarketed prior to maturity, FPL's bank revolving line of credit facilities are available to support the purchase of the bonds.

In May 2015, NEECH completed a remarketing of $600 million aggregate principal amount of its Series E Debentures due June 1, 2017 (Debentures) that were issued in May 2012 as components of equity units issued concurrently by NEE (2012 equity units). The Debentures are fully and unconditionally guaranteed by NEE. In connection with the remarketing of the Debentures, the interest rate on the Debentures was reset to 1.586% per year, and interest is payable on June 1 and December 1 of each year, commencing June 1, 2015. In connection with the settlement of the contracts to purchase NEE common stock that were issued as components of the 2012 equity units, on June 1, 2015, NEE issued 7,860,000 shares of common stock in exchange for $600 million.

Presentation of Debt Issuance Costs - In April 2015, the FASB issued a new accounting standard which changes the presentation of debt issuance costs in financial statements. The amendments in this standard require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected by this standard. The standard is effective for NEE and FPL beginning January 1, 2016. NEE and FPL are currently evaluating the effect the adoption of this standard will have on their consolidated financial statements.

8. Commitments and Contingencies

Commitments - NEE and its subsidiaries have made commitments in connection with a portion of their projected capital expenditures. Capital expenditures at FPL include, among other things, the cost for construction or acquisition of additional facilities and equipment to meet customer demand, as well as capital improvements to and maintenance of existing facilities and the procurement of nuclear fuel. At NEER, capital expenditures include, among other things, the cost, including capitalized interest, for construction and development of wind and solar projects and the procurement of nuclear fuel. Capital expenditures for Corporate and Other primarily include NEE's portion of the cost for construction of two natural gas pipeline systems, consisting of three separate pipelines, as well as the cost to meet customer-specific requirements and maintain the fiber-optic network for FPL FiberNet and the cost to maintain existing transmission facilities at NEET.

At June 30, 2015, estimated capital expenditures for the remainder of 2015 through 2019 for which applicable internal approvals (and also FPSC approvals for FPL, if required) have been received were as follows:

Remainder of 2015	2016	2017	2018	2019	Total
		(millions)			

FPL:						
Generation:[a]						
New[b][c]	$ 320	$ 900	$ 50	$ —	$ —	$ 1,270
Existing	430	555	660	560	440	2,645
Transmission and distribution	950	1,960	1,755	1,625	1,680	7,970
Nuclear fuel	135	220	125	150	175	805
General and other	265	205	215	160	130	975
Total	$ 2,100	$ 3,840	$ 2,805	$ 2,495	$ 2,425	$ 13,665
NEER:						
Wind[d]	$ 1,105	$ 855	$ 45	$ 10	$ 10	$ 2,025
Solar[e]	900	575	—	—	—	1,475
Nuclear, including nuclear fuel	155	285	225	245	270	1,180
Other	190	65	50	95	65	465
Total	$ 2,350	$ 1,780	$ 320	$ 350	$ 345	$ 5,145
Corporate and Other[f]	$ 300	$ 1,130	$ 920	$ 505	$ 160	$ 3,015

(a) Includes AFUDC of approximately $48 million, $71 million and $8 million for the remainder of 2015 through 2017, respectively.
(b) Includes land, generating structures, transmission interconnection and integration and licensing.
(c) Excludes capital expenditures for costs related to the two additional nuclear units at FPL's Turkey Point site beyond what is required to receive an NRC license for each unit.
(d) Consists of capital expenditures for new wind projects and related transmission totaling approximately 1,655 MW.
(e) Consists of capital expenditures for new solar projects and related transmission totaling approximately 830 MW.
(f) Includes capital expenditures for construction of three natural gas pipelines, including equity contributions associated with equity investments in joint ventures for two pipelines and AFUDC associated with the third pipeline. The natural gas pipelines are subject to certain conditions, including FERC approval. See Contracts below.

The above estimates are subject to continuing review and adjustment and actual capital expenditures may vary significantly from these estimates.

Contracts - In addition to the commitments made in connection with the estimated capital expenditures included in the table in Commitments above, FPL has commitments under long-term purchased power and fuel contracts. As of June 30, 2015, FPL is obligated under take-or-pay purchased power contracts with JEA and with subsidiaries of The Southern Company (Southern subsidiaries) to pay for approximately 1,330 MW annually through December 2015 and 375 MW annually thereafter through 2021. FPL also has various firm pay-for-performance contracts to purchase approximately 705 MW from certain cogenerators and small power producers (qualifying facilities) with expiration dates ranging from 2024 through 2034. The purchased power contracts provide for capacity and energy payments. Energy payments are based on the actual power taken under these contracts. Capacity payments for the pay-for-performance contracts are subject to the qualifying facilities meeting certain contract conditions. FPL has contracts with expiration dates through 2036 for the purchase and transportation of natural gas and coal, and storage of natural gas. In addition, FPL has entered into 25-year natural gas transportation agreements with each of Sabal Trail and Florida Southeast Connection, each of which will build, own and operate a pipeline that will be part of a natural gas pipeline system, for a quantity of 400,000 MMBtu/day beginning on May 1, 2017 and increasing to 600,000 MMBtu/day on May 1, 2020. These agreements contain firm commitments that are contingent upon the occurrence of certain events, including FERC approval and completion of construction of the pipeline system to be built by Sabal Trail and Florida Southeast Connection. See Commitments above.

As of June 30, 2015, NEER has entered into contracts with expiration dates ranging from August 2015 through 2030 primarily for the purchase of wind turbines, wind towers and solar modules and related construction and development activities, as well as for the supply of uranium and the conversion, enrichment and fabrication of nuclear fuel. Approximately $3.1 billion of commitments under such contracts are included in the estimated capital expenditures table in Commitments above. In addition, NEER has contracts primarily for the purchase, transportation and storage of natural gas and firm transmission service with expiration dates ranging from October 2015 through 2033.

Included in Corporate and Other in the table below is the remaining commitment by NEECH subsidiaries of approximately $2.3 billion for the construction of the natural gas pipelines. Amounts committed for the remainder of 2015 through 2019 are also included in the estimated capital expenditures table in Commitments above.

The required capacity and/or minimum payments under the contracts discussed above as of June 30, 2015 were estimated as follows:

	Remainder of 2015	2016	2017	2018	2019	Thereafter
			(millions)			
FPL:						
Capacity charges:[a]						
Qualifying facilities	$ 145	$ 250	$ 255	$ 260	$ 265	$ 1,695
JEA and Southern subsidiaries	$ 100	$ 70	$ 60	$ 30	$ 10	$ —
Minimum charges, at projected prices:[b]						
Natural gas, including transportation and storage[c]	$ 715	$ 885	$ 795	$ 830	$ 830	$ 13,780
Coal, including transportation	$ 60	$ 50	$ 35	$ —	$ —	$ —
NEER	$ 1,730	$ 1,250	$ 140	$ 135	$ 80	$ 395
Corporate and Other[d][e]	$ 255	$ 915	$ 710	$ 380	$ 65	$ 25

(a) Capacity charges under these contracts, substantially all of which are recoverable through the capacity cost recovery clause, totaled approximately $117 million and $123 million for the three months ended June 30, 2015 and 2014, respectively, and approximately $236 million and $246 million for the six months ended June 30, 2015 and 2014, respectively. Energy charges under these contracts, which are recoverable through the fuel clause, totaled approximately $78 million and $75 million for the three months ended June 30, 2015 and 2014, respectively, and approximately $122 million and $132 million for the six months ended June 30, 2015 and 2014, respectively.
(b) Recoverable through the fuel clause.
(c) Includes approximately $200 million, $295 million, $290 million and $8,245 million in 2017, 2018, 2019 and thereafter, respectively, of firm commitments, subject to certain conditions as noted above, related to the natural gas transportation agreements with Sabal Trail and Florida Southeast Connection.
(d) Includes an approximately $75 million commitment to invest primarily in clean power and technology businesses through 2021.
(e) Excludes approximately $450 million and $335 million in 2015 and 2016, respectively, of joint obligations of NEECH and NEER which are included in the NEER amounts above.

In addition, FPL has entered into a purchase agreement under which it will assume ownership of a 250 MW coal-fired generation facility located in Jacksonville, Florida for a purchase price of approximately $521 million, which would thereby enable FPL to terminate its current long-term purchased power agreement for substantially all of the facility's capacity and energy. The purchase agreement is contingent upon, among other things, FPSC approval. An FPSC decision is expected no later than October 2015. The remaining minimum payments under the long-term purchased power agreement, which total approximately $1,480 million and are included in the table above under qualifying facilities, will cease upon closing of the transaction, which is expected in the fourth quarter of 2015.

NEP entered into an agreement, effective July 31, 2015, to acquire the membership interests in NET Midstream, a developer, owner and operator of a portfolio of seven long-term contracted natural gas pipeline assets located in Texas. See Management's Discussion - Results of Operations - NEER: Results of Operations - NEP Pipeline Acquisition.

Insurance - Liability for accidents at nuclear power plants is governed by the Price-Anderson Act, which limits the liability of nuclear reactor owners to the amount of insurance available from both private sources and an industry retrospective payment plan. In accordance with this Act, NEE maintains $375 million of private liability insurance per site, which is the maximum obtainable, and participates in a secondary financial protection system, which provides up to $13.0 billion of liability insurance coverage per incident at any nuclear reactor in the U.S. Under the secondary financial protection system, NEE is subject to retrospective assessments of up to $1.0 billion ($509 million for FPL), plus any applicable taxes, per incident at any nuclear reactor in the U.S., payable at a rate not to exceed $152 million ($76 million for FPL) per incident per year. NEE and FPL are contractually entitled to recover a proportionate share of such assessments from the owners of minority interests in Seabrook, Duane Arnold and St. Lucie Unit No. 2, which approximates $15 million, $38 million and $19 million, plus any applicable taxes, per incident, respectively.

NEE participates in a nuclear insurance mutual company that provides $2.75 billion of limited insurance coverage per occurrence per site for property damage, decontamination and premature decommissioning risks at its nuclear plants and a sublimit of $1.5 billion for non-nuclear perils. The proceeds from such insurance, however, must first be used for reactor stabilization and site decontamination before they can be used for plant repair. NEE also participates in an insurance program that provides limited coverage for replacement power costs if a nuclear plant is out of service for an extended period of time because of an accident. In the event of an accident at one of NEE's or another participating insured's nuclear plants, NEE could be assessed up to $187 million ($112 million for FPL), plus any applicable taxes, in retrospective premiums in a policy year. NEE and FPL are contractually entitled to recover a proportionate share of such assessments from the owners of minority interests in Seabrook, Duane Arnold and St. Lucie Unit No. 2, which approximates $3 million, $5 million and $4 million, plus any applicable taxes, respectively.

Due to the high cost and limited coverage available from third-party insurers, NEE does not have property insurance coverage for a substantial portion of its transmission and distribution property and has no property insurance coverage for FPL FiberNet's fiber-optic cable. Should FPL's future storm restoration costs exceed the reserve amount established through the issuance of storm-recovery bonds by a VIE in 2007, FPL may recover storm restoration costs, subject to prudence review by the FPSC, either through surcharges approved by the FPSC or through securitization provisions pursuant to Florida law.

In the event of a loss, the amount of insurance available might not be adequate to cover property damage and other expenses incurred. Uninsured losses and other expenses, to the extent not recovered from customers in the case of FPL or Lone Star Transmission, LLC, would be borne by NEE and/or FPL and/or their affiliates, as the case may be, and could have a material adverse effect on NEE's and FPL's financial condition, results of operations and liquidity.

Spain Solar Projects - In March 2013 and May 2013, events of default occurred under the project-level financing agreements for the solar thermal facilities in Spain (Spain solar projects) as a result of changes of law that occurred in December 2012 and February 2013. These changes of law negatively affected the projected economics of the projects and caused the project-level financing to be unsupportable by expected future project cash flows. Under the project-level financing, events of default (including those discussed below) provide for, among other things, a right by the lenders (which they have not exercised) to accelerate the payment of the project-level debt. Accordingly, in 2013, the project-level debt and the associated derivative liabilities related to interest rate swaps were classified as current maturities of long-term debt and current derivative liabilities, respectively, on NEE's condensed consolidated balance sheets, and totaled $587 million and $99 million, respectively, as of June 30, 2015. In July 2013, the Spanish government published a new law that created a new economic framework for the Spanish renewable energy sector. Additional regulatory pronouncements from the Spanish government needed to complete and implement the framework were finalized in June 2014. Based on NEE's assessment, the regulatory pronouncements do not indicate a further impairment of the Spain solar projects. Since the third quarter of 2014, events of default have occurred under the project-level financing agreements related to certain debt service coverage ratio covenants not being met. The project-level subsidiaries have requested the lenders to waive the events of default related to the debt service coverage ratio.

Impairments recorded due to the changes of law caused the project-level subsidiaries in Spain to have a negative net equity position on their balance sheets, which requires them under Spanish law to commence liquidation proceedings if the net equity position is not restored to specified levels. Prior to 2015, Spanish law had provided an exemption applicable to the project-level subsidiaries that enabled the exclusion of asset-related impairments in the equity calculation. Such exemption has not yet been granted for 2015, and therefore, the project-level subsidiaries commenced liquidation on April 23, 2015. The liquidators are reviewing the liquidation balance sheets and inventory schedules and will make recommendations to NextEra Energy España, S.L. (NEE España), the NEER subsidiary in Spain that is the direct shareholder of the project-level subsidiaries, to either restructure the project-level debt or file for insolvency. The liquidation event could cause the lenders to seek to accelerate the payment of the project-related debt and/or foreclose on the project assets, which they have not done to date. However, as part of a settlement agreement reached in December 2013 between NEECH, NEE España, the project-level subsidiaries and the lenders, the future recourse of the lenders under the project-level financing is effectively limited to the letters of credit described below and to the assets of the project-level subsidiaries. Under the settlement agreement, the lenders, among other things, irrevocably waived events of default related to changes of law that existed at the time of the settlement as described above, and NEECH affiliates provided for the project-level subsidiaries to post approximately €37 million (approximately $42 million as of June 30, 2015) in letters of credit to fund operating and debt service reserves under the project-level financing, of which €8 million (approximately $9 million) has been drawn as of June 30, 2015. NEE España, the project-level subsidiaries and the lenders have been in negotiations to seek to restructure the project-level financing; however, there can be no assurance that the project-level financing will be successfully restructured or that the lenders will not exercise remedies available to them under the project financing agreements for, among other things, current and future events of default, if any, or for the commencement of liquidation by the project-level subsidiaries.

Legal Proceedings - In November 1999, the Attorney General of the United States, on behalf of the EPA, brought an action in the U.S. District Court for the Northern District of Georgia against Georgia Power Company and other subsidiaries of The Southern Company for certain alleged violations of the Prevention of Significant Deterioration (PSD) provisions and the New Source Performance Standards (NSPS) of the Clean Air Act. In May 2001, the EPA amended its complaint to allege, among other things, that Georgia Power Company constructed and is continuing to operate Scherer Unit No. 4, in which FPL owns an interest of

approximately 76%, without obtaining a PSD permit, without complying with NSPS requirements, and without applying best available control technology for nitrogen oxides, sulfur dioxides and particulate matter as required by the Clean Air Act. It also alleges that unspecified major modifications have been made at Scherer Unit No. 4 that require its compliance with the aforementioned Clean Air Act provisions. The EPA seeks injunctive relief requiring the installation of best available control technology and civil penalties. Under the EPA's civil penalty rules, the EPA could assess up to $25,000 per day for each violation from an unspecified date after June 1, 1975 through January 30, 1997, up to $27,500 per day for each violation from January 31, 1997 through March 15, 2004, up to $32,500 per day for each violation from March 16, 2004 through January 12, 2009 and up to $37,500 per day for each violation thereafter. Georgia Power Company has answered the amended complaint, asserting that it has complied with all requirements of the Clean Air Act, denying the plaintiff's allegations of liability, denying that the plaintiff is entitled to any of the relief that it seeks and raising various other defenses. In June 2001, a federal district court stayed discovery and administratively closed the case and the EPA has not yet moved to reopen the case. In April 2007, the U.S. Supreme Court in a separate unrelated case rejected an argument that a "major modification" occurs at a plant only when there is a resulting increase in the hourly rate of air emissions. Georgia Power Company has made a similar argument in defense of its case, but has other factual and legal defenses that are unaffected by the U.S. Supreme Court's decision.

In 1995 and 1996, NEE, through an indirect subsidiary, purchased from Adelphia Communications Corporation (Adelphia) 1,091,524 shares of Adelphia common stock and 20,000 shares of Adelphia preferred stock (convertible into 2,358,490 shares of Adelphia common stock) for an aggregate price of approximately $35,900,000. On January 29, 1999, Adelphia repurchased all of these shares for $149,213,130 in cash. In June 2004, Adelphia, Adelphia Cablevision, L.L.C. and the Official Committee of Unsecured Creditors of Adelphia filed a complaint against NEE and its indirect subsidiary in the U.S. Bankruptcy Court, Southern District of New York. The complaint alleges that the repurchase of these shares by Adelphia was a fraudulent transfer, in that at the time of the transaction Adelphia (i) was insolvent or was rendered insolvent, (ii) did not receive reasonably equivalent value in exchange for the cash it paid, and (iii) was engaged or about to engage in a business or transaction for which any property remaining with Adelphia had unreasonably small capital. The complaint seeks the recovery for the benefit of Adelphia's bankruptcy estate of the cash paid for the repurchased shares, plus interest from January 29, 1999. NEE filed an answer to the complaint. NEE believes that the complaint is without merit because, among other reasons, Adelphia will be unable to demonstrate that (i) Adelphia's repurchase of shares from NEE, which repurchase was at the market value for those shares, was not for reasonably equivalent value, (ii) Adelphia was insolvent at the time of the stock repurchase, or (iii) the stock repurchase left Adelphia with unreasonably small capital. The trial was completed in May 2012 and closing arguments were heard in July 2012. In May 2014, the U.S. Bankruptcy Court, Southern District of New York, issued its decision after trial, finding, among other things, that Adelphia was not insolvent, or rendered insolvent, at the time of the stock repurchase. The bankruptcy court further ruled that Adelphia was not left with inadequate capital or equitably insolvent at the time of the stock repurchase. The decision after trial represented proposed findings of fact and conclusions of law which were subject to de novo review by the U.S. District Court for the Southern District of New York. In March 2015, the U.S. District Court issued a final order which effectively affirmed the findings of the U.S. Bankruptcy Court in NEE's favor. In April 2015, Adelphia filed an appeal of the final order to the U.S. Court of Appeals for the Second Circuit.

NEE and FPL are vigorously defending, and believe that they or their affiliates have meritorious defenses to, the lawsuits described above. In addition to the legal proceedings discussed above, NEE and its subsidiaries, including FPL, are involved in other legal and regulatory proceedings, actions and claims in the ordinary course of their businesses. Generating plants in which subsidiaries of NEE, including FPL, have an ownership interest are also involved in legal and regulatory proceedings, actions and claims, the liabilities from which, if any, would be shared by such subsidiary. In the event that NEE and FPL, or their affiliates, do not prevail in the lawsuits described above or these other legal and regulatory proceedings, actions and claims, there may be a material adverse effect on their financial statements. While management is unable to predict with certainty the outcome of the lawsuits described above or these other legal and regulatory proceedings, actions and claims, based on current knowledge it is not expected that their ultimate resolution, individually or collectively, will have a material adverse effect on the financial statements of NEE or FPL.

9. Segment Information

NEE's reportable segments are FPL, a rate-regulated electric utility, and NEER, a competitive energy business. NEER's segment information includes an allocation of interest expense from NEECH based on a deemed capital structure of 70% debt and allocated shared service costs. Corporate and Other represents other business activities, other segments that are not separately reportable and eliminating entries. NEE's segment information is as follows:

	Three Months Ended June 30,							
	2015				2014			
	FPL	NEER[a]	Corporate and Other	NEE Consolidated	FPL	NEER[a]	Corporate and Other	NEE Consolidated
	(millions)							
Operating revenues	$ 2,996	$ 1,265	$ 97	$ 4,358	$ 2,889	$ 1,036	$ 104	$ 4,029
Operating expenses	$ 2,216	$ 916	$ 80	$ 3,212	$ 2,107	$ 896	$ 75	$ 3,078
Net income (loss) attributable to NEE	$ 435	$ 273 [b]	$ 8	$ 716	$ 423	$ 81 [b]	$ (12)	$ 492

	Six Months Ended June 30,							
	2015				2014			
	FPL	NEER[a]	Corporate and Other	NEE Consolidated	FPL	NEER[a]	Corporate and Other	NEE Consolidated
	(millions)							
Operating revenues	$ 5,538	$ 2,725	$ 200	$ 8,463	$ 5,424	$ 2,069	$ 210	$ 7,703
Operating expenses	$ 4,091	$ 1,943	$ 153	$ 6,187	$ 4,010	$ 1,846	$ 157	$ 6,013

(a) Interest expense allocated from NEECH is based on a deemed capital structure of 70% debt. For this purpose, the deferred credit associated with differential membership interests sold by NEER subsidiaries is included with debt. Residual NEECH corporate interest expense is included in Corporate and Other.
(b) See Note 4 for a discussion of NEER's tax benefits related to PTCs.

	June 30, 2015				December 31, 2014			
	FPL	NEER	Corporate and Other	NEE Consolidated	FPL	NEER	Corporate and Other	NEE Consolidated
	(millions)							
Total assets	$ 40,289	$ 34,333	$ 2,579	$ 77,201	$ 39,307	$ 32,919	$ 2,703	$ 74,929

Revenue Recognition - In July 2015, the FASB approved the deferral of the effective date of the new accounting standard related to the recognition of revenue from contracts with customers and required disclosures. The standard is now effective for NEE and FPL beginning January 1, 2018. NEE and FPL are currently evaluating the effect the adoption of this standard will have, if any, on their consolidated financial statements.

10. Summarized Financial Information of NEECH

NEECH, a 100% owned subsidiary of NEE, provides funding for, and holds ownership interests in, NEE's operating subsidiaries other than FPL. NEECH's debentures and junior subordinated debentures that are registered pursuant to the Securities Act of 1933, as amended, are fully and unconditionally guaranteed by NEE. Condensed consolidating financial information is as follows:

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

NEE's operating performance is driven primarily by the operations of its two principal subsidiaries, FPL, which serves approximately 4.8 million customer accounts in Florida and is one of the largest rate-regulated electric utilities in the U.S., and NEER, which together with affiliated entities is the largest generator in North America of renewable energy from the wind and sun. The table below presents net income (loss) attributable to NEE and earnings (loss) per share attributable to NEE by reportable segment, FPL and NEER, and by Corporate and Other, which is primarily comprised of the operating results of NEET, FPL FiberNet and other business activities, as well as other income and expense items, including interest expense, income taxes and eliminating entries (see Note 9 for additional segment information). The following discussions should be read in conjunction with the Notes contained herein and Management's Discussion and Analysis of Financial Condition and Results of Operations appearing in the 2014 Form 10-K. The results of operations for an interim period generally will not give a true indication of results for the year. In the following discussions, all comparisons are with the corresponding items in the prior year period.

	Net Income (Loss) Attributable to NEE		Earnings (Loss) Per Share, assuming dilution		Net Income (Loss) Attributable to NEE		Earnings (Loss) Per Share, assuming dilution	
	Three Months Ended June 30,		Three Months Ended June 30,		Six Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	**2015**	2014	**2015**	2014	**2015**	2014
	(millions)				(millions)			
FPL	**$ 435**	$ 423	**$ 0.97**	$ 0.96	**$ 794**	$ 770	**$ 1.77**	$ 1.75
NEER[a]	**273**	81	**0.61**	0.18	**552**	167	**1.23**	0.38
Corporate and Other	**8**	(12)	**0.01**	(0.02)	**20**	(16)	**0.04**	(0.03)
NEE	**$ 716**	$ 492	**$ 1.59**	$ 1.12	**$ 1,366**	$ 921	**$ 3.04**	$ 2.10

(a) NEER's results reflect an allocation of interest expense from NEECH based on a deemed capital structure of 70% debt and allocated shared service costs.

Adjusted Earnings

NEE prepares its financial statements under GAAP. However, management uses earnings excluding certain items (adjusted earnings), a non-GAAP financial measure, internally for financial planning, for analysis of performance, for reporting of results to the Board of Directors and as an input in determining performance-based compensation under NEE's employee incentive compensation plans. NEE also uses adjusted earnings when communicating its financial results and earnings outlook to analysts and investors. NEE's management believes adjusted earnings provides a more meaningful representation of the company's fundamental earnings power. Although the excluded amounts are properly included in the determination of net income under GAAP, management believes that the amount and/or nature of such items make period to period comparisons of operations difficult and potentially confusing. Adjusted earnings do not represent a substitute for net income, as prepared under GAAP.

Adjusted earnings exclude the unrealized mark-to-market effect of non-qualifying hedges (as described below) and OTTI losses on securities held in NEER's nuclear decommissioning funds, net of the reversal of previously recognized OTTI losses on securities sold and losses on securities where price recovery was deemed unlikely (collectively, OTTI reversals). However, other adjustments may be made from time to time with the intent to provide more meaningful and comparable results of ongoing operations.

NEE and NEER segregate into two categories unrealized mark-to-market gains and losses on derivative transactions. The first category, referred to as non-qualifying hedges, represents certain energy derivative and interest rate derivative transactions entered into as economic hedges, which do not meet the requirements for hedge accounting, or for which hedge accounting treatment is not elected or has been discontinued. Changes in the fair value of those transactions are marked to market and reported in the consolidated statements of income, resulting in earnings volatility because the economic offset to the positions are not marked to market. As a consequence, NEE's net income reflects only the movement in one part of economically-linked transactions. For example, a gain (loss) in the non-qualifying hedge category for certain energy derivatives is offset by decreases (increases) in the fair value of related physical asset positions in the portfolio or contracts, which are not marked to market under GAAP. For this reason, NEE's management views results expressed excluding the unrealized mark-to-market impact of the non-qualifying hedges as a meaningful measure of current period performance. The second category, referred to as trading activities, which is included in adjusted earnings, represents the net unrealized effect of actively traded positions entered into to take advantage of expected market price movements and all other commodity hedging activities. At FPL, substantially all changes in the fair value of energy derivative transactions are deferred as a regulatory asset or liability until the contracts are settled, and, upon settlement, any gains or losses are passed through the fuel clause. See Note 2.

During the six months ended June 30, 2014, NEER decided not to pursue the sale of Maine fossil and recorded an after-tax gain of $12 million to increase Maine fossil's carrying value to its estimated fair value. See Note 3 - Nonrecurring Fair Value Measurements.
In order to make period to period comparisons more meaningful, adjusted earnings also exclude the after-tax gain associated with Maine fossil, costs incurred in 2015 associated with the proposed merger pursuant to which Hawaiian Electric Company, Inc. will become a wholly-owned subsidiary of NEE and the after-tax operating results associated with the Spain solar projects.

The following table provides details of the adjustments to net income considered in computing NEE's adjusted earnings discussed above.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	**2015**	2014
	(millions)			
Net unrealized mark-to-market after-tax gains (losses) from non-qualifying hedge activity[a]	**$ 25**	$ (146)	**$ 52**	$ (273)
Income (loss) from OTTI after-tax losses on securities held in NEER's nuclear decommissioning funds, net of OTTI reversals	**$ (2)**	$ 1	**$ (1)**	$ 2
After-tax gain associated with Maine fossil - NEER	**$ —**	$ —	**$ —**	$ 12

After-tax operating results of NEER's Spain solar projects	$	1	$	7	$	(3)	$	(8)
After-tax merger-related expenses - Corporate and Other	$	(7)	$	—	$	(10)	$	—

(a) For the three months ended June 30, 2015 and 2014, approximately $23 million of gains and $140 million of losses, respectively, are included in NEER's net income; the balance is included in Corporate and Other. For the six months ended June 30, 2015 and 2014, approximately $45 million of gains and $263 million of losses, respectively, are included in NEER's net income; the balance is included in Corporate and Other.

The change in unrealized mark-to-market activity from non-qualifying hedges is primarily attributable to changes in forward power and natural gas prices and interest rates, as well as the reversal of previously recognized unrealized mark-to-market gains or losses as the underlying transactions were realized.

RESULTS OF OPERATIONS

Summary

Net income attributable to NEE for the three months ended June 30, 2015 was higher than the prior period by $224 million, reflecting higher results at FPL, NEER and Corporate and Other. Net income attributable to NEE for the six months ended June 30, 2015 was higher than the prior period by $445 million, reflecting higher results at FPL, NEER and Corporate and Other.

FPL's increase in net income for the three and six months ended June 30, 2015 was primarily driven by continued investments in plant in service while earning an 11.50% regulatory ROE on its retail rate base and higher AFUDC - equity.

NEER's results increased $192 million and $385 million for the three and six months ended June 30, 2015, respectively, reflecting net unrealized gains from non-qualifying hedge activity compared to losses on such hedges in the prior year period, the absence of 2014 NEP-related charge and costs, higher customer supply and proprietary power and gas trading results and earnings from new investments, partly offset by lower results from existing assets and the gas infrastructure business.

Corporate and Other's results increased for the three and six months ended June 30, 2015 primarily due to favorable income tax adjustments and 2015 investment gains compared to 2014 investment losses, and also for the six months ended June 30, 2015, the absence of debt reacquisition losses recorded in 2014. These positives were partly offset in both periods by costs associated with the proposed merger.

NEE's effective income tax rates for the three months ended June 30, 2015 and 2014 were approximately 28% and 37%, respectively. NEE's effective income tax rates for the six months ended June 30, 2015 and 2014 were approximately 29% and 33%, respectively. The rates for all periods reflect the benefit of PTCs for NEER's wind projects, as well as ITCs and deferred income tax benefits associated with convertible ITCs for solar and wind projects at NEER. PTCs, ITCs and deferred income tax benefits associated with convertible ITCs can significantly affect NEE's effective income tax rate depending on the amount of pretax income. The amount of PTCs recognized can be significantly affected by wind generation and by PTC roll off. PTCs for the three months ended June 30, 2015 and 2014 were approximately $37 million and $49 million, respectively, and $75 million and $98 million for the comparable six-month periods. ITCs and deferred income tax benefits associated with convertible ITCs for the three months ended June 30, 2015 and 2014 were approximately $34 million and $13 million, respectively, and $52 million and $33 million for the comparable six-month periods. In addition, the rates for the three and six months ended June 30, 2014 reflect a noncash income tax charge of approximately $45 million associated with structuring Canadian assets in connection with the creation of NEP. See Note 4.

FPL: Results of Operations

FPL's net income for the three months ended June 30, 2015 and 2014 was $435 million and $423 million, respectively, representing an increase of $12 million. FPL's net income for the six months ended June 30, 2015 and 2014 was $794 million and $770 million, respectively, representing an increase of $24 million.

The use of reserve amortization is permitted by a January 2013 FPSC final order approving a stipulation and settlement between FPL and several intervenors in FPL's base rate proceeding (2012 rate agreement). In order to earn a targeted regulatory ROE, subject to limitations provided in the 2012 rate agreement, reserve amortization is calculated using a trailing thirteen-month average of retail rate base and capital structure in conjunction with the trailing twelve months regulatory retail base net operating income, which primarily includes the retail base portion of base and other revenues, net of O&M, depreciation and amortization, interest and tax expenses. The drivers of FPL's net income not reflected in the reserve amortization calculation typically include wholesale and transmission service revenues and expenses, cost recovery clause revenues and expenses, AFUDC - equity and costs not allowed to be recovered from retail customers by the FPSC. During the three months ended June 30, 2015 and 2014, FPL recorded the reversal of reserve amortization of approximately $66 million and reserve amortization of $6 million, respectively. During the six months ended June 30, 2015 and 2014, FPL recorded reserve amortization of approximately $33 million and $131 million, respectively.

The $12 million and $24 million increase in FPL's net income for the three and six months ended June 30, 2015, respectively, was primarily driven by:

- higher earnings on investment in plant in service of approximately $9 million and $29 million, respectively. Investment in plant in service grew FPL's average retail rate base for the three and six months ended June 30, 2015 by approximately $0.5 billion and $1.0 billion, respectively, when compared to the same periods last year, reflecting, among other things, the modernized Riviera Beach power plant and ongoing transmission and distribution additions, and
- higher AFUDC - equity of $10 million and $5 million, respectively,

partly offset by,

- lower cost recovery clause earnings of $4 million and $6 million, respectively.

FPL's operating revenues consisted of the following:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	**2015**	2014
		(millions)		
Retail base	**$ 1,487**	$ 1,390	**$ 2,671**	$ 2,527
Fuel cost recovery	**972**	941	**1,853**	1,856
Other cost recovery clauses and pass-through costs, net of any deferrals	**417**	446	**780**	841
Other, primarily wholesale and transmission sales, customer-related fees and pole attachment rentals	**120**	112	**234**	200
Total	**$ 2,996**	$ 2,889	**$ 5,538**	$ 5,424

Retail Base

Retail base revenues increased approximately $43 million during the six months ended June 30, 2015 related to the modernized Riviera Beach power plant which was placed in service on April 1, 2014.

Retail Customer Usage and Growth

In the three and six months ended June 30, 2015, FPL experienced a 6.1% and 3.1% increase, respectively, in average usage per retail customer and, in both periods, experienced a 1.4% increase in the average number of customer accounts, which collectively, together with other factors, increased revenues by approximately $97 million and $101 million, respectively. Favorable weather contributed to the increased revenues.

Cost Recovery Clauses

Revenues from fuel and other cost recovery clauses and pass-through costs, such as franchise fees, revenue taxes and storm-related surcharges, are largely a pass-through of costs. Such revenues also include a return on investment allowed to be recovered through the cost recovery clauses on certain assets, primarily related to nuclear capacity, solar and environmental projects. The changes in fuel cost recovery revenues for the three and six months ended June 30, 2015 are primarily due to approximately $79 million and $89 million, respectively, of increased revenues related to higher retail energy sales. The increased revenues for both periods were partly offset by lower gas sales associated with an incentive mechanism allowed under the 2012 rate agreement (incentive gas sales) and lower revenues from interchange power sales totaling approximately $24 million and $68 million, respectively. Additionally, the fuel cost recovery revenues were lower due to a lower average fuel factor of approximately $24 million for both the three and six months ended June 30, 2015. Cost recovery clauses contributed approximately $16 million and $20 million

to FPL's net income for the three months ended June 30, 2015 and 2014, respectively. The amounts for the six months ended June 30, 2015 and 2014 were $35 million and $41 million, respectively.

Other

The increase in other revenues for the six months ended June 30, 2015 primarily reflects higher wholesale revenues of approximately $17 million associated with an increase in contracted load served under new and existing contracts.

Other Items Impacting FPL's Condensed Consolidated Statements of Income

Fuel, Purchased Power and Interchange Expense
The major components of FPL's fuel, purchased power and interchange expense are as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	**2015**	2014
	(millions)			
Fuel and energy charges during the period	**$ 968**	$ 1,091	**$ 1,744**	$ 1,995
Net recognition of deferred retail fuel costs	**5**	—	**110**	—
Net deferral of retail fuel costs	**—**	(152)	**—**	(145)
Other, primarily capacity charges, net of any capacity deferral	**125**	137	**249**	262
Total	**$ 1,098**	$ 1,076	**$ 2,103**	$ 2,112

The decrease in fuel and energy charges for the three and six months ended June 30, 2015 reflects approximately $171 million and $307 million of lower fuel and energy prices, partly offset by $68 million and $98 million related to higher energy sales, respectively. Fuel and energy charges also reflect a decrease of $20 million and $42 million related to lower incentive gas sales for the three and six months ended June 30, 2015, respectively. In addition, FPL recognized $5 million and $110 million of deferred retail fuel costs during the three and six months ended June 30, 2015, respectively, compared to the deferral of retail fuel costs of $152 million and $145 million in the three and six months ended June 30, 2014, respectively.

O&M Expenses
FPL's O&M expenses decreased $33 million for the six months ended June 30, 2015 reflecting lower maintenance costs primarily due to the timing and extent of nuclear and fossil unit outages, as well as lower cost recovery clause costs, which do not have a significant impact on net income.

Depreciation and Amortization Expense
The major components of FPL's depreciation and amortization expense are as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	**2015**	2014
	(millions)			
Reserve reversal (amortization) recorded under the 2012 rate agreement	**$ 66**	$ (6)	**$ (33)**	$ (131)
Other depreciation and amortization recovered under base rates	**314**	305	**622**	598
Depreciation and amortization recovered under cost recovery clauses and securitized storm-recovery cost amortization	**48**	50	**80**	90
Total	**$ 428**	$ 349	**$ 669**	$ 557

The reserve amortization, or reversal of such amortization, recorded for all periods presented reflects adjustments to the depreciation and fossil dismantlement reserve provided under the 2012 rate agreement. At June 30, 2015, approximately $245 million of this reserve remains available for future amortization. Reserve amortization is recorded as a reduction of regulatory liabilities - accrued asset removal costs on the condensed consolidated balance sheets. For the three and six months ended June 30, 2015 and 2014, reserve amortization, or reversal of such amortization, was recorded to achieve the targeted retail regulatory ROE. The increase in other depreciation and amortization expense recovered under base rates for the three and six months ended June 30, 2015 is due to higher plant in service balances.

Interest Expense
The increase in interest expense for the three and six months ended June 30, 2015 primarily reflects higher average debt balances.

AFUDC - Equity
The increase in AFUDC - equity for the three and six months ended June 30, 2015 is primarily due to additional AFUDC - equity recorded on construction expenditures associated with the Port Everglades modernization project and the upgrade of compressors in certain combined-cycle units. In addition, the increase for the six months ended June 30, 2015 was partly offset by lower AFUDC

- equity associated with the Riviera Beach power plant which was placed in service in April 2014.

Capital Initiatives

For the period 2015 through 2018, FPL expects to invest capital of approximately $13.9 billion to $15.6 billion primarily related to projects that are focused on improving reliability, reducing fuel cost and reducing emissions, as well as maintenance of existing assets.

Natural Gas Reserves Project

In March 2015, FPL began investing in long-term natural gas supplies to provide a physical hedge on the price of natural gas to fuel its fossil generating fleet. The State of Florida Office of Public Counsel's appeals and the Florida Industrial Power Users Group's appeal to the Florida Supreme Court challenging the FPSC's approval of FPL's initial investment in natural gas supplies are pending. In July 2015, the FPSC issued an order approving a modified version of guidelines proposed by FPL under which FPL could participate in additional natural gas production projects and recover its costs through the fuel clause without prior FPSC approval. Key elements of the modified guidelines include, among other things, an annual investment cap of $500 million along with an escalating annual production cap as a percent of FPL's total natural gas burn and an emphasis on investing in proven and probable reserves.

NEER: Results of Operations

NEER's net income less net income attributable to noncontrolling interests for the three months ended June 30, 2015 and 2014 was $273 million and $81 million, respectively, representing an increase of $192 million. NEER's net income less net income attributable to noncontrolling interests for the six months ended June 30, 2015 and 2014 was $552 million and $167 million, respectively, representing an increase of $385 million. The primary drivers, on an after-tax basis, of the change are in the following table.

	Increase (Decrease) From Prior Period	
	Three Months Ended June 30, 2015	Six Months Ended June 30, 2015
	(millions)	
New investments[a]	$ 44	$ 87
Existing assets[a]	(21)	(97)
Gas infrastructure[b]	(23)	(14)
Customer supply and proprietary power and gas trading[b]	18	108
Asset sales	(14)	(14)
NEP-related charge and costs	67	67
Interest expense, differential membership costs and other	(33)	(50)
Change in unrealized mark-to-market non-qualifying hedge activity[c]	163	308
Change in OTTI losses on securities held in nuclear decommissioning funds, net of OTTI reversals[c]	(3)	(3)
Maine fossil gain[c]	—	(12)
Operating results of the Spain solar projects[c]	(6)	5
Increase in net income less net income attributable to noncontrolling interests	$ 192	$ 385

(a) Includes PTCs, ITCs and deferred income tax and other benefits associated with convertible ITCs for wind and solar projects, as applicable, but excludes allocation of interest expense or corporate general and administrative expenses. Results from new projects are included in new investments during the first twelve months of operation. A project's results are included in existing assets beginning with the thirteenth month of operation.
(b) Excludes allocation of interest expense or corporate general and administrative expenses.
(c) See Overview - Adjusted Earnings for additional information.

New Investments

Results from new investments for the three months ended June 30, 2015 increased primarily due to:

- the addition of approximately 1,280 MW of wind generation and 291 MW of solar generation during or after the three months ended June 30, 2014.

Results from new investments for the six months ended June 30, 2015 increased primarily due to:

- the addition of approximately 1,354 MW of wind generation and 561 MW of solar generation during or after the six months ended June 30, 2014.

Existing Assets

Results from NEER's existing asset portfolio for the three months ended June 30, 2015 decreased primarily due to:

- lower results from wind assets of approximately $38 million primarily reflecting weaker wind resource offset in part by a favorable ITC impact related to changes in state income tax laws,

partly offset by

- higher results from the nuclear assets of $16 million primarily due to the absence of 2014 refueling outages.

Results from NEER's existing asset portfolio for the six months ended June 30, 2015 decreased primarily due to:

- lower results from wind assets of approximately $97 million primarily due to weaker wind resource offset in part by a favorable ITC impact related to changes in state income tax laws and favorable pricing,

partly offset by

- higher results from the nuclear assets of $4 million primarily due to the absence of 2014 refueling outages, offset in part by lower gains on sales of securities held in NEER's nuclear decommissioning funds.

Gas Infrastructure

The decrease in gas infrastructure results for the three months ended June 30, 2015 is primarily due to increased depreciation expense primarily related to higher depletion rates and the absence of 2014 gains on the sale of investments in certain wells. The decrease in gas infrastructure results for the six months ended June 30, 2015 is primarily due to increased depreciation expense primarily related to higher depletion rates and the absence of 2014 gains on the sale of investments in certain wells, partly offset by gains from exiting the hedged positions on a number of future gas production opportunities. NEER continues to monitor its oil and gas producing properties for potential impairments due to low prices for oil and natural gas commodity products.

Customer Supply and Proprietary Power and Gas Trading

Results from customer supply and proprietary power and gas trading increased for the three months ended June 30, 2015 primarily due to improved margins and favorable market conditions. Results from customer supply and proprietary power and gas trading increased for the six months ended June 30, 2015 primarily due to improved margins and favorable market conditions compared to losses in 2014 due to the impact of extreme winter weather on the full requirements business.

Asset Sales

During the three and six months ended June 30, 2014, NEER recorded an after-tax gain of approximately $14 million on the sale of a 75 MW wind project that became operational in the first quarter of 2014.

NEP-related Charge and Costs

For the three and six months ended June 30, 2014, NEER's results reflect an approximately $45 million noncash income tax charge associated with structuring Canadian assets and $22 million in NEP initial public offering transaction costs.

Interest Expense, Differential Membership Costs and Other

For the three and six months ended June 30, 2015, interest expense, differential membership costs and other reflects higher borrowing and other costs to support the growth of the business.

Other Factors

Supplemental to the primary drivers of the changes in NEER's net income less net income attributable to noncontrolling interests discussed above, the discussion below describes changes in certain line items set forth in NEE's condensed consolidated statements of income as they relate to NEER.

Operating Revenues

Operating revenues for the three months ended June 30, 2015 increased $229 million primarily due to:

- lower mark-to-market losses from non-qualifying hedges of approximately $220 million,
- higher revenues from new investments of $46 million, and
- higher revenues from the customer supply and proprietary power and gas trading business and the gas infrastructure business of $15 million,

partly offset by,

- lower revenues from existing assets of $48 million primarily reflecting weaker wind resource and lower revenues in the Electric Reliability Council of Texas (ERCOT) region due to unfavorable market conditions, partly offset by higher revenues in the New England Power Pool (NEPOOL) region due to the absence of a 2014 outage at Seabrook.

Operating revenues for the six months ended June 30, 2015 increased $656 million primarily due to:

- higher unrealized mark-to-market gains from non-qualifying hedges ($61 million for the six months ended June 30, 2015 compared to $369 million of losses on such hedges for the comparable period in 2014),
- higher revenues from the customer supply and proprietary power and gas trading business of approximately $191 million reflecting favorable market conditions,
- higher revenues from new investments of $120 million, and
- higher revenues from the gas infrastructure business of $53 million primarily reflecting gains recorded upon exiting the hedged positions on a number of future gas production opportunities,

partly offset by,

- lower revenues from existing assets of $135 million reflecting weaker wind resource, lower revenues at Marcus Hook 750 and in the ERCOT region due to unfavorable market conditions and lower contracted revenues at Duane Arnold, partly offset by higher revenues in the NEPOOL region due to the absence of a 2014 outage at Seabrook.

Operating Expenses
Operating expenses for the three months ended June 30, 2015 increased $20 million primarily due to:

- higher operating expenses associated with new investments of approximately $29 million,
- higher depreciation associated with the gas infrastructure business of $21 million primarily related to higher depletion rates, and
- higher O&M expenses reflecting higher costs associated with growth in the NEER business, and higher taxes other than income taxes and other reflecting the absence of 2014 gains on the sale of investments in certain wells in the gas infrastructure business,

partly offset by,

- lower fuel expense of approximately $70 million primarily in the ERCOT and NEPOOL regions.

Operating expenses for the six months ended June 30, 2015 increased $97 million primarily due to:

- higher operating expenses associated with new investments of approximately $59 million,
- higher depreciation associated with the gas infrastructure business of $46 million primarily related to higher depletion rates, and
- higher O&M expenses reflecting higher costs associated with growth in the NEER business, and higher taxes other than income taxes and other reflecting the absence of 2014 gains on the sale of investments in certain wells in the gas infrastructure business,

partly offset by,

- lower fuel expense of approximately $66 million primarily in the ERCOT and NEPOOL regions.

Interest Expense
NEER's interest expense for the three and six months ended June 30, 2015 decreased $21 million and $26 million, respectively, reflecting approximately $24 million and $11 million of favorable changes in the fair value of interest rate swaps associated with the Spain solar projects for the three- and six-month periods in 2015 compared to $8 million and $35 million of unfavorable changes for the respective periods in 2014, partly offset by higher average interest rates and debt balances.

Benefits Associated with Differential Membership Interests - net
Benefits associated with differential membership interests - net for both periods presented reflect benefits recognized by NEER as third-party investors received their portion of the economic attributes, including income tax attributes, of the underlying wind projects, net of associated costs.

Gains on Disposal of Assets - net
Gains on disposal of assets - net for the three and six months ended June 30, 2015 and 2014 primarily reflect gains on sales of securities held in NEER's nuclear decommissioning funds. In addition, the three and six months ended June 30, 2014 reflect a $23 million gain on the sale of a 75 MW wind project.

Tax Credits, Benefits and Expenses
PTCs from wind projects and ITCs and deferred income tax benefits associated with convertible ITCs from solar projects are reflected in NEER's earnings. PTCs are recognized as wind energy is generated and sold based on a per kWh rate prescribed in applicable federal and state statutes. A portion of the PTCs have been allocated to investors in connection with sales of differential membership interests. Also see Summary above and Note 4 for a discussion of PTCs, ITCs and deferred income tax benefits associated with convertible ITCs, as well as benefits associated with differential membership interests - net above.

Capital Initiatives

During the six months ended June 30, 2015, NEER placed into service approximately 104 MW of new Canadian wind generation and 20 MW of U.S. solar generation. For the period 2015 through 2018, NEER expects to invest capital of approximately $13.7 billion to $15.1 billion primarily for new wind projects with generation totaling 3,000 MW to 3,300 MW (including approximately 104 MW added to date) and new solar projects with generation totaling 1,800 MW to 1,900 MW (including 20 MW added to date), as well as natural gas infrastructure investments, nuclear fuel and maintenance of existing assets.

Sale of Assets to NEP

In January 2015 and February 2015, indirect subsidiaries of NEER sold a 250 MW wind facility located in Texas and an approximately 20 MW solar facility located in California, respectively, to indirect subsidiaries of NEP.

In May 2015, an indirect subsidiary of NEER sold four wind generating facilities with contracted generating capacity totaling approximately 664 MW located in North Dakota, Oklahoma, Washington and Oregon to an indirect subsidiary of NEP.

NEP Pipeline Acquisition

NEP entered into an agreement, effective July 31, 2015, to acquire the membership interests in NET Midstream, a developer, owner and operator of a portfolio of seven long-term contracted natural gas pipeline assets located in Texas. The NET Midstream pipeline portfolio has total existing capacity of approximately 4 billion cubic feet (Bcf) per day, of which 3 billion Bcf per day is currently contracted with firm ship-or-pay contracts. There are planned expansion projects for the three largest pipelines in the portfolio that, if completed, are expected to provide an additional 0.9 Bcf per day of contracted volumes. NEP expects to complete the acquisition early in the fourth quarter of 2015, subject to the satisfaction or waiver of certain customary closing conditions, for an aggregate purchase price of approximately $2 billion, less the assumption of debt of NET Midstream and its subsidiaries at closing. The purchase price is subject to (i) a $200 million holdback payable, in whole or in part, upon satisfaction of financial performance and capital expenditure thresholds relating to planned expansion projects, (ii) a $200 million holdback to be retained by NEP for an 18-month period to satisfy any indemnification obligations of the sellers and (iii) certain adjustments for working capital. The $200 million indemnity holdback may be reduced by up to $10 million depending on certain post-closing employee retention thresholds.

Corporate and Other: Results of Operations

Corporate and Other is primarily comprised of the operating results of NEET, FPL FiberNet and other business activities, as well as corporate interest income and expenses. Corporate and Other allocates a portion of NEECH's corporate interest expense and shared service costs to NEER. Interest expense is allocated based on a deemed capital structure of 70% debt and, for purposes of allocating NEECH's corporate interest expense, the deferred credit associated with differential membership interests sold by NEER's subsidiaries is included with debt. Each subsidiary's income taxes are calculated based on the "separate return method," except that tax benefits that could not be used on a separate return basis, but are used on the consolidated tax return, are recorded by the subsidiary that generated the tax benefits. Any remaining consolidated income tax benefits or expenses are recorded at Corporate and Other. The major components of Corporate and Other's results, on an after-tax basis, are as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	**2015**	2014
		(millions)		
Interest expense, net of allocations to NEER	**$ (22)**	$ (26)	**$ (43)**	$ (51)
Interest income	**8**	8	**16**	16
Federal and state income tax benefits (expenses)	**9**	(8)	**15**	(1)
Merger-related expenses	**(7)**	—	**(10)**	—
Other - net	**20**	14	**42**	20
Net income (loss)	**$ 8**	$ (12)	**$ 20**	$ (16)

The decrease in interest expense, net of allocations to NEER, for the three and six months ended June 30, 2015 reflects lower average debt balances due in part to a higher allocation of interest costs to NEER reflecting growth in NEER's business. The federal and state income tax benefits for both periods presented reflect consolidating income tax adjustments and favorable changes in state income tax laws. Other includes all other corporate income and expenses, as well as other business activities. The increase in other - net for the three and six months ended June 30, 2015 primarily reflects 2015 investment gains compared to 2014 investment losses and, also for the six months ended June 30, 2015, the absence of debt reacquisition losses recorded in 2014, the pretax amount of which is reflected in other - net in NEE's condensed consolidated statements of income.

Capital Initiatives

For the period 2015 through 2018, businesses within Corporate and Other expect to invest capital of approximately $2.9 billion to $3.1 billion primarily for infrastructure projects through investments in natural gas pipelines and transmission facilities.

LIQUIDITY AND CAPITAL RESOURCES

NEE and its subsidiaries, including FPL, require funds to support and grow their businesses. These funds are used for, among other things, working capital, capital expenditures, investments in or acquisitions of assets and businesses, payment of maturing debt obligations and, from time to time, redemption or repurchase of outstanding debt or equity securities. It is anticipated that these requirements will be satisfied through a combination of cash flows from operations, short- and long-term borrowings, the issuance, from time to time, of short- and long-term debt and equity securities and proceeds from the sale of differential membership interests, consistent with NEE's and FPL's objective of maintaining, on a long-term basis, a capital structure that will support a strong investment grade credit rating. NEE, FPL and NEECH rely on access to credit and capital markets as significant sources of liquidity for capital requirements and other operations that are not satisfied by operating cash flows. The inability of NEE, FPL and NEECH to maintain their current credit ratings could affect their ability to raise short- and long-term capital, their cost of capital and the execution of their respective financing strategies, and could require the posting of additional collateral under certain agreements.

Cash Flows

Sources and uses of NEE's and FPL's cash for the six months ended June 30, 2015 and 2014 were as follows:

	NEE		FPL	
	Six Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	**2015**	2014
	(millions)

Other uses - net	**(171)**	(80)	**(32)**	(52)
Total uses of cash	**(6,128)**	(6,590)	**(2,704)**	(2,559)
Net increase (decrease) in cash and cash equivalents	**$ (26)**	$ 184	**$ 24**	$ 39

NEE's primary capital requirements are for expanding and enhancing FPL's electric system and generating facilities to continue to provide reliable service to meet customer electricity demands and for funding NEER's investments in independent power and other projects. The following table provides a summary of the major capital investments for the six months ended June 30, 2015 and 2014.

	Six Months Ended June 30,	
	2015	2014
	(millions)	
FPL:		
Generation:		
New	**$ 340**	$ 430
Existing	**354**	455
Transmission and distribution	**711**	587
Nuclear fuel	**79**	110
General and other	**136**	63
Other, primarily change in accrued property additions and the exclusion of AFUDC - equity	**8**	33
Total	**1,628**	1,678
NEER:		
Wind	**618**	816
Solar	**806**	284
Nuclear, including nuclear fuel	**162**	125
Other	**465**	272
Total	**2,051**	1,497
Corporate and Other	**130**	64
Total capital expenditures, independent power and other investments and nuclear fuel purchases	**$ 3,809**	$ 3,239

Liquidity

At June 30, 2015, NEE's total net available liquidity was approximately $6.7 billion, of which FPL's portion was approximately $3.0 billion. The table below provides the components of FPL's and NEECH's net available liquidity at June 30, 2015:

	FPL	NEECH	Total	Maturity Date FPL	Maturity Date NEECH
		(millions)			
Bank revolving line of credit facilities[a]	$ 3,000	$ 4,850	$ 7,850	[b]	[b]
Less letters of credit	(3)	(532)	(535)		
	2,997	4,318	7,315		
Revolving credit facilities	200	35	235	2018	2020
Less borrowings	—	—	—		
	200	35	235		
Letter of credit facilities[c]	—	650	650		2017
Less letters of credit	—	(269)	(269)		
	—	381	381		
Subtotal	3,197	4,734	7,931		
Cash and cash equivalents	38	504	542		
Less short-term debt	(194)	(1,577)	(1,771)		
Net available liquidity	$ 3,041	$ 3,661	$ 6,702		

(a) Provide for the funding of loans up to $7,850 million ($3,000 million for FPL) and the issuance of letters of credit up to $6,600 million ($2,500 million for FPL). The entire amount of the credit facilities is available for general corporate purposes and to provide additional liquidity in the event of a loss to the companies' or their subsidiaries' operating facilities (including, in the case of FPL, a transmission and distribution property loss). FPL's bank revolving line of credit facilities are also available to support the purchase of $718 million of pollution control, solid waste disposal and industrial development revenue bonds (tax exempt bonds) in the event they are tendered by individual bond holders and not remarketed prior to maturity.
(b) $500 million of FPL's and $750 million of NEECH's bank revolving line of credit facilities expire in 2016; essentially all of the remaining facilities at each of FPL and NEECH expire in 2020.
(c) Only available for the issuance of letters of credit.

Additionally, at June 30, 2015, certain subsidiaries of NEER and NEP had credit or loan facilities with available liquidity as set forth in the table below. In order for the applicable borrower to borrow or to have letters of credit issued under the terms of the agreements for the NEER facilities listed below, among other things, NEE is required to maintain a ratio of funded debt to total capitalization that does not exceed a stated ratio. These agreements also generally contain covenants and default and related acceleration provisions relating to, among other things, failure of NEE to maintain a ratio of funded debt to total capitalization at or below the specified ratio. Some of the payment obligations of the borrowers under the agreements listed below ultimately are guaranteed by NEE.

	Amount	Amount Remaining Available at June 30, 2015	Rate	Maturity Date	Related Project Use
		(millions)			
NEER:					
Canadian revolving credit facilities[a]	C$1,000	$585	Variable	Various	Canadian renewable generating assets
Limited-recourse construction and term loan facility	$425	$325	Variable	2035	Construction and development of a 250 MW solar PV project in California
Limited-recourse construction and term loan facility	$619	$350	Variable	2035	Construction and development of a 250 MW solar PV project in Nevada
Cash grant bridge loan facilities	$250	$250	Variable	2018	Construction and development of a 250 MW solar PV project in Nevada
NEP:					
Senior secured revolving credit facility[b]	$250	$171	Variable	2019	Working capital, expansion projects, acquisitions and general business purposes

(a) Available for general corporate purposes; the current intent is to use these facilities for the purchase, development, construction and/or operation of Canadian renewable generating assets. Consist of four credit facilities with expiration dates ranging from February 2016 to December 2016.

(b) NEP OpCo and one of its direct subsidiaries are required to comply with certain financial covenants on a quarterly basis and NEP OpCo's ability to pay cash distributions is subject to certain other restrictions. The revolving credit facility includes borrowing capacity for letters of credit and incremental commitments to increase the revolving credit facility up to $1 billion in the aggregate. Borrowings under the revolving credit facility are guaranteed by NEP OpCo and NEP.

Capital Support

Letters of Credit, Surety Bonds and Guarantees
Certain subsidiaries of NEE, including FPL, obtain letters of credit and surety bonds and issue guarantees to facilitate commercial transactions with third parties and financings. Letters of credit, surety bonds and guarantees support, among other things, the buying and selling of wholesale energy commodities, debt and related reserves, capital expenditures for NEER's wind and solar development, nuclear activities and other contractual agreements. Substantially all of NEE's and FPL's guarantee arrangements are on behalf of their consolidated subsidiaries for their related payment obligations.

In addition, as part of contract negotiations in the normal course of business, NEE and certain of its subsidiaries, including FPL, may agree to make payments to compensate or indemnify other parties for possible future unfavorable financial consequences resulting from specified events. The specified events may include, but are not limited to, an adverse judgment in a lawsuit, the imposition of additional taxes due to a change in tax law or interpretations of the tax law or the non-receipt of renewable tax credits or proceeds from cash grants under the Recovery Act. NEE and FPL are unable to develop an estimate of the maximum potential amount of future payments under some of these contracts because events that would obligate them to make payments have not yet occurred or, if any such event has occurred, they have not been notified of its occurrence.

In addition, NEE has guaranteed certain payment obligations of NEECH, including most of its debt and all of its debentures and commercial paper issuances, as well as most of its payment guarantees and indemnifications, and NEECH has guaranteed certain debt and other obligations of NEER and its subsidiaries.

At June 30, 2015, NEE had approximately $990 million of standby letters of credit ($3 million for FPL), $257 million of surety bonds ($59 million for FPL) and $11.3 billion notional amount of guarantees and indemnifications ($24 million for FPL), of which $6.6 billion of letters of credit, guarantees and indemnifications ($2 million for FPL) have expiration dates within the next five years.

Each of NEE and FPL believe it is unlikely that it would be required to make any payments under these letters of credit, surety bonds, guarantees and indemnifications. At June 30, 2015, NEE and FPL did not have any significant liabilities recorded for these letters of credit, surety bonds, guarantees and indemnifications.

Shelf Registration
In July 2015, NEE, NEECH and FPL filed a shelf registration statement with the SEC for an unspecified amount of securities which became effective upon filing. The amount of securities issuable by the companies is established from time to time by their respective boards of directors. As of August 3, 2015, securities that may be issued under the registration statement include, depending on the registrant, senior debt securities, subordinated debt securities, junior subordinated debentures, first mortgage bonds, common stock, preferred stock, stock purchase contracts, stock purchase units, warrants and guarantees related to certain of those securities. As of August 3, 2015, the board-authorized capacity available to issue securities was approximately $6.5 billion for NEE and NEECH (issuable by either or both of them up to such aggregate amount) and $2.5 billion for FPL.

New Accounting Rules and Interpretations

Amendments to the Consolidation Analysis - In February 2015, the FASB issued a new accounting standard that will modify current consolidation guidance. See Note 5 - Amendments to the Consolidation Analysis.

Presentation of Debt Issuance Costs - In April 2015, the FASB issued a new accounting standard which changes the presentation of debt issuance costs in financial statements. See Note 7 - Presentation of Debt Issuance Costs.

Revenue Recognition - In July 2015, the FASB approved the deferral of the effective date of the new accounting standard related to the recognition of revenue from contracts with customers and required disclosures. See Note 9 - Revenue Recognition.

ENERGY MARKETING AND TRADING AND MARKET RISK SENSITIVITY

NEE and FPL are exposed to risks associated with adverse changes in commodity prices, interest rates and equity prices. Financial instruments and positions affecting the financial statements of NEE and FPL described below are held primarily for purposes other than trading. Market risk is measured as the potential loss in fair value resulting from hypothetical reasonably possible changes in commodity prices, interest rates or equity prices over the next year. Management has established risk management policies to monitor and manage such market risks, as well as credit risks.

Commodity Price Risk

NEE and FPL use derivative instruments (primarily swaps, options, futures and forwards) to manage the commodity price risk inherent in the purchase and sale of fuel and electricity. In addition, NEE, through NEER, uses derivatives to optimize the value of its power generation and gas infrastructure assets and engages in power and gas marketing and trading activities to take advantage of expected future favorable price movements. See Note 2.

The changes in the fair value of NEE's consolidated subsidiaries' energy contract derivative instruments for the three and six months ended June 30, 2015 were as follows:

	Trading	Hedges on Owned Assets: Non-Qualifying	Hedges on Owned Assets: FPL Cost Recovery Clauses	NEE Total
		(millions)		
Three months ended June 30, 2015				
Fair value of contracts outstanding at March 31, 2015	$ 349	$ 978	$ (371)	$ 956
Reclassification to realized at settlement of contracts	(39)	(102)	130	(11)

Total mark-to-market energy contract net assets (liabilities) at June 30, 2014	$ 295	$ 193	$ 72	$ 426

With respect to commodities, NEE's EMC, which is comprised of certain members of senior management, and NEE's chief executive officer are responsible for the overall approval of market risk management policies and the delegation of approval and authorization

levels. The EMC and NEE's chief executive officer receive periodic updates on market positions and related exposures, credit exposures and overall risk management activities.

NEE uses a value-at-risk (VaR) model to measure commodity price market risk in its trading and mark-to-market portfolios. The VaR is the estimated nominal loss of market value based on a one-day holding period at a 95% confidence level using historical simulation methodology. The VaR figures are as follows:

	Trading			Non-Qualifying Hedges and Hedges in FPL Cost Recovery Clauses[a]			Total		
	FPL	NEER	NEE	FPL	NEER	NEE	FPL	NEER	NEE
				(millions)

(a) Non-qualifying hedges are employed to reduce the market risk exposure to physical assets or contracts which are not marked to market. The VaR figures for the non-qualifying hedges and hedges in FPL cost recovery clauses category do not represent the economic exposure to commodity price movements.

Interest Rate Risk

NEE's and FPL's financial results are exposed to risk resulting from changes in interest rates as a result of their respective issuances of debt, investments in special use funds and other investments. NEE and FPL manage their respective interest rate exposure by monitoring current interest rates, entering into interest rate contracts and using a combination of fixed rate and variable rate debt. Interest rate contracts are used to mitigate and adjust interest rate exposure when deemed appropriate based upon market conditions or when required by financing agreements.

The following are estimates of the fair value of NEE's and FPL's financial instruments that are exposed to interest rate risk:

	June 30, 2015		December 31, 2014	
	Carrying Amount	**Estimated Fair Value**	Carrying Amount	Estimated Fair Value
		(millions)		
NEE:				
Fixed income securities:				
Special use funds	**$ 1,825**	**$ 1,825** [a]	$ 1,965	$ 1,965 [a]
Other investments:				
Debt securities	**$ 137**	**$ 137** [a]	$ 124	$ 124 [a]
Primarily notes receivable	**$ 524**	**$ 666** [b]	$ 525	$ 679 [b]
Long-term debt, including current maturities	**$ 27,998**	**$ 29,490** [c]	$ 27,876	$ 30,337 [c]
Interest rate contracts - net unrealized losses	**$ (158)**	**$ (158)** [d]	$ (216)	$ (216) [d]
FPL:				
Fixed income securities - special use funds	**$ 1,405**	**$ 1,405** [a]	$ 1,568	$ 1,568 [a]
Long-term debt, including current maturities	**$ 9,529**	**$ 10,576** [c]	$ 9,473	$ 11,105 [c]

(a) Primarily estimated using quoted market prices for these or similar issues.
(b) Primarily estimated using a discounted cash flow valuation technique based on certain observable yield curves and indices considering the credit profile of the borrower.
(c) Estimated using either quoted market prices for the same or similar issues or discounted cash flow valuation technique, considering the current credit spread of the debtor.
(d) Modeled internally using discounted cash flow valuation technique and applying a credit valuation adjustment.

The special use funds of NEE and FPL consist of restricted funds set aside to cover the cost of storm damage for FPL and for the decommissioning of NEE's and FPL's nuclear power plants. A portion of these funds is invested in fixed income debt securities primarily carried at estimated fair value. At FPL, changes in fair value, including any OTTI losses, result in a corresponding adjustment to the related liability accounts based on current regulatory treatment. The changes in fair value of NEE's non-rate regulated operations result in a corresponding adjustment to OCI, except for impairments deemed to be other than temporary, including any credit losses, which are reported in current period earnings. Because the funds set aside by FPL for storm damage could be needed at any time, the related investments are generally more liquid and, therefore, are less sensitive to changes in interest rates. The nuclear decommissioning funds, in contrast, are generally invested in longer-term securities, as decommissioning activities are not scheduled to begin until at least 2030 (2032 at FPL).

As of June 30, 2015, NEE had interest rate contracts with a notional amount of approximately $8.5 billion related to long-term debt issuances, of which $2.4 billion are fair value hedges at NEECH that effectively convert fixed-rate debt to a variable-rate debt instrument. The remaining $6.1 billion of notional amount of interest rate contracts relate to cash flow hedges to manage exposure to the variability of cash flows associated with variable-rate debt instruments, which primarily relate to NEER debt issuances. At June 30, 2015, the estimated fair value of NEE's fair value hedges and cash flow hedges was approximately $27 million and $(185) million, respectively. See Note 2.

Based upon a hypothetical 10% decrease in interest rates, which is a reasonable near-term market change, the net fair value of NEE's net liabilities would increase by approximately $1,021 million ($510 million for FPL) at June 30, 2015.

Equity Price Risk

NEE and FPL are exposed to risk resulting from changes in prices for equity securities. For example, NEE's nuclear decommissioning reserve funds include marketable equity securities primarily carried at their market value of approximately $2,829 million and $2,634 million ($1,720 million and $1,561 million for FPL) at June 30, 2015 and December 31, 2014, respectively. At June 30, 2015, a hypothetical 10% decrease in the prices quoted on stock exchanges, which is a reasonable near-term market change, would result in a $252 million ($149 million for FPL) reduction in fair value. For FPL, a corresponding adjustment would be made to the related liability accounts based on current regulatory treatment, and for NEE's non-rate regulated operations, a corresponding adjustment would be made to OCI to the extent the market value of the securities exceeded amortized cost and to OTTI loss to the extent the market value is below amortized cost.

Credit Risk

NEE and its subsidiaries are also exposed to credit risk through their energy marketing and trading operations. Credit risk is the risk that a financial loss will be incurred if a counterparty to a transaction does not fulfill its financial obligation. NEE manages counterparty credit risk for its subsidiaries with energy marketing and trading operations through established policies, including counterparty credit limits, and in some cases credit enhancements, such as cash prepayments, letters of credit, cash and other collateral and guarantees.

Credit risk is also managed through the use of master netting agreements. NEE's credit department monitors current and forward credit exposure to counterparties and their affiliates, both on an individual and an aggregate basis. For all derivative and contractual transactions, NEE's energy marketing and trading operations, which include FPL's energy marketing and trading division, are exposed to losses in the event of nonperformance by counterparties to these transactions. Some relevant considerations when assessing NEE's energy marketing and trading operations' credit risk exposure include the following:

- Operations are primarily concentrated in the energy industry.
- Trade receivables and other financial instruments are predominately with energy, utility and financial services related companies, as well as municipalities, cooperatives and other trading companies in the U.S.
- Overall credit risk is managed through established credit policies and is overseen by the EMC.
- Prospective and existing customers are reviewed for creditworthiness based upon established standards, with customers not meeting minimum standards providing various credit enhancements or secured payment terms, such as letters of credit or the posting of margin cash collateral.
- Master netting agreements are used to offset cash and non-cash gains and losses arising from derivative instruments with the same counterparty. NEE's policy is to have master netting agreements in place with significant counterparties.

Based on NEE's policies and risk exposures related to credit, NEE and FPL do not anticipate a material adverse effect on their financial statements as a result of counterparty nonperformance. As of June 30, 2015, approximately 93% of NEE's and 99% of FPL's energy marketing and trading counterparty credit risk exposure is associated with companies that have investment grade credit ratings.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

See Management's Discussion - Energy Marketing and Trading and Market Risk Sensitivity.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

As of June 30, 2015, each of NEE and FPL had performed an evaluation, under the supervision and with the participation of its management, including NEE's and FPL's chief executive officer and chief financial officer, of the effectiveness of the design and operation of each company's disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 Rules 13a-15(e) and 15d-15(e)). Based upon that evaluation, the chief executive officer and the chief financial officer of each of NEE and FPL concluded that the company's disclosure controls and procedures were effective as of June 30, 2015.

(b) Changes in Internal Control Over Financial Reporting

NEE and FPL are continuously seeking to improve the efficiency and effectiveness of their operations and of their internal controls. This results in refinements to processes throughout NEE and FPL. However, there has been no change in NEE's or FPL's internal control over financial reporting (as defined in the Securities Exchange Act of 1934 Rules 13a-15(f) and 15d-15(f)) that occurred during NEE's and FPL's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, NEE's or FPL's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

NEE and FPL are parties to various legal and regulatory proceedings in the ordinary course of their respective businesses. For information regarding legal proceedings that could have a material effect on NEE or FPL, see Item 3. Legal Proceedings and Note 13 - Legal Proceedings to Consolidated Financial Statements in the 2014 Form 10-K and Note 8 - Legal Proceedings herein. Such descriptions are incorporated herein by reference.

Item 1A. Risk Factors

There have been no material changes from the risk factors disclosed in the 2014 Form 10-K except as follows:

NEP's NET Midstream acquisition and other future acquisitions by NEP may not be completed and, even if completed, NEE may not realize the anticipated benefits of such acquisitions, which could materially adversely affect NEE's business, financial condition, results of operations and prospects.

NEP's acquisition of NET Midstream, a developer, owner and operator of seven long-term contracted natural gas pipelines in Texas, may not be completed on the terms or in the manner currently anticipated as a result of a number of factors, including, among other things, the failure to satisfy one or more of the conditions to closing. There can be no assurance that the conditions to closing of the NET Midstream acquisition will be satisfied or waived or that other events will not intervene to delay or result in the failure to close the acquisition. In addition, the acquisition agreement may be terminated by the sellers or NEP for various reasons, including the failure to close by a specified date. Failure to complete the NET Midstream acquisition would prevent NEE from realizing the anticipated benefits of the acquisition.

In addition, even if NEP completes the NET Midstream acquisition, NEE may not realize the anticipated benefits from the acquisition. Although NEP has made a number of acquisitions of wind and solar generating projects, the NET Midstream acquisition will be the first third party acquisition by NEP and will be NEP's first acquisition of natural gas pipeline assets.

In the future NEP may make additional acquisitions of assets which are inherently risky and NEE may not realize the anticipated benefits of the acquisitions, which could materially adversely affect NEE's business, financial condition, results of operations and prospects.

The factors discussed above and in Part I, Item 1A. Risk Factors in the 2014 Form 10-K, as well as other information set forth in this report, which could materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects should be carefully considered. The risks described above and in the 2014 Form 10-K are not the only risks facing NEE and FPL. Additional risks and uncertainties not currently known to NEE or FPL, or that are currently deemed to be immaterial, also may materially adversely affect NEE's or FPL's business, financial condition, results of operations and prospects.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(c) Information regarding purchases made by NEE of its common stock during the three months ended June 30, 2015 is as follows:

Period	Total Number of Shares Purchased[a]	Average Price Paid Per Share	Total Number of Shares Purchased as Part of a Publicly Announced Program	Maximum Number of Shares that May Yet be Purchased Under the Program[b]
4/1/15 - 4/30/15	—	$ —	—	13,274,748
5/1/15 - 5/31/15	3,553	$ 102.14	—	13,274,748
6/1/15 - 6/30/15	506	$ 99.07	—	13,274,748
Total	4,059	$ 101.76	—	

(a) Includes: (1) in May 2015, shares of common stock withheld from employees to pay certain withholding taxes upon the vesting of stock awards granted to such employees under the NextEra Energy, Inc. Amended and Restated 2011 Long Term Incentive Plan; and (2) in June 2015, shares of common stock purchased as

a reinvestment of dividends by the trustee of a grantor trust in connection with NEE's obligation under a February 2006 grant under the NextEra Energy, Inc. Amended and Restated Long-Term Incentive Plan (former LTIP) to an executive officer of deferred retirement share awards.

(b) In February 2005, NEE's Board of Directors authorized common stock repurchases of up to 20 million shares of common stock over an unspecified period, which authorization was most recently reaffirmed and ratified by the Board of Directors in July 2011.

Item 5. Other Information

(a) None

(b) None

(c) Other events

(i) Reference is made to Item 1. Business - Overview and Item 8. Financial Statements and Supplementary Data - Note 1 - Proposed Merger in the 2014 Form 10-K.

In June 2015, Hawaiian Electric Industries, Inc.'s (HEI's) shareholders approved the proposed merger pursuant to which Hawaiian Electric Company, Inc., HEI's wholly-owned electric utility subsidiary, will become a wholly-owned subsidiary of NEE. Completion of the merger remains subject to the satisfaction of a number of conditions, including Hawaii Public Utilities Commission approval.

(ii) Reference is made to Item 1. Business - NEE's Operating Subsidiaries - FPL - FPL System Capability and Load in the 2014 Form 10-K.

In March 2015, FPL issued an RFP for additional power resources of approximately 1,620 MW beginning in June 2019. In July 2015, after completing the RFP process, FPL announced its self-build option, a new natural gas-fired combined-cycle unit in Okeechobee County, Florida with generating capacity of approximately 1,620 MW, was determined to be the best option for customers. In September 2015, FPL plans to file a petition for approval of this new unit with the FPSC and anticipates an FPSC decision in January 2016. This new unit will also be subject to approval by the Siting Board (comprised of the governor and cabinet) under the Florida Electrical Power Plant Siting Act.

(iii) Reference is made to Item 1. Business - NEE's Operating Subsidiaries - FPL - FPL Sources of Generation - Nuclear Operations in the 2014 Form 10-K.

The current operating licenses for FPL's nuclear units at the Turkey Point site include, among other things, a requirement that the maximum allowed water temperature in the Turkey Point cooling canal system not exceed approximately 104 degrees. In the summer of 2014, numerous factors contributed to higher-than-normal temperatures in the cooling canal system, including high summer temperatures, lack of rainfall, reduced water levels and the existence of an algae bloom. To date this summer, similar factors continue to impact the water temperature in the cooling canal system and there remains a potential for higher temperatures in the cooling canal system to continue through the summer of 2015. Management is in the process of implementing a comprehensive plan to improve conditions in the cooling canal system and has contingency plans if water temperatures approach the maximum permitted level, including temporarily reducing power output at the nuclear units. However, if the water temperature exceeds the maximum permitted level, FPL will be required to commence shut down of the Turkey Point nuclear units within a certain timeframe until the water temperature returns to below the maximum permitted level, unless relief from the maximum temperature requirement is requested by FPL and granted by the NRC.

(iv) Reference is made to Item 1. Business - NEE Environmental Matters - Waters of the U.S. in the 2014 Form 10-K.

In June 2015, the EPA issued a final rule redefining "waters of the U.S." under the Clean Water Act to expand the definition of waters of the U.S. to encompass previously unregulated waters, such as intermittent streams, non-navigable tributaries, isolated wetlands and adjacent other waters. The final rule is not expected to have a material impact on NEE and FPL, but the ultimate impact will evolve over time through site specific studies, permit evaluations and negotiations as the rule is implemented. Numerous parties have challenged the final rule.

Item 6. Exhibits

Exhibit Number	Description	NEE	FPL
*3(i)	Restated Articles of Incorporation of NextEra Energy, Inc. (filed as Exhibit 3(i)(b) to Form 8-K dated May 21, 2015. File No. 1-8841)	x

*Incorporated herein by reference

NEE and FPL agree to furnish to the SEC upon request any instrument with respect to long-term debt that NEE and FPL have not filed as an exhibit pursuant to the exemption provided by Item 601(b)(4)(iii)(A) of Regulation S-K.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrants have duly caused this report to be signed on their behalf by the undersigned thereunto duly authorized.

Date: August 3, 2015

NEXTERA ENERGY, INC.
(Registrant)

CHRIS N. FROGGATT

Chris N. Froggatt
Vice President, Controller and Chief Accounting Officer
of NextEra Energy, Inc.
(Principal Accounting Officer of NextEra Energy, Inc.)

FLORIDA POWER & LIGHT COMPANY
(Registrant)

KIMBERLY OUSDAHL

Kimberly Ousdahl
Vice President, Controller and Chief Accounting Officer
of Florida Power & Light Company
(Principal Accounting Officer of
Florida Power & Light Company)

Exhibit 12(a)

NEXTERA ENERGY, INC. AND SUBSIDIARIES
COMPUTATION OF RATIO OF EARNINGS TO FIXED CHARGES AND
RATIO OF EARNINGS TO COMBINED FIXED CHARGES AND PREFERRED STOCK DIVIDENDS[(a)]

	Six Months Ended June 30, 2015
	(millions of dollars)
Earnings, as defined:	
Net income	$ 1,371
Income taxes	560
Fixed charges included in the determination of net income, as below	637
Amortization of capitalized interest	20
Distributed income of equity method investees	24
Less: Equity in earnings of equity method investees	36
Total earnings, as defined	$ 2,576
Fixed charges, as defined:	
Interest expense	$ 601
Rental interest factor	28
Allowance for borrowed funds used during construction	8
Fixed charges included in the determination of net income	637
Capitalized interest	44
Total fixed charges, as defined	$ 681
Ratio of earnings to fixed charges and ratio of earnings to combined fixed charges and preferred stock dividends[(a)]	3.78

(a) NextEra Energy, Inc. has no preference equity securities outstanding; therefore, the ratio of earnings to fixed charges is the same as the ratio of earnings to combined fixed charges and preferred stock dividends.

Exhibit 12(b)

FLORIDA POWER & LIGHT COMPANY AND SUBSIDIARIES
COMPUTATION OF RATIO OF EARNINGS TO FIXED CHARGES AND
RATIO OF EARNINGS TO COMBINED FIXED CHARGES AND PREFERRED STOCK DIVIDENDS[a]

	Six Months Ended June 30, 2015
	(millions of dollars)
Earnings, as defined:	
Net income	$ 794
Income taxes	454
Fixed charges, as below	241
Total earnings, as defined	$ 1,489
Fixed charges, as defined:	
Interest expense	$ 227
Rental interest factor	6
Allowance for borrowed funds used during construction	8
Total fixed charges, as defined	$ 241
Ratio of earnings to fixed charges and ratio of earnings to combined fixed charges and preferred stock dividends[a]	6.18

(a) Florida Power & Light Company has no preference equity securities outstanding; therefore, the ratio of earnings to fixed charges is the same as the ratio of earnings to combined fixed charges and preferred stock dividends.

Exhibit 31(a)

Rule 13a-14(a)/15d-14(a) Certification

I, James L. Robo, certify that:

1. I have reviewed this Form 10-Q for the quarterly period ended June 30, 2015 of NextEra Energy, Inc. (the registrant);

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Date: August 3, 2015

JAMES L. ROBO

James L. Robo
Chairman, President and Chief Executive Officer
of NextEra Energy, Inc.

Exhibit 31(b)

Rule 13a-14(a)/15d-14(a) Certification

I, Moray P. Dewhurst, certify that:

1. I have reviewed this Form 10-Q for the quarterly period ended June 30, 2015 of NextEra Energy, Inc. (the registrant);

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

and Executive Vice President - Finance
of NextEra Energy, Inc.

Exhibit 31(c)

Rule 13a-14(a)/15d-14(a) Certification

I, Eric E. Silagy, certify that:

1. I have reviewed this Form 10-Q for the quarterly period ended June 30, 2015 of Florida Power & Light Company (the registrant);

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

President and Chief Executive Officer
of Florida Power & Light Company

Exhibit 31(d)

Rule 13a-14(a)/15d-14(a) Certification

I, Moray P. Dewhurst, certify that:

1. I have reviewed this Form 10-Q for the quarterly period ended June 30, 2015 of Florida Power & Light Company (the registrant);

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Florida Power & Light Company	Large Accelerated Filer ☐	Accelerated Filer ☐	Non-Accelerated Filer ☑	Smaller Reporting Company ☐

Indicate by check mark whether the registrants are shell companies (as defined in Rule 12b-2 of the Securities Exchange Act of 1934). Yes ☐ No ☑

Number of shares of NextEra Energy, Inc. common stock, $0.01 par value, outstanding as of September 30, 2015: 460,535,906

Number of shares of Florida Power & Light Company common stock, without par value, outstanding as of September 30, 2015, all of which were held, beneficially and of record, by NextEra Energy, Inc.: 1,000

This combined Form 10-Q represents separate filings by NextEra Energy, Inc. and Florida Power & Light Company. Information contained herein relating to an individual registrant is filed by that registrant on its own behalf. Florida Power & Light Company makes no representations as to the information relating to NextEra Energy, Inc.'s other operations.

Florida Power & Light Company meets the conditions set forth in General Instruction H.(1)(a) and (b) of Form 10-Q and is therefore filing this Form with the reduced disclosure format.

DEFINITIONS

Acronyms and defined terms used in the text include the following:

Term	Meaning
AFUDC	allowance for funds used during construction
AFUDC - equity	equity component of AFUDC
AOCI	accumulated other comprehensive income
Duane Arnold	Duane Arnold Energy Center
EPA	U.S. Environmental Protection Agency
FASB	Financial Accounting Standards Board
FERC	U.S. Federal Energy Regulatory Commission
Florida Southeast Connection	Florida Southeast Connection, LLC, a wholly-owned NEECH subsidiary
FPL	Florida Power & Light Company
FPL FiberNet	fiber-optic telecommunications business
FPSC	Florida Public Service Commission
fuel clause	fuel and purchased power cost recovery clause, as established by the FPSC
GAAP	generally accepted accounting principles in the U.S.
ITC	investment tax credit
kWh	kilowatt-hour(s)
Management's Discussion	Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
MMBtu	One million British thermal units
MW	megawatt(s)
MWh	megawatt-hour(s)
NEE	NextEra Energy, Inc.
NEECH	NextEra Energy Capital Holdings, Inc.
NEER	NextEra Energy Resources, LLC
NEET	NextEra Energy Transmission, LLC
NEP	NextEra Energy Partners, LP
NEP OpCo	NextEra Energy Operating Partners, LP
NET Midstream	NET Holdings Management, LLC
Note __	Note __ to condensed consolidated financial statements
NRC	U.S. Nuclear Regulatory Commission
O&M expenses	other operations and maintenance expenses in the condensed consolidated statements of income
OCI	other comprehensive income
Office of Public Counsel	State of Florida Office of Public Counsel
OTC	over-the-counter
OTTI	other than temporary impairment
Point Beach	Point Beach Nuclear Power Plant
PTC	production tax credit
PV	photovoltaic
Recovery Act	American Recovery and Reinvestment Act of 2009, as amended
regulatory ROE	return on common equity as determined for regulatory purposes
Sabal Trail	Sabal Trail Transmission, LLC, an entity in which a NEECH subsidiary has a 33% ownership interest
Seabrook	Seabrook Station
SEC	U.S. Securities and Exchange Commission
U.S.	United States of America

NEE, FPL, NEECH and NEER each has subsidiaries and affiliates with names that may include NextEra Energy, FPL, NextEra Energy Resources, NextEra, FPL Group, FPL Group Capital, FPL Energy, FPLE and similar references. For convenience and simplicity, in this report the terms NEE, FPL, NEECH and NEER are sometimes used as abbreviated references to specific subsidiaries, affiliates or groups of subsidiaries or affiliates. The precise meaning depends on the context.

TABLE OF CONTENTS

FORWARD-LOOKING STATEMENTS

This report includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Any statements that express, or involve discussions as to, expectations, beliefs, plans, objectives, assumptions, strategies, future events or performance (often, but not always, through the use of words or phrases such as may result, are expected to, will continue, is anticipated, aim, believe, will, could, should, would, estimated, may, plan, potential, future, projection, goals, target, outlook, predict and intend or words of similar meaning) are not statements of historical facts and may be forward looking. Forward-looking statements involve estimates, assumptions and uncertainties. Accordingly, any such statements are qualified in their entirety by reference to, and are accompanied by, the following important factors (in addition to any assumptions and other factors referred to specifically in connection with such forward-looking statements) that could have a significant impact on NEE's and/or FPL's operations and financial results, and could cause NEE's and/or FPL's actual results to differ materially from those contained or implied in forward-looking statements made by or on behalf of NEE and/or FPL in this combined Form 10-Q, in presentations, on their respective websites, in response to questions or otherwise.

Regulatory, Legislative and Legal Risks

- NEE's and FPL's business, financial condition, results of operations and prospects may be materially adversely affected by the extensive regulation of their business.
- NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected if they are unable to recover in a timely manner any significant amount of costs, a return on certain assets or a reasonable return on invested capital through base rates, cost recovery clauses, other regulatory mechanisms or otherwise.
- Regulatory decisions that are important to NEE and FPL may be materially adversely affected by political, regulatory and economic factors.
- FPL's use of derivative instruments could be subject to prudence challenges and, if found imprudent, could result in disallowances of cost recovery for such use by the FPSC.
- Any reductions to, or the elimination of, governmental incentives that support utility scale renewable energy, including, but not limited to, tax incentives, renewable portfolio standards or feed-in tariffs, or the imposition of additional taxes or other assessments on renewable energy, could result in, among other items, the lack of a satisfactory market for the development of new renewable energy projects, NEER abandoning the development of renewable energy projects, a loss of NEER's investments in renewable energy projects and reduced project returns, any of which could have a material adverse effect on NEE's business, financial condition, results of operations and prospects.
- NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected as a result of new or revised laws, regulations or interpretations or other regulatory initiatives.
- NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected if the rules implementing the Dodd-Frank Wall Street Reform and Consumer Protection Act broaden the scope of its provisions regarding the regulation of OTC financial derivatives and make certain provisions applicable to NEE and FPL.
- NEE and FPL are subject to numerous environmental laws, regulations and other standards that may result in capital expenditures, increased operating costs and various liabilities, and may require NEE and FPL to limit or eliminate certain operations.
- NEE's and FPL's business could be negatively affected by federal or state laws or regulations mandating new or additional limits on the production of greenhouse gas emissions.
- Extensive federal regulation of the operations of NEE and FPL exposes NEE and FPL to significant and increasing compliance costs and may also expose them to substantial monetary penalties and other sanctions for compliance failures.
- Changes in tax laws, as well as judgments and estimates used in the determination of tax-related asset and liability amounts, could materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.
- NEE's and FPL's business, financial condition, results of operations and prospects may be materially adversely affected due to adverse results of litigation.

Operational Risks

- NEE's and FPL's business, financial condition, results of operations and prospects could suffer if NEE and FPL do not proceed with projects under development or are unable to complete the construction of, or capital improvements to, electric generation, transmission and distribution facilities, gas infrastructure facilities or other facilities on schedule or within budget.
- NEE and FPL may face risks related to project siting, financing, construction, permitting, governmental approvals and the negotiation of project development agreements that may impede their development and operating activities.
- The operation and maintenance of NEE's and FPL's electric generation, transmission and distribution facilities, gas infrastructure facilities and other facilities are subject to many operational risks, the consequences of which could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

- NEE's and FPL's business, financial condition, results of operations and prospects may be negatively affected by a lack of growth or slower growth in the number of customers or in customer usage.
- NEE's and FPL's business, financial condition, results of operations and prospects can be materially adversely affected by weather conditions, including, but not limited to, the impact of severe weather.
- Threats of terrorism and catastrophic events that could result from terrorism, cyber attacks, or individuals and/or groups attempting to disrupt NEE's and FPL's business, or the businesses of third parties, may materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.
- The ability of NEE and FPL to obtain insurance and the terms of any available insurance coverage could be materially adversely affected by international, national, state or local events and company-specific events, as well as the financial condition of insurers. NEE's and FPL's insurance coverage does not provide protection against all significant losses.
- NEE invests in gas and oil producing assets through NEER's gas infrastructure business. The gas infrastructure business is exposed to fluctuating market prices of natural gas, natural gas liquids, oil and other energy commodities. A prolonged period of low gas and oil prices could impact NEER's gas infrastructure business and cause NEER to delay or cancel certain gas infrastructure projects and for certain existing projects to be impaired, which could materially adversely affect NEE's results of operations.
- If supply costs necessary to provide NEER's full energy and capacity requirement services are not favorable, operating costs could increase and materially adversely affect NEE's business, financial condition, results of operations and prospects.
- Due to the potential for significant volatility in market prices for fuel, electricity and renewable and other energy commodities, NEER's inability or failure to manage properly or hedge effectively the commodity risks within its portfolios could materially adversely affect NEE's business, financial condition, results of operations and prospects.
- Sales of power on the spot market or on a short-term contractual basis may cause NEE's results of operations to be volatile.
- Reductions in the liquidity of energy markets may restrict the ability of NEE to manage its operational risks, which, in turn, could negatively affect NEE's results of operations.
- NEE's and FPL's hedging and trading procedures and associated risk management tools may not protect against significant losses.
- If price movements significantly or persistently deviate from historical behavior, NEE's and FPL's risk management tools associated with their hedging and trading procedures may not protect against significant losses.
- If power transmission or natural gas, nuclear fuel or other commodity transportation facilities are unavailable or disrupted, FPL's and NEER's ability to sell and deliver power or natural gas may be limited.
- NEE and FPL are subject to credit and performance risk from customers, hedging counterparties and vendors.
- NEE and FPL could recognize financial losses or a reduction in operating cash flows if a counterparty fails to perform or make payments in accordance with the terms of derivative contracts or if NEE or FPL is required to post margin cash collateral under derivative contracts.
- NEE and FPL are highly dependent on sensitive and complex information technology systems, and any failure or breach of those systems could have a material adverse effect on their business, financial condition, results of operations and prospects.
- NEE's and FPL's retail businesses are subject to the risk that sensitive customer data may be compromised, which could result in a material adverse impact to their reputation and/or the results of operations of the retail business.
- NEE and FPL could recognize financial losses as a result of volatility in the market values of derivative instruments and limited liquidity in OTC markets.
- NEE and FPL may be materially adversely affected by negative publicity.
- NEE's and FPL's business, financial condition, results of operations and prospects may be materially adversely affected if FPL is unable to maintain, negotiate or renegotiate franchise agreements on acceptable terms with municipalities and counties in Florida.
- Increasing costs associated with health care plans may materially adversely affect NEE's and FPL's results of operations.
- NEE's and FPL's business, financial condition, results of operations and prospects could be negatively affected by the lack of a qualified workforce or the loss or retirement of key employees.
- NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected by work strikes or stoppages and increasing personnel costs.
- NEE's ability to successfully identify, complete and integrate acquisitions is subject to significant risks, including, but not limited to, the effect of increased competition for acquisitions resulting from the consolidation of the power industry.

- Acquisitions by NEP may not be completed and, even if completed, NEE may not realize the anticipated benefits of any acquisitions, which could materially adversely affect NEE's business, financial condition, results of operations and prospects.

Nuclear Generation Risks

- The construction, operation and maintenance of NEE's and FPL's nuclear generation facilities involve environmental, health and financial risks that could result in fines or the closure of the facilities and in increased costs and capital expenditures.
- In the event of an incident at any nuclear generation facility in the U.S. or at certain nuclear generation facilities in Europe, NEE and FPL could be assessed significant retrospective assessments and/or retrospective insurance premiums as a result of their participation in a secondary financial protection system and nuclear insurance mutual companies.
- NRC orders or new regulations related to increased security measures and any future safety requirements promulgated by the NRC could require NEE and FPL to incur substantial operating and capital expenditures at their nuclear generation facilities.
- The inability to operate any of NEER's or FPL's nuclear generation units through the end of their respective operating licenses could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.
- Various hazards posed to nuclear generation facilities, along with increased public attention to and awareness of such hazards, could result in increased nuclear licensing or compliance costs which are difficult or impossible to predict and could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.
- NEE's and FPL's nuclear units are periodically removed from service to accommodate normal refueling and maintenance outages, and for other purposes. If planned outages last longer than anticipated or if there are unplanned outages, NEE's and FPL's results of operations and financial condition could be materially adversely affected.

Liquidity, Capital Requirements and Common Stock Risks

- Disruptions, uncertainty or volatility in the credit and capital markets may negatively affect NEE's and FPL's ability to fund their liquidity and capital needs and to meet their growth objectives, and can also materially adversely affect the results of operations and financial condition of NEE and FPL.
- NEE's, NEECH's and FPL's inability to maintain their current credit ratings may materially adversely affect NEE's and FPL's liquidity and results of operations, limit the ability of NEE and FPL to grow their business, and increase interest costs.
- NEE's and FPL's liquidity may be impaired if their credit providers are unable to fund their credit commitments to the companies or to maintain their current credit ratings.
- Poor market performance and other economic factors could affect NEE's defined benefit pension plan's funded status, which may materially adversely affect NEE's and FPL's business, financial condition, liquidity and results of operations and prospects.
- Poor market performance and other economic factors could adversely affect the asset values of NEE's and FPL's nuclear decommissioning funds, which may materially adversely affect NEE's and FPL's liquidity and results of operations.
- Certain of NEE's investments are subject to changes in market value and other risks, which may materially adversely affect NEE's liquidity, financial results and results of operations.
- NEE may be unable to meet its ongoing and future financial obligations and to pay dividends on its common stock if its subsidiaries are unable to pay upstream dividends or repay funds to NEE.
- NEE may be unable to meet its ongoing and future financial obligations and to pay dividends on its common stock if NEE is required to perform under guarantees of obligations of its subsidiaries.
- Disruptions, uncertainty or volatility in the credit and capital markets may exert downward pressure on the market price of NEE's common stock.

These factors should be read together with the risk factors included in Part I, Item 1A. Risk Factors in NEE's and FPL's Annual Report on Form 10-K for the year ended December 31, 2014 (2014 Form 10-K) and in Part II, Item 1A. Risk Factors in NEE's and FPL's Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2015 (June 2015 Form 10-Q), and investors should refer to those sections of the 2014 Form 10-K and the June 2015 Form 10-Q. Any forward-looking statement speaks only as of the date on which such statement is made, and NEE and FPL undertake no obligation to update any forward-looking statement to reflect events or circumstances, including, but not limited to, unanticipated events, after the date on which such statement is made, unless otherwise required by law. New factors emerge from time to time and it is not possible for management to predict all of such factors, nor can it assess the impact of each such factor on the business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained or implied in any forward-looking statement.

Website Access to SEC Filings. NEE and FPL make their SEC filings, including the annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and any amendments to those reports, available free of charge on NEE's internet website, www.nexteraenergy.com, as soon as reasonably practicable after those documents are electronically filed with or furnished to the SEC. The information and materials available on NEE's website (or any of its subsidiaries' websites) are not incorporated by reference into this combined Form 10-Q. The SEC maintains an internet website that contains reports, proxy and information statements and other information regarding registrants that file electronically with the SEC at www.sec.gov.

This report should be read in conjunction with the Notes herein and the Notes to Consolidated Financial Statements appearing in the 2014 Form 10-K.

The accompanying condensed consolidated financial statements should be read in conjunction with the 2014 Form 10-K. In the opinion of NEE and FPL management, all adjustments (consisting of normal recurring accruals) considered necessary for fair financial statement presentation have been made. Certain amounts included in the prior year's condensed consolidated financial statements have been reclassified to conform to the current year's presentation. The results of operations for an interim period generally will not give a true indication of results for the year.

1. Employee Retirement Benefits

NEE sponsors a qualified noncontributory defined benefit pension plan for substantially all employees of NEE and its subsidiaries and has a supplemental executive retirement plan, which includes a non-qualified supplemental defined benefit pension component that provides benefits to a select group of management and highly compensated employees (collectively, pension benefits). In addition to pension benefits, NEE sponsors a contributory postretirement plan for health care and life insurance benefits (other benefits) for retirees of NEE and its subsidiaries meeting certain eligibility requirements.

The components of net periodic benefit (income) cost for the plans are as follows:

	Pension Benefits		Other Benefits		Pension Benefits		Other Benefits	
	Three Months Ended September 30,		Three Months Ended September 30,		Nine Months Ended September 30,		Nine Months Ended September 30,

Net periodic benefit (income) cost at FPL	**$ (13)**	$ (11)	**$ 3**	$ 2	**$ (40)**	$ (34)	**$ 8**	$ 8

2. Derivative Instruments

NEE and FPL use derivative instruments (primarily swaps, options, futures and forwards) to manage the commodity price risk inherent in the purchase and sale of fuel and electricity, as well as interest rate and foreign currency exchange rate risk associated primarily with outstanding and forecasted debt issuances and borrowings, and to optimize the value of NEER's power generation and gas infrastructure assets.

With respect to commodities related to NEE's competitive energy business, NEER employs risk management procedures to conduct its activities related to optimizing the value of its power generation and gas infrastructure assets, providing full energy and capacity requirements services primarily to distribution utilities, and engaging in power and gas marketing and trading activities to take advantage of expected future favorable price movements and changes in the expected volatility of prices in the energy markets. These risk management activities involve the use of derivative instruments executed within prescribed limits to manage the risk associated with fluctuating commodity prices. Transactions in derivative instruments are executed on recognized exchanges or via the OTC markets, depending on the most favorable credit terms and market execution factors. For NEER's power generation and gas infrastructure assets, derivative instruments are used to hedge the commodity price risk associated with the fuel requirements of the assets, where applicable, as well as to hedge all or a portion of the expected output of these assets. These hedges are designed to reduce the effect of adverse changes in the wholesale forward commodity markets associated with NEER's power generation and gas infrastructure assets. With regard to full energy and capacity requirements services, NEER is required to vary the quantity of energy and related services based on the load demands of the customers served. For this type of transaction, derivative instruments are used to hedge the anticipated electricity quantities required to serve these customers and reduce the effect of unfavorable changes in the forward energy markets. Additionally, NEER takes positions in the energy markets based on differences between actual forward market levels and management's view of fundamental market conditions, including supply/demand imbalances, changes in traditional flows of energy, changes in short- and long-term weather patterns and anticipated regulatory and legislative outcomes. NEER uses derivative instruments to realize value from these market dislocations, subject to strict risk management limits around market, operational and credit exposure.

Derivative instruments, when required to be marked to market, are recorded on NEE's and FPL's condensed consolidated balance sheets as either an asset or liability measured at fair value. At FPL, substantially all changes in the derivatives' fair value are deferred as a regulatory asset or liability until the contracts are settled, and, upon settlement, any gains or losses are passed through the

fuel clause. For NEE's non-rate regulated operations, predominantly NEER, essentially all changes in the derivatives' fair value for power purchases and sales, fuel sales and trading activities are recognized on a net basis in operating revenues; fuel purchases used in the production of electricity are recognized in fuel, purchased power and interchange expense; and the equity method investees' related activity is recognized in equity in earnings of equity method investees in NEE's condensed consolidated statements of income. Settlement gains and losses are included within the line items in the condensed consolidated statements of income to which they relate. Transactions for which physical delivery is deemed not to have occurred are presented on a net basis in the condensed consolidated statements of income. For commodity derivatives, NEE believes that, where offsetting positions exist at the same location for the same time, the transactions are considered to have been netted and therefore physical delivery has been deemed not to have occurred for financial reporting purposes. Settlements related to derivative instruments are primarily recognized in net cash provided by operating activities in NEE's and FPL's condensed consolidated statements of cash flows.

While most of NEE's derivatives are entered into for the purpose of managing commodity price risk, optimizing the value of NEER's power generation and gas infrastructure assets, reducing the impact of volatility in interest rates on outstanding and forecasted debt issuances and managing foreign currency risk, hedge accounting is only applied where specific criteria are met and it is practicable to do so. In order to apply hedge accounting, the transaction must be designated as a hedge and it must be highly effective in offsetting the hedged risk. Additionally, for hedges of forecasted transactions, the forecasted transactions must be probable. For interest rate and foreign currency derivative instruments, generally NEE assesses a hedging instrument's effectiveness by using nonstatistical methods including dollar value comparisons of the change in the fair value of the derivative to the change in the fair value or cash flows of the hedged item. Hedge effectiveness is tested at the inception of the hedge and on at least a quarterly basis throughout its life. The effective portion of the gain or loss on a derivative instrument designated as a cash flow hedge is reported as a component of OCI and is reclassified into earnings in the period(s) during which the transaction being hedged affects earnings or when it becomes probable that a forecasted transaction being hedged would not occur. The ineffective portion of net unrealized gains (losses) on these hedges is reported in earnings in the current period. At September 30, 2015, NEE's AOCI included amounts related to interest rate cash flow hedges with expiration dates through October 2036 and foreign currency cash flow hedges with expiration dates through September 2030. Approximately $58 million of net losses included in AOCI at September 30, 2015 is expected to be reclassified into earnings within the next 12 months as the principal and/or interest payments are made. Such amounts assume no change in interest rates, currency exchange rates or scheduled principal payments.

Fair Value of Derivative Instruments - The tables below present NEE's and FPL's gross derivative positions at September 30, 2015 and December 31, 2014, as required by disclosure rules. However, the majority of the underlying contracts are subject to master netting agreements and generally would not be contractually settled on a gross basis. Therefore, the tables below also present the derivative positions on a net basis, which reflect the offsetting of positions of certain transactions within the portfolio, the contractual ability to settle contracts under master netting arrangements and the netting of margin cash collateral (see Note 3 - Recurring Fair Value Measurements for netting information), as well as the location of the net derivative position on the condensed consolidated balance sheets.

(a) Reflects the netting of approximately $197 million in margin cash collateral received from counterparties.
(b) Reflects the netting of approximately $97 million in margin cash collateral received from counterparties.
(c) Reflects the netting of approximately $20 million in margin cash collateral paid to counterparties.
(d) Reflects the netting of approximately $10 million in margin cash collateral paid to counterparties.

At September 30, 2015 and December 31, 2014, NEE had approximately $36 million and $60 million (none at FPL), respectively, in margin cash collateral received from counterparties that was not offset against derivative assets in the above presentation. These amounts are included in current other liabilities on NEE's condensed consolidated balance sheets. Additionally, at September 30, 2015 and December 31, 2014, NEE had approximately $238 million and $122 million (none at FPL), respectively, in margin cash collateral paid to counterparties that was not offset against derivative assets or liabilities in the above presentation. These amounts are included in current other assets on NEE's condensed consolidated balance sheets.

Income Statement Impact of Derivative Instruments - Gains (losses) related to NEE's cash flow hedges are recorded in NEE's condensed consolidated financial statements (none at FPL) as follows:

	Three Months Ended September 30,					
	2015			2014		
	Interest Rate Contracts	**Foreign Currency Swaps**	**Total**	Interest Rate Contracts	Foreign Currency Swaps	Total
			(millions)			
Losses recognized in OCI	**$ (151)**	**$ (1)**	**$ (152)**	$ (6)	$ (45)	$ (51)
Gains (losses) reclassified from AOCI to net income	**$ (18)** [a]	**$ 7** [b]	**$ (11)**	$ (20) [a]	$ (51) [b]	$ (71)

(a) Included in interest expense.
(b) For 2015 and 2014, losses of approximately $3 million are included in interest expense and the balances are included in other - net.

	Nine Months Ended September 30,					
	2015			2014		
	Interest Rate Contracts	Foreign Currency Swaps	Total	Interest Rate Contracts	Foreign Currency Swaps	Total
	(millions)					
Losses recognized in OCI	$ (146)	$ (16)	$ (162)	$ (70)	$ (30)	$ (100)
Losses reclassified from AOCI to net income	$ (56) [a]	$ (10) [b]	$ (66)	$ (62) [a]	$ (26) [b]	$ (88)

(a) Included in interest expense.
(b) For 2015 and 2014, losses of approximately $9 million and $5 million, respectively, are included in interest expense and the balances are included in other - net.

For the three months ended September 30, 2015 and 2014, NEE recorded a gain of approximately $26 million and a loss of $22 million, respectively, on fair value hedges which resulted in a corresponding increase and decrease, respectively, in the related debt. For the nine months ended September 30, 2015 and 2014, NEE recorded a gain of approximately $23 million and a loss of $3 million, respectively, on fair value hedges which resulted in a corresponding increase and decrease, respectively, in the related debt.

Gains (losses) related to NEE's derivatives not designated as hedging instruments are recorded in NEE's condensed consolidated statements of income as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
	(millions)			
Commodity contracts:[a]				
Operating revenues	$ 397	$ 46	$ 812	$ (379)
Fuel, purchased power and interchange	3	—	5	(4)
Foreign currency swap - other - net	—	—	—	(1)
Interest rate contracts - interest expense	(12)	(16)	(1)	(51)
Total	$ 388	$ 30	$ 816	$ (435)

(a) For the three and nine months ended September 30, 2015, FPL recorded losses of approximately $141 million and $204 million, respectively, related to commodity contracts as regulatory assets on its condensed consolidated balance sheets. For the three and nine months ended September 30, 2014, FPL recorded approximately $113 million of losses and $34 million of gains, respectively, related to commodity contracts as regulatory assets and regulatory liabilities, respectively, on its condensed consolidated balance sheets.

Notional Volumes of Derivative Instruments - The following table represents net notional volumes associated with derivative instruments that are required to be reported at fair value in NEE's and FPL's condensed consolidated financial statements. The table includes significant volumes of transactions that have minimal exposure to commodity price changes because they are variably priced agreements. These volumes are only an indication of the commodity exposure that is managed through the use of derivatives. They do not represent net physical asset positions or non-derivative positions and their hedges, nor do they represent NEE's and FPL's net economic exposure, but only the net notional derivative positions that fully or partially hedge the related asset positions. NEE and FPL had derivative commodity contracts for the following net notional volumes:

	September 30, 2015				December 31, 2014			
Commodity Type	NEE		FPL		NEE		FPL	
	(millions)							
Power	(136)	MWh	—		(73)	MWh	—	
Natural gas	1,363	MMBtu	887	MMBtu	1,436	MMBtu	845	MMBtu
Oil	(9)	barrels	—		(11)	barrels	—	

At September 30, 2015 and December 31, 2014, NEE had interest rate contracts with notional amounts totaling approximately $8.1 billion and $7.4 billion, respectively, and foreign currency swaps with notional amounts totaling approximately $702 million and $661 million, respectively.

Credit-Risk-Related Contingent Features - Certain derivative instruments contain credit-risk-related contingent features including, among other things, the requirement to maintain an investment grade credit rating from specified credit rating agencies and certain

financial ratios, as well as credit-related cross-default and material adverse change triggers. At September 30, 2015 and December 31, 2014, the aggregate fair value of NEE's derivative instruments with credit-risk-related contingent features that were in a liability position was approximately $2.1 billion ($173 million for FPL) and $2.7 billion ($369 million for FPL), respectively.

If the credit-risk-related contingent features underlying these agreements and other commodity-related contracts were triggered, certain subsidiaries of NEE, including FPL, could be required to post collateral or settle contracts according to contractual terms which generally allow netting of contracts in offsetting positions. Certain contracts contain multiple types of credit-related triggers. To the extent these contracts contain a credit ratings downgrade trigger, the maximum exposure is included in the following credit ratings collateral posting requirements. If FPL's and NEECH's credit ratings were downgraded to BBB/Baa2 (a two level downgrade for FPL and a one level downgrade for NEECH from the current lowest applicable rating), applicable NEE subsidiaries would be required to post collateral such that the total posted collateral would be approximately $250 million ($30 million at FPL) as of September 30, 2015 and $700 million ($130 million at FPL) as of December 31, 2014. If FPL's and NEECH's credit ratings were downgraded to below investment grade, applicable NEE subsidiaries would be required to post additional collateral such that the total posted collateral would be approximately $2.3 billion ($0.6 billion at FPL) and $2.8 billion ($0.7 billion at FPL) as of September 30, 2015 and December 31, 2014, respectively. Some contracts do not contain credit ratings downgrade triggers, but do contain provisions that require certain financial measures be maintained and/or have credit-related cross-default triggers. In the event these provisions were triggered, applicable NEE subsidiaries could be required to post additional collateral of up to approximately $720 million ($160 million at FPL) and $850 million ($200 million at FPL) as of September 30, 2015 and December 31, 2014, respectively.

Collateral related to derivatives may be posted in the form of cash or credit support in the normal course of business. At September 30, 2015, applicable NEE subsidiaries have posted approximately $157 million (none at FPL) in cash which could be applied toward the collateral requirements described above. In addition, at September 30, 2015 and December 31, 2014, applicable NEE subsidiaries have posted approximately $18 million (none at FPL) and $236 million (none at FPL), respectively, in the form of letters of credit which could be applied toward the collateral requirements described above. FPL and NEECH have credit facilities generally in excess of the collateral requirements described above that would be available to support, among other things, derivative activities. Under the terms of the credit facilities, maintenance of a specific credit rating is not a condition to drawing on these credit facilities, although there are other conditions to drawing on these credit facilities.

Additionally, some contracts contain certain adequate assurance provisions where a counterparty may demand additional collateral based on subjective events and/or conditions. Due to the subjective nature of these provisions, NEE and FPL are unable to determine an exact value for these items and they are not included in any of the quantitative disclosures above.

3. Fair Value Measurements

The fair value of assets and liabilities are determined using either unadjusted quoted prices in active markets (Level 1) or pricing inputs that are observable (Level 2) whenever that information is available and using unobservable inputs (Level 3) to estimate fair value only when relevant observable inputs are not available. NEE and FPL use several different valuation techniques to measure the fair value of assets and liabilities, relying primarily on the market approach of using prices and other market information for identical and/or comparable assets and liabilities for those assets and liabilities that are measured at fair value on a recurring basis. NEE's and FPL's assessment of the significance of any particular input to the fair value measurement requires judgment and may affect their placement within the fair value hierarchy levels. Non-performance risk, including the consideration of a credit valuation adjustment, is also considered in the determination of fair value for all assets and liabilities measured at fair value.

Cash Equivalents - Cash equivalents, which are included in cash and cash equivalents and, for restricted cash, other current assets and other noncurrent assets on the condensed consolidated balance sheets, consist of short-term, highly liquid investments with original maturities of three months or less. NEE primarily holds investments in money market funds. The fair value of these funds is calculated using current market prices.

Special Use Funds and Other Investments - NEE and FPL hold primarily debt and equity securities directly, as well as indirectly through commingled funds. Substantially all directly held equity securities are valued at their quoted market prices. For directly held debt securities, multiple prices and price types are obtained from pricing vendors whenever possible, which enables cross-provider validations. A primary price source is identified based on asset type, class or issue of each security. Commingled funds, which are similar to mutual funds, are maintained by banks or investment companies and hold certain investments in accordance with a stated set of objectives. The fair value of commingled funds is primarily derived from the quoted prices in active markets of the underlying securities. Because the fund shares are offered to a limited group of investors, they are not considered to be traded in an active market.

Derivative Instruments - NEE and FPL measure the fair value of commodity contracts using prices observed on commodities exchanges and in the OTC markets, or through the use of industry-standard valuation techniques, such as option modeling or discounted cash flows techniques, incorporating both observable and unobservable valuation inputs. The resulting measurements

are the best estimate of fair value as represented by the transfer of the asset or liability through an orderly transaction in the marketplace at the measurement date.

Most exchange-traded derivative assets and liabilities are valued directly using unadjusted quoted prices. For exchange-traded derivative assets and liabilities where the principal market is deemed to be inactive based on average daily volumes and open interest, the measurement is established using settlement prices from the exchanges, and therefore considered to be valued using other observable inputs.

NEE, through its subsidiaries, including FPL, also enters into OTC commodity contract derivatives. The majority of these contracts are transacted at liquid trading points, and the prices for these contracts are verified using quoted prices in active markets from exchanges, brokers or pricing services for similar contracts.

NEE, through NEER, also enters into full requirements contracts, which, in most cases, meet the definition of derivatives and are measured at fair value. These contracts typically have one or more inputs that are not observable and are significant to the valuation of the contract. In addition, certain exchange and non-exchange traded derivative options at NEE have one or more significant inputs that are not observable, and are valued using industry-standard option models.

In all cases where NEE and FPL use significant unobservable inputs for the valuation of a commodity contract, consideration is given to the assumptions that market participants would use in valuing the asset or liability. The primary input to the valuation models for commodity contracts is the forward commodity curve for the respective instruments. Other inputs include, but are not limited to, assumptions about market liquidity, volatility, correlation and contract duration as more fully described below in Significant Unobservable Inputs Used in Recurring Fair Value Measurements. In instances where the reference markets are deemed to be inactive or do not have transactions for a similar contract, the derivative assets and liabilities may be valued using significant other observable inputs and potentially significant unobservable inputs. In such instances, the valuation for these contracts is established using techniques including extrapolation from or interpolation between actively traded contracts, or estimated basis adjustments from liquid trading points. NEE and FPL regularly evaluate and validate the inputs used to determine fair value by a number of methods, consisting of various market price verification procedures, including the use of pricing services and multiple broker quotes to support the market price of the various commodities. In all cases where there are assumptions and models used to generate inputs for valuing derivative assets and liabilities, the review and verification of the assumptions, models and changes to the models are undertaken by individuals that are independent of those responsible for estimating fair value.

NEE uses interest rate contracts and foreign currency swaps to mitigate and adjust interest rate and foreign currency exposure related primarily to certain outstanding and forecasted debt issuances and borrowings when deemed appropriate based on market conditions or when required by financing agreements. NEE estimates the fair value of these derivatives using a discounted cash flows valuation technique based on the net amount of estimated future cash inflows and outflows related to the agreements.

Recurring Fair Value Measurements - NEE's and FPL's financial assets and liabilities and other fair value measurements made on a recurring basis by fair value hierarchy level are as follows:

	September 30, 2015				
	Level 1	Level 2	Level 3	Netting[a]	Total
			(millions)		
Assets:

(d) See Note 2 - Fair Value of Derivative Instruments for a reconciliation of net derivatives to NEE's and FPL's condensed consolidated balance sheets.

Significant Unobservable Inputs Used in Recurring Fair Value Measurements - The valuation of certain commodity contracts requires the use of significant unobservable inputs. All forward price, implied volatility, implied correlation and interest rate inputs used in the valuation of such contracts are directly based on third-party market data, such as broker quotes and exchange settlements, when that data is available. If third-party market data is not available, then industry standard methodologies are used to develop inputs that maximize the use of relevant observable inputs and minimize the use of unobservable inputs. Observable inputs, including some forward prices, implied volatilities and interest rates used for determining fair value are updated daily to reflect the best available market information. Unobservable inputs which are related to observable inputs, such as illiquid portions of forward price or volatility curves, are updated daily as well, using industry standard techniques such as interpolation and extrapolation, combining observable forward inputs supplemented by historical market and other relevant data. Other unobservable inputs, such as implied correlations, customer migration rates from full requirements contracts and some implied volatility curves, are modeled using proprietary models based on historical data and industry standard techniques.

All price, volatility, correlation and customer migration inputs used in valuation are subject to validation by the Trading Risk Management group. The Trading Risk Management group performs a risk management function responsible for assessing credit, market and operational risk impact, reviewing valuation methodology and modeling, confirming transactions, monitoring approval processes and developing and monitoring trading limits. The Trading Risk Management group is separate from the transacting group. For markets where independent third-party data is readily available, validation is conducted daily by directly reviewing this market data against inputs utilized by the transacting group, and indirectly by critically reviewing daily risk reports. For markets where independent third-party data is not readily available, additional analytical reviews are performed on at least a quarterly basis. These analytical reviews are designed to ensure that all price and volatility curves used for fair valuing transactions are adequately validated each quarter, and are reviewed and approved by the Trading Risk Management group. In addition, other valuation assumptions such as implied correlations and customer migration rates are reviewed and approved by the Trading Risk Management group on a periodic basis. Newly created models used in the valuation process are also subject to testing and approval by the Trading Risk Management group prior to use and established models are reviewed annually, or more often as needed, by the Trading Risk Management group.

On a monthly basis, the Exposure Management Committee (EMC), which is comprised of certain members of senior management, meets with representatives from the Trading Risk Management group and the transacting group to discuss NEE's and FPL's energy risk profile and operations, to review risk reports and to discuss fair value issues as necessary. The EMC develops guidelines required for an appropriate risk management control infrastructure, which includes implementation and monitoring of compliance with Trading Risk Management policy. The EMC executes its risk management responsibilities through direct oversight and delegation of its responsibilities to the Trading Risk Management group, as well as to other corporate and business unit personnel.

The significant unobservable inputs used in the valuation of NEE's commodity contracts categorized as Level 3 of the fair value hierarchy at September 30, 2015 are as follows:

Transaction Type	Fair Value at September 30, 2015		Valuation Technique(s)	Significant Unobservable Inputs	Range
	Assets	Liabilities			
	(millions)				
Forward contracts - power	$ 640	$ 218	Discounted cash flow	Forward price (per MWh)	$7 — $125
Forward contracts - gas	16	23	Discounted cash flow	Forward price (per MMBtu)	$1 — $6
Forward contracts - other commodity related	12	1	Discounted cash flow	Forward price (various)	$(29) — $59
Options - power	84	71	Option models	Implied correlations	(4)% — 99%
				Implied volatilities	1% — 133%
Options - primarily gas	95	166	Option models	Implied correlations	(4)% — 99%
				Implied volatilities	1% — 117%
Full requirements and unit contingent contracts	323	30	Discounted cash flow	Forward price (per MWh)	$(20) — $156
				Customer migration rate[a]	—% — 20%
Total	$ 1,170	$ 509			

(a) Applies only to full requirements contracts.

The sensitivity of NEE's fair value measurements to increases (decreases) in the significant unobservable inputs is as follows:

Significant Unobservable Input	Position	Impact on Fair Value Measurement
Forward price	Purchase power/gas	Increase (decrease)
	Sell power/gas	Decrease (increase)
Implied correlations	Purchase option	Decrease (increase)
	Sell option	Increase (decrease)
Implied volatilities	Purchase option	Increase (decrease)
	Sell option	Decrease (increase)
Customer migration rate	Sell power[a]	Decrease (increase)

(a) Assumes the contract is in a gain position.

In addition, the fair value measurement of interest rate swap liabilities related to the solar projects in Spain of approximately $115 million at September 30, 2015 includes a significant credit valuation adjustment. The credit valuation adjustment, considered an unobservable input, reflects management's assessment of non-performance risk of the subsidiaries related to the solar projects in Spain that are party to the swap agreements.

The reconciliation of changes in fair value that are based on significant unobservable inputs is as follows:

	Three Months Ended September 30,			
	2015		2014	
	NEE	FPL	NEE	FPL
	(millions)			
Fair value based on significant unobservable inputs at June 30	$ 544	$ 4	$ 354	$ 3
Realized and unrealized gains (losses):				
Included in earnings[a]	115	—	22	—
Included in other comprehensive income	—	—	11	—
Included in regulatory assets and liabilities	(1)	(1)	1	1
Purchases	42	—	209	197 [b]
Settlements	(109)	(1)	(36)	—
Issuances	(32)	—	(9)	—
Transfers in[c]	3	—	—	—
Transfers out[c]	(16)	—	(136)	—
Fair value based on significant unobservable inputs at September 30	$ 546	$ 2	$ 416	$ 201
The amount of gains (losses) for the period included in earnings attributable to the change in unrealized gains (losses) relating to derivatives still held at the reporting date[d]	$ 107	$ —	$ (63)	$ —

(a) For the three months ended September 30, 2015 and 2014, realized and unrealized gains of approximately $131 million and $42 million, respectively, are reflected in the condensed consolidated statements of income in operating revenues and the balance is primarily reflected in interest expense.
(b) Represents investments associated with a limited partnership that was consolidated during the three months ended September 30, 2014.
(c) Transfers into Level 3 were a result of decreased observability of market data and transfers from Level 3 to Level 2 were a result of increased observability of market data. NEE's and FPL's policy is to recognize all transfers at the beginning of the reporting period.
(d) For the three months ended September 30, 2015 and 2014, unrealized gains (losses) of approximately $123 million and $(43) million, respectively, are reflected in the condensed consolidated statements of income in operating revenues and the balance is primarily reflected in interest expense.

	Nine Months Ended September 30,			
	2015		2014	
	NEE	FPL	NEE	FPL
	(millions)			
Fair value based on significant unobservable inputs at December 31	$ 622	$ 5	$ 622	$ —
Realized and unrealized gains (losses):				
Included in earnings[a]	369	—	(474)	—

Purchases	125	—	223	197
Settlements	(376)	(6)	268	(2)
Issuances	(164)	—	(103)	—
Transfers in[b]	(15)	—	16	—
Transfers out[b]	(26)	—	(153)	—
Fair value based on significant unobservable inputs at September 30	$ 546	$ 2	$ 416	$ 201
The amount of gains (losses) for the period included in earnings attributable to the change in unrealized gains (losses) relating to derivatives still held at the reporting date[c]	$ 260	$ —	$ (168)	$ —

(a) For the nine months ended September 30, 2015, realized and unrealized gains (losses) of approximately $379 million are reflected in the condensed consolidated statements of income in operating revenues, $(11) million in interest expense and the balance is reflected in fuel, purchased power and interchange. For the nine months ended September 30, 2014, realized and unrealized losses of approximately $410 million are reflected in the condensed consolidated statements of income in operating revenues, $61 million in interest expense and the balance is reflected in fuel, purchased power and interchange.
(b) Transfers into Level 3 were a result of decreased observability of market data and transfers from Level 3 to Level 2 were a result of increased observability of market data. NEE's and FPL's policy is to recognize all transfers at the beginning of the reporting period.
(c) For the nine months ended September 30, 2015 and 2014, unrealized gains (losses) of approximately $271 million and $(107) million, respectively, are reflected in the condensed consolidated statements of income in operating revenues and the balance is primarily reflected in interest expense.

Nonrecurring Fair Value Measurements - In March 2013, NEER initiated a plan and received internal authorization to pursue the sale of its ownership interests in oil-fired generating plants located in Maine (Maine fossil), which resulted in the recording of a loss during that period which was reflected within discontinued operations at NEE. In March 2014, NEER decided not to pursue the sale

of Maine fossil due to the divergence between the achievable sales price and management's view of the assets' value, which increased as a result of significant market changes. Accordingly, the Maine fossil assets were written-up to management's current estimate of fair value resulting in a gain of approximately $21 million ($12 million after-tax) which is included as a separate line item in NEE's condensed consolidated statements of income. The fair value measurement (Level 3) was estimated using an income approach based primarily on the updated capacity revenue forecasts.

Fair Value of Financial Instruments Recorded at the Carrying Amount - The carrying amounts of cash equivalents, commercial paper and notes payable approximate their fair values. The carrying amounts and estimated fair values of other financial instruments, excluding those recorded at fair value and disclosed above in Recurring Fair Value Measurements, are as follows:

	September 30, 2015		December 31, 2014	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
	(millions)			
NEE:				
Special use funds[a]	$ 659	$ 659	$ 567	$ 567
Other investments - primarily notes receivable	$ 524	$ 662 [b]	$ 525	$ 679 [b]
Long-term debt, including current maturities	$ 28,096	$ 29,545 [c]	$ 27,876	$ 30,337 [c]
FPL:				
Special use funds[a]	$ 514	$ 514	$ 395	$ 395
Long-term debt, including current maturities	$ 9,099	$ 10,248 [c]	$ 9,473	$ 11,105 [c]

(a) Primarily represents investments accounted for under the equity method and loans not measured at fair value on a recurring basis.
(b) Primarily classified as held to maturity. Fair values are primarily estimated using a discounted cash flow valuation technique based on certain observable yield curves and indices considering the credit profile of the borrower (Level 3). Notes receivable bear interest primarily at fixed rates and mature by 2029. Notes receivable are considered impaired and placed in non-accrual status when it becomes probable that all amounts due cannot be collected in accordance with the contractual terms of the agreement. The assessment to place notes receivable in non-accrual status considers various credit indicators, such as credit ratings and market-related information. As of September 30, 2015 and December 31, 2014, NEE had no notes receivable reported in non-accrual status.
(c) As of September 30, 2015 and December 31, 2014, for NEE, $18,064 million and $19,973 million, respectively, is estimated using quoted market prices for the same or similar issues (Level 2); the balance is estimated using a discounted cash flow valuation technique, considering the current credit spread of the debtor (Level 3). For FPL, estimated using quoted market prices for the same or similar issues (Level 2).

Special Use Funds - The special use funds noted above and those carried at fair value (see Recurring Fair Value Measurements above) consist of FPL's storm fund assets of approximately $75 million at both September 30, 2015 and December 31, 2014 and NEE's nuclear decommissioning fund assets of $4,949 million and $5,091 million at September 30, 2015 and December 31, 2014, respectively ($3,360 million and $3,449 million, respectively, for FPL). The investments held in the special use funds consist of equity and debt securities which are primarily classified as available for sale and carried at estimated fair value. The amortized cost of debt and equity securities is approximately $1,848 million and $1,440 million, respectively, at September 30, 2015 and $1,906 million and $1,366 million, respectively, at December 31, 2014 ($1,426 million and $704 million, respectively, at September 30, 2015 and $1,519 million and $664 million, respectively, at December 31, 2014 for FPL). For FPL's special use funds, consistent with regulatory treatment, changes in fair value, including any other than temporary impairment losses, result in a corresponding adjustment to the related regulatory liability accounts. For NEE's non-rate regulated operations, changes in fair value result in a corresponding adjustment to OCI, except for unrealized losses associated with marketable securities considered to be other than temporary, including any credit losses, which are recognized as other than temporary impairment losses on securities held in nuclear decommissioning funds and included in other - net in NEE's condensed consolidated statements of income. Debt securities included in the nuclear decommissioning funds have a weighted-average maturity at September 30, 2015 of approximately eight years at both NEE and FPL. FPL's storm fund primarily consists of debt securities with a weighted-average maturity at September 30, 2015 of approximately three years. The cost of securities sold is determined using the specific identification method.

Realized gains and losses and proceeds from the sale or maturity of available for sale securities are as follows:

	NEE		FPL		NEE		FPL	
	Three Months Ended September 30,		Three Months Ended September 30,		Nine Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014	2015	2014	2015	2014
	(millions)							
Realized gains	$ 35	$ 34	$ 11	$ 19	$ 126	$ 182	$ 56	$ 107
Realized losses	$ 21	$ 19	$ 11	$ 16	$ 53	$ 99	$ 26	$ 85
Proceeds from sale or maturity of securities	$ 712	$ 879	$ 556	$ 731	$ 3,642	$ 3,093	$ 3,094	$ 2,530

The unrealized gains on available for sale securities are as follows:

	NEE		FPL	
	September 30, 2015	December 31, 2014	**September 30, 2015**	December 31, 2014
	(millions)			
Equity securities	**$ 1,073**	$ 1,267	**$ 786**	$ 896
Debt securities	**$ 26**	$ 66	**$ 21**	$ 54

The unrealized losses on available for sale debt securities and the fair value of available for sale debt securities in an unrealized loss position are as follows:

	NEE		FPL	
	September 30, 2015	December 31, 2014	**September 30, 2015**	December 31, 2014
	(millions)			
Unrealized losses[a]	**$ 40**	$ 7	**$ 34**	$ 5
Fair value	**$ 661**	$ 542	**$ 516**	$ 434

(a) Unrealized losses on available for sale debt securities in an unrealized loss position for greater than twelve months at September 30, 2015 and December 31, 2014 were not material to NEE or FPL.

Regulations issued by the FERC and the NRC provide general risk management guidelines to protect nuclear decommissioning funds and to allow such funds to earn a reasonable return. The FERC regulations prohibit, among other investments, investments in any securities of NEE or its subsidiaries, affiliates or associates, excluding investments tied to market indices or mutual funds. Similar restrictions applicable to the decommissioning funds for NEER's nuclear plants are included in the NRC operating licenses for those facilities or in NRC regulations applicable to NRC licensees not in cost-of-service environments. With respect to the decommissioning fund for Seabrook, decommissioning fund contributions and withdrawals are also regulated by the Nuclear Decommissioning Financing Committee pursuant to New Hampshire law.

The nuclear decommissioning reserve funds are managed by investment managers who must comply with the guidelines of NEE and FPL and the rules of the applicable regulatory authorities. The funds' assets are invested giving consideration to taxes, liquidity, risk, diversification and other prudent investment objectives.

4. Income Taxes

NEE's effective income tax rates for the three months ended September 30, 2015 and 2014 were approximately 32% and 30%, respectively. The rates for both periods reflect the benefit of PTCs of approximately $29 million and $34 million, respectively, related to NEER's wind projects, as well as ITCs and deferred income tax benefits associated with grants under the Recovery Act (convertible ITCs) totaling approximately $16 million and $37 million, respectively, related to solar and certain wind projects at NEER.

NEE's effective income tax rates for the nine months ended September 30, 2015 and 2014 were approximately 30% and 31%, respectively. The rates for both periods reflect the benefit of PTCs of approximately $105 million and $132 million, respectively, related to NEER's wind projects, as well as ITCs and deferred income tax benefits associated with convertible ITCs totaling approximately $67 million and $69 million, respectively, related to solar and certain wind projects at NEER, including, in 2015, the effect of a state income tax law change that extends the ITC carryforward period for certain wind projects. In addition, the rate for the nine months ended September 30, 2014 reflects a noncash income tax charge of approximately $45 million associated with structuring Canadian assets in connection with the creation of NEP.

NEE recognizes PTCs as wind energy is generated and sold based on a per kWh rate prescribed in applicable federal and state statutes, which may differ significantly from amounts computed, on a quarterly basis, using an overall effective income tax rate anticipated for the full year. NEE uses this method of recognizing PTCs for specific reasons, including that PTCs are an integral part of the financial viability of most wind projects and a fundamental component of such wind projects' results of operations. PTCs, as well as deferred income tax benefits associated with convertible ITCs, can significantly affect NEE's effective income tax rate depending on the amount of pretax income. The amount of PTCs recognized can be significantly affected by wind generation and by the roll off of PTCs after ten years of production (PTC roll off).

5. Variable Interest Entities (VIEs)

As of September 30, 2015, NEE has twenty VIEs which it consolidates and has interests in certain other VIEs which it does not consolidate.

FPL - FPL is considered the primary beneficiary of, and therefore consolidates, a VIE that is a wholly-owned bankruptcy remote special purpose subsidiary that it formed in 2007 for the sole purpose of issuing storm-recovery bonds pursuant to the securitization provisions of the Florida Statutes and a financing order of the FPSC. FPL is considered the primary beneficiary because FPL has the power to direct the significant activities of the VIE, and its equity investment, which is subordinate to the bondholder's interest in the VIE, is at risk. Storm restoration costs incurred by FPL during 2005 and 2004 exceeded the amount in FPL's funded storm and property insurance reserve, resulting in a storm reserve deficiency. In 2007, the VIE issued $652 million aggregate principal amount of senior secured bonds (storm-recovery bonds), primarily for the after-tax equivalent of the total of FPL's unrecovered balance of the 2004 storm restoration costs, the 2005 storm restoration costs and to reestablish FPL's storm and property insurance reserve. In connection with this financing, net proceeds, after debt issuance costs, to the VIE (approximately $644 million) were used to acquire the storm-recovery property, which includes the right to impose, collect and receive a storm-recovery charge from all customers receiving electric transmission or distribution service from FPL under rate schedules approved by the FPSC or under special contracts, certain other rights and interests that arise under the financing order issued by the FPSC and certain other collateral pledged by the VIE that issued the bonds. The storm-recovery bonds are payable only from and are secured by the storm-recovery property. The bondholders have no recourse to the general credit of FPL. The assets of the VIE were approximately $224 million and $279 million at September 30, 2015 and December 31, 2014, respectively, and consisted primarily of storm-recovery property, which are included in securitized storm-recovery costs on NEE's and FPL's condensed consolidated balance sheets. The liabilities of the VIE were approximately $275 million and $338 million at September 30, 2015 and December 31, 2014, respectively, and consisted primarily of storm-recovery bonds, which are included in long-term debt on NEE's and FPL's condensed consolidated balance sheets.

FPL entered into a purchased power agreement effective in 1995 with a 330 MW coal-fired facility to purchase substantially all of the facility's capacity and electrical output over a substantial portion of its estimated useful life. The facility is considered a VIE because FPL absorbs a portion of the facility's variability related to changes in the market price of coal through the price it pays per MWh (energy payment). Since FPL does not control the most significant activities of the facility, including operations and maintenance, FPL is not the primary beneficiary and does not consolidate this VIE. The energy payments paid by FPL will fluctuate as coal prices change. This fluctuation does not expose FPL to losses since the energy payments paid by FPL to the facility are recovered through the fuel clause as approved by the FPSC.

NEER - NEE consolidates nineteen NEER VIEs. NEER is considered the primary beneficiary of these VIEs since NEER controls the most significant activities of these VIEs, including operations and maintenance, as well as construction, and through its equity ownership has the obligation to absorb expected losses of these VIEs.

A NEER VIE consolidates two entities which own and operate natural gas/oil electric generating facilities with the capability of producing 110 MW. This VIE sells its electric output under power sales contracts to a third party, with expiration dates in 2018 and 2020. The power sales contracts provide the offtaker the ability to dispatch the facilities and require the offtaker to absorb the cost of fuel. This VIE uses third-party debt and equity to finance its operations. The debt is secured by liens against the generating facilities and the other assets of these entities. The debt holders have no recourse to the general credit of NEER for the repayment of debt. The assets and liabilities of the VIE were approximately $91 million and $52 million, respectively, at September 30, 2015 and $85 million and $55 million, respectively, at December 31, 2014, and consisted primarily of property, plant and equipment and long-term debt.

Two indirect subsidiaries of NEER each contributed, to a NEP subsidiary, an approximately 50% ownership interest in three entities which own solar PV facilities that, upon completion of construction, are expected to have a total generating capacity of 277 MW, of which approximately 95 MW have been placed in service as of September 30, 2015. Each of the two indirect subsidiaries of NEER is considered a VIE since it has insufficient equity at risk, and is consolidated by NEER. The VIEs use third-party debt and equity to finance a portion of development and construction activities and require subordinated financing from NEER to complete the facility under construction. These VIEs will sell their electric output under power sales contracts to third parties with expiration dates in 2035 and 2036. The debt balances are secured by liens against the assets of the entities. The debt holders have no recourse to the general credit of NEER. The assets and liabilities of these VIEs were approximately $507 million and $477 million, respectively, at September 30, 2015, and consisted primarily of property, plant and equipment and long-term debt.

The other sixteen NEER VIEs consolidate several entities which own and operate wind electric generating facilities with the capability of producing a total of 4,490 MW. These VIEs sell their electric output either under power sales contracts to third parties with expiration dates ranging from 2018 through 2039 or in the spot market. The VIEs use third-party debt and/or equity to finance their operations. Certain investors that hold no equity interest in the VIEs hold differential membership interests, which give them the right to receive a portion of the economic attributes of the generating facilities, including certain tax attributes. The debt is secured

by liens against the generating facilities and the other assets of these entities or by pledges of NEER's ownership interest in these entities. The debt holders have no recourse to the general credit of NEER for the repayment of debt. The assets and liabilities of these VIEs totaled approximately $6.4 billion and $3.7 billion, respectively, at September 30, 2015 and $6.6 billion and $4.1 billion, respectively, at December 31, 2014. At September 30, 2015 and December 31, 2014, the assets and liabilities of the VIEs consisted primarily of property, plant and equipment, deferral related to differential membership interests and long-term debt.

Other - As of September 30, 2015 and December 31, 2014, several NEE subsidiaries have investments totaling approximately $612 million ($502 million at FPL) and $716 million ($606 million at FPL), respectively, in certain special purpose entities, which consisted primarily of investments in mortgage-backed securities. These investments are included in special use funds and other investments on NEE's condensed consolidated balance sheets and in special use funds on FPL's condensed consolidated balance sheets. As of September 30, 2015, NEE subsidiaries, including FPL, are not the primary beneficiary and therefore do not consolidate any of these entities because they do not control any of the ongoing activities of these entities, were not involved in the initial design of these entities and do not have a controlling financial interest in these entities.

Amendments to the Consolidation Analysis - In February 2015, the FASB issued a new accounting standard that will modify current consolidation guidance. The standard makes changes to both the variable interest entity model and the voting interest entity model, including modifying the evaluation of whether limited partnerships or similar legal entities are VIEs or voting interest entities and amending the guidance for assessing how relationships of related parties affect the consolidation analysis of VIEs. The standard is effective for NEE and FPL beginning January 1, 2016. NEE and FPL are currently evaluating the effect the adoption of this standard will have, if any, on their consolidated financial statements.

6. Common Shareholders' Equity

Earnings Per Share - The reconciliation of NEE's basic and diluted earnings per share attributable to NEE is as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	**2015**	2014
	(millions, except per share amounts)			
Numerator - net income attributable to NEE	**$ 879**	$ 660	**$ 2,245**	$ 1,581
Denominator:				
Weighted-average number of common shares outstanding - basic	**454.1**	434.5	**447.3**	434.0
Equity units, performance share awards, options, forward sale agreement and restricted stock[a]	**1.9**	6.0	**4.0**	5.6
Weighted-average number of common shares outstanding - assuming dilution	**456.0**	440.5	**451.3**	439.6
Earnings per share attributable to NEE:				
Basic	**$ 1.94**	$ 1.52	**$ 5.02**	$ 3.64
Assuming dilution	**$ 1.93**	$ 1.50	**$ 4.97**	$ 3.60

(a) Calculated using the treasury stock method. Performance share awards are included in diluted weighted-average number of common shares outstanding based upon what would be issued if the end of the reporting period was the end of the term of the award.

Common shares issuable pursuant to equity units, stock options and performance shares awards and restricted stock which were not included in the denominator above due to their antidilutive effect were approximately 8.1 million and 5.4 million for the three months ended September 30, 2015 and 2014, respectively, and 4.6 million and 1.9 million for the nine months ended September 30, 2015 and 2014, respectively.

Accumulated Other Comprehensive Income (Loss) - The components of AOCI, net of tax, are as follows:

	Accumulated Other Comprehensive Income (Loss)					
	Net Unrealized Gains (Losses) on Cash Flow Hedges	Net Unrealized Gains (Losses) on Available for Sale Securities	Defined Benefit Pension and Other Benefits Plans	Net Unrealized Gains (Losses) on Foreign Currency Translation	Other Comprehensive Income (Loss) Related to Equity Method Investee	Total
			(millions)

(b) Reclassified to gains on disposal of assets - net in NEE's condensed consolidated statements of income.

7. Debt

Long-term debt issuances and borrowings by subsidiaries of NEE during the nine months ended September 30, 2015 were as follows:

Date Issued	Company	Debt Issuances/Borrowings	Interest Rate	Principal Amount	Maturity Date
				(millions)	
February - September 2015	NEER subsidiary	Canadian revolving credit agreements	Variable (a)	$ 408	Various
January - February 2015	NEP subsidiary	Senior secured revolving credit facility	Variable (a)	$ 122	2019
February - September 2015	NEER subsidiary	Limited-recourse construction and term loan facility	Variable (a)(b)	$ 204	2035
February 2015	NEER subsidiary	Cash grant bridge loan facility	Variable (a)	$ 29	2017
April 2015	NEER subsidiary	Canadian senior secured limited-recourse term loan	Variable (a)	$ 324	2033
April 2015	NEER subsidiary	Canadian senior secured limited-recourse term loan	Variable (a)	$ 228	2033
April 2015	NEECH	Term loans	Variable (a)	$ 450	2016
May - September 2015	NEER subsidiary	Limited-recourse construction and term loan facility	Variable (a)(b)	$ 361	2035
June 2015	FPL	Industrial development revenue bonds	Variable (c)	$ 85	2045
June 2015	NEP subsidiary	Limited-recourse term loan	4.52%	$ 31	2033
July 2015	NEECH	Term loan	Variable (a)	$ 100	2018
July 2015	NEP subsidiary	Senior secured limited-recourse term loan	(d)	$ 81	2026
August 2015	NEECH	Debentures	2.80%	$ 300	2020
September 2015	NEECH	Debentures related to NEE's equity units	2.36%	$ 700	2020
September 2015	NEER subsidiary	Senior secured limited-recourse term loan	Variable (a)(b)	$ 40	2033

(a) Variable rate is based on an underlying index plus a margin.
(b) Interest rate swap agreements have been entered into with respect to these issuances. See Note 2.
(c) These tax exempt bonds permit individual bond holders to tender the bonds for purchase at any time prior to maturity. In the event the bonds are tendered for purchase, they would be remarketed by a designated remarketing agent in accordance with the related indenture. If the remarketing is unsuccessful, FPL would be required to purchase the bonds. As of September 30, 2015, all bonds tendered for purchase have been successfully remarketed. In the event the bonds are tendered by individual bond holders and not remarketed prior to maturity, FPL's bank revolving line of credit facilities are available to support the purchase of the bonds.
(d) Approximately $54 million of the borrowings bear interest at a variable rate based on an underlying index plus a margin and the remaining amount of borrowings bear interest at a fixed rate of 4.38%.

In May 2015, NEECH completed a remarketing of $600 million aggregate principal amount of its Series E Debentures due June 1, 2017 (Debentures) that were issued in May 2012 as components of equity units issued concurrently by NEE (May 2012 equity units). The Debentures are fully and unconditionally guaranteed by NEE. In connection with the remarketing of the Debentures, the interest rate on the Debentures was reset to 1.586% per year, and interest is payable on June 1 and December 1 of each year, commencing June 1, 2015. In connection with the settlement of the contracts to purchase NEE common stock that were issued as components of the May 2012 equity units, on June 1, 2015, NEE issued 7,860,000 shares of common stock in exchange for $600 million.

In August 2015, NEECH completed a remarketing of approximately $650 million aggregate principal amount of its Series F Debentures due September 1, 2017. The Series F Debentures are fully and unconditionally guaranteed by NEE. These remarketed debentures were issued in September 2012 as components of equity units issued by NEE (September 2012 equity units). In connection with the remarketing of the debentures, the interest rate on all of the Series F Debentures was reset to 2.056% per year and interest is payable on March 1 and September 1 of each year, commencing September 1, 2015. In connection with the settlement of the contracts to purchase NEE common stock that were issued as components of the September 2012 equity units, in the third quarter of 2015, NEE issued a total of 8,173,099 shares of common stock in exchange for $650 million.

In September 2015, NEE sold $700 million of equity units (initially consisting of Corporate Units). Each equity unit has a stated amount of $50 and consists of a contract to purchase NEE common stock (stock purchase contract) and, initially, a 5% undivided beneficial ownership interest in a Series H Debenture due September 1, 2020 issued in the principal amount of $1,000 by NEECH (see table above). Each stock purchase contract requires the holder to purchase by no later than September 1, 2018 (the final settlement date) for a price of $50 in cash, a number of shares of NEE common stock (subject to antidilution adjustments) based on a price per share range of $95.35 to $114.42. If purchased on the final settlement date, as of September 30, 2015, the number of shares issued would (subject to antidilution adjustments) range from 0.5244 shares if the applicable market value of a share of common stock is less than or equal to $95.35 to 0.4370 shares if the applicable market value of a share is equal to or greater than $114.42, with applicable market value to be determined using the average closing prices of NEE common stock over a 20-day trading period ending August 29, 2018. Total annual distributions on the equity units will be at the rate of 6.371%, consisting of interest on the debentures (2.36% per year) and payments under the stock purchase contracts (4.011% per year). The interest rate on the debentures is expected to be reset on or after March 1, 2018. A holder of the equity unit may satisfy its purchase obligation with proceeds raised from remarketing the NEECH debentures that are part of its equity unit. The undivided beneficial ownership interest in the NEECH debenture that is a component of each Corporate Unit is pledged to NEE to secure the holder's obligation to purchase NEE common stock under the related stock purchase contract. If a successful remarketing does not occur on or before the third business day prior to the final settlement date, and a holder has not notified NEE of its intention to settle the stock purchase contract with cash, the debentures that are components of the Corporate Units will be used to satisfy in full the holders' obligations to purchase NEE common stock under the related stock purchase contracts on the final settlement date. The debentures are fully and unconditionally guaranteed by NEE.

In September 2015, through a tender offer, FPL purchased and canceled an aggregate of approximately $400 million of several series of its first mortgage bonds with interest rates ranging from 5.40% to 6.20% and maturity dates ranging from 2033 through 2037.

In October 2015, a NEP subsidiary entered into and borrowed $600 million under several variable rate senior secured term loan agreements maturing in 2018. The borrowings are guaranteed by NEP and NEP OpCo and are not guaranteed by NEE.

Presentation of Debt Issuance Costs - In April 2015, the FASB issued a new accounting standard which changes the presentation of debt issuance costs in financial statements. The amendments in this standard require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected by this standard. The standard is effective for NEE and FPL beginning January 1, 2016. NEE and FPL are currently evaluating the effect the adoption of this standard will have on their consolidated financial statements.

8. Commitments and Contingencies

Commitments - NEE and its subsidiaries have made commitments in connection with a portion of their projected capital expenditures. Capital expenditures at FPL include, among other things, the cost for construction or acquisition of additional facilities and equipment to meet customer demand, as well as capital improvements to and maintenance of existing facilities and the procurement of nuclear fuel. At NEER, capital expenditures include, among other things, the cost, including capitalized interest, for construction and development of wind and solar projects and the procurement of nuclear fuel. Capital expenditures for Corporate and Other primarily include NEE's portion of the cost for construction of two natural gas pipeline systems, consisting of three separate pipelines, as well as the cost to meet customer-specific requirements and maintain the fiber-optic network for FPL FiberNet and the cost to maintain existing transmission facilities at NEET.

At September 30, 2015, estimated capital expenditures for the remainder of 2015 through 2019 for which applicable internal approvals (and also FPSC approvals for FPL, if required) have been received were as follows:

	Remainder of 2015	2016	2017	2018	2019	Total
			(millions)			
FPL:						
Generation:[a]						
New[b][c]	$ 150	$ 865	$ 45	$ —	$ —	$ 1,060
Existing	375	585	660	535	470	2,625
Transmission and distribution	510	1,960	1,755	1,625	1,680	7,530
Nuclear fuel	20	220	125	150	175	690
General and other	130	215	215	160	130	850
Total	$ 1,185	$ 3,845	$ 2,800	$ 2,470	$ 2,455	$ 12,755
NEER:						
Wind[d]	$ 235	$ 1,185	$ 65	$ 15	$ 10	$ 1,510
Solar[e]	780	1,100	—	—	—	1,880
Nuclear, including nuclear fuel	90	300	240	260	310	1,200
Other	105	70	45	100	45	365
Total	$ 1,210	$ 2,655	$ 350	$ 375	$ 365	$ 4,955
Corporate and Other[f]	$ 155	$ 1,215	$ 915	$ 505	$ 160	$ 2,950

(a) Includes AFUDC of approximately $28 million, $79 million and $13 million for the remainder of 2015 through 2017, respectively.
(b) Includes land, generating structures, transmission interconnection and integration and licensing.
(c) Excludes capital expenditures for costs related to the two additional nuclear units at FPL's Turkey Point site beyond what is required to receive an NRC license for each unit.
(d) Includes capital expenditures for new wind projects and related transmission totaling approximately 1,790 MW, including 125 MW that received applicable internal approvals in October 2015.
(e) Consists of capital expenditures for new solar projects and related transmission totaling approximately 1,155 MW, including 220 MW that received applicable internal approvals in October 2015.
(f) Includes capital expenditures for construction of three natural gas pipelines, including equity contributions associated with equity investments in joint ventures for two pipelines and AFUDC associated with the third pipeline. The natural gas pipelines are subject to certain conditions, including FERC approval. See Contracts below.

The above estimates are subject to continuing review and adjustment and actual capital expenditures may vary significantly from these estimates.

Contracts - In addition to the commitments made in connection with the estimated capital expenditures included in the table in Commitments above, FPL has commitments under long-term purchased power and fuel contracts. As of September 30, 2015, FPL is obligated under take-or-pay purchased power contracts to pay for 375 MW annually through 2021 and 953 MW annually through December 2015. FPL also has various firm pay-for-performance contracts to purchase approximately 455 MW from certain cogenerators and small power producers with expiration dates ranging from 2025 through 2034. The purchased power contracts provide for capacity and energy payments. Energy payments are based on the actual power taken under these contracts. Capacity payments for the pay-for-performance contracts are subject to the facilities meeting certain contract conditions. FPL has contracts with expiration dates through 2036 for the purchase and transportation of natural gas and coal, and storage of natural gas. In addition, FPL has entered into 25-year natural gas transportation agreements with each of Sabal Trail and Florida Southeast Connection, each of which will build, own and operate a pipeline that will be part of a natural gas pipeline system, for a quantity of 400,000 MMBtu/day beginning on May 1, 2017 and increasing to 600,000 MMBtu/day on May 1, 2020. These agreements contain firm commitments that are contingent upon the occurrence of certain events, including FERC approval and completion of construction of the pipeline system to be built by Sabal Trail and Florida Southeast Connection. See Commitments above.

As of September 30, 2015, NEER has entered into contracts with expiration dates ranging from November 2015 through 2030 primarily for the purchase of wind turbines, wind towers and solar modules and related construction and development activities, as well as for the supply of uranium and the conversion, enrichment and fabrication of nuclear fuel. Approximately $3.0 billion of commitments under such contracts are included in the estimated capital expenditures table in Commitments above. In addition, NEER has contracts primarily for the purchase, transportation and storage of natural gas and firm transmission service with expiration dates ranging from December 2015 through 2033.

Included in Corporate and Other in the table below is the remaining commitment by NEECH subsidiaries of approximately $2.2 billion for the construction of the natural gas pipelines. Amounts committed for the remainder of 2015 through 2019 are also included in the estimated capital expenditures table in Commitments above.

The required capacity and/or minimum payments under the contracts discussed above as of September 30, 2015 were estimated as follows:

	Remainder of 2015	2016	2017	2018	2019	Thereafter
			(millions)			
FPL:						
Capacity charges:[a]						
Pay-for-performance	$ 40	$ 115	$ 115	$ 115	$ 115	$ 835
Take-or-pay	$ 50	$ 70	$ 60	$ 30	$ 10	$ —
Minimum charges, at projected prices:[b]						
Natural gas, including transportation and storage[c]	$ 325	$ 955	$ 850	$ 865	$ 860	$ 13,940
Coal, including transportation	$ 30	$ 60	$ 40	$ —	$ —	$ —
NEER	$ 930	$ 1,710	$ 155	$ 160	$ 90	$ 620
Corporate and Other[d][e]	$ 155	$ 1,005	$ 665	$ 385	$ 65	$ 25

(a) Capacity charges under these contracts, substantially all of which are recoverable through the capacity cost recovery clause (capacity clause), totaled approximately $112 million and $123 million for the three months ended September 30, 2015 and 2014, respectively, and approximately $349 million and $369 million for the nine months ended September 30, 2015 and 2014, respectively. Energy charges under these contracts, which are recoverable through the fuel clause, totaled approximately $99 million and $110 million for the three months ended September 30, 2015 and 2014, respectively, and approximately $221 million and $242 million for the nine months ended September 30, 2015 and 2014, respectively.
(b) Recoverable through the fuel clause.
(c) Includes approximately $200 million, $295 million, $290 million and $8,245 million in 2017, 2018, 2019 and thereafter, respectively, of firm commitments, subject to certain conditions as noted above, related to the natural gas transportation agreements with Sabal Trail and Florida Southeast Connection.
(d) Includes an approximately $65 million commitment to invest primarily in clean power and technology businesses through 2021.
(e) Excludes approximately $85 million and $615 million in 2015 and 2016, respectively, of joint obligations of NEECH and NEER which are included in the NEER amounts above.

In September 2015, FPL assumed ownership of a 250 MW coal-fired generation facility located in Jacksonville, Florida and terminated its long-term purchased power agreement for substantially all of the facility's capacity and energy for a purchase price of approximately $521 million. The FPSC approved a stipulation and settlement between the Office of Public Counsel and FPL regarding issues relating to the ratemaking treatment for the purchase of this 250 MW coal-fired generation facility. Key elements of the settlement include, among other things, the following:

- FPL will recover the purchase price and associated income tax gross-up as a regulatory asset which will be amortized over approximately ten years. Approximately $709 million will be recovered through the capacity clause with a return on the portion of the unamortized balance associated with the purchase price and $138 million will be recovered through base rates until the next test year for a general base rate proceeding, at which time the unamortized balance will be transferred to the capacity clause for continued recovery until fully amortized. At September 30, 2015, the regulatory assets, net of amortization, totaled approximately $840 million and are included in purchased power agreement termination and current other regulatory assets on NEE's and FPL's condensed consolidated balance sheets.
- The reserve amount that is available for amortization under the 2012 rate agreement, which is effective through December 2016, was reduced by $30 million to $370 million, unless FPL needs the entire $400 million reserve to maintain a minimum regulatory ROE of 9.50%.

In October 2015, the Florida Industrial Power Users Group filed a notice of appeal with the Florida First District Court of Appeals challenging the FPSC's approval of this settlement.

In addition, NEP entered into an agreement, effective July 31, 2015, to acquire 100% of the membership interests in NET Midstream, a developer, owner and operator of a portfolio of seven long-term contracted natural gas pipeline assets located in Texas. The NET Midstream pipeline portfolio has total existing capacity of approximately 4 billion cubic feet (Bcf) per day, of which 3 Bcf per day is currently contracted with firm ship-or-pay contracts. There are planned expansion projects for the three largest pipelines in the portfolio that, if completed, are expected to provide an additional 0.9 Bcf per day of contracted volumes. On October 1, 2015, a subsidiary of NEP completed the acquisition. The aggregate purchase price of approximately $2 billion included approximately $934 million in cash consideration and the assumption of approximately $654 million in existing debt of NET Midstream and its subsidiaries at closing and excluded post-closing working capital adjustments. The purchase price is subject to (i) a $200 million holdback payable, in whole or in part, upon satisfaction of financial performance and capital expenditure thresholds relating to planned expansion projects and (ii) a $200 million holdback retained for an 18-month period to satisfy any indemnification obligations of the sellers. The $200 million indemnity holdback may be reduced by up to $10 million depending on certain post-closing employee retention thresholds. If successful, NEP may spend up to an additional $100 million of capital expenditures for the planned expansion projects, bringing the total transaction size for the NET Midstream acquisition to approximately $2.1 billion.

Insurance - Liability for accidents at nuclear power plants is governed by the Price-Anderson Act, which limits the liability of nuclear reactor owners to the amount of insurance available from both private sources and an industry retrospective payment plan. In accordance with this Act, NEE maintains $375 million of private liability insurance per site, which is the maximum obtainable, and participates in a secondary financial protection system, which provides up to $13.1 billion of liability insurance coverage per incident at any nuclear reactor in the U.S. Under the secondary financial protection system, NEE is subject to retrospective assessments of up to $1.0 billion ($509 million for FPL), plus any applicable taxes, per incident at any nuclear reactor in the U.S., payable at a rate not to exceed $152 million ($76 million for FPL) per incident per year. NEE and FPL are contractually entitled to recover a proportionate share of such assessments from the owners of minority interests in Seabrook, Duane Arnold and St. Lucie Unit No. 2, which approximates $15 million, $38 million and $19 million, plus any applicable taxes, per incident, respectively.

NEE participates in a nuclear insurance mutual company that provides $2.75 billion of limited insurance coverage per occurrence per site for property damage, decontamination and premature decommissioning risks at its nuclear plants and a sublimit of $1.5 billion for non-nuclear perils. The proceeds from such insurance, however, must first be used for reactor stabilization and site decontamination before they can be used for plant repair. NEE also participates in an insurance program that provides limited coverage for replacement power costs if a nuclear plant is out of service for an extended period of time because of an accident. In the event of an accident at one of NEE's or another participating insured's nuclear plants, NEE could be assessed up to $187 million ($113 million for FPL), plus any applicable taxes, in retrospective premiums in a policy year. NEE and FPL are contractually entitled to recover a proportionate share of such assessments from the owners of minority interests in Seabrook, Duane Arnold and St. Lucie Unit No. 2, which approximates $3 million, $5 million and $4 million, plus any applicable taxes, respectively.

Due to the high cost and limited coverage available from third-party insurers, NEE does not have property insurance coverage for a substantial portion of its transmission and distribution property and has no property insurance coverage for FPL FiberNet's fiber-optic cable. Should FPL's future storm restoration costs exceed the reserve amount established through the issuance of storm-recovery bonds by a VIE in 2007, FPL may recover storm restoration costs, subject to prudence review by the FPSC, either through surcharges approved by the FPSC or through securitization provisions pursuant to Florida law.

In the event of a loss, the amount of insurance available might not be adequate to cover property damage and other expenses incurred. Uninsured losses and other expenses, to the extent not recovered from customers in the case of FPL or Lone Star Transmission, LLC, would be borne by NEE and/or FPL and/or their affiliates, as the case may be, and could have a material adverse effect on NEE's and FPL's financial condition, results of operations and liquidity.

Spain Solar Projects - In March 2013 and May 2013, events of default occurred under the project-level financing agreements for the solar thermal facilities in Spain (Spain solar projects) as a result of changes of law that occurred in December 2012 and February 2013. These changes of law negatively affected the projected economics of the projects and caused the project-level financing to be unsupportable by expected future project cash flows. Under the project-level financing, events of default (including those discussed below) provide for, among other things, a right by the lenders (which they have not exercised) to accelerate the payment of the project-level debt. Accordingly, in 2013, the project-level debt and the associated derivative liabilities related to interest rate swaps were classified as current maturities of long-term debt and current derivative liabilities, respectively, on NEE's condensed consolidated balance sheets, and totaled $588 million and $115 million, respectively, as of September 30, 2015. In July 2013, the Spanish government published a new law that created a new economic framework for the Spanish renewable energy sector. Additional regulatory pronouncements from the Spanish government needed to complete and implement the framework were finalized in June 2014. Based on NEE's assessment, the regulatory pronouncements do not indicate a further impairment of the Spain solar projects. Since the third quarter of 2014, events of default have occurred under the project-level financing agreements related to certain debt service coverage ratio covenants not being met. The project-level subsidiaries have requested the lenders to waive the events of default related to the debt service coverage ratio.

Impairments recorded due to the changes of law caused the project-level subsidiaries in Spain to have a negative net equity position on their balance sheets, which requires them under Spanish law to commence liquidation proceedings if the net equity position is not restored to specified levels. Prior to 2015, Spanish law had provided an exemption applicable to the project-level subsidiaries that enabled the exclusion of asset-related impairments in the equity calculation. Such exemption has not yet been granted for 2015, and therefore, the project-level subsidiaries commenced liquidation on April 23, 2015. The liquidators are reviewing the liquidation balance sheets and inventory schedules and will make recommendations to NextEra Energy España, S.L. (NEE España), the NEER subsidiary in Spain that is the direct shareholder of the project-level subsidiaries, to either restructure the project-level debt or file for insolvency. The liquidation event could cause the lenders to seek to accelerate the payment of the project-related debt and/or foreclose on the project assets, which they have not done to date. However, as part of a settlement agreement reached in December 2013 between NEECH, NEE España, the project-level subsidiaries and the lenders, the future recourse of the lenders under the project-level financing is effectively limited to the letters of credit described below and to the assets of the project-level subsidiaries. Under the settlement agreement, the lenders, among other things, irrevocably waived events of default related to changes of law that existed at the time of the settlement as described above, and NEECH affiliates provided for the project-level subsidiaries to post approximately €37 million (approximately $42 million as of September 30, 2015) in letters of credit to fund

operating and debt service reserves under the project-level financing, of which €8 million (approximately $9 million) has been drawn as of September 30, 2015. NEE España, the project-level subsidiaries and the lenders have been in negotiations to seek to restructure the project-level financing; however, there can be no assurance that the project-level financing will be successfully restructured or that the lenders will not exercise remedies available to them under the project financing agreements for, among other things, current and future events of default, if any, or for the commencement of liquidation by the project-level subsidiaries.

Legal Proceedings - In November 1999, the Attorney General of the United States, on behalf of the EPA, brought an action in the U.S. District Court for the Northern District of Georgia against Georgia Power Company and other subsidiaries of The Southern Company for certain alleged violations of the Prevention of Significant Deterioration (PSD) provisions and the New Source Performance Standards (NSPS) of the Clean Air Act. In May 2001, the EPA amended its complaint to allege, among other things, that Georgia Power Company constructed and is continuing to operate Scherer Unit No. 4, in which FPL owns an interest of approximately 76%, without obtaining a PSD permit, without complying with NSPS requirements, and without applying best available control technology for nitrogen oxides, sulfur dioxides and particulate matter as required by the Clean Air Act. It also alleges that unspecified major modifications have been made at Scherer Unit No. 4 that require its compliance with the aforementioned Clean Air Act provisions. The EPA seeks injunctive relief requiring the installation of best available control technology and civil penalties. Under the EPA's civil penalty rules, the EPA could assess up to $25,000 per day for each violation from an unspecified date after June 1, 1975 through January 30, 1997, up to $27,500 per day for each violation from January 31, 1997 through March 15, 2004, up to $32,500 per day for each violation from March 16, 2004 through January 12, 2009 and up to $37,500 per day for each violation thereafter. Georgia Power Company has answered the amended complaint, asserting that it has complied with all requirements of the Clean Air Act, denying the plaintiff's allegations of liability, denying that the plaintiff is entitled to any of the relief that it seeks and raising various other defenses. In June 2001, a federal district court stayed discovery and administratively closed the case and the EPA has not yet moved to reopen the case. In April 2007, the U.S. Supreme Court in a separate unrelated case rejected an argument that a "major modification" occurs at a plant only when there is a resulting increase in the hourly rate of air emissions. Georgia Power Company has made a similar argument in defense of its case, but has other factual and legal defenses that are unaffected by the U.S. Supreme Court's decision.

In 1995 and 1996, NEE, through an indirect subsidiary, purchased from Adelphia Communications Corporation (Adelphia) 1,091,524 shares of Adelphia common stock and 20,000 shares of Adelphia preferred stock (convertible into 2,358,490 shares of Adelphia common stock) for an aggregate price of approximately $35,900,000. On January 29, 1999, Adelphia repurchased all of these shares for $149,213,130 in cash. In June 2004, Adelphia, Adelphia Cablevision, L.L.C. and the Official Committee of Unsecured Creditors of Adelphia filed a complaint against NEE and its indirect subsidiary in the U.S. Bankruptcy Court, Southern District of New York. The complaint alleges that the repurchase of these shares by Adelphia was a fraudulent transfer, in that at the time of the transaction Adelphia (i) was insolvent or was rendered insolvent, (ii) did not receive reasonably equivalent value in exchange for the cash it paid, and (iii) was engaged or about to engage in a business or transaction for which any property remaining with Adelphia had unreasonably small capital. The complaint seeks the recovery for the benefit of Adelphia's bankruptcy estate of the cash paid for the repurchased shares, plus interest from January 29, 1999. NEE filed an answer to the complaint. NEE believes that the complaint is without merit because, among other reasons, Adelphia will be unable to demonstrate that (i) Adelphia's repurchase of shares from NEE, which repurchase was at the market value for those shares, was not for reasonably equivalent value, (ii) Adelphia was insolvent at the time of the stock repurchase, or (iii) the stock repurchase left Adelphia with unreasonably small capital. The trial was completed in May 2012 and closing arguments were heard in July 2012. In May 2014, the U.S. Bankruptcy Court, Southern District of New York, issued its decision after trial, finding, among other things, that Adelphia was not insolvent, or rendered insolvent, at the time of the stock repurchase. The bankruptcy court further ruled that Adelphia was not left with inadequate capital or equitably insolvent at the time of the stock repurchase. The decision after trial represented proposed findings of fact and conclusions of law which were subject to de novo review by the U.S. District Court for the Southern District of New York. In March 2015, the U.S. District Court issued a final order which effectively affirmed the findings of the U.S. Bankruptcy Court in NEE's favor. In April 2015, Adelphia filed an appeal of the final order to the U.S. Court of Appeals for the Second Circuit.

NEE and FPL are vigorously defending, and believe that they or their affiliates have meritorious defenses to, the lawsuits described above. In addition to the legal proceedings discussed above, NEE and its subsidiaries, including FPL, are involved in other legal and regulatory proceedings, actions and claims in the ordinary course of their businesses. Generating plants in which subsidiaries of NEE, including FPL, have an ownership interest are also involved in legal and regulatory proceedings, actions and claims, the liabilities from which, if any, would be shared by such subsidiary. In the event that NEE and FPL, or their affiliates, do not prevail in the lawsuits described above or these other legal and regulatory proceedings, actions and claims, there may be a material adverse effect on their financial statements. While management is unable to predict with certainty the outcome of the lawsuits described above or these other legal and regulatory proceedings, actions and claims, based on current knowledge it is not expected that their ultimate resolution, individually or collectively, will have a material adverse effect on the financial statements of NEE or FPL.

9. Segment Information

NEE's reportable segments are FPL, a rate-regulated electric utility, and NEER, a competitive energy business. NEER's segment information includes an allocation of interest expense from NEECH based on a deemed capital structure of 70% debt and allocated shared service costs. Corporate and Other represents other business activities, other segments that are not separately reportable and eliminating entries. NEE's segment information is as follows:

	Three Months Ended September 30,							
	2015				2014			
	FPL	NEER[a]	Corporate and Other	NEE Consolidated	FPL	NEER[a]	Corporate and Other	NEE Consolidated
	(millions)							
Operating revenues	$ 3,274	$ 1,585	$ 95	$ 4,954	$ 3,315	$ 1,242	$ 97	$ 4,654
Operating expenses	$ 2,419	$ 972	$ 82	$ 3,473	$ 2,481	$ 935	$ 75	$ 3,491
Net income (loss) attributable to NEE	$ 489	$ 375 [b]	$ 15	$ 879	$ 462	$ 204 [b]	$ (6)	$ 660

	Nine Months Ended September 30,

(a) Interest expense allocated from NEECH is based on a deemed capital structure of 70% debt. For this purpose, the deferred credit associated with differential membership interests sold by NEER subsidiaries is included with debt. Residual NEECH corporate interest expense is included in Corporate and Other.
(b) See Note 4 for a discussion of NEER's tax benefits related to PTCs.

Revenue Recognition - In July 2015, the FASB approved the deferral of the effective date of the new accounting standard related to the recognition of revenue from contracts with customers and required disclosures. The standard is effective for NEE and FPL beginning January 1, 2018. NEE and FPL are currently evaluating the effect the adoption of this standard will have, if any, on their consolidated financial statements.

10. Summarized Financial Information of NEECH

NEECH, a 100% owned subsidiary of NEE, provides funding for, and holds ownership interests in, NEE's operating subsidiaries other than FPL. NEECH's debentures and junior subordinated debentures that are registered pursuant to the Securities Act of 1933, as amended, are fully and unconditionally guaranteed by NEE. Condensed consolidating financial information is as follows:

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

NEE's operating performance is driven primarily by the operations of its two principal subsidiaries, FPL, which serves approximately 4.8 million customer accounts in Florida and is one of the largest rate-regulated electric utilities in the U.S., and NEER, which together with affiliated entities is the largest generator in North America of renewable energy from the wind and sun. The table below presents net income (loss) attributable to NEE and earnings (loss) per share attributable to NEE by reportable segment, FPL and NEER, and by Corporate and Other, which is primarily comprised of the operating results of NEET, FPL FiberNet and other business activities, as well as other income and expense items, including interest expense, income taxes and eliminating entries (see Note 9 for additional segment information). The following discussions should be read in conjunction with the Notes contained herein and Management's Discussion and Analysis of Financial Condition and Results of Operations appearing in the 2014 Form 10-K. The results of operations for an interim period generally will not give a true indication of results for the year. In the following discussions, all comparisons are with the corresponding items in the prior year period.

	Net Income (Loss) Attributable to NEE		Earnings (Loss) Per Share, assuming dilution		Net Income (Loss) Attributable to NEE		Earnings (Loss) Per Share, assuming dilution

(a) NEER's results reflect an allocation of interest expense from NEECH based on a deemed capital structure of 70% debt and allocated shared service costs.

Adjusted Earnings

NEE prepares its financial statements under GAAP. However, management uses earnings excluding certain items (adjusted earnings), a non-GAAP financial measure, internally for financial planning, for analysis of performance, for reporting of results to the Board of Directors and as an input in determining performance-based compensation under NEE's employee incentive compensation plans. NEE also uses adjusted earnings when communicating its financial results and earnings outlook to analysts and investors. NEE's management believes adjusted earnings provides a more meaningful representation of the company's fundamental earnings power. Although the excluded amounts are properly included in the determination of net income under GAAP, management believes that the amount and/or nature of such items make period to period comparisons of operations difficult and potentially confusing. Adjusted earnings do not represent a substitute for net income, as prepared under GAAP.

Adjusted earnings exclude the unrealized mark-to-market effect of non-qualifying hedges (as described below) and OTTI losses on securities held in NEER's nuclear decommissioning funds, net of the reversal of previously recognized OTTI losses on securities sold and losses on securities where price recovery was deemed unlikely (collectively, OTTI reversals). However, other adjustments may be made from time to time with the intent to provide more meaningful and comparable results of ongoing operations.

NEE and NEER segregate into two categories unrealized mark-to-market gains and losses on derivative transactions. The first category, referred to as non-qualifying hedges, represents certain energy derivative and interest rate derivative transactions entered into as economic hedges, which do not meet the requirements for hedge accounting, or for which hedge accounting treatment is not elected or has been discontinued. Changes in the fair value of those transactions are marked to market and reported in the consolidated statements of income, resulting in earnings volatility because the economic offset to the positions are not marked to market. As a consequence, NEE's net income reflects only the movement in one part of economically-linked transactions. For example, a gain (loss) in the non-qualifying hedge category for certain energy derivatives is offset by decreases (increases) in the fair value of related physical asset positions in the portfolio or contracts, which are not marked to market under GAAP. For this reason, NEE's management views results expressed excluding the unrealized mark-to-market impact of the non-qualifying hedges as a meaningful measure of current period performance. The second category, referred to as trading activities, which is included in adjusted earnings, represents the net unrealized effect of actively traded positions entered into to take advantage of expected market price movements and all other commodity hedging activities. At FPL, substantially all changes in the fair value of energy derivative transactions are deferred as a regulatory asset or liability until the contracts are settled, and, upon settlement, any gains or losses are passed through the fuel clause. See Note 2.

During the nine months ended September 30, 2014, NEER decided not to pursue the sale of Maine fossil and recorded an after-tax gain of $12 million to increase Maine fossil's carrying value to its estimated fair value. See Note 3 - Nonrecurring Fair Value

Measurements. In order to make period to period comparisons more meaningful, adjusted earnings also exclude the after-tax gain associated with Maine fossil, costs incurred in 2015 associated with the proposed merger pursuant to which Hawaiian Electric Company, Inc. will become a wholly-owned subsidiary of NEE and the after-tax operating results associated with the Spain solar projects.

The following table provides details of the adjustments to net income considered in computing NEE's adjusted earnings discussed above.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	**2015**	2014
	(millions)			
Net unrealized mark-to-market after-tax gains (losses) from non-qualifying hedge activity[a]	**$ 158**	$ (10)	**$ 210**	$ (283)
OTTI after-tax losses on securities held in NEER's nuclear decommissioning funds, net of OTTI reversals[b]	**$ (13)**	$ (4)	**$ (14)**	$ (1)
After-tax gain associated with Maine fossil - NEER	**$ —**	$ —	**$ —**	$ 12
After-tax operating results of NEER's Spain solar projects	**$ 9**	$ (14)	**$ 5**	$ (22)
After-tax merger-related expenses - Corporate and Other	**$ (5)**	$ —	**$ (16)**	$ —

(a) For the three months ended September 30, 2015 and 2014, approximately $158 million of gains and $11 million of losses, respectively, are included in NEER's net income; the balance is included in Corporate and Other. For the nine months ended September 30, 2015 and 2014, approximately $203 million of gains and $274 million of losses, respectively, are included in NEER's net income; the balance is included in Corporate and Other.

(b) For the three months ended September 30, 2015 and 2014, approximately $13 million of losses and $2 million of losses, respectively, are included in NEER's net income; the balance is included in Corporate and Other. For the nine months ended September 30, 2015 and 2014, approximately $14 million of losses and $1 million of income, respectively, is included in NEER's net income; the balance is included in Corporate and Other.

The change in unrealized mark-to-market activity from non-qualifying hedges is primarily attributable to changes in forward power and natural gas prices and interest rates, as well as the reversal of previously recognized unrealized mark-to-market gains or losses as the underlying transactions were realized.

RESULTS OF OPERATIONS

Summary

Net income attributable to NEE for the three months ended September 30, 2015 was higher than the prior period by $219 million, reflecting higher results at FPL, NEER and Corporate and Other. Net income attributable to NEE for the nine months ended September 30, 2015 was higher than the prior period by $664 million, reflecting higher results at FPL, NEER and Corporate and Other.

FPL's increase in net income for the three and nine months ended September 30, 2015 was primarily driven by continued investments in plant in service while earning an 11.50% regulatory ROE on its retail rate base and higher AFUDC - equity.

NEER's results increased $171 million and $556 million for the three and nine months ended September 30, 2015, respectively, reflecting net unrealized gains from non-qualifying hedge activity compared to losses on such hedges in the prior year periods, higher customer supply and proprietary power and gas trading results, earnings from new investments and higher earnings on the Spain solar projects primarily related to the absence of a 2014 operating revenue adjustment, partly offset by higher growth-related interest and corporate general and administrative expenses. For the nine months ended September 30, 2015, NEER's results also reflect the absence of the 2014 NEP-related charge and costs, offset by lower results from existing assets and the gas infrastructure business.

Corporate and Other's results increased for the three and nine months ended September 30, 2015 primarily due to favorable income tax adjustments and 2015 investment gains compared to 2014 investment losses, and also for the nine months ended September 30, 2015, the absence of debt reacquisition losses recorded in 2014. These positives were partly offset in both periods by costs associated with the proposed merger.

NEE's effective income tax rates for the three months ended September 30, 2015 and 2014 were approximately 32% and 30%, respectively. NEE's effective income tax rates for the nine months ended September 30, 2015 and 2014 were approximately 30% and 31%, respectively. The rates for all periods reflect the benefit of PTCs for NEER's wind projects, as well as ITCs and deferred income tax benefits associated with convertible ITCs for solar and certain wind projects at NEER. PTCs, ITCs and deferred income tax benefits associated with convertible ITCs can significantly affect NEE's effective income tax rate depending on the amount of pretax income. The amount of PTCs recognized can be significantly affected by wind generation and by PTC roll off. PTCs for the three months ended September 30, 2015 and 2014 were approximately $29 million and $34 million, respectively, and $105 million and $132 million for the comparable nine-month periods. ITCs and deferred income tax benefits associated with convertible ITCs for the three months ended September 30, 2015 and 2014 were approximately $16 million and $37 million, respectively, and $67 million and $69 million for the comparable nine-month periods. In addition, the rate for the nine months ended September 30, 2014

reflects a noncash income tax charge of approximately $45 million associated with structuring Canadian assets in connection with the creation of NEP. See Note 4.

FPL: Results of Operations

FPL's net income for the three months ended September 30, 2015 and 2014 was $489 million and $462 million, respectively, representing an increase of $27 million. FPL's net income for the nine months ended September 30, 2015 and 2014 was $1,283 million and $1,231 million, respectively, representing an increase of $52 million.

The use of reserve amortization is permitted by a January 2013 FPSC final order approving a stipulation and settlement between FPL and several intervenors in FPL's base rate proceeding (2012 rate agreement). In order to earn a targeted regulatory ROE, subject to limitations provided in the 2012 rate agreement, reserve amortization is calculated using a trailing thirteen-month average of retail rate base and capital structure in conjunction with the trailing twelve months regulatory retail base net operating income, which primarily includes the retail base portion of base and other revenues, net of O&M, depreciation and amortization, interest and tax expenses. The drivers of FPL's net income not reflected in the reserve amortization calculation typically include wholesale and transmission service revenues and expenses, cost recovery clause revenues and expenses, AFUDC - equity and costs not allowed to be recovered from retail customers by the FPSC. During the three months ended September 30, 2015 and 2014, FPL recorded the reversal of reserve amortization of approximately $115 million and $131 million, respectively. During the nine months ended September 30, 2015, FPL recorded the reversal of reserve amortization of approximately $81 million.

The $27 million and $52 million increase in FPL's net income for the three and nine months ended September 30, 2015, respectively, was primarily driven by:

- higher earnings on investment in plant in service of approximately $26 million and $56 million, respectively. Investment in plant in service grew FPL's average retail rate base for the three and nine months ended September 30, 2015 by approximately $0.7 billion and $0.9 billion, respectively, when compared to the same periods last year, reflecting, among other things, ongoing transmission and distribution additions and, for the nine months ended September 30, 2015, the modernized Riviera Beach power plant placed in service on April 1, 2014, and
- higher AFUDC - equity of $13 million and $19 million, respectively,

partly offset by,

- lower earnings from wholesale services of $8 million and $5 million, respectively, and
- lower cost recovery clause earnings of $3 million and $9 million, respectively.

FPL's operating revenues consisted of the following:

	Three Months Ended September 30,		Nine Months Ended September 30,

Retail base	**$ 1,609**	$ 1,571	**$ 4,280**	$ 4,097
Fuel cost recovery	**1,078**	1,117	**2,931**	2,973
Other cost recovery clauses and pass-through costs, net of any deferrals	**461**	507	**1,241**	1,348
Other, primarily wholesale and transmission sales, customer-related fees and pole attachment rentals	**126**	120	**360**	321
Total	**$ 3,274**	$ 3,315	**$ 8,812**	$ 8,739

Retail Base

Retail base revenues increased approximately $43 million during the nine months ended September 30, 2015 related to the modernized Riviera Beach power plant being placed in service on April 1, 2014.

Retail Customer Usage and Growth

In the three and nine months ended September 30, 2015, FPL experienced a 1.2% and 2.4% increase, respectively, in average usage per retail customer and, in both periods, experienced a 1.4% increase in the average number of customer accounts, which collectively, together with other factors, increased revenues by approximately $38 million and $140 million, respectively. Favorable weather contributed to the increased revenues.

Cost Recovery Clauses

Revenues from fuel and other cost recovery clauses and pass-through costs, such as franchise fees, revenue taxes and storm-related surcharges, are largely a pass-through of costs. Such revenues also include a return on investment allowed to be recovered through the cost recovery clauses on certain assets, primarily related to solar and environmental projects, natural gas reserves and nuclear capacity. The decrease in fuel cost recovery revenues for the three and nine months ended September 30, 2015 is due to a decrease of approximately $55 million and $79 million, respectively, related to lower average fuel factor, a decrease due to lower

gas sales associated with an incentive mechanism allowed under the 2012 rate agreement (incentive gas sales) and lower revenues from interchange power sales totaling $19 million and $86 million, respectively, partly offset by increased revenues of $35 million and $123 million, respectively, related to higher retail energy sales.

Declines in revenues from other cost recovery clauses had little impact on earnings and were largely due to reductions in expenses associated with conservation and capacity clause programs. These other cost recovery clauses contributed approximately $19 million and $18 million to FPL's net income for the three months ended September 30, 2015 and 2014, respectively. The amounts for the nine months ended September 30, 2015 and 2014 were $56 million and $55 million, respectively.

Other Items Impacting FPL's Condensed Consolidated Statements of Income

Fuel, Purchased Power and Interchange Expense
The major components of FPL's fuel, purchased power and interchange expense are as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	**2015**	2014
	(millions)			
Fuel and energy charges during the period	**$ 1,021**	$ 1,102	**$ 2,765**	$ 3,097
Net recognition of deferred retail fuel costs	**46**	5	**155**	—
Net deferral of retail fuel costs	**—**	—	**—**	(140)
Other, primarily capacity charges, net of any capacity deferral	**128**	148	**378**	410
Total	**$ 1,195**	$ 1,255	**$ 3,298**	$ 3,367

The decrease in fuel and energy charges for the three and nine months ended September 30, 2015 reflects approximately $92 million and $400 million of lower fuel and energy prices, partly offset by $26 million and $124 million related to higher energy sales, respectively. Fuel and energy charges also reflect a decrease of $15 million and $56 million related to lower incentive gas sales for the three and nine months ended September 30, 2015, respectively. In addition, FPL recognized $46 million and $155 million of deferred retail fuel costs during the three and nine months ended September 30, 2015, respectively, compared to recognition of $5 million of deferred retail fuel costs and the deferral of retail fuel costs of $140 million in the three and nine months ended September 30, 2014, respectively. The decrease in other in both comparable periods is primarily due to recognition of previously deferred capacity charges in the three and nine months ended September 30, 2014.

O&M Expenses
FPL's O&M expenses decreased $39 million for the nine months ended September 30, 2015 reflecting lower cost recovery clause costs, primarily relating to conservation programs, which, as discussed above, do not have a significant impact on net income.

Depreciation and Amortization Expense
The major components of FPL's depreciation and amortization expense are as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	**2015**	2014
	(millions)			
Reserve reversal recorded under the 2012 rate agreement	**$ 115**	$ 131	**$ 81**	$ —
Other depreciation and amortization recovered under base rates	**317**	305	**939**	903
Depreciation and amortization recovered under cost recovery clauses and securitized storm-recovery cost amortization	**53**	53	**134**	143
Total	**$ 485**	$ 489	**$ 1,154**	$ 1,046

The reversal of reserve amortization reflects adjustments to the depreciation and fossil dismantlement reserve provided under the 2012 rate agreement. At September 30, 2015, approximately $330 million of this reserve remains available for future amortization. Reserve amortization is recorded as a reduction of regulatory liabilities - accrued asset removal costs on the condensed consolidated balance sheets. For the three and nine months ended September 30, 2015 and 2014, the reversal of such amortization was recorded to achieve the targeted retail regulatory ROE. The increase in other depreciation and amortization expense recovered under base rates for the three and nine months ended September 30, 2015 is due to higher plant in service balances. See Note 8 - Contracts regarding a $30 million reduction in the reserve available for amortization under the 2012 rate agreement.

Taxes Other Than Income Taxes and Other
Taxes other than income taxes and other increased $6 million and $18 million for the three and nine months ended September 30, 2015, respectively, primarily due to higher property taxes reflecting growth in plant in service balances and, for the nine months ended September 30, 2015, partly offset by lower franchise fees, which do not have a significant impact on net income.

Interest Expense
The increase in interest expense for the nine months ended September 30, 2015 primarily reflects higher average debt balances.

AFUDC - Equity
The increase in AFUDC - equity for the three and nine months ended September 30, 2015 is primarily due to additional AFUDC - equity recorded on construction expenditures associated with the Port Everglades modernization project, the replacement/upgrade of turbines at the Lauderdale and Fort Myers facilities and the upgrade of compressors in certain combined-cycle units. In addition, the increase for the nine months ended September 30, 2015 was partly offset by lower AFUDC - equity associated with the Riviera Beach power plant which was placed in service in April 2014.

Capital Initiatives

For the period 2015 through 2018, FPL expects to invest capital of approximately $13.9 billion to $15.8 billion primarily related to projects that are focused on improving reliability, reducing fuel cost and reducing emissions, as well as maintenance of existing assets.

Natural Gas Reserves Project

In March 2015, after receiving FPSC approval, FPL began investing in long-term natural gas supplies to provide a physical hedge on the price of natural gas to fuel its fossil generating fleet. In July 2015, the FPSC issued an order approving a modified version of guidelines proposed by FPL under which FPL could participate in additional natural gas production projects and recover its costs through the fuel clause without prior FPSC approval. Key elements of the modified guidelines include, among other things, an annual investment cap of $500 million along with an escalating annual production cap as a percent of FPL's total natural gas burn and an emphasis on investing in proven and probable reserves. The Office of Public Counsel and the Florida Industrial Power Users Group have each filed notices of appeal to the Florida Supreme Court challenging the FPSC's approval of FPL's initial investment in natural gas supplies and challenging the FPSC's approval of the guidelines, which appeals are pending.

NEER: Results of Operations

NEER's net income less net income attributable to noncontrolling interests for the three months ended September 30, 2015 and 2014 was $375 million and $204 million, respectively, representing an increase of $171 million. NEER's net income less net income attributable to noncontrolling interests for the nine months ended September 30, 2015 and 2014 was $927 million and $371 million, respectively, representing an increase of $556 million. The primary drivers, on an after-tax basis, of the change are in the following table.

	Increase (Decrease) From Prior Period	
	Three Months Ended September 30, 2015	Nine Months Ended September 30, 2015
	(millions)	
New investments[a]	$ 12	$ 99
Existing assets[a]	5	(94)
Gas infrastructure[b]	(3)	(17)
Customer supply and proprietary power and gas trading[b]	16	122
Asset sales	—	(14)
NEP-related charge and costs	—	67
Interest and general and administrative expenses	(31)	(73)
Other	(9)	(11)
Change in unrealized mark-to-market non-qualifying hedge activity[c]	169	477
Change in OTTI losses on securities held in nuclear decommissioning funds, net of OTTI reversals[c]	(11)	(15)
Maine fossil gain[c]	—	(12)
Operating results of the Spain solar projects[c]	23	27
Increase in net income less net income attributable to noncontrolling interests	$ 171	$ 556

(a) Includes PTCs, ITCs and deferred income tax and other benefits associated with convertible ITCs for wind and solar projects, as applicable, but excludes allocation of interest expense or corporate general and administrative expenses. Results from new projects are included in new investments during the first twelve months of operation. A project's results are included in existing assets beginning with the thirteenth month of operation.
(b) Excludes allocation of interest expense or corporate general and administrative expenses.
(c) See Overview - Adjusted Earnings for additional information.

New Investments

Results from new investments for the three months ended September 30, 2015 increased primarily due to:

- the addition of approximately 1,401 MW of wind generation and 386 MW of solar generation during or after the three months ended September 30, 2014, partly offset by,
- lower deferred income tax and other benefits associated with convertible ITCs of $16 million.

Results from new investments for the nine months ended September 30, 2015 increased primarily due to:

- the addition of approximately 1,475 MW of wind generation and 656 MW of solar generation during or after the nine months ended September 30, 2014, partly offset by,
- lower deferred income tax and other benefits associated with convertible ITCs of $18 million.

Existing Assets

Results from NEER's existing asset portfolio for the three months ended September 30, 2015 increased primarily due to:

- higher results from merchant assets in the Electric Reliability Council of Texas (ERCOT) region of approximately $11 primarily due to the absence of a 2014 outage,

partly offset by,

- lower results from wind assets of $10 million primarily due to PTC roll-off and higher operating costs, offset in part by favorable wind resource.

Results from NEER's existing asset portfolio for the nine months ended September 30, 2015 decreased primarily due to:

- lower results from wind assets of approximately $108 million primarily due to weaker wind resource offset in part by a favorable ITC impact related to changes in state income tax laws and favorable pricing,

partly offset by

- higher results from merchant assets in the ERCOT region of approximately $21 primarily due to the absence of a 2014 outage.

Gas Infrastructure

The decrease in gas infrastructure results for the nine months ended September 30, 2015 is primarily due to increased depreciation expense primarily related to both higher depletion rates and increased production in 2015, and the absence of 2014 gains on the sale of investments in certain wells, partly offset by gains from exiting the hedged positions on a number of future gas production opportunities. NEER continues to monitor its oil and gas producing properties for potential impairments due to low prices for oil and natural gas commodity products.

Customer Supply and Proprietary Power and Gas Trading

Results from customer supply and proprietary power and gas trading increased for the three months ended September 30, 2015 primarily due to improved margins and favorable market conditions. Results from customer supply and proprietary power and gas trading increased for the nine months ended September 30, 2015 primarily due to improved margins and favorable market conditions compared to losses in 2014 due to the impact of extreme winter weather on the full requirements business.

Asset Sales

During the nine months ended September 30, 2014, NEER recorded an after-tax gain of approximately $14 million on the sale of a 75 MW wind project that became operational in the first quarter of 2014.

NEP-related Charge and Costs

For the nine months ended September 30, 2014, NEER's results reflect an approximately $45 million noncash income tax charge associated with structuring Canadian assets and $22 million in NEP initial public offering transaction costs.

Interest and General and Administrative Expenses

For the three and nine months ended September 30, 2015, interest and general and administrative expenses reflects higher borrowing and other costs to support the growth of the business.

Other

For the three and nine months ended September 30, 2015, the increase in other primarily reflects the absence of 2014 favorable income tax benefits.

Other Factors

Supplemental to the primary drivers of the changes in NEER's net income less net income attributable to noncontrolling interests discussed above, the discussion below describes changes in certain line items set forth in NEE's condensed consolidated statements of income as they relate to NEER.

Operating Revenues
Operating revenues for the three months ended September 30, 2015 increased $343 million primarily due to:

- higher unrealized mark-to-market gains from non-qualifying hedges ($278 million for the three months ended September 30, 2015 compared to $1 million of gains on such hedges for the comparable period in 2014),
- higher revenues from new investments of $37 million,
- higher revenues from the customer supply and proprietary power and gas trading business and the gas infrastructure business of $27 million, and
- higher revenues from existing assets of $2 million primarily reflecting the absence of a 2014 reduction in revenue of $19 million related to the Spain solar projects, higher contracted revenues at Point Beach and higher revenues from wind assets due to increased wind resource, partly offset by lower revenues in the ERCOT region due to lower gas prices offset in part by the absence of a 2014 outage.

Operating revenues for the nine months ended September 30, 2015 increased $998 million primarily due to:

- higher unrealized mark-to-market gains from non-qualifying hedges ($337 million for the nine months ended September 30, 2015 compared to $367 million of losses on such hedges for the comparable period in 2014),
- higher revenues from the customer supply and proprietary power and gas trading business of approximately $225 million reflecting favorable market conditions,
- higher revenues from new investments of $171 million, and
- higher revenues from the gas infrastructure business of $46 million primarily reflecting gains recorded upon exiting the hedged positions on a number of future gas production opportunities,

partly offset by,

- lower revenues from existing assets of $149 million reflecting weaker wind resource, lower revenues at Marcus Hook 750 and in the ERCOT region due to lower gas prices, offset in part by the absence of a 2014 outage in the ERCOT region, and lower contracted revenues at Duane Arnold, partly offset by higher revenues due to the absence of 2014 outages at Seabrook and Point Beach.

Operating Expenses
Operating expenses for the three months ended September 30, 2015 increased $37 million primarily due to:

- higher operating expenses associated with new investments of approximately $29 million, and
- higher O&M expenses reflecting higher costs associated with growth in the NEER business and the absence of the 2014 reimbursement by a vendor of certain O&M-related costs,

partly offset by,

- lower fuel expense of approximately $32 million primarily in the ERCOT region.

Operating expenses for the nine months ended September 30, 2015 increased $133 million primarily due to:

- higher operating expenses associated with new investments of approximately $93 million,
- higher depreciation associated with the gas infrastructure business of $46 million primarily related to higher depletion rates, and
- higher O&M expenses reflecting higher costs associated with growth in the NEER business, higher taxes other than income taxes and other reflecting the absence of 2014 gains on the sale of investments in certain wells in the gas infrastructure business and the absence of the 2014 reimbursement by a vendor of certain O&M-related costs,

partly offset by,

- lower fuel expense of approximately $97 million primarily in the ERCOT region.

Interest Expense
NEER's interest expense for the three and nine months ended September 30, 2015 decreased $1 million and $27 million, respectively, reflecting approximately $12 million and $2 million of unfavorable changes in the fair value of interest rate swaps associated with the Spain solar projects for the three- and nine-month periods in 2015 compared to $16 million and $51 million of unfavorable changes for the respective periods in 2014, partly offset by higher average debt balances.

Benefits Associated with Differential Membership Interests - net
Benefits associated with differential membership interests - net for both periods presented reflect benefits recognized by NEER as third-party investors received their portion of the economic attributes, including income tax attributes, of the underlying wind projects, net of associated costs.

Gains on Disposal of Assets - net
Gains on disposal of assets - net for the three and nine months ended September 30, 2015 and 2014 primarily reflect gains on sales of securities held in NEER's nuclear decommissioning funds. In addition, the nine months ended September 30, 2014 reflects a $23 million gain on the sale of a 75 MW wind project.

Tax Credits, Benefits and Expenses
PTCs from wind projects and ITCs and deferred income tax benefits associated with convertible ITCs from solar and certain wind projects are reflected in NEER's earnings. PTCs are recognized as wind energy is generated and sold based on a per kWh rate prescribed in applicable federal and state statutes. A portion of the PTCs have been allocated to investors in connection with sales of differential membership interests. Also see Summary above and Note 4 for a discussion of PTCs, ITCs and deferred income tax benefits associated with convertible ITCs, as well as benefits associated with differential membership interests - net above.

Capital Initiatives

During the nine months ended September 30, 2015, NEER placed into service approximately 126 MW of new Canadian wind generation, 99 MW of new U.S. wind generation and 115 MW of U.S. solar generation. For the period 2015 through 2018, NEER expects to invest capital of approximately $13.7 billion to $15.1 billion primarily for new wind projects with generation totaling at least 3,000 MW to 3,300 MW (including approximately 225 MW added to date) and new solar projects with generation totaling 1,800 MW to 1,900 MW (including 115 MW added to date), as well as natural gas infrastructure investments, nuclear fuel and maintenance of existing assets, excluding the NEP pipeline acquisition discussed below.

Sale of Assets to NEP

In January 2015 and February 2015, indirect subsidiaries of NEER sold a 250 MW wind facility located in Texas and an approximately 20 MW solar facility located in California, respectively, to indirect subsidiaries of NEP.

In May 2015, an indirect subsidiary of NEER sold four wind generating facilities with contracted generating capacity totaling approximately 664 MW located in North Dakota, Oklahoma, Washington and Oregon to an indirect subsidiary of NEP.

In October 2015, an indirect subsidiary of NEER sold a 149 MW wind generating facility located in Ontario, Canada to an indirect subsidiary of NEP.

NEP Pipeline Acquisition

See Note 8 - Contracts regarding NEP's acquisition of 100% of the membership interests in NET Midstream, a developer, owner and operator of a portfolio of seven long-term contracted natural gas pipeline assets located in Texas.

Corporate and Other: Results of Operations

Corporate and Other is primarily comprised of the operating results of NEET, FPL FiberNet and other business activities, as well as corporate interest income and expenses. Corporate and Other allocates a portion of NEECH's corporate interest expense and shared service costs to NEER. Interest expense is allocated based on a deemed capital structure of 70% debt and, for purposes of allocating NEECH's corporate interest expense, the deferred credit associated with differential membership interests sold by NEER's subsidiaries is included with debt. Each subsidiary's income taxes are calculated based on the "separate return method," except that tax benefits that could not be used on a separate return basis, but are used on the consolidated tax return, are recorded by the subsidiary that generated the tax benefits. Any remaining consolidated income tax benefits or expenses are recorded at Corporate and Other. The major components of Corporate and Other's results, on an after-tax basis, are as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	**2015**	2014
		(millions)		
Interest expense, net of allocations to NEER	**$ (21)**	$ (23)	**$ (65)**	$ (74)
Interest income	**8**	8	**24**	24
Federal and state income tax benefits (expenses)	**17**	(1)	**32**	(2)
Merger-related expenses	**(5)**	—	**(16)**	—
Other - net	**16**	10	**60**	31
Net income (loss)	**$ 15**	$ (6)	**$ 35**	$ (21)

The decrease in interest expense, net of allocations to NEER, for the nine months ended September 30, 2015 reflects lower average debt balances due in part to a higher allocation of interest costs to NEER reflecting growth in NEER's business. The federal and state income tax benefits for both periods presented reflect consolidating income tax adjustments and, also for the nine months ended September 30, 2015, favorable changes in state income tax laws. Other includes all other corporate income and expenses, as well as other business activities. The increase in other - net for the three and nine months ended September 30, 2015 primarily reflects 2015 investment gains compared to 2014 investment losses and, also for the nine months ended September 30, 2015, the absence of debt reacquisition losses recorded in 2014, the pretax amount of which is reflected in other - net in NEE's condensed consolidated statements of income.

Capital Initiatives

For the period 2015 through 2018, businesses within Corporate and Other expect to invest capital of approximately $2.9 billion to $3.1 billion primarily for infrastructure projects through investments in natural gas pipelines and transmission facilities.

LIQUIDITY AND CAPITAL RESOURCES

NEE and its subsidiaries, including FPL, require funds to support and grow their businesses. These funds are used for, among other things, working capital, capital expenditures, investments in or acquisitions of assets and businesses, payment of maturing debt obligations and, from time to time, redemption or repurchase of outstanding debt or equity securities. It is anticipated that these requirements will be satisfied through a combination of cash flows from operations, short- and long-term borrowings, the issuance, from time to time, of short- and long-term debt and equity securities and proceeds from the sale of differential membership interests, consistent with NEE's and FPL's objective of maintaining, on a long-term basis, a capital structure that will support a strong investment grade credit rating. NEE, FPL and NEECH rely on access to credit and capital markets as significant sources of liquidity for capital requirements and other operations that are not satisfied by operating cash flows. The inability of NEE, FPL and NEECH to maintain their current credit ratings could affect their ability to raise short- and long-term capital, their cost of capital and the execution of their respective financing strategies, and could require the posting of additional collateral under certain agreements.

In October 2015, NEE authorized a program to purchase, from time to time, up to $150 million of common units representing limited partner interests of NEP. Under the program, any purchases may be made in amounts, at prices and at such times as NEE or its subsidiaries deem appropriate, all subject to market conditions and other considerations. The purchases may be made in the open market or in privately negotiated transactions. Any purchases will be made in such quantities, at such prices, in such manner and on such terms and conditions as determined by NEE or its subsidiaries in their discretion, based on factors such as market and business conditions, applicable legal requirements and other factors. The common unit purchase program does not require NEE to acquire any specific number of common units and may be modified or terminated by NEE at any time. NEE owns and controls the general partner of NEP and beneficially owns 77.4% of NEP's voting power at September 30, 2015. The purpose of the program is not to cause NEP's common units to be delisted from the New York Stock Exchange or to cause the common units to be deregistered with the SEC. Also in October 2015, NEP announced that it plans to put in place an at-the-market equity issuance program pursuant to which NEP may issue from time to time, up to $150 million of its common units.

Cash Flows

Sources and uses of NEE's and FPL's cash for the nine months ended September 30, 2015 and 2014 were as follows:

	NEE		FPL	
	Nine Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
	(millions)			
Sources of cash:				
Cash flows from operating activities	$ 4,513	$ 3,968	$ 2,668	$ 2,869
Long-term borrowings	3,462	4,244	85	998
Sale of independent power and other investments of NEER	34	307	—	—
Capital contribution from NEE	—	—	1,454	100

Total uses of cash	(10,025)	(9,819)	(4,200)	(4,069)
Net increase (decrease) in cash and cash equivalents	$ 604	$ 47	$ 16	$ 10

See Note 8 - Contracts regarding FPL's assumed ownership of a 250 MW coal-fired generation facility and termination of its long-term purchased power agreement.

For significant transactions that occurred in October 2015, see Note 7 regarding financing activity and Note 8 - Contracts regarding the acquisition of NET Midstream.

NEE's primary capital requirements are for expanding and enhancing FPL's electric system and generating facilities to continue to provide reliable service to meet customer electricity demands and for funding NEER's investments in independent power and other projects. The following table provides a summary of the major capital investments for the nine months ended September 30, 2015 and 2014.

	Nine Months Ended September 30,	
	2015	2014
	(millions)	
FPL:		
Generation:		
New	$ 540	$ 575
Existing	500	676
Transmission and distribution	1,151	860
Nuclear fuel	178	129
General and other	248	96
Other, primarily change in accrued property additions and the exclusion of AFUDC - equity	1	28
Total	2,618	2,364
NEER:		
Wind	923	1,496
Solar	1,112	369
Nuclear, including nuclear fuel	233	203
Other	557	511
Total	2,825	2,579
Corporate and Other	233	115
Total capital expenditures, independent power and other investments and nuclear fuel purchases	$ 5,676	$ 5,058

Liquidity

At September 30, 2015, NEE's total net available liquidity was approximately $7.1 billion, of which FPL's portion was approximately $3.0 billion. The table below provides the components of FPL's and NEECH's net available liquidity at September 30, 2015:

	FPL	NEECH	Total	Maturity Date FPL	Maturity Date NEECH
		(millions)			
Bank revolving line of credit facilities[a]	$ 3,000	$ 4,850	$ 7,850	[b]	[b]
Less letters of credit	(3)	(361)	(364)		
	2,997	4,489	7,486		
Revolving credit facilities	200	35	235	2018	2020
Less borrowings	—	—	—		
	200	35	235		
Letter of credit facilities[c]	—	650	650		2017
Less letters of credit	—	(296)	(296)		
	—	354	354		
Subtotal	3,197	4,878	8,075		
Cash and cash equivalents	30	1,149	1,179		
Less commercial paper and notes payable	(246)	(1,917)	(2,163)		
Net available liquidity	$ 2,981	$ 4,110	$ 7,091		

(a) Provide for the funding of loans up to $7,850 million ($3,000 million for FPL) and the issuance of letters of credit up to $6,600 million ($2,500 million for FPL). The entire amount of the credit facilities is available for general corporate purposes and to provide additional liquidity in the event of a loss to the companies' or their subsidiaries' operating facilities (including, in the case of FPL, a transmission and distribution property loss). FPL's bank revolving line of credit facilities are also available to support the purchase of $718 million of pollution control, solid waste disposal and industrial development revenue bonds (tax exempt bonds) in the event they are tendered by individual bond holders and not remarketed prior to maturity.
(b) $500 million of FPL's and $750 million of NEECH's bank revolving line of credit facilities expire in 2016; essentially all of the remaining facilities at each of FPL and NEECH expire in 2020.
(c) Only available for the issuance of letters of credit.

Additionally, at September 30, 2015, certain subsidiaries of NEER and NEP had credit or loan facilities with available liquidity as set forth in the table below. In order for the applicable borrower to borrow or to have letters of credit issued under the terms of the agreements for the NEER facilities listed below, among other things, NEE is required to maintain a ratio of funded debt to total capitalization that does not exceed a stated ratio. These NEER agreements also generally contain covenants and default and related acceleration provisions relating to, among other things, failure of NEE to maintain a ratio of funded debt to total capitalization at or below the specified ratio. Some of the payment obligations of the borrowers under the NEER agreements listed below ultimately are guaranteed by NEE.

	Amount	Amount Remaining Available at September 30, 2015	Rate	Maturity Date	Related Project Use
		(millions)			
NEER:					
Canadian revolving credit facilities[a]	C$1,000	$232	Variable	Various	Canadian renewable generating assets
Limited-recourse construction and term loan facility	$425	$221	Variable	2035	Construction and development of a 250 MW solar PV project in California
Limited-recourse construction and term loan facility	$619	$258	Variable	2035	Construction and development of a 250 MW solar PV project in Nevada
Cash grant bridge loan facilities	$250	$250	Variable	2018	Construction and development of a 250 MW solar PV project in Nevada
NEP:					
Senior secured revolving credit facility[b]	$250	$221	Variable	2019	Working capital, expansion projects, acquisitions and general business purposes

(a) Available for general corporate purposes; the current intent is to use these facilities for the purchase, development, construction and/or operation of Canadian renewable generating assets. Consist of four credit facilities with expiration dates ranging from February 2016 to December 2016.
(b) NEP OpCo and one of its direct subsidiaries are required to comply with certain financial covenants on a quarterly basis and NEP OpCo's ability to pay cash distributions is subject to certain other restrictions. The revolving credit facility includes borrowing capacity for letters of credit and incremental commitments to increase the revolving credit facility up to $1 billion in the aggregate. Borrowings under the revolving credit facility are guaranteed by NEP OpCo and NEP.

Capital Support

Letters of Credit, Surety Bonds and Guarantees
Certain subsidiaries of NEE, including FPL, obtain letters of credit and surety bonds and issue guarantees to facilitate commercial transactions with third parties and financings. Letters of credit, surety bonds and guarantees support, among other things, the buying and selling of wholesale energy commodities, debt and related reserves, capital expenditures for NEER's wind and solar development, nuclear activities and other contractual agreements. Substantially all of NEE's and FPL's guarantee arrangements are on behalf of their consolidated subsidiaries for their related payment obligations.

In addition, as part of contract negotiations in the normal course of business, NEE and certain of its subsidiaries, including FPL, may agree to make payments to compensate or indemnify other parties for possible future unfavorable financial consequences resulting from specified events. The specified events may include, but are not limited to, an adverse judgment in a lawsuit, the imposition of additional taxes due to a change in tax law or interpretations of the tax law or the non-receipt of renewable tax credits or proceeds from cash grants under the Recovery Act. NEE and FPL are unable to develop an estimate of the maximum potential amount of future payments under some of these contracts because events that would obligate them to make payments have not yet occurred or, if any such event has occurred, they have not been notified of its occurrence.

In addition, NEE has guaranteed certain payment obligations of NEECH, including most of its debt and all of its debentures and commercial paper issuances, as well as most of its payment guarantees and indemnifications, and NEECH has guaranteed certain debt and other obligations of NEER and its subsidiaries.

At September 30, 2015, NEE had approximately $839 million of standby letters of credit ($3 million for FPL), $282 million of surety bonds ($61 million for FPL) and $11.7 billion notional amount of guarantees and indemnifications ($22 million for FPL), of which $6.8 billion of letters of credit, guarantees and indemnifications ($10 million for FPL) have expiration dates within the next five years.

Each of NEE and FPL believe it is unlikely that it would be required to make any payments under these letters of credit, surety bonds, guarantees and indemnifications. At September 30, 2015, NEE and FPL did not have any significant liabilities recorded for these letters of credit, surety bonds, guarantees and indemnifications.

Shelf Registration
In July 2015, NEE, NEECH and FPL filed a shelf registration statement with the SEC for an unspecified amount of securities which became effective upon filing. The amount of securities issuable by the companies is established from time to time by their respective boards of directors. As of October 29, 2015, securities that may be issued under the registration statement include, depending on the registrant, senior debt securities, subordinated debt securities, junior subordinated debentures, first mortgage bonds, common stock, preferred stock, stock purchase contracts, stock purchase units, warrants and guarantees related to certain of those securities. As of October 29, 2015, the board-authorized capacity available to issue securities was approximately $4.8 billion for NEE and NEECH (issuable by either or both of them up to such aggregate amount) and $2.5 billion for FPL.

New Accounting Rules and Interpretations

Amendments to the Consolidation Analysis - In February 2015, the FASB issued a new accounting standard that will modify current consolidation guidance. See Note 5 - Amendments to the Consolidation Analysis.

Presentation of Debt Issuance Costs - In April 2015, the FASB issued a new accounting standard which changes the presentation of debt issuance costs in financial statements. See Note 7 - Presentation of Debt Issuance Costs.

Revenue Recognition - In July 2015, the FASB approved the deferral of the effective date of the new accounting standard related to the recognition of revenue from contracts with customers and required disclosures. See Note 9 - Revenue Recognition.

ENERGY MARKETING AND TRADING AND MARKET RISK SENSITIVITY

NEE and FPL are exposed to risks associated with adverse changes in commodity prices, interest rates and equity prices. Financial instruments and positions affecting the financial statements of NEE and FPL described below are held primarily for purposes other than trading. Market risk is measured as the potential loss in fair value resulting from hypothetical reasonably possible changes in commodity prices, interest rates or equity prices over the next year. Management has established risk management policies to monitor and manage such market risks, as well as credit risks.

Commodity Price Risk

NEE and FPL use derivative instruments (primarily swaps, options, futures and forwards) to manage the commodity price risk inherent in the purchase and sale of fuel and electricity. In addition, NEE, through NEER, uses derivatives to optimize the value of its power generation and gas infrastructure assets and engages in power and gas marketing and trading activities to take advantage of expected future favorable price movements. See Note 2.

The changes in the fair value of NEE's consolidated subsidiaries' energy contract derivative instruments for the three and nine months ended September 30, 2015 were as follows:

	Trading	Hedges on Owned Assets: Non-Qualifying	Hedges on Owned Assets: FPL Cost Recovery Clauses	NEE Total
		(millions)		
Three months ended September 30, 2015				
Fair value of contracts outstanding at June 30, 2015	$ 330	$ 984	$ (218)	$ 1,096
Reclassification to realized at settlement of contracts	(53)	(76)	129	—
Inception value of new contracts	15	(1)	—	14
Net option premium purchases (issuances)	(3)	—	—	(3)
Changes in fair value excluding reclassification to realized	41	355	(141)	255
Fair value of contracts outstanding at September 30, 2015	330	1,262	(230)	1,362
Net margin cash collateral paid (received)				(325)
Total mark-to-market energy contract net assets (liabilities) at September 30, 2015	$ 330	$ 1,262	$ (230)	$ 1,037

	Trading	Hedges on Owned Assets: Non-Qualifying	Hedges on Owned Assets: FPL Cost Recovery Clauses	NEE Total
		(millions)		
Nine months ended September 30, 2015				
Fair value of contracts outstanding at December 31, 2014	$ 320	$ 898	$ (363)	$ 855
Reclassification to realized at settlement of contracts	(158)	(243)	337	(64)
Inception value of new contracts	34	—	—	34
Net option premium purchases (issuances)	(75)	2	—	(73)
Changes in fair value excluding reclassification to realized	209	605	(204)	610
Fair value of contracts outstanding at September 30, 2015	330	1,262	(230)	1,362
Net margin cash collateral paid (received)				(325)
Total mark-to-market energy contract net assets (liabilities) at September 30, 2015	$ 330	$ 1,262	$ (230)	$ 1,037

NEE's total mark-to-market energy contract net assets (liabilities) at September 30, 2015 shown above are included on the condensed consolidated balance sheets as follows:

	September 30, 2015
	(millions)
Current derivative assets	$ 625
Noncurrent derivative assets	1,278
Current derivative liabilities	(535)
Noncurrent derivative liabilities	(331)
NEE's total mark-to-market energy contract net assets	$ 1,037

The sources of fair value estimates and maturity of energy contract derivative instruments at September 30, 2015 were as follows:

	Maturity						
	2015	2016	2017	2018	2019	Thereafter	Total
	(millions)						
Trading:							
Quoted prices in active markets for identical assets	$ (23)	$ 10	$ 17	$ 9	$ 5	$ —	$ 18
Significant other observable inputs	31	21	12	14	(1)	(5)	72
Significant unobservable inputs	63	87	68	3	9	10	240
Total	71	118	97	26	13	5	330
Owned Assets - Non-Qualifying:							
Quoted prices in active markets for identical assets	12	(7)	—	2	—	—	7
Significant other observable inputs	49	283	182	109	83	130	836
Significant unobservable inputs	20	49	40	38	32	240	419
Total	81	325	222	149	115	370	1,262
Owned Assets - FPL Cost Recovery Clauses:							
Quoted prices in active markets for identical assets	—	—	—	—	—	—	—
Significant other observable inputs	(124)	(108)	—	—	—	—	(232)
Significant unobservable inputs	2	—	—	—	—	—	2
Total	(122)	(108)	—	—	—	—	(230)
Total sources of fair value	$ 30	$ 335	$ 319	$ 175	$ 128	$ 375	$ 1,362

The changes in the fair value of NEE's consolidated subsidiaries' energy contract derivative instruments for the three and nine months ended September 30, 2014 were as follows:

		Hedges on Owned Assets		
	Trading	Non-Qualifying	FPL Cost Recovery Clauses	NEE Total
		(millions)		
Three months ended September 30, 2014				
Fair value of contracts outstanding at June 30, 2014	$ 295	$ 193	$ 72	$ 560
Reclassification to realized at settlement of contracts	(21)	(2)	(5)	(28)
Net option premium purchases (issuances)	3	—	—	3
Changes in fair value excluding reclassification to realized	56	(11)	(112)	(67)
Fair value of contracts outstanding at September 30, 2014	333	180	(45)	468
Net margin cash collateral paid (received)				(124)
Total mark-to-market energy contract net assets (liabilities) at September 30, 2014	$ 333	$ 180	$ (45)	$ 344

		Hedges on Owned Assets		
	Trading	Non-Qualifying	FPL Cost Recovery Clauses	NEE Total
		(millions)		
Nine months ended September 30, 2014				
Fair value of contracts outstanding at December 31, 2013	$ 301	$ 563	$ 46	$ 910
Reclassification to realized at settlement of contracts	15	95	(126)	(16)
Inception value of new contracts	(21)	—	—	(21)
Net option premium purchases (issuances)	(59)	2	—	(57)
Changes in fair value excluding reclassification to realized	97	(480)	35	(348)
Fair value of contracts outstanding at September 30, 2014	333	180	(45)	468
Net margin cash collateral paid (received)				(124)
Total mark-to-market energy contract net assets (liabilities) at September 30, 2014	$ 333	$ 180	$ (45)	$ 344

With respect to commodities, NEE's EMC, which is comprised of certain members of senior management, and NEE's chief executive officer are responsible for the overall approval of market risk management policies and the delegation of approval and authorization

levels. The EMC and NEE's chief executive officer receive periodic updates on market positions and related exposures, credit exposures and overall risk management activities.

NEE uses a value-at-risk (VaR) model to measure commodity price market risk in its trading and mark-to-market portfolios. The VaR is the estimated nominal loss of market value based on a one-day holding period at a 95% confidence level using historical simulation methodology. The VaR figures are as follows:

	Trading			Non-Qualifying Hedges and Hedges in FPL Cost Recovery Clauses[a]			Total		
	FPL	NEER	NEE	FPL	NEER	NEE	FPL	NEER	NEE
					(millions)				
December 31, 2014	$ —	$ 2	$ 2	$ 65	$ 62	$ 24	$ 65	$ 64	$ 24
September 30, 2015	$ —	$ 1	$ 1	$ 26	$ 41	$ 27	$ 26	$ 42	$ 26
Average for the nine months ended September 30, 2015	$ —	$ 1	$ 1	$ 37	$ 35	$ 24	$ 37	$ 36	$ 23

(a) Non-qualifying hedges are employed to reduce the market risk exposure to physical assets or contracts which are not marked to market. The VaR figures for the non-qualifying hedges and hedges in FPL cost recovery clauses category do not represent the economic exposure to commodity price movements.

Interest Rate Risk

NEE's and FPL's financial results are exposed to risk resulting from changes in interest rates as a result of their respective issuances of debt, investments in special use funds and other investments. NEE and FPL manage their respective interest rate exposure by monitoring current interest rates, entering into interest rate contracts and using a combination of fixed rate and variable rate debt. Interest rate contracts are used to mitigate and adjust interest rate exposure when deemed appropriate based upon market conditions or when required by financing agreements.

The following are estimates of the fair value of NEE's and FPL's financial instruments that are exposed to interest rate risk:

	September 30, 2015		December 31, 2014	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
		(millions)		
NEE:				
Fixed income securities:				
Special use funds	$ 1,834	$ 1,834 [a]	$ 1,965	$ 1,965 [a]
Other investments:				
Debt securities	$ 135	$ 135 [a]	$ 124	$ 124 [a]
Primarily notes receivable	$ 524	$ 662 [b]	$ 525	$ 679 [b]
Long-term debt, including current maturities	$ 28,096	$ 29,545 [c]	$ 27,876	$ 30,337 [c]
Interest rate contracts - net unrealized losses	$ (285)	$ (285) [d]	$ (216)	$ (216) [d]
FPL:				
Fixed income securities - special use funds	$ 1,413	$ 1,413 [a]	$ 1,568	$ 1,568 [a]
Long-term debt, including current maturities	$ 9,099	$ 10,248 [c]	$ 9,473	$ 11,105 [c]

(a) Primarily estimated using quoted market prices for these or similar issues.
(b) Primarily estimated using a discounted cash flow valuation technique based on certain observable yield curves and indices considering the credit profile of the borrower.
(c) Estimated using either quoted market prices for the same or similar issues or discounted cash flow valuation technique, considering the current credit spread of the debtor.
(d) Modeled internally using discounted cash flow valuation technique and applying a credit valuation adjustment.

The special use funds of NEE and FPL consist of restricted funds set aside to cover the cost of storm damage for FPL and for the decommissioning of NEE's and FPL's nuclear power plants. A portion of these funds is invested in fixed income debt securities primarily carried at estimated fair value. At FPL, changes in fair value, including any OTTI losses, result in a corresponding adjustment to the related liability accounts based on current regulatory treatment. The changes in fair value of NEE's non-rate regulated operations result in a corresponding adjustment to OCI, except for impairments deemed to be other than temporary, including any credit losses, which are reported in current period earnings. Because the funds set aside by FPL for storm damage could be needed at any time, the related investments are generally more liquid and, therefore, are less sensitive to changes in interest rates. The nuclear decommissioning funds, in contrast, are generally invested in longer-term securities, as decommissioning activities are not scheduled to begin until at least 2030 (2032 at FPL).

As of September 30, 2015, NEE had interest rate contracts with a notional amount of approximately $8.1 billion related to long-term debt issuances, of which $2.0 billion are fair value hedges at NEECH that effectively convert fixed-rate debt to a variable-rate debt instrument. The remaining $6.1 billion of notional amount of interest rate contracts relate to cash flow hedges to manage exposure to the variability of cash flows associated with variable-rate debt instruments, which primarily relate to NEER debt issuances. At September 30, 2015, the estimated fair value of NEE's fair value hedges and cash flow hedges was approximately $52 million and $(337) million, respectively. See Note 2.

Based upon a hypothetical 10% decrease in interest rates, which is a reasonable near-term market change, the net fair value of NEE's net liabilities would increase by approximately $968 million ($477 million for FPL) at September 30, 2015.

Equity Price Risk

NEE and FPL are exposed to risk resulting from changes in prices for equity securities. For example, NEE's nuclear decommissioning reserve funds include marketable equity securities primarily carried at their market value of approximately $2,531 million and $2,634 million ($1,508 million and $1,561 million for FPL) at September 30, 2015 and December 31, 2014, respectively. At September 30, 2015, a hypothetical 10% decrease in the prices quoted on stock exchanges, which is a reasonable near-term market change, would result in a $233 million ($138 million for FPL) reduction in fair value. For FPL, a corresponding adjustment would be made to the related liability accounts based on current regulatory treatment, and for NEE's non-rate regulated operations, a corresponding adjustment would be made to OCI to the extent the market value of the securities exceeded amortized cost and to OTTI loss to the extent the market value is below amortized cost.

Credit Risk

NEE and its subsidiaries are also exposed to credit risk through their energy marketing and trading operations. Credit risk is the risk that a financial loss will be incurred if a counterparty to a transaction does not fulfill its financial obligation. NEE manages counterparty credit risk for its subsidiaries with energy marketing and trading operations through established policies, including counterparty credit limits, and in some cases credit enhancements, such as cash prepayments, letters of credit, cash and other collateral and guarantees.

Credit risk is also managed through the use of master netting agreements. NEE's credit department monitors current and forward credit exposure to counterparties and their affiliates, both on an individual and an aggregate basis. For all derivative and contractual transactions, NEE's energy marketing and trading operations, which include FPL's energy marketing and trading division, are exposed to losses in the event of nonperformance by counterparties to these transactions. Some relevant considerations when assessing NEE's energy marketing and trading operations' credit risk exposure include the following:

- Operations are primarily concentrated in the energy industry.
- Trade receivables and other financial instruments are predominately with energy, utility and financial services related companies, as well as municipalities, cooperatives and other trading companies in the U.S.
- Overall credit risk is managed through established credit policies and is overseen by the EMC.
- Prospective and existing customers are reviewed for creditworthiness based upon established standards, with customers not meeting minimum standards providing various credit enhancements or secured payment terms, such as letters of credit or the posting of margin cash collateral.
- Master netting agreements are used to offset cash and non-cash gains and losses arising from derivative instruments with the same counterparty. NEE's policy is to have master netting agreements in place with significant counterparties.

Based on NEE's policies and risk exposures related to credit, NEE and FPL do not anticipate a material adverse effect on their financial statements as a result of counterparty nonperformance. As of September 30, 2015, approximately 94% of NEE's and 100% of FPL's energy marketing and trading counterparty credit risk exposure is associated with companies that have investment grade credit ratings.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

See Management's Discussion - Energy Marketing and Trading and Market Risk Sensitivity.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

As of September 30, 2015, each of NEE and FPL had performed an evaluation, under the supervision and with the participation of its management, including NEE's and FPL's chief executive officer and chief financial officer, of the effectiveness of the design and operation of each company's disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 Rules 13a-15(e) and 15d-15(e)). Based upon that evaluation, the chief executive officer and the chief financial officer of each of NEE and FPL concluded that the company's disclosure controls and procedures were effective as of September 30, 2015.

(b) Changes in Internal Control Over Financial Reporting

NEE and FPL are continuously seeking to improve the efficiency and effectiveness of their operations and of their internal controls. This results in refinements to processes throughout NEE and FPL. However, there has been no change in NEE's or FPL's internal control over financial reporting (as defined in the Securities Exchange Act of 1934 Rules 13a-15(f) and 15d-15(f)) that occurred during NEE's and FPL's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, NEE's or FPL's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

NEE and FPL are parties to various legal and regulatory proceedings in the ordinary course of their respective businesses. For information regarding legal proceedings that could have a material effect on NEE or FPL, see Item 3. Legal Proceedings and Note 13 - Legal Proceedings to Consolidated Financial Statements in the 2014 Form 10-K and Note 8 - Legal Proceedings herein. Such descriptions are incorporated herein by reference.

Item 1A. Risk Factors

There have been no material changes from the risk factors disclosed in the June 2015 Form 10-Q and 2014 Form 10-K. The factors discussed in Part II, Item 1A. Risk Factors in the June 2015 Form 10-Q and in Part I, Item 1A. Risk Factors in the 2014 Form 10-K, as well as other information set forth in this report, which could materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects should be carefully considered. The risks described above and in the June 2015 Form 10-Q and 2014 Form 10-K are not the only risks facing NEE and FPL. Additional risks and uncertainties not currently known to NEE or FPL, or that are currently deemed to be immaterial, also may materially adversely affect NEE's or FPL's business, financial condition, results of operations and prospects.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(c) Information regarding purchases made by NEE of its common stock during the three months ended September 30, 2015 is as follows:

Period	Total Number of Shares Purchased[a]	Average Price Paid Per Share	Total Number of Shares Purchased as Part of a Publicly Announced Program	Maximum Number of Shares that May Yet be Purchased Under the Program[b]
7/1/15 - 7/31/15	—	$ —	—	13,274,748
8/1/15 - 8/31/15	3,717	$ 109.04	—	13,274,748
9/1/15 - 9/30/15	528	$ 95.81	—	13,274,748
Total	4,245	$ 107.39	—	

(a) Includes: (1) in August 2015, shares of common stock withheld from employees to pay certain withholding taxes upon the vesting of stock awards granted to such employees under the NextEra Energy, Inc. Amended and Restated 2011 Long Term Incentive Plan; and (2) in September 2015, shares of common stock purchased as a reinvestment of dividends by the trustee of a grantor trust in connection with NEE's obligation under a February 2006 grant under the NextEra Energy, Inc. Amended and Restated Long-Term Incentive Plan (former LTIP) to an executive officer of deferred retirement share awards.

(b) In February 2005, NEE's Board of Directors authorized common stock repurchases of up to 20 million shares of common stock over an unspecified period, which authorization was most recently reaffirmed and ratified by the Board of Directors in July 2011.

Item 5. Other Information

(a) None

(b) None

(c) Other events

(i) Reference is made to Item 1. Business - NEE's Operating Subsidiaries - FPL - FPL System Capability and Load in the 2014 Form 10-K.

In September 2015, FPL filed a petition with the FPSC for approval to build a new approximately 1,600 MW natural gas-fired combined-cycle unit in Okeechobee County, Florida with a planned in-service date of June 2019. This new unit is also subject to approval by the Siting Board (comprised of the governor and cabinet) under the Florida Electrical Power Plant Siting Act. Several parties, including the Office of Public Counsel, have intervened in the FPSC approval process. An FPSC decision is expected in January 2016 and Siting Board approval is expected by the end of 2016.

(ii) Reference is made to Item 1. Business - NEE Environmental Matters - Regulation of GHG Emissions in the 2014 Form 10-K.

In October 2015, the EPA's final rule for new fossil fuel-fired electric generating units regulated under Section 111(b) of the Clean Air Act became effective, which is not expected to have an impact on NEE or FPL. Also in October 2015, the EPA published a final rule under Section 111(d) of the Clean Air Act (Clean Power Plan) to reduce carbon emissions from existing fossil fuel-fired electric generating units which will become effective in December 2015. The Clean Power Plan sets emission rate targets for each state and requires each state to develop a compliance plan by the fall of 2016 to meet these emissions targets. The Clean Power Plan indicates that compliance will start in 2022 with both interim and final target dates, each with specific emissions reductions. NEE and FPL are analyzing the Clean Power Plan and the impact of any final compliance obligations cannot be determined until the state plans have been finalized. Numerous parties have challenged the Clean Power Plan.

(iii) Reference is made to Item 1. Business - NEE Environmental Matters - Waters of the U.S. in the 2014 Form 10-K and Part II, Item 5. (c)(iv) in the June 2015 Form 10-Q.

In October 2015, the U.S. Court of Appeals for the Sixth Circuit issued a stay of the EPA's final rule redefining "waters of the U.S." under the Clean Water Act pending further court proceedings to address which court has jurisdiction as well as challenges to the rule.

Item 6. Exhibits

Exhibit Number	Description	NEE	FPL
*4(a)	Officer's Certificate of NextEra Energy Capital Holdings, Inc., dated September 11, 2012, creating the Series F Debentures due September 1, 2017 (filed as Exhibit 4(c) to Form 8-K dated September 11, 2012, File No. 1-8841)	x	
*4(b)	Letter, dated August 10, 2015, from NextEra Energy Capital Holdings, Inc. to The Bank of New York Mellon, as trustee, setting forth certain terms of the Series F Debentures due September 1, 2017 effective August 10, 2015 (filed as Exhibit 4(b) to Form 8-K dated August 10, 2015, File No. 1-8841)	x

NEXTERA ENERGY CAPITAL HOLDINGS, INC.

OFFICER'S CERTIFICATE

Creating the 2.80% Debentures, Series due August 27, 2020

Aldo Portales, Assistant Treasurer of NextEra Energy Capital Holdings, Inc. (the "**Company**"), pursuant to the authority granted in the accompanying Board Resolutions (all capitalized terms used herein which are not defined herein or in *Exhibit A* hereto, but which are defined in the Indenture referred to below, shall have the meanings specified in the Indenture), and pursuant to Sections 201 and 301 of the Indenture, does hereby certify to The Bank of New York Mellon (the "**Trustee**"), as Trustee under the Indenture (For Unsecured Debt Securities) dated as of June 1, 1999 between the Company and the Trustee, as amended (the "**Indenture**"), that:

1. The securities to be issued under the Indenture in accordance with this certificate shall be designated "2.80% Debentures, Series due August 27, 2020" (referred to herein as the "**Debentures of the Twenty-Eighth Series**") and shall be issued in substantially the form set forth in *Exhibit A* hereto.

2. The Debentures of the Twenty-Eighth Series shall be issued by the Company in the initial aggregate principal amount of $300,000,000. Additional Debentures of the Twenty-Eighth Series, without limitation as to amount, having substantially the same terms as the Outstanding Debentures of the Twenty-Eighth Series (except for the payment of interest accruing prior to the issue date of the additional Debentures of the Twenty-Eighth Series or except for the first payment of interest following the issue date of the additional Debentures of the Twenty-Eighth Series) may also be issued by the Company pursuant to the Indenture without the consent of the Holders of the then-Outstanding Debentures of the Twenty-Eighth Series. Any such additional Debentures of the Twenty-Eighth Series as may be issued pursuant to the Indenture from time to time shall be part of the same series as the then-Outstanding Debentures of the Twenty-Eighth Series.

3. The Debentures of the Twenty-Eighth Series shall mature and the principal shall be due and payable, together with all accrued and unpaid interest thereon, on the Stated Maturity Date. The "Stated Maturity Date" means August 27, 2020.

4. The Debentures of the Twenty-Eighth Series shall bear interest as provided in the form thereof set forth as *Exhibit A* hereto.

5. Each installment of interest on a Debenture of the Twenty-Eighth Series shall be payable as provided in the form thereof set forth as *Exhibit A* hereto.

6. Registration of the Debentures of the Twenty-Eighth Series, and registration of transfers and exchanges in respect of the Debentures of the Twenty-Eighth Series, may be effectuated at the office or agency of the Company in New York City, New York. Notices and demands to or upon the Company in respect of the Debentures of the Twenty-Eighth Series may be served at the office or agency of the Company in New York City, New York. The Corporate Trust Office of the Trustee will initially be the agency of the Company for such payment, registration, registration of

transfers and exchanges and service of notices and demands, and the Company hereby appoints the Trustee as its agent for all such purposes; *provided, however*, that the Company reserves the right to change, by one or more Officer's Certificates, any such office or agency and such agent. The Trustee will initially be the Security Registrar and the Paying Agent for the Debentures of the Twenty-Eighth Series.

7. The Debentures of the Twenty-Eighth Series will be redeemable at the option of the Company prior to the Stated Maturity Date as provided in the form thereof set forth in *Exhibit A* hereto.

8. So long as all of the Debentures of the Twenty-Eighth Series are held by a securities depository in book-entry form, the Regular Record Date for the interest payable on any given Interest Payment Date with respect to the Debentures of the Twenty-Eighth Series shall be the close of business on the Business Day immediately preceding such Interest Payment Date; *provided, however*, that if any of the Debentures of the Twenty-Eighth Series are not held by a securities depository in book-entry form, the Regular Record Date will be the close of business on the fifteenth (15th) calendar day next preceding such Interest Payment Date.

9. If the Company shall make any deposit of money and/or Eligible Obligations with respect to any Debentures of the Twenty-Eighth Series, or any portion of the principal amount thereof, as contemplated by Section 701 of the Indenture, the Company shall not deliver an Officer's Certificate described in clause (z) in the first paragraph of said Section 701 unless the Company shall also deliver to the Trustee, together with such Officer's Certificate, either:

(A) an instrument wherein the Company, notwithstanding the satisfaction and discharge of its indebtedness in respect of the Debentures of the Twenty-Eighth Series, shall assume the obligation (which shall be absolute and unconditional) to irrevocably deposit with the Trustee or Paying Agent such additional sums of money, if any, or additional Eligible Obligations (meeting the requirements of said Section 701), if any, or any combination thereof, at such time or times, as shall be necessary, together with the money and/or Eligible Obligations theretofore so deposited, to pay when due the principal of and premium, if any, and interest due and to become due on such Debentures of the Twenty-Eighth Series or portions thereof, all in accordance with and subject to the provisions of said Section 701; *provided, however*, that such instrument may state that the obligation of the Company to make additional deposits as aforesaid shall be subject to the delivery to the Company by the Trustee of a notice asserting the deficiency accompanied by an opinion of an independent public accountant of nationally recognized standing, selected by the Trustee, showing the calculation thereof; or

(B) an Opinion of Counsel to the effect that, as a result of (i) the receipt by the Company from, or the publication by, the Internal Revenue Service of a ruling or (ii) a change in law occurring after the date of this certificate, the Holders of such Debentures of the Twenty-Eighth Series, or the applicable portion of the principal amount thereof, will not recognize income, gain or loss for United States federal income tax purposes as a result of the satisfaction and discharge of the Company's indebtedness in respect thereof and will be subject to United States federal income tax on the same amounts, at the same times and in the same manner as if such satisfaction and discharge had not been effectuated.

10. The Debentures of the Twenty-Eighth Series will be absolutely, irrevocably and unconditionally guaranteed as to payment of principal, interest and premium, if any, by NextEra Energy, Inc., as Guarantor (the "**Guarantor**"), pursuant to a Guarantee Agreement, dated as of June 1, 1999, between the Guarantor and The Bank of New York Mellon (as Guarantee Trustee) (the "**Guarantee Agreement**"). The following shall constitute "**Guarantor Events**" with respect to the Debentures of the Twenty-Eighth Series:

(A) the failure of the Guarantee Agreement to be in full force and effect;

(B) the entry by a court having jurisdiction with respect to the Guarantor of (i) a decree or order for relief in respect of the Guarantor in an involuntary case or proceeding under any applicable Federal or State bankruptcy, insolvency or other similar law or (ii) a decree or order adjudging the Guarantor bankrupt or insolvent, or approving as properly filed a petition by one or more entities other than the Guarantor seeking reorganization, arrangement, adjustment or composition of or in respect of the Guarantor under any applicable Federal or State bankruptcy, insolvency or other similar law, or appointing a custodian, receiver, liquidator, assignee, trustee, sequestrator or other similar official for the Guarantor or for any substantial part of its property, or ordering the winding up or liquidation of its affairs, and any such decree or order for relief or any such other decree or order shall have remained unstayed and in effect for a period of ninety (90) consecutive days; or

(C) the commencement by the Guarantor of a voluntary case or proceeding under any applicable Federal or State bankruptcy, insolvency or other similar law or of any other case or proceeding seeking for the Guarantor to be adjudicated bankrupt or insolvent, or the consent by the Guarantor to the entry of a decree or order for relief in respect of itself in a case or proceeding under any applicable Federal or State bankruptcy, insolvency or other similar law or to the commencement of any bankruptcy or insolvency case or proceeding against the Guarantor, or the filing by the Guarantor of a petition or answer or consent seeking reorganization or relief under any applicable Federal or State bankruptcy, insolvency or other similar law, or the consent by the Guarantor to the filing of such petition or to the appointment of or taking possession by a custodian, receiver, liquidator, assignee, trustee, sequestrator or similar official of the Guarantor or of any substantial part of its property, or the making by the Guarantor of an assignment for the benefit of creditors, or the admission by the Guarantor in writing of its inability to pay its debts generally as they become due, or the authorization of such action by the Board of Directors of the Guarantor.

Notwithstanding anything to the contrary contained in the Debentures of the Twenty-Eighth Series, this certificate or the Indenture, the Company shall, if a Guarantor Event shall occur and be continuing, redeem all of the Outstanding Debentures of the Twenty-Eighth Series within sixty (60) days after the occurrence of such Guarantor Event at a redemption price equal to the principal amount thereof plus accrued and unpaid interest, if any, to but excluding the date of redemption *unless*, within thirty (30) days after the occurrence of such Guarantor Event, Standard & Poor's Ratings Services (a Standard & Poor's Financial Services LLC business) and Moody's Investors Service, Inc. (if the Debentures of the Twenty-Eighth Series are then rated by those rating agencies, or, if the Debentures of the Twenty-Eighth Series are then rated by only one of those rating agencies, then such rating agency, or, if the Debentures of the Twenty-Eighth Series are not then rated by either one of those rating agencies but are then rated by one or more other nationally recognized rating agencies, then at least one of those other nationally recognized rating agencies) shall have reaffirmed in writing that, after giving effect to such Guarantor Event, the credit rating on the Debentures of the Twenty-Eighth Series shall be investment grade (i.e. in one of the four highest categories, without regard to subcategories within such rating categories, of such rating agency).

11. With respect to the Debentures of the Twenty-Eighth Series, each of the following events shall be an additional Event of Default under the Indenture:

(A) the consolidation of the Guarantor with or merger of the Guarantor into any other Person, or the conveyance or other transfer or lease by the Guarantor of its properties and assets substantially as an entirety to any Person, unless

(i) the Person formed by such consolidation or into which the Guarantor is merged or the Person which acquires by conveyance or other transfer, or which leases, the properties and assets of the Guarantor substantially as an entirety shall be a Person organized and existing under the laws of the United States, any State thereof or the District of Columbia, and shall expressly assume the obligations of the Guarantor under the Guarantee Agreement; and

(ii) immediately after giving effect to such transaction, no Event of Default and no event which, after notice or lapse of time or both, would become an Event of Default, shall have occurred and be continuing; and

(B) the failure of the Company to redeem the Outstanding Debentures of the Twenty-Eighth Series if and as required by *paragraph 10* hereof.

12. If a Guarantor Event occurs and the Company is not required to redeem the Debentures of the Twenty-Eighth Series pursuant to *paragraph 10* hereof, the Company will provide to the Trustee and the Holders of the Debentures of the Twenty-Eighth Series annual and quarterly reports containing the information that the Company would be required to file with the Securities and Exchange Commission under Section 13 or Section 15(d) of the Securities Exchange Act of 1934 if it were subject to the reporting requirements of those Sections; *provided*, that if the Company is, at that time, subject to the reporting requirements of those Sections, the filing of annual and quarterly reports with the Securities and Exchange Commission pursuant to those Sections will satisfy the foregoing requirement.

13. The Debentures of the Twenty-Eighth Series will be initially issued in global form (the "**Global Debentures**") registered in the name of Cede & Co., as registered owner and as nominee for The Depository Trust Company ("**DTC**"). The Debentures of the Twenty-Eighth Series will be initially issued pursuant to an exemption or exemptions from the registration requirements of the Securities Act of 1933, as amended (the "**Securities Act**"). Each such Debenture of the Twenty-Eighth Series, whether in a global form or in a certificated form, shall bear the non-registration legend, or the Regulation S legend, as applicable, in substantially the form set forth in *Exhibit A* hereto (including, if applicable, the agreements of each holder of such Debenture of the Twenty-Eighth Series set forth therein). Nothing in the Indenture, the Debentures of the Twenty-Eighth Series or this Certificate shall be construed to require the Company to register any Debentures of the Twenty-Eighth Series under the Securities Act, or to make any transfer of such Debentures of the Twenty-Eighth Series in violation of applicable law.

14. Beneficial interests in the Debentures of the Twenty-Eighth Series offered and sold to qualified institutional buyers (as defined in Rule 144A under the Securities Act ("**Rule 144A**")) in reliance upon Rule 144A will be represented by one or more separate Global Debentures (each, a "**Rule 144A Global Debenture**") registered in the name of Cede & Co., as registered owner and as nominee for DTC and shall include the non-registration legend set forth in *Exhibit A* hereto. Initially, beneficial interests in the Debentures of the Twenty-Eighth Series offered and sold to purchasers pursuant to Regulation S under the Securities Act ("**Regulation S**") will be evidenced by one or more separate Global Debentures (each, a "**Regulation S Global Debenture**") and will be registered in the name of Cede & Co., as registered owner and as nominee for DTC for the accounts of the Euroclear System ("**Euroclear**") or Clearstream Banking, société anonyme ("**Clearstream**"), and shall include the Regulation S legend set forth in *Exhibit A* hereto.

15. Transfers of beneficial interests in a Rule 144A Global Debenture will be subject to the restrictions on transfer contained in the non-registration legend set forth in *Exhibit A* hereto. Prior to the expiration of the period of 40 days beginning on and including the later of (x) the day on which the offering of the Debentures of the Twenty-Eighth Series commences and (y) the original issue date of the Debentures of the Twenty-Eighth Series, transfers of beneficial interests in a Regulation S Global Debenture will be subject to the restrictions on transfer contained in the Regulation S legend set forth in Exhibit A hereto.

16. In connection with any transfer of Debentures of the Twenty-Eighth Series, the Trustee and the Company shall be under no duty to inquire into, may conclusively presume the correctness of, and shall be fully protected in relying upon the certificates of transfer (in substantially the form set forth in Exhibit A hereto for use in connection with the transfer of beneficial interests between a Rule 144A Global Debenture and a Regulation S Global Debenture, or otherwise) received from the Holders and any transferees of any Debentures of the Twenty-Eighth Series regarding the validity, legality and due authorization of any such transfer, the eligibility of the transferee to receive such Debentures and any other facts and circumstances related to such transfer. Transfers of beneficial interests between a Rule 144A Global Debenture and a Regulation S Global Debenture, and other transfers relating to beneficial interests in the Global Debentures, shall be reflected by endorsements of the Trustee, as custodian for DTC, on the schedules attached to such Rule 144A Global Debenture and Regulation S Global Debenture. Neither the Company nor the Trustee shall have any liability for any acts or omissions of any depositary, for any depositary records of beneficial interests, for any transactions between the depositary, any participant member of the depositary and/or beneficial owner of any interest in any Debentures of the Twenty-Eighth Series, for any transfers of beneficial interests in the Debentures of the Twenty-Eighth Series, or in respect of any transfers effected by the depositary or by any participant member of the depositary or any beneficial owner of any interest in any Debentures of the Twenty-Eighth Series held through any such participant member of the depositary.

17. No service charge shall be made for the registration of transfer or exchange of the Debentures of the Twenty-Eighth Series; *provided, however*, that the Company may require payment of a sum sufficient to cover any tax or other governmental charge that may be imposed in connection with such exchange or transfer.

18. The Debentures of the Twenty-Eighth Series shall have such other terms and provisions as are provided in the form thereof set forth in *Exhibit A* hereto.

19. The undersigned has read all of the covenants and conditions contained in the Indenture relating to the issuance of the Debentures of the Twenty-Eighth Series and the definitions in the Indenture relating thereto and in respect of which this certificate is made.

20. The statements contained in this certificate are based upon the familiarity of the undersigned with the Indenture, the documents accompanying this certificate, and upon discussions by the undersigned with officers and employees of the Company familiar with the matters set forth herein.

21. In the opinion of the undersigned, he or she has made such examination or investigation as is necessary to enable him or her to express an informed opinion as to whether or not such covenants and conditions have been complied with.

22. In the opinion of the undersigned, such conditions and covenants and conditions precedent, if any (including any covenants compliance with which constitutes a condition precedent), to the authentication and delivery of the Debentures of the Twenty-Eighth Series requested in the accompanying Company Order No. 29 have been complied with.

IN WITNESS WHEREOF, I have executed this Officer's Certificate on behalf of the Company this 27th day of August, 2015 in New York, New York.

/s/ Aldo Portales

Aldo Portales

Assistant Treasurer

Exhibit A

[depository legend]

[Unless this certificate is presented by an authorized representative of The Depository Trust Company, a limited purpose company organized under the New York Banking Law ("DTC"), to NextEra Energy Capital Holdings, Inc. or its agent for registration of transfer, exchange, or payment, and any certificate issued is registered in the name of Cede & Co. or in such other name as is requested by an authorized representative of DTC (and any payment is made to Cede & Co. or to such other entity as is requested by an authorized representative of DTC), ANY TRANSFER, PLEDGE, OR OTHER USE HEREOF FOR VALUE OR OTHERWISE BY OR TO ANY PERSON IS WRONGFUL inasmuch as the registered owner hereof, Cede & Co., has an interest herein.]

[non-registration legend]

[Neither this Debenture nor any beneficial interest herein has been registered under the Securities Act of 1933, as amended (the "Securities Act"). Each holder hereof, and each owner of a beneficial interest herein, by purchasing this Debenture, agrees for the benefit of NextEra Energy Capital Holdings, Inc. (the "Company") that this Debenture may not be resold, pledged or otherwise transferred prior to the date which is one year (or six months if all applicable conditions to such resale under Rule 144 under the Securities Act (or any successor provision thereof) are satisfied) after the later of the original issuance date thereof, the issuance date of any subsequent issuance of additional Debentures of the same series and the last date on which the Company or any affiliate thereof was the owner of this Debenture or the expiration of such shorter period as may be prescribed by such Rule 144 (or such successor provision) permitting resales of this Debenture without any conditions (the "Resale Restriction Termination Date") other than (A)(1) to the Company, (2) in a transaction entitled to an exemption from registration provided by Rule 144 under the Securities Act, (3) so long as this Debenture is eligible for resale pursuant to Rule 144A under the Securities Act ("Rule 144A"), to a person whom the seller reasonably believes is a Qualified Institutional Buyer within the meaning of Rule 144A purchasing for its own account or for the account of a Qualified Institutional Buyer to whom notice is given that the resale, pledge or other transfer is being made in reliance on Rule 144A under the Securities Act (as indicated by the box checked by the transferor on the certificate of transfer attached to this Debenture), (4) in an offshore transaction in accordance with Rule 903 or 904 of Regulation S under the Securities Act (as indicated by the box checked by the transferor on the certificate of transfer attached to this Debenture, (5) in accordance with another applicable exemption from the registration requirements of the Securities Act (and based upon an opinion of counsel acceptable to the Company), or (6) pursuant to an effective registration statement under the Securities Act and (B) in each case in accordance with any applicable securities laws of any state of the United States. The foregoing restrictions on resale will not apply subsequent to the Resale Restriction Termination Date. The holder hereof, by purchasing this Debenture, represents and agrees for

the benefit of the Company that it is (i) a Qualified Institutional Buyer within the meaning of Rule 144A under the Securities Act or (ii) a non-U.S. person outside the United States within the meaning of, or an account satisfying the requirements of, paragraph (k)(2) of Rule 902 under Regulation S under the Securities Act. The holder of this Debenture acknowledges that the Company reserves the right prior to any offer, sale or other transfer (1) pursuant to clause (A)(2) prior to the Resale Restriction Termination Date to require the delivery of an opinion of counsel, certifications or other information satisfactory to the Company and (2) in each of the foregoing cases, to require that a certificate as to compliance with certain conditions to transfer is completed and delivered by the transferor to the Company.]

[Regulation S legend]

[The Debentures covered hereby have not been registered under the U.S. Securities Act of 1933, as amended (the "Securities Act"), and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons (I) as part of their distribution at any time or (II) otherwise until 40 days after the later of the date of the commencement of the offering of the Securities and the date of original issuance of the Debentures, except in either case in accordance with Regulation S or Rule 144A under the Securities Act or any other available exemption from registration under the Securities Act. Terms used above have the meanings given to them by Regulation S.]

No. _____ **CUSIP No.** _____

[FORM OF FACE OF DEBENTURE]

NEXTERA ENERGY CAPITAL HOLDINGS, INC.

2.80% DEBENTURES, SERIES DUE AUGUST 27, 2020

NextEra Energy Capital Holdings, Inc., a corporation duly organized and existing under the laws of the State of Florida (herein referred to as the "**Company**", which term includes any successor Person under the Indenture (as defined below)), for value received, hereby promises to pay to

, or registered assigns, the principal amount specified on Schedule I hereto on August 27, 2020 (the "**Stated Maturity Date**"). The Company further promises to pay interest on the principal sum of this 2.80% Debenture, Series due August 27, 2020 (this "**Security**") to the registered Holder hereof at the rate of 2.80% per annum, in like coin or currency, semi-annually on February 27 and August 27 of each year (each an "**Interest Payment Date**") until the principal hereof is paid or duly provided for, such interest payments to commence on February 27, 2016. Each interest payment shall include interest accrued from the most-recently preceding Interest

Payment Date to which interest has either been paid or duly provided for (*except* that (i) the interest payment which is due on February 27, 2016 shall include interest that has accrued from August 27, 2015, and (ii) if this Security is authenticated during the period that (A) follows any particular Regular Record Date (as defined below) but (B) precedes the next occurring Interest Payment Date, then the registered Holder hereof shall not be entitled to receive any interest payment with respect to this Security on such next occurring Interest Payment Date). No interest will accrue on the Securities of this series with respect to the day on which the Securities of this series mature. In the event that any Interest Payment Date is not a Business Day, then payment of interest payable on such date will be made on the next succeeding day which is a Business Day (and without any interest or other payment in respect of such delay) with the same force and effect as if made on the Interest Payment Date. The interest so payable, and punctually paid or duly provided for, on any Interest Payment Date will, as provided in the Indenture referred to on the reverse of this Security (the "**Indenture**"), be payable to the Person in whose name this Security (or one or more Predecessor Securities) is registered at the close of business on the "**Regular Record Date**" for such interest installment which shall be the close of business on the Business Day immediately preceding such Interest Payment Date so long as the Securities of this series are held by a securities depository in book-entry form; *provided* that if the Securities of this series are not held by a securities depository in book-entry form, the Regular Record Date will be the close of business on the fifteenth (15th) calendar day next preceding such Interest Payment Date; and *provided further* that interest payable on the Stated Maturity Date or any Redemption Date will be paid to the same Person to whom the associated principal is to be paid. Any such interest not punctually paid or duly provided for will forthwith cease to be payable to the Person who is the Holder of this Security on such Regular Record Date and may be paid to the Person in whose name this Security (or one or more Predecessor Securities) is registered at the close of business on a Special Record Date to be fixed by the Trustee for the payment of such Defaulted Interest, notice of which shall be given to Holders of Securities of this series not less than ten (10) days prior to such Special Record Date, or may be paid at any time in any other lawful manner not inconsistent with the requirements of any securities exchange on which the Securities of this series may be listed, and upon such notice as may be required by such exchange, all as more fully provided in the Indenture.

Payment of the principal of (and premium, if any) and interest on this Security will be made at the office or agency of the Company maintained for that purpose in New York City, the State of New York in such coin or currency of the United States of America as at the time of payment is legal tender for payment of public and private debts; *provided, however*, that, at the option of the Company, interest on this Security may be paid by check mailed to the address of the Person entitled thereto, as such address shall appear on the Security Register or by a wire transfer to an account designated by the Person entitled thereto. The amount of interest payable on this Security will be computed on the basis of a 360-day year consisting of twelve 30-day months (and for any period shorter than a full semi-annual period, on the basis of the actual number of days elapsed during such period using 30-day calendar months).

Reference is hereby made to the further provisions of this Security set forth on the reverse of this Security, which further provisions shall for all purposes have the same effect as if set forth at this place. (All capitalized terms used in this Security which are not defined herein, including the reverse of this Security, but which are defined in the Indenture or in the Officer's Certificate shall have the meanings specified in the Indenture or in the Officer's Certificate.)

Unless the certificate of authentication hereon has been executed by the Trustee referred to on the reverse of this Security by manual signature, this Security shall not be entitled to any benefit under the Indenture or be valid or obligatory for any purpose.

IN WITNESS WHEREOF, the Company has caused this instrument to be duly executed in New York, New York.

NEXTERA ENERGY CAPITAL HOLDINGS, INC.

[FORM OF CERTIFICATE OF AUTHENTICATION]

CERTIFICATE OF AUTHENTICATION

Dated:

This is one of the Securities of the series designated therein referred to in the within-mentioned Indenture.

THE BANK OF NEW YORK MELLON, as Trustee

By: _____
Authorized Signatory

[FORM OF REVERSE OF DEBENTURE]

This Security is one of a duly authorized issue of securities of the Company (herein called the "**Securities**"), issued and to be issued in one or more series under an Indenture (For Unsecured Debt Securities), dated as of June 1, 1999 (herein, together with any amendments thereto, called the "**Indenture**", which term shall have the meaning assigned to it in such instrument), between the Company and The Bank of New York Mellon, as Trustee (herein called the "**Trustee**", which term includes any successor trustee under the Indenture), and reference is hereby made to the Indenture, including the Board Resolutions and Officer's Certificate filed with the Trustee on August 27, 2015 creating the series designated on the face hereof (herein called the "**Officer's Certificate**"), for a statement of the respective rights, limitations of rights, duties and immunities thereunder of the Company, the Trustee and the Holders of the Securities of this series and of the terms upon which the Securities of this series are, and are to be, authenticated and delivered. This Security is one of the series designated on the face hereof.

Securities of this series shall be redeemable at the option of the Company in whole at any time, or in part from time to time, prior to the Stated Maturity Date, upon notice (the "**Redemption Notice**") mailed at least thirty (30) days but not more than sixty (60) days prior to the date fixed for redemption (the "**Redemption Date**"), at the applicable price (the "**Redemption Price**") described below. If the Company redeems all or any part of the Securities of this series, the Redemption Price will equal the sum of (i) 100% of the principal amount thereof, *plus* (ii) accrued and unpaid interest thereon, if any, to but excluding the Redemption Date, *plus* (iii) a premium, if any (the "**Make-Whole Premium**"). In no event will the Redemption Price be less than 100% of the principal amount of the Securities of this series being redeemed plus accrued and unpaid interest thereon, if any, to but excluding the Redemption Date.

The amount of the Make-Whole Premium with respect to any Security of this series (or portion thereof) to be redeemed will be equal to the excess, if any, of:

(1) the sum of the present values, calculated as of the Redemption Date, of:

  (a) each interest payment that, but for such redemption, would have been payable on the Security of this series (or portion thereof) being redeemed on each Interest Payment Date occurring after the Redemption Date (excluding any interest accruing (i) from and including the last Interest Payment Date preceding the Redemption Date as of which all then-accrued interest was paid (ii) to but excluding the Redemption Date); and

  (b) the principal amount that, but for such redemption, would have been payable on the Stated Maturity Date of the Security of this series (or portion thereof) being redeemed; over

(2) the principal amount of the Security of this series (or portion thereof) being redeemed.

The present values of interest and principal payments referred to in clause (1) above will be determined in accordance with generally accepted principles of financial analysis. Such present values will be calculated by discounting the amount of each payment of interest or principal from the date that each such payment would have been payable, but for the redemption, to the Redemption Date at a discount rate equal to the Treasury Yield (as defined below) plus 20 basis points.

The Company will appoint an independent investment banking institution of national standing to calculate the Make-Whole Premium when and as applicable; *provided* that Morgan Stanley & Co. International plc will make such calculation if (1) the Company fails to make such appointment at least thirty (30) days prior to the Redemption Date, or (2) the institution so appointed is unwilling or unable to make such calculation. If Morgan Stanley & Co. International plc is to make such calculation but is not willing or able to do so, then the Company will appoint an independent investment banking institution of national standing to make such calculation (in any such case, an "**Independent Investment Banker**").

For purposes of determining the Make-Whole Premium, "**Treasury Yield** " means a rate of interest per annum equal to the weekly average yield to maturity of United States Treasury Notes that have a constant maturity that corresponds to the remaining term to the Stated Maturity Date of the Securities of this series to be redeemed, calculated to the nearest 1/12th of a year (the "**Remaining Term**"). The Independent Investment Banker will determine the Treasury Yield as of the third Business Day immediately preceding the applicable Redemption Date.

The Independent Investment Banker will determine the weekly average yields of United States Treasury Notes by reference to the most recent statistical release published by the Federal Reserve Bank of New York and designated "H.15(519) Selected Interest Rates" or any successor release (the "**H.15 Statistical Release**"). If the H.15 Statistical Release sets forth a weekly average yield for the United States Treasury Notes having a constant maturity that is the same as the Remaining Term, then the Treasury Yield will be equal to such weekly average yield. In all other cases, the Independent Investment Banker will calculate the Treasury Yield by interpolation, on a straight-line basis, between the weekly average yields on the United States Treasury Notes that have a constant maturity closest to and greater than the Remaining Term and the United States Treasury Notes that have a constant maturity closest to and less than the Remaining Term (in each case as set forth in the H.15 Statistical Release). The Independent Investment Banker will round any weekly average yields so calculated to the nearest 1/100th of 1%, with any figure of 1/200th of 1% or above being rounded upward. If weekly average yields for United States Treasury Notes are not available in the H.15 Statistical Release or otherwise, then the Independent Investment Banker will select comparable rates and calculate the Treasury Yield by reference to those rates.

If at the time the Redemption Notice is given, the redemption moneys are not on deposit with the Trustee, then the redemption shall be subject to their receipt on or before the Redemption Date and such Redemption Notice shall be of no force or effect unless such moneys are received.

Upon payment of the Redemption Price, on and after the Redemption Date interest will cease to accrue on the Securities of this series or portions thereof called for redemption.

The Securities of this series will be absolutely, irrevocably and unconditionally guaranteed as to payment of principal, interest and premium, if any, by NextEra Energy, Inc., as Guarantor (the "**Guarantor**"), pursuant to a Guarantee Agreement, dated as of June 1, 1999, between the Guarantor and The Bank of New York Mellon (as Guarantee Trustee) (the "**Guarantee Agreement**"). The following shall constitute "**Guarantor Events**" with respect to the Securities of this series:

(A) the failure of the Guarantee Agreement to be in full force and effect;

(B) the entry by a court having jurisdiction with respect to the Guarantor of (i) a decree or order for relief in respect of the Guarantor in an involuntary case or proceeding under any applicable Federal or State bankruptcy, insolvency or other similar law or (ii) a decree or order adjudging the Guarantor bankrupt or insolvent, or approving as properly filed a petition by one or more entities other than the Guarantor seeking reorganization, arrangement, adjustment or composition of or in respect of the Guarantor under any applicable Federal or State bankruptcy, insolvency or other similar law, or appointing a custodian, receiver, liquidator, assignee, trustee, sequestrator or other similar official for the Guarantor or for any substantial part of its property, or ordering the winding up or liquidation of its affairs, and any such decree or order for relief or any such other decree or order shall have remained unstayed and in effect for a period of ninety (90) consecutive days; or

(C) the commencement by the Guarantor of a voluntary case or proceeding under any applicable Federal or State bankruptcy, insolvency or other similar law or of any other case or proceeding seeking for the Guarantor to be adjudicated bankrupt or insolvent, or the consent by the Guarantor to the entry of a decree or order for relief in respect of itself in a case or proceeding under any applicable Federal or State bankruptcy, insolvency or other similar law or to the commencement of any bankruptcy or insolvency case or proceeding against the Guarantor, or the filing by the Guarantor of a petition or answer or consent seeking reorganization or relief under any applicable Federal or State bankruptcy, insolvency or other similar law, or the consent by the Guarantor to the filing of such petition or to the appointment of or taking possession by a custodian, receiver, liquidator, assignee, trustee, sequestrator or similar official of the Guarantor or of any substantial part of its property, or the making by the Guarantor of an assignment for the benefit of creditors, or the admission by the Guarantor in writing of its inability to pay its debts generally as they become due, or the authorization of such action by the Board of Directors of the Guarantor.

Notwithstanding anything to the contrary contained in the Securities of this series, the Officer's Certificate dated August 27, 2015 creating the Securities of this series, or the Indenture, the Company shall, if a Guarantor Event shall occur and be continuing, redeem all of the Outstanding Securities within sixty (60) days after the occurrence of such Guarantor Event at a redemption price equal to the principal amount thereof plus accrued and unpaid interest, if any, to but excluding the date of redemption unless, within thirty (30) days after the occurrence of such Guarantor Event, Standard & Poor's Ratings Services (a Standard & Poor's Financial

Services LLC business) and Moody's Investors Service, Inc. (if the Securities of this series are then rated by those rating agencies, or, if the Securities of this series are then rated by only one of those rating agencies, then such rating agency, or, if the Securities of this series are not then rated by either one of those rating agencies but are then rated by one or more other nationally recognized rating agencies, then at least one of those other nationally recognized rating agencies) shall have reaffirmed in writing that, after giving effect to such Guarantor Event, the credit rating on the Securities of this series shall be investment grade (i.e. in one of the four highest categories, without regard to subcategories within such rating categories, of such rating agency).

If a Guarantor Event occurs and the Company is not required to redeem the Securities of this series pursuant to the preceding paragraph, the Company will provide to the Trustee and the Holders of the Securities of this series annual and quarterly reports containing the information that the Company would be required to file with the Securities and Exchange Commission under Section 13 or Section 15(d) of the Securities Exchange Act of 1934 if it were subject to the reporting requirements of those Sections; *provided*, that if the Company is, at that time, subject to the reporting requirements of those Sections, the filing of annual and quarterly reports with the Securities and Exchange Commission pursuant to those Sections will satisfy the foregoing requirement.

The Indenture contains provisions for defeasance at any time of the entire indebtedness of this Security upon compliance with certain conditions set forth in the Indenture, including the Officer's Certificate described above.

If an Event of Default with respect to Securities of this series shall occur and be continuing, the principal of and interest on the Securities of this series may be declared due and payable in the manner and with the effect provided in the Indenture.

The Indenture permits, with certain exceptions as therein provided, the amendment thereof and the modification of the rights and obligations of the Company and the rights of the Holders of the Securities of each series to be affected by such amendment to the Indenture at any time by the Company and the Trustee with the consent of the Holders of a majority in principal amount of the Securities at the time Outstanding of all series to be thus affected. The Indenture also contains provisions permitting the Holders of specified percentages in principal amount of the Securities of each series at the time Outstanding, on behalf of the Holders of all Securities of such series, to waive compliance by the Company with certain provisions of the Indenture and certain past defaults under the Indenture and their consequences. Any such consent or waiver by Holders of the specified percentages in principal amount of the Securities of this series shall be conclusive and binding upon all current and future Holders of this Security and of any Security issued upon the registration of transfer hereof or in exchange herefor or in lieu hereof, whether or not notation of such consent or waiver is made upon this Security.

As provided in and subject to the provisions of the Indenture, the Holder of this Security shall not have the right to institute any proceeding with respect to the Indenture or for the appointment of a receiver or trustee or for any other remedy thereunder, unless such Holder shall have previously given the Trustee written notice of a continuing Event of Default with respect to the Securities of this series, the Holders of a majority in aggregate principal amount of the Securities of all series at the time Outstanding in respect of which an Event of Default shall have

occurred and be continuing shall have made written request to the Trustee to institute proceedings in respect of such Event of Default as Trustee and offered the Trustee reasonable indemnity, and the Trustee shall not have received from the Holders of a majority in aggregate principal amount of Securities of all series at the time Outstanding in respect of which an Event of Default shall have occurred and be continuing a direction inconsistent with such request, and shall have failed to institute any such proceeding, for sixty (60) days after receipt of such notice, request and offer of indemnity. The foregoing shall not apply to any suit instituted by the Holder of this Security for the enforcement of any payment of principal hereof or any premium or interest hereon on or after the respective due dates expressed herein.

Each Holder shall be deemed to understand that the offer and sale of the Securities of this series have not been registered under the Securities Act of 1933, as amended (the "**Securities Act**"), and that the Securities of this series may not be offered or sold by the Holder except as permitted in the following sentence. Each Holder shall be deemed to agree, on its own behalf and on behalf of any accounts for which it is acting as hereinafter stated, that if such Holder offers or sells any Securities of this series, such Holder will do so only (A) to the Company, (B) in a transaction entitled to an exemption from registration provided by Rule 144 under the Securities Act, (C) to a person whom the seller reasonably believes is a "qualified institutional buyer" within the meaning of Rule 144A under the Securities Act ("**Rule 144A**") that purchases for its own account or for the account of a qualified institutional buyer to whom notice is given that the resale, pledge or other transfer is being made in reliance on Rule 144A, (D) in an offshore transaction in accordance with Rule 903 or 904 of Regulation S under the Securities Act, (E) in accordance with another applicable exemption from the registration requirements of the Securities Act, or (F) pursuant to an effective registration statement under the Securities Act, and each Holder is further deemed to agree to provide to any person purchasing any of the Securities of this series from it a notice advising such purchaser that resales of the Securities of this series are restricted as stated herein. Each Holder shall be deemed to understand that, on any proposed resale of any Securities of this series in accordance with the foregoing clause (E) any Holder making any such proposed resale will be required to furnish to the Trustee and Company such certifications, legal opinions and other information as the Trustee and Company may reasonably require to confirm that the proposed sale complies with the foregoing restrictions.

No reference herein to the Indenture and no provision of this Security or of the Indenture shall alter or impair the obligation of the Company, which is absolute and unconditional, to pay the principal of and any premium and interest on this Security at the times, place and rate, and in the coin or currency, herein prescribed.

The Securities of this series are issuable only in registered form without coupons in denominations of $2,000 and integral multiples of $1,000 in excess thereof. As provided in the Indenture and subject to certain limitations therein set forth, Securities of this series are exchangeable for a like aggregate principal amount of Securities of this series and of like tenor and of authorized denominations, as requested by the Holder surrendering the same.

No service charge shall be made for any such registration of transfer or exchange, but the Company may require payment of a sum sufficient to cover any tax or other governmental charge payable in connection therewith.

The Company, the Trustee and any agent of the Company or the Trustee may treat the Person in whose name this Security is registered as the absolute owner hereof for all purposes, whether or not this Security be overdue, and none of the Company, the Trustee or any such agent shall be affected by notice to the contrary.

SCHEDULE I

[144A][REGULATION S] GLOBAL Security

The initial amount of the Securities evidenced by this certificate is $_____.

CHANGES TO PRINCIPAL AMOUNT OF SECURITIES EVIDENCED BY THIS CERTIFICATE

Date	Amount of decrease in principal amount of this Security	Amount of increase in principal amount of this Security	Principal amount of this Security following such decrease or increase	Signature of authorized signatory of Trustee or Security Registrar

[FORM OF CERTIFICATE OF TRANSFER IN GLOBAL SECURITY]
NEXTERA ENERGY CAPITAL HOLDINGS, INC.
2.80% Debentures, Series due August 27, 2020

FOR VALUE RECEIVED, the undersigned sells, assigns and transfers unto

_____

Please insert social security or other identifying number of assignee
identifying number of assignee

_____

Name and address of assignee must be printed or typewritten

$_____ principal amount of beneficial interest in the referenced Security of NextEra Energy Capital Holdings, Inc. (the "Company") and does hereby irrevocably constitute and appoint _____ to transfer the said beneficial interest in such Security, with full power of substitution in the premises.

The undersigned certifies that said beneficial interest in said Security is being resold, pledged or otherwise transferred as follows:
(check one)

☐ to the Company;

☐ pursuant to an exemption from registration provided by Rule 144 under the Securities Act of 1933, as amended (the "Securities Act")(if available);

☐ to a Person whom the undersigned reasonably believes is a qualified institutional buyer within the meaning of Rule 144A under the Securities Act, purchasing for its own account or for the account of a qualified institutional buyer to whom notice is given that the resale, pledge or other transfer is being made in reliance on Rule 144A;

☐ in an offshore transaction in accordance with Rule 903 or 904 of Regulation S under the Securities Act;

☐ in accordance with another applicable exemption from the registration requirements of the Securities Act (and based upon an opinion of counsel acceptable to the Company); or

☐ pursuant to an effective registration statement under the Securities Act.

Dated: _____ Signature: _____

NOTICE: The signature to this assignment must correspond with the name of the registered owner of the within instrument in every particular without alteration or enlargement, or any change whatever.

SIGNATURE GUARANTEE

Signatures must be guaranteed by an "eligible guarantor institution" meeting the requirement of the registrar, which requirements include membership or participation in the Security Transfer Agent Medallion Program ("STAMP") or such other "signature guarantee program" as may be determined by the registrar in addition to, or in substitution for, STAMP, all in accordance with the Securities Exchange Act of 1934, as amended.

Exhibit 12(a)

NEXTERA ENERGY, INC. AND SUBSIDIARIES
COMPUTATION OF RATIO OF EARNINGS TO FIXED CHARGES AND
RATIO OF EARNINGS TO COMBINED FIXED CHARGES AND PREFERRED STOCK DIVIDENDS[a]

	Nine Months Ended September 30, 2015
	(millions of dollars)
Earnings, as defined:	
Net income	$ 2,252
Income taxes	981
Fixed charges included in the determination of net income, as below	967
Amortization of capitalized interest	30
Distributed income of equity method investees	58
Less: Equity in earnings of equity method investees	87
Total earnings, as defined	$ 4,201
Fixed charges, as defined:	
Interest expense	$ 912
Rental interest factor	41
Allowance for borrowed funds used during construction	14
Fixed charges included in the determination of net income	967
Capitalized interest	74
Total fixed charges, as defined	$ 1,041
Ratio of earnings to fixed charges and ratio of earnings to combined fixed charges and preferred stock dividends[a]	4.04

(a) NextEra Energy, Inc. has no preference equity securities outstanding; therefore, the ratio of earnings to fixed charges is the same as the ratio of earnings to combined fixed charges and preferred stock dividends.

Exhibit 12(b)

FLORIDA POWER & LIGHT COMPANY AND SUBSIDIARIES
COMPUTATION OF RATIO OF EARNINGS TO FIXED CHARGES AND
RATIO OF EARNINGS TO COMBINED FIXED CHARGES AND PREFERRED STOCK DIVIDENDS[a]

	Nine Months Ended September 30, 2015
	(millions of dollars)
Earnings, as defined:	
Net income	$ 1,283.3
Income taxes	728.5
Fixed charges, as below	360.4
Total earnings, as defined	$ 2,372.2
Fixed charges, as defined:	
Interest expense	$ 337.4
Rental interest factor	9.0
Allowance for borrowed funds used during construction	14.0
Total fixed charges, as defined	$ 360.4
Ratio of earnings to fixed charges and ratio of earnings to combined fixed charges and preferred stock dividends[a]	6.58

(a) Florida Power & Light Company has no preference equity securities outstanding; therefore, the ratio of earnings to fixed charges is the same as the ratio of earnings to combined fixed charges and preferred stock dividends.

Exhibit 31(a)

Rule 13a-14(a)/15d-14(a) Certification

I, James L. Robo, certify that:

1. I have reviewed this Form 10-Q for the quarterly period ended September 30, 2015 of NextEra Energy, Inc. (the registrant);

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

of Florida Power & Light Company

Exhibit 32(a)

Section 1350 Certification

We, James L. Robo and Moray P. Dewhurst, certify, pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

(1) The Quarterly Report on Form 10-Q of NextEra Energy, Inc. (the registrant) for the quarterly period ended September 30, 2015 (Report) fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

(2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the registrant.

Dated: October 29, 2015

JAMES L. ROBO

James L. Robo
Chairman, President and Chief Executive Officer
of NextEra Energy, Inc.

MORAY P. DEWHURST

Moray P. Dewhurst
Vice Chairman and Chief Financial Officer,
and Executive Vice President - Finance
of NextEra Energy, Inc.

A signed original of this written statement required by Section 906 has been provided to the registrant and will be retained by the registrant and furnished to the Securities and Exchange Commission or its staff upon request.

The foregoing certification is being furnished as an exhibit to the Report pursuant to Item 601(b)(32) of Regulation S-K and Section 906 of the Sarbanes-Oxley Act of 2002 and, accordingly, is not being filed with the Securities and Exchange Commission as part of the Report and is not to be incorporated by reference into any filing of the registrant under the Securities Act of 1933 or the Securities Exchange Act of 1934 (whether made before or after the date of the Report, irrespective of any general incorporation language contained in such filing).

Exhibit 32(b)

Section 1350 Certification

We, Eric E. Silagy and Moray P. Dewhurst, certify, pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

(1) The Quarterly Report on Form 10-Q of Florida Power & Light Company (the registrant) for the quarterly period ended September 30, 2015 (Report) fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

(2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the registrant.

Dated: October 29, 2015

ERIC E. SILAGY

Eric E. Silagy
President and Chief Executive Officer
of Florida Power & Light Company

MORAY P. DEWHURST

Moray P. Dewhurst
Executive Vice President, Finance and
Chief Financial Officer
of Florida Power & Light Company

A signed original of this written statement required by Section 906 has been provided to the registrant and will be retained by the registrant and furnished to the Securities and Exchange Commission or its staff upon request.

The foregoing certification is being furnished as an exhibit to the Report pursuant to Item 601(b)(32) of Regulation S-K and Section 906 of the Sarbanes-Oxley Act of 2002 and, accordingly, is not being filed with the Securities and Exchange Commission as part of the Report and is not to be incorporated by reference into any filing of the registrant under the Securities Act of 1933 or the Securities Exchange Act of 1934 (whether made before or after the date of the Report, irrespective of any general incorporation language contained in such filing).

Exhibit 3 (f)

Annual Report on Form 10-K for the year ended December 31, 2015.

UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended **December 31, 2015**

Commission File Number	Exact name of registrants as specified in their charters, address of principal executive offices and registrants' telephone number	IRS Employer Identification Number
1-8841	**NEXTERA ENERGY, INC.**	59-2449419
2-27612	**FLORIDA POWER & LIGHT COMPANY**	59-0247775

700 Universe Boulevard
Juno Beach, Florida 33408
(561) 694-4000

State or other jurisdiction of incorporation or organization: Florida

Securities registered pursuant to Section 12(b) of the Act:		Name of exchange on which registered
NextEra Energy, Inc.:	Common Stock, $0.01 Par Value	New York Stock Exchange
	5.799% Corporate Units	New York Stock Exchange
	6.371% Corporate Units	New York Stock Exchange

Florida Power & Light Company: None

Indicate by check mark if the registrants are well-known seasoned issuers, as defined in Rule 405 of the Securities Act of 1933.

NextEra Energy, Inc. Yes ☑ No ☐ Florida Power & Light Company Yes ☑ No ☐

Indicate by check mark if the registrants are not required to file reports pursuant to Section 13 or Section 15(d) of the Securities Exchange Act of 1934.

NextEra Energy, Inc. Yes ☐ No ☑ Florida Power & Light Company Yes ☐ No ☑

Indicate by check mark whether the registrants (1) have filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) have been subject to such filing requirements for the past 90 days.

NextEra Energy, Inc. Yes ☑ No ☐ Florida Power & Light Company Yes ☑ No ☐

Indicate by check mark whether the registrants have submitted electronically and posted on their corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months.

NextEra Energy, Inc. Yes ☑ No ☐ Florida Power & Light Company Yes ☑ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrants' knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☑

Indicate by check mark whether the registrants are a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Securities Exchange Act of 1934.

NextEra Energy, Inc.	Large Accelerated Filer ☑	Accelerated Filer ☐	Non-Accelerated Filer ☐	Smaller Reporting Company ☐
Florida Power & Light Company	Large Accelerated Filer ☐	Accelerated Filer ☐	Non-Accelerated Filer ☑	Smaller Reporting Company ☐

Indicate by check mark whether the registrants are shell companies (as defined in Rule 12b-2 of the Securities Exchange Act of 1934). Yes ☐ No ☑

Aggregate market value of the voting and non-voting common equity of NextEra Energy, Inc. held by non-affiliates as of June 30, 2015 (based on the closing market price on the Composite Tape on June 30, 2015) was $44,190,491,194.

There was no voting or non-voting common equity of Florida Power & Light Company held by non-affiliates as of June 30, 2015.

Number of shares of NextEra Energy, Inc. common stock, $0.01 par value, outstanding as of January 31, 2016: 460,599,691

Number of shares of Florida Power & Light Company common stock, without par value, outstanding as of January 31, 2016, all of which were held, beneficially and of record, by NextEra Energy, Inc.: 1,000

DOCUMENTS INCORPORATED BY REFERENCE

Portions of NextEra Energy, Inc.'s Proxy Statement for the 2016 Annual Meeting of Shareholders are incorporated by reference in Part III hereof.

This combined Form 10-K represents separate filings by NextEra Energy, Inc. and Florida Power & Light Company. Information contained herein relating to an individual registrant is filed by that registrant on its own behalf. Florida Power & Light Company makes no representations as to the information relating to NextEra Energy, Inc.'s other operations.

Florida Power & Light Company meets the conditions set forth in General Instruction I.(1)(a) and (b) of Form 10-K and is therefore filing this Form with the reduced disclosure format.

DEFINITIONS

Acronyms and defined terms used in the text include the following:

Term	Meaning
AFUDC	allowance for funds used during construction
AFUDC - debt	debt component of AFUDC
AFUDC - equity	equity component of AFUDC
AOCI	accumulated other comprehensive income
Bcf	billion cubic feet
capacity clause	capacity cost recovery clause, as established by the FPSC
CO_2	carbon dioxide
DOE	U.S. Department of Energy
Duane Arnold	Duane Arnold Energy Center
EPA	U.S. Environmental Protection Agency
ERCOT	Electric Reliability Council of Texas
FERC	U.S. Federal Energy Regulatory Commission
Florida Southeast Connection	Florida Southeast Connection, LLC, a wholly owned NEER subsidiary
FPL	Florida Power & Light Company
FPL FiberNet	fiber-optic telecommunications business
FPSC	Florida Public Service Commission
fuel clause	fuel and purchased power cost recovery clause, as established by the FPSC
GAAP	generally accepted accounting principles in the U.S.
GHG	greenhouse gas(es)
IPO	initial public offering
ISO	independent system operator
ITC	investment tax credit
kW	kilowatt
kWh	kilowatt-hour(s)
Lone Star	Lone Star Transmission, LLC
Management's Discussion	Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations
MMBtu	One million British thermal units
mortgage	mortgage and deed of trust dated as of January 1, 1944, from FPL to Deutsche Bank Trust Company Americas, as supplemented and amended
MW	megawatt(s)
MWh	megawatt-hour(s)
NEE	NextEra Energy, Inc.
NEECH	NextEra Energy Capital Holdings, Inc.
NEER	NextEra Energy Resources, LLC
NEET	NextEra Energy Transmission, LLC
NEP	NextEra Energy Partners, LP
NEP OpCo	NextEra Energy Operating Partners, LP
NERC	North American Electric Reliability Corporation
Note __	Note __ to consolidated financial statements
NOx	nitrogen oxide
NRC	U.S. Nuclear Regulatory Commission
O&M expenses	other operations and maintenance expenses in the consolidated statements of income
OCI	other comprehensive income
OTC	over-the-counter
OTTI	other than temporary impairment
PJM	PJM Interconnection, L.L.C.
PMI	NextEra Energy Power Marketing, LLC
Point Beach	Point Beach Nuclear Power Plant
PTC	production tax credit
PUCT	Public Utility Commission of Texas
PURPA	Public Utility Regulatory Policies Act of 1978, as amended
PV	photovoltaic
Recovery Act	The American Recovery and Reinvestment Act of 2009, as amended
regulatory ROE	return on common equity as determined for regulatory purposes
RFP	request for proposal
ROE	return on common equity
RPS	renewable portfolio standards
RTO	regional transmission organization
Sabal Trail	Sabal Trail Transmission, LLC, an entity in which a NEER subsidiary has a 33% ownership interest
Seabrook	Seabrook Station
SEC	U.S. Securities and Exchange Commission
SO_2	sulfur dioxide
U.S.	United States of America
WCEC	FPL's West County Energy Center

NEE, FPL, NEECH and NEER each has subsidiaries and affiliates with names that may include NextEra Energy, FPL, NextEra Energy Resources, NextEra, FPL Group, FPL Group Capital, FPL Energy, FPLE, NEP and similar references. For convenience and simplicity, in this report the terms NEE, FPL, NEECH and NEER are sometimes used as abbreviated references to specific subsidiaries, affiliates or groups of subsidiaries or affiliates. The precise meaning depends on the context.

TABLE OF CONTENTS

FORWARD-LOOKING STATEMENTS

This report includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Any statements that express, or involve discussions as to, expectations, beliefs, plans, objectives, assumptions, strategies, future events or performance (often, but not always, through the use of words or phrases such as may result, are expected to, will continue, is anticipated, aim, believe, will, could, should, would, estimated, may, plan, potential, future, projection, goals, target, outlook, predict and intend or words of similar meaning) are not statements of historical facts and may be forward looking. Forward-looking statements involve estimates, assumptions and uncertainties. Accordingly, any such statements are qualified in their entirety by reference to, and are accompanied by, important factors included in Part I, Item 1A. Risk Factors (in addition to any assumptions and other factors referred to specifically in connection with such forward-looking statements) that could have a significant impact on NEE's and/or FPL's operations and financial results, and could cause NEE's and/or FPL's actual results to differ materially from those contained or implied in forward-looking statements made by or on behalf of NEE and/or FPL in this combined Form 10-K, in presentations, on their respective websites, in response to questions or otherwise.

Any forward-looking statement speaks only as of the date on which such statement is made, and NEE and FPL undertake no obligation to update any forward-looking statement to reflect events or circumstances, including, but not limited to, unanticipated events, after the date on which such statement is made, unless otherwise required by law. New factors emerge from time to time and it is not possible for management to predict all of such factors, nor can it assess the impact of each such factor on the business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained or implied in any forward-looking statement.

PART I

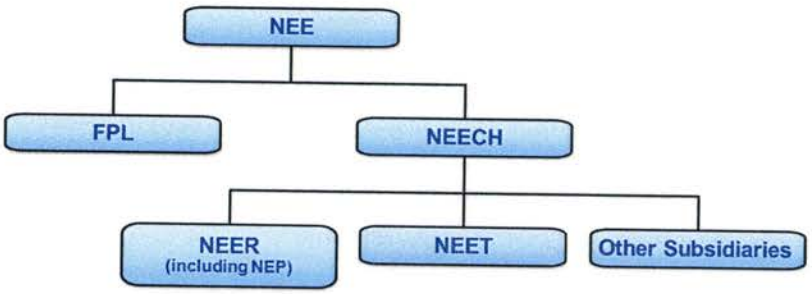
Item 1. Business

OVERVIEW

NextEra Energy, Inc. (hereafter, NEE), with approximately 46,400 MW of generating capacity, is one of the largest electric power companies in North America with electric generation facilities located in 27 states in the U.S. and 4 provinces in Canada, and employing approximately 14,300 people as of December 31, 2015. NEE provides retail and wholesale electric services to more than 5.3 million customers and owns generation, transmission and distribution facilities to support its services, as well as has investments in gas infrastructure assets. It also provides risk management services related to power and gas consumption related to its own generation assets and for a limited number of wholesale customers in selected markets. NEE, through NEER, is the largest generator in North America of renewable energy from the wind and sun based on MWh produced. In addition, NEE owns and operates approximately 15% of the installed base of U.S. wind power production capacity and owns and/or operates approximately 9% of the installed base of U.S. utility-scale solar power production capacity as of December 31, 2015. NEE also owns and operates one of the largest fleets of nuclear power stations in the U.S., with eight reactors at five sites located in four states, representing approximately 6% of U.S. nuclear power electric generating capacity as of December 31, 2015. NEE's business strategy has emphasized the development, acquisition and operation of renewable, nuclear and natural gas-fired generation facilities in response to long-term federal policy trends supportive of zero and low air emissions sources of power. NEE's generation fleet has significantly lower rates of emissions of CO_2, SO_2 and NOx than the average rates of the U.S. electric power industry with approximately 97% of its 2015 generation, measured by MWh produced, coming from renewable, nuclear and natural gas-fired facilities.

NEE was incorporated in 1984 under the laws of Florida and conducts its operations principally through two wholly owned subsidiaries, Florida Power & Light Company (hereafter, FPL) and NextEra Energy Resources, LLC (hereafter, NEER). NextEra Energy Capital Holdings, Inc. (hereafter, NEECH), another wholly owned subsidiary of NEE, owns and provides funding for NEER's and NEE's operating subsidiaries, other than FPL and its subsidiaries. NEE's two principal businesses also constitute NEE's reportable segments for financial reporting purposes. During 2014, NEE formed NEP to acquire, manage and own contracted clean energy projects with stable, long-term cash flows. See II. NEER for further discussion of NEP. NEE's and NEER's generating capacity discussed in this combined Form 10-K includes approximately 480 MW associated with noncontrolling interests related to NEP as of December 31, 2015. See Item 2. Properties.

NEE Organizational Chart



FPL is a rate-regulated electric utility engaged primarily in the generation, transmission, distribution and sale of electric energy in Florida. FPL is the largest electric utility in the state of Florida and one of the largest electric utilities in the U.S. based on retail MWh sales. FPL is vertically integrated, with approximately 25,300 MW of generating capacity as of December 31, 2015. FPL's investments in its infrastructure since 2001, such as modernizing less-efficient fossil generation plants to produce more energy with less fuel and fewer air emissions, increasing generating capacity at its existing nuclear units and upgrading its transmission and distribution systems to deliver service reliability that is the best of the Florida investor-owned utilities, have provided significant benefits to FPL's customers, all while providing residential and commercial bills that were among the lowest in Florida and below the national average based on a rate per kWh as of July 2015 (the latest date for which this data is available). With approximately 95% of its power generation coming from natural gas, nuclear and solar, FPL is also one of the cleanest electric utilities in the nation. Based on 2015 information, FPL's emissions rates for CO_2, SO_2 and NOx were 35%, 97% and 71% lower, respectively, than the average rates of the U.S. electric power industry.

NEER, with approximately 21,100 MW of generating capacity at December 31, 2015, is one of the largest wholesale generators of electric power in the U.S., with 20,120 MW of generating capacity across 25 states, and has 920 MW of generating capacity in 4

Canadian provinces. NEER produces the majority of its electricity from clean and renewable sources, including wind and solar. NEER also provides full energy and capacity requirements services, engages in power and gas marketing and trading activities and invests in natural gas, natural gas liquids and oil production and pipeline infrastructure assets.

NEECH's other business activities are primarily conducted through NEET and FPL FiberNet. Through its subsidiaries, NEET owns and operates rate-regulated transmission facilities, the largest of which is owned by Lone Star, a rate-regulated transmission service provider in Texas. FPL FiberNet delivers wholesale and enterprise telecommunications services in Florida, Texas and certain areas of the South Central U.S.

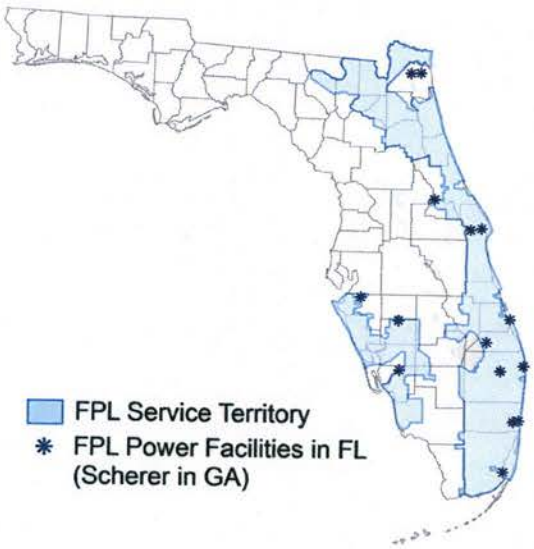
NEE seeks to create value in its two principal businesses by meeting its customers' needs more economically and more reliably than its competitors, as described in more detail in the following sections. NEE's strategy has resulted in profitable growth over sustained periods at both FPL and NEER. Management seeks to grow each business in a manner consistent with the varying opportunities available to it; however, management believes that the diversification and balance represented by FPL and NEER is a valuable characteristic of the enterprise and recognizes that each business contributes to NEE's credit profile in different ways. FPL and NEER, as well as other NEE subsidiaries, share common support functions with the objective of lowering costs and creating efficiencies for their businesses. During 2013, NEE and its subsidiaries commenced an enterprise-wide initiative focused mainly on improving productivity and reducing O&M expenses (cost savings initiative), and management expects to continue those efforts going forward.

In 2014, NEE and Hawaiian Electric Industries, Inc. (HEI) announced a proposed merger pursuant to which Hawaiian Electric Company, Inc., HEI's wholly owned electric utility subsidiary, will become a wholly owned subsidiary of NEE. The merger agreement contains certain termination rights for both NEE and HEI, including the right of either party to terminate the merger agreement if the merger has not been completed by June 3, 2016. Completion of the merger and the actual closing date remain subject to the satisfaction of certain conditions, including Hawaii Public Utilities Commission approval. See Note 1 - Proposed Merger for further discussion.

NEE'S OPERATING SUBSIDIARIES

I. FPL

FPL was incorporated under the laws of Florida in 1925 and is a wholly owned subsidiary of NEE. FPL is a rate-regulated electric utility and is the largest electric utility in the state of Florida and one of the largest electric utilities in the U.S. based on retail MWh sales. FPL, with 25,254 MW of generating capacity at December 31, 2015, supplies electric service throughout most of the east and lower west coasts of Florida, serving more than 9.5 million people through approximately 4.8 million customer accounts. At December 31, 2015, FPL's service territory and plant locations are as follows (see Item 2. Properties - Generation Facilities):



FRANCHISE AGREEMENTS AND COMPETITION

FPL's service to its retail customers is provided primarily under franchise agreements negotiated with municipalities or counties. Alternatively, municipalities and counties may form their own utility companies to provide service to their residents. In a very few cases, an FPL franchise agreement provides the respective municipality the right to buy the electrical assets serving local residents at the end of the agreement. However, during the term of a franchise agreement, which is typically 30 years, the municipality or county agrees not to form its own utility, and FPL has the right to offer electric service to residents. FPL currently holds 179 franchise agreements with various municipalities and counties in Florida with varying expiration dates through 2046. None of these franchise agreements expire in 2016, two expire in 2017 and 177 expire during the period 2018 through 2046. These franchise agreements cover approximately 88% of FPL's retail customer base in Florida. Negotiations are ongoing to renew the franchise agreements that expire in 2017. FPL considers its franchises to be adequate for the conduct of its business. FPL also provides service to 12 other municipalities and to 21 unincorporated areas within its service area without franchise agreements pursuant to the general obligation to serve as a public utility. FPL relies upon Florida law for access to public rights of way.

Because any customer may elect to provide his/her own electric services, FPL effectively must compete for an individual customer's business. As a practical matter, few customers provide their own service at the present time since FPL's cost of service is substantially lower than the cost of self-generation for the vast majority of customers. Changing technology, economic conditions and other factors could alter the favorable relative cost position that FPL currently enjoys; however, FPL seeks as a matter of strategy to ensure that it delivers superior value, in the form of high reliability, low bills and excellent customer service.

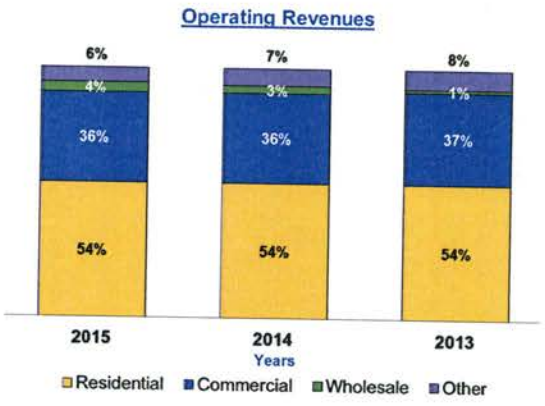
In addition to self-generation by residential, commercial and industrial customers, FPL also faces competition from other suppliers of electrical energy to wholesale customers and from alternative energy sources. In each of 2015, 2014 and 2013, operating revenues from wholesale and industrial customers combined represented approximately 5%, 5% and 3%, respectively, of FPL's total operating revenues.

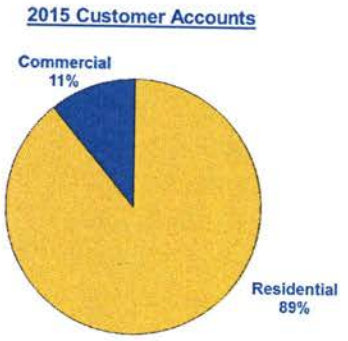
The FPSC promotes cost competitiveness in the building of new steam and solar generating capacity of 75 MW or greater by requiring investor-owned electric utilities, including FPL, to issue an RFP except when the FPSC determines that an exception from the RFP process is in the public interest. The RFP process allows independent power producers and others to bid to supply the new generating capacity. If a bidder has the most cost-effective alternative, meets other criteria such as financial viability and demonstrates adequate expertise and experience in building and/or operating generating capacity of the type proposed, the investor-owned electric utility would seek to negotiate a purchased power agreement with the selected bidder and request that the FPSC approve the terms of the purchased power agreement and, if appropriate, provide the required authorization for the construction of the bidder's generating capacity.

New nuclear power plants are exempt from the RFP requirement. See FPL Sources of Generation - Nuclear Operations below.

CUSTOMERS AND REVENUE

FPL's primary source of operating revenues is from its retail customer base; it also serves a limited number of wholesale customers within Florida. FPL revenues from wholesale sales increased in both 2015 and 2014, primarily due to an increase in contracted load served under existing and new wholesale contracts. The percentage of FPL's operating revenues and customer accounts by customer class were as follows:



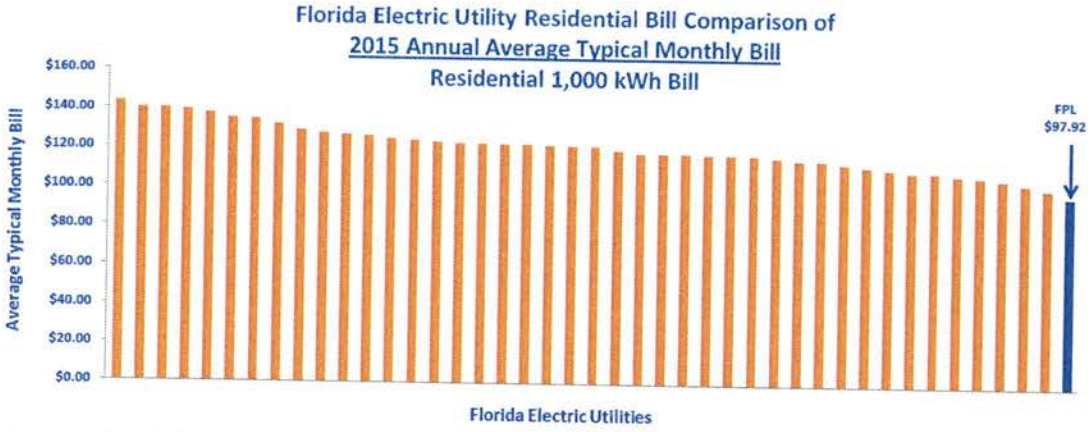


Industrial, Wholesale and Other collectively less than 1%

For both retail and wholesale customers, the prices (or rates) that FPL may charge are approved by regulatory bodies, by the FPSC in the case of retail customers, and by the FERC in the case of wholesale customers. In general, under U.S. and Florida law, regulated rates are intended to cover the cost of providing service, including a reasonable rate of return on invested capital. Since

the regulatory bodies have authority to determine the relevant cost of providing service and the appropriate rate of return on capital employed, there can be no guarantee that FPL will be able to earn any particular rate of return or recover all of its costs through regulated rates. See FPL Regulation below.

FPL seeks to maintain attractive rates for its customers. Since rates are largely cost-based, maintaining low rates requires a strategy focused on developing and maintaining a low-cost position, including the implementation of ideas generated from the cost savings initiative discussed above. A common benchmark used in the electric power industry for comparing rates across companies is the price of 1,000 kWh of consumption per month for a residential customer. FPL's 2015 average bill for 1,000 kWh of monthly residential usage was the lowest among reporting electric utilities within Florida as indicated below:



POWER DELIVERY

FPL provides service to its customers through an integrated transmission and distribution system that links its generation facilities to its customers. FPL also maintains interconnection facilities with neighboring utilities and non-utility generators inside its service territory, enabling it to buy and sell wholesale electricity and to enhance the reliability of its own network and support the reliability of neighboring networks. FPL's transmission system carries high voltage electricity from its generation facilities to substations where the electricity is stepped down to lower voltage levels and is sent through the distribution system to its customers.

A key element of FPL's strategy is to provide highly reliable service to its customers. The transmission and distribution system is susceptible to interruptions or outages from a wide variety of sources including weather, animal and vegetation interference, traffic accidents, equipment failure and many others, and FPL seeks to reduce or eliminate outages where economically practical and to restore service rapidly when outages occur. A common industry benchmark for transmission and distribution system reliability is the system average interruption duration index (SAIDI), which represents the number of minutes the average customer is without power during a time period. For the five years 2010 - 2014, FPL's average annual SAIDI was the best of the investor-owned utilities in Florida. FPL has accelerated its existing storm hardening and reliability program, to continue strengthening its infrastructure against tropical storms and hurricanes. Also, as part of its commitment to building a smarter, more reliable and efficient electric infrastructure, FPL has installed approximately 4.9 million smart meters and more than 35,000 other intelligent devices throughout the electric grid.

FPL SYSTEM CAPABILITY AND LOAD

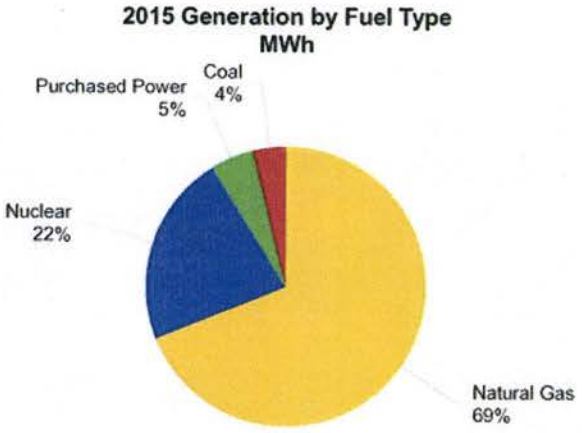
At December 31, 2015, FPL's resources for serving load consisted of 26,073 MW, of which 25,254 MW were from FPL-owned facilities (see Item 2. Properties - Generation Facilities) and approximately 819 MW were available through purchased power agreements (see FPL Sources of Generation - Purchased Power below). FPL customer usage and operating revenues are typically higher during the summer months, largely due to the prevalent use of air conditioning in FPL's service territory. Occasionally, unusually cold temperatures during the winter months result in significant increases in electricity usage for short periods of time. The highest peak load FPL has served to date was 24,346 MW, which occurred on January 11, 2010. FPL had adequate resources available at the time of this peak to meet customer demand.

FPL's projected reserve margin for the summer of 2016 is approximately 22%. This reserve margin is expected to be achieved through the combination of available output from FPL's active generation units, purchased power agreements and the capability to reduce peak demand through the implementation of demand side management programs, including load management which was estimated at December 31, 2015 to be capable of reducing demand by approximately 1,700 MW, and energy efficiency and conservation programs. See FPL Sources of Generation - Fossil Operations and - Nuclear Operations below regarding generation projects currently under construction.

FPL SOURCES OF GENERATION

FPL relies upon a mix of fuel sources for its generation facilities, along with purchased power, in order to maintain the flexibility to achieve a more economical fuel mix by responding to market and industry developments. See descriptions of fossil, nuclear and solar operations below and a listing of FPL's generation facilities in Item 2. Properties - Generation Facilities.

FPL's 2015 fuel mix based on MWh produced, including purchased power, was as follows:



Oil and Solar are collectively less than 1%

Fossil Operations (Natural Gas, Coal and Oil)

At December 31, 2015, FPL owned and operated 70 units that used fossil fuels, primarily natural gas, and had a joint ownership interest in 3 coal units. Combined, the fossil fleet provided 21,766 MW of generating capacity for FPL. These fossil units are out of service from time to time for routine maintenance or on standby during periods of reduced electricity demand. A common industry benchmark for fossil unit reliability is the equivalent forced outage rate (EFOR), which represents a generation unit's inability to provide electricity when required to operate. For the five years 2010 - 2014, FPL's average annual EFOR was in the top decile among its electric utility fossil fleet peers in the U.S.

FPL's natural gas plants require natural gas transportation, supply and storage. FPL has firm transportation contracts in place for existing pipeline capacity with five different transportation suppliers. These agreements provide for an aggregate maximum delivery quantity of 2,069,000 MMBtu/day with expiration dates ranging from 2016 to 2036 that together are expected to satisfy substantially all of the currently anticipated needs for natural gas transportation through the end of 2016. To the extent desirable, FPL also purchases interruptible natural gas transportation service from these natural gas transportation suppliers based on pipeline availability. FPL has several short- and medium-term natural gas supply contracts to provide a portion of FPL's anticipated needs for natural gas. The remainder of FPL's natural gas requirements is purchased in the spot market. FPL has an agreement for the storage of natural gas that expires in 2017. See Note 14 - Contracts.

In 2013, the FPSC approved FPL's 25-year natural gas transportation agreements with each of Sabal Trail and Florida Southeast Connection for a quantity of 400,000 MMBtu/day beginning on May 1, 2017 and increasing to 600,000 MMBtu/day on May 1, 2020. These new agreements, when combined with FPL's existing agreements, are expected to satisfy substantially all of FPL's natural gas transportation needs through at least 2020. FPL's firm commitments under the new agreements are contingent upon the occurrence of certain events, including the FERC's approval of applications by each of Sabal Trail and Florida Southeast Connection for authorization of their pipeline projects and of the application by Transcontinental Gas Pipe Line Company, LLC (Transco) for authorization of a pipeline expansion project and the lease of pipeline capacity to Sabal Trail, as well as completion of construction of the pipeline system to be built by Sabal Trail and Florida Southeast Connection. In February 2016, the FERC issued an order granting the requested authorizations, subject to certain conditions. Sabal Trail, Florida Southeast Connection and Transco are

evaluating the conditions, and one or more of them are currently expected to request a rehearing. See NEER - Generation and Other Operations - Natural Gas Pipelines below and Note 14 - Contracts.

In March 2015, after receiving FPSC approval, a wholly owned subsidiary of FPL partnered with a third party to develop up to 38 natural gas production wells in the Woodford Shale region in southeastern Oklahoma and in return began receiving its ownership share of the natural gas produced from these wells. In July 2015, the FPSC approved a set of guidelines under which FPL could participate in additional natural gas production projects through investments of up to $500 million annually with an escalating annual production cap as a percent of FPL's total natural gas burn, with an emphasis on investing in proven and probable reserves. These investments in long-term natural gas supplies will provide FPL with a physical hedge on the price of natural gas to fuel its fossil generation fleet. FPL will recover the costs associated with the investments in these natural gas production wells through the fuel clause. In 2015, the State of Florida Office of Public Counsel (Office of Public Counsel) and Florida Industrial Power Users Group have each filed notices of appeal to the Florida Supreme Court challenging the FPSC's approval of FPL's initial investment in the Woodford Shale natural gas production wells and challenging the FPSC's approval of the guidelines, which appeals are pending.

St. Johns River Power Park (SJRPP) Units Nos. 1 and 2, coal-fired units in which FPL has a joint ownership interest, have firm coal supply and transportation contracts for all of their fuel and transportation needs through 2017. Scherer Unit No. 4, the other coal-fired unit in which FPL has a joint ownership interest, has firm coal supply contracts for a portion of its fuel needs through 2016, and transportation contracts for all of its needs through 2019 and a portion of its needs through 2028. Any of the remaining fuel requirements for these coal-fired units, as well as for a 250 MW coal-fired generation facility located in Jacksonville, Florida that was purchased in September 2015 (Cedar Bay), will be obtained in the spot market. See Note 14 - Contracts and Note 1 - Rate Regulation. With respect to its oil plants, FPL obtains its fuel requirements in the spot market.

Capital Initiatives

New Generation Facility Proposed - In January 2016, the FPSC approved FPL's proposal to build a new approximately 1,600 MW natural gas-fired combined-cycle unit in Okeechobee County, Florida, with a planned in-service date of mid-2019. This new unit is also subject to approval by the Siting Board (comprised of the governor and cabinet) under the Florida Electrical Power Plant Siting Act, which decision is expected by the end of 2016.

Modernization Project - FPL is in the process of modernizing its Port Everglades power plant to a high-efficiency natural gas-fired unit that is expected to provide approximately 1,240 MW of capacity and be placed in service by April 2016.

Peaker Upgrade Project - FPL is in the process of replacing 44 of its 48 gas turbines at its Lauderdale, Port Everglades and Fort Myers facilities, totaling approximately 1,700 MW of capacity, with 7 high-efficiency, low-emission turbines at its Lauderdale and Fort Myers facilities, totaling approximately 1,610 MW of capacity, by December 2016. In addition, FPL is upgrading 2 additional simple-cycle combustion turbines at its Fort Myers facility, which are expected to add an additional 50 MW of capacity by December 2016.

Nuclear Operations

At December 31, 2015, FPL owned, or had undivided interests in, and operated the following four nuclear units with a total net generating capacity of 3,453 MW.

Facility	MW	Operating License Expiration Dates
St. Lucie Unit No. 1	981	2036
St. Lucie Unit No. 2	840	2043
Turkey Point Unit No. 3	811	2032
Turkey Point Unit No. 4	821	2033

FPL has several contracts for the supply of uranium and the conversion, enrichment and fabrication of nuclear fuel with expiration dates ranging from late February 2016 through 2031. See Note 14 - Commitments. NRC regulations require FPL to submit a plan for decontamination and decommissioning five years before the projected end of plant operation. FPL's current plans, under the applicable operating licenses, provide for prompt dismantlement of Turkey Point Units Nos. 3 and 4 with decommissioning activities commencing in 2032 and 2033, respectively. Current plans provide for St. Lucie Unit No. 1 to be mothballed beginning in 2036 with decommissioning activities to be integrated with the prompt dismantlement of St. Lucie Unit No. 2 commencing in 2043.

Projects to Add Additional Capacity. FPL's need petition for two additional nuclear units at its Turkey Point site was approved by the FPSC in 2008 and FPL is moving forward with activities necessary to obtain all permits, licenses and approvals necessary for construction and operation of the units. The two units are expected to add a total of approximately 2,200 MW of capacity. The timing of commercial operation will be subject to various regulatory approvals from the FPSC and other agencies which will be required throughout the licensing and development processes and the nuclear units are expected to be placed in-service in 2027 and 2028. The NRC's decision regarding issuance of the licenses for the two units is expected in mid-2017.

Nuclear Unit Scheduled Refueling Outages. FPL's nuclear units are periodically removed from service to accommodate normal refueling and maintenance outages, including inspections, repairs and certain other modifications. Scheduled nuclear refueling outages typically require the unit to be removed from service for variable lengths of time. The following table summarizes each unit's next scheduled refueling outage:

Facility	Next Scheduled Refueling Outage
St. Lucie Unit No. 1	September 2016
St. Lucie Unit No. 2	March 2017
Turkey Point Unit No. 3	March 2017
Turkey Point Unit No. 4	March 2016

Spent Nuclear Fuel. FPL's nuclear facilities use both on-site storage pools and dry storage casks to store spent nuclear fuel generated by these facilities, which are expected to provide sufficient storage of spent nuclear fuel at these facilities through license expiration. In 2014, the NRC issued its Continued Storage of Spent Nuclear Fuel Rule which supports the NRC's determination that licensees can safely store spent nuclear fuel at nuclear power plants indefinitely. Various parties have filed petitions with the U.S. Court of Appeals for the District of Columbia Circuit (D.C. Circuit) challenging the rule and requesting that the NRC suspend final reactor licensing decisions in all open NRC licensing proceedings (including the licensing proceeding for two additional nuclear units at FPL's Turkey Point site) alleging that the rule is deficient. Briefs were filed in November 2015 and oral argument has been scheduled for late February 2016.

Nuclear Waste Policy Act of 1982, as amended (Nuclear Waste Policy Act) - Under the Nuclear Waste Policy Act, the DOE is responsible for the development of a repository for the disposal of spent nuclear fuel and high-level radioactive waste. As required by the Nuclear Waste Policy Act, FPL is a party to contracts with the DOE to provide for disposal of spent nuclear fuel from its nuclear units.

The DOE was required to construct permanent disposal facilities and take title to and provide transportation and disposal for spent nuclear fuel by January 31, 1998 for a specified fee based on current generation from nuclear power plants which fee was subsequently set to zero effective May 2014. The DOE did not meet its statutory obligation for disposal of spent nuclear fuel under the Nuclear Waste Policy Act. In 2009, FPL and certain of FPL's nuclear plant joint owners entered into a settlement agreement (spent fuel settlement agreement) with the U.S. government agreeing to dismiss with prejudice lawsuits filed against the U.S. government seeking damages caused by the DOE's failure to dispose of spent nuclear fuel from FPL's nuclear plants. The spent fuel settlement agreement permits FPL to make annual filings to recover certain spent fuel storage costs incurred by FPL which are reimbursable by the U.S. government on an annual basis.

Yucca Mountain - In 2010, the DOE filed a motion with the NRC to withdraw its license application for a nuclear waste repository at Yucca Mountain, which request was denied. In 2011, the NRC issued an order suspending the Yucca Mountain licensing proceeding, which order was challenged, and in 2013, the D.C. Circuit issued an order requiring the NRC to proceed with the legally mandated licensing process for a nuclear waste repository at Yucca Mountain. The NRC has completed the technical review of the application and is planning to supplement the DOE's environmental impact statement. Certain requirements must be met before the NRC can issue a license for the repository.

Solar Operations

Solar generation can be provided primarily through two conventions: utility-owned and customer-owned or leased. In utility-owned solar generation, the energy generated goes directly to the electric grid, whereas customer-owned or leased solar generation generally goes directly to the location it is serving with any excess over that local need being fed back to the electric grid. There are two principal solar technologies used for utility-scale projects: PV and thermal. At December 31, 2015, FPL owned and operated two solar PV generation facilities, which provided a total of 35 MW of generating capacity, and a 75 MW solar thermal hybrid facility. FPL supports the advancement of solar generation primarily for its fuel diversity and emissions reduction benefits, and plans to continue to support, study and pursue solar generation that is beneficial for FPL's customers. FPL is in the process of building three solar PV projects that are expected to provide approximately 74 MW each and be placed into service by the end of 2016.

Purchased Power

In addition to owning generation facilities, FPL also purchases power and capacity from non-utility generators and other utilities to meet customer demand through long-term purchased power agreements. As of December 31, 2015, FPL's long-term purchased power agreements provided for the purchase of approximately 819 MW of power with expiration dates ranging from 2021 through 2034. See Note 14 - Contracts. On occasion, FPL may procure short-term power and capacity for both economic and reliability purposes. In September 2015, FPL assumed ownership of Cedar Bay and terminated FPL's long-term purchased power agreement for substantially all of the facility's capacity and energy. See Note 1 - Rate Regulation.

FPL ENERGY MARKETING AND TRADING

FPL's Energy Marketing & Trading division (EMT) buys and sells wholesale energy commodities, such as natural gas, oil and electricity. EMT procures natural gas and oil for FPL's use in power generation and sells excess natural gas, oil and electricity. EMT also uses derivative instruments (primarily swaps, options and forwards) to manage the commodity price risk inherent in the purchase and sale of fuel and electricity. Substantially all of the results of EMT's activities are passed through to customers in the fuel or capacity clauses. See FPL Regulation - FPL Rate Regulation below, Management's Discussion - Energy Marketing and Trading and Market Risk Sensitivity and Note 3.

FPL REGULATION

FPL's operations are subject to regulation by a number of federal, state and other organizations, including, but not limited to, the following:

- the FPSC, which has jurisdiction over retail rates, service territory, issuances of securities, planning, siting and construction of facilities, among other things;
- the FERC, which oversees the acquisition and disposition of generation, transmission and other facilities, transmission of electricity and natural gas in interstate commerce, proposals to build interstate natural gas pipelines and storage facilities, and wholesale purchases and sales of electric energy, among other things;
- the NERC, which, through its regional entities, establishes and enforces mandatory reliability standards, subject to approval by the FERC, to ensure the reliability of the U.S. electric transmission and generation system and to prevent major system blackouts;
- the NRC, which has jurisdiction over the operation of nuclear power plants through the issuance of operating licenses, rules, regulations and orders; and
- the EPA, which has the responsibility to maintain and enforce national standards under a variety of environmental laws. The EPA also works with industries and all levels of government, including federal and state governments, in a wide variety of voluntary pollution prevention programs and energy conservation efforts.

FPL Rate Regulation

The FPSC sets rates at a level that is intended to allow FPL the opportunity to collect from retail customers total revenues (revenue requirements) equal to FPL's cost of providing service, including a reasonable rate of return on invested capital. To accomplish this, the FPSC uses various ratemaking mechanisms, including, among other things, base rates and cost recovery clauses.

Base Rates. In general, the basic costs of providing electric service, other than fuel and certain other costs, are recovered through base rates, which are designed to recover the costs of constructing, operating and maintaining the utility system. These basic costs include O&M expenses, depreciation and taxes, as well as a return on FPL's investment in assets used and useful in providing electric service (rate base). At the time base rates are established, the allowed rate of return on rate base approximates the FPSC's determination of FPL's estimated weighted-average cost of capital, which includes its costs for outstanding debt and an allowed ROE. The FPSC monitors FPL's actual regulatory ROE through a surveillance report that is filed monthly by FPL with the FPSC. The FPSC does not provide assurance that any regulatory ROE will be achieved. Base rates are determined in rate proceedings or through negotiated settlements of those proceedings. Proceedings can occur at the initiative of FPL or upon action by the FPSC. Base rates remain in effect until new base rates are approved by the FPSC.

In January 2013, the FPSC issued a final order approving a stipulation and settlement between FPL and several intervenors in FPL's base rate proceeding (2012 rate agreement). Key elements of the 2012 rate agreement, which is effective from January 2013 through December 2016, include, among other things, the following:

- New retail base rates and charges were established in January 2013 resulting in an increase in retail base revenues of $350 million on an annualized basis.
- FPL's allowed regulatory ROE is 10.50%, with a range of plus or minus 100 basis points. If FPL's earned regulatory ROE falls below 9.50%, FPL may seek retail base rate relief. If the earned regulatory ROE rises above 11.50%, any party to the 2012 rate agreement other than FPL may seek a review of FPL's retail base rates.
- Retail base rates will be increased by the annualized base revenue requirements for FPL's three modernization projects (Cape Canaveral, Riviera Beach and Port Everglades) as each of the modernized power plants becomes operational. (Cape Canaveral and Riviera Beach became operational in April 2013 and April 2014, respectively, and Port Everglades is expected to be operational by April 2016.)
- Cost recovery of WCEC Unit No. 3, which was placed in service in May 2011, will continue to occur through the capacity clause.
- Subject to certain conditions, FPL may amortize, over the term of the 2012 rate agreement, a depreciation reserve surplus remaining at the end of 2012 under a previous rate agreement (approximately $224 million) and may amortize a portion of FPL's fossil dismantlement reserve up to a maximum of $176 million (collectively, the reserve), provided that in any year of the 2012 rate agreement, FPL must amortize at least enough reserve to maintain a 9.50% earned regulatory ROE but may not amortize any reserve that would result in an earned regulatory ROE in excess of 11.50%. See below regarding a subsequent reduction in the reserve amount.

- Future storm restoration costs would be recoverable on an interim basis beginning 60 days from the filing of a cost recovery petition, but capped at an amount that could produce a surcharge of no more than $4 for every 1,000 kWh of usage on residential bills during the first 12 months of cost recovery. Any additional costs would be eligible for recovery in subsequent years. If storm restoration costs exceed $800 million in any given calendar year, FPL may request an increase to the $4 surcharge to recover the amount above $800 million.
- An incentive mechanism whereby customers will receive 100% of certain gains, including, but not limited to, gains from the purchase and sale of electricity and natural gas (including transportation and storage), up to a specified threshold; gains exceeding that specified threshold will be shared by FPL and its customers (incentive mechanism).

In August 2015, the FPSC approved a stipulation and settlement between the Office of Public Counsel and FPL regarding issues relating to the ratemaking treatment for FPL's purchase of Cedar Bay. As part of this settlement, the amount of the reserve was reduced by $30 million to $370 million, unless FPL needs the entire $400 million reserve to maintain a minimum regulatory ROE of 9.50%. In October 2015, the Florida Industrial Power Users Group filed a notice of appeal challenging the FPSC's approval of this settlement, which is pending before the Florida Supreme Court.

In January 2016, FPL filed a formal notification with the FPSC indicating its intent to initiate a base rate proceeding, consisting of a four-year rate plan that would begin in January 2017 following the expiration of the 2012 rate agreement at the end of 2016. The notification stated that, based on preliminary estimates, FPL expects to request an increase to base annual revenue requirements of (i) approximately $860 million effective January 2017, (ii) approximately $265 million effective January 2018, and (iii) approximately $200 million effective when the proposed natural gas-fired combined-cycle unit in Okeechobee County, Florida becomes operational, which is expected to occur in mid-2019 (see FPL Sources of Generation - Fossil Operations - Capital Initiatives above). Under the proposed rate plan, FPL commits that if its requested adjustments to base annual revenue requirements are approved, it will not request further adjustments for 2020. In addition, FPL expects to propose an allowed regulatory ROE midpoint of 11.50%, which includes a 50 basis point performance adder. FPL expects to file its formal request to initiate a base rate proceeding in March 2016.

Cost Recovery Clauses. Cost recovery clauses, which are designed to permit full recovery of certain costs and provide a return on certain assets allowed to be recovered through the various clauses, include substantially all fuel, purchased power and interchange expense, certain construction-related costs and conservation and certain environmental-related costs. Cost recovery clause costs are recovered through levelized monthly charges per kWh or kW, depending on the customer's rate class. These cost recovery clause charges are calculated at least annually based on estimated costs and estimated customer usage for the following year, plus or minus true-up adjustments to reflect the estimated over or under recovery of costs for the current and prior periods. An adjustment to the levelized charges may be approved during the course of a year to reflect revised estimates.

Fuel costs and energy charges under the purchased power agreements are recovered from customers through the fuel clause, the most significant of the cost recovery clauses in terms of operating revenues. FPL uses a risk management fuel procurement program which has been approved by the FPSC. The FPSC reviews the program activities and results for prudence annually as part of its review of fuel costs. The program is intended to manage fuel price volatility by locking in fuel prices for a portion of FPL's fuel requirements. See FPL Energy Marketing and Trading above, Note 1 - Rate Regulation and Note 3. Costs associated with FPL's investments in natural gas production wells are also recovered through the fuel clause. See FPL Sources of Generation - Fossil Operations above.

Capacity payments to non-utility generators and other utilities, the cost of WCEC Unit No. 3 (reported as retail base revenues) and a portion of the acquisition cost of Cedar Bay, among other things, are recovered from customers through the capacity clause. See Note 1 - Rate Regulation. In accordance with the FPSC's nuclear cost recovery rule, FPL also recovers pre-construction costs and carrying charges (equal to a pretax AFUDC rate) on construction costs for new nuclear capacity through the capacity clause. As property related to the new nuclear capacity goes into service, construction costs and a return on investment are recovered through base rate increases effective beginning the following January. See FPL Sources of Generation - Nuclear Operations above.

Costs associated with implementing energy conservation programs are recovered from customers through the energy conservation cost recovery clause. Certain costs of complying with federal, state and local environmental regulations enacted after April 1993 and costs associated with FPL's three operating solar facilities are recovered through the environmental cost recovery clause (environmental clause).

The FPSC has the authority to disallow recovery of costs that it considers excessive or imprudently incurred. These costs may include, among others, fuel and O&M expenses, the cost of replacing power lost when fossil and nuclear units are unavailable, storm restoration costs and costs associated with the construction or acquisition of new facilities.

FERC

The Federal Power Act grants the FERC exclusive ratemaking jurisdiction over wholesale sales of electricity and the transmission of electricity and natural gas in interstate commerce. Pursuant to the Federal Power Act, electric utilities must maintain tariffs and rate schedules on file with the FERC which govern the rates, terms and conditions for the provision of FERC-jurisdictional wholesale power and transmission services. The Federal Power Act also gives the FERC authority to certify and oversee a national electric reliability organization with authority to establish and independently enforce mandatory reliability standards applicable to all users, owners and operators of the bulk-power system. See NERC below. Electric utilities are subject to accounting, record-keeping and

reporting requirements administered by the FERC. The FERC also places certain limitations on transactions between electric utilities and their affiliates.

NERC

The NERC has been certified by the FERC as the national electric reliability organization. The NERC's mandate is to ensure the reliability and security of the North American bulk-power system through the establishment and enforcement of reliability standards approved by FERC. The NERC's regional entities also enforce reliability standards approved by the FERC. FPL is subject to these reliability standards and incurs costs to ensure compliance with continually heightened requirements, and can incur significant penalties for failing to comply with them.

FPL Environmental Regulation

FPL is subject to environmental laws and regulations and is affected by some of the emerging issues described in the NEE Environmental Matters section below. FPL expects to seek recovery through the environmental clause for compliance costs associated with any new environmental laws and regulations.

FPL EMPLOYEES

FPL had approximately 8,800 employees at December 31, 2015. Approximately 34% of the employees are represented by the International Brotherhood of Electrical Workers (IBEW) under a collective bargaining agreement with FPL that expires October 31, 2017.

II. NEER

NEER was formed in 1998 to aggregate NEE's competitive energy businesses. It is a limited liability company organized under the laws of Delaware and is a wholly owned subsidiary of NEECH. Through its subsidiaries, NEER currently owns, develops, constructs, manages and operates electric generation facilities in wholesale energy markets primarily in the U.S., as well as in Canada and Spain. See Note 15. NEER is one of the largest wholesale generators of electric power in the U.S., with 21,140 MW of generating capacity across 25 states, 4 Canadian provinces and 1 Spanish province as of December 31, 2015. NEER produces the majority of its electricity from clean and renewable sources as described more fully below. NEER is the largest generator in North America of electric power from wind and utility-scale solar energy projects based on MWh produced.

NEER also engages in energy-related commodity marketing and trading activities, including entering into financial and physical contracts, to hedge the production from its generation assets that is not sold under long-term power supply agreements. These contracts primarily include power and gas commodities and their related products, as well as providing full energy and capacity requirements services primarily to distribution utilities in certain markets and offering customized power and gas and related risk management services to wholesale customers. In addition, NEER participates in natural gas, natural gas liquids and oil production through non-operating ownership interests, and in pipeline infrastructure development, construction, management and operations, through either wholly owned subsidiaries or noncontrolling or joint venture interests, hereafter referred to as the gas infrastructure business. NEER also hedges the expected output from its gas infrastructure production assets to protect against price movements. During the fourth quarter of 2015, the natural gas pipeline projects that were previously reported in Corporate and Other were moved to the NEER segment reflecting the overall scale of the natural gas pipeline investments and management of these projects within NEER's gas infrastructure business. See Note 15.

As discussed in the Overview above, during 2014, NEP was formed to acquire, manage and own contracted clean energy projects with stable, long-term cash flows through a limited partner interest in NEP OpCo. Through an indirect wholly owned subsidiary, NEE owns 101,440,000 common units of NEP OpCo representing a noncontrolling interest in NEP's operating projects of approximately 76.8% as of December 31, 2015. NEE owns a controlling general partner interest in NEP and consolidates NEP for financial reporting purposes. See Note 1 - NextEra Energy Partners, LP. As of December 31, 2015, NEP, through the combination of NEER's contribution of energy projects to NEP OpCo in connection with NEP's IPO in July 2014 and the acquisition of additional energy projects from NEER in 2015, owns a portfolio of 19 wind and solar projects with generating capacity totaling approximately 2,210 MW and long-term contracted natural gas pipeline assets as discussed below. In addition, NEP OpCo has a right of first offer for certain of NEER's assets (ROFO assets) if NEER should seek to sell the assets. The ROFO assets remaining as of December 31, 2015, include contracted wind and solar projects, some of which are under construction, with a combined capacity of approximately 1,076 MW. Included in the ROFO assets are three solar projects that, upon completion of construction, are expected to have a total generating capacity of 277 MW. In 2015, NEP OpCo issued 2 million NEP OpCo Class B Units to NEER in exchange for an approximately 50% ownership interest in the three solar projects. NEER, as holder of the Class B Units, will retain 100% of the economic interests if, and until, NEER offers to sell the economic interests to NEP and NEP accepts such offer. In October 2015, NEP completed the acquisition of the membership interests in NET Holdings Management, LLC (Texas pipeline business), a developer, owner and operator of a portfolio of seven intrastate long-term contracted natural gas pipeline assets located in Texas (Texas pipelines). See Generation and Other Operations - Contracted, Merchant and Other Operations - Other Operations below.

MARKETS AND COMPETITION

Electricity markets in the U.S. and Canada are regional and diverse in character. All are extensively regulated, and competition in these markets is shaped and constrained by regulation. The nature of the products offered varies based on the specifics of regulation in each region. Generally, in addition to the natural constraints on pricing freedom presented by competition, NEER may also face specific constraints in the form of price caps, or maximum allowed prices, for certain products. NEER's ability to sell the output of its generation facilities may also be constrained by available transmission capacity, which can vary from time to time and can have a significant impact on pricing.

The degree and nature of competition that NEER faces is different in wholesale markets and in retail markets. During 2015, approximately 92% of NEER's revenue was derived from wholesale electricity markets.

Wholesale power generation is a capital-intensive, commodity-driven business with numerous industry participants. NEER primarily competes on the basis of price, but believes the green attributes of NEER's generation assets, its creditworthiness and its ability to offer and manage reliable customized risk solutions to wholesale customers are competitive advantages. Wholesale power generation is a regional business that is highly fragmented relative to many other commodity industries and diverse in terms of industry structure. As such, there is a wide variation in terms of the capabilities, resources, nature and identity of the companies NEER competes with depending on the market. In wholesale markets, customers' needs are met through a variety of means, including long-term bilateral contracts, standardized bilateral products such as full requirements service and customized supply and risk management services.

In general, U.S. electricity markets encompass three classes of services: energy, capacity and ancillary services. Energy services relate to the physical delivery of power; capacity services relate to the availability of MW capacity of a power generation asset; and ancillary services are other services related to power generation assets, such as load regulation and spinning and non-spinning reserves. The exact nature of these classes of services is defined in part by regional tariffs. Not all regions have a capacity services class, and the specific definitions of ancillary services vary from region to region.

RTOs and ISOs exist in a number of regions within which NEER operates to coordinate generation and transmission across wide geographic areas and to run markets. NEER also has operations that fall within the Western Electricity Coordinating Council reliability region that are not under the jurisdiction of an established RTO or ISO. Although each RTO and ISO may have differing objectives and structures, some benefits of these entities include regional planning, managing transmission congestion, developing larger wholesale markets for energy and capacity, maintaining reliability and facilitating competition among wholesale electricity providers. NEER has operations that fall within the following RTOs and ISOs:

- Alberta Electric System Operator
- California Independent System Operator
- ERCOT
- Independent Electricity System Operator (in Ontario)
- ISO New England (ISO-NE)
- Midcontinent Independent System Operator, Inc.
- New York Independent System Operator
- PJM
- Southwest Power Pool

NEER competes in different regions to different degrees, but in general it seeks to enter into long-term bilateral contracts for the full output of its generation facilities, and, as of December 31, 2015, approximately 66% of NEER's generating capacity is fully committed under long-term contracts. Where long-term contracts are not in effect, NEER sells the output of its facilities into daily spot markets. In such cases, NEER will frequently enter into shorter term bilateral contracts, typically of less than three years duration, to hedge the price risk associated with selling into a daily spot market. Such bilateral contracts, which may be hedges either for physical delivery or for financial (pricing) offset, may only protect a portion of the revenue that NEER expects to derive from the associated generation facility and may not qualify for hedge accounting under GAAP. Contracts that serve the economic purpose of hedging some portion of the expected revenue of a generation facility but are not recorded as hedges under GAAP are referred to as "non-qualifying hedges" for adjusted earnings purposes. See Management's Discussion - Overview - Adjusted Earnings.

Certain facilities within the NEER wind and solar generation portfolio produce renewable energy credits (RECs) and other environmental attributes which are typically sold along with the energy from the plants under long-term contracts, or may be sold separately for the wind and solar generation not sold under long-term contracts. The purchasing party is solely entitled to the reporting rights and ownership of the environmental attributes.

While the majority of NEER's revenue is derived from the output of its generation facilities, NEER is also an active competitor in several regions in the wholesale full requirements business and in providing structured and customized power and fuel products and services to a variety of customers. In the full requirements service, typically, the supplier agrees to meet the customer's needs for a full range of products for every hour of the day, at a fixed price, for a predetermined period of time, thereby assuming the risk

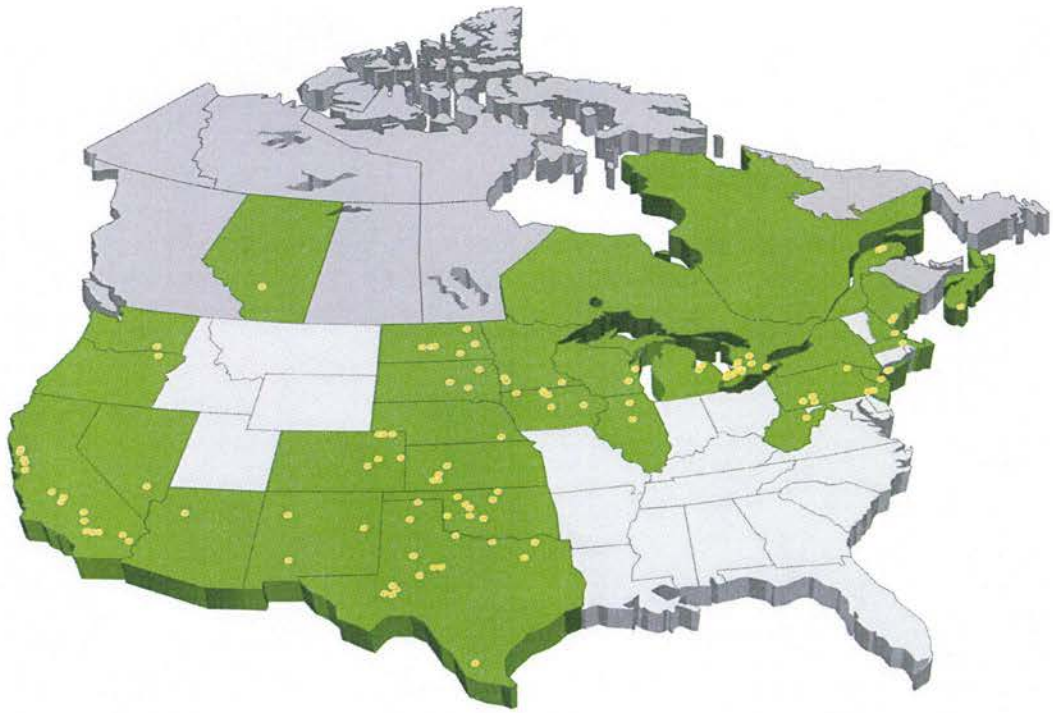
of fluctuations in the customer's volume requirements.

Expanded competition in a frequently changing regulatory environment presents both opportunities and risks for NEER. Opportunities exist for the selective acquisition of generation assets and for the construction and operation of efficient facilities that can sell power in competitive markets. NEER seeks to reduce its market risk by having a diversified portfolio by fuel type and location, as well as by contracting for the future sale of a significant amount of the electricity output of its facilities.

GENERATION AND OTHER OPERATIONS

NEER sells products associated with its own generation facilities (energy, capacity, RECs and ancillary services) in competitive markets in regions where those facilities are located. Customer transactions may be supplied from NEER generation facilities or from purchases in the wholesale markets, or from a combination thereof.

At December 31, 2015, the locations of NEER's generation facilities in North America are as follows:



- NEER generation facilities in operation
- U.S. states and Canadian provinces with projects in operation

At December 31, 2015, NEER managed or participated in the management of essentially all of its generation projects in which it has an ownership interest.

NEER categorizes its portfolio in a number of different ways for different business purposes. See a listing of NEER's generation facilities in Item 2. Properties - Generation Facilities. The following presentation details NEER operations and fuel/technology mix, which NEE commonly uses in communicating information about its business:

Contracted, Merchant and Other Operations

NEER's portfolio of generation operations based on the presence/absence of long-term power sales agreements and other operations is described below.

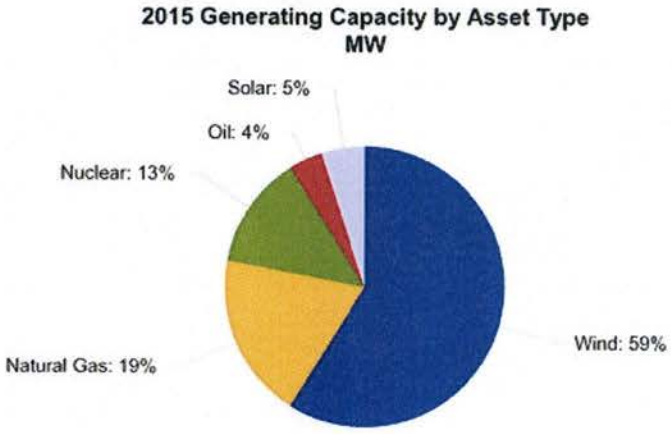
Contracted Generation Assets. Contracted generation assets are generation facilities with long-term power sales agreements for substantially all of their capacity and/or energy output and certain wind assets where long-term power sales agreements are expected to be executed. At December 31, 2015, NEER had 14,317 MW of contracted generation assets, substantially all of which have long-term power sales agreements, representing approximately 66% of its total operating generation portfolio. Essentially all of the output of these contracted generation assets were under power sales agreements, with a weighted-average remaining contract life of approximately 15 years, and the nuclear facilities have firm nuclear fuel-related contracts with expiration dates ranging from late February 2016 through 2032. See Note 14 - Contracts. Of the total capacity of contracted generation assets, 10,571 MW is wind generation, 1,621 MW is nuclear generation and 1,121 MW is solar generation. The remaining 1,004 MW use fuels such as natural gas and oil.

Merchant Generation Assets. Merchant generation assets are generation facilities that do not have long-term power sales agreements to sell their capacity and/or energy output, or, in the case of certain wind assets, are not expected to have long-term power sales agreements, and therefore require active marketing and hedging. At December 31, 2015, NEER's portfolio of merchant generation assets consists of 6,823 MW of owned wind, nuclear, natural gas, oil and solar generation facilities, including 846 MW of peak generation facilities. Approximately 59% (based on net MW capability) of the natural gas-fueled merchant generation assets have natural gas transportation agreements to provide for fluctuating natural gas requirements. See NEER Fuel/Technology Mix - Natural Gas Facilities below and Note 14 - Contracts. Derivative instruments (primarily swaps, options, futures and forwards) are generally used to lock in pricing and manage the commodity price risk inherent in power sales and fuel purchases. Managing market risk through these instruments introduces other types of risk, primarily counterparty, credit and operational risks.

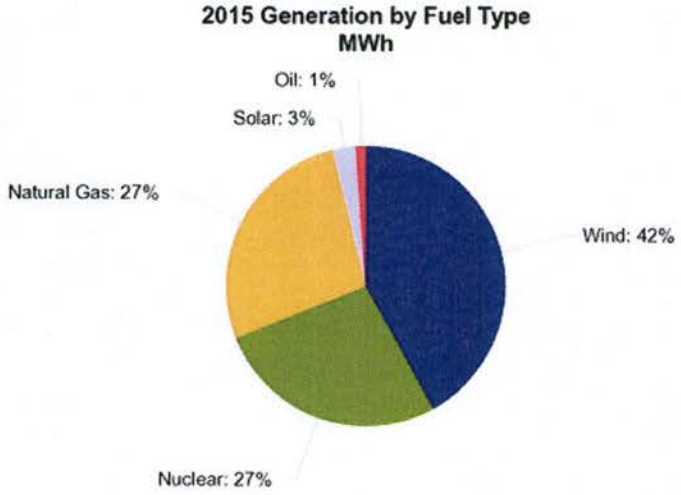
Other Operations. NEER's operations also include the gas infrastructure business and the customer supply and proprietary power and gas trading businesses. The gas infrastructure business includes non-operating ownership interests in investments located in oil and gas shale formations primarily in the Midwest and South regions of the U.S. NEER continues to pursue in a selective way opportunities in the upstream (exploration and production) area when it believes the return potential is attractive and to gain insight into the natural gas industry. The gas infrastructure business also has investments in pipeline infrastructure assets located primarily in the South, Southeast and Northeast regions of the U.S. During 2015, NEER, through NEP, acquired the Texas pipeline business, including pipelines with a total existing capacity of approximately 4 Bcf per day, of which 3 Bcf per day is contracted with firm ship-or-pay contracts that have a weighted-average remaining contract life of approximately 16 years as of December 31, 2015. In addition, subsidiaries of NEER are pursuing regulatory approvals to move forward with three natural gas pipeline projects either directly or through joint venture investments. See Natural Gas Pipelines for a description of the natural gas pipelines. See NEER Customer Supply and Proprietary Power and Gas Trading for a description of the customer supply and propriety power and gas trading businesses.

NEER Fuel/Technology Mix

NEER's power generation is produced using a variety of fuel sources as further described below.



NEER's power generation in terms of MWh produced for the year ended December 31, 2015 by fuel type is as follows:



Wind Facilities

At December 31, 2015, NEER had ownership interests in wind generation facilities with a total net generating capacity of 12,414 MW. NEER operates all of these wind facilities, which are located in 19 states in the U.S. and 4 provinces in Canada. During 2015, NEER added approximately 1,031 MW of new U.S. wind generation and 176 MW of new Canadian wind generation, and sold, decommissioned or dismantled wind facilities with generating capacity totaling 220 MW. NEER expects to add new contracted wind generation of approximately 1,400 MW in 2016. See Policy Incentives for Renewable Energy Projects below for additional discussion of NEER's expectations regarding wind development and construction.

Solar Facilities

At December 31, 2015, NEER had ownership interests in PV and solar thermal facilities with a total net generating capacity of 1,026 MW, including approximately 285 MW added in 2015. NEER operates the majority of these solar facilities, which are located in 4 states in the U.S. and 1 province in Canada. NEER expects to add new contracted solar generation of approximately 1,100 MW in 2016. In addition, NEER and its affiliates own solar thermal facilities with generating capacity of 99.8 MW in Spain (Spain solar projects). See Note 14 - Spain Solar Projects for developments that impact the Spain solar projects.

Natural Gas Facilities

At December 31, 2015, NEER had ownership interests in and operated natural gas facilities with a total net generating capacity of 4,083 MW. Approximately 1,004 MW of this net generating capacity is from contracted natural gas assets located throughout the Northeastern U.S. In November 2015, a subsidiary of NEER entered into an agreement to sell its ownership interest in its merchant natural gas generation facilities located in Texas, which have a total generating capacity of 2,884 MW at December 31, 2015. The transaction is expected to close in the first quarter of 2016, pending the receipt of necessary regulatory approvals and satisfaction of other customary closing conditions.

Nuclear Facilities

At December 31, 2015, NEER owned, or had undivided interests in, and operated the following four nuclear units with a total net generating capacity of 2,721 MW.

Facility	Location	MW	Portfolio Category	Operating License Expiration Dates
Seabrook	New Hampshire	1,100	Merchant	2030 (a)
Duane Arnold	Iowa	431	Contracted(b)	2034
Point Beach Unit No. 1	Wisconsin	595	Contracted(c)	2030
Point Beach Unit No. 2	Wisconsin	595	Contracted(c)	2033

(a) In 2010, NEER filed an application with the NRC to renew Seabrook's operating license for an additional 20 years, which license renewal is dependent on NRC regulatory approvals.
(b) NEER sells all of its share of the output of Duane Arnold under a long-term contract expiring in December 2025.
(c) NEER sells all of the output of Point Beach Units Nos. 1 and 2 under long-term contracts through their current operating license expiration dates.

NEER's nuclear facilities have several contracts for the supply of uranium and the conversion, enrichment and fabrication of nuclear fuel with expiration dates ranging from late February 2016 through 2032. See Note 14 - Contracts. NEER is responsible for all nuclear unit operations and the ultimate decommissioning of the nuclear units, the cost of which is shared on a pro-rata basis by the joint owners for the jointly-owned units. NRC regulations require plant owners to submit a plan for decontamination and decommissioning five years before the projected end of plant operation.

Nuclear Unit Scheduled Refueling Outages. NEER's nuclear units are periodically removed from service to accommodate normal refueling and maintenance outages, including inspections, repairs and certain other modifications. Scheduled nuclear refueling outages typically require the unit to be removed from service for variable lengths of time. The following table summarizes each unit's next scheduled refueling outage:

Facility	Next Scheduled Refueling Outage
Seabrook	April 2017
Duane Arnold	October 2016
Point Beach Unit No. 1	March 2016
Point Beach Unit No. 2	March 2017

Spent Nuclear Fuel. NEER's nuclear facilities use both on-site storage pools and dry storage casks to store spent nuclear fuel generated by these facilities, which are expected to provide sufficient storage of spent nuclear fuel at these facilities through license expiration.

As owners and operators of nuclear facilities, certain subsidiaries of NEER are subject to the Nuclear Waste Policy Act and are parties to the spent fuel settlement agreement described in FPL - FPL Sources of Generation - Nuclear Operations.

Oil Facilities

At December 31, 2015, NEER had 796 MW of oil-fired generation facilities located in Maine.

Policy Incentives for Renewable Energy Projects

U.S. federal, state and local governments have established various incentives to support the development of renewable energy projects. These incentives include accelerated tax depreciation, PTCs, ITCs, cash grants, tax abatements and RPS programs. Wind and solar projects qualify for the U.S. federal Modified Accelerated Cost Recovery System depreciation schedule. This schedule allows a taxpayer to recognize the depreciation of tangible property on a five-year basis even though the useful life of such property is generally greater than five years. The PTC currently provides an income tax credit for the production of electricity from utility-scale wind turbines for the first ten years of commercial operation. This incentive was created under the Energy Policy Act of 1992 and has been extended several times. Most recently, in December 2015, the PTC was extended for five years, subject to the phase down schedule in the table below. The Internal Revenue Service (IRS) previously issued guidance related to which projects will qualify for the PTC including, among other things, criteria for the beginning of construction of a project and the continuous program of construction or the continuous efforts to advance the project to completion. The IRS has not updated its guidance for the December 2015 extension. Alternatively, wind project developers can choose to receive a 30% ITC, in lieu of the PTC, subject to the phase down schedule in the table below.

Solar project developers are also eligible to receive a 30% ITC for new solar projects, or can elect to receive an equivalent cash payment from the U.S. Department of Treasury for the value of the 30% ITC (convertible ITC) for qualifying solar projects where construction began before the end of 2011 and the projects are placed in service before 2017. In December 2015, the 30% ITC for new solar projects was extended, subject to the following phase down schedule.

	Year construction of project begins							
	2015	2016	2017	2018	2019	2020	2021	2022
PTC[a]	100%	100%	80%	60%	40%	-	-	-
Wind ITC	30%	30%	24%	18%	12%	-	-	-
Solar ITC[b]	30%	30%	30%	30%	30%	26%	22%	10%

(a) Percentage of the full PTC available for wind projects that begin construction during the applicable year.
(b) ITC is limited to 10% for projects not placed in service before January 1, 2024.

Other countries, including Canada and Spain, provide for incentives like feed-in-tariffs for renewable energy projects. The feed-in-tariffs promote renewable energy investments by offering long-term contracts to renewable energy producers, typically based on the cost of generation of each technology.

Natural Gas Pipelines

At December 31, 2015, NEER had approximately $2.5 billion invested in the following natural gas pipelines:

	Miles of Pipeline	Pipeline Location/Route	NEER's Ownership	Total Capacity (per day)	Actual/Expected In-Service Dates
Operational:					
Texas Pipelines[a]	542	South Texas	72.98%[b]	4.05 Bcf	1950 - 2014
In Development or Under Construction:					
Sabal Trail[c]	515	Southwestern Alabama to Central Florida	33%	0.83 Bcf - 1.075 Bcf	Mid-2017 - Mid-2021
Florida Southeast Connection[c]	126	Central Florida to Martin County, Florida	100%	0.64 Bcf	Mid-2017
Mountain Valley Pipeline[d]	301	Marcellus and Utica shale regions to markets in the Mid-Atlantic and Southeast regions of the U.S.	35%[e]	2.00 Bcf	End of 2018

(a) Represents a portfolio of seven natural gas pipelines; of which a third party owns a 10% interest in a 120 mile pipeline with a daily capacity of approximately 2.3 Bcf. There are planned expansion projects for the three largest pipelines in the portfolio (which represent approximately 90% of total capacity per day of the Texas pipelines) that, if completed, are expected to provide an additional 1.5 Bcf of capacity per day by the end of 2017.
(b) Represents NEER's interest in the Texas pipelines.
(c) Construction of the natural gas pipelines is subject to certain conditions. See FPL - FPL Sources of Generation - Fossil Operations and Note 14 - Commitments and - Contracts.
(d) Construction of the natural gas pipeline is subject to certain conditions, including FERC approval. See Note 14 - Commitments.
(e) Represents expected ownership depending on the ultimate size and scope of the natural gas pipeline project.

NEER CUSTOMER SUPPLY AND PROPRIETARY POWER AND GAS TRADING

NEER's customer supply and proprietary power and gas trading businesses engage in energy-related commodity marketing and trading activities, provide commodities-related products to customers and include the operations of a retail electricity provider. PMI, a subsidiary of NEER, buys and sells wholesale energy commodities, such as electricity, natural gas and oil. PMI sells the output from NEER's plants that is not sold under long-term contracts and procures the fossil fuel for use by NEER's generation fleet. One of its primary roles is to manage the commodity risk of NEER's portfolio. PMI uses derivative instruments such as swaps, options, futures and forwards to manage the risk associated with fluctuating commodity prices and to optimize the value of NEER's power generation and gas infrastructure production assets. PMI also markets and trades energy-related commodity products and provides a wide range of electricity and fuel commodity products as well as marketing and trading services to customers. PMI's customer supply business provides full energy and capacity requirements to customers.

The results of the customer supply and proprietary power and gas trading activities are included in NEER's operating results. See Management's Discussion - Energy Marketing and Trading and Market Risk Sensitivity, Note 1 - Energy Trading and Note 3.

NEER REGULATION

The energy markets in which NEER operates are subject to domestic and foreign regulation, as the case may be, including local, state and federal regulation, and other specific rules.

At December 31, 2015, NEER had ownership interests in operating independent power projects located in the U.S. that have received exempt wholesale generator status as defined under the Public Utility Holding Company Act of 2005, which represent approximately 99% of NEER's net generating capacity in the U.S. Exempt wholesale generators own or operate a facility exclusively to sell electricity to wholesale customers. They are barred from selling electricity directly to retail customers. NEER's exempt wholesale generators produce electricity from wind, fossil fuels, solar and nuclear facilities. Essentially all of the remaining 1% of NEER's net generating capacity has qualifying facility status under the PURPA. NEER's qualifying facilities generate electricity primarily from wind, solar and fossil fuels. Qualifying facility status exempts the projects from, among other things, many of the provisions of the Federal Power Act, as well as state laws and regulations relating to rates and financial or organizational regulation of electric utilities. While projects with qualifying facility and/or exempt wholesale generator status are exempt from various restrictions, each project must still comply with other federal, state and local laws, including, but not limited to, those regarding siting, construction, operation, licensing, pollution abatement and other environmental laws.

Additionally, most of the NEER facilities located in the U.S. are subject to FERC regulations and market rules, the NERC's mandatory reliability standards and all of its facilities are subject to environmental laws and the EPA's environmental regulations, and its nuclear facilities are also subject to the jurisdiction of the NRC. See FPL - FPL Regulation for additional discussion of FERC, NERC, NRC and EPA regulations. With the exception of facilities located in ERCOT, the FERC has jurisdiction over various aspects of NEER's business in the U.S., including the oversight and investigation of competitive wholesale energy markets, regulation of the transmission and sale of natural gas, and oversight of environmental matters related to natural gas projects and major electricity policy initiatives. The PUCT has jurisdiction, including the regulation of rates and services, oversight of competitive markets, and enforcement of statutes and rules, over NEER facilities located in ERCOT.

NEER and its affiliates are also subject to federal and provincial or regional regulations in Canada and Spain related to energy operations, energy markets and environmental standards. In Canada, activities related to owning and operating wind and solar projects and participating in wholesale and retail energy markets are regulated at the provincial level. In Ontario, for example, electricity generation facilities must be licensed by the Ontario Energy Board and may also be required to complete registrations and maintain market participant status with the Independent Electricity System Operator, in which case they must agree to be bound by and comply with the provisions of the market rules for the Ontario electricity market as well as the mandatory reliability standards of the NERC.

NEER is subject to environmental laws and regulations, and is affected by some of the emerging issues related to renewable energy resources as described in the NEE Environmental Matters section below. In order to better anticipate potential regulatory changes, NEER continues to actively evaluate and participate in regional market redesigns of existing operating rules for the integration of renewable energy resources and for the purchase and sale of energy commodities.

NEER EMPLOYEES

NEER and its subsidiaries had approximately 5,000 employees at December 31, 2015. Certain subsidiaries of NEER have collective bargaining agreements with the IBEW, the Utility Workers Union of America, the Security Police and Fire Professionals of America and the International Union of Operating Engineers, which collectively represent approximately 18% of NEER's employees. The majority of the collective bargaining agreements have three-year terms and expire between September 2016 and 2019.

III. OTHER NEE OPERATING SUBSIDIARIES

Corporate and Other represents other business activities, primarily NEET and FPL FiberNet. See Note 15.

NEET

NEET, a wholly owned subsidiary of NEECH, is a limited liability company organized under the laws of Delaware. Through its subsidiaries, NEET owns and operates rate-regulated transmission facilities, the largest of which is owned by Lone Star, and is pursuing opportunities to develop, build and operate new transmission facilities throughout North America. In 2013, an entity in which an affiliate of NEET has a joint venture investment was selected to complete development work for a 250-mile transmission line in Northwestern Ontario, Canada. Once development is complete, subject to Ontario Energy Board approval, this entity is expected to construct, own and operate the new transmission line that is projected to begin service in 2020. In 2015, a wholly owned subsidiary of NEET was awarded the rights to develop, construct, own and operate two transmission support projects in California, which projects, subject to certain regulatory approvals, are expected to begin service in 2017 and 2019, respectively.

Lone Star

Lone Star, a rate-regulated transmission service provider in Texas, is a limited liability company organized under the laws of Delaware. Lone Star owns and operates approximately 330 miles of 345 kilovolt (kV) transmission lines and other associated facilities. Lone Star is subject to regulation by a number of federal, state and other agencies, including, but not limited to, the PUCT, the ERCOT, the NERC and the EPA, as well as limited regulations of the FERC. See FPL - FPL Regulation for further discussion of FERC, NERC and EPA regulations and NEE Environmental Matters. The PUCT has jurisdiction over a wide range of Lone Star's business activities, including, among others, rates charged to customers and certain aspects of the operation of transmission systems. The

PUCT sets rates at a level that allows Lone Star the opportunity to collect from customers total revenues (revenue requirements) equal to Lone Star's cost of providing service, including a reasonable rate of return on invested capital.

In 2014, the PUCT approved a stipulation and settlement between Lone Star and all intervenors relating to Lone Star's base rate petition. The stipulation and settlement provides for an annual revenue requirement of approximately $102 million based on a $694 million rate base, a regulatory equity ratio of 45%, an allowed regulatory ROE of 9.6% and certain operating expenses.

FPL FIBERNET

FPL FiberNet conducts its business through two separate wholly owned subsidiaries of NEECH. One subsidiary was formed in 2000 to enhance the value of NEE's fiber-optic network assets that were originally built to support FPL operations and the other was formed in 2011 to hold fiber-optic network assets which were acquired. Both subsidiaries are limited liability companies organized under the laws of Delaware. FPL FiberNet leases fiber-optic network capacity and dark fiber to FPL and other customers, primarily telephone, wireless, and internet companies. FPL FiberNet's networks cover most of the metropolitan areas in Florida and several in Texas. FPL FiberNet also has a long-haul network providing bandwidth at wholesale rates. The long-haul network connects major cities in Florida and Texas with additional connectivity to the Eastern and South Central U.S. At December 31, 2015, FPL FiberNet's network consisted of approximately 9,230 route miles. FPL FiberNet is subject to regulation by the Federal Communications Commission which has jurisdiction over wire and wireless communication networks and by the public utility commissions in the states in which it provides intrastate telecommunication services.

NEE ENVIRONMENTAL MATTERS

NEE and FPL are subject to domestic and foreign environmental laws and regulations, including extensive federal, state and local environmental statutes, rules and regulations. The following is a discussion of certain existing and emerging federal and state initiatives and rules, some of which could potentially have a material effect (either positive or negative) on NEE and its subsidiaries. FPL expects to seek recovery through the environmental clause for compliance costs associated with any new environmental laws and regulations.

- Clean Water Act Section 316(b). In 2014, the EPA issued its final rule under Section 316(b) of the Clean Water Act outlining the process and framework for determining the Best Technology Available to reduce the impact on aquatic organisms from once-through cooling water intake systems. Under the rule, potentially eleven of FPL's facilities and five of NEER's facilities may be required to add additional controls and/or make operational changes to comply. NEE and FPL are analyzing the final rule, and the ultimate impacts of the rule will evolve over years of site specific studies, permit evaluations and negotiations. Therefore, the impact of any final compliance obligations is uncertain at this time. Several groups filed petitions for review of the EPA's final rule and the U.S. Court of Appeals for the Second Circuit is scheduled to hear the case in August 2016.

- Avian/Bat Regulations and Wind Turbine Siting Guidelines. FPL, NEER and NEET are subject to numerous environmental regulations and guidelines related to threatened and endangered species and their habitats, as well as avian and bat species, for the siting, construction and ongoing operations of their facilities. The facilities most significantly affected are wind and solar facilities and transmission and distribution lines. The environmental laws in the U.S., including, among others, the Endangered Species Act, the Migratory Bird Treaty Act, and the Bald and Golden Eagle Protection Act and similar environmental laws in Canada provide for the protection of migratory birds, eagles and bats and endangered species of birds and bats and their habitats. Regulations have been adopted under some of these laws that contain provisions that allow the owner/operator of a facility to apply for a permit to undertake specific activities, including those associated with certain siting decisions, construction activities and operations. In addition to regulations, voluntary wind turbine siting guidelines established by the U.S. Fish and Wildlife Service set forth siting, monitoring and coordination protocols that are designed to support wind development in the U.S. while also protecting both birds and bats and their habitats. These guidelines include provisions for specific monitoring and study conditions which need to be met in order for projects to be in adherence with these voluntary guidelines. Complying with these environmental regulations and adhering to the provisions set forth in the voluntary wind turbine siting guidelines could result in additional costs or reduced revenues at existing and new wind and solar facilities and transmission and distribution facilities at FPL, NEER and NEET and, in the case of environmental regulations, failure to comply could result in fines and penalties.

- Regulation of GHG Emissions. The U.S. Congress and certain states and regions, as well as the Government of Canada and its provinces, have taken and continue to take certain actions, such as finalizing regulation or setting targets or goals, regarding the reduction of GHG emissions and the increase of renewable energy generation. Based on the most recent reference data available from government sources, NEE is among the lowest emitters, among electric generators, of GHG in the U.S. measured by its rate of emissions expressed as pounds of CO_2 per MWh of generation.

  In October 2015, the EPA's final rule for new fossil fuel-fired electric generation units regulated under Section 111(b) of the Clean Air Act became effective, which is not expected to have an impact on NEE or FPL. In December 2015, the EPA's final rule under Section 111(d) of the Clean Air Act (Clean Power Plan) to reduce carbon emissions from existing fossil fuel-fired electric generation units became effective. The Clean Power Plan sets emission rate targets for each state and requires each state to develop a compliance plan by the fall of 2016 to meet these emissions targets, with the option for states to apply for an extension to 2018. The Clean Power Plan indicates that compliance will start in 2022 with both interim and final target dates,

each with specific emissions reductions. NEE and FPL are analyzing the Clean Power Plan and the impact of any final compliance obligations cannot be determined until the state plans have been finalized. Numerous parties have challenged the Clean Power Plan and, in February 2016, the U.S. Supreme Court issued an order staying implementation of the Clean Power Plan pending resolution of legal challenges to the rule. The D.C. Circuit is scheduled to hear oral arguments on June 2, 2016.

NEER's plants operate in certain states and regions in the U.S. and provinces in Canada that continue to consider and implement regulatory proposals to reduce GHG emissions in addition to what is expected to be required for the Clean Power Plan. RPS, currently in place in approximately 30 states and 3 territories and the District of Columbia, require electricity providers in the state, territory or district to meet a certain percentage of their retail sales with energy from renewable sources. These standards vary, but the majority include requirements to meet 20% to 30% of the electricity providers' retail sales with energy from renewable sources by 2025. Approximately 8 other states in the U.S. have set renewable energy goals as well. Many Canadian provinces have enacted renewable energy goals and targets to reduce GHG emissions from historic levels which include various milestones and compliance mechanisms. NEER's plants operate in 23 states in the U.S. and 4 provinces in Canada that have a RPS or renewable energy goals and NEER believes that these standards and goals, as well as any final compliance obligations under the Clean Power Plan, will create incremental demand for renewable energy in the future.

Other GHG reduction initiatives including, among others, the Regional Greenhouse Gas Initiative and the California Greenhouse Gas Regulation aim to reduce emissions through a variety of programs and under varying timelines. Based on its clean generation portfolio, NEER expects to continue experiencing a positive impact on earnings as a result of these GHG reduction initiatives. Additionally, these initiatives provide NEER opportunities with regards to wind and solar development as well as favorable energy pricing.

- Waters of the U.S. In June 2015, the EPA issued a final rule redefining "waters of the U.S." under the Clean Water Act to expand the definition of waters of the U.S. to encompass previously unregulated waters, such as intermittent streams, non-navigable tributaries, isolated wetlands and adjacent other waters, which rule was subsequently challenged by various parties. In October 2015, the U.S. Court of Appeals for the Sixth Circuit issued a stay of the EPA's final rule pending further court proceedings to address which court has jurisdiction as well as challenges to the rule. The ultimate resolution of the issues surrounding this final rule is uncertain at this time.

WEBSITE ACCESS TO SEC FILINGS

NEE and FPL make their SEC filings, including the annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and any amendments to those reports, available free of charge on NEE's internet website, www.nexteraenergy.com, as soon as reasonably practicable after those documents are electronically filed with or furnished to the SEC. The information and materials available on NEE's website (or any of its subsidiaries' websites) are not incorporated by reference into this combined Form 10-K. The SEC maintains an internet website that contains reports, proxy and information statements, and other information regarding registrants that file electronically with the SEC at www.sec.gov.

EXECUTIVE OFFICERS OF NEE[a]

Name	Age	Position	Effective Date
Miguel Arechabala	55	Executive Vice President, Power Generation Division of NEE Executive Vice President, Power Generation Division of FPL	January 1, 2014
Deborah H. Caplan	53	Executive Vice President, Human Resources and Corporate Services of NEE Executive Vice President, Human Resources and Corporate Services of FPL	April 15, 2013
Paul I. Cutler	56	Treasurer of NEE Treasurer of FPL Assistant Secretary of NEE	February 19, 2003 February 18, 2003 December 10, 1997
Moray P. Dewhurst	60	Vice Chairman and Chief Financial Officer, and Executive Vice President - Finance of NEE Executive Vice President, Finance and Chief Financial Officer of FPL	October 5, 2011
Chris N. Froggatt	58	Vice President, Controller and Chief Accounting Officer of NEE	February 27, 2010
Joseph T. Kelliher	55	Executive Vice President, Federal Regulatory Affairs of NEE	May 18, 2009
Manoochehr K. Nazar	61	President Nuclear Division and Chief Nuclear Officer of NEE President Nuclear Division and Chief Nuclear Officer of FPL	May 23, 2014 May 30, 2014
Armando Pimentel, Jr.	53	President and Chief Executive Officer of NEER	October 5, 2011
James L. Robo	53	Chairman, President and Chief Executive Officer of NEE Chairman of FPL	December 13, 2013 May 2, 2012
Charles E. Sieving	43	Executive Vice President & General Counsel of NEE Executive Vice President of FPL	December 1, 2008 January 1, 2009
Eric E. Silagy	50	President and Chief Executive Officer of FPL	May 30, 2014
William L. Yeager	57	Executive Vice President, Engineering, Construction and Integrated Supply Chain of NEE Executive Vice President, Engineering, Construction and Integrated Supply Chain of FPL	January 1, 2013

(a) Information is as of February 19, 2016. Executive officers are elected annually by, and serve at the pleasure of, their respective boards of directors. Except as noted below, each officer has held his/her present position for five years or more and his/her employment history is continuous. Mr. Arechabala was president of NextEra Energy España, S.L., an indirect wholly owned subsidiary of NEE, from February 2010 to December 2013. Ms. Caplan was vice president and chief operating officer of FPL from May 2011 to April 2013 and vice president, integrated supply chain of NEE and FPL from July 2005 to May 2011. Mr. Dewhurst has been vice chairman of NEE since August 2009 and was chief of staff of NEE from August 2009 to October 2011. Mr. Dewhurst has announced his intention to retire from NEE and FPL in the spring of 2016. Mr. Nazar has been chief nuclear officer of NEE and FPL since January 2010 and was executive vice president, nuclear division of NEE and FPL from January 2010 to May 2014. Mr. Pimentel was chief financial officer of NEE and FPL from May 2008 to October 2011 and executive vice president, finance of NEE and FPL from February 2008 to October 2011. Mr. Robo has been president and chief executive officer of NEE since July 2012. Mr. Robo was the chief executive officer of FPL from May 2012 to May 2014 and president and chief operating officer of NEE from December 2006 to June 2012. Mr. Sieving was also assistant secretary of NEE from May 2010 to May 2011. Mr. Silagy has been president of FPL since December 2011. Mr. Silagy was senior vice president, regulatory and state governmental affairs of FPL from May 2010 to December 2011. Mr. Yeager was vice president, engineering, construction and integrated supply chain services of NEE and FPL from October 2012 to December 2012 and vice president, integrated supply chain of NEE and FPL from May 2011 to October 2012. From January 2005 to May 2011, Mr. Yeager was vice president, engineering and construction of FPL.

Item 1A. Risk Factors

Risks Relating to NEE's and FPL's Business

The business, financial condition, results of operations and prospects of NEE and FPL are subject to a variety of risks, many of which are beyond the control of NEE and FPL. The following is a description of important risks that may materially adversely affect the business, financial condition, results of operations and prospects of NEE and FPL and may cause actual results of NEE and FPL to differ substantially from those that NEE or FPL currently expects or seeks. In that event, the market price for the securities of NEE or FPL could decline. Accordingly, the risks described below should be carefully considered together with the other information set forth in this report and in future reports that NEE and FPL file with the SEC. The risks described below are not the only risks facing NEE and FPL. Additional risks and uncertainties may also materially adversely affect NEE's or FPL's business, financial condition, results of operations and prospects. Each of NEE and FPL has disclosed the material risks known to it to affect its business at this time. However, there may be further risks and uncertainties that are not presently known or that are not currently believed to be material that may in the future materially adversely affect the business, financial condition, results of operations or prospects of NEE and FPL.

Regulatory, Legislative and Legal Risks

NEE's and FPL's business, financial condition, results of operations and prospects may be materially adversely affected by the extensive regulation of their business.

The operations of NEE and FPL are subject to complex and comprehensive federal, state and other regulation. This extensive regulatory framework, portions of which are more specifically identified in the following risk factors, regulates, among other things and to varying degrees, NEE's and FPL's industries, businesses, rates and cost structures, operation of nuclear power facilities, construction and operation of electricity generation, transmission and distribution facilities and natural gas and oil production, natural gas, oil and other fuel transportation, processing and storage facilities, acquisition, disposal, depreciation and amortization of facilities and other assets, decommissioning costs and funding, service reliability, wholesale and retail competition, and commodities trading and derivatives transactions. In their business planning and in the management of their operations, NEE and FPL must address the effects of regulation on their business and any inability or failure to do so adequately could have a material adverse effect on their business, financial condition, results of operations and prospects.

NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected if they are unable to recover in a timely manner any significant amount of costs, a return on certain assets or a reasonable return on invested capital through base rates, cost recovery clauses, other regulatory mechanisms or otherwise.

FPL is a regulated entity subject to the jurisdiction of the FPSC over a wide range of business activities, including, among other items, the retail rates charged to its customers through base rates and cost recovery clauses, the terms and conditions of its services, procurement of electricity for its customers, issuances of securities, and aspects of the siting, construction and operation of its generation plants and transmission and distribution systems for the sale of electric energy. The FPSC has the authority to disallow recovery by FPL of costs that it considers excessive or imprudently incurred and to determine the level of return that FPL is permitted to earn on invested capital. The regulatory process, which may be adversely affected by the political, regulatory and economic environment in Florida and elsewhere, limits FPL's ability to increase earnings. The regulatory process also does not provide any assurance as to achievement of authorized or other earnings levels, or that FPL will be permitted to earn an acceptable return on capital investments it wishes to make. NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected if any material amount of costs, a return on certain assets or a reasonable return on invested capital cannot be recovered through base rates, cost recovery clauses, other regulatory mechanisms or otherwise. Certain other subsidiaries of NEE are regulated transmission utilities subject to the jurisdiction of their regulators and are subject to similar risks.

Regulatory decisions that are important to NEE and FPL may be materially adversely affected by political, regulatory and economic factors.

The local and national political, regulatory and economic environment has had, and may in the future have, an adverse effect on FPSC decisions with negative consequences for FPL. These decisions may require, for example, FPL to cancel or delay planned development activities, to reduce or delay other planned capital expenditures or to pay for investments or otherwise incur costs that it may not be able to recover through rates, each of which could have a material adverse effect on the business, financial condition, results of operations and prospects of NEE and FPL. Certain other subsidiaries of NEE are subject to similar risks.

FPL's use of derivative instruments could be subject to prudence challenges and, if found imprudent, could result in disallowances of cost recovery for such use by the FPSC.

The FPSC engages in an annual prudence review of FPL's use of derivative instruments in its risk management fuel procurement program and should it find any such use to be imprudent, the FPSC could deny cost recovery for such use by FPL. Such an outcome could have a material adverse effect on FPL's business, financial condition, results of operations and prospects.

Any reductions to, or the elimination of, governmental incentives or policies that support utility scale renewable energy, including, but not limited to, tax incentives, RPS, feed-in tariffs or the Clean Power Plan, or the imposition of additional taxes or other assessments on renewable energy, could result in, among other items, the lack of a satisfactory market for the development of new renewable energy projects, NEER abandoning the development of renewable energy projects, a loss of NEER's investments in renewable energy projects and reduced project returns, any of which could have a material adverse effect on NEE's business, financial condition, results of operations and prospects.

NEER depends heavily on government policies that support utility scale renewable energy and enhance the economic feasibility of developing and operating wind and solar energy projects in regions in which NEER operates or plans to develop and operate renewable energy facilities. The federal government, a majority of the 50 U.S. states and portions of Canada and Spain provide incentives, such as tax incentives, RPS, feed-in tariffs or the Clean Power Plan, that support or are designed to support the sale of energy from utility scale renewable energy facilities, such as wind and solar energy facilities. As a result of budgetary constraints, political factors or otherwise, governments from time to time may review their policies that support renewable energy and consider actions that would make the policies less conducive to the development and operation of renewable energy facilities. Any reductions to, or the elimination of, governmental incentives that support renewable energy, such as those reductions that have been enacted in Spain and are applicable to NEER's solar generation facilities in that country, or the imposition of additional taxes or other assessments on renewable energy, could result in, among other items, the lack of a satisfactory market for the development of new renewable energy projects, NEER abandoning the development of renewable energy projects, a loss of NEER's investments in the projects and reduced project returns, any of which could have a material adverse effect on NEE's business, financial condition, results of operations and prospects.

NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected as a result of new or revised laws, regulations, interpretations or other regulatory initiatives.

NEE's and FPL's business is influenced by various legislative and regulatory initiatives, including, but not limited to, new or revised laws, regulations, interpretations and other regulatory initiatives regarding deregulation or restructuring of the energy industry, regulation of the commodities trading and derivatives markets, and regulation of environmental matters, such as regulation of air emissions, regulation of water consumption and water discharges, and regulation of gas and oil infrastructure operations, as well as associated environmental permitting. Changes in the nature of the regulation of NEE's and FPL's business could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects. NEE and FPL are unable to predict future legislative or regulatory changes, initiatives or interpretations, although any such changes, initiatives or interpretations may increase costs and competitive pressures on NEE and FPL, which could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

FPL has limited competition in the Florida market for retail electricity customers. Any changes in Florida law or regulation which introduce competition in the Florida retail electricity market, such as government incentives that facilitate the installation of solar generation facilities on residential or other rooftops at below cost, or would permit third-party sales of electricity, could have a material adverse effect on FPL's business, financial condition, results of operations and prospects. There can be no assurance that FPL will be able to respond adequately to such regulatory changes, which could have a material adverse effect on FPL's business, financial condition, results of operations and prospects.

NEER is subject to FERC rules related to transmission that are designed to facilitate competition in the wholesale market on practically a nationwide basis by providing greater certainty, flexibility and more choices to wholesale power customers. NEE cannot predict the impact of changing FERC rules or the effect of changes in levels of wholesale supply and demand, which are typically driven by factors beyond NEE's control. There can be no assurance that NEER will be able to respond adequately or sufficiently quickly to such rules and developments, or to any other changes that reverse or restrict the competitive restructuring of the energy industry in those jurisdictions in which such restructuring has occurred. Any of these events could have a material adverse effect on NEE's business, financial condition, results of operations and prospects.

NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected if the rules implementing the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) broaden the scope of its provisions regarding the regulation of OTC financial derivatives and make certain provisions applicable to NEE and FPL.

The Dodd-Frank Act, enacted into law in July 2010 provides for, among other things, substantially increased regulation of the OTC derivatives market and futures contract markets. While the legislation is broad and detailed, there are still portions of the legislation that either require implementing rules to be adopted by federal governmental agencies or otherwise require further interpretive guidance.

NEE and FPL continue to monitor the development of rules related to the Dodd-Frank Act and have taken steps to comply with those rules that affect their businesses. A number of rules have been finalized and are effective, but there are rules yet to be finalized and rules that have been finalized but may be amended in the future.

NEE and FPL cannot predict the impact any proposed rules will have on their ability to hedge their commodity and interest rate risks or on OTC derivatives markets as a whole, but they could potentially have a material adverse effect on NEE's and FPL's risk exposure, as well as reduce market liquidity and further increase the cost of hedging activities.

NEE and FPL are subject to numerous environmental laws, regulations and other standards that may result in capital expenditures, increased operating costs and various liabilities, and may require NEE and FPL to limit or eliminate certain operations.

NEE and FPL are subject to domestic and foreign environmental laws and regulations, including, but not limited to, extensive federal, state and local environmental statutes, rules and regulations relating to air quality, water quality and usage, climate change, emissions of greenhouse gases, including, but not limited to, CO_2, waste management, hazardous wastes, marine, avian and other wildlife mortality and habitat protection, historical artifact preservation, natural resources, health (including, but not limited to, electric and magnetic fields from power lines and substations), safety and RPS, that could, among other things, prevent or delay the development of power generation, power or natural gas transmission, or other infrastructure projects, restrict the output of some existing facilities, limit the availability and use of some fuels required for the production of electricity, require additional pollution control equipment, and otherwise increase costs, increase capital expenditures and limit or eliminate certain operations.

There are significant capital, operating and other costs associated with compliance with these environmental statutes, rules and regulations, and those costs could be even more significant in the future as a result of new requirements, the current trend toward more stringent standards, and stricter or more expansive application of existing environmental regulations. For example, among other new, potential or pending changes are federal regulation of CO_2 emissions under the Clean Power Plan and state and federal regulation of the use of hydraulic fracturing or similar technologies to drill for natural gas and related compounds used by NEE's gas infrastructure business.

Violations of current or future laws, rules, regulations or other standards could expose NEE and FPL to regulatory and legal proceedings, disputes with, and legal challenges by, third parties, and potentially significant civil fines, criminal penalties and other sanctions. Proceedings could include, for example, litigation regarding property damage, personal injury, common law nuisance and enforcement by citizens or governmental authorities of environmental requirements such as air, water and soil quality standards.

NEE's and FPL's business could be negatively affected by federal or state laws or regulations mandating new or additional limits on the production of greenhouse gas emissions.

Federal or state laws or regulations may be adopted that would impose new or additional limits on the emissions of greenhouse gases, including, but not limited to, CO_2 and methane, from electric generation units using fossil fuels like coal and natural gas. Although it is currently subject to a stay issued by the U.S. Supreme Court, the Clean Power Plan is an example of such a new regulation at the federal level. The potential effects of greenhouse gas emission limits on NEE's and FPL's electric generation units are subject to significant uncertainties based on, among other things, the timing of the implementation of any new requirements, the required levels of emission reductions, the nature of any market-based or tax-based mechanisms adopted to facilitate reductions, the relative availability of greenhouse gas emission reduction offsets, the development of cost-effective, commercial-scale carbon capture and storage technology and supporting regulations and liability mitigation measures, and the range of available compliance alternatives.

While NEE's and FPL's electric generation units emit greenhouse gases at a lower rate of emissions than most of the U.S. electric generation sector, the results of operations of NEE and FPL could be materially adversely affected to the extent that new federal or state laws or regulations impose any new greenhouse gas emission limits. Any future limits on greenhouse gas emissions could:

- create substantial additional costs in the form of taxes or emission allowances;
- make some of NEE's and FPL's electric generation units uneconomical to operate in the long term;
- require significant capital investment in carbon capture and storage technology, fuel switching, or the replacement of high-emitting generation facilities with lower-emitting generation facilities; or
- affect the availability or cost of fossil fuels.

There can be no assurance that NEE or FPL would be able to completely recover any such costs or investments, which could have a material adverse effect on their business, financial condition, results of operations and prospects.

Extensive federal regulation of the operations of NEE and FPL exposes NEE and FPL to significant and increasing compliance costs and may also expose them to substantial monetary penalties and other sanctions for compliance failures.

NEE and FPL are subject to extensive federal regulation, which generally imposes significant and increasing compliance costs on NEE's and FPL's operations. Additionally, any actual or alleged compliance failures could result in significant costs and other potentially adverse effects of regulatory investigations, proceedings, settlements, decisions and claims, including, among other items, potentially significant monetary penalties. As an example, under the Energy Policy Act of 2005, NEE and FPL, as owners and operators of bulk-power transmission systems and/or electric generation facilities, are subject to mandatory reliability standards. Compliance with these mandatory reliability standards may subject NEE and FPL to higher operating costs and may result in increased capital expenditures. If FPL or NEE is found not to be in compliance with these standards, it may incur substantial monetary

penalties and other sanctions. Both the costs of regulatory compliance and the costs that may be imposed as a result of any actual or alleged compliance failures could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

Changes in tax laws, as well as judgments and estimates used in the determination of tax-related asset and liability amounts, could materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's and FPL's provision for income taxes and reporting of tax-related assets and liabilities require significant judgments and the use of estimates. Amounts of tax-related assets and liabilities involve judgments and estimates of the timing and probability of recognition of income, deductions and tax credits, including, but not limited to, estimates for potential adverse outcomes regarding tax positions that have been taken and the ability to utilize tax benefit carryforwards, such as net operating loss and tax credit carryforwards. Actual income taxes could vary significantly from estimated amounts due to the future impacts of, among other things, changes in tax laws, regulations and interpretations, the financial condition and results of operations of NEE and FPL, and the resolution of audit issues raised by taxing authorities. Ultimate resolution of income tax matters may result in material adjustments to tax-related assets and liabilities, which could materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's and FPL's business, financial condition, results of operations and prospects may be materially adversely affected due to adverse results of litigation.

NEE's and FPL's business, financial condition, results of operations and prospects may be materially affected by adverse results of litigation. Unfavorable resolution of legal proceedings in which NEE is involved or other future legal proceedings, including, but not limited to, class action lawsuits, may have a material adverse effect on the business, financial condition, results of operations and prospects of NEE and FPL.

Operational Risks

NEE's and FPL's business, financial condition, results of operations and prospects could suffer if NEE and FPL do not proceed with projects under development or are unable to complete the construction of, or capital improvements to, electric generation, transmission and distribution facilities, gas infrastructure facilities or other facilities on schedule or within budget.

NEE's and FPL's ability to complete construction of, and capital improvement projects for, their electric generation, transmission and distribution facilities, gas infrastructure facilities and other facilities on schedule and within budget may be adversely affected by escalating costs for materials and labor and regulatory compliance, inability to obtain or renew necessary licenses, rights-of-way, permits or other approvals on acceptable terms or on schedule, disputes involving contractors, labor organizations, land owners, governmental entities, environmental groups, Native American and aboriginal groups, lessors, joint venture partners and other third parties, negative publicity, transmission interconnection issues and other factors. If any development project or construction or capital improvement project is not completed, is delayed or is subject to cost overruns, certain associated costs may not be approved for recovery or otherwise be recoverable through regulatory mechanisms that may be available, and NEE and FPL could become obligated to make delay or termination payments or become obligated for other damages under contracts, could experience the loss of tax credits or tax incentives, or delayed or diminished returns, and could be required to write off all or a portion of their investment in the project. Any of these events could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE and FPL may face risks related to project siting, financing, construction, permitting, governmental approvals and the negotiation of project development agreements that may impede their development and operating activities.

NEE and FPL own, develop, construct, manage and operate electric-generation and transmission facilities and natural gas transmission facilities. A key component of NEE's and FPL's growth is their ability to construct and operate generation and transmission facilities to meet customer needs. As part of these operations, NEE and FPL must periodically apply for licenses and permits from various local, state, federal and other regulatory authorities and abide by their respective conditions. Should NEE or FPL be unsuccessful in obtaining necessary licenses or permits on acceptable terms, should there be a delay in obtaining or renewing necessary licenses or permits or should regulatory authorities initiate any associated investigations or enforcement actions or impose related penalties or disallowances on NEE or FPL, NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected. Any failure to negotiate successful project development agreements for new facilities with third parties could have similar results.

The operation and maintenance of NEE's and FPL's electric generation, transmission and distribution facilities, gas infrastructure facilities and other facilities are subject to many operational risks, the consequences of which could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's and FPL's electric generation, transmission and distribution facilities, gas infrastructure facilities and other facilities are subject to many operational risks. Operational risks could result in, among other things, lost revenues due to prolonged outages, increased

expenses due to monetary penalties or fines for compliance failures, liability to third parties for property and personal injury damage, a failure to perform under applicable power sales agreements or other agreements and associated loss of revenues from terminated agreements or liability for liquidated damages under continuing agreements, and replacement equipment costs or an obligation to purchase or generate replacement power at higher prices.

Uncertainties and risks inherent in operating and maintaining NEE's and FPL's facilities include, but are not limited to:

- risks associated with facility start-up operations, such as whether the facility will achieve projected operating performance on schedule and otherwise as planned;
- failures in the availability, acquisition or transportation of fuel or other necessary supplies;
- the impact of unusual or adverse weather conditions and natural disasters, including, but not limited to, hurricanes, tornadoes, icing events, floods, earthquakes and droughts;
- performance below expected or contracted levels of output or efficiency;
- breakdown or failure, including, but not limited to, explosions, fires, leaks or other major events, of equipment, transmission and distribution lines or pipelines;
- availability of replacement equipment;
- risks of property damage or human injury from energized equipment, hazardous substances or explosions, fires, leaks or other events;
- availability of adequate water resources and ability to satisfy water intake and discharge requirements;
- inability to identify, manage properly or mitigate equipment defects in NEE's and FPL's facilities;
- use of new or unproven technology;
- risks associated with dependence on a specific type of fuel or fuel source, such as commodity price risk, availability of adequate fuel supply and transportation, and lack of available alternative fuel sources;
- increased competition due to, among other factors, new facilities, excess supply, shifting demand and regulatory changes; and
- insufficient insurance, warranties or performance guarantees to cover any or all lost revenues or increased expenses from the foregoing.

NEE's and FPL's business, financial condition, results of operations and prospects may be negatively affected by a lack of growth or slower growth in the number of customers or in customer usage.

Growth in customer accounts and growth of customer usage each directly influence the demand for electricity and the need for additional power generation and power delivery facilities, as well as the need for energy-related commodities such as natural gas. Customer growth and customer usage are affected by a number of factors outside the control of NEE and FPL, such as mandated energy efficiency measures, demand side management requirements, and economic and demographic conditions, such as population changes, job and income growth, housing starts, new business formation and the overall level of economic activity. A lack of growth, or a decline, in the number of customers or in customer demand for electricity or natural gas and other fuels may cause NEE and FPL to fail to fully realize the anticipated benefits from significant investments and expenditures and could have a material adverse effect on NEE's and FPL's growth, business, financial condition, results of operations and prospects.

NEE's and FPL's business, financial condition, results of operations and prospects can be materially adversely affected by weather conditions, including, but not limited to, the impact of severe weather.

Weather conditions directly influence the demand for electricity and natural gas and other fuels and affect the price of energy and energy-related commodities. In addition, severe weather and natural disasters, such as hurricanes, floods, tornadoes, icing events and earthquakes, can be destructive and cause power outages and property damage, reduce revenue, affect the availability of fuel and water, and require NEE and FPL to incur additional costs, for example, to restore service and repair damaged facilities, to obtain replacement power and to access available financing sources. Furthermore, NEE's and FPL's physical plant could be placed at greater risk of damage should changes in the global climate produce unusual variations in temperature and weather patterns, resulting in more intense, frequent and extreme weather events, abnormal levels of precipitation and, particularly relevant to FPL, a change in sea level. FPL operates in the east and lower west coasts of Florida, an area that historically has been prone to severe weather events, such as hurricanes. A disruption or failure of electric generation, transmission or distribution systems or natural gas production, transmission, storage or distribution systems in the event of a hurricane, tornado or other severe weather event, or otherwise, could prevent NEE and FPL from operating their business in the normal course and could result in any of the adverse consequences described above. Any of the foregoing could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

At FPL and other businesses of NEE where cost recovery is available, recovery of costs to restore service and repair damaged facilities is or may be subject to regulatory approval, and any determination by the regulator not to permit timely and full recovery of the costs incurred could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

Changes in weather can also affect the production of electricity at power generation facilities, including, but not limited to, NEER's wind and solar facilities. For example, the level of wind resource affects the revenue produced by wind generation facilities. Because the levels of wind and solar resources are variable and difficult to predict, NEER's results of operations for individual wind and solar facilities specifically, and NEE's results of operations generally, may vary significantly from period to period, depending on the level

of available resources. To the extent that resources are not available at planned levels, the financial results from these facilities may be less than expected.

Threats of terrorism and catastrophic events that could result from terrorism, cyber attacks, or individuals and/or groups attempting to disrupt NEE's and FPL's business, or the businesses of third parties, may materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.

NEE and FPL are subject to the potentially adverse operating and financial effects of terrorist acts and threats, as well as cyber attacks and other disruptive activities of individuals or groups. There have been cyber attacks on energy infrastructure such as substations, gas pipelines and related assets in the past and there may be such attacks in the future. NEE's and FPL's generation, transmission and distribution facilities, fuel storage facilities, information technology systems and other infrastructure facilities and systems could be direct targets of, or otherwise be materially adversely affected by, such activities.

Terrorist acts, cyber attacks or other similar events affecting NEE's and FPL's systems and facilities, or those of third parties on which NEE and FPL rely, could harm NEE's and FPL's business, for example, by limiting their ability to generate, purchase or transmit power, natural gas or other energy-related commodities by limiting their ability to bill customers and collect and process payments, and by delaying their development and construction of new generation, distribution or transmission facilities or capital improvements to existing facilities. These events, and governmental actions in response, could result in a material decrease in revenues, significant additional costs (for example, to repair assets, implement additional security requirements or maintain or acquire insurance), significant fines and penalties, and reputational damage, could materially adversely affect NEE's and FPL's operations (for example, by contributing to disruption of supplies and markets for natural gas, oil and other fuels), and could impair NEE's and FPL's ability to raise capital (for example, by contributing to financial instability and lower economic activity). In addition, the implementation of security guidelines and measures has resulted in and is expected to continue to result in increased costs. Such events or actions may materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.

The ability of NEE and FPL to obtain insurance and the terms of any available insurance coverage could be materially adversely affected by international, national, state or local events and company-specific events, as well as the financial condition of insurers. NEE's and FPL's insurance coverage does not provide protection against all significant losses.

Insurance coverage may not continue to be available or may not be available at rates or on terms similar to those presently available to NEE and FPL. The ability of NEE and FPL to obtain insurance and the terms of any available insurance coverage could be materially adversely affected by international, national, state or local events and company-specific events, as well as the financial condition of insurers. If insurance coverage is not available or obtainable on acceptable terms, NEE or FPL may be required to pay costs associated with adverse future events. NEE and FPL generally are not fully insured against all significant losses. For example, FPL is not fully insured against hurricane-related losses, but would instead seek recovery of such uninsured losses from customers subject to approval by the FPSC, to the extent losses exceed restricted funds set aside to cover the cost of storm damage. A loss for which NEE or FPL is not fully insured could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE invests in gas and oil producing and transmission assets through NEER's gas infrastructure business. The gas infrastructure business is exposed to fluctuating market prices of natural gas, natural gas liquids, oil and other energy commodities. A prolonged period of low gas and oil prices could impact NEER's gas infrastructure business and cause NEER to delay or cancel certain gas infrastructure projects and for certain existing projects to be impaired, which could materially adversely affect NEE's results of operations.

Natural gas and oil prices are affected by supply and demand, both globally and regionally. Factors that influence supply and demand include operational issues, natural disasters, weather, political instability, conflicts, new discoveries, technological advances, economic conditions and actions by major oil-producing countries. There can be significant volatility in market prices for gas and oil, and price fluctuations could have a material effect on the financial performance of gas and oil producing and transmission assets. For example, in a low gas and oil price environment, NEER would generate less revenue from its gas infrastructure investments in gas and oil producing properties, and as a result certain investments might become less profitable or incur losses. Prolonged periods of low oil and gas prices could also result in oil and gas production and transmission projects to be delayed or cancelled or to experience lower returns, and for certain projects to become impaired, which could materially adversely affect NEE's results of operations.

If supply costs necessary to provide NEER's full energy and capacity requirement services are not favorable, operating costs could increase and materially adversely affect NEE's business, financial condition, results of operations and prospects.

NEER provides full energy and capacity requirements services primarily to distribution utilities, which include load-following services and various ancillary services, to satisfy all or a portion of such utilities' power supply obligations to their customers. The supply costs for these transactions may be affected by a number of factors, including, but not limited to, events that may occur after such utilities have committed to supply power, such as weather conditions, fluctuating prices for energy and ancillary services, and the ability of the distribution utilities' customers to elect to receive service from competing suppliers. NEER may not be able to recover

all of its increased supply costs, which could have a material adverse effect on NEE's business, financial condition, results of operations and prospects.

Due to the potential for significant volatility in market prices for fuel, electricity and renewable and other energy commodities, NEER's inability or failure to manage properly or hedge effectively the commodity risks within its portfolios could materially adversely affect NEE's business, financial condition, results of operations and prospects.

There can be significant volatility in market prices for fuel, electricity and renewable and other energy commodities. NEE's inability or failure to manage properly or hedge effectively its assets or positions against changes in commodity prices, volumes, interest rates, counterparty credit risk or other risk measures, based on factors both from within, or wholly or partially outside of, NEE's control, may materially adversely affect NEE's business, financial condition, results of operations and prospects.

Sales of power on the spot market or on a short-term contractual basis may cause NEE's results of operations to be volatile.

A portion of NEER's power generation facilities operate wholly or partially without long-term power purchase agreements. Power from these facilities is sold on the spot market or on a short-term contractual basis. Spot market sales are subject to market volatility, and the revenue generated from these sales is subject to fluctuation that may cause NEE's results of operations to be volatile. NEER and NEE may not be able to manage volatility adequately, which could then have a material adverse effect on NEE's business, financial condition, results of operations and prospects.

Reductions in the liquidity of energy markets may restrict the ability of NEE to manage its operational risks, which, in turn, could negatively affect NEE's results of operations.

NEE is an active participant in energy markets. The liquidity of regional energy markets is an important factor in NEE's ability to manage risks in these operations. Over the past several years, other market participants have ceased or significantly reduced their activities in energy markets as a result of several factors, including, but not limited to, government investigations, changes in market design and deteriorating credit quality. Liquidity in the energy markets can be adversely affected by price volatility, restrictions on the availability of credit and other factors, and any reduction in the liquidity of energy markets could have a material adverse effect on NEE's business, financial condition, results of operations and prospects.

NEE's and FPL's hedging and trading procedures and associated risk management tools may not protect against significant losses.

NEE and FPL have hedging and trading procedures and associated risk management tools, such as separate but complementary financial, credit, operational, compliance and legal reporting systems, internal controls, management review processes and other mechanisms. NEE and FPL are unable to assure that such procedures and tools will be effective against all potential risks, including, without limitation, employee misconduct. If such procedures and tools are not effective, this could have a material adverse effect on NEE's business, financial condition, results of operations and prospects.

If price movements significantly or persistently deviate from historical behavior, NEE's and FPL's risk management tools associated with their hedging and trading procedures may not protect against significant losses.

NEE's and FPL's risk management tools and metrics associated with their hedging and trading procedures, such as daily value at risk, earnings at risk, stop loss limits and liquidity guidelines, are based on historical price movements. Due to the inherent uncertainty involved in price movements and potential deviation from historical pricing behavior, NEE and FPL are unable to assure that their risk management tools and metrics will be effective to protect against material adverse effects on their business, financial condition, results of operations and prospects.

If power transmission or natural gas, nuclear fuel or other commodity transportation facilities are unavailable or disrupted, FPL's and NEER's ability to sell and deliver power or natural gas may be limited.

FPL and NEER depend upon power transmission and natural gas, nuclear fuel and other commodity transportation facilities, many of which they do not own. Occurrences affecting the operation of these facilities that may or may not be beyond FPL's and NEER's control (such as severe weather or a generation or transmission facility outage, pipeline rupture, or sudden and significant increase or decrease in wind generation) may limit or halt the ability of FPL and NEER to sell and deliver power and natural gas, or to purchase necessary fuels and other commodities, which could materially adversely impact NEE's and FPL's business, financial condition, results of operations and prospects.

NEE and FPL are subject to credit and performance risk from customers, hedging counterparties and vendors.

NEE and FPL are exposed to risks associated with the creditworthiness and performance of their customers, hedging counterparties and vendors under contracts for the supply of equipment, materials, fuel and other goods and services required for their business operations and for the construction and operation of, and for capital improvements to, their facilities. Adverse conditions in the energy industry or the general economy, as well as circumstances of individual customers, hedging counterparties and vendors,

may adversely affect the ability of some customers, hedging counterparties and vendors to perform as required under their contracts with NEE and FPL. For example, the prolonged downturn in oil and natural gas prices has adversely affected the financial stability of a number of enterprises in the energy industry, including some with which NEE does business.

If any hedging, vending or other counterparty fails to fulfill its contractual obligations, NEE and FPL may need to make arrangements with other counterparties or vendors, which could result in material financial losses, higher costs, untimely completion of power generation facilities and other projects, and/or a disruption of their operations. If a defaulting counterparty is in poor financial condition, NEE and FPL may not be able to recover damages for any contract breach.

NEE and FPL could recognize financial losses or a reduction in operating cash flows if a counterparty fails to perform or make payments in accordance with the terms of derivative contracts or if NEE or FPL is required to post margin cash collateral under derivative contracts.

NEE and FPL use derivative instruments, such as swaps, options, futures and forwards, some of which are traded in the OTC markets or on exchanges, to manage their commodity and financial market risks, and for NEE to engage in trading and marketing activities. Any failures by their counterparties to perform or make payments in accordance with the terms of those transactions could have a material adverse effect on NEE's or FPL's business, financial condition, results of operations and prospects. Similarly, any requirement for FPL or NEE to post margin cash collateral under its derivative contracts could have a material adverse effect on its business, financial condition, results of operations and prospects. These risks may be increased during periods of adverse market or economic conditions affecting the industries in which NEE participates.

NEE and FPL are highly dependent on sensitive and complex information technology systems, and any failure or breach of those systems could have a material adverse effect on their business, financial condition, results of operations and prospects.

NEE and FPL operate in a highly regulated industry that requires the continuous functioning of sophisticated information technology systems and network infrastructure. Despite NEE's and FPL's implementation of security measures, all of their technology systems are vulnerable to disability, failures or unauthorized access due to such activities. If NEE's or FPL's information technology systems were to fail or be breached, sensitive confidential and other data could be compromised and NEE and FPL could be unable to fulfill critical business functions.

NEE's and FPL's business is highly dependent on their ability to process and monitor, on a daily basis, a very large number of transactions, many of which are highly complex and cross numerous and diverse markets. Due to the size, scope, complexity and geographical reach of NEE's and FPL's business, the development and maintenance of information technology systems to keep track of and process information is critical and challenging. NEE's and FPL's operating systems and facilities may fail to operate properly or become disabled as a result of events that are either within, or wholly or partially outside of, their control, such as operator error, severe weather or terrorist activities. Any such failure or disabling event could materially adversely affect NEE's and FPL's ability to process transactions and provide services, and their business, financial condition, results of operations and prospects.

NEE and FPL add, modify and replace information systems on a regular basis. Modifying existing information systems or implementing new or replacement information systems is costly and involves risks, including, but not limited to, integrating the modified, new or replacement system with existing systems and processes, implementing associated changes in accounting procedures and controls, and ensuring that data conversion is accurate and consistent. Any disruptions or deficiencies in existing information systems, or disruptions, delays or deficiencies in the modification or implementation of new information systems, could result in increased costs, the inability to track or collect revenues and the diversion of management's and employees' attention and resources, and could negatively impact the effectiveness of the companies' control environment, and/or the companies' ability to timely file required regulatory reports.

NEE and FPL also face the risks of operational failure or capacity constraints of third parties, including, but not limited to, those who provide power transmission and natural gas transportation services.

NEE's and FPL's retail businesses are subject to the risk that sensitive customer data may be compromised, which could result in a material adverse impact to their reputation and/or the results of operations of the retail business.

NEE's and FPL's retail businesses require access to sensitive customer data in the ordinary course of business. NEE's and FPL's retail businesses may also need to provide sensitive customer data to vendors and service providers who require access to this information in order to provide services, such as call center services, to the retail businesses. If a significant breach occurred, the reputation of NEE and FPL could be materially adversely affected, customer confidence could be diminished, or customer information could be subject to identity theft. NEE and FPL would be subject to costs associated with the breach and/or NEE and FPL could be subject to fines and legal claims, any of which may have a material adverse effect on the business, financial condition, results of operations and prospects of NEE and FPL.

NEE and FPL could recognize financial losses as a result of volatility in the market values of derivative instruments and limited liquidity in OTC markets.

NEE and FPL execute transactions in derivative instruments on either recognized exchanges or via the OTC markets, depending on management's assessment of the most favorable credit and market execution factors. Transactions executed in OTC markets have the potential for greater volatility and less liquidity than transactions on recognized exchanges. As a result, NEE and FPL may not be able to execute desired OTC transactions due to such heightened volatility and limited liquidity.

In the absence of actively quoted market prices and pricing information from external sources, the valuation of derivative instruments involves management's judgment and use of estimates. As a result, changes in the underlying assumptions or use of alternative valuation methods could affect the reported fair value of these derivative instruments and have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE and FPL may be materially adversely affected by negative publicity.

From time to time, political and public sentiment may result in a significant amount of adverse press coverage and other adverse public statements affecting NEE and FPL. Adverse press coverage and other adverse statements, whether or not driven by political or public sentiment, may also result in investigations by regulators, legislators and law enforcement officials or in legal claims. Responding to these investigations and lawsuits, regardless of the ultimate outcome of the proceeding, can divert the time and effort of senior management from NEE's and FPL's business.

Addressing any adverse publicity, governmental scrutiny or enforcement or other legal proceedings is time consuming and expensive and, regardless of the factual basis for the assertions being made, can have a negative impact on the reputation of NEE and FPL, on the morale and performance of their employees and on their relationships with their respective regulators. It may also have a negative impact on their ability to take timely advantage of various business and market opportunities. The direct and indirect effects of negative publicity, and the demands of responding to and addressing it, may have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's and FPL's business, financial condition, results of operations and prospects may be materially adversely affected if FPL is unable to maintain, negotiate or renegotiate franchise agreements on acceptable terms with municipalities and counties in Florida.

FPL must negotiate franchise agreements with municipalities and counties in Florida to provide electric services within such municipalities and counties, and electricity sales generated pursuant to these agreements represent a very substantial portion of FPL's revenues. If FPL is unable to maintain, negotiate or renegotiate such franchise agreements on acceptable terms, it could contribute to lower earnings and FPL may not fully realize the anticipated benefits from significant investments and expenditures, which could materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.

Increasing costs associated with health care plans may materially adversely affect NEE's and FPL's results of operations.

The costs of providing health care benefits to employees and retirees have increased substantially in recent years. NEE and FPL anticipate that their employee benefit costs, including, but not limited to, costs related to health care plans for employees and former employees, will continue to rise. The increasing costs and funding requirements associated with NEE's and FPL's health care plans may materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's and FPL's business, financial condition, results of operations and prospects could be negatively affected by the lack of a qualified workforce or the loss or retirement of key employees.

NEE and FPL may not be able to service customers, grow their business or generally meet their other business plan goals effectively and profitably if they do not attract and retain a qualified workforce. Additionally, the loss or retirement of key executives and other employees may materially adversely affect service and productivity and contribute to higher training and safety costs.

Over the next several years, a significant portion of NEE's and FPL's workforce, including, but not limited to, many workers with specialized skills maintaining and servicing the nuclear generation facilities and electrical infrastructure, will be eligible to retire. Such highly skilled individuals may not be able to be replaced quickly due to the technically complex work they perform. If a significant amount of such workers retire and are not replaced, the subsequent loss in productivity and increased recruiting and training costs could result in a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected by work strikes or stoppages and increasing personnel costs.

Employee strikes or work stoppages could disrupt operations and lead to a loss of revenue and customers. Personnel costs may also increase due to inflationary or competitive pressures on payroll and benefits costs and revised terms of collective bargaining agreements with union employees. These consequences could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's ability to successfully identify, complete and integrate acquisitions is subject to significant risks, including, but not limited to, the effect of increased competition for acquisitions resulting from the consolidation of the power industry.

NEE is likely to encounter significant competition for acquisition opportunities that may become available as a result of the consolidation of the power industry in general. In addition, NEE may be unable to identify attractive acquisition opportunities at favorable prices and to complete and integrate them successfully and in a timely manner.

NEP's acquisitions may not be completed and, even if completed, NEE may not realize the anticipated benefits of any acquisitions, which could materially adversely affect NEE's business, financial condition, results of operations and prospects.

NEE may not realize the anticipated benefits from the Texas pipeline business. Although NEP has made a number of acquisitions of wind and solar generation projects, the Texas pipeline business is the first third party acquisition by NEP and is NEP's first acquisition of natural gas pipeline assets.

In the future NEP may make additional acquisitions of assets which are inherently risky and NEE may not realize the anticipated benefits of any acquisitions, which could materially adversely affect NEE's business, financial condition, results of operations and prospects.

Nuclear Generation Risks

The construction, operation and maintenance of NEE's and FPL's nuclear generation facilities involve environmental, health and financial risks that could result in fines or the closure of the facilities and in increased costs and capital expenditures.

NEE's and FPL's nuclear generation facilities are subject to environmental, health and financial risks, including, but not limited to, those relating to site storage of spent nuclear fuel, the disposition of spent nuclear fuel, leakage and emissions of tritium and other radioactive elements in the event of a nuclear accident or otherwise, the threat of a terrorist attack and other potential liabilities arising out of the ownership or operation of the facilities. NEE and FPL maintain decommissioning funds and external insurance coverage which are intended to reduce the financial exposure to some of these risks; however, the cost of decommissioning nuclear generation facilities could exceed the amount available in NEE's and FPL's decommissioning funds, and the exposure to liability and property damages could exceed the amount of insurance coverage. If NEE or FPL is unable to recover the additional costs incurred through insurance or, in the case of FPL, through regulatory mechanisms, their business, financial condition, results of operations and prospects could be materially adversely affected.

In the event of an incident at any nuclear generation facility in the U.S. or at certain nuclear generation facilities in Europe, NEE and FPL could be assessed significant retrospective assessments and/or retrospective insurance premiums as a result of their participation in a secondary financial protection system and nuclear insurance mutual companies.

Liability for accidents at nuclear power plants is governed by the Price-Anderson Act, which limits the liability of nuclear reactor owners to the amount of insurance available from both private sources and an industry retrospective payment plan. In accordance with this Act, NEE maintains $375 million of private liability insurance per site, which is the maximum obtainable, and participates in a secondary financial protection system, which provides up to $13.1 billion of liability insurance coverage per incident at any nuclear reactor in the U.S. Under the secondary financial protection system, NEE is subject to retrospective assessments and/or retrospective insurance premiums of up to $1.0 billion ($509 million for FPL), plus any applicable taxes, per incident at any nuclear reactor in the U.S. or at certain nuclear generation facilities in Europe, regardless of fault or proximity to the incident, payable at a rate not to exceed $152 million ($76 million for FPL) per incident per year. Such assessments, if levied, could materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.

NRC orders or new regulations related to increased security measures and any future safety requirements promulgated by the NRC could require NEE and FPL to incur substantial operating and capital expenditures at their nuclear generation facilities.

The NRC has broad authority to impose licensing and safety-related requirements for the operation and maintenance of nuclear generation facilities, the addition of capacity at existing nuclear generation facilities and the construction of nuclear generation facilities, and these requirements are subject to change. In the event of non-compliance, the NRC has the authority to impose fines or shut down a nuclear generation facility, or to take both of these actions, depending upon its assessment of the severity of the situation, until compliance is achieved. Any of the foregoing events could require NEE and FPL to incur increased costs and capital expenditures, and could reduce revenues.

Any serious nuclear incident occurring at a NEE or FPL plant could result in substantial remediation costs and other expenses. A major incident at a nuclear facility anywhere in the world could cause the NRC to limit or prohibit the operation or licensing of any domestic nuclear generation facility. An incident at a nuclear facility anywhere in the world also could cause the NRC to impose

additional conditions or other requirements on the industry, or on certain types of nuclear generation units, which could increase costs, reduce revenues and result in additional capital expenditures.

The inability to operate any of NEER's or FPL's nuclear generation units through the end of their respective operating licenses could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

The operating licenses for NEE's and FPL's nuclear generation facilities extend through at least 2030. If the facilities cannot be operated for any reason through the life of those operating licenses, NEE or FPL may be required to increase depreciation rates, incur impairment charges and accelerate future decommissioning expenditures, any of which could materially adversely affect their business, financial condition, results of operations and prospects.

Various hazards posed to nuclear generation facilities, along with increased public attention to and awareness of such hazards, could result in increased nuclear licensing or compliance costs which are difficult or impossible to predict and could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

The threat of terrorist activity, as well as recent international events implicating the safety of nuclear facilities, could result in more stringent or complex measures to keep facilities safe from a variety of hazards, including, but not limited to, natural disasters such as earthquakes and tsunamis, as well as terrorist or other criminal threats. This increased focus on safety could result in higher compliance costs which, at present, cannot be assessed with any measure of certainty and which could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's and FPL's nuclear units are periodically removed from service to accommodate normal refueling and maintenance outages, and for other purposes. If planned outages last longer than anticipated or if there are unplanned outages, NEE's and FPL's results of operations and financial condition could be materially adversely affected.

NEE's and FPL's nuclear units are periodically removed from service to accommodate normal refueling and maintenance outages, including, but not limited to, inspections, repairs and certain other modifications. In addition, outages may be scheduled, often in connection with a refueling outage, to replace equipment, to increase the generating capacity at a particular nuclear unit, or for other purposes, and those planned activities increase the time the unit is not in operation. In the event that a scheduled outage lasts longer than anticipated or in the event of an unplanned outage due to, for example, equipment failure, such outages could materially adversely affect NEE's or FPL's business, financial condition, results of operations and prospects.

Liquidity, Capital Requirements and Common Stock Risks

Disruptions, uncertainty or volatility in the credit and capital markets may negatively affect NEE's and FPL's ability to fund their liquidity and capital needs and to meet their growth objectives, and can also materially adversely affect the results of operations and financial condition of NEE and FPL.

NEE and FPL rely on access to capital and credit markets as significant sources of liquidity for capital requirements and other operations requirements that are not satisfied by operating cash flows. Disruptions, uncertainty or volatility in those capital and credit markets, including, but not limited to, the conditions of the most recent financial crises in the U.S. and abroad, could increase NEE's and FPL's cost of capital. If NEE or FPL is unable to access regularly the capital and credit markets on terms that are reasonable, it may have to delay raising capital, issue shorter-term securities and incur an unfavorable cost of capital, which, in turn, could adversely affect its ability to grow its business, could contribute to lower earnings and reduced financial flexibility, and could have a material adverse effect on its business, financial condition, results of operations and prospects.

Although NEE's competitive energy subsidiaries have used non-recourse or limited-recourse, project-specific or other financing in the past, market conditions and other factors could adversely affect the future availability of such financing. The inability of NEE's subsidiaries, including, without limitation, NEECH and NEP and their respective subsidiaries, to access the capital and credit markets to provide project-specific or other financing for electric generation or other facilities or acquisitions on favorable terms, whether because of disruptions or volatility in those markets or otherwise, could necessitate additional capital raising or borrowings by NEE and/or NEECH in the future.

The inability of subsidiaries that have existing project-specific or other financing arrangements to meet the requirements of various agreements relating to those financings could give rise to a project-specific financing default which, if not cured or waived, might result in the specific project, and potentially in some limited instances its parent companies, being required to repay the associated debt or other borrowings earlier than otherwise anticipated, and if such repayment were not made, the lenders or security holders would generally have rights to foreclose against the project assets and related collateral. Such an occurrence also could result in NEE expending additional funds or incurring additional obligations over the shorter term to ensure continuing compliance with project-specific financing arrangements based upon the expectation of improvement in the project's performance or financial returns over the longer term. Any of these actions could materially adversely affect NEE's business, financial condition, results of operations and prospects, as well as the availability or terms of future financings for NEE or its subsidiaries.

NEE's, NEECH's and FPL's inability to maintain their current credit ratings may materially adversely affect NEE's and FPL's liquidity and results of operations, limit the ability of NEE and FPL to grow their business, and increase interest costs.

The inability of NEE, NEECH and FPL to maintain their current credit ratings could materially adversely affect their ability to raise capital or obtain credit on favorable terms, which, in turn, could impact NEE's and FPL's ability to grow their business and service indebtedness and repay borrowings, and would likely increase their interest costs. In addition, certain agreements and guarantee arrangements would require posting of additional collateral in the event of a ratings downgrade. Some of the factors that can affect credit ratings are cash flows, liquidity, the amount of debt as a component of total capitalization, NEE's overall business mix and political, legislative and regulatory actions. There can be no assurance that one or more of the ratings of NEE, NEECH and FPL will not be lowered or withdrawn entirely by a rating agency.

NEE's and FPL's liquidity may be impaired if their credit providers are unable to fund their credit commitments to the companies or to maintain their current credit ratings.

The inability of NEE's, NEECH's and FPL's credit providers to fund their credit commitments or to maintain their current credit ratings could require NEE, NEECH or FPL, among other things, to renegotiate requirements in agreements, find an alternative credit provider with acceptable credit ratings to meet funding requirements, or post cash collateral and could have a material adverse effect on NEE's and FPL's liquidity.

Poor market performance and other economic factors could affect NEE's defined benefit pension plan's funded status, which may materially adversely affect NEE's and FPL's business, financial condition, liquidity and results of operations and prospects.

NEE sponsors a qualified noncontributory defined benefit pension plan for substantially all employees of NEE and its subsidiaries. A decline in the market value of the assets held in the defined benefit pension plan due to poor investment performance or other factors may increase the funding requirements for this obligation.

NEE's defined benefit pension plan is sensitive to changes in interest rates, since, as interest rates decrease the funding liabilities increase, potentially increasing benefits costs and funding requirements. Any increase in benefits costs or funding requirements may have a material adverse effect on NEE's and FPL's business, financial condition, liquidity, results of operations and prospects.

Poor market performance and other economic factors could adversely affect the asset values of NEE's and FPL's nuclear decommissioning funds, which may materially adversely affect NEE's and FPL's liquidity and results of operations.

NEE and FPL are required to maintain decommissioning funds to satisfy their future obligations to decommission their nuclear power plants. A decline in the market value of the assets held in the decommissioning funds due to poor investment performance or other factors may increase the funding requirements for these obligations. Any increase in funding requirements may have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

Certain of NEE's investments are subject to changes in market value and other risks, which may materially adversely affect NEE's liquidity, financial results and results of operations.

NEE holds other investments where changes in the fair value affect NEE's financial results. In some cases there may be no observable market values for these investments, requiring fair value estimates to be based on other valuation techniques. This type of analysis requires significant judgment and the actual values realized in a sale of these investments could differ materially from those estimated. A sale of an investment below previously estimated value, or other decline in the fair value of an investment, could result in losses or the write-off of such investment, and may have a material adverse effect on NEE's liquidity, financial condition and results of operations.

NEE may be unable to meet its ongoing and future financial obligations and to pay dividends on its common stock if its subsidiaries are unable to pay upstream dividends or repay funds to NEE.

NEE is a holding company and, as such, has no material operations of its own. Substantially all of NEE's consolidated assets are held by its subsidiaries. NEE's ability to meet its financial obligations, including, but not limited to, its guarantees, and to pay dividends on its common stock is primarily dependent on its subsidiaries' net income and cash flows, which are subject to the risks of their respective businesses, and their ability to pay upstream dividends or to repay funds to NEE.

NEE's subsidiaries are separate legal entities and have no independent obligation to provide NEE with funds for its payment obligations. The subsidiaries have financial obligations, including, but not limited to, payment of debt service, which they must satisfy before they can provide NEE with funds. In addition, in the event of a subsidiary's liquidation or reorganization, NEE's right to participate in a distribution of assets is subject to the prior claims of the subsidiary's creditors.

The dividend-paying ability of some of the subsidiaries is limited by contractual restrictions which are contained in outstanding financing agreements and which may be included in future financing agreements. The future enactment of laws or regulations also may prohibit or restrict the ability of NEE's subsidiaries to pay upstream dividends or to repay funds.

NEE may be unable to meet its ongoing and future financial obligations and to pay dividends on its common stock if NEE is required to perform under guarantees of obligations of its subsidiaries.

NEE guarantees many of the obligations of its consolidated subsidiaries, other than FPL, through guarantee agreements with NEECH. These guarantees may require NEE to provide substantial funds to its subsidiaries or their creditors or counterparties at a time when NEE is in need of liquidity to meet its own financial obligations. Funding such guarantees may materially adversely affect NEE's ability to meet its financial obligations or to pay dividends.

NEP may not be able to access sources of capital on commercially reasonable terms, which would have a material adverse effect on its ability to consummate future acquisitions and on the value of NEE's limited partner interest in NEP OpCo.

NEE understands that NEP expects to finance acquisitions of clean energy projects partially or wholly through the issuance of additional common units. NEP needs to be able to access the capital markets on commercially reasonable terms when acquisition opportunities arise. NEP's ability to access the equity capital markets is dependent on, among other factors, the overall state of the capital markets and investor appetite for investment in clean energy projects in general and NEP's common units in particular. An inability to obtain equity financing on commercially reasonable terms could limit NEP's ability to consummate future acquisitions and to effectuate its growth strategy in the manner currently contemplated. Furthermore there may not be sufficient availability under NEP OpCo's subsidiaries' revolving credit facility or other financing arrangements on commercially reasonable terms when acquisition opportunities arise. If debt financing is available, it may be available only on terms that could significantly increase NEP's interest expense, impose additional or more restrictive covenants and reduce cash distributions to its unitholders. An inability to access sources of capital on commercially reasonable terms could significantly limit NEP's ability to consummate future acquisitions and to effectuate its growth strategy. NEP's inability to effectively consummate future acquisitions could have a material adverse effect on NEP's ability to grow its business and make cash distributions to its unitholders.

Through an indirect wholly owned subsidiary, NEE owns a limited partner interest in NEP OpCo. NEP's inability to access the capital markets on commercially reasonable terms and effectively consummate future acquisitions could have a material adverse effect on NEP's ability to grow its cash distributions to its unitholders, including NEE, and on the value of NEE's limited partnership interest in NEP OpCo.

Disruptions, uncertainty or volatility in the credit and capital markets may exert downward pressure on the market price of NEE's common stock.

The market price and trading volume of NEE's common stock are subject to fluctuations as a result of, among other factors, general credit and capital market conditions and changes in market sentiment regarding the operations, business and financing strategies of NEE and its subsidiaries. As a result, disruptions, uncertainty or volatility in the credit and capital markets may, for example, have a material adverse effect on the market price of NEE's common stock.

Item 1B. Unresolved Staff Comments

None

Item 2. Properties

NEE and its subsidiaries maintain properties which are adequate for their operations; the principal properties are described below.

Generation Facilities

FPL

At December 31, 2015, the electric generation, transmission, distribution and general facilities of FPL represented approximately 50%, 11%, 33% and 6%, respectively, of FPL's gross investment in electric utility plant in service and other property. At December 31, 2015, FPL had the following generation facilities:

FPL Facilities	Location	No. of Units	Fuel	Net Capability (MW)[a]
Fossil				
Combined-cycle				
Cape Canaveral	Cocoa, FL	1	Gas/Oil	1,210
Fort Myers	Fort Myers, FL	1	Gas	1,470
Lauderdale	Dania, FL	2	Gas/Oil	884
Manatee	Parrish, FL	1	Gas	1,141
Martin	Indiantown, FL	1	Gas/Oil/Solar Thermal	1,135 [b]
Martin	Indiantown, FL	2	Gas	938
Riviera	Riviera Beach, FL	1	Gas/Oil	1,212
Sanford	Lake Monroe, FL	2	Gas	2,010
Turkey Point	Florida City, FL	1	Gas/Oil	1,187
West County	West Palm Beach, FL	3	Gas/Oil	3,657
Steam turbines				
Cedar Bay	Jacksonville, FL	1	Coal	250
Manatee	Parrish, FL	2	Gas/Oil	1,618
Martin	Indiantown, FL	2	Gas/Oil	1,626
St. Johns River Power Park	Jacksonville, FL	2	Coal/Petroleum Coke	254 [c]
Scherer	Monroe County, GA	1	Coal	634 [d]
Turkey Point	Florida City, FL	1	Gas/Oil	396
Simple-cycle combustion turbines				
Fort Myers	Fort Myers, FL	2	Gas/Oil	314
Gas turbines				
Fort Myers	Fort Myers, FL	11	Oil	594
Lauderdale	Dania, FL	24	Gas/Oil	824
Port Everglades	Port Everglades, FL	12	Gas/Oil	412
Nuclear				
St. Lucie	Hutchinson Island, FL	2	Nuclear	1,821 [e]
Turkey Point	Florida City, FL	2	Nuclear	1,632
Solar PV				
DeSoto	Arcadia, FL	1	Solar PV	25
Space Coast	Cocoa, FL	1	Solar PV	10
TOTAL				25,254 [f]

(a) Represents FPL's net ownership interest in warm weather peaking capability.
(b) The megawatts generated by the 75 MW solar thermal hybrid facility replace steam produced by this unit and therefore are not incremental.
(c) Represents FPL's 20% ownership interest in each of SJRPP Units Nos. 1 and 2, which are jointly owned with JEA.
(d) Represents FPL's approximately 76% ownership of Scherer Unit No. 4, which is jointly owned with JEA.
(e) Excludes Orlando Utilities Commission's and the Florida Municipal Power Agency's combined share of approximately 15% of St. Lucie Unit No. 2.
(f) Substantially all of FPL's properties are subject to the lien of FPL's mortgage.

NEER

At December 31, 2015, NEER had the following generation facilities (see Item 1. Business - II. NEER - Generation and Other Operations - Contracted, Merchant and Other Operations for definition of contracted and merchant facilities):

NEER Facilities	Location	Fuel	Net Capability (MW)[a]
Contracted			
Adelaide Wind[b]	Middlesex County, Ontario, Canada	Wind	60
Ashtabula Wind[b][c]	Barnes County, ND	Wind	148
Ashtabula Wind II[c]	Griggs & Steele Counties, ND	Wind	120
Ashtabula Wind III[b][d]	Barnes County, ND	Wind	62
Baldwin Wind[b][d]	Burleigh County, ND	Wind	102
Blackwell Wind[c][e]	Kay County, OK	Wind	60
Bluewater Wind[b][d]	Huron County, Ontario, Canada	Wind	60
Bornish Wind[b]	Middlesex County, Ontario, Canada	Wind	73
Breckinridge[c]	Garfield County, OK	Wind	98
Buffalo Ridge	Lincoln County, MN	Wind	26
Butler Ridge Wind[b][c]	Dodge County, WI	Wind	54
Cabazon[b]	Riverside County, CA	Wind	39
Carousel Wind[c]	Kit Carson County, CO	Wind	150
Cedar Bluff Wind[c]	Ellis, Ness, Rush & Trego Counties, KS	Wind	198
Cerro Gordo[b]	Cerro Gordo County, IA	Wind	41
Cimarron[b]	Gray County, KS	Wind	166
Conestogo Wind[b][d]	Wellington County, Ontario, Canada	Wind	23
Crystal Lake I[b][c]	Hancock County, IA	Wind	150
Crystal Lake II[f]	Winnebago County, IA	Wind	200
Crystal Lake III[f]	Winnebago County, IA	Wind	66
Day County Wind[b]	Day County, SD	Wind	99
Diablo Wind[b]	Alameda County, CA	Wind	20
East Durham Wind	Grey County, Ontario, Canada	Wind	22
Elk City Wind[b][d]	Roger Mills & Beckham Counties, OK	Wind	99
Elk City Wind II	Roger Mills & Beckham Counties, OK	Wind	101
Endeavor Wind	Osceola County, IA	Wind	100
Endeavor Wind II	Osceola County, IA	Wind	50
Ensign Wind	Gray County, KS	Wind	99
Ghost Pine Wind	Kneehill County, Alberta, Canada	Wind	82
Golden Hills Wind[c]	Alameda County, CA	Wind	86
Golden West Wind[c]	El Paso County, CO	Wind	249
Goshen[b]	Huron County, Ontario, Canada	Wind	102
Gray County	Gray County, KS	Wind	112
Green Power	Riverside County, CA	Wind	17
Hancock County[b]	Hancock County, IA	Wind	98
High Winds[b]	Solano County, CA	Wind	162
Indian Mesa	Pecos County, TX	Wind	83
Javelina Wind[b]	Webb County, TX	Wind	250
Jericho Wind[b][d]	Lambton & Middlesex Counties, Ontario, Canada	Wind	149
King Mountain[b][f]	Upton County, TX	Wind	278
Lake Benton II[b]	Pipestone County, MN	Wind	103
Langdon Wind[b][c]	Cavalier County, ND	Wind	118
Langdon Wind II[b][c]	Cavalier County, ND	Wind	41
Lee / DeKalb Wind	Lee & DeKalb Counties, IL	Wind	217
Limon I[c][e]	Lincoln, Elbert & Arapahoe Counties, CO	Wind	200
Limon II[c][e]	Lincoln, Elbert & Arapahoe Counties, CO	Wind	200
Limon III[c][e]	Lincoln County, CO	Wind	201
Logan Wind[c]	Logan County, CO	Wind	201
Majestic Wind[b][c]	Carson County, TX	Wind	79

Majestic Wind II[c]	Carson & Potter Counties, TX	Wind	80
Mammoth Plains Wind[c][d]	Dewey & Blaine Counties, OK	Wind	199
Meyersdale[b]	Somerset County, PA	Wind	30
Mill Run[b]	Fayette County, PA	Wind	15
Minco Wind[b]	Grady County, OK	Wind	99
Minco Wind II[b]	Grady & Caddo Counties, OK	Wind	101

Total Generating Capability			21,140
Noncontrolling Interest			(480)
Total Net Generating Capability			20,660

(a) Represents NEER's net ownership interest in plant capacity.
(b) These generation facilities are encumbered by liens against their assets securing various financings.
(c) NEER owns these wind facilities together with third-party investors with differential membership interests. See Note 1 - Sale of Differential Membership Interests.
(d) These generation facilities are part of the NEP portfolio and subject to an approximately 23.2% noncontrolling interest.
(e) Various financings are secured by the pledge of NEER's membership interests in the entities owning these wind facilities.
(f) These generation facilities have approximately 325 MW of generating capacity that is not fully committed under long-term contracts.
(g) NEP owns an approximately 50% equity method investment in these solar projects. See Note 9 - NEER.
(h) Excludes Central Iowa Power Cooperative and Corn Belt Power Cooperative's combined share of 30%.
(i) See Note 1 - Assets and Liabilities Associated with Assets Held for Sale for discussion of the pending sale of these facilities.
(j) Excludes Massachusetts Municipal Wholesale Electric Company's, Taunton Municipal Lighting Plant's and Hudson Light & Power Department's combined share of 11.77%.
(k) Excludes six other energy-related partners' combined share of 16%.

Transmission and Distribution

At December 31, 2015, FPL owned and operated 601 substations and the following electric transmission and distribution lines:

Nominal Voltage	Overhead Lines Circuit/Pole Miles	Trench and Submarine Cables Miles
500 kV	1,106 (a)	—
230 kV	3,197	25
138 kV	1,581	52
115 kV	758	—
69 kV	164	14
Total circuit miles	6,806	91
Less than 69 kV (pole miles)	42,301	25,506

(a) Includes approximately 75 miles owned jointly with JEA.

At December 31, 2015, NEER owned and operated 182 substations and approximately 1,098 circuit miles of transmission lines ranging from 69 kV to 345 kV and NEET owned and operated 6 substations and approximately 624 circuit miles of 345 kV transmission lines.

See Item 1. Business - NEER - Generation and Other Operations - Natural Gas Pipelines for a description of NEER's natural gas pipelines in operation.

Character of Ownership

Substantially all of FPL's properties are subject to the lien of FPL's mortgage, which secures most debt securities issued by FPL. The majority of FPL's real property is held in fee and is free from other encumbrances, subject to minor exceptions which are not of a nature as to substantially impair the usefulness to FPL of such properties. Some of FPL's electric lines are located on parcels of land which are not owned in fee by FPL but are covered by necessary consents of governmental authorities or rights obtained from owners of private property. The majority of NEER's generation facilities, pipeline facilities and transmission assets are owned by NEER subsidiaries and a number of those facilities and assets, including all of the Texas pipelines, are encumbered by liens securing various financings. Additionally, the majority of NEER's generation facilities, pipeline facilities and transmission lines are located on land leased or under easement from owners of private property. The majority of NEET's transmission assets are encumbered by liens securing financings and the majority of its transmission lines are located on land leased or under easement from owners of private property. See Generation Facilities and Note 1 - Electric Plant, Depreciation and Amortization.

Item 3. Legal Proceedings

NEE and FPL are parties to various legal and regulatory proceedings in the ordinary course of their respective businesses. For information regarding legal proceedings that could have a material adverse effect on NEE or FPL, see Note 14 - Legal Proceedings. Such descriptions are incorporated herein by reference.

Item 4. Mine Safety Disclosures

Not applicable

PART II

Item 5. Market for Registrants' Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Common Stock Data. All of FPL's common stock is owned by NEE. NEE's common stock is traded on the New York Stock Exchange under the symbol "NEE." The high and low sales prices for the common stock of NEE as reported in the consolidated transaction reporting system of the New York Stock Exchange and the cash dividends per share declared for each quarter during the past two years are as follows:

	2015			2014		
Quarter	High	Low	Cash Dividends	High	Low	Cash Dividends
First	$ 112.64	$ 97.48	$ 0.77	$ 96.13	$ 83.97	$ 0.725
Second	$ 106.63	$ 97.23	$ 0.77	$ 102.51	$ 93.28	$ 0.725
Third	$ 109.98	$ 93.74	$ 0.77	$ 102.46	$ 91.79	$ 0.725
Fourth	$ 105.85	$ 95.84	$ 0.77	$ 110.84	$ 90.33	$ 0.725

The amount and timing of dividends payable on NEE's common stock are within the sole discretion of NEE's Board of Directors. The Board of Directors reviews the dividend rate at least annually (generally in February) to determine its appropriateness in light of NEE's financial position and results of operations, legislative and regulatory developments affecting the electric utility industry in general and FPL in particular, competitive conditions, change in business mix and any other factors the Board of Directors deems relevant. The ability of NEE to pay dividends on its common stock is dependent upon, among other things, dividends paid to it by its subsidiaries. There are no restrictions in effect that currently limit FPL's ability to pay dividends to NEE. In February 2016, NEE announced that it would increase its quarterly dividend on its common stock from $0.77 per share to $0.87 per share. See Management's Discussion - Liquidity and Capital Resources - Covenants with respect to dividend restrictions and Note 11 - Common Stock Dividend Restrictions regarding dividends paid by FPL to NEE.

As of the close of business on January 31, 2016, there were 20,919 holders of record of NEE's common stock.

Issuer Purchases of Equity Securities. Information regarding purchases made by NEE of its common stock during the three months ended December 31, 2015 is as follows:

Period	Total Number of Shares Purchased[a]	Average Price Paid Per Share	Total Number of Shares Purchased as Part of a Publicly Announced Program	Maximum Number of Shares that May Yet be Purchased Under the Program[b]
10/1/2015 - 10/31/15	—	—	—	13,274,748
11/1/2015 - 11/30/15	2,487	$ 100.43	—	13,274,748
12/1/2015 - 12/31/15	1,063	$ 98.01	—	13,274,748
Total	3,550	$ 99.71	—	

(a) Includes: (1) in November 2015, shares of common stock withheld from employees to pay certain withholding taxes upon the vesting of stock awards granted to such employees under the NextEra Energy, Inc. Amended and Restated 2011 Long Term Incentive Plan; and (2) in December 2015, shares of common stock withheld from employees to pay certain withholding taxes upon the vesting of stock awards granted to such employees under the NextEra Energy, Inc. Amended and Restated Long-Term Incentive Plan (former LTIP) and shares of common stock purchased as a reinvestment of dividends by the trustee of a grantor trust in connection with NEE's obligation under a February 2006 grant under the former LTIP to an executive officer of deferred retirement share awards.

(b) In February 2005, NEE's Board of Directors authorized common stock repurchases of up to 20 million shares of common stock over an unspecified period, which authorization was most recently reaffirmed and ratified by the Board of Directors in July 2011.

Item 6. Selected Financial Data

	Years Ended December 31,				
	2015	2014	2013	2012	2011
SELECTED DATA OF NEE (millions, except per share amounts):					
Operating revenues	**$ 17,486**	$ 17,021	$ 15,136	$ 14,256	$ 15,341

Total	**100.0%**	100.0%	100.0%	100.0%	100.0%
Approximate 60-minute peak load (MW):[f]					
Summer season	**22,717**	22,900	21,576	21,440	21,619
Winter season	**20,541**	19,718	18,028	16,025	17,934
Average number of customer accounts (thousands):					
Residential	**4,227**	4,169	4,097	4,052	4,027
Commercial	**533**	526	517	512	508
Industrial	**11**	10	10	9	9
Other	**4**	4	3	3	3
Total	**4,775**	4,709	4,627	4,576	4,547
Average price billed to customers (cents per kWh)	**9.48**	9.97	9.47	9.51	9.83

(a) Includes net unrealized mark-to-market after-tax gains (losses) associated with non-qualifying hedges of approximately $183 million, $153 million, $(53) million, $(34) million and $190 million, respectively. Also, on an after-tax basis, 2013 includes impairment and other charges related to the Spain Solar projects of approximately $342 million and 2011 includes loss on the sale of natural gas-fired generation assets of approximately $98 million. See Management's Discussion - Overview - Adjusted Earnings.

(b) 2013 includes an after-tax gain from discontinued operations of $231 million. See Note 6.

(c) Includes assets held for sale of approximately $1,009 million in 2015 and $335 million in 2012. See Note 1 - Assets and Liabilities Associated with Assets Held for Sale.

(d) Reflects reclassification of debt issuance costs for 2011 through 2014. See Note 1 - Debt Issuance Costs.

(e) Includes the net change in unbilled sales.

(f) Winter season includes November and December of the current year and January to March of the following year (for 2015, through February 19, 2016).

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

NEE's operating performance is driven primarily by the operations of its two principal subsidiaries, FPL, which serves approximately 4.8 million customer accounts in Florida and is one of the largest rate-regulated electric utilities in the U.S., and NEER, which together with affiliated entities is the largest generator in North America of renewable energy from the wind and sun based on MWh produced. The table below presents net income (loss) attributable to NEE and earnings (loss) per share, assuming dilution, attributable to NEE by reportable segment - FPL and NEER, and by Corporate and Other, which is primarily comprised of the operating results of NEET, FPL FiberNet and other business activities, as well as other income and expense items, including interest expense, income taxes and eliminating entries (see Note 15 for additional segment information, including reported results from continuing operations). The following discussions should be read in conjunction with the Notes to Consolidated Financial Statements contained herein and all comparisons are with the corresponding items in the prior year.

	Net Income (Loss) Attributable to NEE			Earnings (Loss) Per Share, assuming dilution		
	Years Ended December 31,			Years Ended December 31,		
	2015	2014	2013	**2015**	2014	2013
	(millions)					
FPL	**$ 1,648**	$ 1,517	$ 1,349	**$ 3.63**	$ 3.45	$ 3.16
NEER[a][b]	**1,092**	989	556	**2.41**	2.25	1.30
Corporate and Other[b]	**12**	(41)	3	**0.02**	(0.10)	0.01
NEE	**$ 2,752**	$ 2,465	$ 1,908	**$ 6.06**	$ 5.60	$ 4.47

(a) NEER's results reflect an allocation of interest expense from NEECH based on a deemed capital structure of 70% debt and allocated shared service costs.
(b) NEER's and Corporate and Other's results for 2014 and 2013 were retrospectively adjusted to reflect a segment change as further discussed in Note 15.

During 2014, NEP, through NEER, was formed to acquire, manage and own contracted clean energy projects with stable, long-term cash flows through a limited partner interest in NEP OpCo. On July 1, 2014, NEP completed its IPO as further described in Note 1 - NextEra Energy Partners, LP. See Item 1. Business - II. NEER. In December 2014, NEE and HEI announced a proposed merger. See Item 1. Business - Overview.

For the five years ended December 31, 2015, NEE delivered a total shareholder return of approximately 137.0%, above the S&P 500's 80.8% return, the S&P 500 Utilities' 68.8% return and the Dow Jones U.S. Electricity's 61.7% return. The historical stock performance of NEE's common stock shown in the performance graph below is not necessarily indicative of future stock price performance.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN*

	12/10	12/11	12/12	12/13	12/14	12/15
NextEra Energy, Inc.	100.00	121.86	143.69	183.89	235.23	236.98
S&P 500	100.00	102.11	118.45	156.82	178.29	180.75
S&P 500 Utilities	100.00	119.91	121.46	137.51	177.36	168.77
Dow Jones US Electricity	100.00	117.73	118.93	132.81	170.96	161.74

*$100 invested on 12/31/10 in stock or index, including reinvestment of dividends.
Fiscal year ending December 31.

Adjusted Earnings

NEE prepares its financial statements under GAAP. However, management uses earnings excluding certain items (adjusted earnings), a non-GAAP financial measure, internally for financial planning, for analysis of performance, for reporting of results to the Board of Directors and as an input in determining performance-based compensation under NEE's employee incentive compensation plans. NEE also uses adjusted earnings when communicating its financial results and earnings outlook to analysts and investors. NEE's management believes adjusted earnings provides a more meaningful representation of the company's fundamental earnings power. Although the excluded amounts are properly included in the determination of net income under GAAP, management believes that the amount and/or nature of such items make period to period comparisons of operations difficult and potentially confusing. Adjusted earnings do not represent a substitute for net income, as prepared under GAAP.

Adjusted earnings exclude the unrealized mark-to-market effect of non-qualifying hedges (as described below) and OTTI losses on securities held in NEER's nuclear decommissioning funds, net of the reversal of previously recognized OTTI losses on securities sold and losses on securities where price recovery was deemed unlikely (collectively, OTTI reversals). However, other adjustments may be made from time to time with the intent to provide more meaningful and comparable results of ongoing operations.

NEE and NEER segregate into two categories unrealized mark-to-market gains and losses on derivative transactions. The first category, referred to as non-qualifying hedges, represents certain energy derivative transactions and certain interest rate derivative transactions entered into as economic hedges, which do not meet the requirements for hedge accounting, or for which hedge accounting treatment is not elected or has been discontinued. Changes in the fair value of those transactions are marked to market and reported in the consolidated statements of income, resulting in earnings volatility because the economic offset to the positions are not marked to market. As a consequence, NEE's net income reflects only the movement in one part of economically-linked transactions. For example, a gain (loss) in the non-qualifying hedge category for certain energy derivatives is offset by decreases (increases) in the fair value of related physical asset positions in the portfolio or contracts, which are not marked to market under GAAP. For this reason, NEE's management views results expressed excluding the unrealized mark-to-market impact of the non-qualifying hedges as a meaningful measure of current period performance. The second category, referred to as trading activities, which is included in adjusted earnings, represents the net unrealized effect of actively traded positions entered into to take advantage of expected market price movements and all other commodity hedging activities. In January 2016, NEE discontinued hedge accounting for all of its remaining interest rate and foreign currency derivative instruments, which could result in increased volatility in the non-qualifying hedge category in the future. At FPL, substantially all changes in the fair value of energy derivative transactions are deferred as a regulatory asset or liability until the contracts are settled, and, upon settlement, any gains or losses are passed through the fuel clause. See Note 3.

In 2013, an after-tax gain from discontinued operations of $231 million ($216 million recorded at NEER and $15 million recorded at Corporate and Other) was recorded in NEE's consolidated statements of income related to the sale of its ownership interest in a portfolio of hydropower generation plants and related assets located in Maine and New Hampshire (see Note 6). In addition, during 2013, an after-tax loss of $43 million ($41 million recorded at NEER and $2 million recorded at Corporate and Other) was recorded associated with the decision to pursue the sale of NEER's ownership interests in oil-fired generation plants located in Maine (Maine fossil). During 2014, NEER decided not to pursue the sale of Maine fossil and recorded an after-tax gain of $12 million to increase Maine fossil's carrying value to its estimated fair value. See Note 4 - Nonrecurring Fair Value Measurements. Also in 2013, NEER recorded an impairment of $300 million and other related charges ($342 million after-tax) related to the Spain solar projects in NEE's consolidated statements of income. See Note 4 - Nonrecurring Fair Value Measurements In order to make period to period comparisons more meaningful, adjusted earnings also exclude the items discussed above, as well as costs incurred in 2015 associated with the proposed merger pursuant to which, if consummated, Hawaiian Electric Company, Inc. will become a wholly owned subsidiary of NEE (see Note 1 - Proposed Merger) and, beginning in the third quarter of 2013, the after-tax operating results associated with the Spain solar projects.

The following table provides details of the adjustments to net income considered in computing NEE's adjusted earnings discussed above.

	Years Ended December 31,		
	2015	2014	2013
		(millions)	
Net unrealized mark-to-market after-tax gains (losses) from non-qualifying hedge activity[a]	$ 183	$ 153	$ (53)
Income (loss) from OTTI after-tax losses on securities held in NEER's nuclear decommissioning funds, net of OTTI reversals[b]	$ (15)	$ (2)	$ 1
After-tax gain from discontinued operations[c]	$ —	$ —	$ 231
After-tax gain (loss) associated with Maine fossil[d]	$ —	$ 12	$ (43)
After-tax charges recorded by NEER associated with the impairment of the Spain solar projects	$ —	$ —	$ (342)
After-tax operating results of NEER's Spain solar projects	$ 5	$ (32)	$ (4)
After-tax merger-related expenses - Corporate and Other	$ (20)	$ —	$ —

(a) For 2015, 2014 and 2013, approximately $175 million of gains, $171 million of gains and $54 million of losses, respectively, are included in NEER's net income; the balance is included in Corporate and Other.
(b) For 2015, 2014 and 2013, approximately $14 million of losses, $1 million of income and $1 million of income, respectively, are included in NEER's net income; the balance is included in Corporate and Other.
(c) For 2013, approximately $216 million of the gain is included in NEER's net income; the balance is included in Corporate and Other.
(d) For 2014, all of the gain is included in NEER's net income. For 2013, approximately $41 million of the loss is included in NEER's net income; the balance is included in Corporate and Other.

The change in unrealized mark-to-market activity from non-qualifying hedges is primarily attributable to changes in forward power and natural gas prices and interest rates, as well as the reversal of previously recognized unrealized mark-to-market gains or losses as the underlying transactions were realized.

2015 Summary

Net income attributable to NEE for 2015 was higher than 2014 by $287 million, or $0.46 per share, assuming dilution, due to higher results at FPL, NEER and Corporate and Other.

FPL's increase in net income in 2015 was primarily driven by continued investments in plant in service while earning an 11.50% regulatory ROE on its retail rate base and higher AFUDC - equity related to construction projects. In 2015, FPL's average typical residential 1,000 kWh bill was the lowest among reporting electric utilities within Florida and approximately 30% below the national average based on a rate per kWh as of July 2015.

NEER's results increased in 2015 reflecting earnings from new investments, higher customer supply and proprietary power and gas trading results as well as the absence of the 2014 NEP-related charge and costs, partly offset by higher growth-related interest and general and administrative expenses and lower results from the existing assets. In 2015, NEER added approximately 1,207 MW of wind capacity in the U.S. and Canada and 285 MW of solar capacity in the U.S., and increased its backlog of contracted renewable development projects. Additionally, a subsidiary of NEP completed the acquisition of the Texas pipeline assets. During the fourth quarter of 2015, the natural gas pipeline projects that were previously reported in Corporate and Other were moved to the NEER segment (see Note 15).

In November 2015, a subsidiary of NEER entered into an agreement to sell its ownership interest in its merchant natural gas generation facilities located in Texas which have a total generating capacity of 2,884 MW at December 31, 2015. See Note 1 - Assets and Liabilities Associated with Assets Held for Sale.

Corporate and Other's results in 2015 increased primarily due to favorable income tax adjustments, 2015 investment gains compared to 2014 investment losses and the absence of debt reacquisition losses recorded in 2014. These positives were partly offset by costs associated with the proposed merger.

NEE and its subsidiaries, including FPL, require funds to support and grow their businesses. These funds are primarily provided by cash flow from operations, borrowings or issuances of short- and long-term debt and proceeds from differential membership investors and, from time to time, issuance of equity securities. As of December 31, 2015, NEE's total net available liquidity was approximately $7.7 billion, of which FPL's portion was approximately $3.1 billion.

RESULTS OF OPERATIONS

Net income attributable to NEE for 2015 was $2.75 billion, compared to $2.47 billion in 2014 and $1.91 billion in 2013. In 2015, net income attributable to NEE improved due to higher results at FPL, NEER and Corporate and Other. In 2014, net income attributable to NEE improved due to higher results at FPL and NEER partly offset by lower results at Corporate and Other.

NEE's effective income tax rate for all periods presented reflects the benefit of PTCs for NEER's wind projects, as well as ITCs and deferred income tax benefits associated with convertible ITCs for solar and certain wind projects at NEER. PTCs, ITCs and deferred income tax benefits associated with convertible ITCs can significantly affect NEE's effective income tax rate depending on the amount of pretax income. The amount of PTCs recognized can be significantly affected by wind generation and by the roll off of PTCs on certain wind projects after ten years of production (PTC roll off). In addition, NEE's effective income tax rate for 2014 was unfavorably affected by a noncash income tax charge of approximately $45 million associated with structuring Canadian assets in connection with the creation of NEP and for 2013 was unfavorably affected by the establishment of a full valuation allowance on the deferred tax assets associated with the Spain solar projects. See Note 1 - Income Taxes and - Sale of Differential Membership Interests, Note 4 - Nonrecurring Fair Value Measurements and Note 5. Also see Item 1. Business - NEER - Generation and Other Operations - NEER Fuel/Technology Mix - Policy Incentives for Renewable Energy Projects.

FPL: Results of Operations

FPL obtains its operating revenues primarily from the sale of electricity to retail customers at rates established by the FPSC through base rates and cost recovery clause mechanisms. FPL's net income for 2015, 2014 and 2013 was $1,648 million, $1,517 million and $1,349 million, respectively, representing an increase in 2015 of $131 million and an increase in 2014 of $168 million.

The use of reserve amortization is permitted under the 2012 rate agreement. See Item 1. Business - FPL - FPL Regulation - FPL Rate Regulation - Base Rates for additional information on the 2012 rate agreement. In order to earn a targeted regulatory ROE, subject to limitations associated with the 2012 rate agreement, reserve amortization is calculated using a trailing thirteen-month average of retail rate base and capital structure in conjunction with the trailing twelve months regulatory retail base net operating income, which primarily includes the retail base portion of base and other revenues, net of O&M, depreciation and amortization, interest and tax expenses. In general, the net impact of these income statement line items is adjusted, in part, by reserve amortization to earn a targeted regulatory ROE. In certain periods, reserve amortization must be reversed so as not to exceed the targeted regulatory ROE. The drivers of FPL's net income not reflected in the reserve amortization calculation typically include wholesale and transmission service revenues and expenses, cost recovery clause revenues and expenses, AFUDC - equity and costs not allowed to be recovered from retail customers by the FPSC. In 2015 and 2014, FPL recorded the reversal of reserve amortization of approximately $15 million and $33 million, respectively, and, in 2013, FPL recorded reserve amortization of $155 million.

FPL's regulatory ROE for 2015 and 2014 was 11.50%, compared to 10.96% in 2013. The 2013 regulatory ROE of 10.96% reflects approximately $32 million of after-tax charges associated with the cost savings initiative. These charges were not offset by additional reserve amortization. Excluding the impact of these charges, FPL's regulatory ROE for 2013 would have been approximately 11.25%.

In 2015, the growth in earnings for FPL was primarily driven by the following:

- higher earnings on investment in plant in service of approximately $77 million. Investment in plant in service grew FPL's average retail rate base in 2015 by approximately $1.0 billion reflecting, among other things, ongoing transmission and distribution additions and the modernized Riviera Beach power plant placed in service in April 2014,
- higher AFUDC - equity of $32 million primarily related to the modernization project at Port Everglades and other investments,
- higher earnings of approximately $22 million due to increased use of equity to finance investments, and
- higher cost recovery clause earnings of $10 million primarily related to earnings associated with the incentive mechanism,

partly offset by,

- higher nonrecoverable expenses.

In 2014, the growth in earnings for FPL was primarily driven by the following:

- higher earnings on investment in plant in service of approximately $105 million. Investment in plant in service grew FPL's average retail rate base in 2014 by approximately $2.3 billion reflecting, among other things, the modernized Riviera Beach power plant and ongoing transmission and distribution additions,
- growth in wholesale services provided which increased earnings by $47 million,
- the absence of $32 million of after-tax charges associated with the cost savings initiative recorded in 2013, and
- higher earnings of $30 million related to the increase in the targeted regulatory ROE from 11.25% to 11.50%,

partly offset by,

- lower cost recovery clause results of $22 million primarily due to the transfer of new nuclear capacity to retail rate base as discussed below under Retail Base, Cost Recovery Clauses and Interest Expense, and
- lower AFUDC - equity of $19 million primarily related to the Riviera Beach and Cape Canaveral power plants being placed in service in April 2014 and April 2013, respectively.

FPL's operating revenues consisted of the following:

	Years Ended December 31,		
	2015	2014	2013
	(millions)		
Retail base	$ 5,653	$ 5,347	$ 4,951
Fuel cost recovery	3,875	3,876	3,334
Net deferral of retail fuel revenues	(1)	—	—
Net recognition of previously deferred retail fuel revenues	—	—	44
Other cost recovery clauses and pass-through costs, net of any deferrals	1,645	1,766	1,837
Other, primarily wholesale and transmission sales, customer-related fees and pole attachment rentals	479	432	279
Total	$ 11,651	$ 11,421	$ 10,445

Retail Base

FPSC Rate Orders

FPL's retail base revenues for all years presented reflect the 2012 rate agreement as retail base rates and charges were designed to increase retail base revenues approximately $350 million on an annualized basis. In addition, retail base revenues increased in 2015 and 2014 through a $234 million annualized retail base rate increase associated with the Riviera Beach power plant and, in 2014, a $164 million annualized retail base rate increase associated with the Cape Canaveral power plant. The 2012 rate agreement:

- remains in effect until December 2016,
- establishes FPL's allowed regulatory ROE at 10.50%, with a range of plus or minus 100 basis points, and
- allows for an additional retail base rate increase as the modernized Port Everglades project becomes operational (which is expected by April 2016).

In January 2016, FPL filed a formal notification with the FPSC indicating its intent to initiate a base rate proceeding. See Item 1. Business - FPL - FPL Regulation - FPL Rate Regulation - Base Rates for additional information on the 2012 rate agreement and details of FPL's formal notification.

In 2015 and 2014, retail base revenues increased approximately $43 million and $192 million, respectively, related to the modernized Riviera Beach power plant being placed in service in April 2014. Additionally, 2014 included approximately $53 million of additional retail base revenues related to the Cape Canaveral power plant being placed in service in April 2013. Additional retail base revenues of approximately $115 million were recorded in 2014, primarily related to new nuclear capacity which was placed in service in 2013 as permitted by the FPSC's nuclear cost recovery rule. See Cost Recovery Clauses below for discussion of the nuclear cost recovery rule.

Retail Customer Usage and Growth

In 2015 and 2014, FPL experienced a 1.4% and 1.8% increase, respectively, in the average number of customer accounts and a 4.2% increase and 0.4% decrease, respectively, in the average usage per retail customer, which collectively, together with other factors, increased revenues by approximately $263 million and $36 million, respectively. The increase in 2015 usage per retail customer is due to favorable weather. An improvement in the Florida economy contributed to the increased revenues for both periods. FPL expects year over year weather-normalized usage per customer to be between flat and 0.5% negative.

Cost Recovery Clauses

Revenues from fuel and other cost recovery clauses and pass-through costs, such as franchise fees, revenue taxes and storm-related surcharges, are largely a pass-through of costs. Such revenues also include a return on investment allowed to be recovered through the cost recovery clauses on certain assets, primarily related to solar and environmental projects, natural gas reserves and nuclear capacity. See Item 1. - I. FPL - FPL Regulation - FPL Rate Regulation - Cost Recovery Clauses. Fluctuations in fuel cost recovery revenues are primarily driven by changes in fuel and energy charges which are included in fuel, purchased power and interchange expense in the consolidated statements of income, as well as by changes in energy sales. Fluctuations in revenues from other cost recovery clauses and pass-through costs are primarily driven by changes in storm-related surcharges, capacity charges, franchise fee costs, the impact of changes in O&M and depreciation expenses on the underlying cost recovery clause, investment in solar and environmental projects, investment in nuclear capacity until such capacity goes into service and is recovered in base rates, pre-construction costs associated with the development of two additional nuclear units at the Turkey Point site and changes in energy sales. Capacity charges are included in fuel, purchased power and interchange expense and franchise fee costs are included in taxes other than income taxes and other in the consolidated statements of income. Underrecovery or overrecovery of cost recovery clause and other pass-through costs (deferred clause and franchise expenses and revenues) can significantly affect NEE's and FPL's operating cash flows. The 2015 net overrecovery was approximately $176 million and positively affected NEE's and FPL's cash flows from operating activities in 2015, while the 2014 net underrecovery was approximately $67 million and negatively affected NEE's and FPL's cash flows from operating activities in 2014.

The slight decrease in fuel cost recovery revenues in 2015 reflects lower revenues from the incentive mechanism and lower revenues from interchange power sales totaling approximately $118 million and a lower average fuel factor of approximately $96 million, partly offset by increased revenues of $213 million related to higher energy sales. The increase in fuel cost recovery revenues in 2014 is primarily due to a higher average fuel factor of approximately $329 million and higher energy sales of $158 million, as well as higher interchange power sales, partly offset by lower revenues from the incentive mechanism, totaling approximately $55 million.

The declines in 2015 revenues from other cost recovery clauses and pass-through costs were largely due to reductions in expenses associated with energy conservation and capacity clause programs. The decrease in revenues from other cost recovery clauses and pass-through costs in 2014 primarily reflects higher revenues in 2013 associated with the FPSC's nuclear cost recovery rule reflective of higher earnings on additional nuclear capacity investments and the shift to the collection of nuclear capacity recovery through retail base revenues (see Retail Base above). The nuclear cost recovery rule provides for the recovery of prudently incurred pre-construction costs and carrying charges (equal to the pretax AFUDC rate) on construction costs and a return on investment for new nuclear capacity through levelized charges under the capacity clause. The same rule provides for the recovery of construction costs, once property related to the new nuclear capacity goes into service, through a retail base rate increase effective beginning the following January.

In 2015, 2014 and 2013, cost recovery clauses contributed $103 million, $93 million and $115 million, respectively, to FPL's net income. The increase in 2015 primarily relates to gains associated with the incentive mechanism, investments in gas reserves and the recovery of a return on the regulatory asset associated with the purchase of the Cedar Bay facility discussed below. The decrease in 2014 in cost recovery clause results is primarily due to the collection of retail base revenues related to new nuclear capacity which was placed in service in 2013 (see Retail Base above). In 2015 and 2014, there was minimal contribution to net income from the nuclear cost recovery rule as all nuclear uprates have been placed in service and associated costs are now collected through base rates.

In September 2015, FPL assumed ownership of Cedar Bay and terminated its long-term purchased power agreement for substantially all of the facility's capacity and energy for a purchase price of approximately $521 million. The FPSC approved a stipulation and settlement between the Office of Public Counsel and FPL regarding issues relating to the ratemaking treatment for the purchase of this facility. FPL will recover the purchase price and associated income tax gross-up as a regulatory asset which will be amortized over approximately nine years. See Note 1 - Rate Regulation for further discussion.

Other

The increase in other revenues for 2015, which did not result in a significant contribution to earnings, primarily reflects higher wholesale and transmission service revenues along with other miscellaneous service revenues. The increase in other revenues for 2014 primarily reflects higher wholesale revenues associated with an increase in contracted load served under existing contracts.

Other Items Impacting FPL's Consolidated Statements of Income

Fuel, Purchased Power and Interchange Expense
The major components of FPL's fuel, purchased power and interchange expense are as follows:

	Years Ended December 31,		
	2015	2014	2013
		(millions)	
Fuel and energy charges during the period	**$ 3,593**	$ 3,951	$ 3,519
Net deferral of retail fuel costs	**—**	(109)	(148)
Net recognition of deferred retail fuel costs	**220**	—	—
Other, primarily capacity charges, net of any capacity deferral	**463**	533	554
Total	**$ 4,276**	$ 4,375	$ 3,925

The decrease in fuel and energy charges in 2015 was due to lower fuel and energy prices of approximately $491 million and a decrease of $68 million in costs related to the incentive mechanism, partly offset by higher energy sales of approximately $201 million. The increase in fuel and energy charges in 2014 was due to higher fuel and energy prices of approximately $202 million, higher energy sales of approximately $187 million and an increase of $43 million in costs related to the incentive mechanism. In addition, FPL recognized approximately $220 million of deferred retail fuel costs in 2015, compared to the deferral of retail fuel costs of $109 million and $148 million in 2014 and 2013, respectively. The decrease in other in 2015 is primarily due to lower capacity fees in part related to the termination of the Cedar Bay long-term purchased power agreement after FPL assumed ownership of Cedar Bay in September 2015.

O&M Expenses
FPL's O&M expenses decreased $79 million in 2014, primarily due the absence of 2013 transition costs associated with the cost savings initiative, as well as realized costs savings from this initiative.

Depreciation and Amortization Expense
The major components of FPL's depreciation and amortization expense are as follows:

	Years Ended December 31,		
	2015	2014	2013
		(millions)	
Reserve reversal (amortization) recorded under the 2012 rate agreement	**$ 15**	$ 33	$ (155)
Other depreciation and amortization recovered under base rates	**1,359**	1,211	1,105
Depreciation and amortization recovered under cost recovery clauses and securitized storm-recovery cost amortization	**202**	188	209
Total	**$ 1,576**	$ 1,432	$ 1,159

The reserve amortization, or reversal of such amortization, recorded in all periods presented reflects adjustments to the depreciation and fossil dismantlement reserve provided under the 2012 rate agreement in order to achieve the targeted regulatory ROE. At December 31, 2015, approximately $263 million of the reserve remains available for future amortization over the term of the 2012 rate agreement. Reserve amortization is recorded as a reduction to (or when reversed as an increase to) regulatory liabilities - accrued asset removal costs on the consolidated balance sheets. See Note 1 - Rate Regulation regarding a $30 million reduction in the reserve available for amortization under the 2012 rate agreement. The increase in other depreciation and amortization expense recovered under base rates is due to higher amortization expenses primarily associated with, in 2015, analog meters and, in 2015 and 2014, higher plant in service balances.

Taxes Other Than Income Taxes and Other
Taxes other than income taxes and other increased $39 million in 2015 primarily due to higher property taxes reflecting growth in plant in service balances. The increase of $43 million in 2014 was primarily due to higher franchise and revenue taxes, neither of which impact net income, as well as higher property taxes reflecting growth in plant in service balances, partly offset by lower payroll taxes.

Interest Expense
The increase in interest expense in 2015 primarily reflects higher average debt balances, partly offset by lower average interest rates. The increase in interest expense in 2014 reflects higher average interest rates related to higher fixed rate debt balances, lower AFUDC - debt and higher average debt balances. The change in AFUDC - debt is due to the same factors as described below in AFUDC - equity. Interest expense on storm-recovery bonds, as well as certain other interest expense on clause-recoverable investments (collectively, clause interest), do not significantly affect net income, as the clause interest is recovered either under cost recovery clause mechanisms or through a storm-recovery bond surcharge. Clause interest for 2015, 2014 and 2013 amounted to approximately $41 million, $42 million and $58 million, respectively, and reflects the shift of nuclear capacity recovery through retail base revenues (see Retail Base and Cost Recovery Clauses above).

AFUDC - Equity
The increase in AFUDC - equity in 2015 is primarily due to additional AFUDC - equity recorded on construction expenditures associated with the modernization project at Port Everglades, the investments in new compressor parts technology at select combined-cycle units and the peaker upgrade project, partly offset by lower AFUDC - equity associated with the Riviera Beach power plant which was placed in service in April 2014. The decrease in AFUDC - equity in 2014 was primarily due to lower AFUDC - equity associated with the Riviera Beach power plant and the Cape Canaveral power plant which was placed in service in April 2013, partly offset by additional AFUDC - equity recorded on construction expenditures associated with the Port Everglades modernization project.

Capital Initiatives
FPL is in the process of modernizing its Port Everglades power plant to a high-efficiency natural gas-fired unit that is expected to provide approximately 1,240 MW of capacity and be placed in service by April 2016. FPL is also in the process of replacing 44 of its 48 gas turbines at its Lauderdale, Port Everglades and Fort Myers facilities, totaling approximately 1,700 MW of capacity, with 7 high efficiency, low-emission turbines at its Lauderdale and Fort Myers facilities, totaling approximately 1,610 MW of capacity, by December 2016. In addition, FPL is upgrading 2 additional simple-cycle combustion turbines at its Fort Myers facility, which are expected to add an additional 50 MW of capacity by December 2016. FPL plans to continue to strengthen the transmission and distribution infrastructure and to build three solar PV projects that are expected to provide approximately 74 MW each and be placed into service by the end of 2016. In January 2016, the FPSC approved FPL's proposal to build a new approximately 1,600 MW natural gas-fired combined-cycle unit in Okeechobee County, Florida. See Item 1. Business - FPL.

NEER: Results of Operations

NEER owns, develops, constructs, manages and operates electric generation facilities in wholesale energy markets primarily in the U.S. and Canada. NEER also provides full energy and capacity requirements services, engages in power and gas marketing and trading activities and invests in natural gas, natural gas liquids and oil production and pipeline infrastructure assets. NEER's net income less net income attributable to noncontrolling interests for 2015, 2014 and 2013 was $1,092 million, $989 million and $556 million, respectively, resulting in an increase in 2015 of $103 million and an increase in 2014 of $433 million. The primary drivers, on an after-tax basis, of these changes are in the following table.

	Increase (Decrease) From Prior Period	
	Years Ended December 31,	
	2015	2014
	(millions)	
New investments[a]	$ 138	$ 134
Existing assets[a]	(96)	26
Gas infrastructure[b]	(7)	(27)
Customer supply and proprietary power and gas trading[b]	110	14
Asset sales	(9)	6
NEP-related charge and costs	67	(67)
Interest and general and administrative expenses	(99)	(42)
Other, primarily income taxes	(15)	13
Change in unrealized mark-to-market non-qualifying hedge activity[c]	4	225
Change in OTTI losses on securities held in nuclear decommissioning funds, net of OTTI reversals[c]	(15)	—
Gain on 2013 discontinued operations[c]	—	(216)
Change in Maine fossil gain/loss[c]	(12)	53
Charges associated with the 2013 impairment of the Spain solar projects[c]	—	342
Operating results of the Spain solar projects[c]	37	(28)
Increase in net income less net income attributable to noncontrolling interests	$ 103	$ 433

(a) Includes PTCs, ITCs and deferred income tax and other benefits associated with convertible ITCs for wind and solar projects, as applicable, (see Note 1 - Electric Plant, Depreciation and Amortization, - Income Taxes and - Sale of Differential Membership Interests and Note 5) but excludes allocation of interest expense or corporate general and administrative expenses. Results from projects are included in new investments during the first twelve months of operation or ownership. An electric energy project's results are included in existing assets beginning with the thirteenth month of operation.
(b) Excludes allocation of interest expense and corporate general and administrative expenses.
(c) See Overview - Adjusted Earnings for additional information.

New Investments

In 2015, results from new investments increased due to:

- higher earnings of approximately $146 million related to the addition of approximately 2,571 MW of wind generation and 910 MW of solar generation during or after 2014, and
- higher earnings of approximately $16 million related to the acquisition of the Texas pipelines and the development of three additional natural gas pipelines,

partly offset by,

- lower deferred income tax and other benefits associated with convertible ITCs of $21 million and ITCs of $3 million.

In 2014, results from new investments increased primarily due to:

- higher earnings of approximately $120 million related to the addition of approximately 1,678 MW of wind generation and 545 MW of solar generation during or after 2013, and
- higher deferred income tax and other benefits associated with ITCs of $25 million,

partly offset by,

- lower deferred income tax and other benefits associated with convertible ITCs of $15 million.

Existing Assets

In 2015, results from NEER's existing asset portfolio decreased primarily due to:

- lower results from wind assets of $122 million primarily due to weaker wind resource offset in part by a favorable ITC impact related to changes in state income tax laws and favorable pricing,

partly offset by,

- higher results from merchant assets in the ERCOT region of approximately $27 million primarily due to the absence of a 2014 outage.

In 2014, results from NEER's existing asset portfolio increased primarily due to:

- higher results from wind assets of $29 million reflecting stronger wind resource and increased availability, favorable pricing and lower operating expenses, partly offset by PTC roll off,
- higher results of $19 million from merchant assets in the ERCOT region and $11 million from other contracted natural gas assets primarily due to favorable market conditions, and
- increased results of $11 million at Maine fossil due to additional generation and favorable pricing related to extreme winter weather,

partly offset by,

- lower results from the nuclear assets of approximately $30 million primarily due to lower pricing and scheduled outages in 2014, offset in part by higher nuclear decommissioning gains, and
- lower results of $14 million due to the absence of the hydro assets which were sold in the first quarter of 2013.

Gas Infrastructure

The decrease in gas infrastructure results in 2015 reflects increased depreciation expense mainly related to both higher depletion rates and increased production in 2015, as well as the absence of 2014 gains on the sale of investments in certain wells (collectively, approximately $46 million), partly offset by gains of $42 million related to exiting the hedged positions on a number of future gas production opportunities; such gains were previously reflected in unrealized mark-to-market non-qualifying hedge activity. The decrease in gas infrastructure results in 2014 is primarily due to increased depreciation expense mainly related to higher depletion rates and operating lease expenses and lower revenues (collectively, approximately $31 million) as well as $5 million of after-tax impairment charges on two oil and gas producing properties reflecting a decline in oil and natural gas prices, partly offset by gains on the sale of investments in certain wells. Further declines in the price of oil and natural gas commodity products could result in additional impairments of NEER's oil and gas producing properties. However, an impairment analysis performed under GAAP does not take into consideration the mark-to-market value of hedged positions. NEER hedges the expected output from its oil and gas producing properties for a period of time to help protect against price movements; the fair value of such hedged positions at December 31, 2015 was approximately $390 million. At December 31, 2015, approximately $2.2 billion of NEE's property, plant and equipment, net relates to the gas infrastructure business' ownership interests in investments located in oil and gas shale formations.

Customer Supply and Proprietary Power and Gas Trading

Results from customer supply and proprietary power and gas trading increased in 2015 primarily due to improved margins and favorable market conditions compared to lower results in the full requirements business in 2014 due to the impact of extreme winter weather. In 2014, results from customer supply and proprietary power and gas trading increased primarily due to higher power and gas trading results and gains on gas purchase contracts, partly offset by lower results in the full requirements business reflecting the impact of extreme winter weather and market conditions in the Northeast.

Asset Sales

Asset sales in 2015 primarily include after-tax gains of approximately $5 million on the sale of a 41 MW wind project, offset by the absence of gains recorded in 2014. Asset sales in 2014 primarily include an after-tax gain of approximately $14 million on the sale of a 75 MW wind project that became operational during 2014, offset by after-tax gains of approximately $8 million recorded in 2013.

NEP-related Charge and Costs

For 2014, NEER's results reflect an approximately $45 million noncash income tax charge associated with structuring Canadian assets and $22 million in NEP IPO transaction costs.

Interest and General and Administrative Expenses

Interest and general and administrative expenses includes interest expense, differential membership costs and other corporate general and administrative expenses. In 2015 and 2014, interest and general and administrative expenses reflect higher borrowing and other costs to support the growth of the business.

Other Factors

Supplemental to the primary drivers of the changes in NEER's net income less net income attributable to noncontrolling interests discussed above, the discussion below describes changes in certain line items set forth in NEE's consolidated statements of income as they relate to NEER.

Operating Revenues

Operating revenues for 2015 increased $248 million primarily due to:

- higher revenues from new investments of approximately $225 million,
- higher revenues from the customer supply business and proprietary power and gas trading business of $218 million reflecting favorable market conditions, and

- higher revenues from the gas infrastructure business of $96 million primarily reflecting gains recorded upon exiting the hedged positions on a number of future gas production opportunities and the acquisition of the Texas pipelines,

partly offset by,

- lower unrealized mark-to-market gains from non-qualifying hedges ($275 million for 2015 compared to $372 million of gains on such hedges for 2014), and
- lower revenues from existing assets of $195 million reflecting lower wind generation due to weaker wind resource, lower revenues at Marcus Hook 750 and in the ERCOT region due to lower gas prices and lower revenues at Seabrook reflecting a refueling outage, offset in part by higher revenues at Point Beach due to the absence of a 2014 outage and price escalation under the power sales agreement, higher dispatch in Maine due to 2015 weather conditions and higher revenues from the Spain solar projects.

Operating revenues for 2014 increased $863 million primarily due to:

- higher unrealized mark-to-market gains from non-qualifying hedges ($372 million for 2014 compared to $116 million of losses on such hedges for 2013),
- higher revenues from new investments of approximately $282 million, and
- higher revenues from the customer supply business of $120 million,

partly offset by,

- lower revenues from existing assets of $13 million reflecting lower contracted revenues at Duane Arnold and the Spain solar projects and lower revenues in the New England Power Pool (NEPOOL) region reflecting a scheduled outage at Seabrook, partly offset by higher wind generation due to stronger wind resource and increased availability and higher revenues in the ERCOT region primarily due to favorable market conditions, and
- lower revenues from the gas infrastructure business and other O&M service agreements.

Operating Expenses

Operating expenses for 2015 increased $138 million primarily due to:

- higher operating expenses associated with new investments of approximately $123 million,
- higher O&M expenses reflecting higher costs associated with growth in the NEER business, higher taxes other than income taxes and other reflecting the absence of 2014 gains on the sale of investments in certain wells in the gas infrastructure business and the absence of the 2014 reimbursement by a vendor of certain O&M-related costs, and
- higher depreciation associated with the gas infrastructure business of $50 million primarily related to higher depletion rates and increased production,

partly offset by,

- lower fuel expense of approximately $146 million primarily in the ERCOT region and at Marcus Hook 750.

Operating expenses for 2014 decreased $3 million primarily due to:

- the absence of a $300 million impairment charge in 2013 related to the Spain solar projects, and
- lower other operating expenses reflecting the reimbursement by a vendor of certain O&M-related costs as well as the absence of implementation costs recorded in 2013 related to the cost savings initiative, partly offset by the NEP-related expenses,

partly offset by,

- higher fuel expense of approximately $171 million primarily in the ERCOT region and the customer supply business,
- higher operating expenses associated with new investments of approximately $123 million, and
- higher depreciation expense of approximately $24 million associated with the gas infrastructure business primarily related to higher depletion rates.

Interest Expense

NEER's interest expense for 2015 decreased $42 million primarily reflecting the absence of approximately $64 million of losses related to changes in the fair value of interest rate swaps for which hedge accounting was discontinued in 2013, partly offset by higher average debt balances. Interest expense increased $139 million for 2014 primarily reflecting the approximately $64 million of losses related to changes in the fair value of interest rate swaps, as well as higher average debt balances.

Benefits Associated with Differential Membership Interests - net

Benefits associated with differential membership interests - net for all periods presented reflect benefits recognized by NEER as third-party investors received their portion of the economic attributes, including income tax attributes, of the underlying wind projects, net of associated costs. See Note 1 - Sale of Differential Membership Interests.

Equity in Earnings of Equity Method Investees

Equity in earnings of equity method investees increased in 2015 and 2014 primarily due to NEER's 50% equity investment in a 550 MW solar project that commenced partial operations at the end of 2013 and full operations by the end of 2014.

Gains on Disposal of Assets - net

Gains on disposal of assets - net for 2015, 2014 and 2013 primarily reflect gains on sales of securities held in NEER's nuclear decommissioning funds. Gains on disposal of assets - net also reflect, in 2015, a pretax gain of approximately $6 million on the

sale of a 41 MW wind project, in 2014, a pretax gain of approximately $23 million on the sale of a 75 MW wind project and, in 2013, a pretax gain of approximately $14 million on the sale of a portfolio of wind assets with generating capacity totaling 223 MW.

Tax Credits, Benefits and Expenses

PTCs from wind projects and ITCs and deferred income tax benefits associated with convertible ITCs from solar and certain wind projects are reflected in NEER's earnings. PTCs are recognized as wind energy is generated and sold based on a per kWh rate prescribed in applicable federal and state statutes, and were approximately $149 million, $186 million and $209 million in 2015, 2014 and 2013, respectively. A portion of the PTCs have been allocated to investors in connection with sales of differential membership interests. In addition, NEE's effective income tax rate for 2015, 2014 and 2013 was affected by deferred income tax benefits associated with ITCs and convertible ITCs of $89 million, $84 million and $74 million, respectively. NEE's effective income tax rate for 2014 was unfavorably affected by a noncash income tax charge of approximately $45 million associated with structuring Canadian assets and for 2013 was unfavorably affected by the establishment of a full valuation allowance on the deferred tax assets associated with the Spain solar projects. See Note 5 and Overview - Adjusted Earnings for additional information.

Capital Initiatives

NEER expects to add new contracted wind generation of approximately 1,400 MW and new contracted solar generation of approximately 1,100 MW in 2016 and will continue to pursue other additional investment opportunities that may develop. Projects developed by NEER might be offered for sale to NEP if NEER should seek to sell the projects. NEER will also continue to invest in the development of its natural gas pipeline infrastructure assets. See Item 1. Business - NEER - Generation and Other Operations - Natural Gas Pipelines.

Sale of Assets to NEP

In January 2015 and February 2015, indirect subsidiaries of NEER sold a 250 MW wind facility located in Texas and an approximately 20 MW solar facility located in California, respectively, to indirect subsidiaries of NEP.

In May 2015, an indirect subsidiary of NEER sold four wind generation facilities with contracted generating capacity totaling approximately 664 MW located in North Dakota, Oklahoma, Washington and Oregon to an indirect subsidiary of NEP.

In October 2015, an indirect subsidiary of NEER sold a 149 MW wind generation facility located in Ontario, Canada to an indirect subsidiary of NEP.

Corporate and Other: Results of Operations

Corporate and Other is primarily comprised of the operating results of NEET, FPL FiberNet and other business activities, as well as corporate interest income and expenses. Corporate and Other allocates a portion of NEECH's corporate interest expense and shared service costs to NEER. Interest expense is allocated based on a deemed capital structure of 70% debt and, for purposes of allocating NEECH's corporate interest expense, the deferred credit associated with differential membership interests sold by NEER's subsidiaries is included with debt. Each subsidiary's income taxes are calculated based on the "separate return method," except that tax benefits that could not be used on a separate return basis, but are used on the consolidated tax return, are recorded by the subsidiary that generated the tax benefits. Any remaining consolidated income tax benefits or expenses are recorded at Corporate and Other. The major components of Corporate and Other's results, on an after-tax basis, are as follows:

	Years Ended December 31,		
	2015	2014	2013
	(millions)		
Interest expense, net of allocations to NEER	$ (87)	$ (95)	$ (109)
Interest income	32	31	32
Federal and state income tax benefits (expenses)	20	(7)	15
Merger-related expenses	(20)	—	—
Other - net	67	30	65
Net income (loss)	$ 12	$ (41)	$ 3

The decrease in interest expense, net of allocations to NEER in 2015 and 2014 reflects lower average debt balances due in part to a higher allocation of interest costs to NEER reflecting growth in NEER's business. The federal and state income tax benefits (expenses) reflect consolidating income tax adjustments, including, in 2015, favorable changes in state income tax laws and, in 2013, a $15 million income tax benefit recorded as a gain from discontinued operations, net of federal income taxes (see Overview - Adjusted Earnings).

Other - net includes all other corporate income and expenses, as well as other business activities. The increase in other - net for 2015 primarily reflects 2015 investment gains compared to 2014 investment losses and the absence of debt reacquisition losses recorded in 2014. The decrease in other in 2014 primarily reflects after-tax investment losses in 2014, lower results from NEET and debt reacquisition losses. Substantially all of such investment losses and gains, on a pretax basis, is reflected in other - net in NEE's consolidated statements of income.

LIQUIDITY AND CAPITAL RESOURCES

NEE and its subsidiaries, including FPL, require funds to support and grow their businesses. These funds are used for, among other things, working capital, capital expenditures, investments in or acquisitions of assets and businesses, payment of maturing debt obligations and, from time to time, redemption or repurchase of outstanding debt or equity securities. It is anticipated that these requirements will be satisfied through a combination of cash flows from operations, short- and long-term borrowings, the issuance of short- and long-term debt and, from time to time, equity securities, and proceeds from differential membership investors, consistent with NEE's and FPL's objective of maintaining, on a long-term basis, a capital structure that will support a strong investment grade credit rating. NEE, FPL and NEECH rely on access to credit and capital markets as significant sources of liquidity for capital requirements and other operations that are not satisfied by operating cash flows. The inability of NEE, FPL and NEECH to maintain their current credit ratings could affect their ability to raise short- and long-term capital, their cost of capital and the execution of their respective financing strategies, and could require the posting of additional collateral under certain agreements.

In October 2015, NEE authorized a program to purchase, from time to time, up to $150 million of common units representing limited partner interests of NEP. Under the program, any purchases may be made in amounts, at prices and at such times as NEE or its subsidiaries deem appropriate, all subject to market conditions and other considerations. The purchases may be made in the open market or in privately negotiated transactions. Any purchases will be made in such quantities, at such prices, in such manner and on such terms and conditions as determined by NEE or its subsidiaries in their discretion, based on factors such as market and business conditions, applicable legal requirements and other factors. The common unit purchase program does not require NEE to acquire any specific number of common units and may be modified or terminated by NEE at any time. NEE owns and controls the general partner of NEP and beneficially owns approximately 76.9% of NEP's voting power at December 31, 2015. The purpose of the program is not to cause NEP's common units to be delisted from the New York Stock Exchange or to cause the common units to be deregistered with the SEC. As of December 31, 2015, NEE had purchased approximately $0.6 million of NEP common units under this program. Also in October 2015, NEP put in place an at-the-market equity issuance program pursuant to which NEP may issue from time to time, up to $150 million of its common units. As of December 31, 2015, NEP had issued approximately $26 million of its common units under this program.

Cash Flows

NEE's increase in cash flows from operating activities for 2015 and 2014 primarily reflects operating cash generated from additional wind and solar facilities that were placed in service during or after 2014 and 2013, respectively. FPL's cash flows from operating activities remained essentially flat in 2015 and 2014 compared to the prior year period, and, in 2015, reflects the purchase of Cedar Bay. See Note 1 - Rate Regulation.

Sources and uses of NEE's and FPL's cash for 2015, 2014 and 2013 were as follows:

	NEE			FPL

NEE's primary capital requirements are for expanding and enhancing FPL's electric system and generation facilities to continue to provide reliable service to meet customer electricity demands and for funding NEER's investments in independent power and other projects. The following table provides a summary of the major capital investments for 2015, 2014 and 2013.

	Years Ended December 31,		
	2015	2014	2013
	(millions)

Liquidity

At December 31, 2015, NEE's total net available liquidity was approximately $7.7 billion, of which FPL's portion was approximately $3.1 billion. The table below provides the components of FPL's and NEECH's net available liquidity at December 31, 2015.

	FPL	NEECH	Total	Maturity Date FPL	Maturity Date NEECH
		(millions)			
Bank revolving line of credit facilities[a]	$ 3,000	$ 4,850	$ 7,850	2016 - 2021	2016 - 2021
Issued letters of credit	(6)	(410)	(416)		
	2,994	4,440	7,434

Borrowings	—	(675)	(675)		
	200	35	235		
Letter of credit facilities[b]	—	650	650		2017
Issued letters of credit	—	(443)	(443)		
	—	207	207		
Subtotal	3,194	4,682	7,876		
Cash and cash equivalents	23	546	569		
Outstanding commercial paper and notes payable	(156)	(630)	(786)		
Net available liquidity	$ 3,061	$ 4,598	$ 7,659		

(a) Provide for the funding of loans up to $7,850 million ($3,000 million for FPL) and the issuance of letters of credit up to $3,950 million ($1,070 million for FPL). The entire amount of the credit facilities is available for general corporate purposes and to provide additional liquidity in the event of a loss to the companies' or their subsidiaries' operating facilities (including, in the case of FPL, a transmission and distribution property loss). FPL's bank revolving line of credit facilities are also available to support the purchase of $718 million of pollution control, solid waste disposal and industrial development revenue bonds (tax exempt bonds) in the event they are tendered by individual bond holders and not remarketed prior to maturity. Approximately $2,255 million of FPL's and $3,700 million of NEECH's bank revolving line of credit facilities expire in 2021.

(b) Only available for the issuance of letters of credit.

As of February 19, 2016, 68 banks participate in FPL's and NEECH's revolving credit facilities, with no one bank providing more than 6% of the combined revolving credit facilities. European banks provide approximately 30% of the combined revolving credit facilities. Pursuant to a 1998 guarantee agreement, NEE guarantees the payment of NEECH's debt obligations under its revolving credit facilities. In order for FPL or NEECH to borrow or to have letters of credit issued under the terms of their respective revolving credit facilities and, also for NEECH, its letter of credit facilities, FPL, in the case of FPL, and NEE, in the case of NEECH, are required, among other things, to maintain a ratio of funded debt to total capitalization that does not exceed a stated ratio. The FPL and NEECH revolving credit facilities also contain default and related acceleration provisions relating to, among other things, failure of FPL and NEE, as the case may be, to maintain the respective ratio of funded debt to total capitalization at or below the specified ratio. At December 31, 2015, each of NEE and FPL was in compliance with its required ratio.

Additionally, at December 31, 2015, certain subsidiaries of NEER and NEP had credit or loan facilities with available liquidity as set forth in the table below. In order for the applicable borrower to borrow or to have letters of credit issued under the terms of the agreements for some of the NEER facilities listed below, among other things, NEE is required to maintain a ratio of funded debt to total capitalization that does not exceed a stated ratio. These NEER agreements also generally contain covenants and default and related acceleration provisions relating to, among other things, failure of NEE to maintain a ratio of funded debt to total capitalization at or below the specified ratio. Some of the payment obligations of the borrowers under the NEER agreements listed below ultimately are guaranteed by NEE.

	Amount	Amount Remaining Available at December 31, 2015	Rate	Maturity Date	Related Project Use
		(millions)			
NEER:					
Canadian revolving credit facilities[a]	C$850	$458	Variable	Various	Canadian renewable generation assets
Limited-recourse construction and term loan facility	$425	$106	Variable	2035	Construction and development of a 250 MW solar PV project in California
Limited-recourse construction and term loan facility	$619	$98	Variable	2035	Construction and development of a 250 MW solar PV project in Nevada
Cash grant bridge loan facilities	$250	$250	Variable	2018	Construction and development of a 250 MW solar PV project in Nevada
NEP:					
Senior secured revolving credit facility[b]	$250	$221	Variable	2019	Working capital, expansion projects, acquisitions and general business purposes
Senior secured limited-recourse revolving loan facility[c]	$150	$150	Variable	2020	General business purposes

(a) Available for general corporate purposes; the current intent is to use these facilities for the purchase, development, construction and/or operation of Canadian renewable generation assets. Consists of three credit facilities with expiration dates ranging from February 28, 2016 to April 2016.

(b) NEP OpCo and one of its direct subsidiaries are required to comply with certain financial covenants on a quarterly basis and NEP OpCo's ability to pay cash distributions to its unit holders is subject to certain other restrictions. The revolving credit facility includes borrowing capacity for letters of credit and incremental commitments to increase the revolving credit facility up to $1 billion in the aggregate. Borrowings under the revolving credit facility are guaranteed by NEP OpCo and NEP.

(c) A certain NEP subsidiary (borrower) is required to satisfy certain conditions, including among other things, maintaining a leverage ratio at the time of any borrowing that does not exceed a specified ratio. Borrowings under this revolving loan facility are secured by liens on certain of the borrower's assets and certain of the borrower's subsidiaries' assets, as well as the ownership interest in the borrower. Contains default and related acceleration provisions relating to, among other things, failure of the borrower to maintain a leverage ratio at or below the specified rate and a minimum interest coverage ratio.

Storm Restoration Costs

As of December 31, 2015, FPL had the capacity to absorb up to approximately $119 million in future prudently incurred storm restoration costs without seeking recovery through a rate adjustment from the FPSC or filing a petition with the FPSC. See Note 1 – Revenues and Rates.

Capital Support

Guarantees, Letters of Credit, Surety Bonds and Indemnifications (Guarantee Arrangements)

Certain subsidiaries of NEE, including FPL, issue guarantees and obtain letters of credit and surety bonds, as well as provide indemnities, to facilitate commercial transactions with third parties and financings. Substantially all of the guarantee arrangements are on behalf of NEE's or FPL's consolidated subsidiaries, as discussed in more detail below. NEE and FPL are not required to recognize liabilities associated with guarantee arrangements issued on behalf of their consolidated subsidiaries unless it becomes probable that they will be required to perform. At December 31, 2015, NEE and FPL believe it is unlikely that they would be required to perform under, or otherwise incur any losses associated with, these guarantee arrangements.

As of December 31, 2015, NEE subsidiaries had approximately $3.3 billion in guarantees related primarily to equity contribution agreements associated with the development, construction and financing of certain power generation facilities, engineering, procurement and construction agreements and natural gas pipeline development projects. In addition, as of December 31, 2015, NEE subsidiaries had approximately $4.6 billion in guarantees ($21 million for FPL) related to obligations under purchased power agreements, indemnifications associated with asset divestitures, nuclear-related activities, the non-receipt of proceeds from cash grants under the Recovery Act and the payment obligations related to renewable tax credits, as well as other types of contractual obligations.

In some instances, subsidiaries of NEE elect to issue guarantees instead of posting other forms of collateral required under certain financing arrangements. As of December 31, 2015, these guarantees totaled approximately $935 million and support, among other things, required cash management reserves, O&M service agreement requirements and other specific project financing requirements.

Subsidiaries of NEE also issue guarantees to support customer supply and proprietary power and gas trading activities, including the buying and selling of wholesale and retail energy commodities. As of December 31, 2015, the estimated mark-to-market exposure (the total amount that these subsidiaries of NEE could be required to fund based on energy commodity market prices at December 31, 2015) plus contract settlement net payables, net of collateral posted for obligations under these guarantees totaled $656 million.

As of December 31, 2015, subsidiaries of NEE also had approximately $1.0 billion of standby letters of credit ($6 million for FPL) and approximately $317 million of surety bonds ($77 million for FPL) to support certain of the commercial activities discussed above. FPL's and NEECH's credit facilities are available to support the amount of the standby letters of credit.

In addition, as part of contract negotiations in the normal course of business, certain subsidiaries of NEE, including FPL, have agreed and in the future may agree to make payments to compensate or indemnify other parties for possible unfavorable financial consequences resulting from specified events. The specified events may include, but are not limited to, an adverse judgment in a lawsuit or the imposition of additional taxes due to a change in tax law or interpretations of the tax law. NEE and FPL are unable to estimate the maximum potential amount of future payments under some of these contracts because events that would obligate them to make payments have not yet occurred or, if any such event has occurred, they have not been notified of its occurrence.

Certain guarantee arrangements described above contain requirements for NEECH and FPL to maintain a specified credit rating. For a discussion of credit rating downgrade triggers see Credit Ratings below. NEE has guaranteed certain payment obligations of NEECH, including most of its debt and all of its debentures and commercial paper issuances, as well as most of its payment guarantees and indemnifications, and NEECH has guaranteed certain debt and other obligations of NEER and its subsidiaries.

Shelf Registration

In July 2015, NEE, NEECH and FPL filed a shelf registration statement with the SEC for an unspecified amount of securities which became effective upon filing. The amount of securities issuable by the companies is established from time to time by their respective boards of directors. As of February 19, 2016, securities that may be issued under the registration statement include, depending on the registrant, senior debt securities, subordinated debt securities, junior subordinated debentures, first mortgage bonds, common stock, preferred stock, stock purchase contracts, stock purchase units, warrants and guarantees related to certain of those securities. As of February 19, 2016, the board-authorized capacity available to issue securities was approximately $4.8 billion for NEE and NEECH (issuable by either or both of them up to such aggregate amount) and $1.9 billion for FPL.

Contractual Obligations and Estimated Capital Expenditures

NEE's and FPL's commitments at December 31, 2015 were as follows:

	2016	2017	2018	2019	2020	Thereafter	Total
				(millions)			
Long-term debt, including interest:[a]							
FPL	$ 500	$ 800	$ 884	$ 481	$ 412 [b]	$ 15,601 [b]	$ 18,678
NEER	1,846	877	1,715	659	774	5,173	11,044
Corporate and Other	1,099	2,355	1,301	1,873	1,338	12,793	20,759
Purchase obligations:							
FPL[c]	5,320	4,525	4,105	4,345	4,310	13,740	36,345
NEER[d]	3,670	735	610	130	85	530	5,760
Corporate and Other[d]	60	5	5	—	5	—	75
Elimination of FPL's purchase obligations to NEER[d]	—	(59)	(87)	(84)	(81)	(1,246)	(1,557)
Asset retirement activities:[e]							
FPL[f]	11	16	10	3	—	8,200	8,240
NEER[g]	1	—	—	—	—	13,199	13,200
Other commitments:							
NEER[h]	115	138	187	191	95	405	1,131
Total	$ 12,622	$ 9,392	$ 8,730	$ 7,598	$ 6,938	$ 68,395	$ 113,675

(a) Includes principal, interest and interest rate swaps. Variable rate interest was computed using December 31, 2015 rates. See Note 13.
(b) Includes $718 million of tax exempt bonds that permit individual bond holders to tender the bonds for purchase at any time prior to maturity. In the event bonds are tendered for purchase, they would be remarketed by a designated remarketing agent in accordance with the related indenture. If the remarketing is unsuccessful, FPL would be required to purchase the tax exempt bonds. As of December 31, 2015, all tax exempt bonds tendered for purchase have been successfully remarketed. FPL's bank revolving line of credit facilities are available to support the purchase of tax exempt bonds.
(c) Represents required capacity and minimum charges under long-term purchased power and fuel contracts (see Note 14 - Contracts), and projected capital expenditures through 2020 (see Note 14 - Commitments).
(d) See Note 14 - Contracts.
(e) Represents expected cash payments adjusted for inflation for estimated costs to perform asset retirement activities.
(f) At December 31, 2015, FPL had approximately $3,430 million in restricted funds for the payment of future expenditures to decommission FPL's nuclear units, which are included in NEE's and FPL's special use funds. See Note 13.
(g) At December 31, 2015, NEER's 88.23% portion of Seabrook's and 70% portion of Duane Arnold's and its Point Beach's restricted funds for the payment of future expenditures to decommission its nuclear units totaled approximately $1,634 million and are included in NEE's special use funds. See Note 13.
(h) Represents estimated cash distributions related to differential membership interests and payments related to the acquisition of certain development rights. For further discussion of differential membership interests, see Note 1 - Sale of Differential Membership Interests.

Credit Ratings

NEE's and FPL's liquidity, ability to access credit and capital markets, cost of borrowings and collateral posting requirements under certain agreements are dependent on their credit ratings. At February 19, 2016, Moody's Investors Service, Inc. (Moody's), Standard & Poor's Ratings Services (S&P) and Fitch Ratings (Fitch) had assigned the following credit ratings to NEE, FPL and NEECH:

	Moody's[a]	S&P[a]	Fitch[a]
NEE:[b]			
Corporate credit rating	Baa1	A-	A-
FPL:[b]			
Corporate credit rating	A1	A-	A
First mortgage bonds	Aa2	A	AA-
Pollution control, solid waste disposal and industrial development revenue bonds[c]	VMIG-1/P-1	A-2	F1
Commercial paper	P-1	A-2	F1
NEECH:[b]			
Corporate credit rating	Baa1	A-	A-
Debentures	Baa1	BBB+	A-
Junior subordinated debentures	Baa2	BBB	BBB
Commercial paper	P-2	A-2	F1

(a) A security rating is not a recommendation to buy, sell or hold securities and should be evaluated independently of any other rating. The rating is subject to revision or withdrawal at any time by the assigning rating organization.
(b) The outlook indicated by each of Moody's, S&P and Fitch is stable.
(c) Short-term ratings are presented as all bonds outstanding are currently paying a short-term interest rate. At FPL's election, a portion or all of the bonds may be adjusted to a long-term interest rate.

NEE and its subsidiaries, including FPL, have no credit rating downgrade triggers that would accelerate the maturity dates of outstanding debt. A change in ratings is not an event of default under applicable debt instruments, and while there are conditions to drawing on the credit facilities noted above, the maintenance of a specific minimum credit rating is not a condition to drawing on these credit facilities.

Commitment fees and interest rates on loans under these credit facilities' agreements are tied to credit ratings. A ratings downgrade also could reduce the accessibility and increase the cost of commercial paper and other short-term debt issuances and borrowings and additional or replacement credit facilities. In addition, a ratings downgrade could result in, among other things, the requirement that NEE subsidiaries, including FPL, post collateral under certain agreements and guarantee arrangements, including, but not limited to, those related to fuel procurement, power sales and purchases, nuclear decommissioning funding, debt-related reserves and trading activities. FPL's and NEECH's credit facilities are available to support these potential requirements.

Covenants

NEE's charter does not limit the dividends that may be paid on its common stock. As a practical matter, the ability of NEE to pay dividends on its common stock is dependent upon, among other things, dividends paid to it by its subsidiaries. For example, FPL pays dividends to NEE in a manner consistent with FPL's long-term targeted capital structure. However, the mortgage securing FPL's first mortgage bonds contains provisions which, under certain conditions, restrict the payment of dividends to NEE and the issuance of additional first mortgage bonds. Additionally, in some circumstances, the mortgage restricts the amount of retained earnings that FPL can use to pay cash dividends on its common stock. The restricted amount may change based on factors set out in the mortgage. Other than this restriction on the payment of common stock dividends, the mortgage does not restrict FPL's use of retained earnings. As of December 31, 2015, no retained earnings were restricted by these provisions of the mortgage and, in light of FPL's current financial condition and level of earnings, management does not expect that planned financing activities or dividends would be affected by these limitations.

FPL may issue first mortgage bonds under its mortgage subject to its meeting an adjusted net earnings test set forth in the mortgage, which generally requires adjusted net earnings to be at least twice the annual interest requirements on, or at least 10% of the aggregate principal amount of, FPL's first mortgage bonds including those to be issued and any other non-junior FPL indebtedness. As of December 31, 2015, coverage for the 12 months ended December 31, 2015 would have been approximately 7.8 times the annual interest requirements and approximately 3.8 times the aggregate principal requirements. New first mortgage bonds are also limited to an amount equal to the sum of 60% of unfunded property additions after adjustments to offset property retirements, the amount of retired first mortgage bonds or qualified lien bonds and the amount of cash on deposit with the mortgage trustee. As of December 31, 2015, FPL could have issued in excess of $11.8 billion of additional first mortgage bonds based on the unfunded property additions and in excess of $6.3 billion based on retired first mortgage bonds. As of December 31, 2015, no cash was deposited with the mortgage trustee for these purposes.

In September 2006, NEE and NEECH executed a Replacement Capital Covenant (September 2006 RCC) in connection with NEECH's offering of $350 million principal amount of Series B Enhanced Junior Subordinated Debentures due 2066 (Series B junior

subordinated debentures). The September 2006 RCC is for the benefit of persons that buy, hold or sell a specified series of long-term indebtedness (covered debt) of NEECH (other than the Series B junior subordinated debentures) or, in certain cases, of NEE. FPL Group Capital Trust I's 5 7/8% Preferred Trust Securities have been initially designated as the covered debt under the September 2006 RCC. The September 2006 RCC provides that NEECH may redeem, and NEE or NEECH may purchase, any Series B junior subordinated debentures on or before October 1, 2036, only to the extent that the redemption or purchase price does not exceed a specified amount of proceeds from the sale of qualifying securities, subject to certain limitations described in the September 2006 RCC. Qualifying securities are securities that have equity-like characteristics that are the same as, or more equity-like than, the Series B junior subordinated debentures at the time of redemption or purchase, which are sold within 180 days prior to the date of the redemption or repurchase of the Series B junior subordinated debentures.

In June 2007, NEE and NEECH executed a Replacement Capital Covenant (June 2007 RCC) in connection with NEECH's offering of $400 million principal amount of its Series C Junior Subordinated Debentures due 2067 (Series C junior subordinated debentures). The June 2007 RCC is for the benefit of persons that buy, hold or sell a specified series of covered debt of NEECH (other than the Series C junior subordinated debentures) or, in certain cases, of NEE. FPL Group Capital Trust I's 5 7/8% Preferred Trust Securities have been initially designated as the covered debt under the June 2007 RCC. The June 2007 RCC provides that NEECH may redeem or purchase, or satisfy, discharge or defease (collectively, defease), and NEE and any majority-owned subsidiary of NEE or NEECH may purchase, any Series C junior subordinated debentures on or before June 15, 2037, only to the extent that the principal amount defeased or the applicable redemption or purchase price does not exceed a specified amount raised from the issuance, during the 180 days prior to the date of that redemption, purchase or defeasance, of qualifying securities that have equity-like characteristics that are the same as, or more equity-like than, the applicable characteristics of the Series C junior subordinated debentures at the time of redemption, purchase or defeasance, subject to certain limitations described in the June 2007 RCC.

In September 2007, NEE and NEECH executed a Replacement Capital Covenant (September 2007 RCC) in connection with NEECH's offering of $250 million principal amount of its Series D Junior Subordinated Debentures due 2067 (Series D junior subordinated debentures). The September 2007 RCC is for the benefit of persons that buy, hold or sell a specified series of covered debt of NEECH (other than the Series D junior subordinated debentures) or, in certain cases, of NEE. FPL Group Capital Trust I's 5 7/8% Preferred Trust Securities have been initially designated as the covered debt under the September 2007 RCC. The September 2007 RCC provides that NEECH may redeem, purchase, or defease, and NEE and any majority-owned subsidiary of NEE or NEECH may purchase, any Series D junior subordinated debentures on or before September 1, 2037, only to the extent that the principal amount defeased or the applicable redemption or purchase price does not exceed a specified amount raised from the issuance, during the 180 days prior to the date of that redemption, purchase or defeasance, of qualifying securities that have equity-like characteristics that are the same as, or more equity-like than, the applicable characteristics of the Series D junior subordinated debentures at the time of redemption, purchase or defeasance, subject to certain limitations described in the September 2007 RCC.

New Accounting Rules and Interpretations

Amendments to the Consolidation Analysis - In February 2015, the Financial Accounting Standards Board (FASB) issued an accounting standard update which modifies the current consolidation guidance. See Note 1 - Variable Interest Entities.

Presentation of Debt Issuance Costs - In April 2015, the FASB issued an accounting standard update which changes the presentation of debt issuance costs in financial statements. See Note 1 - Debt Issuance Costs.

Revenue Recognition - In May 2014, the FASB issued a new accounting standard related to the recognition of revenue from contracts with customers and required disclosures. See Note 1 - Revenues and Rates.

Classification of Deferred Taxes - In November 2015, the FASB issued an accounting standard update which simplifies the classification of deferred taxes. See Note 1 - Income Taxes.

Financial Instruments - In January 2016, the FASB issued an accounting standard update which modifies guidance regarding certain aspects of recognition, measurement, presentation and disclosure of financial instruments. See Note 4 - Financial Instruments Accounting Standard Update.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

NEE's and FPL's significant accounting policies are described in Note 1 to the consolidated financial statements, which were prepared under GAAP. Critical accounting policies are those that NEE and FPL believe are both most important to the portrayal of their financial condition and results of operations, and require complex, subjective judgments, often as a result of the need to make estimates and assumptions about the effect of matters that are inherently uncertain. Judgments and uncertainties affecting the application of those policies may result in materially different amounts being reported under different conditions or using different assumptions.

NEE and FPL consider the following policies to be the most critical in understanding the judgments that are involved in preparing their consolidated financial statements:

Accounting for Derivatives and Hedging Activities

NEE and FPL use derivative instruments (primarily swaps, options, futures and forwards) to manage the commodity price risk inherent in the purchase and sale of fuel and electricity, as well as interest rate and foreign currency exchange rate risk associated primarily with outstanding and forecasted debt issuances and borrowings. In addition, NEE, through NEER, uses derivatives to optimize the value of power generation and gas infrastructure assets and engages in power and gas marketing and trading activities to take advantage of expected future favorable price movements.

Nature of Accounting Estimates

Accounting pronouncements require the use of fair value accounting if certain conditions are met, which requires significant judgment to measure the fair value of assets and liabilities. This applies not only to traditional financial derivative instruments, but to any contract having the accounting characteristics of a derivative. Much of the existing accounting guidance related to derivatives focuses on when certain contracts for the purchase and sale of power and certain fuel supply contracts can be excluded from derivative accounting rules, however the guidance does not address all contract issues. As a result, significant judgment must be used in applying derivatives accounting guidance to contracts. In the event changes in interpretation occur, it is possible that contracts that currently are excluded from derivatives accounting rules would have to be recorded on the balance sheet at fair value, with changes in the fair value recorded in the statement of income.

Assumptions and Accounting Approach

NEE's and FPL's derivative instruments, when required to be marked to market, are recorded on the balance sheet at fair value. Fair values for some of the longer-term contracts where liquid markets are not available are derived through internally developed models which estimate the fair value of a contract by calculating the present value of the difference between the contract price and the forward prices. Forward prices represent the price at which a buyer or seller could contract today to purchase or sell a commodity at a future date. The near-term forward market for electricity is generally liquid and therefore the prices in the early years of the forward curves reflect observable market quotes. However, in the later years, the market is much less liquid and forward price curves must be developed using factors including the forward prices for the commodities used as fuel to generate electricity, the expected system heat rate (which measures the efficiency of power plants in converting fuel to electricity) in the region where the purchase or sale takes place, and a fundamental forecast of expected spot prices based on modeled supply and demand in the region. NEE estimates the fair value of interest rate and foreign currency derivatives using a discounted cash flows valuation technique based on the net amount of estimated future cash inflows and outflows related to the derivative agreements. The assumptions in these models are critical since any changes therein could have a significant impact on the fair value of the derivative.

At FPL, substantially all changes in the fair value of energy derivative transactions are deferred as a regulatory asset or liability until the contracts are settled, and, upon settlement, any gains or losses are passed through the fuel clause. See Note 3.

In NEE's non-rate regulated operations, predominantly NEER, essentially all changes in the derivatives' fair value for power purchases and sales, fuel sales and trading activities are recognized on a net basis in operating revenues; fuel purchases used in the production of electricity are recognized in fuel, purchased power and interchange expense; and the equity method investees' related activity is recognized in equity in earnings of equity method investees in NEE's consolidated statements of income.

For those interest rate and foreign currency transactions accounted for as cash flow hedges, much of the effects of changes in fair value are reflected in OCI, a component of common shareholders' equity, rather than being recognized in current earnings. For those transactions accounted for as fair value hedges, the effects of changes in fair value are reflected in current earnings offset by changes in the fair value of the item being hedged.

Certain hedging transactions at NEER are entered into as economic hedges but the transactions do not meet the requirements for hedge accounting, hedge accounting treatment is not elected or hedge accounting has been discontinued. Changes in the fair value of those transactions are marked to market and reported in the consolidated statements of income, resulting in earnings volatility. These changes in fair value are captured in the non-qualifying hedge category in computing adjusted earnings. This could be significant to NEER's results because the economic offset to the positions are not marked to market. As a consequence, NEE's net income reflects only the movement in one part of economically-linked transactions. For example, a gain (loss) in the non-qualifying hedge category for certain energy derivatives is offset by decreases (increases) in the fair value of related physical asset positions in the portfolio or contracts, which are not marked to market under GAAP. For this reason, NEE's management views results expressed excluding the unrealized mark-to-market impact of the non-qualifying hedges as a meaningful measure of current period performance. For additional information regarding derivative instruments, see Note 3, Overview and Energy Marketing and Trading and Market Risk Sensitivity.

Accounting for Pension Benefits

NEE sponsors a qualified noncontributory defined benefit pension plan for substantially all employees of NEE and its subsidiaries. Management believes that, based on actuarial assumptions and the well-funded status of the pension plan, NEE will not be required to make any cash contributions to the qualified pension plan in the near future. The qualified pension plan has a fully funded trust dedicated to providing benefits under the plan. NEE allocates net periodic income associated with the pension plan to its subsidiaries annually using specific criteria.

Nature of Accounting Estimates

For the pension plan, the benefit obligation is the actuarial present value, as of the December 31 measurement date, of all benefits attributed by the pension benefit formula to employee service rendered to that date. The amount of benefit to be paid depends on a number of future events incorporated into the pension benefit formula, including estimates of the average life of employees/survivors and average years of service rendered. The projected benefit obligation is measured based on assumptions concerning future interest rates and future employee compensation levels. NEE derives pension income from actuarial calculations based on the plan's provisions and various management assumptions including discount rate, rate of increase in compensation levels and expected long-term rate of return on plan assets.

Assumptions and Accounting Approach

Accounting guidance requires recognition of the funded status of the pension plan in the balance sheet, with changes in the funded status recognized in other comprehensive income within shareholders' equity in the year in which the changes occur. Since NEE is the plan sponsor, and its subsidiaries do not have separate rights to the plan assets or direct obligations to their employees, this accounting guidance is reflected at NEE and not allocated to the subsidiaries. The portion of previously unrecognized actuarial gains and losses and prior service costs or credits that are estimated to be allocable to FPL as net periodic (income) cost in future periods and that otherwise would be recorded in AOCI are classified as regulatory assets and liabilities at NEE in accordance with regulatory treatment.

Net periodic pension income is included in O&M expenses, and is calculated using a number of actuarial assumptions. Those assumptions for the years ended December 31, 2015, 2014 and 2013 include:

	2015	2014	2013
Discount rate	**3.95%**	4.80%	4.00%
Salary increase	**4.10%**	4.00%	4.00%
Expected long-term rate of return[(a)]	**7.35%**	7.75%	7.75%

(a) In 2015, an expected long-term rate of return of 7.75% is presented net of investment management fees.

In developing these assumptions, NEE evaluated input, including other qualitative and quantitative factors, from its actuaries and consultants, as well as information available in the marketplace. In addition, for the expected long-term rate of return on pension plan assets, NEE considered different models, capital market return assumptions and historical returns for a portfolio with an equity/bond asset mix similar to its pension fund, as well as its pension fund's historical compounded returns. NEE believes that 7.35% is a reasonable long-term rate of return, net of investment management fees, on its pension plan assets. NEE will continue to evaluate all of its actuarial assumptions, including its expected rate of return, at least annually, and will adjust them as appropriate.

NEE utilizes in its determination of pension income a market-related valuation of plan assets. This market-related valuation reduces year-to-year volatility and recognizes investment gains or losses over a five-year period following the year in which they occur. Investment gains or losses for this purpose are the difference between the expected return calculated using the market-related value of plan assets and the actual return realized on those plan assets. Since the market-related value of plan assets recognizes gains or losses over a five-year period, the future value of plan assets will be affected as previously deferred gains or losses are recognized. Such gains and losses together with other differences between actual results and the estimates used in the actuarial valuations are deferred and recognized in determining pension income only to the extent they exceed 10% of the greater of projected benefit obligations or the market-related value of plan assets.

The following table illustrates the effect on net periodic income of changing the critical actuarial assumptions discussed above, while holding all other assumptions constant:

	Change in Assumption	Decrease in 2015 Net Periodic Income	
		NEE	FPL
		(millions)	
Expected long-term rate of return	(0.5)%	$ (18)	$ (11)
Discount rate	0.5%	$ (3)	$ (2)
Salary increase	0.5%	$ (2)	$ (1)

NEE also utilizes actuarial assumptions about mortality to help estimate obligations of the pension plan. NEE has adopted the latest revised mortality tables and mortality improvement scales released by the Society of Actuaries, which adoption did not have a material impact on the pension plan's obligation.

See Note 2.

Carrying Value of Long-Lived Assets

NEE evaluates long-lived assets for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable.

Nature of Accounting Estimates

The amount of future net cash flows, the timing of the cash flows and the determination of an appropriate interest rate all involve estimates and judgments about future events. In particular, the aggregate amount of cash flows determines whether an impairment exists, and the timing of the cash flows is critical in determining fair value. Because each assessment is based on the facts and circumstances associated with each long-lived asset, the effects of changes in assumptions cannot be generalized.

Assumptions and Accounting Approach

An impairment loss is required to be recognized if the carrying value of the asset exceeds the undiscounted future net cash flows associated with that asset. The impairment loss to be recognized is the amount by which the carrying value of the long-lived asset exceeds the asset's fair value. In most instances, the fair value is determined by discounting estimated future cash flows using an appropriate interest rate. See Note 4 - Nonrecurring Fair Value Measurements and Management's Discussion - NEER: Results of Operations - Gas Infrastructure.

Decommissioning and Dismantlement

The components of NEE's and FPL's decommissioning of nuclear plants, dismantlement of plants and other accrued asset removal costs are as follows:

	FPL								NEE	
	Nuclear Decommissioning		Fossil/Solar Dismantlement		Interim Removal Costs and Other		NEECH[a]			
	December 31,		December 31,		December 31,		December 31,		December 31,	
	2015	2014	**2015**	2014	**2015**	2014	**2015**	2014	**2015**	2014
	(millions)									
AROs	**$ 1,764**	$ 1,303	**$ 53**	$ 48	**$ 5**	$ 4	**$ 647**	$ 631	**$ 2,469**	$ 1,986
Less capitalized ARO asset net of accumulated depreciation	**375**	—	**38**	18	**—**	—	**—**	—	**413**	18
Accrued asset removal costs[b]	**279**	280	**315**	311	**1,327**	1,307	**9**	6	**1,930**	1,904
Asset retirement obligation regulatory expense difference[b]	**2,147**	2,239	**37**	20	**(2)**	(2)	**—**	—	**2,182**	2,257
Accrued decommissioning, dismantlement and other accrued asset removal costs	**$ 3,815** [c]	$ 3,822 [c]	**$ 367** [c]	$ 361 [c]	**$ 1,330** [c]	$ 1,309 [c]	**$ 656**	$ 637	**$ 6,168**	$ 6,129

(a) Primarily NEER.
(b) Regulatory liability on NEE's and FPL's consolidated balance sheets.
(c) Represents total amount accrued for ratemaking purposes.

Nature of Accounting Estimates

The calculation of the future cost of retiring long-lived assets, including nuclear decommissioning and plant dismantlement costs, involves estimating the amount and timing of future expenditures and making judgments concerning whether or not such costs are considered a legal obligation. Estimating the amount and timing of future expenditures includes, among other things, making projections of when assets will be retired and ultimately decommissioned and how costs will escalate with inflation. In addition, NEE and FPL also make interest rate and rate of return projections on their investments in determining recommended funding requirements for nuclear decommissioning costs. Periodically, NEE and FPL are required to update these estimates and projections which can affect the annual expense amounts recognized, the liabilities recorded and the annual funding requirements for nuclear decommissioning costs. For example, an increase of 0.25% in the assumed escalation rates for nuclear decommissioning costs would increase NEE's and FPL's asset retirement obligations and conditional asset retirement obligations (collectively, AROs) as of December 31, 2015 by $191 million and $149 million, respectively.

Assumptions and Accounting Approach

NEE and FPL each account for AROs under accounting guidance that requires a liability for the fair value of an ARO to be recognized in the period in which it is incurred if it can be reasonably estimated, with the offsetting associated asset retirement costs capitalized as part of the carrying amount of the long-lived assets.

FPL - For ratemaking purposes, FPL accrues and funds for nuclear plant decommissioning costs over the expected service life of each unit based on studies that are filed with the FPSC. The studies reflect, among other things, the expiration dates of the operating licenses for FPL's nuclear units. The most recent studies, filed in 2015, indicate that FPL's portion of the future cost of decommissioning its four nuclear units, including spent fuel storage above what is expected to be refunded by the DOE under the spent fuel settlement agreement, is approximately $7.5 billion, or $2.9 billion expressed in 2015 dollars.

FPL accrues the cost of dismantling its fossil and solar plants over the expected service life of each unit based on studies filed with the FPSC. Unlike nuclear decommissioning, dismantlement costs are not funded. The most recent studies became effective January 1, 2010. At December 31, 2015, FPL's portion of the ultimate cost to dismantle its fossil and solar units is approximately $752 million, or $411 million expressed in 2015 dollars. The majority of the dismantlement costs are not considered AROs. FPL accrues for interim removal costs over the life of the related assets based on depreciation studies approved by the FPSC. Any differences between the ARO amou nt recorded and the amount recorded for ratemaking purposes are reported as a regulatory liability in accordance with regulatory accounting.

NEER - NEER records a liability for the present value of its expected decommissioning costs which is determined using various internal and external data and applying a probability percentage to a variety of scenarios regarding the life of the plant and timing of decommissioning. The liability is being accreted using the interest method through the date decommissioning activities are expected to be complete. At December 31, 2015, the ARO for nuclear decommissioning of NEER's nuclear plants totaled approximately $423 million. NEER's portion of the ultimate cost of decommissioning its nuclear plants, including costs associated with spent fuel storage above what is expected to be refunded by the DOE under the spent fuel settlement agreement, is estimated to be approximately $11.8 billion, or $1.9 billion expressed in 2015 dollars.

See Note 1 - Asset Retirement Obligations and - Decommissioning of Nuclear Plants, Dismantlement of Plants and Other Accrued Asset Removal Costs and Note 13.

Regulatory Accounting

NEE's and FPL's regulatory assets and liabilities are as follows:

	NEE		FPL	
	December 31,		December 31,	
	2015	2014	**2015**	2014
	(millions)			
Regulatory assets:				
Current:				
Deferred clause and franchise expenses	**$ 75**	$ 268	**$ 75**	$ 268
Derivatives	**$ 218**	$ 364	**$ 218**	$ 364
Other	**$ 210**	$ 116	**$ 209**	$ 111
Noncurrent:				
Purchased power agreement termination	**$ 726**	$ —	**$ 726**	$ —
Securitized storm-recovery costs	**$ 208**	$ 294	**$ 208**	$ 294
Other	**$ 844**	$ 657	**$ 579**	$ 468
Regulatory liabilities:				
Current, included in other current liabilities	**$ 14**	$ 26	**$ 12**	$ 24
Noncurrent:				
Accrued asset removal costs	**$ 1,930**	$ 1,904	**$ 1,921**	$ 1,898
Asset retirement obligation regulatory expense difference	**$ 2,182**	$ 2,257	**$ 2,182**	$ 2,257
Other	**$ 494**	$ 476	**$ 492**	$ 476

Nature of Accounting Estimates

Regulatory assets and liabilities represent probable future revenues that will be recovered from or refunded to customers through the ratemaking process. Regulatory assets and liabilities are included in rate base or otherwise earn (pay) a return on investment during the recovery period.

Assumptions and Accounting Approach

Accounting guidance allows regulators to create assets and impose liabilities that would not be recorded by non-rate regulated entities. If NEE's rate-regulated entities, primarily FPL, were no longer subject to cost-based rate regulation, the existing regulatory assets and liabilities would be written off unless regulators specify an alternative means of recovery or refund. In addition, the regulators, including the FPSC for FPL, have the authority to disallow recovery of costs that it considers excessive or imprudently incurred. Such costs may include, among others, fuel and O&M expenses, the cost of replacing power lost when fossil and nuclear units are unavailable, storm restoration costs and costs associated with the construction or acquisition of new facilities. The continued applicability of regulatory accounting is assessed at each reporting period.

ENERGY MARKETING AND TRADING AND MARKET RISK SENSITIVITY

NEE and FPL are exposed to risks associated with adverse changes in commodity prices, interest rates and equity prices. Financial instruments and positions affecting the financial statements of NEE and FPL described below are held primarily for purposes other than trading. Market risk is measured as the potential loss in fair value resulting from hypothetical reasonably possible changes in commodity prices, interest rates or equity prices over the next year. Management has established risk management policies to monitor and manage such market risks, as well as credit risks.

Commodity Price Risk

NEE and FPL use derivative instruments (primarily swaps, options, futures and forwards) to manage the commodity price risk inherent in the purchase and sale of fuel and electricity. In addition, NEE, through NEER, uses derivatives to optimize the value of power generation and gas infrastructure assets and engages in power and gas marketing and trading activities to take advantage of expected future favorable price movements. See Critical Accounting Policies and Estimates - Accounting for Derivatives and Hedging Activities and Note 3.

During 2014 and 2015, the changes in the fair value of NEE's consolidated subsidiaries' energy contract derivative instruments were as follows:

	Trading	Hedges on Owned Assets: Non-Qualifying	Hedges on Owned Assets: FPL Cost Recovery Clauses	NEE Total
		(millions)		
Fair value of contracts outstanding at December 31, 2013	$ 301	$ 563	$ 46	$ 910
Reclassification to realized at settlement of contracts	(51)	58	(121)	(114)
Inception value of new contracts	(4)	—	—	(4)
Net option premium purchases (issuances)	(65)	2	—	(63)
Changes in fair value excluding reclassification to realized	139	275	(288)	126
Fair value of contracts outstanding at December 31, 2014	320	898	(363)	855
Reclassification to realized at settlement of contracts	**(227)**	**(359)**	**471**	(115)
Inception value of new contracts	**18**	**3**	—	21
Net option premium purchases (issuances)	**(45)**	**3**	—	(42)
Changes in fair value excluding reclassification to realized	**293**	**640**	**(326)**	607
Fair value of contracts outstanding at December 31, 2015	**359**	**1,185**	**(218)**	**1,326**
Net margin cash collateral paid (received)				**(371)**
Total mark-to-market energy contract net assets (liabilities) at December 31, 2015	**$ 359**	**$ 1,185**	**$ (218)**	**$ 955**

NEE's total mark-to-market energy contract net assets (liabilities) at December 31, 2015 shown above are included on the consolidated balance sheets as follows:

	December 31, 2015
	(millions)
Current derivative assets	**$ 695**
Assets held for sale	**57**
Noncurrent derivative assets	**1,185**
Current derivative liabilities	**(694)**
Liabilities associated with assets held for sale	**(16)**
Noncurrent derivative liabilities	**(272)**
NEE's total mark-to-market energy contract net assets	**$ 955**

The sources of fair value estimates and maturity of energy contract derivative instruments at December 31, 2015 were as follows:

	Maturity						
	2016	2017	2018	2019	2020	Thereafter	Total
	(millions)						
Trading:							
Quoted prices in active markets for identical assets	$ (25)	$ 23	$ 8	$ 4	$ —	$ —	$ 10
Significant other observable inputs	28	18	15	(5)	1	(17)	40
Significant unobservable inputs	160	79	17	19	11	23	309
Total	163	120	40	18	12	6	359
Owned Assets - Non-Qualifying:							
Quoted prices in active markets for identical assets	12	—	8	4	—	—	24
Significant other observable inputs	293	206	117	78	62	75	831
Significant unobservable inputs	43	34	35	25	20	173	330
Total	348	240	160	107	82	248	1,185
Owned Assets - FPL Cost Recovery Clauses:							
Quoted prices in active markets for identical assets	—	—	—	—	—	—	—
Significant other observable inputs	(218)	—	—	—	—	—	(218)
Significant unobservable inputs	(1)	1	—	—	—	—	—
Total	(219)	1	—	—	—	—	(218)
Total sources of fair value	$ 292	$ 361	$ 200	$ 125	$ 94	$ 254	$ 1,326

With respect to commodities, NEE's Exposure Management Committee (EMC), which is comprised of certain members of senior management, and NEE's chief executive officer are responsible for the overall approval of market risk management policies and the delegation of approval and authorization levels. The EMC and NEE's chief executive officer receive periodic updates on market positions and related exposures, credit exposures and overall risk management activities.

NEE uses a value-at-risk (VaR) model to measure commodity price market risk in its trading and mark-to-market portfolios. The VaR is the estimated nominal loss of market value based on a one-day holding period at a 95% confidence level using historical simulation methodology. As of December 31, 2015 and 2014, the VaR figures are as follows:

	Trading			Non-Qualifying Hedges and Hedges in FPL Cost Recovery Clauses[a]			Total		
	FPL	NEER	NEE	FPL	NEER	NEE	FPL	NEER	NEE
	(millions)								
December 31, 2014	$ —	$ 2	$ 2	$ 65	$ 62	$ 24	$ 65	$ 64	$ 24
December 31, 2015	$ —	$ 3	$ 3	$ 51	$ 44	$ 23	$ 51	$ 46	$ 25
Average for the year ended December 31, 2015	$ —	$ 1	$ 1	$ 35	$ 35	$ 24	$ 35	$ 35	$ 23

(a) Non-qualifying hedges are employed to reduce the market risk exposure to physical assets or contracts which are not marked to market. The VaR figures for the non-qualifying hedges and hedges in FPL cost recovery clauses category do not represent the economic exposure to commodity price movements.

Interest Rate Risk

NEE's and FPL's financial results are exposed to risk resulting from changes in interest rates as a result of their respective issuances of debt, investments in special use funds and other investments. NEE and FPL manage their respective interest rate exposure by monitoring current interest rates, entering into interest rate contracts and using a combination of fixed rate and variable rate debt. Interest rate contracts are used to mitigate and adjust interest rate exposure when deemed appropriate based upon market conditions or when required by financing agreements.

The following are estimates of the fair value of NEE's and FPL's financial instruments that are exposed to interest rate risk:

	December 31, 2015		December 31, 2014	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
	(millions)			
NEE:				
Fixed income securities:				
Special use funds	$ 1,789	$ 1,789 (a)	$ 1,965	$ 1,965 (a)
Other investments:				
Debt securities	$ 124	$ 124 (a)	$ 124	$ 124 (a)
Primarily notes receivable	$ 512	$ 722 (b)	$ 525	$ 679 (b)
Long-term debt, including current maturities	$ 28,897	$ 30,412 (c)	$ 27,876	$ 30,337 (c)
Interest rate contracts - net unrealized losses	$ (285)	$ (285) (d)	$ (216)	$ (216) (d)
FPL:				
Fixed income securities - special use funds	$ 1,378	$ 1,378 (a)	$ 1,568	$ 1,568 (a)
Long-term debt, including current maturities	$ 10,020	$ 11,028 (c)	$ 9,473	$ 11,105 (c)

(a) Primarily estimated using quoted market prices for these or similar issues.
(b) Primarily estimated using a discounted cash flow valuation technique based on certain observable yield curves and indices considering the credit profile of the borrower.
(c) Estimated using either quoted market prices for the same or similar issues or discounted cash flow valuation technique, considering the current credit spread of the debtor.
(d) Modeled internally using discounted cash flow valuation technique and applying a credit valuation adjustment.

The special use funds of NEE and FPL consist of restricted funds set aside to cover the cost of storm damage for FPL and for the decommissioning of NEE's and FPL's nuclear power plants. A portion of these funds is invested in fixed income debt securities primarily carried at estimated fair value. At FPL, changes in fair value, including any OTTI losses, result in a corresponding adjustment to the related liability accounts based on current regulatory treatment. The changes in fair value of NEE's non-rate regulated operations result in a corresponding adjustment to OCI, except for impairments deemed to be other than temporary, including any credit losses, which are reported in current period earnings. Because the funds set aside by FPL for storm damage could be needed at any time, the related investments are generally more liquid and, therefore, are less sensitive to changes in interest rates. The nuclear decommissioning funds, in contrast, are generally invested in longer-term securities, as decommissioning activities are not scheduled to begin until at least 2030 (2032 at FPL).

As of December 31, 2015, NEE had interest rate contracts with a notional amount of approximately $8.3 billion related to long-term debt issuances, of which $2.2 billion are fair value hedges at NEECH that effectively convert fixed-rate debt to a variable-rate instrument. The remaining $6.1 billion of notional amount of interest rate contracts relate to cash flow hedges to manage exposure to the variability of cash flows associated with variable-rate debt instruments, which primarily relate to NEER debt issuances. At December 31, 2015, the estimated fair value of NEE's fair value hedges and cash flow hedges was approximately $(14) million and $(271) million, respectively. See Note 3.

Based upon a hypothetical 10% decrease in interest rates, which is a reasonable near-term market change, the net fair value of NEE's net liabilities would increase by approximately $1,009 million ($506 million for FPL) at December 31, 2015.

Equity Price Risk

NEE and FPL are exposed to risk resulting from changes in prices for equity securities. For example, NEE's nuclear decommissioning reserve funds include marketable equity securities primarily carried at their market value of approximately $2,674 million and $2,634 million ($1,598 million and $1,561 million for FPL) at December 31, 2015 and 2014, respectively. At December 31, 2015, a hypothetical 10% decrease in the prices quoted by stock exchanges, which is a reasonable near-term market change, would result in a $246 million ($146 million for FPL) reduction in fair value. For FPL, a corresponding adjustment would be made to the related liability accounts based on current regulatory treatment, and for NEE's non-rate regulated operations, a corresponding adjustment would be made to OCI to the extent the market value of the securities exceeded amortized cost and to OTTI loss to the extent the market value is below amortized cost.

Credit Risk

NEE and its subsidiaries are also exposed to credit risk through their energy marketing and trading operations. Credit risk is the risk that a financial loss will be incurred if a counterparty to a transaction does not fulfill its financial obligation. NEE manages counterparty credit risk for its subsidiaries with energy marketing and trading operations through established policies, including counterparty credit limits, and in some cases credit enhancements, such as cash prepayments, letters of credit, cash and other collateral and guarantees.

Credit risk is also managed through the use of master netting agreements. NEE's credit department monitors current and forward credit exposure to counterparties and their affiliates, both on an individual and an aggregate basis. For all derivative and contractual transactions, NEE's energy marketing and trading operations, which include FPL's energy marketing and trading division, are exposed to losses in the event of nonperformance by counterparties to these transactions. Some relevant considerations when assessing NEE's energy marketing and trading operations' credit risk exposure include the following:

- Operations are primarily concentrated in the energy industry.
- Trade receivables and other financial instruments are predominately with energy, utility and financial services related companies, as well as municipalities, cooperatives and other trading companies in the U.S.
- Overall credit risk is managed through established credit policies and is overseen by the EMC.
- Prospective and existing customers are reviewed for creditworthiness based upon established standards, with customers not meeting minimum standards providing various credit enhancements or secured payment terms, such as letters of credit or the posting of margin cash collateral.
- Master netting agreements are used to offset cash and non-cash gains and losses arising from derivative instruments with the same counterparty. NEE's policy is to have master netting agreements in place with significant counterparties.

Based on NEE's policies and risk exposures related to credit, NEE and FPL do not anticipate a material adverse effect on their financial statements as a result of counterparty nonperformance. As of December 31, 2015, approximately 94% of NEE's and 100% of FPL's energy marketing and trading counterparty credit risk exposure is associated with companies that have investment grade credit ratings.

See Management's Discussion – Energy Marketing and Trading and Market Risk Sensitivity.

Item 8. Financial Statements and Supplementary Data

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

NextEra Energy, Inc.'s (NEE) and Florida Power & Light Company's (FPL) management are responsible for establishing and maintaining adequate internal control over financial reporting as defined in the Securities Exchange Act of 1934 Rules 13a-15(f) and 15d-15(f). The consolidated financial statements, which in part are based on informed judgments and estimates made by management, have been prepared in conformity with generally accepted accounting principles applied on a consistent basis.

To aid in carrying out this responsibility, we, along with all other members of management, maintain a system of internal accounting control which is established after weighing the cost of such controls against the benefits derived. In the opinion of management, the overall system of internal accounting control provides reasonable assurance that the assets of NEE and FPL and their subsidiaries are safeguarded and that transactions are executed in accordance with management's authorization and are properly recorded for the preparation of financial statements. In addition, management believes the overall system of internal accounting control provides reasonable assurance that material errors or irregularities would be prevented or detected on a timely basis by employees in the normal course of their duties. Any system of internal accounting control, no matter how well designed, has inherent limitations, including the possibility that controls can be circumvented or overridden and misstatements due to error or fraud may occur and not be detected. Also, because of changes in conditions, internal control effectiveness may vary over time. Accordingly, even an effective system of internal control will provide only reasonable assurance with respect to financial statement preparation and reporting.

The system of internal accounting control is supported by written policies and guidelines, the selection and training of qualified employees, an organizational structure that provides an appropriate division of responsibility and a program of internal auditing. NEE's written policies include a Code of Business Conduct & Ethics that states management's policy on conflicts of interest and ethical conduct. Compliance with the Code of Business Conduct & Ethics is confirmed annually by key personnel.

The Board of Directors pursues its oversight responsibility for financial reporting and accounting through its Audit Committee. This Committee, which is comprised entirely of independent directors, meets regularly with management, the internal auditors and the independent auditors to make inquiries as to the manner in which the responsibilities of each are being discharged. The independent auditors and the internal audit staff have free access to the Committee without management's presence to discuss auditing, internal accounting control and financial reporting matters.

In accordance with the U.S. Securities and Exchange Commission's published guidance, we have excluded from our current assessment the internal control over financial reporting for NET Holdings Management, LLC, which was acquired on October 1, 2015 and whose financial statements reflect total assets and operating revenues consisting of approximately three percent and less than one percent, respectively, of NextEra Energy's consolidated total assets and operating revenues as of and for the year ended December 31, 2015. NextEra Energy will include NET Holdings Management, LLC in its assessment as of December 31, 2016.

Management assessed the effectiveness of NEE's and FPL's internal control over financial reporting as of December 31, 2015, using the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in the *Internal Control - Integrated Framework (2013)*. Based on this assessment, management believes that NEE's and FPL's internal control over financial reporting was effective as of December 31, 2015.

NEE's and FPL's independent registered public accounting firm, Deloitte & Touche LLP, is engaged to express an opinion on NEE's and FPL's consolidated financial statements and an opinion on NEE's and FPL's internal control over financial reporting. Their reports are based on procedures believed by them to provide a reasonable basis to support such opinions. These reports appear on the following pages.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders
NextEra Energy, Inc. and Florida Power & Light Company:

We have audited the internal control over financial reporting of NextEra Energy, Inc. and subsidiaries (NextEra Energy) and Florida Power & Light Company and subsidiaries (FPL) as of December 31, 2015, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. As described in Management's Report on Internal Control Over Financial Reporting, management excluded from its assessment of NextEra Energy the internal control over financial reporting at NET Holdings Management, LLC, which was acquired on October 1, 2015 and whose financial statements constitute three percent of total assets and less than one percent of operating revenues of NextEra Energy's consolidated financial statement amounts as of and for the year ended December 31, 2015. Accordingly, our audit did not include the internal control over financial reporting at NET Holdings Management, LLC. NextEra Energy's and FPL's management are responsible for maintaining effective internal control over financial reporting and for their assessments of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on NextEra Energy's and FPL's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audits included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, NextEra Energy and FPL maintained, in all material respects, effective internal control over financial reporting as of December 31, 2015, based on the criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended December 31, 2015 of NextEra Energy and FPL and our report dated February 19, 2016 expressed an unqualified opinion on those financial statements and included an explanatory paragraph regarding NextEra Energy's and FPL's adoption of a new accounting standard in 2015.

February 19, 2016

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders
NextEra Energy, Inc. and Florida Power & Light Company:

We have audited the accompanying consolidated balance sheets of NextEra Energy, Inc. and subsidiaries (NextEra Energy) and the separate consolidated balance sheets of Florida Power & Light Company and subsidiaries (FPL) as of December 31, 2015 and 2014, and NextEra Energy's and FPL's related consolidated statements of income, NextEra Energy's consolidated statements of comprehensive income, NextEra Energy's and FPL's consolidated statements of cash flows, NextEra Energy's consolidated statements of equity, and FPL's consolidated statements of common shareholder's equity for each of the three years in the period ended December 31, 2015. These financial statements are the responsibility of NextEra Energy's and FPL's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of NextEra Energy, Inc. and subsidiaries and the financial position of Florida Power & Light Company and subsidiaries at December 31, 2015 and 2014, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2015, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1 to the consolidated financial statements, NextEra Energy and FPL have changed their classification and presentation of deferred taxes in 2015 due to the adoption of FASB ASU 2015-17, *Income Taxes – Balance Sheet Classification of Deferred Taxes*. The adoption of ASU 2015-17 was applied prospectively.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), NextEra Energy's and FPL's internal control over financial reporting as of December 31, 2015, based on the criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 19, 2016 expressed an unqualified opinion on NextEra Energy's and FPL's internal control over financial reporting.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2015, 2014 and 2013

1. Summary of Significant Accounting and Reporting Policies

Basis of Presentation - The operations of NextEra Energy, Inc. (NEE) are conducted primarily through its wholly owned subsidiary Florida Power & Light Company (FPL) and its wholly owned indirect subsidiary NextEra Energy Resources, LLC (NEER). FPL, a rate-regulated electric utility, supplies electric service to approximately 4.8 million customer accounts throughout most of the east and lower west coasts of Florida. NEER invests in independent power projects through both controlled and consolidated entities and noncontrolling ownership interests in joint ventures essentially all of which are accounted for under the equity method. NEER also participates in natural gas, natural gas liquids and oil production through non-operating ownership interests and in pipeline infrastructure through either wholly owned subsidiaries or noncontrolling or joint venture interests. See Note 15 for a discussion of the movement of the natural gas pipeline projects to the NEER segment from Corporate and Other.

The consolidated financial statements of NEE and FPL include the accounts of their respective majority-owned and controlled subsidiaries. Intercompany balances and transactions have been eliminated in consolidation. Amounts included in the consolidated financial statements and the accompanying Notes have been adjusted to reflect the retrospective application of a Financial Accounting Standards Board (FASB) accounting standard update related to the presentation of debt issuance costs in the financial statements. See Debt Issuance Costs below. In addition, certain amounts included in prior years' consolidated financial statements have been reclassified to conform to the current year's presentation. The preparation of financial statements requires the use of estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and the disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

NextEra Energy Partners, LP - NEE, through NEER, formed NextEra Energy Partners, LP (NEP) to acquire, manage and own contracted clean energy projects with stable, long-term cash flows through a limited partner interest in NextEra Energy Operating Partners, LP (NEP OpCo). On July 1, 2014, NEP closed its initial public offering (IPO) by issuing 18,687,500 common units representing limited partner interests. The proceeds from the sale of the common units, net of underwriting discounts, commissions and structuring fees, were approximately $438 million. NEP used such proceeds to purchase 18,687,500 common units of NEP OpCo, of which approximately $288 million was used to purchase common units from an indirect wholly owned subsidiary of NEE and $150 million was used to purchase common units from NEP OpCo. Through an indirect wholly owned subsidiary, NEE retained 74,440,000 units of NEP OpCo representing a 79.9% interest in NEP's operating projects. Additionally, NEE owns a controlling general partner interest in NEP and consolidates this entity for financial reporting purposes and presents NEP's limited partner interest as a noncontrolling interest in NEE's consolidated financial statements. Certain equity and asset transactions between NEP, NEER and NEP OpCo involve the exchange of cash, energy projects and ownership interests in NEP OpCo. These exchanges are accounted for under the profit sharing method and resulted in a profit sharing liability of approximately $447 million and $299 million at December 31, 2015 and 2014, respectively, which is reflected in noncurrent other liabilities on NEE's consolidated balance sheets. The profit sharing liability will be amortized into income on a straight-line basis over the estimated useful lives of the underlying energy projects held by NEP OpCo. During the purchase price adjustment period associated with the IPO, which is expected to extend into the fourth quarter of 2016, approximately $288 million of the profit sharing liability is subject to potential adjustment and will not be amortized.

During 2015, NEP sold an additional 11,857,925 common units and purchased an additional 11,857,925 NEP OpCo common units. Also, in 2015, a subsidiary of NEE purchased 27,000,000 of NEP OpCo's common units. After giving effect to these transactions, NEE's interest in NEP's operating projects is approximately 76.8% as of December 31, 2015. As of December 31, 2015, NEP, through NEER's contribution of energy projects to NEP OpCo, owns a portfolio of 19 wind and solar projects with generating capacity totaling approximately 2,210 megawatts (MW), as well as a portfolio of seven long-term contracted natural gas pipeline assets located in Texas.

Rate Regulation - FPL is subject to rate regulation by the Florida Public Service Commission (FPSC) and the Federal Energy Regulatory Commission (FERC). Its rates are designed to recover the cost of providing electric service to its customers including a reasonable rate of return on invested capital. As a result of this cost-based regulation, FPL follows the accounting guidance that allows regulators to create assets and impose liabilities that would not be recorded by non-rate regulated entities. Regulatory assets and liabilities represent probable future revenues that will be recovered from or refunded to customers through the ratemaking process.

Cost recovery clauses, which are designed to permit full recovery of certain costs and provide a return on certain assets allowed to be recovered through various clauses, include substantially all fuel, purchased power and interchange expense, certain construction-related costs for FPL's planned additional nuclear units at Turkey Point and FPL's solar generation facilities, and conservation and certain environmental-related costs. Revenues from cost recovery clauses are recorded when billed; FPL achieves matching of costs and related revenues by deferring the net underrecovery or overrecovery. Any underrecovered costs or overrecovered revenues are collected from or returned to customers in subsequent periods.

In September 2015, FPL assumed ownership of a 250 MW coal-fired generation facility located in Jacksonville, Florida (Cedar Bay) and terminated its long-term purchased power agreement for substantially all of the facility's capacity and energy for a purchase price of approximately $521 million. The FPSC approved a stipulation and settlement between the State of Florida Office of Public Counsel and FPL regarding issues relating to the ratemaking treatment for Cedar Bay. Key elements of the settlement included, among other things, the following:

- FPL will recover the purchase price and associated income tax gross-up as a regulatory asset which will be amortized over approximately nine years. Approximately $709 million will be recovered through the capacity clause with a return on the portion of the unamortized balance associated with the purchase price and $138 million will be recovered through base rates until FPL's next test year for a general base rate proceeding, at which time the unamortized balance will be transferred to the capacity clause for continued recovery until fully amortized. At December 31, 2015, the regulatory assets, net of amortization, totaled approximately $817 million and are included in purchased power agreement termination and current other regulatory assets on NEE's and FPL's consolidated balance sheets.
- The reserve amount that is available for amortization under the 2012 rate agreement, which is effective through December 2016, was reduced by $30 million to $370 million, unless FPL needs the entire $400 million reserve to maintain a minimum regulatory ROE of 9.50%. See Revenues and Rates - FPL Rates Effective January 2013 through December 2016 below.

In October 2015, the Florida Industrial Power Users Group filed a notice of appeal challenging the FPSC's approval of this settlement, which is pending before the Florida Supreme Court.

If FPL were no longer subject to cost-based rate regulation, the existing regulatory assets and liabilities would be written off unless regulators specify an alternative means of recovery or refund. In addition, the FPSC has the authority to disallow recovery of costs that it considers excessive or imprudently incurred. The continued applicability of regulatory accounting is assessed at each reporting period.

Revenues and Rates - FPL's retail and wholesale utility rate schedules are approved by the FPSC and the FERC, respectively. FPL records unbilled base revenues for the estimated amount of energy delivered to customers but not yet billed. FPL's unbilled base revenues are included in customer receivables on NEE's and FPL's consolidated balance sheets and amounted to approximately $246 million and $223 million at December 31, 2015 and 2014, respectively. FPL's operating revenues also include amounts resulting from cost recovery clauses (see Rate Regulation above), franchise fees, gross receipts taxes and surcharges related to storm-recovery bonds (see Note 9 - FPL). Franchise fees and gross receipts taxes are imposed on FPL; however, the FPSC allows FPL to include in the amounts charged to customers the amount of the gross receipts tax for all customers and the franchise amount for those customers located in the jurisdiction that imposes the fee. Accordingly, franchise fees and gross receipts taxes are reported gross in operating revenues and taxes other than income taxes and other in NEE's and FPL's consolidated statements of income and were approximately $722 million, $716 million and $680 million in 2015, 2014 and 2013, respectively. The revenues from the surcharges related to storm-recovery bonds included in operating revenues in NEE's and FPL's consolidated statements of income were approximately $115 million, $109 million and $108 million in 2015, 2014 and 2013, respectively. FPL also collects municipal utility taxes which are reported gross in customer receivables and accounts payable on NEE's and FPL's consolidated balance sheets.

FPL Rates Effective January 2013 through December 2016 - In January 2013, the FPSC issued a final order approving a stipulation and settlement between FPL and several intervenors in FPL's base rate proceeding (2012 rate agreement). Key elements of the 2012 rate agreement, which is effective from January 2013 through December 2016, include, among other things, the following:

- New retail base rates and charges were established in January 2013 resulting in an increase in retail base revenues of $350 million on an annualized basis.
- FPL's allowed regulatory return on common equity (ROE) is 10.50%, with a range of plus or minus 100 basis points. If FPL's earned regulatory ROE falls below 9.50%, FPL may seek retail base rate relief. If the earned regulatory ROE rises above 11.50%, any party to the 2012 rate agreement other than FPL may seek a review of FPL's retail base rates.
- Retail base rates will be increased by the annualized base revenue requirements for FPL's three modernization projects (Cape Canaveral, Riviera Beach and Port Everglades) as each of the modernized power plants becomes operational. (Cape Canaveral and Riviera Beach became operational in April 2013 and April 2014, respectively, and Port Everglades is expected to be operational by April 2016.)
- Cost recovery of FPL's West County Energy Center (WCEC) Unit No. 3 will continue to occur through the capacity cost recovery clause (capacity clause) (reported as retail base revenues).
- Subject to certain conditions, FPL may amortize, over the term of the 2012 rate agreement, a depreciation reserve surplus remaining at the end of 2012 under a previous rate agreement (approximately $224 million) and may amortize a portion of FPL's fossil dismantlement reserve up to a maximum of $176 million (collectively, the reserve), provided that in any year of the 2012 rate agreement, FPL must amortize at least enough reserve to maintain a 9.50% earned regulatory ROE but may not amortize any reserve that would result in an earned regulatory ROE in excess of 11.50%. See Rate Regulation above regarding a subsequent reduction in the reserve amount.
- Future storm restoration costs would be recoverable on an interim basis beginning 60 days from the filing of a cost recovery petition, but capped at an amount that could produce a surcharge of no more than $4 for every 1,000 kilowatt-hours (kWh) of

usage on residential bills during the first 12 months of cost recovery. Any additional costs would be eligible for recovery in subsequent years. If storm restoration costs exceed $800 million in any given calendar year, FPL may request an increase to the $4 surcharge to recover the amount above $800 million.

- An incentive mechanism whereby customers will receive 100% of certain gains, including but not limited to, gains from the purchase and sale of electricity and natural gas (including transportation and storage), up to a specified threshold. The gains exceeding that specified threshold will be shared by FPL and its customers.

2016 Base Rate Proceeding - In January 2016, FPL filed a formal notification with the FPSC indicating its intent to initiate a base rate proceeding, consisting of a four-year rate plan that would begin in January 2017 following the expiration of the 2012 rate agreement at the end of 2016. The notification stated that, based on preliminary estimates, FPL expects to request an increase to base annual revenue requirements of (i) approximately $860 million effective January 2017, (ii) approximately $265 million effective January 2018, and (iii) approximately $200 million effective when the proposed natural gas-fired combined-cycle unit in Okeechobee County, Florida becomes operational, which is expected to occur in mid-2019 assuming it receives approval by the Siting Board (comprised of the governor and cabinet) under the Florida Electrical Power Plant Siting Act. Under the proposed rate plan, FPL commits that if its requested adjustments to base annual revenue requirements are approved, it will not request further adjustments for 2020. In addition, FPL expects to propose an allowed regulatory return on common equity midpoint of 11.50%, which includes a 50 basis point performance adder. FPL expects to file its formal request to initiate a base rate proceeding in March 2016.

NEER's revenue is recorded on the basis of commodities delivered, contracts settled or services rendered and includes estimated amounts yet to be billed to customers. Certain commodity contracts for the purchase and sale of power that meet the definition of a derivative are recorded at fair value with subsequent changes in fair value recognized as revenue. See Energy Trading below and Note 3.

In May 2014, the FASB issued a new accounting standard which provides guidance on the recognition of revenue from contracts with customers and requires additional disclosures about the nature, amount, timing and uncertainty of revenue and cash flows from an entity's contracts with customers. The standard will be effective for NEE and FPL beginning January 1, 2018 and may be applied retrospectively to each prior period presented or retrospectively with the cumulative effect recognized as of the date of initial application. NEE and FPL are currently evaluating the effect the adoption of this standard will have, if any, on their consolidated financial statements.

Electric Plant, Depreciation and Amortization - The cost of additions to units of property of FPL and NEER is added to electric plant in service. In accordance with regulatory accounting, the cost of FPL's units of utility property retired, less estimated net salvage value, is charged to accumulated depreciation. Maintenance and repairs of property as well as replacements and renewals of items determined to be less than units of utility property are charged to other operations and maintenance (O&M) expenses. At December 31, 2015, the electric generation, transmission, distribution and general facilities of FPL represented approximately 50%, 11%, 33% and 6%, respectively, of FPL's gross investment in electric utility plant in service and other property. Substantially all of FPL's properties are subject to the lien of FPL's mortgage, which secures most debt securities issued by FPL. A number of NEER's generation and pipeline facilities are encumbered by liens securing various financings. The net book value of NEER's assets serving as collateral was approximately $13.9 billion at December 31, 2015. The American Recovery and Reinvestment Act of 2009, as amended (Recovery Act), provided for an option to elect a cash grant (convertible investment tax credits (ITCs)) for certain renewable energy property (renewable property). Convertible ITCs are recorded as a reduction in property, plant and equipment on NEE's and FPL's consolidated balance sheets and are amortized as a reduction to depreciation and amortization expense over the estimated life of the related property. At December 31, 2015 and 2014, convertible ITCs, net of amortization, were approximately $1.8 billion ($153 million at FPL) and $1.6 billion ($159 million at FPL). At December 31, 2015 and 2014, approximately $207 million and $1 million, respectively, of such convertible ITCs are included in other receivables on NEE's consolidated balance sheets.

Depreciation of FPL's electric property is primarily provided on a straight-line average remaining life basis. FPL includes in depreciation expense a provision for fossil and solar plant dismantlement, interim asset removal costs, accretion related to asset retirement obligations (see Decommissioning of Nuclear Plants, Dismantlement of Plants and Other Accrued Asset Removal Costs below), storm recovery amortization and amortization of pre-construction costs associated with planned nuclear units recovered through a cost recovery clause. For substantially all of FPL's property, depreciation studies are typically performed and filed with the FPSC at least every four years. As part of a previous rate agreement, the FPSC approved new depreciation rates which became effective January 1, 2010. In accordance with the 2012 rate agreement, FPL is not required to file depreciation studies during the effective period of the agreement and the previously approved depreciation rates remain in effect. As discussed in Revenues and Rates above, the use of reserve amortization is permitted under the 2012 rate agreement. FPL files a twelve-month forecast with the FPSC each year which contains a regulatory ROE intended to be earned based on the best information FPL has at that time assuming normal weather. This forecast establishes a fixed targeted regulatory ROE. In order to earn the targeted regulatory ROE in each reporting period under the 2012 rate agreement, reserve amortization is calculated using a trailing thirteen-month average of retail rate base and capital structure in conjunction with the trailing twelve months regulatory retail base net operating income, which primarily includes the retail base portion of base and other revenues net of O&M, depreciation and amortization, interest and tax expenses. In general, the net impact of these income statement line items is adjusted, in part, by reserve amortization or its reversal to earn the targeted regulatory ROE. In accordance with the 2012 rate agreement, FPL recorded approximately $(15) million, $(33) million and $155 million of reserve (reversal) amortization in 2015, 2014 and 2013, respectively. The reserve is

amortized as a reduction of (or reversed as an increase to) regulatory liabilities - accrued asset removal costs on NEE's and FPL's consolidated balance sheets. The weighted annual composite depreciation and amortization rate for FPL's electric utility plant in service, including capitalized software, but excluding the effects of decommissioning, dismantlement and the depreciation adjustments discussed above, was approximately 3.3%, 3.3% and 3.4% for 2015, 2014 and 2013, respectively.

NEER's electric plant in service less salvage value, if any, are depreciated primarily using the straight-line method over their estimated useful lives. At December 31, 2015 and 2014, wind, nuclear, natural gas and solar plants represented approximately 62% and 63%, 11% and 12%, 3% and 8%, and 9% and 7%, respectively, of NEER's depreciable electric plant in service and other property. The estimated useful lives of NEER's plants range primarily from 25 to 30 years for wind, natural gas and solar plants and from 25 to 47 years for nuclear plants. NEER reviews the estimated useful lives of its fixed assets on an ongoing basis. NEER's oil and gas production assets, representing approximately 7% and 6%, respectively, of NEER's depreciable electric plant in service and other property at December 31, 2015 and 2014, are accounted for under the successful efforts method. Depletion expenses for the acquisition of reserve rights and development costs are recognized using the unit of production method.

Nuclear Fuel - FPL and NEER have several contracts for the supply of uranium, conversion, enrichment and fabrication of nuclear fuel. See Note 14 - Contracts. FPL's and NEER's nuclear fuel costs are charged to fuel expense on a unit of production method.

Construction Activity - Allowance for funds used during construction (AFUDC) is a non-cash item which represents the allowed cost of capital, including an ROE, used to finance FPL construction projects. The portion of AFUDC attributable to borrowed funds is recorded as a reduction of interest expense and the remainder is recorded as other income. FPSC rules limit the recording of AFUDC to projects that have an estimated cost in excess of 0.5% of a utility's plant in service balance and require more than one year to complete. FPSC rules allow construction projects below the 0.5% threshold as a component of rate base. During 2015, 2014 and 2013, FPL capitalized AFUDC at a rate of 6.34%, 6.34% and 6.52%, respectively, which amounted to approximately $88 million, $50 million and $81 million, respectively. See Note 14 - Commitments.

FPL's construction work in progress includes construction materials, progress payments on major equipment contracts, engineering costs, AFUDC and other costs directly associated with the construction of various projects. Upon completion of the projects, these costs are transferred to electric utility plant in service and other property. Capitalized costs associated with construction activities are charged to O&M expenses when recoverability is no longer probable. See Rate Regulation above for information on recovery of costs associated with new nuclear capacity and solar generation facilities.

NEER capitalizes project development costs once it is probable that such costs will be realized through the ultimate construction of a power plant or sale of development rights. At December 31, 2015 and 2014, NEER's capitalized development costs totaled approximately $133 million and $122 million, respectively, which are included in noncurrent other assets on NEE's consolidated balance sheets. These costs include land rights and other third-party costs directly associated with the development of a new project. Upon commencement of construction, these costs either are transferred to construction work in progress or remain in other assets, depending upon the nature of the cost. Capitalized development costs are charged to O&M expenses when it is no longer probable that these costs will be realized.

NEER's construction work in progress includes construction materials, progress payments on major equipment contracts, third-party engineering costs, capitalized interest and other costs directly associated with the construction and development of various projects. Interest capitalized on construction projects amounted to approximately $100 million, $104 million and $109 million during 2015, 2014 and 2013, respectively. Interest expense allocated from NextEra Energy Capital Holdings, Inc. (NEECH) to NEER is based on a deemed capital structure of 70% debt. Upon commencement of plant operation, costs associated with construction work in progress are transferred to electric plant in service and other property.

Asset Retirement Obligations - NEE and FPL each account for asset retirement obligations and conditional asset retirement obligations (collectively, AROs) under accounting guidance that requires a liability for the fair value of an ARO to be recognized in the period in which it is incurred if it can be reasonably estimated, with the offsetting associated asset retirement costs capitalized as part of the carrying amount of the long-lived assets. The asset retirement cost is subsequently allocated to expense, for NEE's non-rate regulated operations, and regulatory liability, for FPL, using a systematic and rational method over the asset's estimated useful life. Changes in the ARO resulting from the passage of time are recognized as an increase in the carrying amount of the liability and as accretion expense, which is included in depreciation and amortization expense in the consolidated statements of income for NEE's non-rate regulated operations, and ARO and regulatory liability, in the case of FPL. Changes resulting from revisions to the timing or amount of the original estimate of cash flows are recognized as an increase or a decrease in the asset retirement cost, or income when asset retirement cost is depleted, in the case of NEE's non-rate regulated operations, and ARO and regulatory liability, in the case of FPL. See Decommissioning of Nuclear Plants, Dismantlement of Plants and Other Accrued Asset Removal Costs below and Note 13.

Decommissioning of Nuclear Plants, Dismantlement of Plants and Other Accrued Asset Removal Costs - For ratemaking purposes, FPL accrues for the cost of end of life retirement and disposal of its nuclear, fossil and solar plants over the expected service life of each unit based on nuclear decommissioning and fossil and solar dismantlement studies periodically filed with the FPSC. In addition, FPL accrues for interim removal costs over the life of the related assets based on depreciation studies approved by the

FPSC. As approved by the FPSC, FPL previously suspended its annual decommissioning accrual. For financial reporting purposes, FPL recognizes decommissioning and dismantlement liabilities in accordance with accounting guidance that requires a liability for the fair value of an ARO to be recognized in the period in which it is incurred. Any differences between expense recognized for financial reporting purposes and the amount recovered through rates are reported as a regulatory liability in accordance with regulatory accounting. See Revenues and Rates, Electric Plant, Depreciation and Amortization, Asset Retirement Obligations above and Note 13.

Nuclear decommissioning studies are performed at least every five years and are submitted to the FPSC for approval. FPL filed updated nuclear decommissioning studies with the FPSC in December 2015. These studies reflect FPL's current plans, under the operating licenses, for prompt dismantlement of Turkey Point Units Nos. 3 and 4 following the end of plant operation with decommissioning activities commencing in 2032 and 2033, respectively, and provide for St. Lucie Unit No. 1 to be mothballed beginning in 2036 with decommissioning activities to be integrated with the prompt dismantlement of St. Lucie Unit No. 2 in 2043. These studies also assume that FPL will be storing spent fuel on site pending removal to a United States (U.S.) government facility. The studies indicate FPL's portion of the ultimate costs of decommissioning its four nuclear units, including costs associated with spent fuel storage above what is expected to be refunded by the U.S. Department of Energy (DOE) under a spent fuel settlement agreement, to be approximately $7.5 billion, or $2.9 billion expressed in 2015 dollars.

Restricted funds for the payment of future expenditures to decommission FPL's nuclear units are included in nuclear decommissioning reserve funds, which are included in special use funds on NEE's and FPL's consolidated balance sheets. Marketable securities held in the decommissioning funds are primarily classified as available for sale and carried at fair value. See Note 4. FPL does not currently make contributions to the decommissioning funds, other than the reinvestment of dividends and interest. Fund earnings, consisting of dividends, interest and realized gains and losses, as well as any changes in unrealized gains and losses are not recognized in income and are reflected as a corresponding offset in the related regulatory liability accounts. During 2015, 2014 and 2013 fund earnings on decommissioning funds were approximately $96 million, $91 million and $167 million, respectively. The tax effects of amounts not yet recognized for tax purposes are included in deferred income taxes.

Fossil and solar plant dismantlement studies are typically performed at least every four years and are submitted to the FPSC for approval. FPL's latest fossil and solar plant dismantlement studies became effective January 1, 2010 and resulted in an annual expense of $18 million which is recorded in depreciation and amortization expense in NEE's and FPL's consolidated statements of income. At December 31, 2015, FPL's portion of the ultimate cost to dismantle its fossil and solar units is approximately $752 million, or $411 million expressed in 2015 dollars. In accordance with the 2012 rate agreement, FPL is not required to file fossil and solar dismantlement studies during the effective period of the agreement.

NEER records nuclear decommissioning liabilities for Seabrook Station (Seabrook), Duane Arnold Energy Center (Duane Arnold) and Point Beach Nuclear Power Plant (Point Beach) in accordance with accounting guidance that requires a liability for the fair value of an ARO to be recognized in the period in which it is incurred. The liability is being accreted using the interest method through the date decommissioning activities are expected to be complete. See Note 13. At December 31, 2015 and 2014, NEER's ARO related to nuclear decommissioning was approximately $423 million and $462 million, respectively, and was determined using various internal and external data and applying a probability percentage to a variety of scenarios regarding the life of the plant and timing of decommissioning. NEER's portion of the ultimate cost of decommissioning its nuclear plants, including costs associated with spent fuel storage above what is expected to be refunded by the DOE under a spent fuel settlement agreement, is estimated to be approximately $11.8 billion, or $1.9 billion expressed in 2015 dollars.

Seabrook files a comprehensive nuclear decommissioning study with the New Hampshire Nuclear Decommissioning Financing Committee (NDFC) every four years; the most recent study was filed in 2015. Seabrook's decommissioning funding plan is also subject to annual review by the NDFC. Currently, there are no ongoing decommissioning funding requirements for Seabrook, Duane Arnold and Point Beach, however, the U.S. Nuclear Regulatory Commission (NRC), and in the case of Seabrook, the NDFC, has the authority to require additional funding in the future. NEER's portion of Seabrook's, Duane Arnold's and Point Beach's restricted funds for the payment of future expenditures to decommission these plants is included in nuclear decommissioning reserve funds, which are included in special use funds on NEE's consolidated balance sheets. Marketable securities held in the decommissioning funds are primarily classified as available for sale and carried at fair value. Market adjustments result in a corresponding adjustment to other comprehensive income (OCI), except for unrealized losses associated with marketable securities considered to be other than temporary, including any credit losses, which are recognized as other than temporary impairment losses on securities held in nuclear decommissioning funds in NEE's consolidated statements of income. Fund earnings are recognized in income and are reinvested in the funds. See Note 4. The tax effects of amounts not yet recognized for tax purposes are included in deferred income taxes.

Major Maintenance Costs - FPL recognizes costs associated with planned major nuclear maintenance in accordance with regulatory treatment and records the related accrual as a regulatory liability. FPL expenses costs associated with planned fossil maintenance as incurred. FPL's estimated nuclear maintenance costs for each nuclear unit's next planned outage are accrued over the period from the end of the last outage to the end of the next planned outage. Any difference between the estimated and actual costs is included in O&M expenses when known. The accrued liability for nuclear maintenance costs at December 31, 2015 and 2014 totaled approximately $48 million and $50 million, respectively, and is included in regulatory liabilities - other on NEE's and FPL's consolidated

balance sheets. For the years ended December 31, 2015, 2014 and 2013, FPL recognized approximately $90 million, $76 million and $92 million, respectively, in nuclear maintenance costs which are primarily included in O&M expenses in NEE's and FPL's consolidated statements of income.

NEER uses the deferral method to account for certain planned major maintenance costs. NEER's major maintenance costs for its nuclear generation units and combustion turbines are capitalized and amortized on a unit of production method over the period from the end of the last outage to the beginning of the next planned outage. NEER's capitalized major maintenance costs, net of accumulated amortization, totaled approximately $97 million and $141 million at December 31, 2015 and 2014, respectively, and are included in noncurrent other assets on NEE's consolidated balance sheets. For the years ended December 31, 2015, 2014 and 2013, NEER amortized approximately $79 million, $81 million and $93 million in major maintenance costs which are included in O&M expenses in NEE's consolidated statements of income.

Cash Equivalents - Cash equivalents consist of short-term, highly liquid investments with original maturities of three months or less.

Restricted Cash - At December 31, 2015 and 2014, NEE had approximately $244 million ($75 million for FPL) and $228 million ($38 million for FPL), respectively, of restricted cash included in other current assets on NEE's and FPL's consolidated balance sheets, which was primarily related to margin cash collateral requirements, debt service payments and bond proceeds held for construction at FPL. Where offsetting positions exist, restricted cash related to margin cash collateral is netted against derivative instruments. See Note 3.

Allowance for Doubtful Accounts - FPL maintains an accumulated provision for uncollectible customer accounts receivable that is estimated using a percentage, derived from historical revenue and write-off trends, of the previous five months of revenue. Additional amounts are included in the provision to address specific items that are not considered in the calculation described above. NEER regularly reviews collectibility of its receivables and establishes a provision for losses estimated as a percentage of accounts receivable based on the historical bad debt write-off trends for its retail electricity provider operations and, when necessary, using the specific identification method for all other receivables.

Inventory - FPL values materials, supplies and fossil fuel inventory using a weighted-average cost method. NEER's materials, supplies and fossil fuel inventories are carried at the lower of weighted-average cost or market, unless evidence indicates that the weighted-average cost (even if in excess of market) will be recovered with a normal profit upon sale in the ordinary course of business.

Energy Trading - NEE provides full energy and capacity requirements services primarily to distribution utilities, which include load-following services and various ancillary services, in certain markets and engages in power and gas marketing and trading activities to optimize the value of electricity and fuel contracts, generation facilities and gas infrastructure assets, as well as to take advantage of projected favorable commodity price movements. Trading contracts that meet the definition of a derivative are accounted for at fair value and realized gains and losses from all trading contracts, including those where physical delivery is required, are recorded net for all periods presented. See Note 3.

Securitized Storm-Recovery Costs, Storm Fund and Storm Reserve - In connection with the 2007 storm-recovery bond financing (see Note 9 - FPL), the net proceeds to FPL from the sale of the storm-recovery property were used primarily to reimburse FPL for its estimated net of tax deficiency in its storm and property insurance reserve (storm reserve) and provide for a storm and property insurance reserve fund (storm fund). Upon the issuance of the storm-recovery bonds, the storm reserve deficiency was reclassified to securitized storm-recovery costs and is recorded as a regulatory asset on NEE's and FPL's consolidated balance sheets. As storm-recovery charges are billed to customers, the securitized storm-recovery costs are amortized and included in depreciation and amortization expense in NEE's and FPL's consolidated statements of income. Marketable securities held in the storm fund are classified as available for sale and are carried at fair value with market adjustments, including any other than temporary impairment losses, resulting in a corresponding adjustment to the storm reserve. Fund earnings, net of taxes, are reinvested in the fund. The tax effects of amounts not yet recognized for tax purposes are included in deferred income taxes. The storm fund is included in special use funds on NEE's and FPL's consolidated balance sheets and was approximately $74 million and $75 million at December 31, 2015 and 2014, respectively. See Note 4.

The storm reserve that was reestablished in an FPSC financing order related to the issuance of the storm-recovery bonds was not initially reflected on NEE's and FPL's consolidated balance sheets because the associated regulatory asset did not meet the specific recognition criteria under the accounting guidance for certain regulated entities. As a result, the storm reserve will be recognized as a regulatory liability as the storm-recovery charges are billed to customers and charged to depreciation and amortization expense in NEE's and FPL's consolidated statements of income. Furthermore, the storm reserve will be reduced as storm costs are reimbursed. As of December 31, 2015, FPL had the capacity to absorb up to approximately $119 million in future prudently incurred storm restoration costs without seeking recovery through a rate adjustment from the FPSC or filing a petition with the FPSC.

Impairment of Long-Lived Assets - NEE evaluates long-lived assets for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is required to be recognized if the carrying value of the asset exceeds the undiscounted future net cash flows associated with that asset. The impairment loss to be recognized is the

amount by which the carrying value of the long-lived asset exceeds the asset's fair value. In most instances, the fair value is determined by discounting estimated future cash flows using an appropriate interest rate. See Note 4 - Nonrecurring Fair Value Measurements.

Goodwill and Other Intangible Assets - NEE's goodwill and other intangible assets are as follows:

	Weighted-Average Useful Lives	December 31,	
		2015	2014
	(years)	(millions)	
Goodwill (by reporting unit):			
NEER segment:			
Gas infrastructure, primarily Texas pipelines		$ 635	$ —
Customer supply		72	72
Generation assets		43	47
Other		28	28
Total goodwill		$ 778	$ 147
Other intangible assets not subject to amortization, primarily land easements		$ 143	$ 143
Other intangible assets subject to amortization:			
Customer relationships associated with gas infrastructure	40	$ 720	$ —
Purchased power agreements	22	328	348
Other, primarily transmission and development rights and customer lists	22	136	139
Total		1,184	487
Accumulated amortization		(120)	(125)
Total other intangible assets subject to amortization - net		$ 1,064	$ 362

NEE's goodwill relates to various acquisitions which were accounted for using the purchase method of accounting. Other intangible assets subject to amortization are amortized, primarily on a straight-line basis, over their estimated useful lives. For the years ended December 31, 2015, 2014 and 2013, amortization expense was approximately $17 million, $15 million and $13 million, respectively, and is expected to be approximately $38 million, $37 million, $36 million, $35 million and $35 million for 2016, 2017, 2018, 2019 and 2020, respectively.

Goodwill and other intangible assets are included in noncurrent other assets on NEE's consolidated balance sheets. Goodwill and other intangible assets not subject to amortization are assessed for impairment at least annually by applying a fair value-based analysis. Other intangible assets subject to amortization are periodically reviewed when impairment indicators are present to assess recoverability from future operations using undiscounted future cash flows.

Debt Issuance Costs - Effective December 31, 2015, NEE and FPL retrospectively adopted an accounting standard update which changed the presentation of debt issuance costs in the consolidated financial statements. This standard update requires that debt issuance costs be presented on the balance sheet as a direct deduction from the carrying amount of the related debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs was not affected by this standard update. Upon adoption, NEE reclassified debt issuance costs of $324 million ($85 million for FPL) as of December 31, 2014 from noncurrent other assets to long-term debt.

Pension Plan - NEE allocates net periodic pension income to its subsidiaries based on the pensionable earnings of the subsidiaries' employees. Accounting guidance requires recognition of the funded status of the pension plan in the balance sheet, with changes in the funded status recognized in other comprehensive income within shareholders' equity in the year in which the changes occur. Since NEE is the plan sponsor, and its subsidiaries do not have separate rights to the plan assets or direct obligations to their employees, this accounting guidance is reflected at NEE and not allocated to the subsidiaries. The portion of previously unrecognized actuarial gains and losses and prior service costs or credits that are estimated to be allocable to FPL as net periodic (income) cost in future periods and that otherwise would be recorded in accumulated other comprehensive income (AOCI) are classified as regulatory assets and liabilities at NEE in accordance with regulatory treatment.

Stock-Based Compensation - NEE accounts for stock-based payment transactions based on grant-date fair value. Compensation costs for awards with graded vesting are recognized on a straight-line basis over the requisite service period for the entire award. See Note 11 - Stock-Based Compensation.

Income Taxes - Deferred income taxes are recognized on all significant temporary differences between the financial statement and tax bases of assets and liabilities. In connection with the tax sharing agreement between NEE and its subsidiaries, the income tax provision at each subsidiary reflects the use of the "separate return method," except that tax benefits that could not be used on a

separate return basis, but are used on the consolidated tax return, are recorded by the subsidiary that generated the tax benefits. Any remaining consolidated income tax benefits or expenses are recorded at the corporate level. Included in other regulatory assets and other regulatory liabilities on NEE's and FPL's consolidated balance sheets is the revenue equivalent of the difference in deferred income taxes computed under accounting rules, as compared to regulatory accounting rules. The net regulatory asset totaled $283 million ($268 million for FPL) and $250 million ($236 million for FPL) at December 31, 2015 and 2014, respectively, and is being amortized in accordance with the regulatory treatment over the estimated lives of the assets or liabilities for which the deferred tax amount was initially recognized.

NEER recognizes ITCs as a reduction to income tax expense when the related energy property is placed into service. Production tax credits (PTCs) are recognized as wind energy is generated and sold based on a per kWh rate prescribed in applicable federal and state statutes and are recorded as a reduction of current income taxes payable, unless limited by tax law in which instance they are recorded as deferred tax assets. NEE and FPL record a deferred income tax benefit created by the convertible ITCs on the difference between the financial statement and tax bases of renewable property. For NEER, this deferred income tax benefit is recorded in income tax expense in the year that the renewable property is placed in service. For FPL, this deferred income tax benefit is offset by a regulatory liability, which is amortized as a reduction of depreciation expense over the approximate lives of the related renewable property in accordance with the regulatory treatment. At December 31, 2015 and 2014, the net deferred income tax benefits associated with FPL's convertible ITCs were approximately $48 million and $50 million, respectively, and are included in other regulatory assets and regulatory liabilities on NEE's and FPL's consolidated balance sheets.

A valuation allowance is recorded to reduce the carrying amounts of deferred tax assets when it is more likely than not that such assets will not be realized. NEE recognizes interest income (expense) related to unrecognized tax benefits (liabilities) in interest income and interest expense, respectively, net of the amount deferred at FPL. At FPL, the offset to accrued interest receivable (payable) on income taxes is classified as a regulatory liability (regulatory asset) which will be amortized to income (expense) over a five-year period upon settlement in accordance with regulatory treatment. All tax positions taken by NEE in its income tax returns that are recognized in the financial statements must satisfy a more-likely-than-not threshold. See Note 5.

In November 2015, the FASB issued an accounting standard update which simplifies the classification of deferred taxes by eliminating the requirement to separate deferred tax assets and liabilities between current and noncurrent amounts, and instead requires deferred taxes to be presented as noncurrent on the balance sheet. NEE and FPL decided to early adopt this standard update effective for the year ended December 31, 2015, and to apply it prospectively.

Sale of Differential Membership Interests - Certain subsidiaries of NEER sold their Class B membership interest in entities that have ownership interests in wind facilities, with generating capacity totaling approximately 5,272 MW at December 31, 2015, to third-party investors. In exchange for the cash received, the holders of the Class B membership interests will receive a portion of the economic attributes of the facilities, including income tax attributes, for variable periods. The transactions are not treated as a sale under the accounting rules and the proceeds received are deferred and recorded as a liability in deferral related to differential membership interests - VIEs on NEE's consolidated balance sheets. The deferred amount is being recognized in benefits associated with differential membership interests - net in NEE's consolidated statements of income as the Class B members receive their portion of the economic attributes. NEE continues to operate and manage the wind facilities, and consolidates the entities that own the wind facilities.

Variable Interest Entities (VIEs) - An entity is considered to be a VIE when its total equity investment at risk is not sufficient to permit the entity to finance its activities without additional subordinated financial support, or its equity investors, as a group, lack the characteristics of having a controlling financial interest. A reporting company is required to consolidate a VIE as its primary beneficiary when it has both the power to direct the activities of the VIE that most significantly impact the VIE's economic performance, and the obligation to absorb losses or the right to receive benefits from the VIE that could potentially be significant to the VIE. NEE and FPL evaluate whether an entity is a VIE whenever reconsideration events as defined by the accounting guidance occur. See Note 9.

In February 2015, the FASB issued an accounting standard update that will modify current consolidation guidance. The standard makes changes to both the variable interest entity model and the voting interest entity model, including modifying the evaluation of whether limited partnerships or similar legal entities are VIEs or voting interest entities and amending the guidance for assessing how relationships of related parties affect the consolidation analysis of VIEs. The standard is effective for NEE and FPL beginning January 1, 2016. NEE and FPL continue to evaluate the effect the adoption of this standard will have on their consolidated financial statements.

Proposed Merger - In 2014, NEE and Hawaiian Electric Industries, Inc. (HEI) entered into an Agreement and Plan of Merger (the merger agreement) pursuant to which Hawaiian Electric Company, Inc., HEI's wholly owned electric utility subsidiary, will become a wholly owned subsidiary of NEE and each outstanding share of HEI common stock will be converted into the right to receive 0.2413 shares of NEE common stock. Completion of the merger and the actual closing date remain subject to the satisfaction of certain conditions, including Hawaii Public Utilities Commission approval. The merger agreement contains certain termination rights and provides that, upon termination of the merger agreement under specified circumstances, HEI or NEE, as the case may be, would be required to pay to the other party a termination fee of $90 million and reimburse the other party for up to $5 million of its documented out-of-pocket expenses incurred in connection with the merger agreement.

Assets and Liabilities Associated with Assets Held for Sale - In November 2015, a subsidiary of NEER entered into an agreement to sell its ownership interest in its merchant natural gas generation facilities located in Texas, which have a total generating capacity of 2,884 MW at December 31, 2015. The transaction is expected to close in the first quarter of 2016, pending the receipt of necessary regulatory approvals and satisfaction of other customary closing conditions. The carrying amounts of the major classes of assets and liabilities related to the facilities that were classified as held for sale on NEE's consolidated balance sheets primarily represent property, plant and equipment and the related long-term debt.

2. Employee Retirement Benefits

Employee Pension Plan and Other Benefits Plans - NEE sponsors a qualified noncontributory defined benefit pension plan for substantially all employees of NEE and its subsidiaries. NEE also has a supplemental executive retirement plan (SERP), which includes a non-qualified supplemental defined benefit pension component that provides benefits to a select group of management and highly compensated employees, and sponsors a contributory postretirement plan for other benefits for retirees of NEE and its subsidiaries meeting certain eligibility requirements. The total accrued benefit cost of the SERP and postretirement plans is approximately $321 million ($230 million for FPL) and $355 million ($237 million for FPL) at December 31, 2015 and 2014, respectively.

Plan Assets, Benefit Obligations and Funded Status - The changes in assets, benefit obligations and the funded status of the pension plan are as follows:

	2015	2014
	(millions)	
Change in plan assets:		
Fair value of plan assets at January 1	$ 3,698	$ 3,692
Actual return on plan assets	(8)	203
Benefit payments	(127)	(197)
Fair value of plan assets at December 31	$ 3,563	$ 3,698
Change in benefit obligation:		
Obligation at January 1	$ 2,454	$ 2,236
Service cost	70	61
Interest cost	97	101
Plan amendments	—	(9)
Actuarial losses (gains) - net	(86)	262
Benefit payments	(127)	(197)
Obligation at December 31[a]	$ 2,408	$ 2,454
Funded status:		
Prepaid benefit costs at NEE at December 31	$ 1,155	$ 1,244
Prepaid benefit costs at FPL at December 31	$ 1,243	$ 1,189

(a) NEE's accumulated pension benefit obligation, which includes no assumption about future salary levels, at December 31, 2015 and 2014 was approximately $2,366 million and $2,400 million, respectively.

NEE's unrecognized amounts included in accumulated other comprehensive income (loss) yet to be recognized as components of prepaid pension cost are as follows:

	2015	2014
	(millions)	
Components of AOCI:		
Unrecognized prior service cost (net of $1 and $1 tax benefit, respectively)	$ (2)	$ (2)
Unrecognized losses (net of $38 and $10 tax benefit, respectively)	(60)	(16)
Total	$ (62)	$ (18)

NEE's unrecognized amounts included in regulatory assets yet to be recognized as components of net prepaid pension cost are as follows:

	2015	2014
	(millions)	
Unrecognized prior service cost	$ 9	$ 10
Unrecognized losses	232	128
Total	$ 241	$ 138

The following table provides the assumptions used to determine the benefit obligation for the pension plan. These rates are used in determining net periodic income in the following year.

	2015	2014
Discount rate	4.35%	3.95%
Salary increase	4.10%	4.10%

NEE's investment policy for the pension plan recognizes the benefit of protecting the plan's funded status, thereby avoiding the necessity of future employer contributions. Its broad objectives are to achieve a high rate of total return with a prudent level of risk taking while maintaining sufficient liquidity and diversification to avoid large losses and preserve capital over the long term.

The NEE pension plan fund's current target asset allocation, which is expected to be reached over time, is 45% equity investments, 32% fixed income investments, 13% alternative investments and 10% convertible securities. The pension fund's investment strategy emphasizes traditional investments, broadly diversified across the global equity and fixed income markets, using a combination of different investment styles and vehicles. The pension fund's equity and fixed income holdings consist of both directly held securities as well as commingled investment arrangements such as common and collective trusts, pooled separate accounts, registered investment companies and limited partnerships. The pension fund's convertible security assets are principally direct holdings of convertible securities and includes a convertible security oriented limited partnership. The pension fund's alternative investment holdings consist of absolute return oriented limited partnerships that use a broad range of investment strategies on a global basis as well as other alternative investments, such as private equity, income and real estate oriented investments in limited partnerships.

The fair value measurements of NEE's pension plan assets by fair value hierarchy level are as follows:

	December 31, 2015[a]			
	Quoted Prices in Active Markets for Identical Assets or Liabilities (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
	(millions)			
Equity securities[b]	$ 910	$ 21	$ 1	$ 932
Equity commingled vehicles[c]	—	792	—	792
U.S. Government and municipal bonds	110	13	—	123
Corporate debt securities[d]	2	277	1	280
Asset-backed securities	—	167	—	167
Debt security commingled vehicles	—	21	—	21
Convertible securities[e]	16	258	—	274
Total investments in the fair value hierarchy	$ 1,038	$ 1,549	$ 2	2,589
Total investments measured at net asset value[f]				974
Total fair value of plan assets				$ 3,563

(a) See Note 4 for discussion of fair value measurement techniques and inputs.
(b) Includes foreign investments of $384 million.
(c) Includes foreign investments of $249 million.
(d) Includes foreign investments of $68 million.
(e) Includes foreign investments of $23 million.
(f) Includes foreign investments of $283 million. Reflects the adoption of an accounting standard update in 2015 whereby certain investments that are measured at fair value using the net asset value per share (or its equivalent) practical expedient are excluded from the fair value hierarchy.

	December 31, 2014[a]			
	Quoted Prices in Active Markets for Identical Assets or Liabilities (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
	(millions)			
Equity securities[b]	$ 984	$ 31	$ —	$ 1,015
Equity commingled vehicles[c]	—	767	—	767
U.S. Government and municipal bonds	144	20	—	164
Corporate debt securities[d]	—	355	—	355
Asset-backed securities	—	223	—	223
Debt security commingled vehicles	—	21	—	21
Convertible securities	45	229	—	274
Total investments in the fair value hierarchy	$ 1,173	$ 1,646	$ —	2,819
Total investments measured at net asset value[e]				879
Total fair value of plan assets				$ 3,698

(a) See Note 4 for discussion of fair value measurement techniques and inputs.
(b) Includes foreign investments of $321 million.
(c) Includes foreign investments of $306 million.
(d) Includes foreign investments of $88 million.
(e) Includes foreign investments of $200 million. Reflects the retrospective application of an accounting standard update in 2015 whereby certain investments that are measured at fair value using the net asset value per share (or its equivalent) practical expedient are excluded from the fair value hierarchy.

Expected Cash Flows - The following table provides information about benefit payments expected to be paid by the pension plan for each of the following calendar years (in millions):

2016	$ 144
2017	$ 150
2018	$ 155
2019	$ 160
2020	$ 163
2021 - 2025	$ 865

Net Periodic (Income) Cost - The components of net periodic (income) cost for the plans is as follows:

	Pension Benefits			Postretirement Benefits		
	2015	2014	2013	**2015**	2014	2013
			(millions)			
Service cost	**$ 70**	$ 61	$ 72	$ 3	$ 3	$ 4
Interest cost	**97**	101	94	13	16	14
Expected return on plan assets	**(253)**	(241)	(238)	(1)	(1)	(1)
Amortization of prior service cost (benefit)	**1**	5	7	(3)	(3)	(2)
Amortization of losses	**—**	—	2	2	—	2
Special termination benefits	**—**	—	46	—	—	—
Net periodic (income) cost at NEE	**$ (85)**	$ (74)	$ (17)	**$ 14**	$ 15	$ 17
Net periodic (income) cost at FPL	**$ (55)**	$ (47)	$ (7)	**$ 11**	$ 11	$ 13

Other Comprehensive Income - The components of net periodic income (cost) recognized in OCI for the pension plan is as follows:

	2015	2014	2013
		(millions)	
Prior service benefit (net of $3 tax expense)	$ —	$ 4	$ —
Net gains (losses) (net of $27 and $29 tax benefit and $58 tax expense, respectively)	(44)	(45)	91
Amortization of prior service benefit	—	1	2
Total	$ (44)	$ (40)	$ 93

Regulatory Assets (Liabilities) - The components of net periodic (income) cost recognized during the year in regulatory assets (liabilities) for the pension plan is as follows:

	2015	2014
	(millions)	
Prior service benefit	$ —	$ (12)
Unrecognized losses	104	226
Amortization of prior service benefit	(1)	(3)
Total	$ 103	$ 211

The assumptions used to determine net periodic income for the pension plan are as follows:

	2015	2014	2013
Discount rate	3.95%	4.80%	4.00%
Salary increase	4.10%	4.00%	4.00%
Expected long-term rate of return[a][b]	7.35%	7.75%	7.75%

(a) In developing the expected long-term rate of return on assets assumption for its pension plan, NEE evaluated input, including other qualitative and quantitative factors, from its actuaries and consultants, as well as information available in the marketplace. NEE considered different models, capital market return assumptions and historical returns for a portfolio with an equity/bond asset mix similar to its pension fund. NEE also considered its pension fund's historical compounded returns.
(b) In 2015, an expected long-term rate of return of 7.75% is presented net of investment management fees.

Employee Contribution Plans - NEE offers employee retirement savings plans which allow eligible participants to contribute a percentage of qualified compensation through payroll deductions. NEE makes matching contributions to participants' accounts. Defined contribution expense pursuant to these plans was approximately $63 million, $59 million and $46 million for NEE ($40 million, $37 million and $30 million for FPL) for the years ended December 31, 2015, 2014 and 2013, respectively. See Note 11 - Employee Stock Ownership Plan.

3. Derivative Instruments

NEE and FPL use derivative instruments (primarily swaps, options, futures and forwards) to manage the commodity price risk inherent in the purchase and sale of fuel and electricity, as well as interest rate and foreign currency exchange rate risk associated primarily with outstanding and forecasted debt issuances and borrowings, and to optimize the value of NEER's power generation and gas infrastructure assets.

With respect to commodities related to NEE's competitive energy business, NEER employs risk management procedures to conduct its activities related to optimizing the value of its power generation and gas infrastructure assets, providing full energy and capacity requirements services primarily to distribution utilities, and engaging in power and gas marketing and trading activities to take advantage of expected future favorable price movements and changes in the expected volatility of prices in the energy markets. These risk management activities involve the use of derivative instruments executed within prescribed limits to manage the risk associated with fluctuating commodity prices. Transactions in derivative instruments are executed on recognized exchanges or via the over-the-counter (OTC) markets, depending on the most favorable credit terms and market execution factors. For NEER's power generation and gas infrastructure assets, derivative instruments are used to hedge the commodity price risk associated with the fuel requirements of the assets, where applicable, as well as to hedge all or a portion of the expected output of these assets. These hedges are designed to reduce the effect of adverse changes in the wholesale forward commodity markets associated with NEER's power generation and gas infrastructure assets. With regard to full energy and capacity requirements services, NEER is required to vary the quantity of energy and related services based on the load demands of the customers served. For this type of transaction, derivative instruments are used to hedge the anticipated electricity quantities required to serve these customers and reduce the effect of unfavorable changes in the forward energy markets. Additionally, NEER takes positions in the energy markets based on differences between actual forward market levels and management's view of fundamental market conditions, including supply/demand imbalances, changes in traditional flows of energy, changes in short- and long-term weather patterns and anticipated

regulatory and legislative outcomes. NEER uses derivative instruments to realize value from these market dislocations, subject to strict risk management limits around market, operational and credit exposure.

Derivative instruments, when required to be marked to market, are recorded on NEE's and FPL's consolidated balance sheets as either an asset or liability measured at fair value. At FPL, substantially all changes in the derivatives' fair value are deferred as a regulatory asset or liability until the contracts are settled, and, upon settlement, any gains or losses are passed through the fuel and purchased power cost recovery clause (fuel clause). For NEE's non-rate regulated operations, predominantly NEER, essentially all changes in the derivatives' fair value for power purchases and sales, fuel sales and trading activities are recognized on a net basis in operating revenues; fuel purchases used in the production of electricity are recognized in fuel, purchased power and interchange expense; and the equity method investees' related activity is recognized in equity in earnings of equity method investees in NEE's consolidated statements of income. Settlement gains and losses are included within the line items in the consolidated statements of income to which they relate. Transactions for which physical delivery is deemed not to have occurred are presented on a net basis in the consolidated statements of income. For commodity derivatives, NEE believes that, where offsetting positions exist at the same location for the same time, the transactions are considered to have been netted and therefore physical delivery has been deemed not to have occurred for financial reporting purposes. Settlements related to derivative instruments are primarily recognized in net cash provided by operating activities in NEE's and FPL's consolidated statements of cash flows.

While most of NEE's derivatives are entered into for the purpose of managing commodity price risk, optimizing the value of NEER's power generation and gas infrastructure assets, reducing the impact of volatility in interest rates on outstanding and forecasted debt issuances and borrowings and managing foreign currency exchange risk, hedge accounting is only applied where specific criteria are met and it is practicable to do so. In order to apply hedge accounting, the transaction must be designated as a hedge and it must be highly effective in offsetting the hedged risk. Additionally, for hedges of forecasted transactions, the forecasted transactions must be probable. For interest rate and foreign currency derivative instruments, generally NEE assesses a hedging instrument's effectiveness by using nonstatistical methods including dollar value comparisons of the change in the fair value of the derivative to the change in the fair value or cash flows of the hedged item. Hedge effectiveness is tested at the inception of the hedge and on at least a quarterly basis throughout its life. The effective portion of the gain or loss on a derivative instrument designated as a cash flow hedge is reported as a component of OCI and is reclassified into earnings in the period(s) during which the transaction being hedged affects earnings or when it becomes probable that a forecasted transaction being hedged would not occur. The ineffective portion of net unrealized gains (losses) on these hedges is reported in earnings in the current period. In April 2013, NEE discontinued hedge accounting for cash flow hedges related to interest rate swaps associated with the solar projects in Spain (see Note 14 - Spain Solar Projects). At December 31, 2015, NEE's AOCI included amounts related to interest rate cash flow hedges with expiration dates through October 2036 and foreign currency cash flow hedges with expiration dates through September 2030. Approximately $50 million of net losses included in AOCI at December 31, 2015 is expected to be reclassified into earnings within the next 12 months as principal and/or interest payments are made. Such amounts assume no change in interest rates, currency exchange rates or scheduled principal payments. In January 2016, NEE discontinued hedge accounting for its cash flow and fair value hedges related to interest rate and foreign currency derivative instruments.

Fair Value of Derivative Instruments - The tables below present NEE's and FPL's gross derivative positions at December 31, 2015 and December 31, 2014, as required by disclosure rules. However, the majority of the underlying contracts are subject to master netting agreements and generally would not be contractually settled on a gross basis. Therefore, the tables below also present the derivative positions on a net basis, which reflect the offsetting of positions of certain transactions within the portfolio, the contractual ability to settle contracts under master netting arrangements and the netting of margin cash collateral (see Note 4 - Recurring Fair Value Measurements for netting information), as well as the location of the net derivative position on the consolidated balance sheets.

(a) Reflects the netting of approximately $197 million in margin cash collateral received from counterparties.
(b) Reflects the netting of approximately $97 million in margin cash collateral received from counterparties.
(c) Reflects the netting of approximately $20 million in margin cash collateral paid to counterparties.
(d) Reflects the netting of approximately $10 million in margin cash collateral paid to counterparties.

At December 31, 2015 and 2014, NEE had approximately $27 million and $60 million (none at FPL), respectively, in margin cash collateral received from counterparties that was not offset against derivative assets in the above presentation. These amounts are included in current other liabilities on NEE's consolidated balance sheets. Additionally, at December 31, 2015 and 2014, NEE had approximately $116 million and $122 million (none at FPL), respectively, in margin cash collateral paid to counterparties that was not offset against derivative assets or liabilities in the above presentation. These amounts are included in current other assets on NEE's consolidated balance sheets.

Income Statement Impact of Derivative Instruments - Gains (losses) related to NEE's cash flow hedges are recorded in NEE's consolidated financial statements (none at FPL) as follows:

	Year Ended December 31, 2015			Year Ended December 31, 2014			Year Ended December 31, 2013		
	Interest Rate Contracts	**Foreign Currency Swaps**	**Total**	Interest Rate Contracts	Foreign Currency Swaps	Total	Interest Rate Contracts	Foreign Currency Swaps	Total
				(millions)					
Gains (losses) recognized in OCI	**$ (113)**	**$ (12)**	**$ (125)**	$ (132)	$ (89)	$ (221)	$ 150	$ (21)	$ 129
Losses reclassified from AOCI to net income	**$ (73)** [a]	**$ (15)** [b]	**$ (88)**	$ (77) [a]	$ (78) [b]	$ (155)	$ (61) [a]	$ (44) [b]	$ (105)

(a) Included in interest expense.
(b) For 2015, 2014 and 2013, losses of approximately $11 million, $8 million and $4 million, respectively, are included in interest expense and the balances are included in other - net.

For the years ended December 31, 2015, 2014 and 2013, NEE recorded gains (losses) of approximately $(4) million, $20 million and $(65) million, respectively, on fair value hedges which resulted in corresponding increases (decreases) in the related debt.

Gains (losses) related to NEE's derivatives not designated as hedging instruments are recorded in NEE's consolidated statements of income as follows:

	Years Ended December 31,		
	2015	2014	2013
		(millions)	
Commodity contracts:[a]			
Operating revenues	**$ 932**	$ 420	$ 76
Fuel, purchased power and interchange	**8**	1	—
Foreign currency swap - other - net	**—**	(1)	(72)
Interest rate contracts - interest expense	**8**	(64)	3
Total	**$ 948**	$ 356	$ 7

(a) For the years ended December 31, 2015, 2014 and 2013, FPL recorded gains (losses) of approximately $(326) million, $(289) million and $81 million, respectively, related to commodity contracts as regulatory liabilities (assets) on its consolidated balance sheets.

Notional Volumes of Derivative Instruments - The following table represents net notional volumes associated with derivative instruments that are required to be reported at fair value in NEE's and FPL's consolidated financial statements. The table includes significant volumes of transactions that have minimal exposure to commodity price changes because they are variably priced agreements. These volumes are only an indication of the commodity exposure that is managed through the use of derivatives. They do not represent net physical asset positions or non-derivative positions and their hedges, nor do they represent NEE's and FPL's net economic exposure, but only the net notional derivative positions that fully or partially hedge the related asset positions. NEE and FPL had derivative commodity contracts for the following net notional volumes:

Commodity Type	**December 31, 2015**				December 31, 2014			
	NEE		**FPL**		NEE		FPL	
				(millions)				
Power	**(112)**	**MWh[a]**	**—**		(73)	MWh[a]	—	
Natural gas	**1,321**	**MMBtu[b]**	**833**	**MMBtu[b]**	1,436	MMBtu[b]	845	MMBtu[b]
Oil	**(9)**	**barrels**	**—**		(11)	barrels	—	

(a) Megawatt-hours
(b) One million British thermal units

At December 31, 2015 and 2014, NEE had interest rate contracts with notional amounts totaling approximately $8.3 billion and $7.4 billion, respectively, and foreign currency swaps with notional amounts totaling $715 million and $661 million, respectively.

Credit-Risk-Related Contingent Features - Certain derivative instruments contain credit-risk-related contingent features including, among other things, the requirement to maintain an investment grade credit rating from specified credit rating agencies and certain financial ratios, as well as credit-related cross-default and material adverse change triggers. At December 31, 2015 and 2014, the aggregate fair value of NEE's derivative instruments with credit-risk-related contingent features that were in a liability position was approximately $2.2 billion ($224 million for FPL) and $2.7 billion ($369 million for FPL), respectively.

If the credit-risk-related contingent features underlying these agreements and other commodity-related contracts were triggered, certain subsidiaries of NEE, including FPL, could be required to post collateral or settle contracts according to contractual terms which generally allow netting of contracts in offsetting positions. Certain contracts contain multiple types of credit-related triggers. To the extent these contracts contain a credit ratings downgrade trigger, the maximum exposure is included in the following credit ratings collateral posting requirements. If FPL's and NEECH's credit ratings were downgraded to BBB/Baa2 (a two level downgrade for FPL and a one level downgrade for NEECH from the current lowest applicable rating), applicable NEE subsidiaries would be required to post collateral such that the total posted collateral would be approximately $250 million ($20 million at FPL) as of December 31, 2015 and $700 million ($130 million at FPL) as of December 31, 2014. If FPL's and NEECH's credit ratings were downgraded to below investment grade, applicable NEE subsidiaries would be required to post additional collateral such that the total posted collateral would be approximately $2.5 billion ($0.6 billion at FPL) and $2.8 billion ($0.7 billion at FPL) as of December 31, 2015 and 2014, respectively. Some contracts do not contain credit ratings downgrade triggers, but do contain provisions that require certain financial measures be maintained and/or have credit-related cross-default triggers. In the event these provisions were triggered, applicable NEE subsidiaries could be required to post additional collateral of up to approximately $660 million ($120 million at FPL) and $850 million ($200 million at FPL) as of December 31, 2015 and 2014, respectively.

Collateral related to derivatives may be posted in the form of cash or credit support in the normal course of business. At December 31, 2015, applicable NEE subsidiaries have posted approximately $123 million ($3 million at FPL) in the form of letters of credit which

could be applied toward the collateral requirements described above. At December 31, 2014, applicable NEE subsidiaries have posted approximately $20 million (none at FPL) in cash and $236 million (none at FPL), respectively, in the form of letters of credit which could be applied toward the collateral requirements described above. FPL and NEECH have credit facilities generally in excess of the collateral requirements described above that would be available to support, among other things, derivative activities. Under the terms of the credit facilities, maintenance of a specific credit rating is not a condition to drawing on these credit facilities, although there are other conditions to drawing on these credit facilities.

Additionally, some contracts contain certain adequate assurance provisions where a counterparty may demand additional collateral based on subjective events and/or conditions. Due to the subjective nature of these provisions, NEE and FPL are unable to determine an exact value for these items and they are not included in any of the quantitative disclosures above.

4. Fair Value Measurements

The fair value of assets and liabilities are determined using either unadjusted quoted prices in active markets (Level 1) or pricing inputs that are observable (Level 2) whenever that information is available and using unobservable inputs (Level 3) to estimate fair value only when relevant observable inputs are not available. NEE and FPL use several different valuation techniques to measure the fair value of assets and liabilities, relying primarily on the market approach of using prices and other market information for identical and/or comparable assets and liabilities for those assets and liabilities that are measured at fair value on a recurring basis. NEE's and FPL's assessment of the significance of any particular input to the fair value measurement requires judgment and may affect their placement within the fair value hierarchy levels. Non-performance risk, including the consideration of a credit valuation adjustment, is also considered in the determination of fair value for all assets and liabilities measured at fair value.

Cash Equivalents and Restricted Cash - NEE primarily holds investments in money market funds. The fair value of these funds is calculated using current market prices.

Special Use Funds and Other Investments - NEE and FPL hold primarily debt and equity securities directly, as well as indirectly through commingled funds. Substantially all directly held equity securities are valued at their quoted market prices. For directly held debt securities, multiple prices and price types are obtained from pricing vendors whenever possible, which enables cross-provider validations. A primary price source is identified based on asset type, class or issue of each security. Commingled funds, which are similar to mutual funds, are maintained by banks or investment companies and hold certain investments in accordance with a stated set of objectives. The fair value of commingled funds is primarily derived from the quoted prices in active markets of the underlying securities. Because the fund shares are offered to a limited group of investors, they are not considered to be traded in an active market.

Derivative Instruments - NEE and FPL measure the fair value of commodity contracts using prices observed on commodities exchanges and in the OTC markets, or through the use of industry-standard valuation techniques, such as option modeling or discounted cash flows techniques, incorporating both observable and unobservable valuation inputs. The resulting measurements are the best estimate of fair value as represented by the transfer of the asset or liability through an orderly transaction in the marketplace at the measurement date.

Most exchange-traded derivative assets and liabilities are valued directly using unadjusted quoted prices. For exchange-traded derivative assets and liabilities where the principal market is deemed to be inactive based on average daily volumes and open interest, the measurement is established using settlement prices from the exchanges, and therefore considered to be valued using other observable inputs.

NEE, through its subsidiaries, including FPL, also enters into OTC commodity contract derivatives. The majority of these contracts are transacted at liquid trading points, and the prices for these contracts are verified using quoted prices in active markets from exchanges, brokers or pricing services for similar contracts.

NEE, through NEER, also enters into full requirements contracts, which, in most cases, meet the definition of derivatives and are measured at fair value. These contracts typically have one or more inputs that are not observable and are significant to the valuation of the contract. In addition, certain exchange and non-exchange traded derivative options at NEE have one or more significant inputs that are not observable, and are valued using industry-standard option models.

In all cases where NEE and FPL use significant unobservable inputs for the valuation of a commodity contract, consideration is given to the assumptions that market participants would use in valuing the asset or liability. The primary input to the valuation models for commodity contracts is the forward commodity curve for the respective instruments. Other inputs include, but are not limited to, assumptions about market liquidity, volatility, correlation and contract duration as more fully described below in Significant Unobservable Inputs Used in Recurring Fair Value Measurements. In instances where the reference markets are deemed to be inactive or do not have transactions for a similar contract, the derivative assets and liabilities may be valued using significant other observable inputs and potentially significant unobservable inputs. In such instances, the valuation for these contracts is established using techniques including extrapolation from or interpolation between actively traded contracts, or estimated basis adjustments from liquid trading points. NEE and FPL regularly evaluate and validate the inputs used to determine fair value by a number of

methods, consisting of various market price verification procedures, including the use of pricing services and multiple broker quotes to support the market price of the various commodities. In all cases where there are assumptions and models used to generate inputs for valuing derivative assets and liabilities, the review and verification of the assumptions, models and changes to the models are undertaken by individuals that are independent of those responsible for estimating fair value.

NEE uses interest rate contracts and foreign currency swaps to mitigate and adjust interest rate and foreign currency exchange exposure related primarily to certain outstanding and forecasted debt issuances and borrowings when deemed appropriate based on market conditions or when required by financing agreements. NEE estimates the fair value of these derivatives using a discounted cash flows valuation technique based on the net amount of estimated future cash inflows and outflows related to the agreements.

Recurring Fair Value Measurements - NEE's and FPL's financial assets and liabilities and other fair value measurements made on a recurring basis by fair value hierarchy level are as follows:

	December 31, 2015				
	Level 1	Level 2	Level 3	Netting[a]	Total
			(millions)		
Assets:					
Cash equivalents and restricted cash:[b]					
NEE - equity securities	$ 312	$ —	$ —		$ 312

(d) See Note 3 - Fair Value of Derivative Instruments for a reconciliation of net derivatives to NEE's and FPL's consolidated balance sheets.

Significant Unobservable Inputs Used in Recurring Fair Value Measurements - The valuation of certain commodity contracts requires the use of significant unobservable inputs. All forward price, implied volatility, implied correlation and interest rate inputs used in the valuation of such contracts are directly based on third-party market data, such as broker quotes and exchange settlements, when that data is available. If third-party market data is not available, then industry standard methodologies are used to develop inputs that maximize the use of relevant observable inputs and minimize the use of unobservable inputs. Observable inputs, including some forward prices, implied volatilities and interest rates used for determining fair value are updated daily to reflect the best available market information. Unobservable inputs which are related to observable inputs, such as illiquid portions of forward price or volatility curves, are updated daily as well, using industry standard techniques such as interpolation and extrapolation, combining observable forward inputs supplemented by historical market and other relevant data. Other unobservable inputs, such as implied correlations, customer migration rates from full requirements contracts and some implied volatility curves, are modeled using proprietary models based on historical data and industry standard techniques.

All price, volatility, correlation and customer migration inputs used in valuation are subject to validation by the Trading Risk

Management group. The Trading Risk Management group performs a risk management function responsible for assessing credit, market and operational risk impact, reviewing valuation methodology and modeling, confirming transactions, monitoring approval processes and developing and monitoring trading limits. The Trading Risk Management group is separate from the transacting group. For markets where independent third-party data is readily available, validation is conducted daily by directly reviewing this market data against inputs utilized by the transacting group, and indirectly by critically reviewing daily risk reports. For markets where independent third-party data is not readily available, additional analytical reviews are performed on at least a quarterly basis. These analytical reviews are designed to ensure that all price and volatility curves used for fair valuing transactions are adequately validated each quarter, and are reviewed and approved by the Trading Risk Management group. In addition, other valuation assumptions such as implied correlations and customer migration rates are reviewed and approved by the Trading Risk Management group on a periodic basis. Newly created models used in the valuation process are also subject to testing and approval by the Trading Risk Management group prior to use and established models are reviewed annually, or more often as needed, by the Trading Risk Management group.

On a monthly basis, the Exposure Management Committee (EMC), which is comprised of certain members of senior management, meets with representatives from the Trading Risk Management group and the transacting group to discuss NEE's and FPL's energy risk profile and operations, to review risk reports and to discuss fair value issues as necessary. The EMC develops guidelines required for an appropriate risk management control infrastructure, which includes implementation and monitoring of compliance with Trading Risk Management policy. The EMC executes its risk management responsibilities through direct oversight and delegation of its responsibilities to the Trading Risk Management group, as well as to other corporate and business unit personnel.

The significant unobservable inputs used in the valuation of NEE's commodity contracts categorized as Level 3 of the fair value hierarchy at December 31, 2015 are as follows:

Transaction Type	Fair Value at December 31, 2015		Valuation Technique(s)	Significant Unobservable Inputs	Range
	Assets	Liabilities			
	(millions)				
Forward contracts - power	$ 636	$ 252	Discounted cash flow	Forward price (per MWh)	$6 — $113
Forward contracts - gas	24	25	Discounted cash flow	Forward price (per MMBtu)	$1 — $6
Forward contracts - other commodity related	16	6	Discounted cash flow	Forward price (various)	$(18) — $55
Options - power	68	58	Option models	Implied correlations	(5)% — 99%
				Implied volatilities	1% — 308%
Options - primarily gas	105	164	Option models	Implied correlations	(5)% — 99%
				Implied volatilities	1% — 195%
Full requirements and unit contingent contracts	330	35	Discounted cash flow	Forward price (per MWh)	$(20) — $239
				Customer migration rate[a]	—% — 20%
Total	$ 1,179	$ 540			

(a) Applies only to full requirements contracts.

The sensitivity of NEE's fair value measurements to increases (decreases) in the significant unobservable inputs is as follows:

Significant Unobservable Input	Position	Impact on Fair Value Measurement
Forward price	Purchase power/gas	Increase (decrease)
	Sell power/gas	Decrease (increase)
Implied correlations	Purchase option	Decrease (increase)
	Sell option	Increase (decrease)
Implied volatilities	Purchase option	Increase (decrease)
	Sell option	Decrease (increase)
Customer migration rate	Sell power[a]	Decrease (increase)

(a) Assumes the contract is in a gain position.

In addition, the fair value measurement of interest rate swap liabilities related to the solar projects in Spain of approximately $101 million at December 31, 2015 includes a significant credit valuation adjustment. The credit valuation adjustment, considered an unobservable input, reflects management's assessment of non-performance risk of the subsidiaries related to the solar projects in Spain that are party to the swap agreements.

The reconciliation of changes in the fair value of derivatives that are based on significant unobservable inputs is as follows:

	Years Ended December 31,					
	2015		2014		2013	
	NEE	FPL	NEE	FPL	NEE	FPL
	(millions)					
Fair value of net derivatives based on significant unobservable inputs at December 31 of prior year	$ 622	$ 5	$ 622	$ —	$ 566	$ 2
Realized and unrealized gains (losses):						
Included in earnings[a]	451	—	(77)	—	299	—
Included in other comprehensive income	11	—	18	—	—	—
Included in regulatory assets and liabilities	3	3	7	7	—	—
Purchases	180	—	55	—	101	—
Settlements	(473)	(8)	194	(2)	(55)	(2)
Issuances	(202)	—	(122)	—	(173)	—
Transfers in[b]	(13)	—	80	—	(120)	—
Transfers out[b]	(41)	—	(155)	—	4	—
Fair value of net derivatives based on significant unobservable inputs at December 31	$ 538	$ —	$ 622	$ 5	$ 622	$ —
The amount of gains (losses) for the period included in earnings attributable to the change in unrealized gains (losses) relating to derivatives still held at the reporting date[c]	$ 277	$ —	$ 248	$ —	$ 329	$ —

(a) For the year ended December 31, 2015, $462 million of realized and unrealized gains are reflected in the consolidated statements of income in operating revenues and the balance is primarily reflected in interest expense. For the year December 31, 2014, $79 million of realized and unrealized losses are reflected in the consolidated statements of income in interest expense and the balance is primarily reflected in operating revenues. For the year ended December 31, 2013, $302 million of realized and unrealized gains are reflected in the consolidated statements of income in operating revenues and the balance is primarily reflected in interest expense.

(b) Transfers into Level 3 were a result of decreased observability of market data and, in 2013, a significant credit valuation adjustment. Transfers from Level 3 to Level 2 were a result of increased observability of market data. NEE's and FPL's policy is to recognize all transfers at the beginning of the reporting period.

(c) For the years ended December 31, 2015, 2014, and 2013, $289 million, $328 million, and $330 million of unrealized gains are reflected in the consolidated statements of income in operating revenues and the balance is reflected in interest expense.

Contingent Consideration - NEE recorded a liability related to a contingent holdback as part of the acquisition of seven long-term contracted natural gas pipeline assets located in Texas. See Note 8.

Nonrecurring Fair Value Measurements - NEE tests long-lived assets for recoverability whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. In February 2013, the Spanish government enacted a new law that made further changes to the economic framework of renewable energy projects including, among other things, changes that negatively affect the projected economics of the 99.8 MW of solar thermal facilities that affiliates of NEER were constructing in Spain (Spain solar projects) (see Note 14 - Spain Solar Projects). Due to the February 2013 change in law, NEER performed a recoverability analysis, considering, among other things, working with lenders to restructure the financing agreements, abandoning the projects or selling the projects, and concluded that the undiscounted cash flows of the Spain solar projects were less than the carrying value of the projects. Accordingly, NEER performed a fair value analysis based on the income approach to determine the amount of the impairment. Based on the fair value analysis, property, plant and equipment with a carrying amount of approximately $800 million were written down to their estimated fair value of $500 million as of March 31, 2013, resulting in an impairment of $300 million (which is recorded as a separate line item in NEE's consolidated statements of income for the year ended December 31, 2013) and other related charges ($342 million after-tax, see Note 5).

The estimate of the fair value was based on the discounted cash flows which were determined using a market participant view of the Spain solar projects upon completion and final commissioning of the projects. As part of the valuation, NEER used observable inputs where available, including the revised renewable energy pricing under the February 2013 change in law. Significant unobservable inputs (Level 3), including forecasts of generation, estimates of tariff escalation rates and estimated costs of debt and equity capital, were also used in the estimation of fair value. In addition, NEER made certain assumptions regarding the projected capital and maintenance expenditures based on the estimated costs to complete the Spain solar projects and ongoing capital and maintenance expenditures. An increase in the revenue and generation forecasts, a decrease in the projected capital and maintenance expenditures or a decrease in the weighted-average cost of capital each would result in an increased fair market value. Changes in the opposite direction of those unobservable inputs would result in a decreased fair market value. See Note 14 - Spain Solar Projects for a discussion of additional developments that could potentially impact the Spain solar projects.

In 2013, NEER initiated a plan and received internal authorization to pursue the sale of its ownership interests in oil-fired generation plants located in Maine (Maine fossil) with a total generating capacity of 796 MW. In connection with the decision to sell Maine fossil, a loss of approximately $67 million ($43 million after-tax) was originally reflected in net gain from discontinued operations, net of income taxes in NEE's consolidated statements of income for the year ended December 31, 2013. The fair value measurement (Level 3) was based on the estimated sales price less the estimated costs to sell. The estimated sales price was estimated using

an income approach based primarily on capacity revenue forecasts. In 2014, NEER decided not to pursue the sale of Maine fossil due to the divergence between the achievable sales price and management's view of the assets' value, which increased as a result of significant market changes. Accordingly, the Maine fossil assets were written-up to management's current estimate of fair value resulting in a gain of approximately $21 million ($12 million after-tax). The fair value measurement (Level 3) was estimated using an income approach based primarily on the updated capacity revenue forecasts. Based on NEER's decision to retain Maine fossil, the $67 million loss recorded during the year ended December 31, 2013 was reclassified from discontinued operations to income from continuing operations and together with the $21 million gain recorded during the year ended December 31, 2014 are included as a separate line item in NEE's consolidated statements of income.

Fair Value of Financial Instruments Recorded at the Carrying Amount - The carrying amounts of cash equivalents, commercial paper and notes payable approximate their fair values. The carrying amounts and estimated fair values of other financial instruments, excluding those recorded at fair value and disclosed above in Recurring Fair Value Measurements, are as follows:

	December 31, 2015		December 31, 2014	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
	(millions)			
NEE:				
Special use funds[a]	$ 675	$ 675	$ 567	$ 567
Other investments - primarily notes receivable	$ 512	$ 722 [b]	$ 525	$ 679 [b]
Long-term debt, including current maturities	$ 28,897 [c]	$ 30,412 [d]	$ 27,552	$ 30,013 [d]
FPL:				
Special use funds[a]	$ 528	$ 528	$ 395	$ 395
Long-term debt, including current maturities	$ 10,020	$ 11,028 [d]	$ 9,388	$ 11,020 [d]

(a) Primarily represents investments accounted for under the equity method and loans not measured at fair value on a recurring basis.
(b) Primarily classified as held to maturity. Fair values are primarily estimated using a discounted cash flow valuation technique based on certain observable yield curves and indices considering the credit profile of the borrower (Level 3). Notes receivable bear interest primarily at fixed rates and mature by 2029. Notes receivable are considered impaired and placed in non-accrual status when it becomes probable that all amounts due cannot be collected in accordance with the contractual terms of the agreement. The assessment to place notes receivable in non-accrual status considers various credit indicators, such as credit ratings and market-related information. As of December 31, 2015 and 2014, NEE had no notes receivable reported in non-accrual status.
(c) Excludes debt totaling $938 million reflected in liabilities associated with assets held for sale on NEE's consolidated balance sheet for which the carrying amount approximates fair value. See Note 1 - Assets and Liabilities Associated with Assets Held for Sale.
(d) As of December 31, 2015 and 2014, for NEE, approximately $18,031 million and $19,973 million, respectively, is estimated using quoted market prices for the same or similar issues (Level 2); the balance is estimated using a discounted cash flow valuation technique, considering the current credit spread of the debtor (Level 3). For FPL, primarily estimated using quoted market prices for the same or similar issues (Level 2).

Special Use Funds - The special use funds noted above and those carried at fair value (see Recurring Fair Value Measurements above) consist of FPL's storm fund assets of approximately $74 million and $75 million at December 31, 2015 and 2014, respectively and NEE's and FPL's nuclear decommissioning fund assets of $5,064 million and $5,091 million at December 31, 2015 and 2014 ($3,430 million and $3,449 million, respectively, for FPL). The investments held in the special use funds consist of equity and debt securities which are primarily classified as available for sale and carried at estimated fair value. The amortized cost of debt and equity securities is approximately $1,823 million and $1,505 million, respectively, at December 31, 2015 and $1,906 million and $1,366 million, respectively, at December 31, 2014 ($1,409 million and $732 million, respectively, at December 31, 2015 and $1,519 million and $664 million, respectively, at December 31, 2014 for FPL). For FPL's special use funds, consistent with regulatory treatment, changes in fair value, including any other than temporary impairment losses, result in a corresponding adjustment to the related regulatory liability accounts. For NEE's non-rate regulated operations, changes in fair value result in a corresponding adjustment to OCI, except for unrealized losses associated with marketable securities considered to be other than temporary, including any credit losses, which are recognized as other than temporary impairment losses on securities held in nuclear decommissioning funds in NEE's consolidated statements of income. Debt securities included in the nuclear decommissioning funds have a weighted-average maturity at December 31, 2015 of approximately eight years at both NEE and FPL. FPL's storm fund primarily consists of debt securities with a weighted-average maturity at December 31, 2015 of approximately three years. The cost of securities sold is determined using the specific identification method.

Realized gains and losses and proceeds from the sale or maturity of available for sale securities are as follows:

	NEE			FPL		
	Years Ended December 31,			Years Ended December 31,		
	2015	2014	2013	**2015**	2014	2013
	(millions)					
Realized gains	**$ 194**	$ 211	$ 246	**$ 70**	$ 120	$ 182
Realized losses	**$ 87**	$ 115	$ 88	**$ 43**	$ 94	$ 59
Proceeds from sale or maturity of securities	**$ 4,643**	$ 4,092	$ 4,190	**$ 3,724**	$ 3,349	$ 3,342

The unrealized gains on available for sale securities are as follows:

	NEE		FPL	
	December 31,		December 31,	
	2015	2014	**2015**	2014
	(millions)			
Equity securities	**$ 1,166**	$ 1,267	**$ 863**	$ 896
Debt securities	**$ 17**	$ 66	**$ 14**	$ 54

The unrealized losses on available for sale debt securities and the fair value of available for sale debt securities in an unrealized loss position are as follows:

	NEE		FPL	
	December 31,		December 31,	
	2015	2014	**2015**	2014
	(millions)			
Unrealized losses[a]	**$ 51**	$ 7	**$ 45**	$ 5
Fair value	**$ 1,129**	$ 542	**$ 861**	$ 434

(a) Unrealized losses on available for sale debt securities in an unrealized loss position for greater than twelve months at December 31, 2015 and 2014 were not material to NEE or FPL.

Regulations issued by the FERC and the NRC provide general risk management guidelines to protect nuclear decommissioning funds and to allow such funds to earn a reasonable return. The FERC regulations prohibit, among other investments, investments in any securities of NEE or its subsidiaries, affiliates or associates, excluding investments tied to market indices or mutual funds. Similar restrictions applicable to the decommissioning funds for NEER's nuclear plants are included in the NRC operating licenses for those facilities or in NRC regulations applicable to NRC licensees not in cost-of-service environments. With respect to the decommissioning fund for Seabrook, decommissioning fund contributions and withdrawals are also regulated by the NDFC pursuant to New Hampshire law.

The nuclear decommissioning reserve funds are managed by investment managers who must comply with the guidelines of NEE and FPL and the rules of the applicable regulatory authorities. The funds' assets are invested giving consideration to taxes, liquidity, risk, diversification and other prudent investment objectives.

Financial Instruments Accounting Standard Update - In January 2016, the FASB issued an accounting standard update which modifies current guidance for financial instruments. The standard requires that equity investments (except investments accounted for under the equity method and investments that are consolidated) be measured at fair value with changes in fair value recognized in net income and provides an option for those equity investments that do not have readily determinable fair values to be measured at cost minus impairment (plus or minus changes resulting from observable price changes). The standard also makes certain changes to presentation and disclosure requirements of financial instruments. The standard is effective for NEE and FPL beginning January 1, 2018 and will be applied retrospectively with the cumulative effect recognized as of the date of initial application. NEE and FPL are currently evaluating the effect the adoption of this standard will have, if any, on their consolidated financial statements.

5. Income Taxes

The components of income taxes are as follows:

	NEE			FPL		
	Years Ended December 31,			Years Ended December 31,		
	2015	2014	2013	**2015**	2014	2013
	(millions)					
Federal:						
Current	**$ 10**	$ —	$ (145)	**$ 423**	$ 240	$ 174
Deferred	**1,194**	1,077	853	**399**	542	540
Total federal	**1,204**	1,077	708	**822**	782	714
State:

Net deferred income taxes	**$ 9,534**	$ 8,270	**$ 7,730**	$ 6,874

(a) Amount relates to a valuation allowance related to the Spain solar projects, deferred state tax credits and state operating loss carryforwards.

Deferred tax assets and liabilities are included on the consolidated balance sheets as follows:

	NEE		FPL	
	December 31,		December 31,	
	2015	2014	**2015**	2014
	(millions)			
Deferred income taxes - current assets	**$ —** [a]	$ 739	**$ —** [a]	$ —
Noncurrent other assets	**293**	264	**—**	—
Other current liabilities	**—** [a]	(12)	**—** [a]	(39)
Deferred income taxes - noncurrent liabilities	**(9,827)**	(9,261)	**(7,730)**	(6,835)
Net deferred income taxes	**$ (9,534)**	$ (8,270)	**$ (7,730)**	$ (6,874)

(a) Effective December 31, 2015, all deferred taxes are classified as noncurrent. See Note 1 - Income Taxes.

The components of NEE's deferred tax assets relating to net operating loss carryforwards and tax credit carryforwards at December 31, 2015 are as follows:

	Amount		Expiration Dates
	(millions)		
Net operating loss carryforwards:			
Federal	$ 361		2026-2035
State	153		2016-2035
Foreign	90	(a)	2017-2024
Net operating loss carryforwards	$ 604		
Tax credit carryforwards:			
Federal	$ 2,585		2022-2035
State	331	(b)	2016-2037
Tax credit carryforwards	$ 2,916		

(a) Includes $89 million of net operating loss carryforwards with an indefinite expiration period.
(b) Includes $158 million of ITC carryforwards with an indefinite expiration period.

6. Discontinued Operations

In 2013, a subsidiary of NEER completed the sale of its ownership interest in a portfolio of hydropower generation plants and related assets with a total generating capacity of 351 MW located in Maine and New Hampshire. The sales price primarily included the assumption by the buyer of $700 million in related debt. In connection with the sale, a gain of approximately $372 million ($231 million after-tax) is reflected in gain from discontinued operations, net of income taxes in NEE's consolidated statements of income for the year ended December 31, 2013. The operations of the hydropower generation plants, exclusive of the gain, were not material to NEE's consolidated statements of income for the year ended December 31, 2013.

See Note 4 - Nonrecurring Fair Value Measurements for a discussion of the decision not to pursue the sale of Maine fossil and the related financial statement impacts.

7. Jointly-Owned Electric Plants

Certain NEE subsidiaries own undivided interests in the jointly-owned facilities described below, and are entitled to a proportionate share of the output from those facilities. The subsidiaries are responsible for their share of the operating costs, as well as providing their own financing. Accordingly, each subsidiary includes its proportionate share of the facilities and related revenues and expenses in the appropriate balance sheet and statement of income captions. NEE's and FPL's respective shares of direct expenses for these facilities are included in fuel, purchased power and interchange expense, O&M expenses, depreciation and amortization expense and taxes other than income taxes and other in NEE's and FPL's consolidated statements of income.

NEE's and FPL's proportionate ownership interest in jointly-owned facilities is as follows:

	December 31, 2015			
	Ownership Interest	Gross Investment(a)	Accumulated Depreciation(a)	Construction Work in Progress
		(millions)		
FPL:				
St. Lucie Unit No. 2	85%	$ 2,190	$ 777	$ 23
St. Johns River Power Park units and coal terminal	20%	$ 398	$ 207	$ 2
Scherer Unit No. 4	76%	$ 1,130	$ 378	$ —
NEER:				
Duane Arnold	70%	$ 435	$ 126	$ 24
Seabrook	88.23%	$ 1,111	$ 239	$ 67
Wyman Station Unit No. 4	84.35%	$ 74	$ 51	$ —
Corporate and Other:				
Transmission substation assets located in Seabrook, New Hampshire	88.23%	$ 73	$ 19	$ 3

(a) Excludes nuclear fuel.

8. Texas Pipeline Business Acquisition

On October 1, 2015, a subsidiary of NEP acquired 100% of the membership interests in NET Holdings Management, LLC (Texas pipeline business), a developer, owner and operator of a portfolio of seven long-term contracted natural gas pipeline assets located in Texas (Texas pipelines). One of the acquired pipelines is subject to a 10% noncontrolling interest. The aggregate purchase price of approximately $2 billion included approximately $934 million in cash consideration and the assumption of approximately $706 million in existing debt of the Texas pipeline business and its subsidiaries at closing and excluded post-closing working capital adjustments of approximately $2 million. The purchase price is subject to (i) a $200 million holdback payable, in whole or in part, upon satisfaction of financial performance and capital expenditure thresholds relating to planned expansion projects (contingent holdback) and (ii) a $200 million holdback retained to satisfy any indemnification obligations of the sellers through April 2017. The $200 million indemnity holdback may be reduced by up to $10 million depending on certain post-closing employee retention thresholds. If successful, NEP may spend up to an additional $100 million of capital expenditures for the planned expansion projects, bringing the total transaction size of the acquisition to approximately $2.1 billion. NEP incurred approximately $13 million in acquisition-related costs during the year ended December 31, 2015, which are reflected in O&M expenses in NEE's consolidated statements of income.

Under the acquisition method, the purchase price was allocated to the assets acquired and liabilities assumed on October 1, 2015 based on their estimated fair value. All fair value measurements of assets acquired and liabilities assumed, including the noncontrolling interest, were based on significant estimates and assumptions, including Level 3 inputs, which require judgment. Estimates and assumptions include the projected timing and amount of future cash flows, discount rates reflecting risk inherent in future cash flows and future market prices. The excess of the purchase price over the estimated fair value of assets acquired and liabilities assumed was recognized as goodwill at the acquisition date. The goodwill arising from the acquisition consists largely of growth opportunities from the Texas pipeline business. Upon full settlement of the contingent holdback, all of the goodwill is expected to be deductible for income tax purposes over a 15 year period. A liability of approximately $186 million was recognized as of the acquisition date for each of the contingent holdback and the indemnity holdback, reflecting the fair value of the expected future payments. NEP determined this fair value measurement based on management's probability assessment. The significant inputs and assumptions used in the fair value measurement included the estimated probability of executing contracts related to financial performance and capital expenditure thresholds as well as the appropriate discount rate.

The valuation of the acquired net assets is subject to change as additional information related to the estimates is obtained during the measurement period. The primary areas of the purchase price allocation that are not yet finalized relate to identifiable intangible assets and residual goodwill.

The following table summarizes the estimated fair value of assets acquired and liabilities assumed for the acquisition of the Texas pipeline business:

	Amounts Recognized as of October 1, 2015 (millions)
Assets	
Property, plant and equipment	$ 806
Cash	1
Other receivables and current other assets	21
Noncurrent other assets (other intangible assets, see Note 1 - Goodwill and Other Intangible Assets)	720
Noncurrent other assets (goodwill, see Note 1 - Goodwill and Other Intangible Assets)	622
Total assets	$ 2,170
Liabilities	
Long-term debt, including current portion	$ 706
Accounts payable and current other liabilities	46
Noncurrent other liabilities, primarily acquisition holdbacks	415
Total liabilities	1,167
Less noncontrolling interest at fair value	69
Total cash consideration	$ 934

9. Variable Interest Entities (VIEs)

As of December 31, 2015, NEE has twenty-four VIEs which it consolidates and has interests in certain other VIEs which it does not consolidate.

FPL - FPL is considered the primary beneficiary of, and therefore consolidates, a VIE that is a wholly owned bankruptcy remote special purpose subsidiary that it formed in 2007 for the sole purpose of issuing storm-recovery bonds pursuant to the securitization provisions of the Florida Statutes and a financing order of the FPSC. FPL is considered the primary beneficiary because FPL has the power to direct the significant activities of the VIE, and its equity investment, which is subordinate to the bondholder's interest in the VIE, is at risk. Storm restoration costs incurred by FPL during 2005 and 2004 exceeded the amount in FPL's funded storm and property insurance reserve, resulting in a storm reserve deficiency. In 2007, the VIE issued $652 million aggregate principal amount of senior secured bonds (storm-recovery bonds), primarily for the after-tax equivalent of the total of FPL's unrecovered balance of the 2004 storm restoration costs, the 2005 storm restoration costs and to reestablish FPL's storm and property insurance reserve. In connection with this financing, net proceeds, after debt issuance costs, to the VIE (approximately $644 million) were used to acquire the storm-recovery property, which includes the right to impose, collect and receive a storm-recovery charge from all customers receiving electric transmission or distribution service from FPL under rate schedules approved by the FPSC or under special contracts, certain other rights and interests that arise under the financing order issued by the FPSC and certain other collateral pledged by the VIE that issued the bonds. The storm-recovery bonds are payable only from and are secured by the storm-recovery property. The bondholders have no recourse to the general credit of FPL. The assets of the VIE were approximately $230 million and $279 million at December 31, 2015 and 2014, respectively, and consisted primarily of storm-recovery property, which are included in securitized storm-recovery costs on NEE's and FPL's consolidated balance sheets. The liabilities of the VIE were approximately $278 million and $338 million at December 31, 2015 and 2014, respectively, and consisted primarily of storm-recovery bonds, which are included in long-term debt on NEE's and FPL's consolidated balance sheets.

FPL entered into a purchased power agreement effective in 1995 with a 330 MW coal-fired facility to purchase substantially all of the facility's capacity and electrical output over a substantial portion of its estimated useful life. The facility is considered a VIE because FPL absorbs a portion of the facility's variability related to changes in the market price of coal through the price it pays per MWh (energy payment). Since FPL does not control the most significant activities of the facility, including operations and maintenance, FPL is not the primary beneficiary and does not consolidate this VIE. The energy payments paid by FPL will fluctuate as coal prices change. This fluctuation does not expose FPL to losses since the energy payments paid by FPL to the facility are recovered through the fuel clause as approved by the FPSC.

NEER - NEE consolidates twenty-three NEER VIEs. NEER is considered the primary beneficiary of these VIEs since NEER controls the most significant activities of these VIEs, including operations and maintenance, as well as construction, and through its equity ownership has the obligation to absorb expected losses of these VIEs.

A NEER VIE consolidates two entities which own and operate natural gas/oil electric generation facilities with the capability of producing 110 MW. This VIE sells its electric output under power sales contracts to a third party, with expiration dates in 2018 and 2020. The power sales contracts provide the offtaker the ability to dispatch the facilities and require the offtaker to absorb the cost of fuel. This VIE uses third-party debt and equity to finance its operations. The debt is secured by liens against the generation facilities and the other assets of these entities. The debt holders have no recourse to the general credit of NEER for the repayment of debt. The assets and liabilities of the VIE were approximately $84 million and $47 million, respectively, at December 31, 2015 and $85 million and $55 million, respectively, at December 31, 2014, and consisted primarily of property, plant and equipment and long-term debt.

Two indirect subsidiaries of NEER each contributed, to a NEP subsidiary, an approximately 50% ownership interest in three entities which own solar PV facilities that, upon completion of construction, are expected to have a total generating capacity of 277 MW, of which approximately 153 MW have been placed in service as of December 31, 2015. Each of the two indirect subsidiaries of NEER is considered a VIE since it has insufficient equity at risk, and is consolidated by NEER. The VIEs use third-party debt and equity to finance a portion of development and construction activities and require subordinated financing from NEER to complete the facility under construction. These VIEs will sell their electric output to third parties under power sales contracts with expiration dates in 2035 and 2036. The debt balances are secured by liens against the assets of the entities. The debt holders have no recourse to the general credit of NEER. The assets and liabilities of these VIEs were approximately $657 million and $626 million, respectively, at December 31, 2015, and consisted primarily of property, plant and equipment and long-term debt.

The other twenty NEER VIEs consolidate several entities which own and operate wind electric generation facilities with the capability of producing a total of 5,272 MW. These VIEs sell their electric output either under power sales contracts to third parties with expiration dates ranging from 2018 through 2041 or in the spot market. The VIEs use third-party debt and/or equity to finance their operations. Certain investors that hold no equity interest in the VIEs hold differential membership interests, which give them the right to receive a portion of the economic attributes of the generation facilities, including certain tax attributes. The debt is secured by liens against the generation facilities and the other assets of these entities or by pledges of NEER's ownership interest in these entities. The debt holders have no recourse to the general credit of NEER for the repayment of debt. The assets and liabilities of these VIEs totaled approximately $7.6 billion and $5.0 billion, respectively, at December 31, 2015. Sixteen of the twenty were VIEs at December 31, 2014 and were consolidated; the assets and liabilities of those VIEs totaled approximately $6.6 billion and $4.1 billion, respectively, at December 31, 2014. At December 31, 2015 and 2014, the assets and liabilities of the VIEs consisted primarily of property, plant and equipment, deferral related to differential membership interests and long-term debt.

Other - As of December 31, 2015 and 2014, several NEE subsidiaries have investments totaling approximately $602 million ($476 million at FPL) and $716 million ($606 million at FPL), respectively, in certain special purpose entities, which consisted primarily of investments in mortgage-backed securities. These investments are included in special use funds and other investments on NEE's consolidated balance sheets and in special use funds on FPL's consolidated balance sheets. As of December 31, 2015, NEE subsidiaries, including FPL, are not the primary beneficiary and therefore do not consolidate any of these entities because they do not control any of the ongoing activities of these entities, were not involved in the initial design of these entities and do not have a controlling financial interest in these entities.

10. Investments in Partnerships and Joint Ventures

Certain subsidiaries of NEE, primarily NEER, have noncontrolling non-majority owned interests in various partnerships and joint ventures, essentially all of which own electric generation facilities. At December 31, 2015 and 2014, NEE's investments in partnerships and joint ventures totaled approximately $1,063 million and $663 million, respectively, which are included in other investments on NEE's consolidated balance sheets. NEER's interest in these partnerships and joint ventures range from approximately 29% to 50%. At December 31, 2015 and 2014, the principal entities included in NEER's investments in partnerships and joint ventures were Desert Sunlight Investment Holdings, LLC, and Northeast Energy, LP, and in 2015 also included Sabal Trail Transmission, LLC and Cedar Point II Wind, LP.

Summarized combined information for these principal entities is as follows:

	2015	2014
	(millions)	
Net income	$ 213	$ 171
Total assets	$ 3,339	$ 2,636
Total liabilities	$ 1,307	$ 1,645
Partners'/members' equity	$ 2,032	$ 991
NEER's share of underlying equity in the principal entities	$ 874	$ 495
Difference between investment carrying amount and underlying equity in net assets[a]	(3)	(4)
NEER's investment carrying amount for the principal entities	$ 871	$ 491

(a) The majority of the difference between the investment carrying amount and the underlying equity in net assets is being amortized over the remaining life of the investee's assets.

In 2004, a trust created by NEE sold $300 million of 5 7/8% preferred trust securities to the public and $9 million of common trust securities to NEE. The trust is an unconsolidated 100%-owned finance subsidiary. The proceeds from the sale of the preferred and common trust securities were used to buy 5 7/8% junior subordinated debentures maturing in March 2044 from NEECH. NEE has fully and unconditionally guaranteed the preferred trust securities and the junior subordinated debentures.

11. Common Shareholders' Equity

Earnings Per Share - The reconciliation of NEE's basic and diluted earnings per share attributable to NEE from continuing operations is as follows:

	Years Ended December 31,		
	2015	2014	2013
	(millions, except per share amounts)		
Numerator - income from continuing operations attributable to NEE[a]	$ 2,752	$ 2,465	$ 1,677
Denominator:			
Weighted-average number of common shares outstanding - basic	450.5	434.4	424.2
Equity units, performance share awards, options, forward sale agreements and restricted stock[b]	3.5	5.7	2.8
Weighted-average number of common shares outstanding - assuming dilution	454.0	440.1	427.0
Earnings per share attributable to NEE from continuing operations:			
Basic	$ 6.11	$ 5.67	$ 3.95
Assuming dilution	$ 6.06	$ 5.60	$ 3.93

(a) Calculated as income from continuing operations less net income attributable to noncontrolling interests from NEE's consolidated statements of income.
(b) Calculated using the treasury stock method. Performance share awards are included in diluted weighted-average number of common shares outstanding based upon what would be issued if the end of the reporting period was the end of the term of the award.

Common shares issuable pursuant to equity units, the forward sale agreement described below, stock options and performance share awards and restricted stock which were not included in the denominator above due to their antidilutive effect were approximately 3.5 million, 2.6 million and 7.1 million for the years ended December 31, 2015, 2014 and 2013, respectively.

Issuance of Common Stock and Forward Sale Agreement - In November 2013, NEE sold 4.5 million shares of its common stock at a price of $88.03 per share, and a forward counterparty borrowed and sold 6.6 million shares of NEE's common stock in connection with a forward sale agreement. In December 2014, NEE physically settled the forward sale agreement by delivering 6.6 million shares of its common stock to the forward counterparty in exchange for cash proceeds of approximately $552 million. The forward sale price used to determine the cash proceeds received by NEE was calculated based on the initial forward sale price of $88.03 per share less certain adjustments as specified in the forward sale agreement. Prior to the settlement date, the forward sale agreement had a dilutive effect on NEE's earnings per share when the average market price per share of NEE's common stock was above the adjusted forward sale price per share.

Common Stock Dividend Restrictions - NEE's charter does not limit the dividends that may be paid on its common stock. FPL's mortgage securing FPL's first mortgage bonds contains provisions which, under certain conditions, restrict the payment of dividends and other distributions to NEE. These restrictions do not currently limit FPL's ability to pay dividends to NEE.

Employee Stock Ownership Plan - The employee retirement savings plans of NEE include a leveraged ESOP feature. Shares of common stock held by the trust for the employee retirement savings plans (Trust) are used to provide all or a portion of the employers' matching contributions. Dividends received on all shares, along with cash contributions from the employers, are used to pay principal and interest on an ESOP loan held by a subsidiary of NEECH. Dividends on shares allocated to employee accounts and used by the Trust for debt service are replaced with shares of common stock, at prevailing market prices, in an equivalent amount. For purposes of computing basic and fully diluted earnings per share, ESOP shares that have been committed to be released are considered outstanding.

ESOP-related compensation expense was approximately $63 million, $59 million and $46 million in 2015, 2014 and 2013, respectively. The related share release was based on the fair value of shares allocated to employee accounts during the period. Interest income on the ESOP loan is eliminated in consolidation. ESOP-related unearned compensation included as a reduction of common shareholders' equity at December 31, 2015 was approximately $1 million, representing unallocated shares at the original issue price. The fair value of the ESOP-related unearned compensation account using the closing price of NEE common stock at December 31, 2015 was approximately $11 million.

Stock-Based Compensation - Net income for the years ended December 31, 2015, 2014 and 2013 includes approximately $60 million, $60 million and $67 million, respectively, of compensation costs and $23 million, $23 million and $26 million, respectively, of income tax benefits related to stock-based compensation arrangements. Compensation cost capitalized for the years ended December 31, 2015, 2014 and 2013 was not material. As of December 31, 2015, there were approximately $70 million of unrecognized compensation costs related to nonvested/nonexercisable stock-based compensation arrangements. These costs are expected to be recognized over a weighted-average period of 1.8 years.

At December 31, 2015, approximately 17 million shares of common stock were authorized for awards to officers, employees and non-employee directors of NEE and its subsidiaries under NEE's: (a) Amended and Restated 2011 Long Term Incentive Plan, (b) 2007 Non-Employee Directors Stock Plan and (c) earlier equity compensation plans under which shares are reserved for issuance under existing grants, but no additional shares are available for grant under the earlier plans. NEE satisfies restricted stock and performance share awards by issuing new shares of its common stock or by purchasing shares of its common stock in the open market. NEE satisfies stock option exercises by issuing new shares of its common stock. NEE generally grants most of its stock-based compensation awards in the first quarter of each year.

Restricted Stock and Performance Share Awards - Restricted stock typically vests within three years after the date of grant and is subject to, among other things, restrictions on transferability prior to vesting. The fair value of restricted stock is measured based upon the closing market price of NEE common stock as of the date of grant. Performance share awards are typically payable at the end of a three-year performance period if the specified performance criteria are met. The fair value of performance share awards is estimated primarily based upon the closing market price of NEE common stock as of the date of grant less the present value of expected dividends, multiplied by an estimated performance multiple which is subsequently trued up based on actual performance.

The activity in restricted stock and performance share awards for the year ended December 31, 2015 was as follows:

	Shares	Weighted-Average Grant Date Fair Value Per Share
Restricted Stock:		
Nonvested balance, January 1, 2015	579,497	$ 75.65
Granted	303,150	$ 103.58
Vested	(274,620)	$ 73.92
Forfeited	(44,367)	$ 99.99
Nonvested balance, December 31, 2015	563,660	$ 89.60
Performance Share Awards:		
Nonvested balance, January 1, 2015	996,227	$ 67.19
Granted	567,437	$ 77.12
Vested	(609,321)	$ 53.55
Forfeited	(39,144)	$ 79.36
Nonvested balance, December 31, 2015	915,199	$ 81.90

The weighted-average grant date fair value per share of restricted stock granted for the years ended December 31, 2014 and 2013 was $93.46 and $74.02 respectively. The weighted-average grant date fair value per share of performance share awards granted for the years ended December 31, 2014 and 2013 was $71.52 and $58.53, respectively.

The total fair value of restricted stock and performance share awards vested was $108 million, $85 million and $82 million for the years ended December 31, 2015, 2014 and 2013, respectively.

Options - Options typically vest within three years after the date of grant and have a maximum term of ten years. The exercise price of each option granted equals the closing market price of NEE common stock on the date of grant. The fair value of the options is estimated on the date of the grant using the Black-Scholes option-pricing model and based on the following assumptions:

	2015	2014	2013
Expected volatility[a]	**18.91%**	20.32%	20.08 - 20.15%
Expected dividends	**3.11%**	3.11%	3.28 - 3.64%
Expected term (years)[b]	**7.0**	7.0	7.0
Risk-free rate	**1.84%**	2.17%	1.15 - 1.40%

(a) Based on historical experience.
(b) Based on historical exercise and post-vesting cancellation experience adjusted for outstanding awards.

Option activity for the year ended December 31, 2015 was as follows:

	Shares Underlying Options	Weighted-Average Exercise Price Per Share	Weighted-Average Remaining Contractual Term (years)	Aggregate Intrinsic Value (millions)
Balance, January 1, 2015	2,825,035	$ 59.04		
Granted	229,158	$ 103.62		
Exercised	(187,692)	$ 47.03		
Forfeited	—	—		
Expired	—	—		
Balance, December 31, 2015	2,866,501	$ 63.39	5.3	$ 116
Exercisable, December 31, 2015	2,415,194	$ 57.62	4.7	$ 112

The weighted-average grant date fair value of options granted was $13.62, $14.09 and $9.20 per share for the years ended December 31, 2015, 2014 and 2013, respectively. The total intrinsic value of stock options exercised was approximately $11 million, $30 million and $14 million for the years ended December 31, 2015, 2014 and 2013, respectively.

Cash received from option exercises was approximately $9 million, $26 million and $14 million for the years ended December 31, 2015, 2014 and 2013, respectively. The tax benefits realized from options exercised were approximately $4 million, $11 million and $5 million for the years ended December 31, 2015, 2014 and 2013, respectively.

Preferred Stock - NEE's charter authorizes the issuance of 100 million shares of serial preferred stock, $0.01 par value, none of which are outstanding. FPL's charter authorizes the issuance of 10,414,100 shares of preferred stock, $100 par value, 5 million shares of subordinated preferred stock, no par value, and 5 million shares of preferred stock, no par value, none of which are outstanding.

Accumulated Other Comprehensive Income (Loss) - The components of AOCI, net of tax, are as follows:

	Accumulated Other Comprehensive Income (Loss)					
	Net Unrealized Gains (Losses) on Cash Flow Hedges	Net Unrealized Gains (Losses) on Available for Sale Securities	Defined Benefit Pension and Other Benefits Plans	Net Unrealized Gains (Losses) on Foreign Currency Translation	Other Comprehensive Income (Loss) Related to Equity Method Investee	Total
			(millions)			
Balances, December 31, 2012	$ (266)	$ 96	$ (74)	$ 12	$ (23)	$ (255)

Long-term debt of NEER, excluding current maturities		6,825		6,072	
Total long-term debt		$ 26,681		$ 24,044	

(a) Principal on the storm-recovery bonds is due on the final maturity date (the date by which the principal must be repaid to prevent a default) for each tranche, however, it is being paid semiannually and sequentially.
(b) Tax exempt bonds that permit individual bond holders to tender the bonds for purchase at any time prior to maturity. In the event bonds are tendered for purchase, they would be remarketed by a designated remarketing agent in accordance with the related indenture. If the remarketing is unsuccessful, FPL would be required to purchase the tax exempt bonds. As of December 31, 2015, all tax exempt bonds tendered for purchase have been successfully remarketed. FPL's bank revolving line of credit facilities are available to support the purchase of tax exempt bonds.
(c) Variable rate is based on an underlying index plus a margin except for in 2014 approximately $983 million of NEER's senior secured limited-recourse term loans is based on the greater of an underlying index or a floor, plus a margin.
(d) Debt issuance costs were reclassified from noncurrent other assets to long-term debt to reflect the retrospective adoption of an accounting standard update. See Note 1 - Debt Issuance Costs.
(e) Interest rate contracts, primarily swaps, have been entered into for the majority of these debt issuances. See Note 3.
(f) Issued by a wholly owned subsidiary of NEECH and collateralized by a third-party note receivable held by that subsidiary. See Note 4 - Fair Value of Financial Instruments Recorded at the Carrying Amount.
(g) Excludes debt totaling $938 million reflected in liabilities associated with assets held for sale on NEE's consolidated balance sheet. See Note 1 - Assets and Liabilities Associated with Assets Held for Sale.
(h) See Note 14 - Spain Solar Projects for discussion of events of default related to debt associated with the Spain solar projects.

Minimum annual maturities of long-term debt for NEE are approximately $2,220 million, $2,882 million, $2,819 million, $2,044 million and $1,578 million for 2016, 2017, 2018, 2019 and 2020, respectively. The respective amounts for FPL are approximately $64 million, $367 million, $472 million, $76 million and $10 million.

At December 31, 2015 and 2014, short-term borrowings had a weighted-average interest rate of 2.10% (0.83% for FPL) and 0.40% (0.40% for FPL), respectively. Available lines of credit aggregated approximately $7.9 billion ($4.9 billion for NEECH and $3.0 billion for FPL) at December 31, 2015. These facilities provide for the issuance of letters of credit of up to approximately $4.0 billion ($2.9 billion for NEECH and $1.1 billion for FPL). The issuance of letters of credit is subject to the aggregate commitment of the relevant banks to issue letters of credit under the applicable facility. While no direct borrowings were outstanding at December 31, 2015, letters of credit totaling $410 million and $6 million were outstanding under the NEECH and FPL credit facilities, respectively.

NEE has guaranteed certain payment obligations of NEECH, including most of those under NEECH's debt, including all of its debentures and commercial paper issuances, as well as most of its payment guarantees and indemnifications. NEECH has guaranteed certain debt and other obligations of NEER and its subsidiaries.

In August 2013, NEECH completed a remarketing of approximately $402.4 million aggregate principal amount of its Series D Debentures due September 1, 2015, which constitutes a portion of the $402.5 million aggregate principal amount of such debentures (Debentures) that were issued in September 2010 as components of equity units issued concurrently by NEE (2010 equity units). The Debentures are fully and unconditionally guaranteed by NEE. In connection with the remarketing of the Debentures, the interest rate on the Debentures was reset to 1.339% per year, and interest is payable on March 1 and September 1 of each year, commencing September 1, 2013. In connection with the settlement of the contracts to purchase NEE common stock that were issued as components of the 2010 equity units, in August and September 2013, NEE issued a total of 5,946,530 shares of common stock in exchange for $402.5 million.

In September 2013, NEE sold $500 million of equity units (initially consisting of Corporate Units). Each equity unit has a stated amount of $50 and consists of a contract to purchase NEE common stock (stock purchase contract) and, initially, a 5% undivided beneficial ownership interest in a Series G Debenture due September 1, 2018 issued in the principal amount of $1,000 by NEECH (see table above). Each stock purchase contract requires the holder to purchase by no later than September 1, 2016 (the final settlement date) for a price of $50 in cash, a number of shares of NEE common stock (subject to antidilution adjustments) based on a price per share range of $82.70 to $99.24. If purchased on the final settlement date, as of December 31, 2015, the number of shares issued would (subject to antidilution adjustments) range from 0.6088 shares if the applicable market value of a share of common stock is less than or equal to $82.70 to 0.5073 shares if the applicable market value of a share is equal to or greater than $99.24, with applicable market value to be determined using the average closing prices of NEE common stock over a 20-day trading period ending August 29, 2016. Total annual distributions on the equity units will be at the rate of 5.799%, consisting of interest on the debentures (1.45% per year) and payments under the stock purchase contracts (4.349% per year). The interest rate on the debentures is expected to be reset on or after March 1, 2016. A holder of the equity unit may satisfy its purchase obligation with proceeds raised from remarketing the NEECH debentures that are part of its equity unit. The undivided beneficial ownership interest in the NEECH debenture that is a component of each Corporate Unit is pledged to NEE to secure the holder's obligation to purchase NEE common stock under the related stock purchase contract. If a successful remarketing does not occur on or before the third business day prior to the final settlement date, and a holder has not notified NEE of its intention to settle the stock purchase contract with cash, the debentures that are components of the Corporate Units will be used to satisfy in full the holders' obligations to purchase NEE common stock under the related stock purchase contracts on the final settlement date. The debentures are fully and unconditionally guaranteed by NEE.

In May 2015, NEECH completed a remarketing of $600 million aggregate principal amount of its Series E Debentures due June 1, 2017 (Debentures) that were issued in May 2012 as components of equity units issued concurrently by NEE (May 2012 equity units). The Debentures are fully and unconditionally guaranteed by NEE. In connection with the remarketing of the Debentures, the interest rate on the Debentures was reset to 1.586% per year, and interest is payable on June 1 and December 1 of each year, commencing June 1, 2015. In connection with the settlement of the contracts to purchase NEE common stock that were issued as components of the May 2012 equity units, on June 1, 2015, NEE issued 7,860,000 shares of common stock in exchange for $600 million.

In August 2015, NEECH completed a remarketing of approximately $650 million aggregate principal amount of its Series F Debentures due September 1, 2017, which constitutes a portion of the $650 million aggregate principal amount of such debentures (Debentures) that were issued in September 2012 as components of equity units issued by NEE (September 2012 equity units). The Debentures are fully and unconditionally guaranteed by NEE. In connection with the remarketing, the interest rate on all of the Debentures was reset to 2.056% per year and interest is payable on March 1 and September 1 of each year, commencing September 1, 2015. In connection with the settlement of the contracts to purchase NEE common stock that were issued as components of the September 2012 equity units, in August and September 2015, NEE issued a total of 8,173,099 shares of common stock in exchange for $650 million.

In September 2015, NEE sold $700 million of equity units (initially consisting of Corporate Units). Each equity unit has a stated amount of $50 and consists of a contract to purchase NEE common stock (stock purchase contract) and, initially, a 5% undivided beneficial ownership interest in a Series H Debenture due September 1, 2020 issued in the principal amount of $1,000 by NEECH. Each stock purchase contract requires the holder to purchase by no later than September 1, 2018 (the final settlement date) for a price of $50 in cash, a number of shares of NEE common stock (subject to antidilution adjustments) based on a price per share

range of $95.35 to $114.42. If purchased on the final settlement date, as of December 31, 2015, the number of shares issued would (subject to antidilution adjustments) range from 0.5244 shares if the applicable market value of a share of common stock is less than or equal to $95.35 to 0.4370 shares if the applicable market value of a share is equal to or greater than $114.42, with applicable market value to be determined using the average closing prices of NEE common stock over a 20-day trading period ending August 29, 2018. Total annual distributions on the equity units will be at the rate of 6.371%, consisting of interest on the debentures (2.36% per year) and payments under the stock purchase contracts (4.011% per year). The interest rate on the debentures is expected to be reset on or after March 1, 2018. A holder of the equity unit may satisfy its purchase obligation with proceeds raised from remarketing the NEECH debentures that are part of its equity unit. The undivided beneficial ownership interest in the NEECH debenture that is a component of each Corporate Unit is pledged to NEE to secure the holder's obligation to purchase NEE common stock under the related stock purchase contract. If a successful remarketing does not occur on or before the third business day prior to the final settlement date, and a holder has not notified NEE of its intention to settle the stock purchase contract with cash, the debentures that are components of the Corporate Units will be used to satisfy in full the holders' obligations to purchase NEE common stock under the related stock purchase contracts on the final settlement date. The debentures are fully and unconditionally guaranteed by NEE.

Prior to the issuance of NEE's common stock, the stock purchase contracts, if dilutive, will be reflected in NEE's diluted earnings per share calculations using the treasury stock method. Under this method, the number of shares of NEE common stock used in calculating diluted earnings per share is deemed to be increased by the excess, if any, of the number of shares that would be issued upon settlement of the stock purchase contracts over the number of shares that could be purchased by NEE in the market, at the average market price during the period, using the proceeds receivable upon settlement.

13. Asset Retirement Obligations

FPL's ARO relates primarily to the nuclear decommissioning obligation of its nuclear units. FPL's AROs other than nuclear decommissioning are not significant. The accounting provisions result in timing differences in the recognition of legal asset retirement costs for financial reporting purposes and the method the FPSC allows FPL to recover in rates. NEER's ARO relates primarily to the nuclear decommissioning obligation of its nuclear plants and obligations for the dismantlement of its wind facilities located on leased property. See Note 1 - Decommissioning of Nuclear Plants, Dismantlement of Plants and Other Accrued Asset Removal Costs.

A rollforward of NEE's and FPL's ARO is as follows:

	FPL	NEER	NEE
		(millions)	
Balances, December 31, 2013	$ 1,285	$ 565	$ 1,850
Liabilities incurred	1	29	30
Accretion expense	70	38	108
Liabilities settled	—	(1)	(1)
Revision in estimated cash flows - net	(1)	—	(1)
Balances, December 31, 2014	1,355	631	1,986
Liabilities incurred	**5**	**46**	**51**
Accretion expense	**73**	**43**	**116**
Liabilities settled	**(20)**	**(2)**	**(22)**
Revision in estimated cash flows - net	**409** [a]	**(71)** [b]	**338**
Balances, December 31, 2015	**$ 1,822**	**$ 647**	**$ 2,469**

(a) Primarily reflects the effect of revised cost estimates for decommissioning FPL's nuclear units consistent with the updated nuclear decommissioning studies filed with the FPSC in December 2015.
(b) Primarily reflects the effect of revised cost estimates for decommissioning NEER's nuclear units and a change in assumptions relating to spent fuel costs, partly offset by increased escalation rates.

Restricted funds for the payment of future expenditures to decommission NEE's and FPL's nuclear units included in special use funds on NEE's and FPL's consolidated balance sheets are as follows (see Note 4 - Special Use Funds):

	FPL	NEER	NEE
		(millions)	
Balances, December 31, 2015	**$ 3,430**	**$ 1,634**	**$ 5,064**
Balances, December 31, 2014	$ 3,449	$ 1,642	$ 5,091

NEE and FPL have identified but not recognized ARO liabilities related to electric transmission and distribution and telecommunications assets resulting from easements over property not owned by NEE or FPL. These easements are generally perpetual and only require retirement action upon abandonment or cessation of use of the property or facility for its specified purpose. The ARO liability is not estimable for such easements as NEE and FPL intend to use these properties indefinitely. In the event NEE and FPL decide to abandon or cease the use of a particular easement, an ARO liability would be recorded at that time.

14. Commitments and Contingencies

Commitments - NEE and its subsidiaries have made commitments in connection with a portion of their projected capital expenditures. Capital expenditures at FPL include, among other things, the cost for construction or acquisition of additional facilities and equipment to meet customer demand, as well as capital improvements to and maintenance of existing facilities and the procurement of nuclear fuel. At NEER, capital expenditures include, among other things, the cost, including capitalized interest, for construction and development of wind and solar projects and the procurement of nuclear fuel, as well as the investment in the development and construction of its natural gas pipeline assets. Capital expenditures for Corporate and Other primarily include the cost to meet customer-specific requirements and maintain the fiber-optic network for the fiber-optic telecommunications business (FPL FiberNet) and the cost to maintain existing transmission facilities at NextEra Energy Transmission, LLC.

At December 31, 2015, estimated capital expenditures for 2016 through 2020 for which applicable internal approvals (and also FPSC approvals for FPL, if required) have been received were as follows:

	2016	2017	2018	2019	2020	Total
			(millions)			
FPL:						
Generation:[a]						
New[b][c]	$ 1,085	$ 45	$ —	$ —	$ —	$ 1,130
Existing	620	960	680	520	550	3,330
Transmission and distribution	1,930	1,990	1,985	2,485	2,335	10,725
Nuclear fuel	170	125	190	170	210	865
General and other	245	265	240	185	185	1,120
Total	$ 4,050	$ 3,385	$ 3,095	$ 3,360	$ 3,280	$ 17,170
NEER:						
Wind[d]	$ 2,040	$ 75	$ 30	$ 25	$ 25	$ 2,195
Solar[e]	1,240	10	—	—	—	1,250
Nuclear, including nuclear fuel	300	240	270	310	265	1,385
Natural gas pipelines[f]	1,020	740	465	35	15	2,275
Other	495	60	75	50	65	745
Total	$ 5,095	$ 1,125	$ 840	$ 420	$ 370	$ 7,850
Corporate and Other	$ 215	$ 160	$ 115	$ 140	$ 135	$ 765

(a) Includes AFUDC of approximately $76 million, $14 million and $11 million for 2016 through 2018, respectively.
(b) Includes land, generation structures, transmission interconnection and integration and licensing.
(c) Excludes capital expenditures of approximately $1.0 billion for the natural gas-fired combined-cycle unit in Okeechobee County, Florida for the period from the end of 2016 (when approval by the Florida Power Plant Siting Board (Siting Board), comprised of the Florida governor and cabinet is expected) through 2019. Also excludes capital expenditures for the construction costs for the two additional nuclear units at FPL's Turkey Point site beyond what is required to receive and maintain an NRC license for each unit.
(d) Consists of capital expenditures for new wind projects and related transmission totaling approximately 1,365 MW.
(e) Includes capital expenditures for new solar projects and related transmission totaling approximately 1,045 MW.
(f) Includes capital expenditures for construction of three natural gas pipelines, including equity contributions associated with equity investments in joint ventures for two pipelines and AFUDC associated with the third pipeline. The natural gas pipelines are subject to certain conditions. See Contracts below.

The above estimates are subject to continuing review and adjustment and actual capital expenditures may vary significantly from these estimates.

Contracts - In addition to the commitments made in connection with the estimated capital expenditures included in the table in Commitments above, FPL has commitments under long-term purchased power and fuel contracts. As of December 31, 2015, FPL is obligated under a take-or-pay purchased power contract to pay for approximately 375 MW annually through 2021. FPL also has various firm pay-for-performance contracts to purchase approximately 444 MW from certain cogenerators and small power producers with expiration dates ranging from 2025 through 2034. The purchased power contracts provide for capacity and energy payments. Energy payments are based on the actual power taken under these contracts. Capacity payments for the pay-for-performance contracts are subject to the facilities meeting certain contract conditions. FPL has contracts with expiration dates through 2036 for the purchase and transportation of natural gas and coal, and storage of natural gas. In addition, FPL has entered into 25-year natural gas transportation agreements with each of Sabal Trail Transmission, LLC (Sabal Trail, an entity in which a wholly owned NEER subsidiary has a 33% ownership interest), and Florida Southeast Connection, LLC (Florida Southeast Connection, a wholly owned

NEER subsidiary), each of which will build, own and operate a pipeline that will be part of a natural gas pipeline system, for a quantity of 400,000 MMBtu/day beginning on May 1, 2017 and increasing to 600,000 MMBtu/day on May 1, 2020. These agreements contain firm commitments that are contingent upon the occurrence of certain events, including FERC approval on acceptable terms and the completion of construction of the pipeline system to be built by Sabal Trail and Florida Southeast Connection. See Commitments above.

As of December 31, 2015, NEER has entered into contracts with expiration dates ranging from late February 2016 through 2032 primarily for the purchase of wind turbines, wind towers and solar modules and related construction and development activities, as well as for the supply of uranium, conversion, enrichment and fabrication of nuclear fuel and has made commitments for the construction of the natural gas pipelines. Approximately $5.2 billion of related commitments are included in the estimated capital expenditures table in Commitments above. In addition, NEER has contracts primarily for the purchase, transportation and storage of natural gas and firm transmission service with expiration dates ranging from March 2016 through 2033.

The required capacity and/or minimum payments under the contracts discussed above as of December 31, 2015 were estimated as follows:

	2016	2017	2018	2019	2020	Thereafter
			(millions)			
FPL:						
Capacity charges[a]	$ 185	$ 170	$ 140	$ 120	$ 110	$ 690
Minimum charges, at projected prices:[b]						
Natural gas, including transportation and storage[c]	$ 1,020	$ 930	$ 870	$ 865	$ 920	$ 13,050
Coal, including transportation	$ 65	$ 40	$ —	$ —	$ —	$ —
NEER	$ 3,670	$ 735	$ 625	$ 135	$ 85	$ 535
Corporate and Other[d][e]	$ 60	$ 5	$ 5	$ —	$ 5	$ —

(a) Capacity charges under these contracts, substantially all of which are recoverable through the capacity clause, totaled approximately $434 million, $485 million and $487 million for the years ended December 31, 2015, 2014 and 2013, respectively. Energy charges under these contracts, which are recoverable through the fuel clause, totaled approximately $262 million, $299 million and $263 million for the years ended December 31, 2015, 2014 and 2013, respectively.
(b) Recoverable through the fuel clause.
(c) Includes approximately $200 million, $295 million, $290 million, $360 million and $7,885 million in 2017, 2018, 2019, 2020 and thereafter, respectively, of firm commitments, subject to certain conditions as noted above, related to the natural gas transportation agreements with Sabal Trail and Florida Southeast Connection.
(d) Includes an approximately $35 million commitment to invest in clean power and technology businesses through 2021.
(e) Excludes approximately $1,115 million, in 2016, of joint obligations of NEECH and NEER which are included in the NEER amounts above.

Insurance - Liability for accidents at nuclear power plants is governed by the Price-Anderson Act, which limits the liability of nuclear reactor owners to the amount of insurance available from both private sources and an industry retrospective payment plan. In accordance with this Act, NEE maintains $375 million of private liability insurance per site, which is the maximum obtainable, and participates in a secondary financial protection system, which provides up to $13.1 billion of liability insurance coverage per incident at any nuclear reactor in the U.S. Under the secondary financial protection system, NEE is subject to retrospective assessments of up to $1.0 billion ($509 million for FPL), plus any applicable taxes, per incident at any nuclear reactor in the U.S., payable at a rate not to exceed $152 million ($76 million for FPL) per incident per year. NEE and FPL are contractually entitled to recover a proportionate share of such assessments from the owners of minority interests in Seabrook, Duane Arnold and St. Lucie Unit No. 2, which approximates $15 million, $38 million and $19 million, plus any applicable taxes, per incident, respectively.

NEE participates in a nuclear insurance mutual company that provides $2.75 billion of limited insurance coverage per occurrence per site for property damage, decontamination and premature decommissioning risks at its nuclear plants and a sublimit of $1.5 billion for non-nuclear perils. The proceeds from such insurance, however, must first be used for reactor stabilization and site decontamination before they can be used for plant repair. NEE also participates in an insurance program that provides limited coverage for replacement power costs if a nuclear plant is out of service for an extended period of time because of an accident. In the event of an accident at one of NEE's or another participating insured's nuclear plants, NEE could be assessed up to $187 million ($112 million for FPL), plus any applicable taxes, in retrospective premiums in a policy year. NEE and FPL are contractually entitled to recover a proportionate share of such assessments from the owners of minority interests in Seabrook, Duane Arnold and St. Lucie Unit No. 2, which approximates $3 million, $5 million and $4 million, plus any applicable taxes, respectively.

Due to the high cost and limited coverage available from third-party insurers, NEE does not have property insurance coverage for a substantial portion of either its transmission and distribution property or natural gas pipeline assets, and has no property insurance coverage for FPL FiberNet's fiber-optic cable. Should FPL's future storm restoration costs exceed the reserve amount established through the issuance of storm-recovery bonds by a VIE in 2007, FPL may recover storm restoration costs, subject to prudence review by the FPSC, either through surcharges approved by the FPSC or through securitization provisions pursuant to Florida law.

In the event of a loss, the amount of insurance available might not be adequate to cover property damage and other expenses incurred. Uninsured losses and other expenses, to the extent not recovered from customers in the case of FPL or Lone Star

Transmission, LLC, would be borne by NEE and/or FPL and/or their affiliates, as the case may be, and could have a material adverse effect on NEE's and FPL's financial condition, results of operations and liquidity.

Spain Solar Projects - In March 2013 and May 2013, events of default occurred under the project-level financing agreements for the Spain solar projects as a result of changes of law that occurred in December 2012 and February 2013. These changes of law negatively affected the projected economics of the projects and caused the project-level financing to be unsupportable by expected future project cash flows. Under the project-level financing, events of default (including those discussed below) provide for, among other things, a right by the lenders (which they have not exercised) to accelerate the payment of the project-level debt. Accordingly, in 2013, the project-level debt and the associated derivative liabilities related to interest rate swaps were classified as current maturities of long-term debt and current derivative liabilities, respectively, on NEE's consolidated balance sheets, and totaled $559 million and $101 million, respectively, as of December 31, 2015. In July 2013, the Spanish government published a new law that created a new economic framework for the Spanish renewable energy sector. Additional regulatory pronouncements from the Spanish government needed to complete and implement the framework were finalized in June 2014. Based on NEE's assessment, the regulatory pronouncements do not indicate a further impairment of the Spain solar projects. However, the Spanish government's interpretation of the new remuneration scheme resulted in a reduction to 2013 revenues of approximately $19 million which was reflected in operating revenues for the year ended December 31, 2014 in NEE's consolidated statements of income. In December 2015, the Spanish government determined that such a reduction was not warranted and refunded approximately $17 million, which was reflected in operating revenues for the year ended December 31, 2015. Since the third quarter of 2014, events of default have occurred under the project-level financing agreements related to certain debt service coverage ratio covenants not being met. The project-level subsidiaries have requested the lenders to waive the events of default related to the debt service coverage ratio.

Impairments recorded due to the changes of law caused the project-level subsidiaries in Spain to have a negative net equity position on their balance sheets, which requires them under Spanish law to commence liquidation proceedings if the net equity position is not restored to specified levels. Prior to 2015, Spanish law had provided an exemption applicable to the project-level subsidiaries that enabled the exclusion of asset-related impairments in the equity calculation. Such exemption was not granted for 2015, and therefore, the project-level subsidiaries commenced liquidation on April 23, 2015. The liquidators are reviewing the liquidation balance sheets and inventory schedules and will make recommendations to NextEra Energy España, S.L. (NEE España), the NEER subsidiary in Spain that is the direct shareholder of the project-level subsidiaries, to either restructure the project-level debt or file for insolvency. The liquidation event could cause the lenders to seek to accelerate the payment of the project-related debt and/or foreclose on the project assets, which they have not done to date. However, as part of a settlement agreement reached in December 2013 between NEECH, NEE España, the project-level subsidiaries and the lenders, the future recourse of the lenders under the project-level financing is effectively limited to the letters of credit described below and to the assets of the project-level subsidiaries. Under the settlement agreement, the lenders, among other things, irrevocably waived events of default related to changes of law that existed at the time of the settlement as described above, and NEECH affiliates provided for the project-level subsidiaries to post approximately €37 million (approximately $40 million as of December 31, 2015) in letters of credit to fund operating and debt service reserves under the project-level financing, of which €14 million (approximately $15 million) has been drawn as of December 31, 2015. NEE España, the project-level subsidiaries and the lenders have been in negotiations to seek to restructure the project-level financing; however, there can be no assurance that the project-level financing will be successfully restructured or that the lenders will not exercise remedies available to them under the project financing agreements for, among other things, current and future events of default, if any, or for the commencement of liquidation by the project level subsidiaries.

Legal Proceedings - In 1995 and 1996, NEE, through an indirect subsidiary, purchased from Adelphia Communications Corporation (Adelphia) 1,091,524 shares of Adelphia common stock and 20,000 shares of Adelphia preferred stock (convertible into 2,358,490 shares of Adelphia common stock) for an aggregate price of approximately $35,900,000. On January 29, 1999, Adelphia repurchased all of these shares for $149,213,130 in cash. In June 2004, Adelphia, Adelphia Cablevision, L.L.C. and the Official Committee of Unsecured Creditors of Adelphia filed a complaint against NEE and its indirect subsidiary in the U.S. Bankruptcy Court, Southern District of New York. The complaint alleges that the repurchase of these shares by Adelphia was a fraudulent transfer, in that at the time of the transaction Adelphia (i) was insolvent or was rendered insolvent, (ii) did not receive reasonably equivalent value in exchange for the cash it paid, and (iii) was engaged or about to engage in a business or transaction for which any property remaining with Adelphia had unreasonably small capital. The complaint seeks the recovery for the benefit of Adelphia's bankruptcy estate of the cash paid for the repurchased shares, plus interest from January 29, 1999. NEE filed an answer to the complaint. NEE believes that the complaint is without merit because, among other reasons, Adelphia will be unable to demonstrate that (i) Adelphia's repurchase of shares from NEE, which repurchase was at the market value for those shares, was not for reasonably equivalent value, (ii) Adelphia was insolvent at the time of the stock repurchase, or (iii) the stock repurchase left Adelphia with unreasonably small capital. The trial was completed in May 2012 and closing arguments were heard in July 2012. In May 2014, the U.S. Bankruptcy Court, Southern District of New York, issued its decision after trial, finding, among other things, that Adelphia was not insolvent, or rendered insolvent, at the time of the stock repurchase. The bankruptcy court further ruled that Adelphia was not left with inadequate capital or equitably insolvent at the time of the stock repurchase. The decision after trial represented proposed findings of fact and conclusions of law which were subject to de novo review by the U.S. District Court for the Southern District of New York. In March 2015, the U.S. District Court issued a final order which effectively affirmed the findings of the U.S. Bankruptcy Court in NEE's favor. In April 2015, Adelphia filed an appeal of the final order to the U.S. Court of Appeals for the Second Circuit.

NEE and FPL are vigorously defending, and believe that they or their affiliates have meritorious defenses to, the lawsuit described

above. In addition to the legal proceeding discussed above, NEE and its subsidiaries, including FPL, are involved in other legal and regulatory proceedings, actions and claims in the ordinary course of their businesses. Entities in which subsidiaries of NEE, including FPL, have a partial ownership interest are also involved in legal and regulatory proceedings, actions and claims, the liabilities from which, if any, would be shared by such subsidiary. In the event that NEE and FPL, or their affiliates, do not prevail in the lawsuit described above or these other legal and regulatory proceedings, actions and claims, there may be a material adverse effect on their financial statements. While management is unable to predict with certainty the outcome of the lawsuit described above or these other legal and regulatory proceedings, actions and claims, based on current knowledge it is not expected that their ultimate resolution, individually or collectively, will have a material adverse effect on the financial statements of NEE or FPL.

15. Segment Information

NEE's reportable segments are FPL, a rate-regulated electric utility, and NEER, a competitive energy business. NEER's segment information includes an allocation of interest expense from NEECH based on a deemed capital structure of 70% debt and allocated shared service costs. Corporate and Other represents other business activities, and eliminating entries. During the fourth quarter of 2015, the natural gas pipeline projects that were previously reported in Corporate and Other were moved to the NEER segment reflecting the overall scale of the natural gas pipeline investments and management of these projects within NEER's gas infrastructure business. Prior year amounts for NEER and Corporate and Other were adjusted to reflect this segment change. NEE's operating revenues derived from the sale of electricity represented approximately 92%, 91% and 92% of NEE's operating revenues for the years ended December 31, 2015, 2014 and 2013, respectively. Approximately 2%, 2% and 1% of operating revenues were from foreign sources for the years ended December 31, 2015, 2014 and 2013, respectively. At December 31, 2015 and 2014, approximately 3% and 4%, respectively, of long-lived assets were located in foreign countries.

NEE's segment information is as follows:

	2015				2014				2013

(a) Interest expense allocated from NEECH is based on a deemed capital structure of 70% debt. For this purpose, the deferred credit associated with differential membership interests sold by NEER subsidiaries is included with debt. Residual NEECH corporate interest expense is included in Corporate and Other.
(b) NEER includes an impairment charge of $300 million in 2013 related to the Spain solar projects. See Note 4 - Nonrecurring Fair Value Measurements.
(c) NEER includes PTCs that were recognized based on its tax sharing agreement with NEE. See Note 1 - Income Taxes.
(d) NEER includes after-tax charges of $342 million in 2013 associated with the impairment of the Spain solar projects. See Note 4 - Nonrecurring Fair Value Measurements.
(e) See Note 6.
(f) Reflects reclassification of debt issuance costs of $324 million ($85 million for FPL) in 2014 and $298 million ($68 million for FPL) in 2013. See Note 1 - Debt Issuance Costs.

16. Summarized Financial Information of NEECH

NEECH, a 100% owned subsidiary of NEE, provides funding for, and holds ownership interests in, NEE's operating subsidiaries other than FPL. NEECH's debentures and junior subordinated debentures including those that were registered pursuant to the Securities Act of 1933, as amended, are fully and unconditionally guaranteed by NEE. Condensed consolidating financial information is as follows:

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Concluded)

17. Quarterly Data (Unaudited)

Condensed consolidated quarterly financial information is as follows:

	March 31[a]	June 30[a]	September 30[a]	December 31[a]
	(millions, except per share amounts)			
NEE:				
2015				
Operating revenues[b]	$ 4,104	$ 4,358	$ 4,954	$ 4,069
Operating income[b]	$ 1,129	$ 1,146	$ 1,481	$ 876
Net income[b]	$ 650	$ 720	$ 882	$ 510
Net income attributable to NEE[b]	$ 650	$ 716	$ 879	$ 507
Earnings per share attributable to NEE - basic:[c]	$ 1.47	$ 1.61	$ 1.94	$ 1.10
Earnings per share attributable to NEE - assuming dilution:[c]	$ 1.45	$ 1.59	$ 1.93	$ 1.10
Dividends per share	$ 0.770	$ 0.770	$ 0.770	$ 0.770
High-low common stock sales prices	$112.64 - $97.48	$106.63 - $97.23	$109.98 - $93.74	$105.85 - $95.84
2014				
Operating revenues[b]	$ 3,674	$ 4,029	$ 4,654	$ 4,664
Operating income[b]	$ 738	$ 951	$ 1,163	$ 1,532
Net income[b]	$ 430	$ 492	$ 664	$ 884
Net income attributable to NEE[b]	$ 430	$ 492	$ 660	$ 884
Earnings per share attributable to NEE - basic:[c]	$ 0.99	$ 1.13	$ 1.52	$ 2.03
Earnings per share attributable to NEE - assuming dilution:[c]	$ 0.98	$ 1.12	$ 1.50	$ 2.00
Dividends per share	$ 0.725	$ 0.725	$ 0.725	$ 0.725
High-low common stock sales prices	$96.13 - $83.97	$102.51 - $93.28	$102.46 - $91.79	$110.84 - $90.33
FPL:				
2015				
Operating revenues[b]	$ 2,541	$ 2,996	$ 3,274	$ 2,839
Operating income[b]	$ 667	$ 780	$ 855	$ 674
Net income[b]	$ 359	$ 435	$ 489	$ 365
2014				
Operating revenues[b]	$ 2,535	$ 2,889	$ 3,315	$ 2,682
Operating income[b]	$ 632	$ 782	$ 834	$ 580
Net income[b]	$ 347	$ 423	$ 462	$ 286

(a) In the opinion of NEE and FPL, all adjustments, which consist of normal recurring accruals necessary to present a fair statement of the amounts shown for such periods, have been made. Results of operations for an interim period generally will not give a true indication of results for the year.
(b) The sum of the quarterly amounts may not equal the total for the year due to rounding.
(c) The sum of the quarterly amounts may not equal the total for the year due to rounding and changes in weighted-average number of common shares outstanding.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

None

Item 9A. Controls and Procedures

Disclosure Controls and Procedures

As of December 31, 2015, each of NEE and FPL had performed an evaluation, under the supervision and with the participation of its management, including NEE's and FPL's chief executive officer and chief financial officer, of the effectiveness of the design and operation of each company's disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 Rules 13a-15(e) and 15d-15(e)). Based upon that evaluation, the chief executive officer and chief financial officer of each of NEE and FPL concluded that the company's disclosure controls and procedures were effective as of December 31, 2015.

Internal Control Over Financial Reporting

(a) Management's Annual Report on Internal Control Over Financial Reporting

See Item 8. Financial Statements and Supplementary Data.

(b) Attestation Report of the Independent Registered Public Accounting Firm

See Item 8. Financial Statements and Supplementary Data.

(c) Changes in Internal Control Over Financial Reporting

NEE and FPL are continuously seeking to improve the efficiency and effectiveness of their operations and of their internal controls. This results in refinements to processes throughout NEE and FPL. However, there has been no change in NEE's or FPL's internal control over financial reporting (as defined in the Securities Exchange Act of 1934 Rules 13a-15(f) and 15d-15(f)) that occurred during NEE's and FPL's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, NEE's or FPL's internal control over financial reporting.

Item 9B. Other Information

None

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information required by this item will be included under the headings "Business of the Annual Meeting," "Information About NextEra Energy and Management" and "Corporate Governance and Board Matters" in NEE's Proxy Statement which will be filed with the SEC in connection with the 2016 Annual Meeting of Shareholders (NEE's Proxy Statement) and is incorporated herein by reference, or is included in Item 1. Business - Executive Officers of NEE.

NEE has adopted the NextEra Energy, Inc. Code of Ethics for Senior Executive and Financial Officers (the Senior Financial Executive Code), which is applicable to the chief executive officer, the chief financial officer, the chief accounting officer and other senior executive and financial officers. The Senior Financial Executive Code is available under Corporate Governance in the Investor Relations section of NEE's internet website at www.nexteraenergy.com. Any amendments or waivers of the Senior Financial Executive Code which are required to be disclosed to shareholders under SEC rules will be disclosed on the NEE website at the address listed above.

Item 11. Executive Compensation

The information required by this item will be included in NEE's Proxy Statement under the headings "Executive Compensation" and "Corporate Governance and Board Matters" and is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this item relating to security ownership of certain beneficial owners and management will be included in NEE's Proxy Statement under the heading "Information About NextEra Energy and Management" and is incorporated herein by reference.

Securities Authorized For Issuance Under Equity Compensation Plans

NEE's equity compensation plan information as of December 31, 2015 is as follows:

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by security holders	5,036,579 (a)	$ 63.39 (b)	10,480,752
Equity compensation plans not approved by security holders	—	—	—
Total	5,036,579	$ 63.39	10,480,752

(a) Includes an aggregate of 2,866,501 outstanding options, 1,949,762 unvested performance share awards (at maximum payout), 16,564 deferred fully vested performance shares and 181,792 deferred stock awards (including future reinvested dividends) under the NextEra Energy, Inc. Amended and Restated 2011 Long Term Incentive Plan and former LTIP, and 21,960 fully vested shares deferred by directors under the NextEra Energy, Inc. 2007 Non-Employee Directors Stock Plan and its predecessor, the FPL Group, Inc. Amended and Restated Non-Employee Directors Stock Plan.

(b) Relates to outstanding options only.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by this item, to the extent applicable, will be included in NEE's Proxy Statement under the heading "Corporate Governance and Board Matters" and is incorporated herein by reference.

Item 14. Principal Accounting Fees and Services

NEE - The information required by this item will be included in NEE's Proxy Statement under the heading "Audit-Related Matters" and is incorporated herein by reference.

FPL - The following table presents fees billed for professional services rendered by Deloitte & Touche LLP, the member firms of Deloitte Touche Tohmatsu, and their respective affiliates (collectively, Deloitte & Touche) for the fiscal years ended December 31, 2015 and 2014. The amounts presented below reflect allocations from NEE for FPL's portion of the fees, as well as amounts billed directly to FPL.

	2015	2014
Audit fees[a]	$ 3,909,000	$ 3,939,000
Audit-related fees[b]	97,000	128,000
Tax fees[c]	63,000	59,000
All other fees[d]	14,000	21,000
Total	$ 4,083,000	$ 4,147,000

(a) Audit fees consist of fees billed for professional services rendered for the audit of FPL's and NEE's annual consolidated financial statements for the fiscal year, the reviews of the financial statements included in FPL's and NEE's Quarterly Reports on Form 10-Q during the fiscal year and the audit of the effectiveness of internal control over financial reporting, comfort letters, consents, and other services related to SEC matters and services in connection with annual and semi-annual filings of NEE's financial statements with the Japanese Ministry of Finance.

(b) Audit-related fees consist of fees billed for assurance and related services that are reasonably related to the performance of the audit or review of FPL's and NEE's consolidated financial statements and are not reported under audit fees. These fees primarily related to agreed-upon procedures and attestation services.

(c) Tax fees consist of fees billed for professional services rendered for tax compliance, tax advice and tax planning. In 2015 and 2014, approximately $28,000 and $24,000, respectively, was paid related to tax advice and planning services. All other tax fees in 2015 and in 2014 related to tax compliance services.

(d) All other fees consist of fees for products and services other than the services reported under the other named categories. In 2015 and 2014, these fees related to training.

In accordance with the requirements of Sarbanes-Oxley Act of 2002, the Audit Committee Charter and the Audit Committee's pre-approval policy for services provided by the independent registered public accounting firm, all services performed by Deloitte & Touche are approved in advance by the Audit Committee, except for audits of certain trust funds where the fees are paid by the trust. Audit and audit-related services specifically identified in an appendix to the pre-approval policy are pre-approved by the Audit Committee each year. This pre-approval allows management to request the specified audit and audit-related services on an as-needed basis during the year, provided any such services are reviewed with the Audit Committee at its next regularly scheduled meeting. Any audit or audit-related service for which the fee is expected to exceed $250,000, or that involves a service not listed on the pre-approval list, must be specifically approved by the Audit Committee prior to commencement of such service. In addition, the Audit Committee approves all services other than audit and audit-related services performed by Deloitte & Touche in advance of the commencement of such work. The Audit Committee has delegated to the Chair of the committee the right to approve audit, audit-related, tax and other services, within certain limitations, between meetings of the Audit Committee, provided any such decision is presented to the Audit Committee at its next regularly scheduled meeting. At each Audit Committee meeting (other than meetings held to review earnings materials), the Audit Committee reviews a schedule of services for which Deloitte & Touche has been engaged since the prior Audit Committee meeting under existing pre-approvals and the estimated fees for those services. In 2015 and 2014, none of the amounts presented above represent services provided to NEE or FPL by Deloitte & Touche that were approved by the Audit Committee after services were rendered pursuant to Rule 2-01(c)(7)(i)(C) of Regulation S-X (which provides for a waiver of the otherwise applicable pre-approval requirement if certain conditions are met).

PART IV

Item 15. Exhibits, Financial Statement Schedules

(a) 1. Financial Statements

2. Financial Statement Schedules - Schedules are omitted as not applicable or not required.

3. Exhibits (including those incorporated by reference)

Certain exhibits listed below refer to "FPL Group" and "FPL Group Capital," and were effective prior to the change of the name FPL Group, Inc. to NextEra Energy, Inc., and of the name FPL Group Capital Inc to NextEra Energy Capital Holdings, Inc., during 2010.

[1] The Compensation Committee has expressly identified these items and acknowledged that they are subject to Internal Revenue Code Section 409A. In particular, these items include: (i) the additional deferred compensation provided by the designation of certain officers as Class A Executives, effective on or after January 1, 2006; and (ii) the additional deferred compensation set forth in SERP Amendment #4 to the Prior Plan (meaning amounts deferred by certain senior officers specified by the Compensation Committee who became participants in the SERP on or after April 1, 1997 at the rate of two times the basic credit and, to the extent applicable, the transition credit under the cash balance formula in the SERP for their pensionable earnings on or after January 1, 2006). Importantly, nothing in Amendment #4 to the Prior Plan, the SERP, Compensation Committee resolutions, or any other document shall be construed as subjecting to Code Section 409A any deferrals made under the SERP prior to January 1, 2005, except as expressly noted herein.

Exhibit 10(jj)

NEXTERA ENERGY, INC.

NON-EMPLOYEE DIRECTOR COMPENSATION SUMMARY

(Effective January 1, 2016)

Annual Retainer (payable quarterly in common stock or cash)	$80,000
Board or Committee meeting fee	$2,000/meeting
Audit Committee Chair retainer (annual) (payable quarterly)	$20,000
Lead Director retainer (annual) (payable quarterly)	$25,000
Other Committee Chair retainer (annual) (payable quarterly)	$15,000
Annual grant of restricted stock (under 2007 Non-Employee Directors Stock Plan)	That number of shares determined by dividing $140,000 by closing price of NextEra Energy common stock on effective date of grant (rounded up to the nearest 10 shares)
Miscellaneous	- Travel and Accident Insurance (including spouse coverage) - One director accrues dividends and interest on the phantom stock units granted to him upon the termination of the Non-Employee Director Retirement Plan in 1996 - Travel and related expenses while on Board business, and actual administrative or similar expenses incurred for Board or Committee business, are paid or reimbursed by the Company. Directors may travel on Company aircraft in accordance with the Company's Aviation Policy (primarily to or from Board meetings and while on Board business; in limited circumstances for other reasons if the Company would incur little if any incremental cost, space is available and the aircraft is already in use for another authorized purpose - may be accompanied by immediate family members when space is available). - Directors may participate in the Company's Deferred Compensation Plan. - Directors may participate in the Company's matching gift program, which matches gifts to educational institutions to a maximum of $10,000 per donor.

Exhibit 10(o)

Form of

PERFORMANCE SHARE AWARD AGREEMENT
for the Performance Period beginning [ ]
and ending [ ]

under the

NEXTERA ENERGY, INC. AMENDED AND RESTATED
2011 LONG TERM INCENTIVE PLAN

This Performance Share Award Agreement ("Agreement") between NextEra Energy, Inc. (hereinafter called the "Company") and _____ (hereinafter called the "Grantee") is dated _____, 20__. All capitalized terms used in this Agreement which are not defined herein shall have the meanings ascribed to such terms in the NextEra Energy, Inc. Amended and Restated 2011 Long Term Incentive Plan, as amended from time to time (the "Plan").

1. *Grant of Performance Share Award.* The Company hereby grants to the Grantee a Performance Share Award ("Award") which confers upon the Grantee the right to receive a number of shares ("Performance Shares") of Stock, determined as set forth in section 2 hereof. The par value of the Performance Shares shall be deemed paid by the promise by the Grantee to perform future Service to the Company or an Affiliate. The Grantee's right to receive the Performance Shares shall be subject to the terms and conditions set forth in this Agreement and in the Plan. The performance period for which the Award is granted is the period beginning on [ ] and ending on [ ] (such period hereinafter referred to as the "Performance Period").

The "Target" number of Performance Shares granted to the Grantee for the Performance Period is _____.

2. *Payment of Performance Share Award.*

(a) Payment of the Award shall be conditioned upon (i) the Company's achievement of the Code Section 162(m) corporate performance objective(s) established by the Committee for the Performance Period (the "Section 162(m) Objective"), (ii) certification by the Committee of (1) achievement of the Section 162(m) Objective for the Performance Period and (2) the Company's achievement of any secondary corporate performance objective(s) which were established by the Committee for the Performance Period for determining the percentage of the Target number of Performance Shares that actually may become vested under the Award (the

"Award Performance Objectives," which are attached hereto as Exhibit "A"), and (iii) Committee approval of the number of Performance Shares to be paid to the Grantee. Subject to the provisions of the Plan, the Grantee shall have the right to payment of that percentage of the Grantee's Target number of Performance Shares set forth in section 1 hereof which is equal to the percentage achievement of the Award Performance Objectives (including an individual performance modifier based on an assessment by the Company's chief executive officer or the Committee of the Grantee's individual relative contribution to the attainment of the Award Performance Objectives) certified by the Committee for the Performance Period, which will be between 0% and 200%, inclusive (the "Achieved Percentage"). In no event will the Grantee vest in or have a right to payment of more than 200% of such Target number of Performance Shares. The Committee has the discretion to reduce the payout. If the Committee does not certify that the Section 162(m) Objective has been achieved for the Performance Period, the Grantee will forfeit all, and will not vest in any, of the Performance Shares and, in such a case for purposes of this Agreement, the Achieved Percentage shall be 0%.

(b) Notwithstanding the foregoing or the provisions of section 4 hereof or any other provision of this Agreement or the Plan, if (i) the Grantee is a party to an Executive Retention Employment Agreement with the Company (as amended from time to time, "Retention Agreement") and has not waived his or her rights, either entirely or in pertinent part, under such Retention Agreement, (ii) the Effective Date (as defined in the Retention Agreement) has occurred and the Employment Period (as defined in the Retention Agreement) has commenced and has not terminated pursuant to section 3(b) of the Retention Agreement, and (iii) a Change of Control (as defined in the Retention Agreement) has occurred, then, so long as the Grantee is then providing Service:

(1) fifty percent (50%) of the Performance Shares, earned at a deemed achievement level equal to the higher of (x) the Target number of Performance Shares set forth in this Agreement or (y) the average level (expressed as a percentage of the Target number of Performance Shares set forth in this Agreement) of achievement in respect of similar performance stock-based awards which matured over the three fiscal years immediately preceding the fiscal year in which such Change of Control occurred (such higher level, the "Deemed Performance Award Achievement Level"), shall vest upon such Change of Control and shall be payable as soon as practicable thereafter (but in all cases within thirty days after such Change of Control); and

(2) the other fifty percent (50%) of the Performance Shares (earned at the Deemed Performance Award Achievement level calculated as set forth in subsection (1), above) shall vest on the date after such Change of Control which is the earlier of (i) one year after the date on which such Change of Control occurred, if the Grantee is then providing Service to the Company

or an Affiliate (including to a successor to the Company or such Affiliate), or (ii) the date on which the Grantee's Service to the Company or an Affiliate (including to a successor to the Company or such Affiliate) terminates, and shall be payable (whether under clause (i) or clause (ii) of this section 2(b)(2)) as soon as practicable thereafter (and in any event no later than the 15th day of the third month following the end of the first taxable year in which the right to such payment arises).

(c) Notwithstanding the provisions of sections 2(a) and 4 hereof or any other provision of this Agreement or the Plan, if the Grantee is not a party to a Retention Agreement and so long as the Grantee is still providing Service upon the occurrence of a Change in Control (as defined, as of the date hereof, in the Plan for all purposes of this Agreement), fifty percent (50%) of the Performance Shares, earned at the Deemed Performance Award Achievement Level, shall vest upon such Change in Control and shall be payable as soon as practicable thereafter (but in all cases within thirty days after such Change in Control). The remainder of the Performance Shares shall remain outstanding (on a converted basis, if applicable) and shall remain subject to the terms and conditions of the Plan. If the Grantee provides Service to the Company or an Affiliate (including to a successor to the Company or such Affiliate) from the date of such Change in Control to the date of the first anniversary of such Change in Control or if, prior to the first anniversary of such Change in Control, the Grantee is involuntarily terminated other than for Cause or Disability, the fifty percent (50%) of the Performance Shares outstanding immediately prior to such Change in Control that did not vest at the time of such Change in Control shall vest on the date which is the earlier of (a) the first anniversary of such Change in Control or (b) the date on which the Grantee's Service to the Company or an Affiliate (including to a successor to the Company or such Affiliate) terminates and shall be payable (whether under clause (a) or clause (b) of this section 2(c)) as soon as practicable thereafter (but in no event later than the 15th day of the third month following the end of the first taxable year in which the right to such payment arises). The deemed level of achievement with respect to such awards shall be the Deemed Performance Award Achievement Level.

(d) If, as a result of a Change of Control or a Change in Control, as applicable, shares of Stock are exchanged for or converted into a different form of equity security and/or the right to receive other property (including cash), payment in respect of the Performance Shares shall, to the maximum extent practicable, be made in the same form.

3 . *Form of Payment of Award.* Subject to section 2(d) hereof, the Award shall be payable in shares of Stock. Upon delivery of Performance Shares to the Grantee, the Company shall have the right to withhold from any such distribution, in order to meet the Company's obligations for the payment of withholding taxes, shares of Stock with a Fair Market Value equal to the minimum statutory withholding for taxes (including federal and state income taxes and payroll

taxes applicable to the supplemental taxable income relating to such distribution) and any other tax liabilities for which the Company has an obligation relating to such distribution. For the purpose of this Agreement, the date of determination of Fair Market Value shall be the date as of which the Grantee's rights to payments under the Award are determined by the Committee in accordance with section 2 hereof.

Delivery of Performance Shares shall occur as soon as administratively practicable following the Committee's determination of the Grantee's right to such delivery.

4 . *Termination of Service.* Except as otherwise set forth herein, the Grantee must remain in continuous Service (including to any successors to the Company or an Affiliate) through the Performance Period for the Award to vest. Except as otherwise set forth (a) herein, (b) in the Plan in connection with a Change in Control if the Grantee is not a party to a Retention Agreement, or (c) in a Retention Agreement to which the Grantee is a party in connection with a Change of Control (as defined in such Retention Agreement), in the event the Grantee's Service (including to any successors to the Company or an Affiliate) terminates during the Performance Period, the Grantee's right to payment of the Award shall be determined as follows:

(a) If the Grantee's termination of Service is due to resignation, discharge, or retirement prior to age 65 not meeting the condition set forth in section 4(c) hereof, all rights to the Award shall be immediately forfeited.

(b) If the Grantee's termination of Service during the Performance Period is due to (1) Disability, (2) death, or (3) retirement on or after age 65 not meeting the condition set forth in section 4(c) hereof:

(i) The Grantee's Target number of Performance Shares for the Performance Period shall be reduced to a prorated number (equal to (a) the total number of full days of the Grantee's Service completed during the Performance Period divided by the total number of days in the Performance Period, multiplied by (b) the Target number of Performance Shares granted to Grantee as set forth in section 1 hereof, and rounded to the nearest Performance Share, with 0.5 of a Performance Share being rounded up to the nearest share) of Performance Shares; and

(ii) The Grantee's right to Performance Shares under section 2 hereof shall be determined as the Grantee's Target number of Performance Shares, reduced as set forth in section 4(b)(i) hereof, times the Achieved Percentage; and

(iii) Payment of Awards under this section 4(b) shall be made after the end of the Performance Period at the time and in the manner specified in section 3 hereof.

Notwithstanding the foregoing, if, after termination of Service but prior to payment of the Award, the Grantee breaches any provision hereof, including without limitation the provisions of section 9 hereof, the Grantee shall immediately forfeit all rights to the Award.

(c) If the Grantee's termination of Service is due to retirement on or after age 50, and if, but only if, such retirement is evidenced by a writing which specifically acknowledges that this provision shall apply to such retirement and is executed by the Company's chief executive officer (or, if the Grantee is an executive officer, by a member of the Committee or the chief executive officer at the direction of the Committee, other than with respect to himself), the Grantee's Target number of Performance Shares for the Performance Period shall be as set forth in section 1 hereof and the Grantee's right to Performance Shares under section 2 hereof shall be determined as the Grantee's Target number of Performance Shares times the Achieved Percentage. Payment of the Award under this section 4(c) shall be made after the end of the Performance Period at the time and in the manner specified in section 3 hereof. Notwithstanding the foregoing, if, after termination of Service but prior to payment of the Award, the Grantee breaches any provision hereof, including without limitation the provisions of section 9 hereof, the Grantee shall immediately forfeit all rights to the Award.

(d) If the Grantee's Service is terminated during the Performance Period for any reason other than as set forth in sections 4(a), (b), and (c) hereof, or if an ambiguity exists as to the interpretation of those sections, the Committee shall determine whether the Award shall be forfeited or whether the Grantee shall be entitled to full vesting or pro rata vesting as set forth above based upon full days of Service completed during the Performance Period. Payment of the Award under this section 4(d) shall be made after the end of the Performance Period at the time and in the manner specified in section 3 hereof. Notwithstanding the foregoing, if, after termination of Service but prior to payment of the Award, the Grantee breaches any provision hereof, including without limitation the provisions of section 9 hereof, the Grantee shall immediately forfeit all rights to the Award.

5 . *Adjustments.* If the number of outstanding shares of Stock is increased or decreased or the shares of Stock are changed into or exchanged for a different number of shares or kind of capital stock or other securities of the Company on account of any recapitalization, reclassification, stock split, reverse stock split, spin-off, combination of stock, exchange of stock, stock dividend or other distribution payable in capital stock, or other increase or decrease in shares of Stock effected without receipt of consideration by the Company, then the Target number of Performance Shares granted hereunder shall be adjusted proportionately. No adjustment shall be made in connection with the payment by the Company of any cash dividend on its Stock or in

connection with the issuance by the Company of any warrants, rights, or options to acquire additional shares of Stock or of securities convertible into Stock.

6. *No Rights of Stock Ownership*. This grant of Performance Shares does not entitle the Grantee to any interest in or to any dividend, voting, or other rights normally attributable to Stock ownership.

7. *Nonassignability*. The Grantee's rights and interest in the Performance Shares may not be sold, transferred, assigned, pledged, exchanged, hypothecated or otherwise disposed of except by will or the laws of descent and distribution.

8. *Effect Upon Employment.* This Agreement is not to be construed as giving any right to the Grantee for continuous employment by the Company or a Subsidiary or other Affiliate. The Company and its Subsidiaries and other Affiliates retain the right to terminate the Grantee at will and with or without cause at any time (subject to any rights the Grantee may have under the Grantee's Retention Agreement).

9. *Protective Covenants.* In consideration of the Award granted under this Agreement, the Grantee covenants and agrees as follows (the "Protective Covenants"):

(a) During the Grantee's Service with the Company, and for a two-year period following the termination of the Grantee's Service with the Company, the Grantee agrees not to (i) compete or attempt to compete for, or act as a broker or otherwise participate in, any projects in which the Company has at any time done any work or undertaken any development efforts, or (ii) directly or indirectly solicit any of the Company's customers, vendors, contractors, agents, or any other parties with which the Company has an existing or prospective business relationship, for the benefit of the Grantee or for the benefit of any third party, nor shall the Grantee accept consideration or negotiate or enter into agreements with such parties for the benefit of the Grantee or any third party.

(b) During the Grantee's Service with the Company and for a two-year period following the termination of the Grantee's Service with the Company, the Grantee shall not, directly or indirectly, on behalf of the Grantee or for any other business, person or entity, entice, induce or solicit or attempt to entice, induce or solicit any employee of the Company or its Subsidiaries or other Affiliates to leave the Company's employ (or the employ of any such Subsidiary or other Affiliate) or to hire or to cause any employee of the Company to become employed for any reason whatsoever.

(c) The Grantee shall not, at any time or in any way, disparage the Company or its current or former officers, directors, and employees, orally or in writing, or make any statements that may be derogatory or detrimental to the Company's good name or business reputation.

(d) The Grantee acknowledges that the Company would not have an adequate remedy at law for monetary damages if the Grantee breaches these Protective Covenants. Therefore, in addition to all remedies to which the Company may be entitled for a breach or threatened breach of these Protective Covenants, including but not limited to monetary damages, the Company will be entitled to specific enforcement of these Protective Covenants and to injunctive or other equitable relief as a remedy for a breach or threatened breach. In addition, upon any breach of these Protective Covenants or any separate confidentiality agreement or confidentiality provision between the Company and the Grantee, all of the Grantee's rights to receive Performance Shares not theretofore delivered under this Agreement shall be forfeited.

(e) For purposes of this section 9, the term "Company" shall include all Subsidiaries and other Affiliates of the Company (such Subsidiaries and other Affiliates being hereinafter referred to as the "NextEra Entities"). The Company and the Grantee agree that each of the NextEra Entities is an intended third-party beneficiary of this section 9, and further agree that each of the NextEra Entities is entitled to enforce the provisions of this section 9 in accordance with its terms.

(f) Notwithstanding anything to the contrary contained in this Agreement, the terms of these Protective Covenants shall survive the termination of this Agreement and shall remain in effect.

10. *Successors and Assigns.* This Agreement shall inure to the benefit of and shall be binding upon the Company and the Grantee and their respective heirs, successors and assigns.

11. *Incorporation of Plan's Terms; Other Governing Provisions.* This Agreement is made under and subject to the provisions of the Plan, and all the provisions of the Plan are also provisions of this Agreement, provided, however, (a) if there is a difference or conflict between the provisions of this Agreement and the mandatory provisions of the Plan, such mandatory provisions of the Plan shall govern, (b) if there is a difference or conflict between the provisions of this Agreement and the non-mandatory provisions of the Plan, the provisions of this Agreement shall govern, and (c) if there is a difference or conflict between the provisions of this Agreement and/or a provision of the Plan with a provision of a Retention Agreement, such provision of such Retention Agreement shall govern. Any Retention Agreement constitutes "another agreement with the Grantee" within the meaning of the Plan (including without limitation sections 17.3 and 17.4 thereof). The Company and Committee retain all authority and

powers granted by the Plan and not expressly limited by this Agreement. The Grantee acknowledges that he or she may not and shall not rely on any statement of account or other communication or document issued in connection with the Plan other than the Plan, this Agreement, and any document signed by an authorized representative of the Company that is designated as an amendment of the Plan or this Agreement.

12. *Interpretation*. The Committee shall have the authority to interpret and construe all provisions of this Agreement, and any such interpretation or construction, and any other determination contemplated to be made under the Plan or this Agreement, by the Committee shall be final, binding and conclusive, absent manifest error.

13. *Governing Law/Jurisdiction/Waiver of Jury Trial.* This Agreement shall be construed and interpreted in accordance with the laws of the State of Florida, without regard to its conflict of laws principles. All suits, actions, and proceedings relating to this Agreement or the Plan shall be brought only in the courts of the State of Florida located in Palm Beach County or in the United States District Court for the Southern District of Florida in West Palm Beach, Florida. The Company and the Grantee hereby consent to the personal jurisdiction of the courts described in this section 13 for the purpose of all suits, actions, and proceedings relating to the Agreement or the Plan. The Company and the Grantee each waive all objections to venue and to all claims that a court chosen in accordance with this section 13 is improper based on a venue or a forum non conveniens claim.

TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, THE PARTIES HEREBY KNOWINGLY, VOLUNTARILY AND INTENTIONALLY WAIVE ANY RIGHT WHICH ANY PARTY MAY HAVE TO TRIAL BY JURY IN RESPECT OF ANY PROCEEDING, LITIGATION OR COUNTERCLAIM BASED ON, OR ARISING OUT OF, UNDER OR IN CONNECTION WITH THIS AGREEMENT.

14. *Amendment.* This Agreement may be amended, in whole or in part and in any manner not inconsistent with the provisions of the Plan, at any time and from time to time, by written agreement between the Company and the Grantee.

15. *Data Privacy*. By entering into this Agreement, the Grantee: (i) authorizes the Company or any of the NextEra Entities, and any agent of the Company or any of the NextEra Entities administering the Plan or providing Plan recordkeeping services, to disclose to the Company or any of the NextEra Entities such information and data as the Company or any such NextEra Entities shall reasonably request in order to facilitate the administration of this Agreement; and (ii) authorizes the Company or any of the NextEra Entities to store and transmit such information

in electronic form, provided such information is appropriately safeguarded in accordance with Company policy.

By signing this Agreement, the Grantee accepts and agrees to all of the foregoing terms and provisions and to all the terms and provisions of the Plan incorporated herein by reference and confirms that the Grantee has received a copy of the Plan.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the date and year first above written.

Exhibit 31(a)

Rule 13a-14(a)/15d-14(a) Certification

I, James L. Robo, certify that:

1. I have reviewed this Form 10-K for the annual period ended December 31, 2015 of NextEra Energy, Inc. (the registrant);
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Exhibit 4 (a)

Underwriting Agreement, dated June 10, 2015, with respect to the Broward County Series 2015 Bonds.

$85,000,000
BROWARD COUNTY, FLORIDA

Industrial Development Revenue Bonds
(Florida Power & Light Company Project)
Series 2015

UNDERWRITING AGREEMENT

UNDERWRITING AGREEMENT, dated June 10, 2015, between Broward County, Florida (the "Issuer"), and Morgan Stanley & Co. LLC (the "Underwriter").

1. Description of Bonds. The Issuer proposes to issue and sell $85,000,000 aggregate principal amount of its Industrial Development Revenue Bonds (Florida Power & Light Company Project), Series 2015, with the terms specified in Schedule I hereto (the "Bonds"), pursuant to a Trust Indenture, to be dated as of June 1, 2015 (the "Indenture"), by and between the Issuer and The Bank of New York Mellon Trust Company, N.A., as trustee (the "Trustee"), and pursuant to a resolution adopted by the Issuer on June 2, 2015 (the "Resolution"). The Bonds will be payable, except to the extent payable from bond proceeds and other moneys pledged therefor, solely from, and secured by a pledge of, the revenues to be derived by the Issuer under a Loan Agreement, to be dated as of June 1, 2015 (the "Loan Agreement"), by and between the Issuer and Florida Power & Light Company (the "Company").

2. Purchase, Sale and Closing. On the basis of the representations and warranties contained herein and in the Letter of Representation, hereinafter defined, and subject to the terms and conditions set forth herein and in the Official Statement, hereinafter defined, the Underwriter will purchase from the Issuer, and the Issuer will sell to such Underwriter, the Bonds. The price for the Bonds will be 100% of the principal amount thereof less an underwriting fee of $74,375 and out-of-pocket expenses of $2,878.11. The closing will be held at the office of Locke Lord LLP, 525 Okeechobee Blvd, Suite 1600, West Palm Beach, FL 33401, at 9:00 A.M. New York time on June 11, 2015, or such other date, time or place as may be agreed upon by the parties hereto. The hour and date of such closing are herein called the "Closing Date". The Bonds will be delivered in New York, New York in registered form in the name of a nominee of The Depository Trust Company, and will be made available to the Underwriter for inspection at such place as may be agreed upon by the Issuer, the Company and the Underwriter.

The Issuer acknowledges and agrees that: (i) the primary role of the Underwriter, as underwriter, is to purchase securities, for resale to investors, in an arm's length commercial transaction among the Issuer, the Company and the Underwriter and that the Underwriter has financial and other interests that differ from those of the Issuer; (ii) the Underwriter is acting solely as principal and is not acting as a municipal advisor, financial advisor or fiduciary to the Issuer and has not assumed any advisory or fiduciary responsibility to the Issuer with respect to the transaction contemplated hereby and the discussions, undertakings and procedures leading thereto (irrespective of whether the Underwriter has provided other services or are currently providing other services to the Issuer on other matters); (iii) the only obligations the Underwriter has to the Issuer with respect to the transaction contemplated hereby expressly are set forth in this Agreement and, with respect to its role as remarketing agent, in the Indenture and the

Remarketing Agreement, dated June 11, 2015, between the Company and the Underwriter; and (iv) the Issuer has consulted its own financial and/or municipal, legal, accounting, tax and other advisors, as applicable, to the extent it has deemed appropriate.

3. Representations of the Issuer. The Issuer represents and warrants to the Underwriter that:

(a) The Issuer has approved the delivery of an Official Statement, dated June 3, 2015, for use in connection with the sale and distribution of the Bonds. Appendix A to such Official Statement describes certain matters relating to the Company and is sometimes herein separately referred to as "Appendix A." Such Official Statement, as amended and supplemented, including in each case Appendix A and all documents incorporated by reference therein, Appendix B, Appendix C and Appendix D, is herein referred to as the "Official Statement", and all references herein to matters described, contained or set forth in the Official Statement shall, unless specifically stated otherwise, include Appendix A and all documents incorporated by reference therein, Appendix B, Appendix C and Appendix D. For the purposes of this Agreement, all documents filed by the Company pursuant to Section 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), after the date of the Official Statement and incorporated by reference in the Official Statement shall be deemed to be a supplement to the Official Statement. The information with respect to the Issuer contained in the Official Statement under the heading "Disclosure Required By Florida Blue Sky Regulations" does not contain an untrue statement of a material fact or omit to state a material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading. The Issuer assumes no responsibilities for the accuracy, sufficiency or fairness of any statements in the Official Statement or any supplements thereto other than statements and information therein relating to the Issuer under the captions "Introductory Statement" and "Disclosure Required By Florida Blue Sky Regulations".

(b) The Issuer will not at any time authorize an amendment or supplement (including an amendment or supplement resulting from the filing of a document incorporated by reference) to the Official Statement without prior notice to the Company, the Underwriter, and Ballard Spahr LLP, counsel for the Underwriter, or any such amendment or supplement to which the Company or the Underwriter shall reasonably object in writing, or which shall be unsatisfactory to Ballard Spahr LLP. At the date hereof, the information with respect to the Issuer in the Official Statement is true and correct.

(c) The Issuer is a validly existing political subdivision of the State of Florida with full legal right, power and authority under the laws of the State of Florida, including particularly Part II of Chapter 159, Florida Statutes, as amended, to consummate the transactions involving the Issuer contemplated herein and in the Official Statement and to fulfill the terms hereof on the part of the Issuer to be fulfilled.

(d) The consummation of the transactions contemplated herein and in the Official Statement and the fulfillment of the terms hereof on the part of the Issuer to be fulfilled, have been duly authorized by all necessary action of the Issuer in accordance with the laws of the State of Florida.

(e) The execution and delivery by the Issuer of the Loan Agreement and the Indenture, the pledge and assignment by the Issuer to the Trustee of certain of its rights under the Loan Agreement, the consummation by the Issuer on its part of the transactions contemplated herein and in the Official Statement and the fulfillment of the terms hereof by the Issuer and the compliance by the Issuer with all the terms and provisions of the Indenture and the Loan Agreement will not conflict with, or constitute a breach of or default under, any constitutional provision, statute or ordinance, any indenture, mortgage, deed of trust, resolution or other agreement or instrument to which the Issuer is now a party or by which it is now bound, or, to the knowledge of the Issuer, any order, rule or regulation applicable to the Issuer of any court or governmental agency or body having jurisdiction over the Issuer or any of its activities or properties.

(f) Except as disclosed in or contemplated by the Official Statement, as it may be amended or supplemented, there is no action, suit, proceeding, inquiry or investigation, at law or in equity, or before or by any court, public board or body to which the Issuer is a party, pending or, to the knowledge of the Issuer, threatened against the Issuer, (i) to restrain or enjoin the issuance or sale of the Bonds or the performance by the Issuer of the Loan Agreement or the Indenture including without limitation assignment to the Trustee of the Issuer's right to receive Loan Repayments (as defined in the Loan Agreement) and certain other rights under the Loan Agreement as security for the Bonds, or (ii) wherein an unfavorable decision, ruling or finding would (A) have a material adverse effect on the transactions contemplated herein or in the Official Statement or (B) adversely affect or put in question the validity or enforceability of the Bonds, the Indenture, the Loan Agreement, this Agreement, the Letter of Representation, dated the date hereof, in the form attached hereto as Exhibit F (the "Letter of Representation") from the Company to the Issuer and the Underwriter or any other agreement, instrument or document to which the Issuer is a party or by which it is bound relating to the consummation of the transactions contemplated herein or in the Official Statement.

4. Underwriter's Representation. The Underwriter intends to make a public offering of the Bonds for sale upon the terms set forth in the Official Statement.

5. Covenants of the Issuer. The Issuer agrees that:

(a) As soon as practicable following execution hereof (but in no event later than the earlier of two business days after the date hereof and the day prior to the Closing Date), in order that the Underwriter may comply with paragraph (b)(3) of Rule 15c2-12 ("Rule 15c2-12") promulgated by the Securities and Exchange Commission (the "SEC") under the Exchange Act, the Issuer shall direct the Company to deliver to the Underwriter the final Official Statement, in such quantities as the Underwriter may reasonably request. Upon the issuance thereof, the Issuer will direct the Company to deliver to the Underwriter copies of all amendments and supplements to the Official Statement (other than documents incorporated by reference therein).

(b) It will cooperate with the Company and the Underwriter in connection with the preparation of the Official Statement and any amendment or supplement thereto which the Company may be required to furnish the Underwriter pursuant to the Letter of Representation.

(c) It will furnish such proper information as may be lawfully required and otherwise cooperate in qualifying the Bonds for offer and sale under the blue sky laws of such jurisdictions as the Underwriter may designate, provided that the Issuer shall not be required to qualify as a dealer in securities, or to file any consents to service of process, under the laws of any jurisdiction, or to meet other requirements deemed by the Issuer to be unduly burdensome.

(d) It will not take or omit to take any action the taking or omission of which would cause the proceeds from the sale of the Bonds to be applied in a manner contrary to that provided for in the Indenture and the Loan Agreement, as each may be amended from time to time.

(e) At the request of the Underwriter or the Company, it will take such action as is necessary and within its power and at the sole expense of the Company to assure or maintain the status of the interest on the Bonds as excluded from gross income for purposes of the Internal Revenue Code of 1986, as amended (the "Code"), and the regulations thereunder.

The foregoing covenants are conditioned upon the Company's compliance with Section 2 of the Letter of Representation.

6. Conditions of Underwriter's Obligation. The obligation of the Underwriter to purchase and pay for the Bonds shall be subject to the accuracy of, and compliance with, the representations and warranties of the Issuer and the Company contained herein and in the Letter of Representation, respectively, to the performance by the Issuer and the Company of their obligations to be performed hereunder and under the Letter of Representation, respectively, at and prior to the Closing Date and to the following conditions:

(a) At the Closing Date, the Indenture, the Loan Agreement, Continuing Disclosure Undertaking between the Company and the Trustee to be dated as of the Closing Date (the "CDU") and the Letter of Representation shall be in full force and effect, and if executed subsequent to the execution hereof and prior to the Closing Date, shall not have been amended, modified or supplemented except as may have been agreed to in writing by the Underwriter; provided, however, that the acceptance of delivery of the Bonds by the Underwriter on the Closing Date shall be deemed to constitute such approval; and the Underwriter shall have received an executed counterpart or certified copy of the Indenture, the CDU and the Loan Agreement.

(b) At the Closing Date, the Bonds shall have been duly authorized, executed and authenticated in accordance with the provisions of the Indenture.

(c) At the Closing Date, no order, decree or injunction of any court of competent jurisdiction shall have been issued, or proceedings therefor shall have been commenced, nor shall any order, ruling, regulation or official statement by any governmental official, body or board, have been issued, nor shall any legislation have been enacted, with the purpose or effect of prohibiting or limiting the issuance, offering or sale of the Bonds as contemplated herein or in the Official Statement or the performance of the Indenture or the Loan Agreement, in accordance with their respective terms.

(d) At the Closing Date, there shall be in full force and effect an authorization of the Florida Public Service Commission with respect to the participation of the Company in the

transactions contemplated herein and in the Official Statement, and containing no provision unacceptable to the Underwriter by reason of the fact that it is materially adverse to the Company, it being understood that no authorization in effect at the time of the execution hereof by the Underwriter contains any such unacceptable provision.

(e) At the Closing Date, the Underwriter shall have received opinions, dated the Closing Date, of the Office of the County Attorney for Broward County, Florida substantially in the form of Exhibit A hereto, Locke Lord LLP, as Bond Counsel substantially in the forms of Appendix B to the Official Statement and Exhibit B hereto, Liebler, Gonzalez & Portuondo, substantially in the form of Exhibit C hereto and Morgan, Lewis & Bockius LLP, as counsel to the Company, substantially in forms of Exhibits D-1 and D-2 hereto, and Ballard Spahr LLP, as counsel for the Underwriter, substantially in the form of Exhibit E hereto, respectively, but with such changes as the Underwriter shall approve.

(f) At the Closing Date, the Underwriter shall have received from Deloitte & Touche LLP an "agreed-upon procedures letter", in form and substance satisfactory to the Underwriter, setting forth the procedures undertaken with respect to the review of the audited financial statements of the Company appearing in the Official Statement and providing certain conclusions regarding the information with respect to which such review procedures were applied.

(g) At the Closing Date, the Underwriter shall have received from the Issuer a certificate of its Mayor or Vice Mayor of County Commissioners, dated the Closing Date, stating in effect that each of the representations and warranties of the Issuer set forth herein is true, accurate and complete in all material respects at and as of the Closing Date and that each of the obligations of the Issuer hereunder to be performed by it at or prior to the Closing Date has been performed.

(h) At the Closing Date, the Underwriter shall have received a certified copy of the Resolution of the Issuer authorizing the issuance and sale of the Bonds.

(i) Since the date of the Official Statement, as it may be amended or supplemented (including amendments or supplements resulting from the filing of documents incorporated by reference therein), and up to the Closing Date, there shall have been no material adverse change in the business, properties or financial condition of the Company and its subsidiaries taken as a whole, except as reflected in or contemplated by the Official Statement, as it may be so amended or supplemented, and, since such date and up to the Closing Date, there shall have been no transaction entered into by the Company or any of its subsidiaries that is material to the Company and its subsidiaries taken as a whole, other than transactions reflected in or contemplated by the Official Statement, as it may be so amended or supplemented, and transactions in the ordinary course of business.

(j) At the Closing Date, the Underwriter shall have received from the Company a certificate, dated the Closing Date, signed by the President or any Vice President or the Treasurer or any Assistant Treasurer of the Company to the effect of paragraph (i) above and stating in effect that the representations and warranties of the Company set forth in the Letter of Representation are true, accurate and complete in all material respects at and as of the Closing

Date and that each of the obligations of the Company under the Letter of Representation to be performed at or prior to the Closing Date has been performed.

(k) At the Closing Date, the Underwriter shall have received from the Company evidence satisfactory to the Underwriter to the effect that Moody's Investors Service, Inc., Standard and Poor's Rating Services, a Division of The McGraw Hill Companies, Inc. and Fitch Ratings Inc. have or will provide a short term rating of "P-1", "A-2" and "F1", respectively, with respect to the Bonds.

In case any of the conditions specified above in this Section 6 shall not have been fulfilled, this Agreement may be terminated by the Underwriter upon mailing or delivering written notice thereof to the Issuer and the Company. Any such termination shall be without liability of any party to any other party except as otherwise provided in Section 3 of the Letter of Representation.

7. Termination.

(a) This Agreement may be terminated by the Underwriter by delivering written notice thereof to the Issuer and the Company, at or prior to the Closing Date, if:

(i) after the date hereof and at or prior to the Closing Date there shall have occurred any general suspension of trading in securities on the New York Stock Exchange or there shall have been established by the New York Stock Exchange or by the SEC or by any federal or state agency or by the decision of any court any limitation on prices for such trading or any restrictions on the distribution of securities, or a general banking moratorium declared by New York or federal authorities, the effect of which on the financial markets of the United States shall be such as to make it impracticable for the Underwriter to enforce contracts for the sale of the Bonds;

(ii) there shall have occurred any new outbreak of hostilities including, but not limited to, an escalation of hostilities which existed prior to the date of this Agreement or other national or international calamity or crisis, the effect of which on the financial markets of the United States shall be such as to make it impracticable for the Underwriter to enforce contracts for the sale of the Bonds;

(iii) after the date hereof and at or prior to the Closing Date, legislation shall be enacted by the Congress or adopted by either House thereof or a decision shall be rendered by a federal court, including the Tax Court of the United States, or a ruling, regulation or order by or on behalf of the Treasury Department of the United States, the Internal Revenue Service or other governmental agency shall be issued or proposed with respect to the imposition of federal income taxation upon receipts, revenues or other income of the same kind and character expected to be derived by the Issuer, including, without limitation, loan repayments and other amounts under the Loan Agreement, or upon interest received on bonds of the same kind and character as the Bonds, with the result in any such case that it is impracticable, in the reasonable judgment of the Underwriter, for the Underwriter to enforce contracts for the sale of the Bonds;

(iv) the subject matter of any amendment or supplement to the Official Statement prepared and furnished by the Issuer or the Company renders it, in the reasonable

judgment of the Underwriter, either inadvisable to proceed with the offering or inadvisable to proceed with the delivery of the Bonds to be purchased hereunder;

(v) a stop order, release, regulation or no-action letter by or on behalf of SEC or any other governmental agency having jurisdiction of the subject matter shall have been issued or made to the effect that the issuance, offering or sale of the Bonds, including all the underlying obligations as contemplated hereby or by the Official Statement, or any document relating to the issuance, offering or sale of the Bonds is or would be in violation of any provision of the federal securities laws at the Closing Date, including, but not limited to, the Securities Act and the Trust Indenture Act of 1939, as amended; or

(vi) there shall have occurred a material adverse change in the financial markets of the United States, the effect of which shall make it impracticable for the Underwriter to enforce contracts for the sale of the Bonds.

(b) This Agreement shall terminate upon the termination of the Letter of Representation as provided in Section 4 thereof.

(c) Any termination of this Agreement pursuant to this Section 7 shall be without liability of any party to any other party except as otherwise provided in Section 3 of the Letter of Representation or the Memorandum of Agreement dated April 28, 2015 between the County and the Company and the related letter dated May 20, 2015 from the Treasurer of the Company to the Board of County Commissioners.

8. Truth-In-Bonding Statement. The Issuer is proposing to issue $85,000,000 principal amount of Bonds for the purpose of acquisition, construction and equipping of certain wastewater facilities and solid waste facilities of the Company, including functionally related and subordinate facilities, at its plant sites located in Broward County, more fully described in the Indenture. The Bonds are expected to be repaid over a period of 30 years. The Bonds will initially bear interest at a variable rate. At a forecasted average interest rate of 2.40%, total interest paid over the life of the Bonds will be $61,144,108.79.

The source of repayment or security for this proposal is the payments by the Company under a Loan Agreement securing the Bonds. Authorizing the Bonds will result in zero moneys of the County not being available to finance other services of the County each year for 30 years. An itemized list setting forth the nature and estimated amounts of expenses to be incurred by the Underwriter in connection with the issuance of the Bonds is set forth on Schedule II attached hereto.

9. Miscellaneous. The validity and interpretation of this Agreement shall be governed by the law of the State of Florida. This Agreement shall inure to the benefit of the Issuer, the Underwriter and the Company, and their respective successors. Nothing in this Agreement is intended or shall be construed to give to any other person, firm or corporation any legal or equitable right, remedy or claim under or in respect of this Agreement or any provision herein contained. The term "successors" as used in this Agreement shall not include any purchaser, as such purchaser, of any Bonds from or through the Underwriter. This Agreement may be executed by any one or more of the parties hereto in any number of counterparts, each of which

shall be deemed to be an original, but all such counterparts shall together constitute one and the same instrument.

The representations and warranties of the Issuer contained in Section 3 hereof shall remain operative and in full force and effect, regardless of any investigation made by or on behalf of the Underwriter, and shall survive the delivery of the Bonds.

10. Notices and other Actions. All notices, demands and formal actions hereunder will be in writing mailed, telecopied or delivered to:

Broward County, Florida
Fort Lauderdale, Florida

Locke Lord LLP
West Palm Beach, Florida

Morgan Stanley & Co. LLC
1585 Broadway
New York, New York 10036

(the "Underwriter" named in the
Underwriting Agreement dated
June __, 2015 (the "Agreement")
relating to the Bonds referred to below)

Ladies and Gentlemen:

I am County Attorney for Broward County, Florida, (the "Issuer") and as such have acted as Issuer's counsel in connection with the issuance and sale of $85,000,000 aggregate principal amount of the Issuer's Industrial Development Revenue Bonds (Florida Power & Light Company Project), Series 2015 (the "Bonds"). The Bonds are being issued pursuant to a resolution adopted by the Issuer on June 2, 2015 (the "Resolution") to finance a portion of the cost of acquisition, construction and equipping of certain wastewater facilities and solid waste facilities located at the Port Everglades Energy Center and the Lauderdale Power Plant (the "Project") of Florida Power & Light Company (the "Company"), all as more particularly described in the Trust Indenture, dated as of June 1, 2015 (the "Indenture"), between the Issuer and The Bank of New York Mellon Trust Company, N.A., as trustee (the "Trustee"). The issuance of the Bonds and the Projects were approved by the Issuer in the Resolution.

Based upon such review as I deemed necessary, I am of the opinion that:

(1) The Issuer is a validly existing political subdivision of the State of Florida with full legal right, power and authority under the laws of the State of Florida, including particularly Part II of Chapter 159, Florida Statutes, as amended, to execute and perform its obligations under the Loan Agreement, dated as of June 1, 2015 between the Company and the Issuer (the "Loan Agreement"), the Agreement, the Indenture and the Bonds.

(2) The Resolution is a valid resolution of the Issuer, duly adopted by the Issuer at a meeting duly noticed, called and held in accordance with the Constitution and laws of the State of Florida.

(3) The acceptance by the Issuer of the Letter of Representation dated June __, 2015 from the Company (the "Letter of Representation") has been duly authorized, and said Letter of Representation has been validly accepted by the Issuer.

(4) No approval, consent or authorization of any Florida governmental authority or public agency not already obtained is required in connection with the consummation by the Issuer of the transactions contemplated by the Official Statement or by the Agreement or the performance of the Issuer's obligations under the Loan Agreement, the Indenture or the Agreement, other than any approval, consent or authorization required by Florida's securities or blue sky laws, as to which I express no opinion.

(5) The Issuer has duly approved the use and distribution of the Official Statement, dated June 3, 2015 (the "Official Statement") at the meeting wherein the Resolution was adopted and has duly authorized with such changes therein as shall be approved by the Company in order to reflect the final terms and details of each Series of the Bonds.

(6) To the best of my knowledge, neither the making or the performance by the Issuer of the Loan Agreement, the Indenture or the Agreement, nor the acceptance by the Issuer of the Letter of Representation, violates or conflicts with any provision of the Broward County Code of Ordinances or Charter, or any resolution, agreement or instrument to which the Issuer is a party or by which it is bound, or, to my knowledge, any order, rule or regulation applicable to the Issuer of any court or governmental agency or body having jurisdiction over the Issuer or any of its activities or properties.

(7) Except as disclosed in or contemplated by the Official Statement, I have not been made aware of any action, suit, proceeding or investigation at law or in equity or before or by any court, public board or body, to which the Issuer is a party which is pending or, threatened against or affecting the Issuer wherein an unfavorable decision, finding or ruling would adversely affect (i) the transactions contemplated by the Indenture, the Loan Agreement, the Official Statement or by the Agreement, (ii) the validity or enforceability of the Bonds, the Indenture or the Loan Agreement, or (iii) the exclusion from gross income for federal income tax purposes of interest on the Bonds.

Very truly yours,

EXHIBIT B

June 11, 2015

Morgan Stanley & Co. LLC
1585 Broadway, 16th Floor
New York, NY 10036

The Bank of New York Mellon Trust Company, N.A.

Ladies and Gentlemen:

Concurrently herewith, we have delivered our approving opinion as bond counsel (the "Approving Opinion"), relating to $85,000,000 aggregate principal amount of Broward County, Florida Industrial Development Revenue Bonds (Florida Power & Light Company Project), Series 2015 initially dated June 11, 2015 (the "Bonds"), and examined a record of proceedings relating thereto. Capitalized words used in this opinion shall have the same meanings as are given such capitalized words in the Official Statement related to the Bonds dated June 3, 2015.

The opinions herein are supplemental to and are subject to all qualifications and limitations contained in our Approving Opinion, except that we also opine with respect to the federal securities laws of the United States of America. Although the Approving Opinion was addressed only to the Issuer, Morgan Stanley & Co. LLC and The Bank of New York Mellon Trust Company, N.A. are authorized to rely upon the Approving Opinion to the same extent as if it were addressed to them. Subject to the foregoing, we are of the opinion that:

(1) In connection with the offering and sale of the Bonds to the public, neither the Bonds nor any securities evidenced thereby are required to be registered under the 1933 Act and neither the Indenture nor any other instrument is required to be qualified under the 1939 Act.

(2) The statements in the Official Statement relating to the Bonds, the Indenture and the Agreement under the captions "The Series 2015 Bonds" (except for certain information and statements provided by The Depository Trust Company under "The Series 2015 Bonds -- Book-Entry System", as to which, with your permission, we express no opinion), "The Agreement" and "The Indenture", insofar as they describe the provisions of the Bonds, the Agreement and the Indenture, are fair and accurate statements or summaries of the matters set forth therein. The statements pertaining to the Bonds in the Official Statement under the caption "Tax Matters" fairly and accurately present the information purported to be shown.

This letter is furnished by us solely for your benefit in connection with the original issuance and delivery of the Bonds and may not, without our express written consent, be relied upon by any other person.

Respectfully yours,

EXHIBIT C

Morgan Stanley & Co. LLC
1585 Broadway
New York, New York 10036
(the "Underwriter" named in the
Underwriting Agreement dated
June __, 2015 (the "Agreement")
relating to the Bonds referred to below)

Ladies and Gentlemen:

With reference to the issuance by Broward County, Florida (the "Issuer") and sale to the Underwriter named in the Agreement of $85,000,000 aggregate principal amount of the Issuer's Industrial Development Revenue Bonds (Florida Power & Light Company Project), Series 2015 (the "Bonds"), issued under the Trust Indenture, dated as of June 1, 2015 (the "Indenture"), by and between the Issuer and The Bank of New York Mellon Trust Company, N.A., as trustee (the "Trustee"), we advise you that, as counsel for Florida Power & Light Company (the "Company"), we have reviewed (a) the Indenture; (b) the Loan Agreement, dated as of June 1, 2015 (the "Loan Agreement"), by and between the Company and the Issuer; (c) the Letter of Representation, dated June __, 2015 (the "Letter of Representation"), from the Company to the Issuer and the Underwriter; (d) the Remarketing Agreement, dated June __, 2015 (the "Remarketing Agreement"), by and between the Company and Morgan Stanley & Co. LLC, as remarketing agent ("Remarketing Agent"); (e) the Continuing Disclosure Undertaking, dated June __, 2015 (the "Continuing Disclosure Undertaking"), by and between the Company and the Trustee; (f) the Tender Agreement, dated June __, 2015 (the "Tender Agreement"), among The Bank of New York Mellon Trust Company, N.A., as Trustee, tender agent and registrar, the Company and the Remarketing Agent; (g) the Official Statement, dated June __, 2015, including Appendix A and all documents incorporated by reference therein (the "Official Statement"); (h) the Company's Restated Articles of Incorporation, as amended to the date hereof (the "Charter"), and (i) the Company's Amended and Restated Bylaws, as amended to the date hereof (the "Bylaws"). We have also reviewed the order issued by the Florida Public Service Commission ("FPSC") authorizing, among other things, the issuance and sale of debt securities in 2015. We are providing this letter pursuant to Section 6(e) of the Agreement.

For purposes of rendering the opinions contained in this opinion letter, we have not reviewed any documents other than the documents listed above. We have also not reviewed any documents that may be referred to in or incorporated by reference into any of the documents listed above.

This opinion letter has been prepared and is to be construed in accordance with the "Report on Third-Party Legal Opinion Customary Practice in Florida, dated December 3, 2011" (the "Report"). The Report is incorporated by reference into this opinion letter. We have assumed the genuineness of all signatures, the legal capacity of natural persons, the authenticity of the documents submitted to us as originals, the conformity to the original documents of all documents submitted to us as certified, facsimile or photostatic copies, and the authenticity of the originals of all documents submitted to us as copies. We have also assumed the legal existence, power and authority of the Issuer and that the Loan Agreement constitutes a valid and binding obligation of the Issuer. In rendering the opinions set forth herein, we have relied, without investigation, on each of the assumptions implicitly included in all opinions of Florida counsel that are set forth in the Report in "Common Elements of Opinions – Assumptions".

As to any facts that are material to the opinions hereinafter expressed, we have relied without investigation upon the representations of the Company contained in the Letter of Representation and upon certificates of officers of the Company.

Based on the foregoing, and subject to the qualifications and limitations set forth herein, it is our opinion that:

1. The Company is a validly existing corporation and is in good standing under the laws of the State of Florida.

2. The Loan Agreement has been duly and validly authorized by all necessary corporate action, has been duly and validly executed and delivered, and is a valid and binding agreement of the Company enforceable in accordance with its terms, subject to the effect of bankruptcy, insolvency, reorganization, fraudulent conveyance, receivership, moratorium and other laws affecting the rights and remedies of creditors generally and of general principles of equity and the effect of applicable public policy on the enforceability of provisions relating to indemnification contained in Section 7.3 therein.

3. The Loan Agreement is being executed and delivered pursuant to the authority contained in an order of the FPSC, which authority is adequate to permit such action. To our knowledge, said authorization is still in full force and effect, and no further approval, authorization, consent or order of any other Florida public board or body is legally required for the performance of the Company's obligations under the Loan Agreement or in connection with any other agreement of the Company entered into in connection therewith.

4. The Letter of Representation has been duly and validly authorized by all necessary corporate action and has been duly and validly executed and delivered.

5. The Remarketing Agreement has been duly and validly authorized by all necessary corporate action, has been duly and validly executed and delivered.

6. The Continuing Disclosure Undertaking has been duly and validly authorized by all necessary corporate action, has been duly and validly executed and delivered.

7. The Tender Agreement has been duly and validly authorized by all necessary corporate action, has been duly and validly executed and delivered, and is a valid and binding

agreement of the Company enforceable in accordance with its terms, subject to the effect of bankruptcy, insolvency, reorganization, fraudulent conveyance, receivership, moratorium and other laws affecting the rights and remedies of creditors generally and of general principles of equity.

8. The consummation by the Company of the transactions contemplated in the Letter of Representation, and the fulfillment by the Company of the terms of the Loan Agreement and the Letter of Representation, will not result in a breach of any of the terms or provisions of the Charter or the Bylaws.

This letter is limited to the laws of the State of Florida insofar as they bear on matters covered hereby. In our examination of laws, rules and regulations for purposes of this letter, our review was limited to those laws, rules and regulations that a Florida counsel exercising customary professional diligence would reasonably be expected to recognize as being applicable to transactions of the type contemplated by the Loan Agreement. The laws, rules and regulations that are defined as the Excluded Laws in the "Common Elements of Opinions-Limitations to Laws of Specific Jurisdictions or to Substantive Areas of Law; Excluded Areas of Law" section of the Report are expressly excluded from the scope of this opinion letter.

This letter is rendered to you in connection with the above described transaction. This letter may not be relied upon by you for any other purpose, or relied upon or furnished to any other person, firm or corporation without our prior written permission. This letter is expressed as of the date hereof, and we do not assume any obligation to update or supplement it to reflect any fact or circumstance that hereafter comes to our attention, or any change in law that hereafter occurs.

Respectfully submitted,

LIEBLER, GONZALEZ & PORTUONDO

relating to the Bonds referred to below)

Ladies and Gentlemen:

With reference to the issuance by Broward County, Florida (the "Issuer") and sale to the Underwriter named in the Agreement of $85,000,000 aggregate principal amount of the Issuer's Industrial Development Revenue Bonds (Florida Power & Light Company Project), Series 2015 (the "Bonds"), issued under the Trust Indenture, dated as of June 1, 2015 (the "Indenture"), by and between the Issuer and The Bank of New York Mellon Trust Company, N.A., as trustee (the "Trustee"), we advise you that, as counsel for Florida Power & Light Company (the "Company"), we have reviewed (a) the Indenture; (b) the Loan Agreement, dated as of June 1, 2015 (the "Loan Agreement"), by and between the Company and the Issuer; (c) the Letter of Representation, dated June __, 2015 (the "Letter of Representation"), from the Company to the Issuer and the Underwriter; (d) the Remarketing Agreement, dated June __, 2015 (the "Remarketing Agreement"), by and between the Company and Morgan Stanley & Co. LLC; (e) the Continuing Disclosure Undertaking, dated June __, 2015 (the "Continuing Disclosure Undertaking"), by and between the Company and the Trustee; and (f) the Official Statement, dated June 3, 2015, including Appendix A and all documents incorporated by reference therein (the "Official Statement"). We are providing this letter pursuant to Section 6(e) of the Agreement.

We have assumed the genuineness of all signatures, the legal capacity of natural persons, the authenticity of the documents submitted to us as originals, the conformity to the original documents of all documents submitted to us as certified, facsimile or photostatic copies, and the authenticity of the originals of all documents submitted to us as copies. We have also assumed that the Letter of Representation constitutes a valid and binding obligation of each party thereto other than the Company.

As to any facts that are material to the opinions hereinafter expressed, we have relied without investigation upon the representations of the Company contained in the Letter of Representation and upon certificates of officers of the Company.

Based on the foregoing, and subject to the qualifications and limitations set forth herein, it is our opinion that:

1. The statements made in the Official Statement under the captions "The Series 2015 Bonds", "The Agreement", "The Indenture", and "Continuing Disclosure", insofar as they purport to constitute summaries of the terms of the documents referred to therein, fairly summarize in all material respects such documents, except that we do not express any opinion or belief as to the information contained in the Official Statement under the caption "The Series 2015 Bonds—Book-Entry System".

2. Assuming that the Letter of Representation has been duly and validly authorized by all necessary corporate action and has been duly and validly executed and delivered, the Letter of Representation is a valid and binding agreement of the Company enforceable in accordance with its terms, subject to the effect of bankruptcy, insolvency, reorganization, fraudulent conveyance, receivership, moratorium and other laws affecting the rights and remedies of creditors generally and of general principles of equity and the effect of applicable public policy on the enforceability of provisions relating to indemnification provision contained in Section 7.3 therein.

3. Assuming that the Remarketing Agreement has been duly and validly authorized by all necessary corporate action and has been duly and validly executed and delivered, the Remarketing Agreement is a valid and binding agreement of the Company enforceable in accordance with its terms, subject to the effect of bankruptcy, insolvency, reorganization, fraudulent conveyance, receivership, moratorium and other laws affecting the rights and remedies of creditors generally and of general principles of equity and the effect of applicable public policy on the enforceability of provisions relating to indemnification contained in Section 3 therein.

4. Assuming that the Continuing Disclosure Undertaking has been duly and validly authorized by all necessary corporate action and has been duly and validly executed and delivered, the Continuing Disclosure Undertaking is a valid and binding agreement of the Company enforceable in accordance with its terms, subject to the effect of bankruptcy, insolvency, reorganization, fraudulent conveyance, receivership, moratorium and other laws affecting the rights and remedies of creditors generally and of general principles of equity.

5. The consummation by the Company of the transactions contemplated in the Letter of Representation, and the fulfillment by the Company of the terms of the Loan Agreement and the Letter of Representation, will not result in a breach of any of the terms or provisions of, or constitute a default under, any agreement or instrument filed as an exhibit to any of the Company's reports heretofore filed with the Securities and Exchange Commission pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, that is incorporated by reference into the Official Statement to which the Company is now a party, except where such breach or default would not have a material adverse effect on the business, properties or financial condition of the Company and its subsidiaries, taken as a whole.

As counsel to the Company, we express no opinion concerning the validity of the Bonds or the status of the interest thereon under federal income tax laws. We have assumed that the Bonds have been validly issued and that the interest thereon is not included, with certain exceptions, in the gross income of the owners thereof for purposes of federal income taxation. Locke Lord LLP, Bond Counsel, has rendered opinions, of even date herewith, to that effect. On the basis of such assumptions and such opinions, it is our opinion that, in connection with the offer and sale of the Bonds as contemplated in the Official Statement, it is not necessary to register any security under the Securities Act of 1933, as amended, or to qualify any indenture under the Trust Indenture Act of 1939, as amended.

This letter is limited to the laws of the State of New York and the federal laws of the United States insofar as they bear on matters covered hereby. In our examination of laws, rules and regulations for purposes of this letter, our review was limited to those laws, rules and regulations that, in our experience, are generally known to be applicable to transactions of the type contemplated by the Agreement.

This letter is rendered to you in connection with the above-described transaction. This letter may not be relied upon by you for any other purpose, or relied upon or furnished to any other person, firm or corporation without our prior written permission. This letter is expressed as of the date hereof, and we do not assume any obligation to update or supplement it to reflect any fact or circumstance that hereafter comes to our attention, or any change in law that hereafter occurs.

Very truly yours,

To: Broward County, Florida
Fort Lauderdale, Florida

Morgan Stanley & Co. LLC
1585 Broadway
New York, New York 10036
(the "Underwriter" named in the
Underwriting Agreement dated
June __, 2015 (the "Agreement")
relating to the Bonds referred to below)

Ladies and Gentlemen:

With reference to the issuance by Broward County, Florida (the "Issuer") and sale to the Underwriter named in the Agreement of $85,000,000 aggregate principal amount of the Issuer's Industrial Development Revenue Bonds (Florida Power & Light Company Project), Series 2015 (the "Bonds"), issued under the Trust Indenture, dated as of June 1, 2015 (the "Indenture"), by and between the Issuer and The Bank of New York Mellon Trust Company, N.A., as trustee (the "Trustee"), we advise you that, as counsel for Florida Power & Light Company (the "Company"), we have reviewed (a) the Indenture; (b) the Loan Agreement, dated as of June 1, 2015, by and between the Company and the Issuer; (c) the Letter of Representation, dated June __, 2015, from the Company to the Issuer and the Underwriter; (d) the Remarketing Agreement, dated June __, 2015, by and between the Company and Morgan Stanley & Co. LLC; (e) the Continuing Disclosure Undertaking, dated June __, 2015, by and between the Company and the Trustee; and (f) the Official Statement, dated June 3, 2015, including Appendix A and all documents incorporated by reference therein (the "Official Statement"). We are providing this letter pursuant to Section 6(e) of the Agreement.

We refer you to the Official Statement. As counsel to the Company, we reviewed the Official Statement and participated in discussions with your representatives and certain officers and employees of the Company, certain of its other legal counsel, its independent registered public accounting firm, Bond Counsel and your counsel regarding such documents and information and related matters.

The purpose of our professional engagement was not to establish or confirm factual matters set forth in the Official Statement and we have not undertaken any obligation to verify independently any of such factual matters. Moreover, many of the determinations required to be made in the preparation of the Official Statement involve matters of a non-legal nature.

Subject to the foregoing, we confirm to you, on the basis of the information we gained in the course of performing the services referred to above, that each of the documents incorporated by reference in the Official Statement (except as to the financial statements, schedules and other financial, statistical and accounting data, including any such data presented in interactive data

format, and assessments or reports on the effectiveness of internal control over financial reporting, as to which we make no comment), at the time such document was filed with the Securities and Exchange Commission, appeared on its face to be appropriately responsive in all material respects to the applicable requirements of the Securities Exchange Act of 1934, as amended. Furthermore, subject to the foregoing, nothing came to our attention that caused us to believe that the Official Statement, as of its date, and as of the date hereof, contained or contains any untrue statement of a material fact or omitted or omits to state any material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading; provided, however, that (a) we are not passing upon and do not assume any responsibility for the accuracy or completeness of, or otherwise verified, the statements contained in the Official Statement (except as and to the extent set forth in paragraph 1 in our letter, dated the date hereof delivered to you pursuant to Section 6(e) of the Agreement), (b) we do not express any belief with respect to the financial statements, schedules, notes, other financial, statistical and accounting information derived therefrom, including any such information presented in interactive data format, and assessments or reports on the effectiveness of internal control over financial reporting, in each case contained in the Official Statement or incorporated by reference, as the case may be, at the respective times as of which the advisements set forth in this paragraph are provided and (c) we do not express any belief with respect to statements made in the Official Statement under the captions "The Issuer", "Tax Matters", or "Disclosure Required by Florida Blue Sky Regulations" or any statements in the Official Statement regarding the exclusion from gross income for federal income tax purposes of interest on the Bonds.

This letter is limited to the laws of the State of New York and the federal laws of the United States insofar as they bear on matters covered hereby.

This letter is rendered to you in connection with the above-described transaction. This letter may not be relied upon by you for any other purpose, or relied upon or furnished to any other person, firm or corporation without our prior written permission. This letter is expressed as of the date hereof, and we do not assume any obligation to update or supplement it to reflect any fact or circumstance that hereafter comes to our attention, or any change in law that hereafter occurs.

Very truly yours,

EXHIBIT E

June __, 2015

Morgan Stanley & Co. LLC, as Underwriter
1585 Broadway
New York, New York 10036

Re: $85,000,000 Broward County, Florida Industrial Development Revenue Bonds (Florida Power & Light Company Project) Series 2015

Ladies and Gentlemen:

We have acted as counsel to Morgan Stanley & Co. LLC (the "Underwriter") in connection with the issuance by Broward County, Florida (the "Issuer") of the above-captioned bonds (the "Series 2015 Bonds"). The Series 2015 Bonds are being issued on the date hereof pursuant to a Trust Indenture dated as of June 1, 2015 (the "Indenture") between the Issuer and Florida Power & Light Company (the "Borrower"). Each term used but not defined herein has the meaning assigned to such term in the Underwriting Agreement dated June 10, 2015 (the "Underwriting Agreement") by and between the Issuer and the Underwriter.

In connection with our engagement, we have examined originals or copies of the documents delivered at the closing on June 11, 2015, as listed in the Closing Index dated as of the closing date, and such laws as we deemed necessary. We have also reviewed, and believe you may reasonably rely upon, the opinions delivered to you today pursuant to the provisions of the Underwriting Agreement by the County Attorney for Broward County, Florida, Locke Lord LLP, as Bond Counsel, and Liebler, Gonzalez & Portuondo and Morgan, Lewis & Bockius LLP, as co-counsel to the Company.

Based upon the foregoing, we are of the opinion that:

(1) The conditions in the Underwriting Agreement relating to your obligation to purchase the Series 2015 Bonds have been satisfied.

(2) No registration need be made with the Securities and Exchange Commission under the Securities Act of 1933, as amended, in connection with the offering and sale of the Series 2015 Bonds, and neither the Indenture nor any other instrument is required to be qualified under the Trust Indenture Act of 1939, as amended, in connection with the offering and sale of the Series 2015 Bonds.

(3) The Continuing Disclosure Undertaking dated June 11, 2015 between the Borrower and The Bank of New York Mellon Trust Company, N.A., as trustee (the "Trustee"), complies as to form with the requirements of Rule 15c2-12 (the "Rule") under the Securities Exchange Act of 1934.

We have participated in the preparation of the Official Statement, dated June 3, 2015 (including the appendices thereto, the "Official Statement") relating to the offering and sale of the Series 2015 Bonds. We have also participated in certain discussions with the officials of the Borrower and others in order to assist the Underwriter in its investigation of the business affairs of the Borrower. In addition to our examination of the Closing Documents, we have participated with the Underwriter by telephone with officials of the Borrower and its counsel on June 3, 2015 to review the present business of the Borrower and its operations and financial condition, and to inquire about the prospective business, operations and financial condition of the Borrower and the accuracy of the factual statements contained in the Official Statement.

Except for the review of documents and the discussions referred to above, we have not made any independent investigation of the Borrower's business affairs or any independent verification of the statements of fact contained in the Official Statement. On the basis of our participation, we do not believe that the Official Statement, as of its date, or as of the date hereof, in each case except for (i) financial projections or other financial or statistical data included or incorporated by reference therein, (ii) the information relating to The Depository Trust Company under the heading "THE SERIES 2015 BONDS — Book-Entry System", and (iii) Appendix C of the Official Statement.

We are furnishing this letter to the Underwriter solely for its benefit. We disclaim any obligation to update this letter. This letter is not to be used, circulated, quoted or otherwise referred to or relied upon for any other purpose or by any other person, provided it may be included in any Closing Index. This letter is not intended to and may not be relied upon by holders of the Bonds or any party who is not the Underwriter.

Very truly yours,

EXHIBIT F

FLORIDA POWER & LIGHT COMPANY

LETTER OF REPRESENTATION

_____, 2015

To: Broward County, Florida
Fort Lauderdale, Florida

Morgan Stanley & Co. LLC
1585 Broadway
New York, New York 10036

(the "Underwriter" named in the
Underwriting Agreement dated
the date hereof (the "Agreement")
relating to the Bonds referred to below)

Ladies and Gentlemen:

In consideration of the issuance and sale by Broward County, Florida (the "Issuer") of $85,000,000 aggregate principal amount of its Industrial Development Revenue Bonds (Florida Power & Light Company Project), Series 2015 (the "Bonds") and the purchase of the Bonds by the Underwriter pursuant to the Agreement, Florida Power & Light Company (the "Company") represents, warrants and covenants to and agrees with the Issuer and the Underwriter, and the Issuer and the Underwriter by their acceptance hereof agree with the Company as follows (all terms not specifically defined in this Letter of Representation shall have the same meanings herein as in the Agreement):

1. Representations and Warranties of the Company. The Company represents and warrants that:

(a) When the Official Statement shall be issued and at the Closing Date, the Official Statement, as it may be amended or supplemented (including amendments or supplements resulting from the filing of documents incorporated by reference therein), will not contain an untrue statement of a material fact or omit to state a material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading; provided, that the foregoing representations and warranties in this subsection (a) shall not apply to statements in or omissions from the Official Statement under the captions "Tax Matters", "Underwriting" (second paragraph only) and "Disclosure Required By Florida Blue Sky Regulations" or in Appendices B, C and D or in the statements on the cover page with respect to the initial public offering price, tax matters or in the statement on the page (i) with respect to stabilization of the market price of the Bonds by the Underwriter.

(b) The documents incorporated by reference in Appendix A to the Official Statement, as amended or supplemented, fully complied, at the time they were filed with the Securities and Exchange Commission (the "Commission"), in all material respects with the applicable provisions of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and the applicable instructions, rules and regulations of the Commission thereunder.

(c) The financial statements contained or incorporated by reference in Appendix A to the Official Statement present fairly the consolidated financial condition and results of operations of the Company and its subsidiaries taken as a whole at the respective dates or for the respective periods to which they apply; and such financial statements have been prepared in each case in accordance with generally accepted accounting principles consistently applied throughout the periods involved except as otherwise indicated in the Official Statement.

(d) Since the most recent dates as of which information is given in the Official Statement, as it may be amended or supplemented (including amendments or supplements resulting from the filing of documents incorporated by reference therein), there has not been any material adverse change in the business, properties or financial condition of the Company, and its subsidiaries taken as a whole, nor has any transaction been entered into by the Company or any of its subsidiaries that is material to FPL and its subsidiaries taken as whole, other than changes and transactions reflected in or contemplated by the Official Statement, as it may be amended or supplemented, and transactions in the ordinary course of business. The Company and its subsidiaries do not have any material contingent obligation which is not reflected in or contemplated by the Official Statement, as it may be amended or supplemented.

(e) The consummation of the transactions contemplated herein and in the Official Statement and the fulfillment of the terms of the Loan Agreement and this Letter of Representation, on the part of the Company to be fulfilled, have been duly authorized by all necessary corporate action of the Company in accordance with the provisions of its Restated Articles of Incorporation, as amended (the "Charter"), its Amended and Restated Bylaws (the "Bylaws") and applicable law, and this Letter of Representation constitutes, and the Loan Agreement and the CDU when executed and delivered by the Company will constitute, legal, valid and binding obligations of the Company in accordance with their terms, except as limited by bankruptcy, insolvency or other laws affecting creditors' rights generally and general equity principles, and subject to any principles of public policy limiting the right to enforce the indemnification provisions contained in Section 6 herein and Section 7.3 of the Loan Agreement.

(f) The consummation of the transactions contemplated herein and in the Official Statement and the fulfillment of the terms of the Loan Agreement, the CDU and this Letter of Representation will not result in a breach of any of the terms or provisions of, or constitute a default under the Charter or Bylaws of the Company or any indenture, mortgage, deed of trust or other agreement or instrument to which the Company is now a party, except where such breach or default would not have a material adverse effect on the business, properties, or financial condition of the Company and its subsidiaries taken as a whole.

(g) The terms and conditions of the Agreement as they relate to the Company and the Company's participation in the transactions contemplated thereby are satisfactory to it.

1A. Acknowledgment of the Company. The Company acknowledges and agrees that: (i) the primary role of the Underwriter, as underwriter, is to purchase securities, for resale to investors, in an arm's length commercial transaction among the Issuer, the Company and the Underwriter and that the Underwriter has financial and other interests that differ from those of the Company; (ii) the Underwriter is acting solely as principal and is not acting as a municipal advisor, financial advisor or fiduciary to the Company and has not assumed any advisory or fiduciary responsibility the Company with respect to the transaction contemplated hereby and the discussions, undertakings and procedures leading thereto (irrespective of whether the Underwriter has provided other services or are currently providing other services to the Company on other matters); (iii) the only obligations the Underwriter has to the Company with respect to the transaction contemplated hereby expressly are set forth in this Agreement and, with respect to its role as remarketing agent, in the Indenture and the Remarketing Agreement, dated June 11, 2015, between the Company and the Underwriter; and (iv) the Company has consulted its own financial and/or municipal, legal, accounting, tax and other advisors, as applicable, to the extent it has deemed appropriate.

2. Covenants of the Company. The Company agrees that:

(a) As soon as practicable following execution hereof (but in no event later than the earlier of two business days after the date hereof and the day prior to the Closing Date), in order that the Underwriter may comply with paragraph (b)(3) of Rule 15c2-12 ("Rule 15c2-12") promulgated by the SEC under the Exchange Act, the Company shall deliver to the Underwriter the final Official Statement, in such quantities as the Underwriter may reasonably request. Upon the issuance thereof, the Company will deliver to the Underwriter copies of all amendments and supplements to the Official Statement.

(b) At its expense, if requested by the Underwriter, it will cause to be prepared and furnished to the Underwriter one copy of each of the documents incorporated by reference in the Official Statement, as it may be amended or supplemented, and as many additional copies of such documents incorporated by reference as shall be requested of the Underwriter by prospective purchasers of the Bonds.

(c) It will furnish such proper information as may be lawfully required and otherwise cooperate in qualifying the Bonds for offer and sale under the blue sky laws of such jurisdictions as the Underwriter may designate, provided that the Company shall not be required to qualify as a foreign corporation or dealer in securities, or to file any consents to service of process, under the laws of any jurisdiction, or to meet other requirements deemed by the Company to be unduly burdensome.

(d) It will not take or omit to take any action the taking or omission of which would cause the proceeds from the sale of the Bonds to be applied in a manner contrary to that provided for in the Indenture and the Loan Agreement, as each may be amended from time to time.

3. Expenses.

(a) Upon the issuance and delivery of the Bonds by the Issuer to the Underwriter, the Company will pay, or cause to be paid, all expenses (including reasonable out-of-pocket

expenses of the Underwriter) and costs incident to the authorization, issuance, printing, sale and delivery, as the case may be, of the underwriting papers, the Bonds, the Official Statement, this Letter of Representation and the blue sky survey, including without limitation (A) any taxes, other than transfer taxes, in connection with the issuance of the Bonds hereunder; (B) any rating agency fees; (C) the fees of the Trustee; (D) the fees and disbursements of Bond Counsel, County Attorney and the Company; (E) the fees of the Issuer; and (F) the fees and disbursements (including filing fees) of Ballard Spahr LLP, counsel for the Underwriter.

(b) If the Agreement is terminated in accordance with the provisions of Sections 6 or 7(b) thereof, the Company will pay all the expenses referred to in subsection (a) of this Section 3, and the reasonable out-of-pocket expenses of the Underwriter, not in excess, however, of an aggregate of $5,000 and the Underwriter will pay the remainder of its expenses.

(c) If the Agreement is terminated in accordance with the provisions of Section 7(a) thereof, the Company will pay all the expenses referred to in subsection (a) of this Section 3 and the Underwriter will pay the remainder of its expenses.

(d) If the Underwriter shall fail or refuse, otherwise than for some reason sufficient to justify, in accordance with the terms of the Agreement, the cancellation or termination of its obligation thereunder, to purchase and pay for the Bonds as provided in Section 2 thereof, the Underwriter will pay all the expenses referred to in subsection (a) of this Section 3.

(e) The Issuer shall not in any event be liable to the Underwriter or the Company for any expenses or costs incident to the issuance and sale of the Bonds nor for damages on account of loss of anticipated profits. The Company shall not in any event be liable to the Underwriter for damages on account of loss of anticipated profits. Nothing herein shall be construed to relieve the Underwriter of its liability for its default under the Agreement.

4. Conditions of the Company's Obligation. The obligation of the Company to participate in the transactions contemplated herein and in the Official Statement shall be subject to the condition that, on the Closing Date, there shall be in full force and effect an authorization of the Florida Public Service Commission with respect to the participation of the Company in such transactions, and containing no provision unacceptable to the Company by reason of the fact that it is materially adverse to the Company, it being understood that no authorization in effect at the time of the execution of this Letter of Representation contains any such unacceptable provision. In case the aforesaid condition shall not have been fulfilled, this Letter of Representation and the Company's obligation to participate in the transactions contemplated herein and in the Official Statement may be terminated by the Company, upon mailing or delivering written notice thereof to the Underwriter, except that the obligations of the Company under Section 3 hereof shall survive.

5. Representation of the Issuer. The acceptance and confirmation of this Letter of Representation by the Issuer shall constitute a representation and warranty by the Issuer to the Company that the representations and warranties contained in Section 3 of the Agreement are true as of the date hereof and will be true in all material respects as of the Closing Date.

6. Indemnification.

(a) The Company agrees to indemnify and hold harmless the Issuer and any official or employee thereof, the Underwriter and each person who controls the Underwriter within the meaning of Section 15 of the Securities Act of 1933, as amended (the "Securities Act"), against any and all losses, claims, damages or liabilities, joint or several, to which they or any of them may become subject and to reimburse each of them for any legal or other expenses (including, to the extent hereinafter provided, reasonable counsel fees) when and as incurred by them in connection with investigating any such losses, claims, damages or liabilities or in connection with defending any actions, insofar as such losses, claims, damages, liabilities, expenses or actions arise out of or are based upon any untrue statement or alleged untrue statement of a material fact contained in the Official Statement, as amended or supplemented (if any amendments or supplements thereto, including documents incorporated by reference, shall have been furnished), or the omission or alleged omission to state therein a material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading; provided, however, that the indemnity agreement contained in this Section 6 shall not apply to the Underwriter (or any person controlling the Underwriter) on account of any such losses, claims, damages, liabilities, expenses or actions arising out of, or based upon, any such untrue statement or alleged untrue statement, or any such omission or alleged omission, under the captions "Tax Matters" (except to the extent that such statement or omission is based upon an untrue statement of or an omission to state, or an alleged untrue statement of or omission to state, a material fact in the engineering facts and representations and conclusions of the Company concerning the Projects (as defined in the Loan Agreement) contained in the closing certificate furnished to Locke Lord LLP, as Bond Counsel, and except to the extent that such statement or omission is based upon the Company's continuing compliance with Section 148(f) of the Internal Revenue Code of 1986, as amended, and the regulations thereunder) and "Underwriting" (second paragraph only) or in the statement on the page (i) with respect to stabilization of the market price of the Bonds by the Underwriter or in the statements on the cover page with respect to the initial public offering price or tax matters (except to the extent that such statement or omission is based upon an untrue statement of or an omission to state, or an alleged untrue statement of or omission to state, a material fact in the engineering facts and representations and conclusions of the Company concerning the Projects contained in the closing certificate furnished to Locke Lord LLP, as Bond Counsel, and except to the extent that such statement or omission is based upon the Company's continuing compliance with Section 148(f) of the Internal Revenue Code of 1986, as amended, and the regulations thereunder); and provided, further, that the indemnity agreement contained in this Section 6 shall not inure to the benefit of the Underwriter (or of any person controlling such Underwriter) on account of any such losses, claims, damages, liabilities, expenses or actions arising from the sale of Bonds to any person if such Underwriter shall have failed to send or give to such person (i) with or prior to the written confirmation of such sale, a copy of the Official Statement or the Official Statement as amended or supplemented, if any amendments or supplements thereto shall have been timely furnished at or prior to the time of written confirmation of the sale involved, but exclusive of any documents incorporated by reference therein unless, with respect to the delivery of any amendment or supplement, the alleged omission or alleged untrue statement is not corrected in such amendment or supplement at the time of confirmation, or (ii) with or prior to the delivery of such Bonds to such person, a copy of any amendment or supplement to the Official Statement which shall have been furnished subsequent to such written confirmation and prior to the delivery of such Bonds to such person,

exclusive of any documents incorporated by reference therein unless, with respect to the delivery of any amendment or supplement, the alleged omission or alleged untrue statement was not corrected in such amendment or supplement at the time of such delivery. The Issuer agrees to notify promptly the Company, and the Underwriter agrees to notify promptly the Company and the Issuer, of the commencement of any litigation or proceedings against it, any of its aforesaid officials or employees or any person controlling it as aforesaid, in connection with the issuance and sale of the Bonds.

(b) The Underwriter agrees to indemnify and hold harmless the Issuer and any official or employee thereof, and the Company, its officers and directors, and each person who controls the Company within the meaning of Section 15 of the Securities Act, against any and all losses, claims, damages or liabilities, joint or several, to which they or any of them may become subject and to reimburse each of them for any legal or other expenses (including, to the extent hereinafter provided, reasonable counsel fees) when and as incurred by them in connection with investigating any such losses, claims, damages or liabilities, or in connection with defending any actions, insofar as such losses, claims, damages, liabilities, expenses or actions arise out of or are based upon any untrue statement or alleged untrue statement of a material fact contained in the Official Statement, as amended or supplemented (if any amendments or supplements thereto shall have been furnished), or the omission or alleged omission to state therein a material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading, but only with respect to information contained under the caption "Underwriting" (second paragraph only) or in the statements on the cover page with respect to the initial public offering price and terms of offering or in the statement on the page (i) with respect to stabilization of the market price of the Bonds by the Underwriter. The Issuer and the Company each agree promptly to notify the Underwriter, the Issuer and the Company, as the case may be, of the commencement of any litigation or proceedings against it, any of its aforesaid officials or employees, or any of its aforesaid officers and directors or any person controlling it as aforesaid, in connection with the issuance and sale of the Bonds.

(c) The Company, the Underwriter and the Issuer each agree that, upon the receipt of notice of the commencement of any action against it, any of its aforesaid officers and directors, any of its aforesaid officials or employees or any person controlling it as aforesaid, as the case may be, in respect of which indemnity may be sought on account of any indemnity agreement contained herein, it will promptly give written notice of the commencement thereof to the party or parties against whom indemnity shall be sought hereunder, but the omission so to notify such indemnifying party or parties of any such action shall not relieve such indemnifying party or parties from any liability which it or they may have to the indemnified party otherwise than on account of such indemnity agreement. In case such notice of any such action shall be so given, such indemnifying party shall be entitled to participate at its own expense in the defense or, if it so elects, to assume (in conjunction with any other indemnifying parties) the defense of such action, in which event such defense shall be conducted by counsel chosen by such indemnifying party or parties satisfactory to the indemnified party or parties and who shall be defendant or defendants in such action, and such defendant or defendants shall bear the fees and expenses of any additional counsel retained by them; but if the indemnifying party shall elect not to assume the defense of such action, such indemnifying party will reimburse such indemnified party or parties for the reasonable fees and expenses of any counsel retained by them; provided, however, if the defendants in any such action include both the indemnified party and the indemnifying

party and counsel for the indemnifying party shall have reasonably concluded that there may be a conflict of interest involved in the representation by such counsel of both the indemnifying party and the indemnified party, the indemnified party or parties shall have the right to select separate counsel, satisfactory to the indemnifying party, to participate in the defense of such action on behalf of such indemnified party or parties (it being understood, however, that the indemnifying party shall not be liable for the expenses of more than one separate counsel representing the indemnified parties who are parties to such action).

7. Miscellaneous. The validity and interpretation of this Letter of Representation shall be governed by the law of the State of Florida. This Letter of Representation shall inure to the benefit of the Company, the Issuer, the Underwriter and, with respect to the provisions of Section 6 hereof, each official, employee, officer, director and controlling person referred to in said Section 6, and their respective successors. Nothing in this Letter of Representation is intended or shall be construed to give to any other person, firm or corporation any legal or equitable right, remedy or claim under or in respect of this Letter of Representation or any provision herein contained. The term "successors" as used herein shall not include any purchaser, as such purchaser, of any Bonds from or through the Underwriter.

The indemnity agreements of the Company and the Underwriter contained in Section 6 hereof and the representations and warranties of the Company and the Issuer contained herein shall remain operative and in full force and effect, regardless of any investigation made by or on behalf of the Issuer or any official or employee thereof, the Underwriter or any controlling person thereof, or the Company or any director, officer or controlling person thereof, and shall survive the delivery of the Bonds. The agreements contained in Section 3 hereof to pay expenses shall survive the termination of the Agreement and this Letter of Representation.

This Letter of Representation may be executed in several counterparts, each of which shall be regarded as an original and all of which shall constitute one and the same agreement. This Letter of Representation shall become effective upon the execution and acceptance thereof and the effectiveness of the Agreement, and it shall terminate as provided in Section 4 hereof or upon the termination of the Agreement.

8. Notices. All communications hereunder shall be in writing or by telecopy and, if to the Underwriter, shall be mailed or delivered to them or, if to the Issuer, shall be mailed or delivered to it at Broward County, Florida, 115 S. Andrews Avenue, Fort Lauderdale, Florida 33301, Attention: Chief Financial Officer or, if to the Company, shall be mailed or delivered to Florida Power & Light Company, 700 Universe Boulevard, Juno Beach, Florida 33408, Attention: Treasurer.

If the foregoing correctly sets forth our understanding, please indicate your acceptance thereof in the space provided below for that purpose, whereupon this letter agreement and your acceptance shall constitute a binding agreement between us.

Very truly yours,

FLORIDA POWER & LIGHT COMPANY

Exhibit 4 (b)

Underwriting Agreement, dated November 16, 2015, with respect to the Mortgage Bonds.

FLORIDA POWER & LIGHT COMPANY

FIRST MORTGAGE BONDS

UNDERWRITING AGREEMENT

November 16, 2015

To the Representatives named in Schedule II
hereto, on behalf of the Underwriters
named in Schedule II hereto

Ladies and Gentlemen:

1. Introductory. Florida Power & Light Company, a Florida corporation ("**FPL**"), proposes to issue and sell its first mortgage bonds ("**First Mortgage Bonds**") of the series designation, with the terms and in the principal amount specified in *Schedule I* hereto (the "**Bonds**"). FPL hereby confirms its agreement with the several Underwriters (as defined below) as set forth herein.

The term "**Underwriters**" as used herein shall be deemed to mean the entity or several entities named in *Schedule II* hereto and any underwriter substituted as provided in *Section 5* hereof, and the term "**Underwriter**" shall be deemed to mean one of such Underwriters. If the entity or entities listed as a Representative in *Schedule II* hereto (the "**Representatives**") are the same as the entity or entities listed as Underwriters in *Schedule II* hereto, then the terms "**Underwriters**" and "**Representatives,**" as used herein, shall each be deemed to refer to such entity or entities. The Representatives represent that they have been authorized by each Underwriter to enter into this agreement on behalf of such Underwriter and to act for it in the manner herein provided. All obligations of the Underwriters hereunder are several and not joint. If more than one entity is named as a Representative in *Schedule II* hereto, any action under or in respect of this agreement may be taken by such entities jointly as the Representatives or by one of the entities acting on behalf of the Representatives and such action will be binding upon all the Underwriters.

2. Description of Bonds. The Bonds will be a series of First Mortgage Bonds issued by FPL under its Mortgage and Deed of Trust, dated as of January 1, 1944, to Deutsche Bank Trust Company Americas (formerly known as Bankers Trust Company), as Trustee (the "**Mortgage Trustee**"), and The Florida National Bank of Jacksonville (now resigned), as heretofore supplemented and as it will be further supplemented by a supplemental indenture relating to the Bonds (the "**Supplemental Indenture**") in substantially the form heretofore delivered to the Representatives. Such Mortgage and Deed of Trust as it has been and will be so supplemented is hereinafter called the "**Mortgage.**"

3. Representations and Warranties of FPL. FPL represents and warrants to the several Underwriters that:

(a) FPL has filed with the Securities and Exchange Commission (the "**Commission**") a joint registration statement with NextEra Energy, Inc., a Florida corporation ("**NEE**"), and NextEra Energy Capital Holdings, Inc., a Florida corporation ("**NEE Capital**"), on Form S-3 (Registration Statement Nos. 333-205558, 333-205558-01 and 333-205558-02) ("**Registration Statement No. 333-205558**"), for the registration under the Securities Act of 1933, as amended (the "**Securities Act**"), of

(i) an unspecified aggregate amount of (A) shares of FPL's serial Preferred Stock, $100 par value and shares of FPL's Preferred Stock without par value, (B) warrants of FPL, (C) First Mortgage Bonds, (D) senior debt securities of FPL, and (E) subordinated debt securities of FPL;

(ii) an unspecified aggregate amount of (A) shares of NEE's common stock, $.01 par value ("**Common Stock**"), (B) shares of NEE's preferred stock, $.01 par value ("**NEE Preferred Stock**"), (C) contracts to purchase Common Stock or NEE Preferred Stock or other agreements or instruments requiring NEE to issue Common Stock or NEE Preferred Stock (collectively, "**Stock Purchase Contracts**"), (D) units, each representing ownership of a Stock Purchase Contract and any of debt securities of NEE Capital, debt securities of NEE, or debt securities of third parties, including U.S. Treasury securities, (E) warrants of NEE, (F) senior debt securities of NEE, (G) subordinated debt securities of NEE, and (H) junior subordinated debentures of NEE;

(iii) an unspecified aggregate amount of (A) guarantees of NEE related to the NEE Capital Senior Debt Securities (as defined below) and NEE Capital Preferred Stock (as defined below), (B) subordinated guarantees of NEE related to NEE Capital Subordinated Debentures (as defined below), and (C) junior subordinated guarantees of NEE Capital Junior Subordinated Debentures (as defined below); and

(iv) an unspecified aggregate amount of (A) shares of NEE Capital's preferred stock, $.01 par value ("**NEE Capital Preferred Stock**"), (B) senior debt securities of NEE Capital ("**NEE Capital Senior Debt Securities**"), (C) subordinated debt securities of NEE Capital ("**NEE Capital Subordinated Debt Securities**"), and (D) junior subordinated debentures of NEE Capital ("**NEE Capital Junior Subordinated Debentures**").

Such registration statement has become effective and no stop order suspending such effectiveness has been issued under the Securities Act and no proceedings for that purpose have been instituted or are pending or, to the knowledge of FPL, threatened by the Commission.

References herein to the term "**Registration Statement**" (i) as of any given time means Registration Statement No. 333-205558, as amended or supplemented to such

time, including all documents incorporated by reference therein as of such time pursuant to Item 12 of Form S-3 ("**Incorporated Documents**") and any prospectus, preliminary prospectus supplement or prospectus supplement relating to the Bonds (any reference to any preliminary prospectus supplement or any prospectus supplement shall be understood to include the Base Prospectus (as defined below)) deemed to be a part thereof as of such time pursuant to Rule 430B under the Securities Act ("**Rule 430B**") that has not been superseded or modified as of such time and (ii) without reference to any given time means the Registration Statement as of 8:25 A.M., New York City time, on the date hereof (which date and time is the earlier of the date and time of (A) the first use of the preliminary prospectus supplement relating to the Bonds and (B) the first contract of sale of the Bonds), which time shall be considered the "**Effective Date**" of the Registration Statement. For purposes of the definition of Registration Statement in the preceding sentence, information contained in any prospectus, preliminary prospectus supplement or prospectus supplement that is deemed retroactively to be a part of the Registration Statement pursuant to Rule 430B shall be considered to be included in the Registration Statement as of the time specified in Rule 430B. References herein to the term "**Pricing Prospectus**" means (i) the prospectus relating to FPL forming a part of Registration Statement No. 333-205558, including all Incorporated Documents (the "**Base Prospectus**"), and (ii) any prospectus, preliminary prospectus supplement or prospectus supplement relating to the Bonds deemed to be a part of such registration statement that has not been superseded or modified (for purposes of the definition of Pricing Prospectus with respect to a particular offering of the Bonds, information contained in a prospectus, preliminary prospectus supplement or prospectus supplement relating to the Bonds that is deemed retroactively to be a part of the Registration Statement pursuant to Rule 430B shall be considered to be included in the Pricing Prospectus as of the time that prospectus, preliminary prospectus supplement or prospectus supplement is filed with the Commission pursuant to Rule 424 under the Securities Act ("**Rule 424**")). References herein to the term "**Prospectus**" means the Pricing Prospectus that discloses the public offering price and other final terms of the Bonds and otherwise satisfies Section 10(a) of the Securities Act.

The prospectus supplement relating to the Bonds proposed to be filed pursuant to Rule 424 shall be substantially in the form delivered to the Representatives prior to the execution of this agreement. Each of the Underwriters acknowledges that on or subsequent to the Closing Date (as defined in *Section 5* hereof), FPL may file a post-effective amendment to the Registration Statement pursuant to Rule 462(d) under the Securities Act or a Current Report on Form 8-K in order to file one or more unqualified opinions of counsel and any documents executed in connection with the offering of the Bonds.

(b) The Registration Statement constitutes an "automatic shelf registration statement" (as defined in Rule 405 under the Securities Act ("**Rule 405**")) filed within three years of the date hereof; the Registration Statement became effective upon filing; no notice of objection of the Commission with respect to the use of the Registration Statement pursuant to Rule 401(g)(2) under the Securities Act has been received by FPL and not removed; and with respect to the Bonds, FPL is a "well-known seasoned issuer"

within the meaning of subparagraph (1)(ii) of the definition of "well-known seasoned issuer" in Rule 405 and is not an "ineligible issuer" (in each case as defined in Rule 405).

(c) The Registration Statement at the Effective Date fully complied, and the Prospectus, both as of the date hereof and at the Closing Date, and the Registration Statement and the Mortgage, at the Closing Date, will fully comply, in all material respects with the applicable provisions of the Securities Act and the Trust Indenture Act of 1939, as amended, respectively, and, in each case, the applicable instructions, rules and regulations of the Commission thereunder; the Registration Statement, at the Effective Date, did not, and the Registration Statement, at the Closing Date, will not, contain an untrue statement of a material fact, or omit to state a material fact required to be stated therein or necessary to make the statements therein not misleading; the Prospectus, both as of the date hereof and at the Closing Date, will not include an untrue statement of a material fact or omit to state a material fact necessary in order to make the statements contained therein, in the light of the circumstances under which they were made, not misleading; provided, that the foregoing representations and warranties in this *Section 3(c)* shall not apply to statements or omissions made in reliance upon and in conformity with information furnished in writing to FPL by or on behalf of any Underwriter through the Representatives expressly for use in connection with the preparation of the Registration Statement or the Prospectus, or to any statements in or omissions from the Statements of Eligibility on Form T-1, or amendments thereto, filed as exhibits to the Registration Statement (collectively, the "**Statements of Eligibility**") or to any statements or omissions made in the Registration Statement or the Prospectus relating to The Depository Trust Company ("**DTC**") Book-Entry-Only System that are based solely on information contained in published reports of DTC; and the Incorporated Documents, when filed with the Commission, fully complied or will fully comply in all material respects with the applicable provisions of the Securities Exchange Act of 1934, as amended (the "**Exchange Act**"), and the applicable instructions, rules and regulations of the Commission thereunder.

(d) As of the Applicable Time (as defined below), the Pricing Disclosure Package (as defined below) did not contain an untrue statement of a material fact or omit to state a material fact necessary in order to make the statements contained therein, in the light of the circumstances under which they were made, not misleading; provided, that the foregoing representations and warranties in this *Section 3(d)* shall not apply to statements or omissions made in reliance upon and in conformity with information furnished in writing to FPL by or on behalf of any Underwriter through the Representatives expressly for use in connection with the preparation of the Pricing Prospectus, any preliminary prospectus supplement or any Issuer Free Writing Prospectus (as defined below), or to any statements in or omissions from the Pricing Prospectus, any preliminary prospectus supplement or any Issuer Free Writing Prospectus relating to the DTC Book-Entry-Only System that are based solely on information contained in published reports of DTC. References to the term "**Pricing Disclosure Package**" means the documents listed in *Schedule III*, taken together as a whole. References to the term "**Issuer Free Writing Prospectus**" means an issuer free writing prospectus, as defined in Rule 433 under the Securities Act ("**Rule 433**"). References to the term "**Applicable Time**" means 4:42 P.M., New York City time, on the date hereof.

(e) As of the Applicable Time, no Issuer Free Writing Prospectus includes any information that conflicts with the information contained in the Registration Statement, the Prospectus or the Pricing Prospectus, including any document incorporated by reference therein that has not been superseded or modified.

(f) The financial statements included as part of or incorporated by reference in the Pricing Disclosure Package, the Prospectus and the Registration Statement present fairly the consolidated financial condition and results of operations of FPL and its subsidiaries taken as a whole at the respective dates or for the respective periods to which they apply; such financial statements have been prepared in each case in accordance with generally accepted accounting principles consistently applied throughout the periods involved except as otherwise indicated in the Pricing Disclosure Package, the Prospectus and the Registration Statement; and Deloitte & Touche LLP, who has audited the audited financial statements of FPL, is an independent registered public accounting firm as required by the Securities Act and the Exchange Act and the rules and regulations of the Commission thereunder.

(g) Except as reflected in or contemplated by the Pricing Disclosure Package, since the respective most recent times as of which information is given in the Pricing Disclosure Package, there has not been any material adverse change in the business, properties or financial condition of FPL and its subsidiaries taken as a whole, whether or not in the ordinary course of business, nor has any transaction been entered into by FPL or any of its subsidiaries that is material to FPL and its subsidiaries taken as a whole, other than changes and transactions contemplated by the Pricing Disclosure Package and transactions in the ordinary course of business. FPL and its subsidiaries have no contingent obligation material to FPL and its subsidiaries taken as a whole, which is not disclosed in or contemplated by the Pricing Disclosure Package.

(h) The execution and delivery of this agreement and the consummation of the transactions herein contemplated by FPL, and the fulfillment of the terms hereof on the part of FPL to be fulfilled, have been duly authorized by all necessary corporate action of FPL in accordance with the provisions of its Restated Articles of Incorporation, its Amended and Restated Bylaws and applicable law, and the Bonds when issued and delivered by FPL as provided herein will constitute valid and binding obligations of FPL enforceable against FPL in accordance with their terms, except as limited or affected by bankruptcy, insolvency, reorganization, receivership, moratorium, fraudulent conveyance or other laws affecting mortgagees' and other creditors' rights and remedies generally and general principles of equity and to concepts of materiality, reasonableness, good faith and fair dealing and the discretion of the court before which any matter is brought.

(i) The execution and delivery of this agreement and the consummation of the transactions herein contemplated by FPL, the fulfillment of the terms hereof on the part of FPL to be fulfilled, and the compliance by FPL with all the terms and provisions of the Mortgage will not result in a breach of any of the terms or provisions of, or constitute a default under, FPL's Restated Articles of Incorporation or Amended and Restated Bylaws, or any indenture, mortgage, deed of trust or other agreement or instrument to which FPL or any of its subsidiaries is now a party, or violate any law or any order, rule,

decree or regulation applicable to FPL or any of its subsidiaries of any federal or state court, regulatory board or body or administrative agency having jurisdiction over FPL or any of its subsidiaries or any of their respective property, except where such breach, default or violation would not have a material adverse effect on the business, properties or financial condition of FPL and its subsidiaries taken as a whole.

(j) FPL has no direct or indirect significant subsidiaries (as defined in Regulation S-X (17 CFR Part 210)).

(k) FPL has been duly organized, is validly existing and is in good standing under the laws of its jurisdiction of organization, and is duly qualified to do business and is in good standing as a foreign corporation in each jurisdiction in which its ownership of properties or the conduct of its businesses requires such qualification, except where the failure so to qualify would not have a material adverse effect on the business, properties or financial condition of FPL and its subsidiaries taken as a whole, and has the power and authority as a corporation necessary to own or hold its properties and to conduct the businesses in which it is engaged.

(l) The Bonds will conform in all material respects to the description thereof in the Pricing Disclosure Package and the Prospectus.

(m) The Mortgage (i) has been duly authorized by FPL by all necessary corporate action, has been duly executed and delivered by FPL and is a valid and binding instrument enforceable against FPL in accordance with its terms, except as limited or affected by bankruptcy, insolvency, reorganization, receivership, moratorium, fraudulent conveyance or other laws affecting mortgagees' and other creditors' rights and remedies generally and general principles of equity and to concepts of materiality, reasonableness, good faith and fair dealing and the discretion of the court before which any matter is brought and (ii) conforms in all material respects to the description thereof in the Pricing Disclosure Package and the Prospectus.

(n) FPL is not, and after giving effect to the offering and sale of the Bonds and the application of the proceeds therefrom as described in the Pricing Disclosure Package and the Prospectus, will not be, an "investment company" within the meaning of the Investment Company Act of 1940, as amended.

(o) Except as described in the Pricing Disclosure Package and the Prospectus, FPL or its subsidiaries have valid franchises, licenses and permits adequate for the conduct of the business of FPL and its subsidiaries as described in the Pricing Disclosure Package and the Prospectus, except where the failure to have such franchises, licenses and permits would not reasonably be expected to have a material adverse effect on FPL and its subsidiaries taken as a whole.

(p) The interactive data in eXtensible Business Reporting Language filed as exhibits to FPL's Form 10-K for the year ended December 31, 2014 and Forms 10-Q for the quarters ended March 31, 2015, June 30, 2015 and September 30, 2015 fairly presents

the information called for in all material respects and has been prepared in accordance with the Commission's rules and guidelines applicable thereto.

4. Purchase and Sale. Subject to the terms and conditions in this agreement (including the representations and warranties herein contained), FPL agrees to sell to the respective Underwriters named in *Schedule II* hereto, severally and not jointly, and the respective Underwriters agree, severally and not jointly, to purchase from FPL for an aggregate purchase price of $595,122,000, the respective principal amount of the Bonds set forth opposite their respective names in *Schedule II* hereto.

The Underwriters agree to make a *bona fide* public offering of the Bonds as set forth in the Pricing Disclosure Package, such public offering to be made as soon after the execution of this agreement as practicable, subject, however, to the terms and conditions of this agreement. The Underwriters have advised FPL that the Bonds will be offered to the public at the amount per Bond as set forth in *Schedule I* hereto as the Price to Public and to certain dealers selected by the Representatives at a price which represents a concession. Such dealers' concession may not be in excess of 0.400% of the principal amount per Bond under the Price to Public.

Each Underwriter agrees that (i) no information that is presented by it to investors has been or will be inconsistent with the information contained in the Pricing Disclosure Package as it may then be amended or supplemented and (ii) it will make no offer that would constitute a Free Writing Prospectus that is required to be filed by FPL pursuant to Rule 433 other than an Issuer Free Writing Prospectus in accordance with *Section 6(h)* hereof. References to the term "**Free Writing Prospectus**" means a free writing prospectus as defined in Rule 405.

5. Time, Date and Place of Closing, Default of Underwriter. Delivery of the Bonds and payment therefor by wire transfer in federal funds shall be made at 9:00 A.M., New York City time, on the settlement date set forth on *Schedule I*, at the offices of Morgan, Lewis & Bockius LLP, 101 Park Avenue, New York, New York 10178, or at such other time, date or place as may be agreed upon in writing by FPL and the Representatives. The time and date of such delivery and payment are herein called the "**Closing Date**."

The Bonds shall be delivered to the Representatives for the respective accounts of the Underwriters against payment by the several Underwriters through the Representatives of the purchase price therefor. Delivery of the Bonds shall be made through the facilities of DTC unless FPL and the Representatives shall otherwise agree. For the purpose of expediting the checking of the Bonds by the Representatives on behalf of the Underwriters, FPL (if delivery of the Bonds shall be made otherwise than through the facilities of DTC) agrees to make such Bonds available to the Representatives for such purpose at the offices of Morgan, Lewis & Bockius LLP, 101 Park Avenue, New York, New York 10178, not later than 2:00 P.M., New York City time, on the business day preceding the Closing Date, or at such other time, date or place as may be agreed upon by FPL and the Representatives.

If any Underwriter shall fail to purchase and pay for the principal amount of the Bonds which such Underwriter has agreed to purchase and pay for hereunder (otherwise than by reason of any failure on the part of FPL to comply with any of the provisions contained herein), the non-defaulting Underwriters shall be obligated to purchase and pay for (in addition to the

respective principal amount of the Bonds set forth opposite their respective names in *Schedule II* hereto) the principal amount of the Bonds which such defaulting Underwriter or Underwriters failed to purchase and pay for, up to a principal amount thereof equal to, in the case of each such remaining Underwriter, ten percent (10%) of the aggregate principal amount of the Bonds which is set forth opposite the name of each such remaining Underwriter in said *Schedule II*, and such remaining Underwriters shall have the right, within 24 hours of receipt of such notice, either to (i) purchase and pay for (in such proportion as may be agreed upon among them) the remaining principal amount of the Bonds which the defaulting Underwriter or Underwriters agreed but failed to purchase, or (ii) substitute another Underwriter or Underwriters, satisfactory to FPL, to purchase and pay for the remaining principal amount of the Bonds which the defaulting Underwriter or Underwriters agreed but failed to purchase. If any of the Bonds would still remain unpurchased, then FPL shall be entitled to a further period of 24 hours within which to procure another party or other parties that (i) are members of the Financial Industry Regulatory Authority, Inc. or else are not eligible for membership in said Authority but who agree (A) to make no sales within the United States, its territories or its possessions or to persons who are citizens thereof or residents therein and (B) in making sales to comply with said Authority's Conduct Rules, and (ii) are satisfactory to the Representatives to purchase such Bonds on the terms herein set forth. In the event that, within the respective prescribed periods, (i) the non-defaulting Underwriters notify FPL that they have arranged for the purchase of such Bonds or (ii) FPL notifies the non-defaulting Underwriters that it has arranged for the purchase of such Bonds, the non-defaulting Underwriters or FPL shall have the right to postpone the Closing Date for a period of not more than three full business days beyond the expiration of the respective prescribed periods in order to effect whatever changes may thus be made necessary in the Registration Statement, the Prospectus or in any other documents or arrangements. In the event that neither the non-defaulting Underwriters nor FPL has arranged for the purchase of such Bonds by another party or parties as above provided, then this agreement shall terminate without any liability on the part of FPL or any Underwriter (other than an Underwriter which shall have failed or refused, otherwise than for some reason sufficient to justify, in accordance with the terms hereof, the cancellation or termination of its obligations hereunder, to purchase and pay for the Bonds which such Underwriter has agreed to purchase as provided in *Section 4* hereof), except as otherwise provided in *Section 6(d)*, *Section 6(f)* and *Section 9* hereof.

6. Covenants of FPL. FPL agrees with the several Underwriters that:

(a) FPL will timely file the Prospectus and any preliminary prospectus supplement used in connection with the offering of the Bonds with the Commission pursuant to Rule 424. FPL has complied and will comply with Rule 433 in connection with the offering and sale of the Bonds, including applicable provisions in respect of timely filing with the Commission, legending and record-keeping.

(b) FPL will prepare a final term sheet, containing a description of the pricing terms of the Bonds, substantially in the form of *Schedule I* hereto and approved by the Representatives and will timely file such term sheet with the Commission pursuant to Rule 433.

(c) FPL will, upon request, deliver to the Representatives and to Counsel for the Underwriters (as defined below) one signed copy of the Registration Statement or, if

a signed copy is not available, one conformed copy of the Registration Statement certified by an officer of FPL to be in the form as originally filed, including all Incorporated Documents and exhibits, except those incorporated by reference, which relate to the Bonds, including a signed or conformed copy of each consent and certificate included therein or filed as an exhibit thereto. As soon as practicable after the date hereof, FPL will deliver or cause to be delivered to the Underwriters through the Representatives as many copies of the Prospectus and any Issuer Free Writing Prospectus as the Representatives may reasonably request for the purposes contemplated by the Securities Act.

(d) FPL has paid or caused to be paid or will pay or cause to be paid all expenses in connection with the (i) preparation and filing of the Registration Statement, any preliminary prospectus supplement, the Prospectus and any Issuer Free Writing Prospectus, (ii) issuance and delivery of the Bonds as provided in *Section 5* hereof, (iii) preparation, execution, filing and recording of the Supplemental Indenture and (iv) printing and delivery to the Representatives for the account of the Underwriters, in reasonable quantities, of copies of the Registration Statement, any preliminary prospectus supplement, the Prospectus, any Issuer Free Writing Prospectus and the Supplemental Indenture. FPL will pay or cause to be paid all taxes, if any (but not including any transfer taxes), on the issuance of the Bonds and recordation of the Supplemental Indenture. FPL shall not, however, be required to pay any amount for any expenses of the Representatives or any of the Underwriters, except that if this agreement shall be terminated in accordance with the provisions of *Section 7*, *Section 8*, or *Section 10* hereof, FPL will pay or cause to be paid the fees and disbursements of Counsel for the Underwriters, whose fees and disbursements the Underwriters agree to pay in any other event, and FPL shall reimburse or cause to be reimbursed the Underwriters for out-of-pocket expenses reasonably incurred by them in connection with the transactions contemplated by this agreement, not in excess, however, of an aggregate of $5,000 for such out-of-pocket expenses. FPL shall not in any event be liable to any of the several Underwriters for damages on account of loss of anticipated profits.

(e) During a period of nine months after the date hereof, if any event relating to or affecting FPL shall occur which, in the opinion of FPL, should be set forth in a supplement to or an amendment of the Prospectus (including an Issuer Free Writing Prospectus) in order to make the Prospectus, in the light of the circumstances pertaining when it is delivered to a purchaser, not misleading, FPL will forthwith at its expense prepare, file with the Commission, if required, and furnish to the Representatives a reasonable number of copies of such supplement or supplements or amendment or amendments to the Prospectus (including an Issuer Free Writing Prospectus) which will supplement or amend the Prospectus so that as supplemented or amended it will not include an untrue statement of a material fact or omit to state a material fact necessary in order to make the statements contained therein, in the light of the circumstances pertaining when the Prospectus is delivered to a purchaser, not misleading; provided that should such event relate solely to activities of any of the Underwriters, then the Underwriters shall assume the expense of preparing and furnishing copies of any such amendment or supplement. In case any Underwriter is required to deliver a Prospectus after the expiration of nine months after the date hereof, FPL upon the request of the

Representatives will furnish to the Representatives, at the expense of such Underwriter, a reasonable quantity of a supplemented or amended Prospectus or supplements or amendments to the Prospectus complying with Section 10 of the Securities Act.

(f) FPL will furnish such proper information as may be lawfully required and otherwise cooperate in qualifying the Bonds for offer and sale under the blue sky laws of such United States jurisdictions as the Representatives may designate and will pay or cause to be paid filing fees and expenses (including fees of counsel not to exceed $5,000 and reasonable disbursements of counsel), provided that FPL shall not be required to qualify as a foreign corporation or dealer in securities, or to file any consents to service of process under the laws of any jurisdiction, or to meet other requirements deemed by FPL to be unduly burdensome.

(g) FPL will timely file such reports pursuant to the Exchange Act as are necessary in order to make generally available to its security holders (including holders of the Bonds) as soon as practicable an earnings statement (which need not be audited, unless required so to be under Section 11(a) of the Securities Act) for the purposes of, and to provide the benefits contemplated by, the last paragraph of Section 11(a) of the Securities Act.

(h) Prior to the termination of the offering of the Bonds, FPL will not file any amendment to the Registration Statement or any amendment or supplement to the Prospectus or any amendment or supplement to the Pricing Disclosure Package without prior notice to the Representatives and to Hunton & Williams LLP, who are acting as counsel for the several Underwriters ("**Counsel for the Underwriters**"), or any such amendment or supplement to which the Representatives shall reasonably object in writing, or which shall be unsatisfactory to Counsel for the Underwriters. FPL has not made any offer relating to the Bonds that would constitute an Issuer Free Writing Prospectus or that would otherwise constitute a Free Writing Prospectus required to be filed by FPL with the Commission or retained by FPL under Rule 433, other than a pricing term sheet substantially in the form as set forth on *Schedule I*, and FPL will not make any such offer without prior notice to the Representatives and to Counsel for the Underwriters, or any such offer to which the Representatives shall reasonably object in writing, or which shall be unsatisfactory to Counsel for the Underwriters.

(i) FPL will advise the Representatives promptly of the filing of the Prospectus pursuant to Rule 424, of the filing of any material pursuant to Rule 433 and of any amendment or supplement to the Pricing Disclosure Package or the Registration Statement or, prior to the termination of the offering of the Bonds, of official notice of the institution of proceedings for, or the entry of, a stop order suspending the effectiveness of the Registration Statement, of receipt from the Commission of any notice of objection to the use of the Registration Statement or any post-effective amendment thereto pursuant to Rule 401(g)(2) under the Securities Act, and, if such a stop order should be entered, or notice of objection should be received, use every commercially reasonable effort to obtain the prompt removal thereof.

(j) If there occurs an event or development as a result of which the Pricing Disclosure Package would include an untrue statement of a material fact or would omit to state a material fact necessary in order to make the statements therein, in the light of the circumstances then pertaining, not misleading, FPL promptly will notify the Representatives so that any use of the Pricing Disclosure Package may cease until it is amended or supplemented.

(k) On or before the Closing Date, FPL will, if applicable, cause (i) at least one counterpart of the Supplemental Indenture to be duly recorded in the States of Florida or Georgia and (ii) all intangible and documentary stamp taxes due in connection with the issuance of the Bonds and the recording of the Supplemental Indenture to be paid. Within 30 days following the Closing Date, FPL will, if applicable, cause the Supplemental Indenture to be duly recorded in all other counties in which property of FPL which is subject to the lien of the Mortgage is located.

(l) All the property to be subjected to the lien of the Mortgage will be adequately described therein.

7. Conditions of Underwriters' Obligations to Purchase and Pay for the Bonds. The several obligations of the Underwriters to purchase and pay for the Bonds shall be subject to the performance by FPL of its obligations to be performed hereunder on or prior to the Closing Date and to the following conditions:

(a) The representations and warranties made by FPL herein and qualified by materiality shall be true and correct in all respects and the representations and warranties made by FPL herein that are not qualified by materiality shall be true and correct in all material respects as of the Closing Date, in each case, as if made on and as of such date and the Representatives shall have received, prior to payment for the Bonds, a certificate from FPL dated the Closing Date and signed by an officer of FPL to that effect.

(b) No stop order suspending the effectiveness of the Registration Statement shall be in effect on the Closing Date; no order of the Commission directed to the adequacy of any Incorporated Document shall be in effect on the Closing Date; no proceedings for either such purpose shall be pending before, or threatened by, the Commission on the Closing Date; and no notice of objection by the Commission to the use of the Registration Statement or any post-effective amendment thereto pursuant to Rule 401(g)(2) under the Securities Act shall have been received by FPL and not removed by the Closing Date; and the Representatives shall have received, prior to payment for the Bonds, a certificate from FPL dated the Closing Date and signed by an officer of FPL to the effect that, to the best of his or her knowledge, no such orders are in effect, no proceedings for either such purpose are pending before, or to the knowledge of FPL threatened by, the Commission, and no such notice of objection has been received and not removed.

(c) On the Closing Date, there shall be in full force and effect an authorization of the Florida Public Service Commission with respect to the issuance and sale of the Bonds on the terms herein stated or contemplated, and containing no provision

unacceptable to the Representatives by reason of the fact that it is materially adverse to FPL, it being understood that no authorization provided to Counsel for the Underwriters and in effect at the date hereof contains any such unacceptable provision.

(d) On the Closing Date, the Representatives shall have received from Squire Patton Boggs (US) LLP, counsel to FPL, Morgan, Lewis & Bockius LLP, counsel to FPL, and Hunton & Williams LLP, Counsel for the Underwriters, opinions (with a copy for each of the Underwriters) in substantially the form and substance prescribed in *Schedule IV*, *Schedule V*, and *Schedule VI* hereto (i) with such changes therein as may be agreed upon by FPL and the Representatives, with the approval of Counsel for the Underwriters, and (ii) if the Prospectus relating to the Bonds shall be supplemented or amended after the Prospectus shall have been filed with the Commission pursuant to Rule 424, with any changes therein necessary to reflect such supplementation or amendment.

(e) On the date hereof and on the Closing Date, the Representatives shall have received from Deloitte & Touche LLP a letter or letters (which may refer to letters previously delivered to the Representatives) (with copies thereof for each of the Underwriters) dated the respective dates of delivery thereof to the effect that (i) they are an independent registered public accounting firm with respect to FPL within the meaning of the Securities Act and the Exchange Act and the applicable published rules and regulations thereunder; (ii) in their opinion, the consolidated financial statements of FPL audited by them and incorporated by reference in the Pricing Prospectus or the Pricing Prospectus and the Prospectus, as applicable, comply as to form in all material respects with the applicable accounting requirements of the Securities Act and the Exchange Act and the published rules and regulations thereunder; (iii) on the basis of performing a review of interim financial information as described in the Public Company Accounting Oversight Board (United States) ("**PCAOB**") AU Section 722, Interim Financial Information, on the unaudited condensed consolidated financial statements of FPL, if any, incorporated by reference in the Pricing Prospectus or the Pricing Prospectus and the Prospectus, as applicable, a reading of the latest available interim unaudited condensed consolidated financial statements of FPL, if any, since the close of FPL's most recent audited fiscal year, a reading of the minutes and consents of the Board of Directors, the Finance Committee of the Board of Directors and the Stock Issuance Committee of the Board of Directors and of the sole common shareholder of FPL since the end of the most recent audited fiscal year, and inquiries of officials of FPL who have responsibility for financial and accounting matters (it being understood that the foregoing procedures do not constitute an audit made in accordance with standards of the PCAOB and they would not necessarily reveal matters of significance with respect to the comments made in such letter, and accordingly that Deloitte & Touche LLP makes no representation as to the sufficiency of such procedures for the several Underwriters' purposes), nothing has come to their attention which caused them to believe that (a) the unaudited condensed consolidated financial statements of FPL, if any, incorporated by reference in the Pricing Prospectus or the Pricing Prospectus and the Prospectus, as applicable, (1) do not comply as to form in all material respects with the applicable accounting requirements of the Securities Act and the Exchange Act and the published rules and regulations thereunder and (2) except as disclosed in the Pricing Prospectus or the Pricing Prospectus and the

Prospectus, as applicable, are not in conformity with generally accepted accounting principles applied on a basis substantially consistent with that of the audited consolidated financial statements of FPL incorporated by reference in the Pricing Prospectus or the Pricing Prospectus and the Prospectus, as applicable; (b) at the date of the latest available interim balance sheet read by them and at a specified date not more than five days prior to the date of such letter, there was any change in the common stock or additional paid-in capital or increase in the preferred stock or long-term debt including current maturities and excluding fair value swaps, if any, and unamortized premium and discount on long-term debt of FPL and its subsidiaries, or decrease in common shareholder's equity of FPL and its subsidiaries, in each case as compared with amounts shown in the most recent condensed consolidated balance sheet, if any, incorporated by reference in the Pricing Prospectus or the Pricing Prospectus and the Prospectus, as applicable, except in all instances for changes, increases or decreases which the Pricing Prospectus or the Pricing Prospectus and the Prospectus, as applicable, discloses have occurred or may occur, or as occasioned by the declaration, provision for, or payment of dividends, or which are described in such letter; or (c) for the period from the date of the most recent condensed consolidated balance sheet, if any, incorporated by reference in the Pricing Prospectus or the Pricing Prospectus and the Prospectus, as applicable, to the latest available interim balance sheet read by them and for the period from the date of the latest available interim balance sheet read by them to a specified date not more than five days prior to the date of such letter, there were any decreases, as compared with the corresponding period in the preceding year, in total consolidated operating revenues or in net income, except in all instances for decreases which the Pricing Prospectus or the Pricing Prospectus and the Prospectus, as applicable, discloses have occurred or may occur, or which are described in such letter; and (iv) they have carried out certain procedures and made certain findings, as specified in such letter, with respect to certain amounts included in the Pricing Prospectus or the Pricing Prospectus and the Prospectus, as applicable, and Exhibit 12(b) to the Registration Statement and such other items as the Representatives may reasonably request.

(f) Since the respective most recent times as of which information is given in the Pricing Disclosure Package, and up to the Closing Date, (i) there shall have been no material adverse change in the business, properties or financial condition of FPL and its subsidiaries taken as a whole, except as disclosed in or contemplated by the Pricing Disclosure Package, and (ii) there shall have been no transaction entered into by FPL or any of its subsidiaries that is material to FPL and its subsidiaries taken as a whole, other than transactions disclosed in or contemplated by the Pricing Disclosure Package, and transactions in the ordinary course of business; and at the Closing Date the Representatives shall have received a certificate to such effect from FPL signed by an officer of FPL.

(g) All legal proceedings to be taken in connection with the issuance and sale of the Bonds shall have been satisfactory in form and substance to Counsel for the Underwriters.

In case any of the conditions specified above in this *Section 7* shall not have been fulfilled, this agreement may be terminated by the Representatives upon mailing or delivering

written notice thereof to FPL. Any such termination shall be without liability of any party to any other party except as otherwise provided in *Section 6(d)* and *Section 6(f)* hereof.

8. Conditions of FPL's Obligations. The obligation of FPL to deliver the Bonds shall be subject to the following conditions:

(a) No stop order suspending the effectiveness of the Registration Statement shall be in effect on the Closing Date; no order of the Commission directed to the adequacy of any Incorporated Document shall be in effect on the Closing Date; no proceedings for either such purpose shall be pending before, or threatened by, the Commission on the Closing Date; and no notice of objection by the Commission to the use of the Registration Statement or any post-effective amendment thereto pursuant to Rule 401(g)(2) under the Securities Act shall have been received by FPL and not removed by the Closing Date.

(b) On the Closing Date, there shall be in full force and effect an authorization of the Florida Public Service Commission with respect to the issuance and sale of the Bonds on the terms herein stated or contemplated, and containing no provision unacceptable to FPL by reason of the fact that it is materially adverse to FPL, it being understood that no authorization in effect at the date hereof contains any such unacceptable provision.

In case the conditions specified above in this *Section 8* shall not have been fulfilled, this agreement may be terminated by FPL upon mailing or delivering written notice thereof to the Representatives. Any such termination shall be without liability of any party to any other party except as otherwise provided in *Section 6(d)* and *Section 6(f)* hereof.

9. Indemnification.

(a) FPL agrees to indemnify and hold harmless each Underwriter, each officer and director of each Underwriter and each person (a "**Controlling Person**") who controls any Underwriter within the meaning of Section 15 of the Securities Act or Section 20 of the Exchange Act, against any and all losses, claims, damages or liabilities, joint or several, to which they or any of them may become subject under the Securities Act or any other statute or common law, and to reimburse each such Underwriter, officer, director and Controlling Person for any legal or other expenses (including, to the extent hereinafter provided, reasonable counsel fees) when and as incurred by them in connection with investigating any such losses, claims, damages or liabilities or in connection with defending any actions, insofar as such losses, claims, damages, liabilities, expenses or actions arise out of or are based upon an untrue statement or alleged untrue statement of a material fact contained in any preliminary prospectus supplement, including all Incorporated Documents, or in the Registration Statement, the Pricing Prospectus, the Prospectus or any Issuer Free Writing Prospectus, or the omission or alleged omission to state therein a material fact required to be stated therein or necessary to make the statements therein not misleading; provided, however, that the indemnity agreement contained in this *Section 9(a)* shall not apply to any such losses, claims, damages, liabilities, expenses or actions arising out of, or based upon, any such

untrue statement or alleged untrue statement, or any such omission or alleged omission, if such statement or omission was made in reliance upon and in conformity with information furnished in writing, to FPL by or on behalf of any Underwriter, through the Representatives, expressly for use in connection with the preparation of any preliminary prospectus supplement, the Registration Statement, the Pricing Prospectus, the Prospectus or any Issuer Free Writing Prospectus or any amendment or supplement to any thereof, or arising out of, or based upon, statements in or omissions from the Statements of Eligibility; and provided, further, that the indemnity agreement contained in this *Section 9(a)* in respect of any preliminary prospectus supplement, the Pricing Prospectus, any Issuer Free Writing Prospectus or the Prospectus shall not inure to the benefit of any Underwriter (or of any officer or director or Controlling Person of such Underwriter) on account of any such losses, claims, damages, liabilities, expenses or actions arising from the sale of the Bonds to any person in respect of any preliminary prospectus supplement, the Pricing Prospectus, any Issuer Free Writing Prospectus or the Prospectus, each as may be then supplemented or amended, furnished by such Underwriter to a person to whom any of the Bonds were sold (excluding in all cases, however, any document then incorporated by reference therein), insofar as such indemnity relates to any untrue or misleading statement made in or omission from such preliminary prospectus supplement, Pricing Prospectus, Issuer Free Writing Prospectus or Prospectus, if a copy of a supplement or amendment to such preliminary prospectus supplement, Pricing Prospectus, Prospectus or Issuer Free Writing Prospectus (excluding in all cases, however, any document then incorporated by reference therein) (i) is furnished on a timely basis by FPL to the Underwriter, (ii) is required by law or regulation to have been conveyed to such person by or on behalf of such Underwriter, at or prior to the entry into the contract of sale of the Bonds with such person, but was not so conveyed (which conveyance may be oral or written) by or on behalf of such Underwriter and (iii) would have cured the defect giving rise to such loss, claim, damage or liability. The indemnity agreement of FPL contained in this *Section 9(a)* and the representations and warranties of FPL contained in *Section 3* hereof shall remain operative and in full force and effect, regardless of any investigation made by or on behalf of any Underwriter or any of its officers, directors or Controlling Persons, and shall survive the delivery of the Bonds. Each Underwriter agrees promptly to notify FPL, and each other Underwriter, of the commencement of any litigation or proceedings against the notifying Underwriter, or any of its officers, directors or Controlling Persons, in connection with the issuance and sale of the Bonds.

(b) Each Underwriter, severally and not jointly, agrees to indemnify and hold harmless FPL, its officers and directors, and each person who controls FPL within the meaning of Section 15 of the Securities Act or Section 20 of the Exchange Act against any and all losses, claims, damages or liabilities, joint or several, to which they or any of them may become subject under the Securities Act or any other statute or common law and to reimburse each of them for any legal or other expenses (including, to the extent hereinafter provided, reasonable counsel fees) when and as incurred by them in connection with investigating any such losses, claims, damages or liabilities or in connection with defending any actions, insofar as such losses, claims, damages, liabilities, expenses or actions arise out of or are based upon an untrue statement or alleged untrue statement of a material fact contained in any preliminary prospectus

supplement, the Registration Statement, the Pricing Prospectus, the Prospectus or any Issuer Free Writing Prospectus, or the omission or alleged omission to state therein a material fact required to be stated therein or necessary to make the statements therein not misleading if such statement or omission was made in reliance upon and in conformity with information furnished in writing to FPL by or on behalf of such Underwriter, through the Representatives, expressly for use in connection with the preparation of any preliminary prospectus supplement, the Registration Statement, the Pricing Prospectus, the Prospectus or any Issuer Free Writing Prospectus or any amendment or supplement to any thereof. The Underwriters hereby furnish to FPL in writing, expressly for use in the preliminary prospectus supplement dated November 16, 2015, the Registration Statement, the Pricing Prospectus, the Prospectus and any Issuer Free Writing Prospectus, the following: under "Underwriting" in the preliminary prospectus supplement dated November 16, 2015, the Pricing Prospectus and the Prospectus, the fourth sentence in the third paragraph; the entire fourth paragraph (including the table immediately following the third sentence) except for the first sentence; the entire fifth paragraph; the third sentence in the sixth paragraph; and the entire seventh, eighth and ninth paragraphs. FPL acknowledges that the statements identified in the preceding sentence constitute the only information furnished in writing by or on behalf of the several Underwriters expressly for inclusion in the preliminary prospectus supplement dated November 16, 2015, the Registration Statement, the Pricing Prospectus, the Prospectus or any Issuer Free Writing Prospectus. The respective indemnity agreement of each Underwriter contained in this *Section 9(b)* shall remain operative and in full force and effect, regardless of any investigation made by or on behalf of FPL or any of its officers or directors or any person who controls FPL within the meaning of Section 15 of the Securities Act or Section 20 of the Exchange Act, or by or on behalf of any other Underwriter or any of its officers, directors or Controlling Persons, and shall survive the delivery of the Bonds. FPL agrees promptly to notify the Representatives of the commencement of any litigation or proceedings against FPL (or any of its controlling persons within the meaning of Section 15 of the Securities Act or Section 20 of the Exchange Act) or any of its officers or directors in connection with the issuance and sale of the Bonds.

(c) FPL and each of the several Underwriters each agree that, upon the receipt of notice of the commencement of any action against it, its officers and directors, or any person controlling it as aforesaid, in respect of which indemnity or contribution may be sought under the provisions of this *Section 9* it will promptly give written notice of the commencement thereof to the party or parties against whom indemnity or contribution shall be sought thereunder, but the omission so to notify such indemnifying party or parties of any such action shall not relieve such indemnifying party or parties from any liability which it or they may have to the indemnified party otherwise than on account of this indemnity agreement. In case such notice of any such action shall be so given, such indemnifying party or parties shall be entitled to participate at its own expense in the defense or, if it so elects, to assume (in conjunction with any other indemnifying parties) the defense of such action, in which event such defense shall be conducted by counsel chosen by such indemnifying party or parties and reasonably satisfactory to the indemnified party or parties who shall be defendant or defendants in such action, and such defendant or defendants shall bear the fees and expenses of any additional counsel retained by them; but if the indemnifying party or parties shall elect not to assume the

defense of such action, such indemnifying party or parties will reimburse such indemnified party or parties for the reasonable fees and expenses of any counsel retained by them; provided, however, if the defendants in any such action include both the indemnified party and the indemnifying party and counsel for the indemnifying party shall have reasonably concluded that there may be a conflict of interest involved in the representation by such counsel of both the indemnifying party and the indemnified party, the indemnified party or parties shall have the right to select separate counsel, satisfactory to the indemnifying party or parties, to participate in the defense of such action on behalf of such indemnified party or parties at the expense of the indemnifying party or parties (it being understood, however, that the indemnifying party or parties shall not be liable for the expenses of more than one separate counsel representing the indemnified parties who are parties to such action). FPL and each of the several Underwriters each agree that without the prior written consent of the other parties to such action who are parties to this agreement, which consent shall not be unreasonably withheld, it will not settle, compromise or consent to the entry of any judgment in any claim or proceeding in respect of which such party intends to seek indemnity or contribution under the provisions of this *Section 9*, unless such settlement, compromise or consent (i) includes an unconditional release of such other parties from all liability arising out of such claim or proceeding and (ii) does not include a statement as to or an admission of fault, culpability or a failure to act by or on behalf of such other parties.

(d) If, or to the extent, the indemnification provided for in *Section 9(a)* or *Section 9(b)* hereof shall be unenforceable under applicable law by an indemnified party, each indemnifying party agrees to contribute to such indemnified party with respect to any and all losses, claims, damages, liabilities and expenses for which each such indemnification provided for in *Section 9(a)* or *Section 9(b)* hereof shall be unenforceable, in such proportion as shall be appropriate to reflect (i) the relative fault of FPL on the one hand and the Underwriters on the other hand in connection with the statements or omissions which have resulted in such losses, claims, damages, liabilities and expenses, (ii) the relative benefits received by FPL on the one hand and the Underwriters on the other hand from the offering of the Bonds pursuant to this agreement, and (iii) any other relevant equitable considerations; provided, however, that no indemnified party guilty of fraudulent misrepresentation (within the meaning of Section 11(f) of the Securities Act) shall be entitled to contribution with respect thereto from any indemnifying party not guilty of such fraudulent misrepresentation. Relative fault shall be determined by reference to, among other things, whether the untrue or alleged untrue statement of a material fact or the omission or alleged omission to state a material fact relates to information supplied by FPL or the Underwriters and each such party's relative intent, knowledge, access to information and opportunity to correct or prevent such untrue statement or omission. FPL and each of the Underwriters agree that it would not be just and equitable if contribution pursuant to this *Section 9(d)* were to be determined by pro rata allocation or by any other method of allocation which does not take account of the equitable considerations referred to above. Notwithstanding the provisions of this *Section 9(d)*, no Underwriter shall be required to contribute in excess of the amount equal to the excess of (i) the total price at which the Bonds underwritten by it were offered to the public, over (ii) the amount of any damages which such Underwriter has otherwise been required to pay by reason of any such untrue or alleged untrue

statement or omission or alleged omission. The obligations of each Underwriter to contribute pursuant to this *Section 9(d)* are several and not joint and shall be in the same proportion as such Underwriter's obligation to underwrite the Bonds is to the total principal amount of the Bonds set forth in *Schedule II* hereto.

10. Termination. This agreement may be terminated by the Representatives by delivering written notice thereof to FPL, at any time prior to the Closing Date, if after the date hereof and at or prior to the Closing Date:

(a) (i) there shall have occurred any general suspension of trading in securities on The New York Stock Exchange, Inc. (the "**NYSE**") or there shall have been established by the NYSE or by the Commission or by any federal or state agency or by the decision of any court any limitation on prices for such trading or any general restrictions on the distribution of securities, or trading in any securities of FPL shall have been suspended or limited by any exchange located in the United States or on the over-the-counter market located in the United States or a general banking moratorium declared by New York or federal authorities or (ii) there shall have occurred any material adverse change in the financial markets in the United States, any outbreak of hostilities, including, but not limited to, an escalation of hostilities which existed prior to the date hereof, any other national or international calamity or crisis or any material adverse change in financial, political or economic conditions affecting the United States, the effect of any such event specified in this clause (ii) being such as to make it, in the reasonable judgment of the Representatives, impracticable or inadvisable to proceed with the offering of the Bonds as contemplated in the Pricing Disclosure Package or for the Underwriters to enforce contracts for the sale of the Bonds; or

(b) (i) there shall have been any downgrading or any notice of any intended or potential downgrading in the ratings accorded to the Bonds or any securities of FPL which are of the same class as the Bonds by either Moody's Investors Service, Inc. ("**Moody's**") or Standard & Poor's Ratings Services, a Standard & Poor's Financial Services LLC business ("**S&P**"), or (ii) either Moody's or S&P shall have publicly announced that it has under surveillance or review, with possible negative implications, its ratings of the Bonds or any securities of FPL which are of the same class as the Bonds, the effect of any such event specified in (i) or (ii) above being such as to make it, in the reasonable judgment of the Representatives, impracticable or inadvisable to proceed with the offering of the Bonds as contemplated in the Pricing Disclosure Package or for the Underwriters to enforce contracts for the sale of the Bonds.

This agreement may also be terminated at any time prior to the Closing Date if in the judgment of the Representatives the subject matter of any amendment or supplement to the Registration Statement or the Prospectus or any Issuer Free Writing Prospectus prepared and furnished by FPL after the date hereof reflects a material adverse change in the business, properties or financial condition of FPL and its subsidiaries taken as a whole which renders it either inadvisable to proceed with such offering, if any, or inadvisable to proceed with the delivery of the Bonds to be purchased hereunder. Any termination of this agreement pursuant to this *Section 10* shall be without liability of any party to any other party except as otherwise provided in *Section 6(d)* and *Section 6(f)* hereof.

11. Miscellaneous.

(a) The validity and interpretation of this agreement shall be governed by the laws of the State of New York without regard to conflicts of law principles thereunder. This agreement shall inure to the benefit of, and be binding upon, FPL, the several Underwriters and, with respect to the provisions of *Section 9* hereof, each officer, director or controlling person referred to in said *Section 9*, and their respective successors. Nothing in this agreement is intended or shall be construed to give to any other person or entity any legal or equitable right, remedy or claim under or in respect of this agreement or any provision herein contained. The term "successors" as used in this agreement shall not include any purchaser, as such purchaser, of any Bonds from any of the several Underwriters.

(b) FPL acknowledges and agrees that the Underwriters are acting solely in the capacity of arm's length contractual counterparties to FPL with respect to the offering of the Bonds as contemplated by this agreement and not as financial advisors or fiduciaries to FPL in connection herewith. Additionally, none of the Underwriters is advising FPL as to any legal, tax, investment, accounting or regulatory matters in any jurisdiction in connection with the offering of the Bonds as contemplated by this agreement. Any review by the Underwriters of FPL in connection with the offering of the Bonds contemplated by this agreement and the transactions contemplated by this agreement will not be performed on behalf of FPL.

12. Notices. All communications hereunder shall be in writing and, if to the Underwriters, shall be mailed or delivered to the Representatives at the address set forth in *Schedule II* hereto, or if to FPL, shall be mailed or delivered to it at 700 Universe Boulevard, Juno Beach, Florida 33408, Attention: Treasurer.

13. Counterparts. This agreement may be executed in any number of counterparts by the parties hereto on separate counterparts, each of which, when so executed and delivered, shall be deemed an original, but all such counterparts shall together constitute one and the same instrument.

If the foregoing correctly sets forth our understanding, please indicate your acceptance on behalf of the Underwriters in the space provided below for that purpose, whereupon this letter and your acceptance on behalf of the Underwriters shall constitute a binding agreement between FPL and the Underwriters.

Very truly yours,

Florida Power & Light Company

as Representatives of the Underwriters
named in Schedule II to the Agreement,
as herein described

Ladies and Gentlemen:

We have acted as counsel to Florida Power & Light Company ("FPL") (a) in connection with the authorization and issuance by FPL of $600,000,000 aggregate principal amount of its First Mortgage Bonds, 3.125% Series due December 1, 2025 (the "Bonds"), issued under the Mortgage and Deed of Trust dated as of January 1, 1944, as the same is supplemented by one hundred and twenty four indentures supplemental thereto, the latest of which (the "One Hundred Twenty-Fourth Supplemental Indenture") is dated as of November 1, 2015 (such Mortgage as so supplemented being hereinafter called the "Mortgage") from FPL to Deutsche Bank Trust Company Americas, as Trustee ("Mortgage Trustee"), and (b) in connection with the sale of the Bonds to you in accordance with the Underwriting Agreement, dated November 16, 2015 (the "Agreement"), between you and FPL. Capitalized terms used in this opinion but not defined shall have the meanings set forth in the Agreement.

We have participated in the preparation of or reviewed (1) Registration Statement Nos. 333-205558, 333-205558-01 and 333-205558-02) (the "Registration Statement"), which Registration Statement was filed jointly by FPL, NextEra Energy, Inc. and NextEra Energy Capital Holdings, Inc. with the Securities and Exchange Commission (the "Commission") under the Securities Act of 1933, as amended (the "Securities Act"); (2) the Base Prospectus dated July 8, 2015 forming a part of the Registration Statement, as supplemented by a preliminary prospectus supplement, subject to completion, dated November 16, 2015 relating to the Bonds, both such prospectus and preliminary prospectus supplement, subject to completion, filed with

the Commission pursuant to Rule 424(b) under the Securities Act ("Rule 424") (references herein to the "Preliminary Prospectus" as of any given date shall refer to such prospectus, as supplemented by the preliminary prospectus supplement, subject to completion, dated November 16, 2015 relating to the Bonds filed with the Commission pursuant to Rule 424, and as further amended and supplemented to such date, including the Incorporated Documents); (3) the pricing term sheet, dated November 16, 2015 (the "Pricing Term Sheet") filed with the Commission pursuant to Rule 433 under the Securities Act; (4) the Base Prospectus dated July 8, 2015 forming a part of the Registration Statement, as supplemented by a prospectus supplement dated November 16, 2015 relating to the Bonds, both such prospectus and prospectus supplement filed with the Commission pursuant to Rule 424 (references herein to the "Prospectus" as of any given date shall refer to such prospectus, as supplemented by such prospectus supplement, and as further amended and supplemented to such date, including the Incorporated Documents); (5) the Mortgage; (6) the corporate proceedings of FPL with respect to the Registration Statement and with respect to the authorization, issuance and sale of the Bonds; (7) FPL's Restated Articles of Incorporation (the "Charter") and Amended and Restated Bylaws as amended to the date hereof (the "Bylaws"); and (8) such other corporate records, certificates and other documents and such questions of law as we have considered necessary or appropriate for the purposes of this opinion. We have also reviewed the order issued by the Florida Public Service Commission ("FPSC") authorizing, among other things, the issuance and sale of debt securities in 2015, including the Bonds.

Upon the basis of the foregoing, we advise you that:

I.

FPL is a validly organized and existing corporation and its status is active under the laws of the State of Florida.

II.

FPL is a corporation duly authorized by its Charter to conduct the business which it is now conducting as set forth in the Pricing Disclosure Package and the Prospectus; FPL is subject, as to retail rates and services, issuance of securities, accounting and certain other matters, to the jurisdiction of the FPSC; and FPL is subject, as to wholesale rates, accounting and certain other matters, to the jurisdiction of the Federal Energy Regulatory Commission.

III.

The Mortgage has been duly authorized by FPL by all necessary corporate action, has been duly and validly executed and delivered by FPL, and is a valid and binding obligation of FPL enforceable against FPL in accordance with its terms, except as limited or affected by bankruptcy, insolvency, reorganization, receivership, moratorium, fraudulent conveyance or other laws affecting mortgagees' and other creditors' rights and remedies generally and general principles of equity and to concepts of materiality, reasonableness, good faith and fair dealing and the discretion of the court before which any matter is brought.

IV.

The Bonds are valid and binding obligations of FPL enforceable against FPL in accordance with their terms, except as limited or affected by bankruptcy, insolvency, reorganization, receivership, moratorium, fraudulent conveyance or other laws affecting mortgagees' and other creditors' rights and remedies generally and general principles of equity and to concepts of materiality, reasonableness, good faith and fair dealing and the discretion of the court before which any matter is brought, and are entitled to the benefit of the security afforded by the Mortgage.

V.

Except as to the financial statements and other financial or statistical data contained or incorporated by reference therein, as to which we express no opinion, and except for those parts of the Registration Statement that constitute the Statements of Eligibility, as to which we express no opinion, the Registration Statement, at the Effective Date, and the Prospectus, as of the date of the Agreement, complied as to form in all material respects with the applicable requirements of the Securities Act and the applicable instructions, rules and regulations of the Commission thereunder. The Incorporated Documents (except as to the financial statements and other financial or statistical data contained or incorporated by reference therein, as to which we express no opinion), at the times they were filed with the Commission, complied as to form in all material respects with the applicable requirements of the Securities Exchange Act of 1934, as amended, and the applicable instructions, rules and regulations of the Commission thereunder. The Registration Statement is an "automatic shelf registration statement" (as defined in Rule 405) that was filed not more than three years prior to the date of the Agreement. The Registration Statement became, and is, at the date hereof, effective under the Securities Act, and to the best of our knowledge, no proceedings for a stop order with respect thereto are pending or threatened under Section 8 of the Securities Act.

VI.

The consummation of the transactions contemplated in the Agreement and the fulfillment of the terms contained in the Agreement and the compliance by FPL with all the terms and provisions of the Mortgage will not result in a breach of any of the terms or provisions of, or constitute a default under, the Charter or the Bylaws or any indenture, mortgage, deed of trust or other agreement or instrument the terms of which are known to us to which FPL is now a party, except where such breach or default would not have a material adverse effect on the business, properties or financial condition of FPL and its subsidiaries taken as a whole.

VII.

The Bonds are being issued and sold pursuant to the authority contained in an order of the FPSC, which authority is adequate to permit the issuance and sale of the Bonds. To the best of our knowledge, said authorization is still in full force and effect, and no further approval, authorization, consent or order of any public board or body (other than in connection or in compliance with the provisions of the blue sky laws of any jurisdiction, as to which we express

no opinion, and other than those which have been already obtained) is legally required for the authorization of the issuance and sale of the Bonds.

VIII.

The statements made in the Pricing Disclosure Package and the Prospectus under the headings "Description of Bonds" and "Certain Terms of the Offered Bonds," insofar as they purport to constitute summaries of the terms of the documents referred to therein, constitute accurate summaries of the terms of such documents in all material respects.

IX.

The Mortgage is duly qualified under the Trust Indenture Act of 1939, as amended.

X.

As to the Mortgaged and Pledged Property, as defined in the Mortgage, FPL has satisfactory title to any easements and personal properties, and good and marketable or insurable title in fee simple to any other real properties (except as FPL's interest is stated to be otherwise), subject only to Excepted Encumbrances, as defined in the Mortgage, to any lien, if any, existing or placed thereon at the time of acquisition thereof by FPL, to minor defects and encumbrances customarily found in the case of properties of like size and character and which, in our opinion, would not impair the use thereof by FPL (all of which title exceptions, encumbrances, liens and defects are hereinafter referred to as "Exceptions"), and to the lien of the Mortgage; the Mortgage constitutes a valid, direct, and first mortgage lien upon the Mortgaged and Pledged Property now owned by FPL, subject, however, to the Exceptions and as set forth in the last sentence of this paragraph; and the description of properties in the Mortgage is adequate to constitute the Mortgage a lien on Mortgaged and Pledged Property hereafter acquired by FPL, subject, however, to the Exceptions and except as limited or affected by bankruptcy, insolvency, reorganization, receivership, moratorium, fraudulent conveyance or other laws affecting mortgagees' and other creditors' rights and remedies generally and general principles of equity and to concepts of materiality, reasonableness, good faith and fair dealing and the discretion of the court before which any matter is brought. The One Hundred Twenty-Fourth Supplemental Indenture is in proper form for recording in all places required; and upon such recording, the One Hundred Twenty-Fourth Supplemental Indenture will constitute adequate record notice to perfect the lien of the Mortgage as to all Mortgaged and Pledged Property acquired by FPL subsequent to the recording of the One Hundred Twenty-Third Supplemental Indenture to the Mortgage and prior to the recording of the One Hundred Twenty-Fourth Supplemental Indenture.

XI.

Except as stated or referred to in the Pricing Disclosure Package and the Prospectus, to our knowledge after due inquiry, there is no material pending legal proceeding to which FPL or any of its subsidiaries is a party or of which property of FPL or any of its subsidiaries is the subject which is reasonably likely to be determined adversely and, if determined adversely, might reasonably be expected to have a material adverse effect on FPL and its subsidiaries taken as a whole and, to the best of our knowledge, no such proceeding is known to be contemplated by governmental authorities.

XII.

The Agreement has been duly and validly authorized, executed and delivered by FPL.

In rendering the foregoing opinion, we have assumed that the certificates representing the Bonds will conform to specimens examined by us and that the Bonds will be duly authenticated, in accordance with the Mortgage, by the Mortgage Trustee under the Mortgage and will be delivered against payment of the purchase price as provided in the Agreement and that the signatures on all documents examined by us are genuine, assumptions which we have not independently verified.

Other than with respect to the opinion expressed in Paragraph VIII hereof, we have not ourselves checked the accuracy or completeness of, or otherwise verified, the information furnished with respect to matters in the Registration Statement, the Preliminary Prospectus, the Prospectus and the Pricing Term Sheet. We have generally reviewed and discussed such information with certain officers and employees of FPL, certain of its other legal counsel, its independent registered public accounting firm and your representatives. On the basis of such review and discussion, but without independent check or verification except as stated, nothing has come to our attention that would lead us to believe (except as to the financial statements and other financial or statistical data contained or incorporated by reference therein, as to which we express no belief, and except for those parts of the Registration Statement that constitute the Statements of Eligibility, as to which we express no belief), that (i) the Registration Statement at the Effective Date contained an untrue statement of a material fact or omitted to state a material fact required to be stated therein or necessary in order to make the statements contained therein not misleading, (ii) the Pricing Disclosure Package, at the Applicable Time, included an untrue statement of a material fact or omitted to state any material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading, or (iii) the Prospectus as of the date of the Agreement included, or at the date hereof includes, an untrue statement of a material fact or the Prospectus as of the date of the Agreement omitted, or at the date hereof omits, to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading.

This opinion is limited to the laws of the States of Florida, New York and Georgia and the federal laws of the United States insofar as they bear on matters covered hereby. As to all matters of New York law, we have relied, with your consent, upon an opinion of even date herewith addressed to you by Morgan, Lewis & Bockius LLP, New York, New York. As to all matters of law affecting Mortgaged and Pledged Property located in the State of Georgia, we have relied, with your consent, upon an opinion of even date herewith addressed to you and us by McDaniel & Scott, P.C., Decatur, Georgia and our opinion in Paragraph X as to such Mortgaged and Pledged Property is subject to the qualifications and limitations set forth in that opinion. As to all matters of Florida law, Morgan, Lewis & Bockius LLP and Hunton & Williams LLP are hereby authorized to rely upon this opinion as though it were rendered to each of them.

This opinion is rendered to you in connection with the above-described transaction. This opinion may not be relied upon by you for any other purpose, or relied upon or furnished to any

other person, firm or corporation without our prior written permission. This opinion is expressed as of the date hereof, and we do not assume any obligation to update or supplement it to reflect any fact or circumstance that hereafter comes to our attention, or any change in law that hereafter occurs.

Very truly yours,

SQUIRE PATTON BOGGS (US) LLP

as Representatives of the Underwriters
named in Schedule II to the Agreement,
as herein described

Ladies and Gentlemen:

We have acted as counsel to Florida Power & Light Company ("FPL") (a) in connection with the authorization and issuance by FPL of $600,000,000 aggregate principal amount of its First Mortgage Bonds, 3.125% Series due December 1, 2025 (the "Bonds"), issued under the Mortgage and Deed of Trust dated as of January 1, 1944, as the same is supplemented by one hundred and twenty four indentures supplemental thereto, the latest of which (the "One Hundred Twenty-Fourth Supplemental Indenture") is dated as of November 1, 2015 (such Mortgage as so supplemented being hereinafter called the "Mortgage") from FPL to Deutsche Bank Trust Company Americas, as Trustee ("Mortgage Trustee"), and (b) in connection with the sale of the Bonds to you in accordance with the Underwriting Agreement, dated November 16, 2015 (the "Agreement"), between you and FPL. Capitalized terms used in this opinion but not defined shall have the meanings set forth in the Agreement.

We have participated in the preparation of or reviewed (1) Registration Statement Nos. 333-205558, 333-205558-01 and 333-205558-02) (the "Registration Statement"), which Registration Statement was filed jointly by FPL, NextEra Energy, Inc. and NextEra Energy Capital Holdings, Inc. with the Securities and Exchange Commission (the "Commission") under the Securities Act of 1933, as amended (the "Securities Act"); (2) the Base Prospectus dated July 8, 2015 forming a part of the Registration Statement, as supplemented by a preliminary prospectus supplement, subject to completion, dated November 16, 2015 relating to the Bonds, both such prospectus and preliminary prospectus supplement, subject to completion, filed with the Commission pursuant to Rule 424(b) under the Securities Act ("Rule 424") (references

herein to the "Preliminary Prospectus" as of any given date shall refer to such prospectus, as supplemented by the preliminary prospectus supplement, subject to completion, dated November 16, 2015 relating to the Bonds filed with the Commission pursuant to Rule 424, and as further amended and supplemented to such date, including the Incorporated Documents); (3) the pricing term sheet, dated November 16, 2015 (the "Pricing Term Sheet") filed with the Commission pursuant to Rule 433 under the Securities Act; (4) the Base Prospectus dated July 8, 2015 forming a part of the Registration Statement, as supplemented by a prospectus supplement dated November 16, 2015 relating to the Bonds, both such prospectus and prospectus supplement filed with the Commission pursuant to Rule 424 (references herein to the "Prospectus" as of any given date shall refer to such prospectus, as supplemented by such prospectus supplement, and as further amended and supplemented to such date, including the Incorporated Documents); (5) the Mortgage; (6) the corporate proceedings of FPL with respect to the Registration Statement and with respect to the authorization, issuance and sale of the Bonds; (7) FPL's Restated Articles of Incorporation (the "Charter") and Amended and Restated Bylaws as amended to the date hereof (the "Bylaws"); and (8) such other corporate records, certificates and other documents and such questions of law as we have considered necessary or appropriate for the purposes of this opinion. We have also reviewed the order issued by the Florida Public Service Commission ("FPSC") authorizing, among other things, the issuance and sale of debt securities in 2015, including the Bonds.

Upon the basis of the foregoing, we advise you that:

I.

The Mortgage has been duly authorized by FPL by all necessary corporate action, has been duly and validly executed and delivered by FPL, and is a valid and binding obligation of FPL enforceable against FPL in accordance with its terms, except as limited or affected by bankruptcy, insolvency, reorganization, receivership, moratorium, fraudulent conveyance or other laws affecting mortgagees' and other creditors' rights and remedies generally and general principles of equity and to concepts of materiality, reasonableness, good faith and fair dealing and the discretion of the court before which any matter is brought.

II.

The Bonds are valid and binding obligations of FPL enforceable against FPL in accordance with their terms, except as limited or affected by bankruptcy, insolvency, reorganization, receivership, moratorium, fraudulent conveyance or other laws affecting mortgagees' and other creditors' rights and remedies generally and general principles of equity and to concepts of materiality, reasonableness, good faith and fair dealing and the discretion of the court before which any matter is brought, and are entitled to the benefit of the security afforded by the Mortgage.

III.

Except as to the financial statements and other financial or statistical data contained or incorporated by reference therein, as to which we express no opinion, and except for those parts of the Registration Statement that constitute the Statements of Eligibility, as to which we express no opinion, the Registration Statement, at the Effective Date, and the Prospectus, as of the date

of the Agreement, complied as to form in all material respects with the applicable requirements of the Securities Act and the applicable instructions, rules and regulations of the Commission thereunder. The Incorporated Documents (except as to the financial statements and other financial or statistical data contained or incorporated by reference therein, as to which we express no opinion), at the times they were filed with the Commission, complied as to form in all material respects with the applicable requirements of the Securities Exchange Act of 1934, as amended, and the applicable instructions, rules and regulations of the Commission thereunder. The Registration Statement is an "automatic shelf registration statement" (as defined in Rule 405) that was filed not more than three years prior to the date of the Agreement. The Registration Statement became, and is, at the date hereof, effective under the Securities Act, and to the best of our knowledge, no proceedings for a stop order with respect thereto are pending or threatened under Section 8 of the Securities Act.

IV.

The consummation of the transactions contemplated in the Agreement and the fulfillment of the terms contained in the Agreement and the compliance by FPL with all the terms and provisions of the Mortgage will not result in a breach of any of the terms or provisions of, or constitute a default under, the Charter or the Bylaws or any indenture, mortgage, deed of trust or other agreement or instrument the terms of which are known to us to which FPL is now a party, except where such breach or default would not have a material adverse effect on the business, properties or financial condition of FPL and its subsidiaries taken as a whole.

V.

The Bonds are being issued and sold pursuant to the authority contained in an order of the FPSC, which authority is adequate to permit the issuance and sale of the Bonds. To the best of our knowledge, said authorization is still in full force and effect, and no further approval, authorization, consent or order of any public board or body (other than in connection or in compliance with the provisions of the blue sky laws of any jurisdiction, as to which we express no opinion, and other than those which have been already obtained) is legally required for the authorization of the issuance and sale of the Bonds.

VI.

The statements made in the Pricing Disclosure Package and the Prospectus under the headings "Description of Bonds" and "Certain Terms of the Offered Bonds," insofar as they purport to constitute summaries of the terms of the documents referred to therein, constitute accurate summaries of the terms of such documents in all material respects.

VII.

The Mortgage is duly qualified under the Trust Indenture Act of 1939, as amended.

VIII.

The Agreement has been duly and validly authorized, executed and delivered by FPL.

In rendering the foregoing opinion, we have assumed that the certificates representing the Bonds will conform to specimens examined by us and that the Bonds will be duly authenticated, in accordance with the Mortgage, by the Mortgage Trustee under the Mortgage and will be delivered against payment of the purchase price as provided in the Agreement and that the signatures on all documents examined by us are genuine, assumptions which we have not independently verified.

Other than with respect to the opinion expressed in Paragraph VI hereof, we have not ourselves checked the accuracy or completeness of, or otherwise verified, the information furnished with respect to matters in the Registration Statement, the Preliminary Prospectus, the Prospectus and the Pricing Term Sheet. We have generally reviewed and discussed such information with certain officers and employees of FPL, certain of its other legal counsel, its independent registered public accounting firm and your representatives. On the basis of such review and discussion, but without independent check or verification except as stated, nothing has come to our attention that would lead us to believe (except as to the financial statements and other financial or statistical data contained or incorporated by reference therein, as to which we express no belief, and except for those parts of the Registration Statement that constitute the Statements of Eligibility, as to which we express no belief), that (i) the Registration Statement at the Effective Date contained an untrue statement of a material fact or omitted to state a material fact required to be stated therein or necessary in order to make the statements contained therein not misleading, (ii) the Pricing Disclosure Package, at the Applicable Time, included an untrue statement of a material fact or omitted to state any material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading, or (iii) the Prospectus as of the date of the Agreement included, or at the date hereof includes, an untrue statement of a material fact or the Prospectus as of the date of the Agreement omitted, or at the date hereof omits, to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading.

This opinion is limited to the laws of the States of New York and Florida and the federal laws of the United States insofar as they bear on matters covered hereby. As to all matters of Florida law, we have relied, with your consent, upon an opinion of even date herewith addressed to you by Squire Patton Boggs (US) LLP, West Palm Beach, Florida. As to all matters of New York law, Squire Patton Boggs (US) LLP is hereby authorized to rely upon this opinion as though it were rendered to Squire Patton Boggs (US) LLP.

This opinion is rendered to you in connection with the above-described transaction. This opinion may not be relied upon by you for any other purpose, or relied upon or furnished to any other person, firm or corporation without our prior written permission. This opinion is expressed as of the date hereof, and we do not assume any obligation to update or supplement it to reflect any fact or circumstance that hereafter comes to our attention, or any change in law that hereafter occurs.

Very truly yours,

MORGAN, LEWIS & BOCKIUS LLP

Florida Power & Light Company
$600,000,000 First Mortgage Bonds, 3.125% Series due December 1, 2025

Ladies and Gentlemen:

We have acted as counsel for you in connection with your several purchases from Florida Power & Light Company ("FPL") of $600,000,000 aggregate principal amount of FPL's First Mortgage Bonds, 3.125% Series due December 1, 2025 (the "Bonds"), issued under FPL's Mortgage and Deed of Trust dated as of January 1, 1944, with Deutsche Bank Trust Company Americas, as Trustee, which has been amended and supplemented in the past and which will be supplemented again by one or more supplemental indentures relating to these Bonds (as so amended and supplemented, the "Mortgage"), pursuant to the Underwriting Agreement, dated November 16, 2015 (the "Agreement"), between you and FPL. Capitalized terms used in this opinion but not defined shall have the meanings set forth in the Agreement.

In connection with the foregoing, we have examined such documents and satisfied ourselves as to such other matters as we have deemed necessary in order to enable us to express this opinion. We have assumed that the certificates representing the Bonds will conform to specimens examined by us and that the Bonds will be duly authenticated, in accordance with the Mortgage, by the Trustee and will be delivered against payment of the purchase price as provided in the Agreement, assumptions which we have not independently verified.

For purposes of the opinions expressed below, we have assumed without verification (i) the authenticity of all documents submitted to us as originals; (ii) the conformity to the originals of all documents submitted as certified or photostatic copies and the authenticity of the originals of such documents; (iii) the genuineness of signatures not witnessed by us; and (iv) the legal capacity of natural persons.

As to factual matters, we have relied upon representations and warranties included in the Agreement and upon certificates of officers of FPL being delivered to you today pursuant to Section 7(a) of the Agreement, and upon certificates of public officials, without independent investigation. Whenever the phrase "to the best of our knowledge" is used herein, it refers to the actual knowledge of the attorneys involved in this transaction, without independent investigation.

We do not purport to express an opinion on any laws other than the laws of the State of New York, the United States of America and, to the extent set forth herein, the laws of the State of Florida. As to all matters of Florida law, we have, with your consent, relied upon the opinion of even date herewith addressed to you by Squire Patton Boggs (US) LLP, counsel for FPL. We express no opinion or belief as to the incorporation of FPL, titles to property, franchises or the lien of the Mortgage.

Based on the foregoing, we are of the opinion that:

I.

The Mortgage has been duly authorized by FPL by all necessary corporate action, has been duly and validly executed and delivered by FPL, and is a valid and binding obligation of FPL enforceable against FPL in accordance with its terms, except as limited or affected by bankruptcy, insolvency, reorganization, receivership, moratorium, fraudulent conveyance or other laws affecting mortgagees' and other creditors' rights and remedies generally and general principles of equity and to concepts of materiality, reasonableness, good faith and fair dealing and the discretion of the court before which any matter is brought.

II.

The Bonds are valid and binding obligations of FPL enforceable against FPL in accordance with their terms, except as limited or affected by bankruptcy, insolvency, reorganization, receivership, moratorium, fraudulent conveyance or other laws affecting mortgagees' and other creditors' rights and remedies generally and general principles of equity and to concepts of materiality, reasonableness, good faith and fair dealing and the discretion of the court before which any matter is brought, and are entitled to the benefit of the security afforded by the Mortgage.

III.

Registration Statement Nos. 333-205558, 333-205558-01 and 333-205558-02) (the "Registration Statement") is an "automatic shelf registration statement" (as defined in Rule 405) that was filed not more than three years prior to the date of the Agreement. The Registration Statement has become, and is, at the Closing Date, effective under the Securities Act, and to the

best of our knowledge, no proceedings for a stop order with respect to the Registration Statement are pending or threatened under Section 8 of the Securities Act.

IV.

The statements made in the Pricing Disclosure Package and the Prospectus under the headings "Description of Bonds" and "Certain Terms of the Offered Bonds," insofar as they purport to constitute summaries of the terms of the documents referred to therein, constitute accurate summaries of the terms of such documents in all material respects.

V.

The Mortgage is duly qualified under the Trust Indenture Act of 1939, as amended.

VI.

The Agreement has been duly and validly authorized, executed and delivered by FPL.

This opinion is given to you solely for your use as the Underwriters in connection with the Agreement and the transactions contemplated thereunder, and it is not to be quoted, in whole or in part, or otherwise referred to, nor is it to be filed with any governmental agency or any other person, nor is it to be relied upon by any person other than you or for any other purpose without our express written consent. This opinion is expressed as of the date hereof, and we do not assume any obligation to update or supplement it to reflect any fact or circumstance that hereafter comes to our attention, or any change in law that hereafter occurs.

Very truly yours,

as herein described

Florida Power & Light Company
$600,000,000 First Mortgage Bonds, 3.125% Series due December 1, 2025

Ladies and Gentlemen:

We have acted as counsel for you in connection with your several purchases from Florida Power & Light Company ("FPL") of $600,000,000 aggregate principal amount of FPL's First Mortgage Bonds, 3.125% Series due December 1, 2025 (the "Bonds"), issued under FPL's Mortgage and Deed of Trust dated as of January 1, 1944, with Deutsche Bank Trust Company Americas, as Trustee, which has been amended and supplemented in the past and which will be supplemented again by one or more supplemental indentures relating to these Bonds (as so amended and supplemented, the "Mortgage"), pursuant to the Underwriting Agreement, dated November 16, 2015 (the "Agreement"), between you and FPL. Capitalized terms used in this letter but not defined shall have the meanings set forth in the Agreement.

In passing on the form of the Registration Statement and the form of the Prospectus, we necessarily assume the correctness and completeness of the statements made or included therein by FPL and take no responsibility therefor, except insofar as such statements relate to us and as set forth in paragraph IV in our opinion letter to you dated as of the date hereof. Other than with respect to the opinion expressed in said paragraph IV, we have not ourselves checked the accuracy or completeness of, or otherwise verified, the information furnished with respect to matters in the Registration Statement, the Preliminary Prospectus, the Prospectus and the Pricing Term Sheet. We have generally reviewed and discussed such information with certain officers

and employees of FPL, certain of its legal counsel, its independent registered public accounting firm and your representatives.

On the basis of such review and discussion, but without independent check or verification except as stated, nothing has come to our attention that would lead us to believe that

(i) the Registration Statement, at the Effective Date, contained an untrue statement of a material fact or omitted to state a material fact required to be stated therein or necessary in order to make the statements contained therein not misleading;

(ii) the Pricing Disclosure Package, at the Applicable Time, included an untrue statement of a material fact or omitted to state any material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading; or

(iii) the Prospectus as of the date of the Agreement included, or at the date hereof includes, an untrue statement of a material fact or the Prospectus as of the date of the Agreement omitted, or at the date hereof omits, to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading.

Subject to and on the basis of the foregoing, we further advise you that

(iv) the Registration Statement, at the Effective Date, and the Prospectus, as of the date of the Agreement, complied as to form in all material respects with the applicable requirements of the Securities Act and the applicable instructions, rules and regulations of the Commission thereunder; and

(v) the Incorporated Documents, at the times they were filed with the Commission, complied as to form in all material respects with the applicable requirements of the Exchange Act and the applicable instructions, rules and regulations of the Commission thereunder.

With respect to the foregoing paragraphs (i) - (v), we express no view or belief and make no statement with respect to (a) the financial statements and other financial or statistical data contained or incorporated by reference in the Registration Statement or the exhibits thereto, the Pricing Disclosure Package or the Prospectus and (b) those parts of the Registration Statement that constitute the Statements of Eligibility.

This letter is furnished to you solely for your use as the Underwriters in connection with the Agreement and the transactions contemplated thereunder, and it is not to be quoted, in whole or in part, or otherwise referred to, nor is it to be filed with any governmental agency or any other person, nor is it to be relied upon by any person other than you or for any other purpose without our express written consent. This letter is expressed as of the date hereof, and we do not assume any obligation to advise you of facts or circumstances that hereafter come to our attention, or of changes in law that hereafter occur, which could affect the views contained herein.

Very truly yours,

Exhibit 4 (c)

Letter of Representation, dated June 10, 2015, with respect to the Broward County Series 2015 Bonds.

Blanket Issuer Letter of Representations

[To be Completed by Issuer]

Broward County, Florida
[Name of Issuer]

[Date]

Attention: Underwriting Department — Eligibility
The Depository Trust Company
55 Water Street; 50th Floor
New York, NY 10041-0099

Ladies and Gentlemen:

This letter sets forth our understanding with respect to all issues (the "Securities") that Issuer shall request be made eligible for deposit by The Depository Trust Company ("DTC").

To induce DTC to accept the Securities as eligible for deposit at DTC, and to act in accordance with DTC's Rules with respect to the Securities, Issuer represents to DTC that Issuer will comply with the requirements stated in DTC's Operational Arrangements, as they may be amended from time to time.

Note:

Schedule A contains statements that DTC believes accurately describe DTC, the method of effecting book-entry transfers of securities distributed through DTC, and certain related matters.

Very truly yours,

Broward County, Florida

Exhibit 4 (d)

Remarketing Agreement, dated June 11, 2015, with respect to the Broward County Series 2015 Bonds.

REMARKETING AGREEMENT

This Remarketing Agreement (the "Agreement") dated June 11, 2015 is made by and between Florida Power & Light Company (the "Company") and Morgan Stanley & Co. LLC (the "Remarketing Agent").

Broward County, Florida, a political subdivision of the State of Florida (the "Issuer"), is issuing $85,000,000 aggregate principal amount of its Industrial Development Revenue Bonds (Florida Power & Light Company Project) Series 2015 (the "Bonds") under and pursuant to a Trust Indenture between the Issuer and The Bank of New York Mellon Trust Company, N.A. as trustee (the "Trustee"), dated as of June 1, 2015 (the "Indenture"). The Bonds will be secured by an assignment of rights to receive payments from the Company under a Loan Agreement, dated as of June 1, 2015 between the Issuer and the Company (the "Loan Agreement"). The Bonds will initially bear interest at a Daily Interest Rate (as defined in the Indenture). Intending to be legally bound, the parties hereto agree as follows:

1. Appointment and Acceptance. The Company hereby appoints Morgan Stanley & Co. LLC as the Remarketing Agent (the "Remarketing Agent") for the Bonds, and the Remarketing Agent hereby accepts such appointment and agrees to perform the duties and obligations imposed upon it as Remarketing Agent under the Indenture and hereunder, including, without limitation, the duties and obligations to take such actions and enter into such documents as may be necessary to effectuate a direction given pursuant to Section 201(j) of the Indenture, and agrees to use its best efforts to offer for sale and to sell the Bonds which it has been advised by The Bank of New York Mellon Trust Company, N.A., as tender agent (the "Tender Agent"), have been tendered pursuant to and in accordance with the Indenture.

2. Fees and Expenses. The Company shall pay the Remarketing Agent, as compensation for its services hereunder, a fee equal to 0.07% per annum of the weighted average principal amount of the Bonds outstanding during each three month period that the Bonds bear interest at a Daily Interest Rate, a Weekly Interest Rate (as defined in the Indenture) or a Commercial Paper Term Rate (as defined in the Indenture), payable quarterly on each January 1, April 1, July 1 and October 1, commencing July 1, 2015. The parties expect other arrangements to be made in the event that the Bonds are adjusted to bear interest at a Long-Term Interest Rate (as defined in the Indenture) or to an alternate interest rate established in accordance with Section 201(j) of the Indenture. The Remarketing Agent will not be entitled to compensation after this Agreement shall be terminated or after the term of appointment of the Remarketing Agent shall have expired except for a pro rata portion of the fee in respect of the period in which such termination or expiration occurs. The Trustee shall have no responsibility, obligation or liability with respect to any payment hereunder.

3. Disclosure Document. If the Remarketing Agent determines that it is necessary or desirable to use a disclosure document in connection with the remarketing of the Bonds, the Remarketing Agent will notify the Company of such determination. If the Remarketing Agent or the Company determines that it is necessary or desirable to use a disclosure document in connection with the remarketing of the Bonds, the Company will provide

the Remarketing Agent with a disclosure document satisfactory to the Remarketing Agent and its counsel in respect of the Bonds. The Company will supply the Remarketing Agent with such number of copies of the disclosure document as the Remarketing Agent reasonably requests from time to time. The Company will supplement and amend the disclosure document (which may include the Official Statement distributed in connection with the initial sale of the Bonds (the "Official Statement")) so that at all times the document will not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements in the disclosure document, in the light of the circumstances under which they were made, not misleading.

4. Indemnification. The Company agrees to indemnify and hold harmless the Remarketing Agent and any member, officer, official or employee of the Remarketing Agent, and each person, if any, who controls the Remarketing Agent, within the meaning of Section 15 of the Securities Act of 1933, as amended (the "Act") (collectively called the "Indemnified Parties"), against any and all losses, claims, damages or liabilities to which they or any of them may become subject and to reimburse each of them for any legal or other expenses (including, to the extent hereinafter provided, reasonable counsel fees) when and as incurred by them in connection with investigating any such losses, claims, damages or liabilities or in connection with defending any actions, insofar as such losses, claims, damages, liabilities, expenses or actions arise out of or are based upon any untrue statement or alleged untrue statement of a material fact contained in the disclosure document referred to in Section 3 hereof or the alleged omission from the disclosure document referred to in Section 3 hereof of any material fact relating to the Projects (as defined in the Indenture) or the Company necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading; provided, however, that the Company will not be liable in any such case to the extent that any such loss, claim, damage, liability, expense or action arises out of or is based upon an untrue statement or alleged untrue statement or alleged omission made in any of such documents in reliance upon and in conformity with written information furnished to the Company by the Remarketing Agent specifically for use therein. This indemnity agreement is in addition to any liability which the Company may otherwise have. In case any action shall be brought against one or more of the Indemnified Parties based upon the disclosure document referred to in Section 3 hereof and in respect of which indemnity may be sought against the Company, the Indemnified Parties shall promptly give written notice to the Company, but the omission so to notify the Company of any action shall not relieve the Company from any liability that it may have to the Indemnified Party otherwise than on account of this indemnity agreement. In case such notice of any action shall be so given, the Company shall be entitled to participate at its own expense in the defense or, if it so elects, to assume the defense of such action, in which event such defense shall be conducted by counsel chosen by the Company and satisfactory to the Indemnified Party or Indemnified Parties who shall be defendant or defendants in such action, and such defendant or defendants shall bear the fees and expenses of any additional counsel retained by them; but if the Company shall elect not to assume the defense of such action, the Company will reimburse such Indemnified Party or Indemnified Parties for the reasonable fees and expenses of any counsel retained by them; provided, however, that if the defendants in any such action include both an Indemnified Party and the Company, and counsel for the Company shall have reasonably concluded that there may be a conflict of interest involved in the representation by such counsel of both the Company and any Indemnified Party, the Indemnified Parties shall have the right to select separate counsel, satisfactory to the Company, to participate in the defense of such action

on behalf of such Indemnified Parties at the expense of the Company (it being understood, however, that the Company shall not be liable for the expenses of more than one separate counsel representing the Indemnified Party or Indemnified Parties who are parties to such action). The Company shall not be liable for any settlement of any such action effected without its consent, but if settled with the consent of the Company or if there be a final judgment for the plaintiff in any such action with or without consent, the Company agrees to indemnify and hold harmless the Indemnified Parties from and against any loss or liability by reason of such settlement or judgment.

5. Remarketing Agent's Liabilities. The Remarketing Agent shall incur no liability to the Company or to any other party for its actions as Remarketing Agent pursuant to the terms hereof and of the Indenture except for its negligence or willful misconduct and except as otherwise specifically provided herein. The Remarketing Agent will not be liable to the Company on account of the failure of any person to whom the Remarketing Agent has sold a Bond to pay for it or to deliver any document in respect of such sale. The undertaking of the Remarketing Agent to remarket any Bonds pursuant to the Indenture shall be on a "best efforts" basis.

6. Resignation or Removal and Expiration of Term of Appointment of Remarketing Agent. The Company may remove the Remarketing Agent at any time by giving at least 5 business days' notice to the Remarketing Agent, the Issuer and the Trustee. The Remarketing Agent may at any time resign and be discharged of the duties and obligations created by this Agreement by giving at least 45 calendar days' notice to the Company, the Issuer, the Tender Agent and the Trustee. The term of appointment of the Remarketing Agent shall expire upon each adjustment of the interest rate determination method for the Bonds pursuant to the Indenture; provided, however, that if the Company appoints the Remarketing Agent as the successor Remarketing Agent with respect to such new interest rate determination method, then this Agreement shall, at the option of the Company, remain in full force and effect without necessity of supplement or amendment and the Remarketing Agent shall be deemed to accept its appointment as successor Remarketing Agent as of the date of conversion to such new interest rate determination method. The provisions of Sections 4 and 5 will continue in effect as to transactions prior to the date of termination or expiration, and each party will pay the other any amounts owing at the time of termination or expiration.

7. Suspension. The Remarketing Agent may suspend its remarketing obligations under this Agreement at any time that any of the following circumstances shall have occurred and be continuing and, in the reasonable judgment of the Remarketing Agent, render it impracticable for the Remarketing Agent to perform its obligations under this Agreement:

(i) Any event shall have occurred, or information shall have become known, which, in the Remarketing Agent's reasonable opinion, makes untrue, incorrect or misleading in any material respect any statement or information contained in the disclosure document referred to in Section 3 hereof, as the information contained therein may have been supplemented or amended by the other information furnished to the Remarketing Agent in accordance with the terms and provisions contained herein, or causes such disclosure document, as so supplemented or amended, to contain an untrue, incorrect or misleading statement of a

material fact required to be stated therein or necessary to make the statements therein, in light of the circumstances under which they were made, not misleading;

(ii) There shall have occurred any general suspension of trading in securities on the New York Stock Exchange;

(iii) There shall have occurred a general banking moratorium declared by New York or Federal authorities;

(iv) There shall have occurred any new outbreak of hostilities including, but not limited to, an escalation of hostilities which existed prior to the date of this Agreement or other national or international calamity or crisis;

(v) There shall have occurred a material adverse change in the financial markets of the United States;

(vi) For any reason, a change in applicable tax laws or securities laws would require registration under the Act in connection with the remarketing of the Bonds; or

(vii) There shall have occurred a material adverse change in the financial condition of the Company and its subsidiaries taken as a whole, which material adverse change, in the Remarketing Agent's reasonable judgment, materially adversely affects the marketability of the Bonds (such right to be exercised by the Remarketing Agent in good faith).

In the event of any suspension pursuant to this paragraph, the Remarketing Agent declaring such suspension shall notify the Company thereof as soon as reasonably practicable in accordance with Section 14 hereof. Notwithstanding the declaration of suspension by the Remarketing Agent, the Remarketing Agent shall continue to determine and give notice of the interest rate on the Bonds as provided in the Indenture. Notwithstanding any provisions in this Agreement to the contrary, upon the declaration of suspension by the Remarketing Agent, the Company, upon approval by the Issuer and upon notification in writing to the Remarketing Agent, may immediately remove the Remarketing Agent

8. Dealing in Securities by Remarketing Agent. The Remarketing Agent, in its individual capacity, either as principal or agent, may in its sole discretion, buy, sell, own, hold and deal in any of the Bonds, and may join in any action which any bondholder may be entitled to take with like effect as if it did not act in any capacity hereunder. The Remarketing Agent, in its individual capacity, either as principal or agent, may also engage in or be interested in any financial or other transaction with the Company and may act as depositary, trustee or agent for any committee or body of bondholders with respect to other obligations of the Company, as freely as if it did not act in any capacity hereunder. The Company acknowledges that the Remarketing Agent is a full service firm that, together with its affiliates, is engaged in securities trading and brokerage activities and provides investment banking, financing and financial advisory services. In the ordinary course of its trading, brokerage and financing activities, the Remarketing Agent (and/or its affiliates) may at any time hold long or short positions, and may trade or otherwise effect transactions, for their own accounts or the accounts of customers, in debt or equity securities or financial instruments (including bank loans and other obligations) of the Company.

9. Remarketing Agent's Performance.

(i) The duties and obligations of the Remarketing Agent as Remarketing Agent shall be determined solely by the express provisions of this Agreement, the Indenture and the Tender Agreement by and among the Trustee, the Borrower and the Underwriter, dated June 1, 2015 (the "Tender Agreement"). The Remarketing Agent as Remarketing Agent shall not be responsible for the performance of any duties or obligations other than as are specifically set forth in this Agreement, the Indenture, and the Tender Agreement and no implied covenants or obligations shall be read into this Agreement or the Indenture against the Remarketing Agent.

(ii) The Remarketing Agent may conclusively rely upon any notice or document given or furnished to the Remarketing Agent and conforming to the requirements of this Agreement, the Indenture or the Tender Agreement and shall be protected in acting upon any such notice or document reasonably believed by it to be genuine and to have been given, signed or presented by the proper party or parties.

10. Compliance with MSRB Rule 34(c) and Agreement to Provide Liquidity Documents.

(i) In connection with its services under this Agreement, the Remarketing Agent will be required to comply with Rule G-34(c) ("Rule G-34(c)") of the Municipal Securities Rulemaking Board. Rule G-34(c) and related MSRB guidance requires the Remarketing Agent to submit to the MSRB's Short-term Obligation Rate Transparency System (the "SHORT System"):

(a) certain information with respect to each interest rate determination for variable rate demand obligations; and

(b) current copies of (A) the Indenture, (B) the Loan Agreement, (C) any other document that establishes an obligation to provide liquidity for variable rate demand obligations, and (D) those documents that include provisions detailing critical aspects of the liquidity provisions for variable rate demand obligations, including, but not limited to, (1) the notice period for bondholder tenders and (2) the term out (amortization) period for variable rate demand obligations held by the liquidity provider; ((A) through (D), collectively, the "Liquidity Documents").

(ii) In order to assist the Remarketing Agent to comply with its obligations under Rule G-34(c), the Company shall provide the Remarketing Agent, in the form of a word-searchable PDF file or in such other form as the Remarketing Agent shall notify the Company in writing as required by the MSRB, the following documents at the following times:

(a) A copy of the executed Liquidity Documents;

(b) No later than ten business days prior to the proposed date of any amendment, including an extension or renewal of the expiration date, or replacement or termination of the then current Liquidity Documents, written

notice that the current Liquidity Documents are proposed to be amended, extended, renewed, replaced or terminated and the expected date of execution and delivery of the amendment, extension, renewal, replacement or termination of the Liquidity Documents;

(c) Within one business day after the execution and delivery of any amendment, including any renewal, extension, replacement or termination of the then current Liquidity Documents, a copy of the executed amendment, renewal, extension, replacement or termination thereof; and

(d) No later than ten business days after receiving a request from the Remarketing Agent for any document relating to the liquidity supporting the Bonds, such document requested by the Remarketing Agent relating to the liquidity supporting the Bonds.

(iii) The Company agrees with the Remarketing Agent as follows:

(a) the Remarketing Agent will not redact any information in the Liquidity Documents that the Company provides to the Remarketing Agent, and will have no liability to the Company or any other party for any disclosure of confidential or sensitive information resulting from its compliance with Rule G-34(c);

(b) all Liquidity Documents and information filed by the Remarketing Agent pursuant to the requirements of Rule G-34(c) will be publicly available on the SHORT System, in the form such Liquidity Documents and information is provided to the Remarketing Agent; and

(c) in the event the Company does not provide the Remarketing Agent with a copy of a document described in this Section 10, the Company acknowledges that the Remarketing Agent may file a notice with the SHORT System that such document will not be provided at such time as is specified by the MSRB and in the SHORT System users' manual.

(iv) The Remarketing Agent acknowledges and agrees that pursuant to Rule G-34 and MSRB Notice 2011-17, the Company has the right to redact certain information that may be contained in a Liquidity Document. The Company represents and warrants that any Liquidity Document that is redacted by the Company and provided to the Remarketing Agent pursuant to this Section of the Agreement shall be redacted in a manner that is not inconsistent with MSRB Notice 2011-17.

(v) The Company shall pay or reimburse the Remarketing Agent for all reasonable charges and expenses incurred in obtaining the documents required to be filed pursuant to Rule G-34(c).

(vi) In the event additional legal or regulatory requirements are imposed on the Remarketing Agent's performance of its obligations under this Agreement, the Company agrees to cooperate with the Remarketing Agent and shall provide such documents and

take such other steps as may be reasonably requested by the Remarketing Agent in order to comply with such additional requirements.

11. No Advisory or Fiduciary Role. The Company acknowledges and agrees that: (i) the transaction contemplated by this Agreement is an arm's length, commercial transaction between the Company and the Remarketing Agent in which the Remarketing Agent is acting solely as a principal and is not acting as a "municipal advisor" (as defined in Section 15B of the Exchange Act), financial advisor or fiduciary to the Company; (ii) the Remarketing Agent has not assumed any advisory or fiduciary responsibility to the Company with respect to the transaction contemplated hereby and the discussions, undertakings and procedures leading thereto (irrespective of whether the Remarketing Agent or its affiliates have provided other services or is currently providing other services to the Company on other matters); (iii) the only obligations the Remarketing Agent has to the Company with respect to the transaction contemplated hereby expressly are set forth in this Agreement; and (iv) the Company has consulted its own legal, accounting, tax, financial and other advisors, as applicable, to the extent it has deemed appropriate. The Company agrees that it will not claim that the Remarketing Agent is a "municipal advisor" within the meaning of Section 15B of the Exchange Act, or owes a fiduciary or similar duty to the Company in connection with the transaction contemplated by this Agreement or the process leading thereto.

12. Intention of Parties. It is the express intention of the parties hereto that no purchase, sale or transfer of any Bonds, as herein provided, shall constitute or be construed to be the extinguishment of any Bond or the indebtedness represented thereby or the reissuance of any Bond or the refunding of any indebtedness represented thereby.

13. Compliance with Indenture and Tender Agreement. The Remarketing Agent represents that it is qualified to act as Remarketing Agent and agrees to abide by all of the provisions of the Indenture and the Tender Agreement, insofar as they govern its activities as Remarketing Agent for the Bonds. In particular, the Remarketing Agent (in its capacity as Remarketing Agent) hereby agrees to keep such books and records as shall be consistent with prudent industry practice and will make such books and records available for inspection by the Issuer, the Trustee, the Tender Agent and the Company at all reasonable times.

14. Notices. Unless otherwise provided, all notices, requests, demands and formal actions hereunder shall be in writing and mailed or delivered, as follows:

If to the Company:

Florida Power & Light Company
700 Universe Boulevard
Juno Beach, Florida 33408
Attention: Treasurer

If to the Trustee:

The Bank of New York Mellon Trust Company, N.A.
10161 Centurion Parkway

Jacksonville, Florida 32256

TENDER AGREEMENT

among

THE BANK OF NEW YORK MELLON TRUST COMPANY, N.A.,
as Trustee, Tender Agent and Registrar

and

FLORIDA POWER & LIGHT COMPANY

and

MORGAN STANLEY & CO. LLC
as Remarketing Agent

Dated as of June 1, 2015

$85,000,000
Broward County, Florida
Industrial Development Revenue Bonds
(Florida Power & Light Company Project)
Series 2015

TENDER AGREEMENT

This TENDER AGREEMENT, dated as of June 1, 2015, is among THE BANK OF NEW YORK MELLON TRUST COMPANY, N.A., as Trustee, Tender Agent and Registrar (in such respective capacities, the "Trustee", the "Tender Agent" and the "Registrar"); FLORIDA POWER & LIGHT COMPANY (the "Company"); and MORGAN STANLEY & CO. LLC as Remarketing Agent (the "Remarketing Agent"); or the permitted successors and assigns of any of the foregoing;

WHEREAS, Broward County, Florida (the "Issuer") proposes to issue its Industrial Development Revenue Bonds (Florida Power & Light Company Project), Series 2015 (the "Bonds"), in the aggregate principal amount of $85,000,000 pursuant to the Trust Indenture dated as of June 1, 2015 (the "Indenture") from the Issuer to the Trustee; and

WHEREAS, the Company has appointed The Bank of New York Mellon Trust Company, N.A., as Tender Agent and Registrar, and The Bank of New York Mellon Trust Company, N.A. has accepted such appointment and agreed to perform the duties and obligations imposed on it as Tender Agent and Registrar under the Indenture; and

WHEREAS, the Bonds and the Indenture provide, among other things, that the Bonds may be tendered for purchase from time to time by the Owners thereof at their option and that the Bonds shall be tendered for purchase from time to time by the Owners thereof upon the occurrence of certain events, in accordance with the provisions of the Bonds and the Indenture; and

WHEREAS, pursuant to the terms of the Indenture, the Remarketing Agent has agreed to use its best efforts to remarket any Bond tendered for purchase;

NOW, THEREFORE, in consideration of the premises and in order to provide for the coordination of said arrangements, the parties hereby agree as follows:

Section 1. Defined Terms. Capitalized terms used in this Agreement and not defined herein shall have the meanings assigned to them in the Indenture.

Section 2. Qualification of Tender Agent and Registrar. The Tender Agent and Registrar hereby represents that it is qualified to serve as Tender Agent under the requirements of Section 1402(b) of the Indenture and as Registrar under the requirements of Section 920 of the Indenture.

Section 3. Establishment of Purchase Fund.

(a) In accordance with Section 1401(b)(ii) of the Indenture, there is hereby established with the Tender Agent a separate segregated trust fund designated the "Broward County, Florida Industrial Development Revenue Bonds (Florida Power & Light Company Project), Series 2015 Purchase Fund" (the "Purchase Fund"). In accordance with Section 1401(b)(ii) of the Indenture, there are also hereby established two separate accounts in such Purchase Fund to be designated respectively the "Remarketing Account" and the "Company

Moneys Account." The Tender Agent may establish one or more additional accounts in the Purchase Fund for such purposes as the Tender Agent determines to be necessary including, but not limited to, an account for the deposit of moneys held for the Owners of Undelivered Bonds.

(b) All moneys received by the Tender Agent pursuant to Section 1403(b)(i) or (iii) of the Indenture shall be deposited in the Company Moneys Account of the Purchase Fund and held in trust until paid for the purchase of Bonds in accordance with the provisions of Section 1403 of the Indenture.

(c) All moneys received by the Tender Agent from the Remarketing Agent on behalf of purchasers of Bonds pursuant to Section 1403(b)(ii) of the Indenture on account of remarketed Bonds shall be deposited in the Remarketing Account of the Purchase Fund and held in trust until paid for the purchase of Bonds in accordance with the provisions of Section 1403 of the Indenture.

Section 4. Deposit of Bonds. The Tender Agent agrees to accept and hold all Bonds delivered to it for purchase pursuant to the Indenture as agent and bailee of, and in escrow for the benefit of the respective Owners which shall have so delivered such Bonds until moneys representing the purchase price of such Bonds shall have been delivered to or for the account of or to the order of such Owners pursuant to the Indenture.

Section 5. Remarketing Mechanics for Bonds.

(a) Daily Interest Rate Period. (i) Not later than 11:00 a.m. (New York City time) on each Business Day, the Tender Agent shall give electronic notice to the Remarketing Agent, the Trustee and the Company of each notice from an Owner pursuant to Section 202(a) of the Indenture that the Tender Agent has received on such Business Day (or during the immediately preceding Business Day if received after 10:30 a.m. on such preceding Business Day). Such electronic notice by the Tender Agent shall specify the principal amount of the Bonds for which it has received such notice (the "Daily Put Bonds"), the names of the Owners thereof, if any of such Owners shall have provided instructions to the Tender Agent regarding the payment or purchase of its Bonds (the "Standing Payment Instructions") and any requested change therein and the date specified as the date such Bonds are to be purchased (each such date, and any other date on which Bonds are to be purchased under the Indenture, is referred to herein as a "Tender Purchase Date"); provided that, if the Tender Purchase Date is a date other than the Business Day on which notice is received from an Owner, the Tender Agent shall specify the purchase price for such Bonds not later than 11:00 a.m. (New York City time) on such Tender Purchase Date.

(ii) Not later than 11:45 a.m. (New York City time) on the Tender Purchase Date with respect to all Daily Put Bonds, the Tender Agent shall electronically confirm with the Trustee the aggregate amount of the interest payable as of the Tender Purchase Date on such Daily Put Bonds. Not later than 12:30 p.m. (New York City time) on any such Tender Purchase Date the Remarketing Agent shall give electronic notice to the Tender Agent and the Registrar of (A) the principal amount of Daily Put Bonds which have been remarketed in accordance with the Indenture and the portion of the purchase price thereof which shall be deposited in the

Remarketing Account of the Purchase Fund on such Tender Purchase Date by the Remarketing Agent on behalf of the purchasers (the "New Purchasers") of the Daily Put Bonds, stating that such amount paid as such purchase price is then held by the Remarketing Agent for transfer to the Tender Agent and deposit into the Remarketing Account, and (B) the name, address, taxpayer identification number of the New Purchasers (such information is hereinafter referred to as "New Registration Information") necessary for the Registrar to prepare replacement certificates for the New Purchasers and any requested Standing Payment Instructions from such New Purchasers. The Remarketing Agent shall deliver to the Tender Agent for deposit into the Remarketing Account of the Purchase Fund in immediately available funds on such Tender Purchase Date such amount paid as such purchase price by or on behalf of the New Purchasers.

(iii) If the Remarketing Agent has been unable to remarket all Daily Put Bonds on such Tender Purchase Date, not later than 12:30 p.m. (New York City time) on such Tender Purchase Date the Remarketing Agent shall give electronic notice to the Company, the Trustee and the Tender Agent that it has been unable to remarket all such Daily Put Bonds, specifying the aggregate purchase price of the portion not remarketed.

(iv) If the Remarketing Agent has not advised the Tender Agent, in accordance with subsection (ii) above, that it is then holding moneys for transfer to the Tender Agent and deposit into the Remarketing Account, or upon receipt from the Remarketing Agent of the notice described in subsection (iii) above, and unless sufficient moneys are then on deposit in the Company Moneys Account of the Purchase Fund to pay the purchase price of all Daily Put Bonds, if the Tender Agent has neither received the advice referred to in subsection (ii) above or the purchase price of the Daily Put Bonds specified in the electronic notice from the Remarketing Agent described in subsection (iii) above, the Tender Agent shall immediately demand payment from the Company electronically of the amount necessary to provide sufficient moneys on the Tender Purchase Date to pay the purchase price of such Daily Put Bonds. The Company shall deliver, or cause to be delivered, to the Tender Agent for deposit into the Company Moneys Account of the Purchase Fund in immediately available funds on such Tender Purchase Date the amount so demanded.

(b) Weekly Interest Rate Period. (i) Not later than 10:30 a.m. (New York City time) on each Business Day succeeding a day on which the Tender Agent receives a notice from an Owner pursuant to Section 202(b) of the Indenture, the Tender Agent shall give electronic notice to the Remarketing Agent and the Company, specifying the principal amount of the Bonds for which it has received such notice (the "Weekly Put Bonds"), the Tender Purchase Date for such Weekly Put Bonds and the names of the Owners thereof and, if any of such Owners shall have Standing Payment Instructions, any requested changes therein.

(ii) Not later than 11:00 a.m. (New York City time) on the Tender Purchase Date, the Remarketing Agent shall give electronic notice to the Tender Agent and the Registrar of (A) the principal amount of Weekly Put Bonds which have been remarketed in accordance with the Indenture and the portion of the purchase price thereof which shall be deposited in the Remarketing Account of the Purchase Fund on the Tender Purchase Date by the Remarketing Agent on behalf of the New Purchasers of such Weekly Put Bonds, stating that such amount paid as such purchase price is then held by the Remarketing Agent (or to be held by the Remarketing

Agent on the Tender Purchase Date) for transfer to the Tender Agent and deposit into the Remarketing Account, and (B) the New Registration Information and any Standing Payment Instructions for the New Purchasers. The Remarketing Agent shall deliver to the Tender Agent for deposit into the Remarketing Account of the Purchase Fund in immediately available funds on such Tender Purchase Date such amount paid as such purchase price by or on behalf of the New Purchasers.

(iii) If the Remarketing Agent has been unable to remarket all Weekly Put Bonds for delivery on such Tender Purchase Date, not later than 11:00 a.m. (New York City time) on the Tender Purchase Date the Remarketing Agent shall give electronic notice to the Company, the Trustee and the Tender Agent that it has been unable to remarket all such Weekly Put Bonds, specifying the aggregate purchase price of the portion not remarketed.

(iv) If the Remarketing Agent has not advised the Tender Agent, in accordance with subsection (ii) above, that it is then holding moneys for transfer to the Tender Agent and deposit into the Remarketing Account, or upon receipt from the Remarketing Agent of the notice described in subsection (iii) above, and unless sufficient moneys are then on deposit in the Company Moneys Account of the Purchase Fund to pay the purchase price of all Weekly Put Bonds, if the Tender Agent has neither received the advice referred to in subsection (ii) above or the purchase price of the Weekly Put Bonds specified in the notice from the Remarketing Agent described in subsection (iii) above, the Tender Agent shall immediately demand payment from the Company electronically of the amount necessary to provide sufficient moneys on the Tender Purchase Date to pay the purchase price of such Weekly Put Bonds. The Company shall deliver, or cause to be delivered, to the Tender Agent for deposit into the Company Moneys Account of the Purchase Fund in immediately available funds on such Tender Purchase Date the amount so demanded.

(c) Mandatory Tenders for Purchase on First Day of Each Interest Rate Period.

(i) Not later than 10:30 a.m. (New York City time) on the Business Day succeeding the date of mailing of any notice of mandatory tender for purchase sent to Owners of the Bonds in accordance with the Indenture, the Tender Agent shall give electronic notice to the Trustee, the Company, and the Remarketing Agent specifying the principal amount (together with any premium, if applicable) of Bonds subject to mandatory tender for purchase (the "Mandatory Put Bonds"), the Tender Purchase Date for such Mandatory Put Bonds and the names of the Owners thereof and, if any of such Owners shall have Standing Payment Instructions, any requested changes therein.

(ii) Not later than 12:30 p.m. (New York City time) on any such Tender Purchase Date, the Remarketing Agent shall give electronic notice to the Tender Agent and the Registrar of (A) the principal amount of Mandatory Put Bonds which have been remarketed in accordance with the Indenture and the portion of the purchase price thereof which shall be deposited in the Remarketing Account of the Purchase Fund on the Tender Purchase Date by the Remarketing Agent on behalf of the New Purchasers of such Mandatory Put Bonds stating that such amount paid as such purchase price is then held by the Remarketing Agent for transfer to the Tender Agent and deposit into the Remarketing Account, and (B) the New Registration

Information and any Standing Payment Instructions for the New Purchasers. The Remarketing Agent shall deliver to the Tender Agent for deposit into the Remarketing Account of the Purchase Fund in immediately available funds on such Tender Purchase Date such amount paid as such purchase price by or on behalf of the New Purchasers.

(iii) If the Remarketing Agent has been unable to remarket all Mandatory Put Bonds for delivery on such Tender Purchase Date, not later than 12:30 p.m. (New York City time) on such Tender Purchase Date, the Remarketing Agent shall give electronic notice to the Company, the Trustee and the Tender Agent that it has been unable to remarket all such Mandatory Put Bonds, specifying the aggregate purchase price of the portion not remarketed.

(iv) If the Remarketing Agent has not advised the Tender Agent, in accordance with subsection (ii) above, that it is then holding moneys for transfer to the Tender Agent and deposit into the Remarketing Account, or upon receipt from the Remarketing Agent of the notice described in subsection (iii) above, and unless sufficient moneys are then on deposit in the Company Moneys Account of the Purchase Fund to pay the purchase price of all Mandatory Put Bonds, if the Tender Agent has neither received the advice referred to in subsection (ii) above or the purchase price of the Mandatory Put Bonds specified in the notice from the Remarketing Agent described in subsection (iii) above, the Tender Agent shall immediately demand payment from the Company electronically of the amount necessary to provide sufficient moneys on the Tender Purchase Date to pay the purchase price of such Mandatory Put Bonds. The Company shall deliver, or cause to be delivered, to the Tender Agent for deposit into the Company Moneys Account of the Purchase Fund in immediately available funds on such Tender Purchase Date the amount so demanded.

(d) Mandatory Tender for Purchase on Day Next Succeeding the Last Day of Each Commercial Paper Term.

(i) Not later than 10:15 a.m. (New York City time) on the day next succeeding the last day of any Commercial Paper Term (the "CP Date") with respect to a Bond, unless such day is the first day of a new Interest Rate Period (in which event Section 5(c) hereof shall be applicable), the Tender Agent shall give electronic notice to the Remarketing Agent and the Company, specifying the principal amount of each Bond then bearing interest at a Commercial Paper Term Rate, and to which such CP Date relates, the principal amount of such Bonds to be purchased on such CP Date (the "CP Put Bonds"), and the names of the Owners of the CP Put Bonds and, if any of such Owners shall have Standing Payment Instructions, any requested changes therein.

(ii) Not later than 12:30 p.m. (New York City time) on each CP Date, the Remarketing Agent shall give electronic notice to the Tender Agent and the Registrar of (A) the principal amount of CP Put Bonds which have been remarketed in accordance with the Indenture and the portion of the purchase price thereof which shall be deposited in the Remarketing Account of the Purchase Fund by the Remarketing Agent on behalf of the New Purchasers of the CP Put Bonds stating that such amount paid as such purchase price is then held by the Remarketing Agent for transfer to the Tender Agent and deposit into the Remarketing Account, and (B) the New Registration Information and any Standing Payment Instructions for the New

Purchasers and the Commercial Paper Term and the Commercial Paper Term Rate for each CP Put Bond so remarketed. The Remarketing Agent shall deliver to the Tender Agent for deposit into the Remarketing Account of the Purchase Fund in immediately available funds on such CP Date such amount paid as such purchase price by or on behalf of the New Purchasers.

(iii) If the Remarketing Agent has been unable to remarket all CP Put Bonds on such CP Date, not later than 12:30 p.m. (New York City time) on such CP Date the Remarketing Agent shall give electronic notice to the Company, the Trustee and the Tender Agent that it has been unable to remarket all such CP Put Bonds, specifying the aggregate purchase price of the portion not remarketed.

(iv) If the Remarketing Agent has not advised the Tender Agent, in accordance with subsection (ii) above, that it is then holding moneys for transfer to the Tender Agent and deposit into the Remarketing Account, or upon receipt from the Remarketing Agent of the notice described in subsection (iii) above, and unless sufficient moneys are then on deposit in the Company Moneys Account of the Purchase Fund to pay the purchase price of all CP Put Bonds, if the Tender Agent has neither received the advice referred to in subsection (ii) above or the purchase price of the CP Put Bonds specified in the notice from the Remarketing Agent described in subsection (iii) above, the Tender Agent shall immediately demand payment from the Company electronically of the amount necessary to provide sufficient moneys on the CP Date to pay the purchase price of such CP Put Bonds. The Company shall deliver, or cause to be delivered, to the Tender Agent for deposit into the Company Moneys Account of the Purchase Fund in immediately available funds on such CP Date the amount so demanded.

Section 6. DTC Procedures. The parties hereto acknowledge that, as provided in the Indenture, the Bonds will on the date of issuance thereof be deposited into the book-entry-only system maintained by The Depository Trust Company ("DTC") and while so deposited shall be registered as a single bond in the name of DTC's nominee, Cede & Co. The Tender Agent and the Registrar agree that, so long as the Bonds are held by DTC in its book-entry-only system, tenders of Bonds shall be accomplished in accordance with DTC's Delivery Order Procedures and the Tender Agent shall accept notices of tender in the form set forth as Exhibit B to the Indenture.

Section 7. Undelivered Bonds. The Tender Agent shall, as to any Undelivered Bonds, (i) notify the Remarketing Agent of the existence thereof and (ii) direct the Registrar to place a stop transfer against such Undelivered Bonds. Upon the delivery of such Undelivered Bond, the Tender Agent shall direct the Registrar to release any such stop transfer.

Section 8. Delivery of Bonds. A principal amount of Bonds equal to the principal amount of Bonds purchased by New Purchasers shall be delivered by the Registrar to the Tender Agent, registered in the names of the New Purchasers. Such Bonds shall be held available at the office of the Tender Agent to be picked up by the Remarketing Agent at or after 2:00 p.m. (New York City time) (5:00 p.m., New York City time, in connection with any remarketing of Bonds described in Section 5(c) hereof in connection with an adjustment to a Long-Term Interest Rate Period) on the Tender Purchase Date or CP Date, as the case may be, against delivery of funds for deposit into the Remarketing Account of the Purchase Fund equal to the purchase price of

such Bonds which have been remarketed. Bonds which have been purchased from moneys in the Company Moneys Account of the Purchase Fund shall be held or delivered as directed by the Company in accordance with Section 1407(c) of the Indenture.

Section 9. Notices. Any notices required to be given pursuant to this Agreement shall be sent to the address, telecopy or other electronic transmission number or address for notices, if any, filed with the Trustee at the date hereof or such address, telecopy or other electronic transmission number or address of any party hereto as such party shall have specified by written notice to each of the other parties.

Section 10. Governing Law. This Agreement shall be governed by and construed and interpreted in accordance with, the laws of the State of Florida.

Section 11. General.

(a) Payment of Tender Agent, Registrar and Trustee; Indemnification. The Company shall pay all reasonable fees, charges and out-of-pocket expenses of the Tender Agent, the Registrar and the Trustee (and their respective counsel) for acting under and pursuant to this Agreement or the Indenture. In addition, the Company shall indemnify and save harmless each of the Tender Agent, the Registrar and the Trustee and their respective officers and employees from and against any and all losses, costs, charges, expenses, judgments and liabilities arising out of claims made by third parties arising out of the transactions contemplated by this Agreement or the Indenture; provided, however, that such indemnification shall not apply to any such losses, costs, charges, expenses, judgments or liabilities caused by the gross negligence or willful misconduct of the party seeking such indemnity or of its officers or employees.

(b) Tender Agent's Performance. The Tender Agent shall perform only such duties as are specifically set forth in this Agreement or the Indenture. No provision of this Agreement or the Indenture shall require the Tender Agent to risk its own funds or otherwise incur any financial liability in the performance of its duties hereunder. No provision of this Agreement or the Indenture shall be construed to relieve the Tender Agent from liability resulting primarily from its own negligent action or its own negligent failure to act, except that:

(i) the duties and obligations of the Tender Agent shall be determined solely by the express provisions of this Agreement and the Indenture and the Tender Agent shall not be liable except for the performance of such duties and obligations as are specifically set forth in this Agreement and the Indenture, and no implied covenants or obligations shall be read into this Agreement or the Indenture against the Tender Agent, and the Tender Agent shall not be liable under this Agreement except for its gross negligence or willful misconduct; and

(ii) in the absence of bad faith on the part of the Tender Agent, the Tender Agent may conclusively rely, as to the truth of the statements therein, upon any telecopy or other electronically transmitted message or written certificate furnished to the Tender Agent which conforms to the requirements of this Agreement and the Indenture; and

(iii) the Tender Agent shall not be liable for any error of judgment made by a responsible officer or officers of the Tender Agent unless it shall be proved that the Tender Agent was grossly negligent in ascertaining the pertinent facts; and

(iv) the Tender Agent shall be entitled to the same exculpatory provisions as are set forth with respect to the Trustee in the Indenture.

(c) Payments. Any provisions of this Agreement or any statute to the contrary notwithstanding, the Tender Agent hereby waives any rights to, or liens for, its fees, charges and expenses for services hereunder from funds in the Purchase Fund. The Tender Agent agrees that it will be reimbursed and compensated for its fees, charges and expenses for acting under and pursuant to this Agreement only from payments to be made by the Company pursuant to Section 11(a) hereof.

(d) Term of Tender Agreement. Subject to the provisions of Section 1402(b) of the Indenture, this Agreement shall remain in full force and effect until such time as the principal of and premium, if any, and interest on all Bonds outstanding under the Indenture shall have been paid and all payments required under this Agreement shall have been made; provided, that if the Company and the Tender Agent shall have fulfilled all of their respective obligations hereunder, this Agreement shall terminate; provided further, that the obligations of the Company under Section 11(a) of this Agreement shall continue in full force and effect until such obligations shall have been satisfied.

(e) Resignation and Removal. The Tender Agent may resign from the performance of any of the duties hereunder upon at least 60 days' notice in accordance with Section 1402 of the Indenture. The Tender Agent may be removed as specified in Section 1402 of the Indenture. In the event of the resignation or removal of the Tender Agent, the Tender Agent shall pay over, assign and deliver any moneys and Bonds held by it in such capacity, and shall deliver all records relating thereto, to its successor or, if there be no successor, to the Trustee. However, such resigning or removed Tender Agent may retain copies of any records turned over for archival purposes. The delivery, transfer and assignment of such moneys, Bonds and documents by the Tender Agent to its successor or the Trustee, as the case may be, shall be sufficient, without the requirement of any additional act or the requirement of any indemnity to be given by the Tender Agent, to relieve the Tender Agent of all further responsibility for the exercise of the rights and the performance of the obligations vested in the Tender Agent pursuant to this Tender Agreement. Any termination or resignation hereunder shall not affect the Tender Agent's rights to the payment of fees earned or charges incurred through the effective date of such resignation or termination, as the case may be.

(f) Force Majeure. The Tender Agent shall not be liable for any failure or delays arising out of conditions beyond its reasonable control including, but not limited to, work stoppages, fires, civil disobedience, riots, rebellions, storms, electrical, mechanical, computer or communications facilities failures, acts of God and similar occurrences.

(g) Amendment of Indenture. The Company and the Trustee agree not to consent to any modification, change of or supplement to the Indenture which affects the rights or obligations of the Tender Agent without the Tender Agent's prior written consent.

(h) Successors and Assigns. The rights, duties and obligations of the Company, the Trustee, the Remarketing Agent, the Tender Agent and the Registrar hereunder shall inure, without further act, to their respective successors and permitted assigns; provided, however, that (i) the Tender Agent and the Registrar may not assign its respective obligations under this Agreement without the prior written consent of the Company, (ii) any successor or assignee of the Tender Agent must be authorized by law to perform the duties of the Tender Agent under the Indenture and (iii) no other party hereto may assign its respective obligations hereunder without the prior written consent of the Tender Agent.

(i) Counterparts. This Agreement may be executed in any number of counterparts each of which shall be an original, with the same effect as if the signatures thereto and hereto were upon the same instrument.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be duly executed and delivered by their respective officers or signatories thereunto duly authorized as of the date first above written.

Exhibit 5 (a)

(a)(i) See Exhibit 1(e), Pages 37 and 38 (as to Underwriter and fee) of the Official Statement with respect to the Broward County Series 2015 Bonds. (a)(ii) See Exhibit 3(b), cover page (as to fee) and Page S-19 (as to Underwriters) of the Prospectus Supplement with respect to the Mortgage Bonds.

Exhibit 5 (b)

Merrill Lynch, Pierce, Fenner & Smith Incorporated, SunTrust Robinson Humphrey, Inc., Citigroup Global Markets Inc. and Goldman, Sachs & Co. act as private placement agents and/or dealers with respect to the commercial paper in return for which they receive fees based on the differential between the bid and ask price for the commercial paper.

Commercial paper dealers' agreements, and the use of placement agents/dealers in public company commercial paper programs, are standard practice, and the fees charged are consistent with fees charged to companies of similar creditworthiness for commercial paper transactions. The services provided by the placement agents/dealers are described in Exhibits 4(f), 4(g), 4(h), 4(i), 4(j), 4(k), 4(l) and 4(m).

Capital Support

Letters of Credit, Surety Bonds and Guarantees
Certain subsidiaries of NEE, including FPL, obtain letters of credit and surety bonds and issue guarantees to facilitate commercial transactions with third parties and financings. Letters of credit, surety bonds and guarantees support, among other things, the buying and selling of wholesale energy commodities, debt and related reserves, capital expenditures for NEER's wind and solar development, nuclear activities and other contractual agreements. Substantially all of NEE's and FPL's guarantee arrangements are on behalf of their consolidated subsidiaries for their related payment obligations.

In addition, as part of contract negotiations in the normal course of business, NEE and certain of its subsidiaries, including FPL, may agree to make payments to compensate or indemnify other parties for possible future unfavorable financial consequences resulting from specified events. The specified events may include, but are not limited to, an adverse judgment in a lawsuit, the imposition of additional taxes due to a change in tax law or interpretations of the tax law or the non-receipt of renewable tax credits or proceeds from cash grants under the Recovery Act. NEE and FPL are unable to develop an estimate of the maximum potential amount of future payments under some of these contracts because events that would obligate them to make payments have not yet occurred or, if any such event has occurred, they have not been notified of its occurrence.

In addition, NEE has guaranteed certain payment obligations of NEECH, including most of its debt and all of its debentures and commercial paper issuances, as well as most of its payment guarantees and indemnifications, and NEECH has guaranteed certain debt and other obligations of NEER and its subsidiaries.

At September 30, 2015, NEE had approximately $839 million of standby letters of credit ($3 million for FPL), $282 million of surety bonds ($61 million for FPL) and $11.7 billion notional amount of guarantees and indemnifications ($22 million for FPL), of which $6.8 billion of letters of credit, guarantees and indemnifications ($10 million for FPL) have expiration dates within the next five years.

Each of NEE and FPL believe it is unlikely that it would be required to make any payments under these letters of credit, surety bonds, guarantees and indemnifications. At September 30, 2015, NEE and FPL did not have any significant liabilities recorded for these letters of credit, surety bonds, guarantees and indemnifications.

Shelf Registration
In July 2015, NEE, NEECH and FPL filed a shelf registration statement with the SEC for an unspecified amount of securities which became effective upon filing. The amount of securities issuable by the companies is established from time to time by their respective boards of directors. As of October 29, 2015, securities that may be issued under the registration statement include, depending on the registrant, senior debt securities, subordinated debt securities, junior subordinated debentures, first mortgage bonds, common stock, preferred stock, stock purchase contracts, stock purchase units, warrants and guarantees related to certain of those securities. As of October 29, 2015, the board-authorized capacity available to issue securities was approximately $4.8 billion for NEE and NEECH (issuable by either or both of them up to such aggregate amount) and $2.5 billion for FPL.

New Accounting Rules and Interpretations

Amendments to the Consolidation Analysis - In February 2015, the FASB issued a new accounting standard that will modify current consolidation guidance. See Note 5 - Amendments to the Consolidation Analysis.

Presentation of Debt Issuance Costs - In April 2015, the FASB issued a new accounting standard which changes the presentation of debt issuance costs in financial statements. See Note 7 - Presentation of Debt Issuance Costs.

Revenue Recognition - In July 2015, the FASB approved the deferral of the effective date of the new accounting standard related to the recognition of revenue from contracts with customers and required disclosures. See Note 9 - Revenue Recognition.

ENERGY MARKETING AND TRADING AND MARKET RISK SENSITIVITY

NEE and FPL are exposed to risks associated with adverse changes in commodity prices, interest rates and equity prices. Financial instruments and positions affecting the financial statements of NEE and FPL described below are held primarily for purposes other than trading. Market risk is measured as the potential loss in fair value resulting from hypothetical reasonably possible changes in commodity prices, interest rates or equity prices over the next year. Management has established risk management policies to monitor and manage such market risks, as well as credit risks.

Commodity Price Risk

NEE and FPL use derivative instruments (primarily swaps, options, futures and forwards) to manage the commodity price risk inherent in the purchase and sale of fuel and electricity. In addition, NEE, through NEER, uses derivatives to optimize the value of its power generation and gas infrastructure assets and engages in power and gas marketing and trading activities to take advantage of expected future favorable price movements. See Note 2.

The changes in the fair value of NEE's consolidated subsidiaries' energy contract derivative instruments for the three and nine months ended September 30, 2015 were as follows:

	Trading	Hedges on Owned Assets: Non-Qualifying	Hedges on Owned Assets: FPL Cost Recovery Clauses	NEE Total
		(millions)		
Three months ended September 30, 2015				
Fair value of contracts outstanding at June 30, 2015	$ 330	$ 984	$ (218)	$ 1,096
Reclassification to realized at settlement of contracts	(53)	(76)	129	—

Net margin cash collateral paid (received)				(325)
Total mark-to-market energy contract net assets (liabilities) at September 30, 2015	$ 330	$ 1,262	$ (230)	$ 1,037

NEE's total mark-to-market energy contract net assets (liabilities) at September 30, 2015 shown above are included on the condensed consolidated balance sheets as follows:

	September 30, 2015
	(millions)
Current derivative assets	$ 625
Noncurrent derivative assets	1,278
Current derivative liabilities	(535)
Noncurrent derivative liabilities	(331)
NEE's total mark-to-market energy contract net assets	$ 1,037

The sources of fair value estimates and maturity of energy contract derivative instruments at September 30, 2015 were as follows:

	Maturity						
	2015	2016	2017	2018	2019	Thereafter	Total
	(millions)						
Trading:							
Quoted prices in active markets for identical assets	$ (23)	$ 10	$ 17	$ 9	$ 5	$ —	$ 18
Significant other observable inputs	31	21	12	14	(1)	(5)	72
Significant unobservable inputs	63	87	68	3	9	10	240
Total	71	118	97	26	13	5	330
Owned Assets - Non-Qualifying:							
Quoted prices in active markets for identical assets	12	(7)	—	2	—	—	7
Significant other observable inputs	49	283	182	109	83	130	836
Significant unobservable inputs	20	49	40	38	32	240	419
Total	81	325	222	149	115	370	1,262
Owned Assets - FPL Cost Recovery Clauses:							
Quoted prices in active markets for identical assets	—	—	—	—	—	—	—
Significant other observable inputs	(124)	(108)	—	—	—	—	(232)
Significant unobservable inputs	2	—	—	—	—	—	2
Total	(122)	(108)	—	—	—	—	(230)
Total sources of fair value	$ 30	$ 335	$ 319	$ 175	$ 128	$ 375	$ 1,362

The changes in the fair value of NEE's consolidated subsidiaries' energy contract derivative instruments for the three and nine months ended September 30, 2014 were as follows:

		Hedges on Owned Assets		
	Trading	Non-Qualifying	FPL Cost Recovery Clauses	NEE Total
		(millions)		
Three months ended September 30, 2014				
Fair value of contracts outstanding at June 30, 2014	$ 295	$ 193	$ 72	$ 560
Reclassification to realized at settlement of contracts	(21)	(2)	(5)	(28)
Net option premium purchases (issuances)	3	—	—	3
Changes in fair value excluding reclassification to realized	56	(11)	(112)	(67)
Fair value of contracts outstanding at September 30, 2014	333	180	(45)	468
Net margin cash collateral paid (received)				(124)
Total mark-to-market energy contract net assets (liabilities) at September 30, 2014	$ 333	$ 180	$ (45)	$ 344

		Hedges on Owned Assets		
	Trading	Non-Qualifying	FPL Cost Recovery Clauses	NEE Total
		(millions)		
Nine months ended September 30, 2014				
Fair value of contracts outstanding at December 31, 2013	$ 301	$ 563	$ 46	$ 910
Reclassification to realized at settlement of contracts	15	95	(126)	(16)
Inception value of new contracts	(21)	—	—	(21)
Net option premium purchases (issuances)	(59)	2	—	(57)
Changes in fair value excluding reclassification to realized	97	(480)	35	(348)
Fair value of contracts outstanding at September 30, 2014	333	180	(45)	468
Net margin cash collateral paid (received)				(124)
Total mark-to-market energy contract net assets (liabilities) at September 30, 2014	$ 333	$ 180	$ (45)	$ 344

With respect to commodities, NEE's EMC, which is comprised of certain members of senior management, and NEE's chief executive officer are responsible for the overall approval of market risk management policies and the delegation of approval and authorization

levels. The EMC and NEE's chief executive officer receive periodic updates on market positions and related exposures, credit exposures and overall risk management activities.

NEE uses a value-at-risk (VaR) model to measure commodity price market risk in its trading and mark-to-market portfolios. The VaR is the estimated nominal loss of market value based on a one-day holding period at a 95% confidence level using historical simulation methodology. The VaR figures are as follows:

	Trading			Non-Qualifying Hedges and Hedges in FPL Cost Recovery Clauses[a]			Total		
	FPL	NEER	NEE	FPL	NEER	NEE	FPL	NEER	NEE
					(millions)				
December 31, 2014	$ —	$ 2	$ 2	$ 65	$ 62	$ 24	$ 65	$ 64	$ 24
September 30, 2015	$ —	$ 1	$ 1	$ 26	$ 41	$ 27	$ 26	$ 42	$ 26
Average for the nine months ended September 30, 2015	$ —	$ 1	$ 1	$ 37	$ 35	$ 24	$ 37	$ 36	$ 23

(a) Non-qualifying hedges are employed to reduce the market risk exposure to physical assets or contracts which are not marked to market. The VaR figures for the non-qualifying hedges and hedges in FPL cost recovery clauses category do not represent the economic exposure to commodity price movements.

Interest Rate Risk

NEE's and FPL's financial results are exposed to risk resulting from changes in interest rates as a result of their respective issuances of debt, investments in special use funds and other investments. NEE and FPL manage their respective interest rate exposure by monitoring current interest rates, entering into interest rate contracts and using a combination of fixed rate and variable rate debt. Interest rate contracts are used to mitigate and adjust interest rate exposure when deemed appropriate based upon market conditions or when required by financing agreements.

The following are estimates of the fair value of NEE's and FPL's financial instruments that are exposed to interest rate risk:

	September 30, 2015		December 31, 2014	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
		(millions)		
NEE:				
Fixed income securities:				
Special use funds	$ 1,834	$ 1,834 [a]	$ 1,965	$ 1,965 [a]
Other investments:				
Debt securities	$ 135	$ 135 [a]	$ 124	$ 124 [a]
Primarily notes receivable	$ 524	$ 662 [b]	$ 525	$ 679 [b]
Long-term debt, including current maturities	$ 28,096	$ 29,545 [c]	$ 27,876	$ 30,337 [c]
Interest rate contracts - net unrealized losses	$ (285)	$ (285) [d]	$ (216)	$ (216) [d]
FPL:				
Fixed income securities - special use funds	$ 1,413	$ 1,413 [a]	$ 1,568	$ 1,568 [a]
Long-term debt, including current maturities	$ 9,099	$ 10,248 [c]	$ 9,473	$ 11,105 [c]

(a) Primarily estimated using quoted market prices for these or similar issues.
(b) Primarily estimated using a discounted cash flow valuation technique based on certain observable yield curves and indices considering the credit profile of the borrower.
(c) Estimated using either quoted market prices for the same or similar issues or discounted cash flow valuation technique, considering the current credit spread of the debtor.
(d) Modeled internally using discounted cash flow valuation technique and applying a credit valuation adjustment.

The special use funds of NEE and FPL consist of restricted funds set aside to cover the cost of storm damage for FPL and for the decommissioning of NEE's and FPL's nuclear power plants. A portion of these funds is invested in fixed income debt securities primarily carried at estimated fair value. At FPL, changes in fair value, including any OTTI losses, result in a corresponding adjustment to the related liability accounts based on current regulatory treatment. The changes in fair value of NEE's non-rate regulated operations result in a corresponding adjustment to OCI, except for impairments deemed to be other than temporary, including any credit losses, which are reported in current period earnings. Because the funds set aside by FPL for storm damage could be needed at any time, the related investments are generally more liquid and, therefore, are less sensitive to changes in interest rates. The nuclear decommissioning funds, in contrast, are generally invested in longer-term securities, as decommissioning activities are not scheduled to begin until at least 2030 (2032 at FPL).

As of September 30, 2015, NEE had interest rate contracts with a notional amount of approximately $8.1 billion related to long-term debt issuances, of which $2.0 billion are fair value hedges at NEECH that effectively convert fixed-rate debt to a variable-rate debt instrument. The remaining $6.1 billion of notional amount of interest rate contracts relate to cash flow hedges to manage exposure to the variability of cash flows associated with variable-rate debt instruments, which primarily relate to NEER debt issuances. At September 30, 2015, the estimated fair value of NEE's fair value hedges and cash flow hedges was approximately $52 million and $(337) million, respectively. See Note 2.

Based upon a hypothetical 10% decrease in interest rates, which is a reasonable near-term market change, the net fair value of NEE's net liabilities would increase by approximately $968 million ($477 million for FPL) at September 30, 2015.

Equity Price Risk

NEE and FPL are exposed to risk resulting from changes in prices for equity securities. For example, NEE's nuclear decommissioning reserve funds include marketable equity securities primarily carried at their market value of approximately $2,531 million and $2,634 million ($1,508 million and $1,561 million for FPL) at September 30, 2015 and December 31, 2014, respectively. At September 30, 2015, a hypothetical 10% decrease in the prices quoted on stock exchanges, which is a reasonable near-term market change, would result in a $233 million ($138 million for FPL) reduction in fair value. For FPL, a corresponding adjustment would be made to the related liability accounts based on current regulatory treatment, and for NEE's non-rate regulated operations, a corresponding adjustment would be made to OCI to the extent the market value of the securities exceeded amortized cost and to OTTI loss to the extent the market value is below amortized cost.

Credit Risk

NEE and its subsidiaries are also exposed to credit risk through their energy marketing and trading operations. Credit risk is the risk that a financial loss will be incurred if a counterparty to a transaction does not fulfill its financial obligation. NEE manages counterparty credit risk for its subsidiaries with energy marketing and trading operations through established policies, including counterparty credit limits, and in some cases credit enhancements, such as cash prepayments, letters of credit, cash and other collateral and guarantees.

Credit risk is also managed through the use of master netting agreements. NEE's credit department monitors current and forward credit exposure to counterparties and their affiliates, both on an individual and an aggregate basis. For all derivative and contractual transactions, NEE's energy marketing and trading operations, which include FPL's energy marketing and trading division, are exposed to losses in the event of nonperformance by counterparties to these transactions. Some relevant considerations when assessing NEE's energy marketing and trading operations' credit risk exposure include the following:

- Operations are primarily concentrated in the energy industry.
- Trade receivables and other financial instruments are predominately with energy, utility and financial services related companies, as well as municipalities, cooperatives and other trading companies in the U.S.
- Overall credit risk is managed through established credit policies and is overseen by the EMC.
- Prospective and existing customers are reviewed for creditworthiness based upon established standards, with customers not meeting minimum standards providing various credit enhancements or secured payment terms, such as letters of credit or the posting of margin cash collateral.
- Master netting agreements are used to offset cash and non-cash gains and losses arising from derivative instruments with the same counterparty. NEE's policy is to have master netting agreements in place with significant counterparties.

Based on NEE's policies and risk exposures related to credit, NEE and FPL do not anticipate a material adverse effect on their financial statements as a result of counterparty nonperformance. As of September 30, 2015, approximately 94% of NEE's and 100% of FPL's energy marketing and trading counterparty credit risk exposure is associated with companies that have investment grade credit ratings.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

See Management's Discussion - Energy Marketing and Trading and Market Risk Sensitivity.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

As of September 30, 2015, each of NEE and FPL had performed an evaluation, under the supervision and with the participation of its management, including NEE's and FPL's chief executive officer and chief financial officer, of the effectiveness of the design and operation of each company's disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 Rules 13a-15(e) and 15d-15(e)). Based upon that evaluation, the chief executive officer and the chief financial officer of each of NEE and FPL concluded that the company's disclosure controls and procedures were effective as of September 30, 2015.

(b) Changes in Internal Control Over Financial Reporting

NEE and FPL are continuously seeking to improve the efficiency and effectiveness of their operations and of their internal controls. This results in refinements to processes throughout NEE and FPL. However, there has been no change in NEE's or FPL's internal control over financial reporting (as defined in the Securities Exchange Act of 1934 Rules 13a-15(f) and 15d-15(f)) that occurred during NEE's and FPL's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, NEE's or FPL's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

NEE and FPL are parties to various legal and regulatory proceedings in the ordinary course of their respective businesses. For information regarding legal proceedings that could have a material effect on NEE or FPL, see Item 3. Legal Proceedings and Note 13 - Legal Proceedings to Consolidated Financial Statements in the 2014 Form 10-K and Note 8 - Legal Proceedings herein. Such descriptions are incorporated herein by reference.

Item 1A. Risk Factors

There have been no material changes from the risk factors disclosed in the June 2015 Form 10-Q and 2014 Form 10-K. The factors discussed in Part II, Item 1A. Risk Factors in the June 2015 Form 10-Q and in Part I, Item 1A. Risk Factors in the 2014 Form 10-K, as well as other information set forth in this report, which could materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects should be carefully considered. The risks described above and in the June 2015 Form 10-Q and 2014 Form 10-K are not the only risks facing NEE and FPL. Additional risks and uncertainties not currently known to NEE or FPL, or that are currently deemed to be immaterial, also may materially adversely affect NEE's or FPL's business, financial condition, results of operations and prospects.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(c) Information regarding purchases made by NEE of its common stock during the three months ended September 30, 2015 is as follows:

Period	Total Number of Shares Purchased[a]	Average Price Paid Per Share	Total Number of Shares Purchased as Part of a Publicly Announced Program	Maximum Number of Shares that May Yet be Purchased Under the Program[b]
7/1/15 - 7/31/15	—	$ —	—	13,274,748
8/1/15 - 8/31/15	3,717	$ 109.04	—	13,274,748
9/1/15 - 9/30/15	528	$ 95.81	—	13,274,748
Total	4,245	$ 107.39	—	

(a) Includes: (1) in August 2015, shares of common stock withheld from employees to pay certain withholding taxes upon the vesting of stock awards granted to such employees under the NextEra Energy, Inc. Amended and Restated 2011 Long Term Incentive Plan; and (2) in September 2015, shares of common stock purchased as a reinvestment of dividends by the trustee of a grantor trust in connection with NEE's obligation under a February 2006 grant under the NextEra Energy, Inc. Amended and Restated Long-Term Incentive Plan (former LTIP) to an executive officer of deferred retirement share awards.

(b) In February 2005, NEE's Board of Directors authorized common stock repurchases of up to 20 million shares of common stock over an unspecified period, which authorization was most recently reaffirmed and ratified by the Board of Directors in July 2011.

Item 5. Other Information

(a) None

(b) None

(c) Other events

(i) Reference is made to Item 1. Business - NEE's Operating Subsidiaries - FPL - FPL System Capability and Load in the 2014 Form 10-K.

In September 2015, FPL filed a petition with the FPSC for approval to build a new approximately 1,600 MW natural gas-fired combined-cycle unit in Okeechobee County, Florida with a planned in-service date of June 2019. This new unit is also subject to approval by the Siting Board (comprised of the governor and cabinet) under the Florida Electrical Power Plant Siting Act. Several parties, including the Office of Public Counsel, have intervened in the FPSC approval process. An FPSC decision is expected in January 2016 and Siting Board approval is expected by the end of 2016.

(ii) Reference is made to Item 1. Business - NEE Environmental Matters - Regulation of GHG Emissions in the 2014 Form 10-K.

In October 2015, the EPA's final rule for new fossil fuel-fired electric generating units regulated under Section 111(b) of the Clean Air Act became effective, which is not expected to have an impact on NEE or FPL. Also in October 2015, the EPA published a final rule under Section 111(d) of the Clean Air Act (Clean Power Plan) to reduce carbon emissions from existing fossil fuel-fired electric generating units which will become effective in December 2015. The Clean Power Plan sets emission rate targets for each state and requires each state to develop a compliance plan by the fall of 2016 to meet these emissions targets. The Clean Power Plan indicates that compliance will start in 2022 with both interim and final target dates, each with specific emissions reductions. NEE and FPL are analyzing the Clean Power Plan and the impact of any final compliance obligations cannot be determined until the state plans have been finalized. Numerous parties have challenged the Clean Power Plan.

(iii) Reference is made to Item 1. Business - NEE Environmental Matters - Waters of the U.S. in the 2014 Form 10-K and Part II, Item 5. (c)(iv) in the June 2015 Form 10-Q.

In October 2015, the U.S. Court of Appeals for the Sixth Circuit issued a stay of the EPA's final rule redefining "waters of the U.S." under the Clean Water Act pending further court proceedings to address which court has jurisdiction as well as challenges to the rule.

Exhibit 4(c)

NEXTERA ENERGY CAPITAL HOLDINGS, INC.

OFFICER'S CERTIFICATE

Creating the 2.80% Debentures, Series due August 27, 2020

Aldo Portales, Assistant Treasurer of NextEra Energy Capital Holdings, Inc. (the "**Company**"), pursuant to the authority granted in the accompanying Board Resolutions (all capitalized terms used herein which are not defined herein or in *Exhibit A* hereto, but which are defined in the Indenture referred to below, shall have the meanings specified in the Indenture), and pursuant to Sections 201 and 301 of the Indenture, does hereby certify to The Bank of New York Mellon (the "**Trustee**"), as Trustee under the Indenture (For Unsecured Debt Securities) dated as of June 1, 1999 between the Company and the Trustee, as amended (the "**Indenture**"), that:

1. The securities to be issued under the Indenture in accordance with this certificate shall be designated "2.80% Debentures, Series due August 27, 2020" (referred to herein as the "**Debentures of the Twenty-Eighth Series**") and shall be issued in substantially the form set forth in *Exhibit A* hereto.

2. The Debentures of the Twenty-Eighth Series shall be issued by the Company in the initial aggregate principal amount of $300,000,000. Additional Debentures of the Twenty-Eighth Series, without limitation as to amount, having substantially the same terms as the Outstanding Debentures of the Twenty-Eighth Series (except for the payment of interest accruing prior to the issue date of the additional Debentures of the Twenty-Eighth Series or except for the first payment of interest following the issue date of the additional Debentures of the Twenty-Eighth Series) may also be issued by the Company pursuant to the Indenture without the consent of the Holders of the then-Outstanding Debentures of the Twenty-Eighth Series. Any such additional Debentures of the Twenty-Eighth Series as may be issued pursuant to the Indenture from time to time shall be part of the same series as the then-Outstanding Debentures of the Twenty-Eighth Series.

3. The Debentures of the Twenty-Eighth Series shall mature and the principal shall be due and payable, together with all accrued and unpaid interest thereon, on the Stated Maturity Date. The "Stated Maturity Date" means August 27, 2020.

4. The Debentures of the Twenty-Eighth Series shall bear interest as provided in the form thereof set forth as *Exhibit A* hereto.

5. Each installment of interest on a Debenture of the Twenty-Eighth Series shall be payable as provided in the form thereof set forth as *Exhibit A* hereto.

6. Registration of the Debentures of the Twenty-Eighth Series, and registration of transfers and exchanges in respect of the Debentures of the Twenty-Eighth Series, may be effectuated at the office or agency of the Company in New York City, New York. Notices and demands to or upon the Company in respect of the Debentures of the Twenty-Eighth Series may be served at the office or agency of the Company in New York City, New York. The Corporate Trust Office of the Trustee will initially be the agency of the Company for such payment, registration, registration of

transfers and exchanges and service of notices and demands, and the Company hereby appoints the Trustee as its agent for all such purposes; *provided, however*, that the Company reserves the right to change, by one or more Officer's Certificates, any such office or agency and such agent. The Trustee will initially be the Security Registrar and the Paying Agent for the Debentures of the Twenty-Eighth Series.

7. The Debentures of the Twenty-Eighth Series will be redeemable at the option of the Company prior to the Stated Maturity Date as provided in the form thereof set forth in *Exhibit A* hereto.

8. So long as all of the Debentures of the Twenty-Eighth Series are held by a securities depository in book-entry form, the Regular Record Date for the interest payable on any given Interest Payment Date with respect to the Debentures of the Twenty-Eighth Series shall be the close of business on the Business Day immediately preceding such Interest Payment Date; *provided, however*, that if any of the Debentures of the Twenty-Eighth Series are not held by a securities depository in book-entry form, the Regular Record Date will be the close of business on the fifteenth (15th) calendar day next preceding such Interest Payment Date.

9. If the Company shall make any deposit of money and/or Eligible Obligations with respect to any Debentures of the Twenty-Eighth Series, or any portion of the principal amount thereof, as contemplated by Section 701 of the Indenture, the Company shall not deliver an Officer's Certificate described in clause (z) in the first paragraph of said Section 701 unless the Company shall also deliver to the Trustee, together with such Officer's Certificate, either:

(A) an instrument wherein the Company, notwithstanding the satisfaction and discharge of its indebtedness in respect of the Debentures of the Twenty-Eighth Series, shall assume the obligation (which shall be absolute and unconditional) to irrevocably deposit with the Trustee or Paying Agent such additional sums of money, if any, or additional Eligible Obligations (meeting the requirements of said Section 701), if any, or any combination thereof, at such time or times, as shall be necessary, together with the money and/or Eligible Obligations theretofore so deposited, to pay when due the principal of and premium, if any, and interest due and to become due on such Debentures of the Twenty-Eighth Series or portions thereof, all in accordance with and subject to the provisions of said Section 701; *provided, however*, that such instrument may state that the obligation of the Company to make additional deposits as aforesaid shall be subject to the delivery to the Company by the Trustee of a notice asserting the deficiency accompanied by an opinion of an independent public accountant of nationally recognized standing, selected by the Trustee, showing the calculation thereof; or

(B) an Opinion of Counsel to the effect that, as a result of (i) the receipt by the Company from, or the publication by, the Internal Revenue Service of a ruling or (ii) a change in law occurring after the date of this certificate, the Holders of such Debentures of the Twenty-Eighth Series, or the applicable portion of the principal amount thereof, will not recognize income, gain or loss for United States federal income tax purposes as a result of the satisfaction and discharge of the Company's indebtedness in respect thereof and will be subject to United States federal income tax on the same amounts, at the same times and in the same manner as if such satisfaction and discharge had not been effectuated.

10. The Debentures of the Twenty-Eighth Series will be absolutely, irrevocably and unconditionally guaranteed as to payment of principal, interest and premium, if any, by NextEra Energy, Inc., as Guarantor (the "**Guarantor**"), pursuant to a Guarantee Agreement, dated as of June 1, 1999, between the Guarantor and The Bank of New York Mellon (as Guarantee Trustee) (the "**Guarantee Agreement**"). The following shall constitute "**Guarantor Events**" with respect to the Debentures of the Twenty-Eighth Series:

(A) the failure of the Guarantee Agreement to be in full force and effect;

(B) the entry by a court having jurisdiction with respect to the Guarantor of (i) a decree or order for relief in respect of the Guarantor in an involuntary case or proceeding under any applicable Federal or State bankruptcy, insolvency or other similar law or (ii) a decree or order adjudging the Guarantor bankrupt or insolvent, or approving as properly filed a petition by one or more entities other than the Guarantor seeking reorganization, arrangement, adjustment or composition of or in respect of the Guarantor under any applicable Federal or State bankruptcy, insolvency or other similar law, or appointing a custodian, receiver, liquidator, assignee, trustee, sequestrator or other similar official for the Guarantor or for any substantial part of its property, or ordering the winding up or liquidation of its affairs, and any such decree or order for relief or any such other decree or order shall have remained unstayed and in effect for a period of ninety (90) consecutive days; or

(C) the commencement by the Guarantor of a voluntary case or proceeding under any applicable Federal or State bankruptcy, insolvency or other similar law or of any other case or proceeding seeking for the Guarantor to be adjudicated bankrupt or insolvent, or the consent by the Guarantor to the entry of a decree or order for relief in respect of itself in a case or proceeding under any applicable Federal or State bankruptcy, insolvency or other similar law or to the commencement of any bankruptcy or insolvency case or proceeding against the Guarantor, or the filing by the Guarantor of a petition or answer or consent seeking reorganization or relief under any applicable Federal or State bankruptcy, insolvency or other similar law, or the consent by the Guarantor to the filing of such petition or to the appointment of or taking possession by a custodian, receiver, liquidator, assignee, trustee, sequestrator or similar official of the Guarantor or of any substantial part of its property, or the making by the Guarantor of an assignment for the benefit of creditors, or the admission by the Guarantor in writing of its inability to pay its debts generally as they become due, or the authorization of such action by the Board of Directors of the Guarantor.

Notwithstanding anything to the contrary contained in the Debentures of the Twenty-Eighth Series, this certificate or the Indenture, the Company shall, if a Guarantor Event shall occur and be continuing, redeem all of the Outstanding Debentures of the Twenty-Eighth Series within sixty (60) days after the occurrence of such Guarantor Event at a redemption price equal to the principal amount thereof plus accrued and unpaid interest, if any, to but excluding the date of redemption *unless*, within thirty (30) days after the occurrence of such Guarantor Event, Standard & Poor's Ratings Services (a Standard & Poor's Financial Services LLC business) and Moody's Investors Service, Inc. (if the Debentures of the Twenty-Eighth Series are then rated by those rating agencies, or, if the Debentures of the Twenty-Eighth Series are then rated by only one of those rating agencies, then such rating agency, or, if the Debentures of the Twenty-Eighth Series are not then rated by either one of those rating agencies but are then rated by one or more other nationally recognized rating agencies, then at least one of those other nationally recognized rating agencies) shall have reaffirmed in writing that, after giving effect to such Guarantor Event, the credit rating on the Debentures of the Twenty-Eighth Series shall be investment grade (i.e. in one of the four highest categories, without regard to subcategories within such rating categories, of such rating agency).

11. With respect to the Debentures of the Twenty-Eighth Series, each of the following events shall be an additional Event of Default under the Indenture:

(A) the consolidation of the Guarantor with or merger of the Guarantor into any other Person, or the conveyance or other transfer or lease by the Guarantor of its properties and assets substantially as an entirety to any Person, unless

(i) the Person formed by such consolidation or into which the Guarantor is merged or the Person which acquires by conveyance or other transfer, or which leases, the properties and assets of the Guarantor substantially as an entirety shall be a Person organized and existing under the laws of the United States, any State thereof or the District of Columbia, and shall expressly assume the obligations of the Guarantor under the Guarantee Agreement; and

(ii) immediately after giving effect to such transaction, no Event of Default and no event which, after notice or lapse of time or both, would become an Event of Default, shall have occurred and be continuing; and

(B) the failure of the Company to redeem the Outstanding Debentures of the Twenty-Eighth Series if and as required by *paragraph 10* hereof.

12. If a Guarantor Event occurs and the Company is not required to redeem the Debentures of the Twenty-Eighth Series pursuant to *paragraph 10* hereof, the Company will provide to the Trustee and the Holders of the Debentures of the Twenty-Eighth Series annual and quarterly reports containing the information that the Company would be required to file with the Securities and Exchange Commission under Section 13 or Section 15(d) of the Securities Exchange Act of 1934 if it were subject to the reporting requirements of those Sections; *provided*, that if the Company is, at that time, subject to the reporting requirements of those Sections, the filing of annual and quarterly reports with the Securities and Exchange Commission pursuant to those Sections will satisfy the foregoing requirement.

13. The Debentures of the Twenty-Eighth Series will be initially issued in global form (the "**Global Debentures**") registered in the name of Cede & Co., as registered owner and as nominee for The Depository Trust Company ("**DTC**"). The Debentures of the Twenty-Eighth Series will be initially issued pursuant to an exemption or exemptions from the registration requirements of the Securities Act of 1933, as amended (the "**Securities Act**"). Each such Debenture of the Twenty-Eighth Series, whether in a global form or in a certificated form, shall bear the non-registration legend, or the Regulation S legend, as applicable, in substantially the form set forth in *Exhibit A* hereto (including, if applicable, the agreements of each holder of such Debenture of the Twenty-Eighth Series set forth therein). Nothing in the Indenture, the Debentures of the Twenty-Eighth Series or this Certificate shall be construed to require the Company to register any Debentures of the Twenty-Eighth Series under the Securities Act, or to make any transfer of such Debentures of the Twenty-Eighth Series in violation of applicable law.

14. Beneficial interests in the Debentures of the Twenty-Eighth Series offered and sold to qualified institutional buyers (as defined in Rule 144A under the Securities Act ("**Rule 144A**")) in reliance upon Rule 144A will be represented by one or more separate Global Debentures (each, a "**Rule 144A Global Debenture**") registered in the name of Cede & Co., as registered owner and as nominee for DTC and shall include the non-registration legend set forth in *Exhibit A* hereto. Initially, beneficial interests in the Debentures of the Twenty-Eighth Series offered and sold to purchasers pursuant to Regulation S under the Securities Act ("**Regulation S**") will be evidenced by one or more separate Global Debentures (each, a "**Regulation S Global Debenture**") and will be registered in the name of Cede & Co., as registered owner and as nominee for DTC for the accounts of the Euroclear System ("**Euroclear**") or Clearstream Banking, société anonyme ("**Clearstream**"), and shall include the Regulation S legend set forth in *Exhibit A* hereto.

15. Transfers of beneficial interests in a Rule 144A Global Debenture will be subject to the restrictions on transfer contained in the non-registration legend set forth in *Exhibit A* hereto. Prior to the expiration of the period of 40 days beginning on and including the later of (x) the day on which the offering of the Debentures of the Twenty-Eighth Series commences and (y) the original issue date of the Debentures of the Twenty-Eighth Series, transfers of beneficial interests in a Regulation S Global Debenture will be subject to the restrictions on transfer contained in the Regulation S legend set forth in Exhibit A hereto.

16. In connection with any transfer of Debentures of the Twenty-Eighth Series, the Trustee and the Company shall be under no duty to inquire into, may conclusively presume the correctness of, and shall be fully protected in relying upon the certificates of transfer (in substantially the form set forth in Exhibit A hereto for use in connection with the transfer of beneficial interests between a Rule 144A Global Debenture and a Regulation S Global Debenture, or otherwise) received from the Holders and any transferees of any Debentures of the Twenty-Eighth Series regarding the validity, legality and due authorization of any such transfer, the eligibility of the transferee to receive such Debentures and any other facts and circumstances related to such transfer. Transfers of beneficial interests between a Rule 144A Global Debenture and a Regulation S Global Debenture, and other transfers relating to beneficial interests in the Global Debentures, shall be reflected by endorsements of the Trustee, as custodian for DTC, on the schedules attached to such Rule 144A Global Debenture and Regulation S Global Debenture. Neither the Company nor the Trustee shall have any liability for any acts or omissions of any depositary, for any depositary records of beneficial interests, for any transactions between the depositary, any participant member of the depositary and/or beneficial owner of any interest in any Debentures of the Twenty-Eighth Series, for any transfers of beneficial interests in the Debentures of the Twenty-Eighth Series, or in respect of any transfers effected by the depositary or by any participant member of the depositary or any beneficial owner of any interest in any Debentures of the Twenty-Eighth Series held through any such participant member of the depositary.

17. No service charge shall be made for the registration of transfer or exchange of the Debentures of the Twenty-Eighth Series; *provided, however*, that the Company may require payment of a sum sufficient to cover any tax or other governmental charge that may be imposed in connection with such exchange or transfer.

18. The Debentures of the Twenty-Eighth Series shall have such other terms and provisions as are provided in the form thereof set forth in *Exhibit A* hereto.

19. The undersigned has read all of the covenants and conditions contained in the Indenture relating to the issuance of the Debentures of the Twenty-Eighth Series and the definitions in the Indenture relating thereto and in respect of which this certificate is made.

20. The statements contained in this certificate are based upon the familiarity of the undersigned with the Indenture, the documents accompanying this certificate, and upon discussions by the undersigned with officers and employees of the Company familiar with the matters set forth herein.

21. In the opinion of the undersigned, he or she has made such examination or investigation as is necessary to enable him or her to express an informed opinion as to whether or not such covenants and conditions have been complied with.

22. In the opinion of the undersigned, such conditions and covenants and conditions precedent, if any (including any covenants compliance with which constitutes a condition precedent), to the authentication and delivery of the Debentures of the Twenty-Eighth Series requested in the accompanying Company Order No. 29 have been complied with.

IN WITNESS WHEREOF, I have executed this Officer's Certificate on behalf of the Company this 27th day of August, 2015 in New York, New York.

/s/ Aldo Portales

Aldo Portales

Assistant Treasurer

Exhibit A

[depository legend]

[Unless this certificate is presented by an authorized representative of The Depository Trust Company, a limited purpose company organized under the New York Banking Law ("DTC"), to NextEra Energy Capital Holdings, Inc. or its agent for registration of transfer, exchange, or payment, and any certificate issued is registered in the name of Cede & Co. or in such other name as is requested by an authorized representative of DTC (and any payment is made to Cede & Co. or to such other entity as is requested by an authorized representative of DTC), ANY TRANSFER, PLEDGE, OR OTHER USE HEREOF FOR VALUE OR OTHERWISE BY OR TO ANY PERSON IS WRONGFUL inasmuch as the registered owner hereof, Cede & Co., has an interest herein.]

[non-registration legend]

[Neither this Debenture nor any beneficial interest herein has been registered under the Securities Act of 1933, as amended (the "Securities Act"). Each holder hereof, and each owner of a beneficial interest herein, by purchasing this Debenture, agrees for the benefit of NextEra Energy Capital Holdings, Inc. (the "Company") that this Debenture may not be resold, pledged or otherwise transferred prior to the date which is one year (or six months if all applicable conditions to such resale under Rule 144 under the Securities Act (or any successor provision thereof) are satisfied) after the later of the original issuance date thereof, the issuance date of any subsequent issuance of additional Debentures of the same series and the last date on which the Company or any affiliate thereof was the owner of this Debenture or the expiration of such shorter period as may be prescribed by such Rule 144 (or such successor provision) permitting resales of this Debenture without any conditions (the "Resale Restriction Termination Date") other than (A)(1) to the Company, (2) in a transaction entitled to an exemption from registration provided by Rule 144 under the Securities Act, (3) so long as this Debenture is eligible for resale pursuant to Rule 144A under the Securities Act ("Rule 144A"), to a person whom the seller reasonably believes is a Qualified Institutional Buyer within the meaning of Rule 144A purchasing for its own account or for the account of a Qualified Institutional Buyer to whom notice is given that the resale, pledge or other transfer is being made in reliance on Rule 144A under the Securities Act (as indicated by the box checked by the transferor on the certificate of transfer attached to this Debenture), (4) in an offshore transaction in accordance with Rule 903 or 904 of Regulation S under the Securities Act (as indicated by the box checked by the transferor on the certificate of transfer attached to this Debenture, (5) in accordance with another applicable exemption from the registration requirements of the Securities Act (and based upon an opinion of counsel acceptable to the Company), or (6) pursuant to an effective registration statement under the Securities Act and (B) in each case in accordance with any applicable securities laws of any state of the United States. The foregoing restrictions on resale will not apply subsequent to the Resale Restriction Termination Date. The holder hereof, by purchasing this Debenture, represents and agrees for

the benefit of the Company that it is (i) a Qualified Institutional Buyer within the meaning of Rule 144A under the Securities Act or (ii) a non-U.S. person outside the United States within the meaning of, or an account satisfying the requirements of, paragraph (k)(2) of Rule 902 under Regulation S under the Securities Act. The holder of this Debenture acknowledges that the Company reserves the right prior to any offer, sale or other transfer (1) pursuant to clause (A)(2) prior to the Resale Restriction Termination Date to require the delivery of an opinion of counsel, certifications or other information satisfactory to the Company and (2) in each of the foregoing cases, to require that a certificate as to compliance with certain conditions to transfer is completed and delivered by the transferor to the Company.]

[Regulation S legend]

[The Debentures covered hereby have not been registered under the U.S. Securities Act of 1933, as amended (the "Securities Act"), and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons (I) as part of their distribution at any time or (II) otherwise until 40 days after the later of the date of the commencement of the offering of the Securities and the date of original issuance of the Debentures, except in either case in accordance with Regulation S or Rule 144A under the Securities Act or any other available exemption from registration under the Securities Act. Terms used above have the meanings given to them by Regulation S.]

[FORM OF FACE OF DEBENTURE]

NEXTERA ENERGY CAPITAL HOLDINGS, INC.

2.80% DEBENTURES, SERIES DUE AUGUST 27, 2020

NextEra Energy Capital Holdings, Inc., a corporation duly organized and existing under the laws of the State of Florida (herein referred to as the "**Company**", which term includes any successor Person under the Indenture (as defined below)), for value received, hereby promises to pay to

, or registered assigns, the principal amount specified on Schedule I hereto on August 27, 2020 (the "**Stated Maturity Date**"). The Company further promises to pay interest on the principal sum of this 2.80% Debenture, Series due August 27, 2020 (this "**Security**") to the registered Holder hereof at the rate of 2.80% per annum, in like coin or currency, semi-annually on February 27 and August 27 of each year (each an "**Interest Payment Date**") until the principal hereof is paid or duly provided for, such interest payments to commence on February 27, 2016. Each interest payment shall include interest accrued from the most-recently preceding Interest

Payment Date to which interest has either been paid or duly provided for (*except* that (i) the interest payment which is due on February 27, 2016 shall include interest that has accrued from August 27, 2015, and (ii) if this Security is authenticated during the period that (A) follows any particular Regular Record Date (as defined below) but (B) precedes the next occurring Interest Payment Date, then the registered Holder hereof shall not be entitled to receive any interest payment with respect to this Security on such next occurring Interest Payment Date). No interest will accrue on the Securities of this series with respect to the day on which the Securities of this series mature. In the event that any Interest Payment Date is not a Business Day, then payment of interest payable on such date will be made on the next succeeding day which is a Business Day (and without any interest or other payment in respect of such delay) with the same force and effect as if made on the Interest Payment Date. The interest so payable, and punctually paid or duly provided for, on any Interest Payment Date will, as provided in the Indenture referred to on the reverse of this Security (the "**Indenture**"), be payable to the Person in whose name this Security (or one or more Predecessor Securities) is registered at the close of business on the "**Regular Record Date**" for such interest installment which shall be the close of business on the Business Day immediately preceding such Interest Payment Date so long as the Securities of this series are held by a securities depository in book-entry form; *provided* that if the Securities of this series are not held by a securities depository in book-entry form, the Regular Record Date will be the close of business on the fifteenth (15th) calendar day next preceding such Interest Payment Date; and *provided further* that interest payable on the Stated Maturity Date or any Redemption Date will be paid to the same Person to whom the associated principal is to be paid. Any such interest not punctually paid or duly provided for will forthwith cease to be payable to the Person who is the Holder of this Security on such Regular Record Date and may be paid to the Person in whose name this Security (or one or more Predecessor Securities) is registered at the close of business on a Special Record Date to be fixed by the Trustee for the payment of such Defaulted Interest, notice of which shall be given to Holders of Securities of this series not less than ten (10) days prior to such Special Record Date, or may be paid at any time in any other lawful manner not inconsistent with the requirements of any securities exchange on which the Securities of this series may be listed, and upon such notice as may be required by such exchange, all as more fully provided in the Indenture.

Payment of the principal of (and premium, if any) and interest on this Security will be made at the office or agency of the Company maintained for that purpose in New York City, the State of New York in such coin or currency of the United States of America as at the time of payment is legal tender for payment of public and private debts; *provided, however*, that, at the option of the Company, interest on this Security may be paid by check mailed to the address of the Person entitled thereto, as such address shall appear on the Security Register or by a wire transfer to an account designated by the Person entitled thereto. The amount of interest payable on this Security will be computed on the basis of a 360-day year consisting of twelve 30-day months (and for any period shorter than a full semi-annual period, on the basis of the actual number of days elapsed during such period using 30-day calendar months).

Reference is hereby made to the further provisions of this Security set forth on the reverse of this Security, which further provisions shall for all purposes have the same effect as if set forth at this place. (All capitalized terms used in this Security which are not defined herein, including the reverse of this Security, but which are defined in the Indenture or in the Officer's Certificate shall have the meanings specified in the Indenture or in the Officer's Certificate.)

Unless the certificate of authentication hereon has been executed by the Trustee referred to on the reverse of this Security by manual signature, this Security shall not be entitled to any benefit under the Indenture or be valid or obligatory for any purpose.

IN WITNESS WHEREOF, the Company has caused this instrument to be duly executed in New York, New York.

NEXTERA ENERGY CAPITAL HOLDINGS, INC.

[FORM OF CERTIFICATE OF AUTHENTICATION]

CERTIFICATE OF AUTHENTICATION

Dated:

This is one of the Securities of the series designated therein referred to in the within-mentioned Indenture.

THE BANK OF NEW YORK MELLON, as Trustee

By: _____
Authorized Signatory

[FORM OF REVERSE OF DEBENTURE]

This Security is one of a duly authorized issue of securities of the Company (herein called the "**Securities**"), issued and to be issued in one or more series under an Indenture (For Unsecured Debt Securities), dated as of June 1, 1999 (herein, together with any amendments thereto, called the "**Indenture**", which term shall have the meaning assigned to it in such instrument), between the Company and The Bank of New York Mellon, as Trustee (herein called the "**Trustee**", which term includes any successor trustee under the Indenture), and reference is hereby made to the Indenture, including the Board Resolutions and Officer's Certificate filed with the Trustee on August 27, 2015 creating the series designated on the face hereof (herein called the "**Officer's Certificate**"), for a statement of the respective rights, limitations of rights, duties and immunities thereunder of the Company, the Trustee and the Holders of the Securities of this series and of the terms upon which the Securities of this series are, and are to be, authenticated and delivered. This Security is one of the series designated on the face hereof.

Securities of this series shall be redeemable at the option of the Company in whole at any time, or in part from time to time, prior to the Stated Maturity Date, upon notice (the "**Redemption Notice**") mailed at least thirty (30) days but not more than sixty (60) days prior to the date fixed for redemption (the "**Redemption Date**"), at the applicable price (the "**Redemption Price**") described below. If the Company redeems all or any part of the Securities of this series, the Redemption Price will equal the sum of (i) 100% of the principal amount thereof, *plus* (ii) accrued and unpaid interest thereon, if any, to but excluding the Redemption Date, *plus* (iii) a premium, if any (the "**Make-Whole Premium**"). In no event will the Redemption Price be less than 100% of the principal amount of the Securities of this series being redeemed plus accrued and unpaid interest thereon, if any, to but excluding the Redemption Date.

The amount of the Make-Whole Premium with respect to any Security of this series (or portion thereof) to be redeemed will be equal to the excess, if any, of:

(1) the sum of the present values, calculated as of the Redemption Date, of:

  (a) each interest payment that, but for such redemption, would have been payable on the Security of this series (or portion thereof) being redeemed on each Interest Payment Date occurring after the Redemption Date (excluding any interest accruing (i) from and including the last Interest Payment Date preceding the Redemption Date as of which all then-accrued interest was paid (ii) to but excluding the Redemption Date); and

  (b) the principal amount that, but for such redemption, would have been payable on the Stated Maturity Date of the Security of this series (or portion thereof) being redeemed; over

(2) the principal amount of the Security of this series (or portion thereof) being redeemed.

The present values of interest and principal payments referred to in clause (1) above will be determined in accordance with generally accepted principles of financial analysis. Such present values will be calculated by discounting the amount of each payment of interest or principal from the date that each such payment would have been payable, but for the redemption, to the Redemption Date at a discount rate equal to the Treasury Yield (as defined below) plus 20 basis points.

The Company will appoint an independent investment banking institution of national standing to calculate the Make-Whole Premium when and as applicable; *provided* that Morgan Stanley & Co. International plc will make such calculation if (1) the Company fails to make such appointment at least thirty (30) days prior to the Redemption Date, or (2) the institution so appointed is unwilling or unable to make such calculation. If Morgan Stanley & Co. International plc is to make such calculation but is not willing or able to do so, then the Company will appoint an independent investment banking institution of national standing to make such calculation (in any such case, an "**Independent Investment Banker**").

For purposes of determining the Make-Whole Premium, "**Treasury Yield** " means a rate of interest per annum equal to the weekly average yield to maturity of United States Treasury Notes that have a constant maturity that corresponds to the remaining term to the Stated Maturity Date of the Securities of this series to be redeemed, calculated to the nearest 1/12th of a year (the "**Remaining Term**"). The Independent Investment Banker will determine the Treasury Yield as of the third Business Day immediately preceding the applicable Redemption Date.

The Independent Investment Banker will determine the weekly average yields of United States Treasury Notes by reference to the most recent statistical release published by the Federal Reserve Bank of New York and designated "H.15(519) Selected Interest Rates" or any successor release (the "**H.15 Statistical Release**"). If the H.15 Statistical Release sets forth a weekly average yield for the United States Treasury Notes having a constant maturity that is the same as the Remaining Term, then the Treasury Yield will be equal to such weekly average yield. In all other cases, the Independent Investment Banker will calculate the Treasury Yield by interpolation, on a straight-line basis, between the weekly average yields on the United States Treasury Notes that have a constant maturity closest to and greater than the Remaining Term and the United States Treasury Notes that have a constant maturity closest to and less than the Remaining Term (in each case as set forth in the H.15 Statistical Release). The Independent Investment Banker will round any weekly average yields so calculated to the nearest 1/100th of 1%, with any figure of 1/200th of 1% or above being rounded upward. If weekly average yields for United States Treasury Notes are not available in the H.15 Statistical Release or otherwise, then the Independent Investment Banker will select comparable rates and calculate the Treasury Yield by reference to those rates.

If at the time the Redemption Notice is given, the redemption moneys are not on deposit with the Trustee, then the redemption shall be subject to their receipt on or before the Redemption Date and such Redemption Notice shall be of no force or effect unless such moneys are received.

Upon payment of the Redemption Price, on and after the Redemption Date interest will cease to accrue on the Securities of this series or portions thereof called for redemption.

The Securities of this series will be absolutely, irrevocably and unconditionally guaranteed as to payment of principal, interest and premium, if any, by NextEra Energy, Inc., as Guarantor (the "**Guarantor**"), pursuant to a Guarantee Agreement, dated as of June 1, 1999, between the Guarantor and The Bank of New York Mellon (as Guarantee Trustee) (the "**Guarantee Agreement**"). The following shall constitute "**Guarantor Events**" with respect to the Securities of this series:

(A) the failure of the Guarantee Agreement to be in full force and effect;

(B) the entry by a court having jurisdiction with respect to the Guarantor of (i) a decree or order for relief in respect of the Guarantor in an involuntary case or proceeding under any applicable Federal or State bankruptcy, insolvency or other similar law or (ii) a decree or order adjudging the Guarantor bankrupt or insolvent, or approving as properly filed a petition by one or more entities other than the Guarantor seeking reorganization, arrangement, adjustment or composition of or in respect of the Guarantor under any applicable Federal or State bankruptcy, insolvency or other similar law, or appointing a custodian, receiver, liquidator, assignee, trustee, sequestrator or other similar official for the Guarantor or for any substantial part of its property, or ordering the winding up or liquidation of its affairs, and any such decree or order for relief or any such other decree or order shall have remained unstayed and in effect for a period of ninety (90) consecutive days; or

(C) the commencement by the Guarantor of a voluntary case or proceeding under any applicable Federal or State bankruptcy, insolvency or other similar law or of any other case or proceeding seeking for the Guarantor to be adjudicated bankrupt or insolvent, or the consent by the Guarantor to the entry of a decree or order for relief in respect of itself in a case or proceeding under any applicable Federal or State bankruptcy, insolvency or other similar law or to the commencement of any bankruptcy or insolvency case or proceeding against the Guarantor, or the filing by the Guarantor of a petition or answer or consent seeking reorganization or relief under any applicable Federal or State bankruptcy, insolvency or other similar law, or the consent by the Guarantor to the filing of such petition or to the appointment of or taking possession by a custodian, receiver, liquidator, assignee, trustee, sequestrator or similar official of the Guarantor or of any substantial part of its property, or the making by the Guarantor of an assignment for the benefit of creditors, or the admission by the Guarantor in writing of its inability to pay its debts generally as they become due, or the authorization of such action by the Board of Directors of the Guarantor.

Notwithstanding anything to the contrary contained in the Securities of this series, the Officer's Certificate dated August 27, 2015 creating the Securities of this series, or the Indenture, the Company shall, if a Guarantor Event shall occur and be continuing, redeem all of the Outstanding Securities within sixty (60) days after the occurrence of such Guarantor Event at a redemption price equal to the principal amount thereof plus accrued and unpaid interest, if any, to but excluding the date of redemption unless, within thirty (30) days after the occurrence of such Guarantor Event, Standard & Poor's Ratings Services (a Standard & Poor's Financial

Services LLC business) and Moody's Investors Service, Inc. (if the Securities of this series are then rated by those rating agencies, or, if the Securities of this series are then rated by only one of those rating agencies, then such rating agency, or, if the Securities of this series are not then rated by either one of those rating agencies but are then rated by one or more other nationally recognized rating agencies, then at least one of those other nationally recognized rating agencies) shall have reaffirmed in writing that, after giving effect to such Guarantor Event, the credit rating on the Securities of this series shall be investment grade (i.e. in one of the four highest categories, without regard to subcategories within such rating categories, of such rating agency).

If a Guarantor Event occurs and the Company is not required to redeem the Securities of this series pursuant to the preceding paragraph, the Company will provide to the Trustee and the Holders of the Securities of this series annual and quarterly reports containing the information that the Company would be required to file with the Securities and Exchange Commission under Section 13 or Section 15(d) of the Securities Exchange Act of 1934 if it were subject to the reporting requirements of those Sections; *provided*, that if the Company is, at that time, subject to the reporting requirements of those Sections, the filing of annual and quarterly reports with the Securities and Exchange Commission pursuant to those Sections will satisfy the foregoing requirement.

The Indenture contains provisions for defeasance at any time of the entire indebtedness of this Security upon compliance with certain conditions set forth in the Indenture, including the Officer's Certificate described above.

If an Event of Default with respect to Securities of this series shall occur and be continuing, the principal of and interest on the Securities of this series may be declared due and payable in the manner and with the effect provided in the Indenture.

The Indenture permits, with certain exceptions as therein provided, the amendment thereof and the modification of the rights and obligations of the Company and the rights of the Holders of the Securities of each series to be affected by such amendment to the Indenture at any time by the Company and the Trustee with the consent of the Holders of a majority in principal amount of the Securities at the time Outstanding of all series to be thus affected. The Indenture also contains provisions permitting the Holders of specified percentages in principal amount of the Securities of each series at the time Outstanding, on behalf of the Holders of all Securities of such series, to waive compliance by the Company with certain provisions of the Indenture and certain past defaults under the Indenture and their consequences. Any such consent or waiver by Holders of the specified percentages in principal amount of the Securities of this series shall be conclusive and binding upon all current and future Holders of this Security and of any Security issued upon the registration of transfer hereof or in exchange herefor or in lieu hereof, whether or not notation of such consent or waiver is made upon this Security.

As provided in and subject to the provisions of the Indenture, the Holder of this Security shall not have the right to institute any proceeding with respect to the Indenture or for the appointment of a receiver or trustee or for any other remedy thereunder, unless such Holder shall have previously given the Trustee written notice of a continuing Event of Default with respect to the Securities of this series, the Holders of a majority in aggregate principal amount of the Securities of all series at the time Outstanding in respect of which an Event of Default shall have

occurred and be continuing shall have made written request to the Trustee to institute proceedings in respect of such Event of Default as Trustee and offered the Trustee reasonable indemnity, and the Trustee shall not have received from the Holders of a majority in aggregate principal amount of Securities of all series at the time Outstanding in respect of which an Event of Default shall have occurred and be continuing a direction inconsistent with such request, and shall have failed to institute any such proceeding, for sixty (60) days after receipt of such notice, request and offer of indemnity. The foregoing shall not apply to any suit instituted by the Holder of this Security for the enforcement of any payment of principal hereof or any premium or interest hereon on or after the respective due dates expressed herein.

Each Holder shall be deemed to understand that the offer and sale of the Securities of this series have not been registered under the Securities Act of 1933, as amended (the "**Securities Act**"), and that the Securities of this series may not be offered or sold by the Holder except as permitted in the following sentence. Each Holder shall be deemed to agree, on its own behalf and on behalf of any accounts for which it is acting as hereinafter stated, that if such Holder offers or sells any Securities of this series, such Holder will do so only (A) to the Company, (B) in a transaction entitled to an exemption from registration provided by Rule 144 under the Securities Act, (C) to a person whom the seller reasonably believes is a "qualified institutional buyer" within the meaning of Rule 144A under the Securities Act ("**Rule 144A**") that purchases for its own account or for the account of a qualified institutional buyer to whom notice is given that the resale, pledge or other transfer is being made in reliance on Rule 144A, (D) in an offshore transaction in accordance with Rule 903 or 904 of Regulation S under the Securities Act, (E) in accordance with another applicable exemption from the registration requirements of the Securities Act, or (F) pursuant to an effective registration statement under the Securities Act, and each Holder is further deemed to agree to provide to any person purchasing any of the Securities of this series from it a notice advising such purchaser that resales of the Securities of this series are restricted as stated herein. Each Holder shall be deemed to understand that, on any proposed resale of any Securities of this series in accordance with the foregoing clause (E) any Holder making any such proposed resale will be required to furnish to the Trustee and Company such certifications, legal opinions and other information as the Trustee and Company may reasonably require to confirm that the proposed sale complies with the foregoing restrictions.

No reference herein to the Indenture and no provision of this Security or of the Indenture shall alter or impair the obligation of the Company, which is absolute and unconditional, to pay the principal of and any premium and interest on this Security at the times, place and rate, and in the coin or currency, herein prescribed.

The Securities of this series are issuable only in registered form without coupons in denominations of $2,000 and integral multiples of $1,000 in excess thereof. As provided in the Indenture and subject to certain limitations therein set forth, Securities of this series are exchangeable for a like aggregate principal amount of Securities of this series and of like tenor and of authorized denominations, as requested by the Holder surrendering the same.

No service charge shall be made for any such registration of transfer or exchange, but the Company may require payment of a sum sufficient to cover any tax or other governmental charge payable in connection therewith.

The Company, the Trustee and any agent of the Company or the Trustee may treat the Person in whose name this Security is registered as the absolute owner hereof for all purposes, whether or not this Security be overdue, and none of the Company, the Trustee or any such agent shall be affected by notice to the contrary.

SCHEDULE I

[144A][REGULATION S] GLOBAL Security

The initial amount of the Securities evidenced by this certificate is $_____.

CHANGES TO PRINCIPAL AMOUNT OF SECURITIES EVIDENCED BY THIS CERTIFICATE

Date	Amount of decrease in principal amount of this Security	Amount of increase in principal amount of this Security	Principal amount of this Security following such decrease or increase	Signature of authorized signatory of Trustee or Security Registrar

[FORM OF CERTIFICATE OF TRANSFER IN GLOBAL SECURITY]
NEXTERA ENERGY CAPITAL HOLDINGS, INC.
2.80% Debentures, Series due August 27, 2020

Exhibit 12(a)

NEXTERA ENERGY, INC. AND SUBSIDIARIES
COMPUTATION OF RATIO OF EARNINGS TO FIXED CHARGES AND
RATIO OF EARNINGS TO COMBINED FIXED CHARGES AND PREFERRED STOCK DIVIDENDS[a]

	Nine Months Ended September 30, 2015
	(millions of dollars)
Earnings, as defined:	
Net income	$ 2,252
Income taxes	981
Fixed charges included in the determination of net income, as below	967
Amortization of capitalized interest	30
Distributed income of equity method investees	58
Less: Equity in earnings of equity method investees	87
Total earnings, as defined	$ 4,201
Fixed charges, as defined:	
Interest expense	$ 912
Rental interest factor	41
Allowance for borrowed funds used during construction	14
Fixed charges included in the determination of net income	967
Capitalized interest	74
Total fixed charges, as defined	$ 1,041
Ratio of earnings to fixed charges and ratio of earnings to combined fixed charges and preferred stock dividends[a]	4.04

(a) NextEra Energy, Inc. has no preference equity securities outstanding; therefore, the ratio of earnings to fixed charges is the same as the ratio of earnings to combined fixed charges and preferred stock dividends.

Exhibit 12(b)

FLORIDA POWER & LIGHT COMPANY AND SUBSIDIARIES
COMPUTATION OF RATIO OF EARNINGS TO FIXED CHARGES AND
RATIO OF EARNINGS TO COMBINED FIXED CHARGES AND PREFERRED STOCK DIVIDENDS[a]

	Nine Months Ended September 30, 2015
	(millions of dollars)
Earnings, as defined:	
Net income	$ 1,283.3
Income taxes	728.5
Fixed charges, as below	360.4
Total earnings, as defined	$ 2,372.2
Fixed charges, as defined:	
Interest expense	$ 337.4
Rental interest factor	9.0
Allowance for borrowed funds used during construction	14.0
Total fixed charges, as defined	$ 360.4
Ratio of earnings to fixed charges and ratio of earnings to combined fixed charges and preferred stock dividends[a]	6.58

(a) Florida Power & Light Company has no preference equity securities outstanding; therefore, the ratio of earnings to fixed charges is the same as the ratio of earnings to combined fixed charges and preferred stock dividends.

Exhibit 31(a)

Rule 13a-14(a)/15d-14(a) Certification

I, James L. Robo, certify that:

1. I have reviewed this Form 10-Q for the quarterly period ended September 30, 2015 of NextEra Energy, Inc. (the registrant);

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

WCEC	FPL's West County Energy Center

NEE, FPL, NEECH and NEER each has subsidiaries and affiliates with names that may include NextEra Energy, FPL, NextEra Energy Resources, NextEra, FPL Group, FPL Group Capital, FPL Energy, FPLE, NEP and similar references. For convenience and simplicity, in this report the terms NEE, FPL, NEECH and NEER are sometimes used as abbreviated references to specific subsidiaries, affiliates or groups of subsidiaries or affiliates. The precise meaning depends on the context.

TABLE OF CONTENTS

FORWARD-LOOKING STATEMENTS

This report includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Any statements that express, or involve discussions as to, expectations, beliefs, plans, objectives, assumptions, strategies, future events or performance (often, but not always, through the use of words or phrases such as may result, are expected to, will continue, is anticipated, aim, believe, will, could, should, would, estimated, may, plan, potential, future, projection, goals, target, outlook, predict and intend or words of similar meaning) are not statements of historical facts and may be forward looking. Forward-looking statements involve estimates, assumptions and uncertainties. Accordingly, any such statements are qualified in their entirety by reference to, and are accompanied by, important factors included in Part I, Item 1A. Risk Factors (in addition to any assumptions and other factors referred to specifically in connection with such forward-looking statements) that could have a significant impact on NEE's and/or FPL's operations and financial results, and could cause NEE's and/or FPL's actual results to differ materially from those contained or implied in forward-looking statements made by or on behalf of NEE and/or FPL in this combined Form 10-K, in presentations, on their respective websites, in response to questions or otherwise.

Any forward-looking statement speaks only as of the date on which such statement is made, and NEE and FPL undertake no obligation to update any forward-looking statement to reflect events or circumstances, including, but not limited to, unanticipated events, after the date on which such statement is made, unless otherwise required by law. New factors emerge from time to time and it is not possible for management to predict all of such factors, nor can it assess the impact of each such factor on the business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained or implied in any forward-looking statement.

PART I

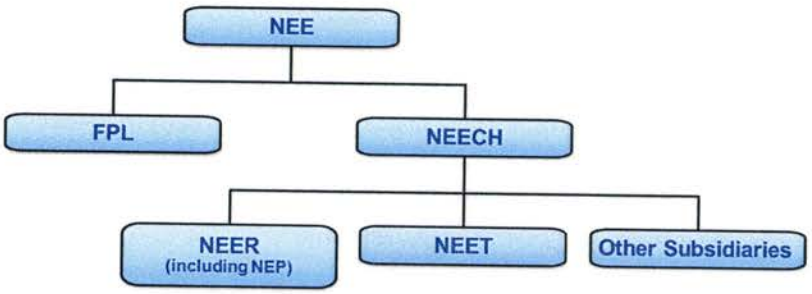
Item 1. Business

OVERVIEW

NextEra Energy, Inc. (hereafter, NEE), with approximately 46,400 MW of generating capacity, is one of the largest electric power companies in North America with electric generation facilities located in 27 states in the U.S. and 4 provinces in Canada, and employing approximately 14,300 people as of December 31, 2015. NEE provides retail and wholesale electric services to more than 5.3 million customers and owns generation, transmission and distribution facilities to support its services, as well as has investments in gas infrastructure assets. It also provides risk management services related to power and gas consumption related to its own generation assets and for a limited number of wholesale customers in selected markets. NEE, through NEER, is the largest generator in North America of renewable energy from the wind and sun based on MWh produced. In addition, NEE owns and operates approximately 15% of the installed base of U.S. wind power production capacity and owns and/or operates approximately 9% of the installed base of U.S. utility-scale solar power production capacity as of December 31, 2015. NEE also owns and operates one of the largest fleets of nuclear power stations in the U.S., with eight reactors at five sites located in four states, representing approximately 6% of U.S. nuclear power electric generating capacity as of December 31, 2015. NEE's business strategy has emphasized the development, acquisition and operation of renewable, nuclear and natural gas-fired generation facilities in response to long-term federal policy trends supportive of zero and low air emissions sources of power. NEE's generation fleet has significantly lower rates of emissions of CO_2, SO_2 and NOx than the average rates of the U.S. electric power industry with approximately 97% of its 2015 generation, measured by MWh produced, coming from renewable, nuclear and natural gas-fired facilities.

NEE was incorporated in 1984 under the laws of Florida and conducts its operations principally through two wholly owned subsidiaries, Florida Power & Light Company (hereafter, FPL) and NextEra Energy Resources, LLC (hereafter, NEER). NextEra Energy Capital Holdings, Inc. (hereafter, NEECH), another wholly owned subsidiary of NEE, owns and provides funding for NEER's and NEE's operating subsidiaries, other than FPL and its subsidiaries. NEE's two principal businesses also constitute NEE's reportable segments for financial reporting purposes. During 2014, NEE formed NEP to acquire, manage and own contracted clean energy projects with stable, long-term cash flows. See II. NEER for further discussion of NEP. NEE's and NEER's generating capacity discussed in this combined Form 10-K includes approximately 480 MW associated with noncontrolling interests related to NEP as of December 31, 2015. See Item 2. Properties.

NEE Organizational Chart



FPL is a rate-regulated electric utility engaged primarily in the generation, transmission, distribution and sale of electric energy in Florida. FPL is the largest electric utility in the state of Florida and one of the largest electric utilities in the U.S. based on retail MWh sales. FPL is vertically integrated, with approximately 25,300 MW of generating capacity as of December 31, 2015. FPL's investments in its infrastructure since 2001, such as modernizing less-efficient fossil generation plants to produce more energy with less fuel and fewer air emissions, increasing generating capacity at its existing nuclear units and upgrading its transmission and distribution systems to deliver service reliability that is the best of the Florida investor-owned utilities, have provided significant benefits to FPL's customers, all while providing residential and commercial bills that were among the lowest in Florida and below the national average based on a rate per kWh as of July 2015 (the latest date for which this data is available). With approximately 95% of its power generation coming from natural gas, nuclear and solar, FPL is also one of the cleanest electric utilities in the nation. Based on 2015 information, FPL's emissions rates for CO_2, SO_2 and NOx were 35%, 97% and 71% lower, respectively, than the average rates of the U.S. electric power industry.

NEER, with approximately 21,100 MW of generating capacity at December 31, 2015, is one of the largest wholesale generators of electric power in the U.S., with 20,120 MW of generating capacity across 25 states, and has 920 MW of generating capacity in 4

Canadian provinces. NEER produces the majority of its electricity from clean and renewable sources, including wind and solar. NEER also provides full energy and capacity requirements services, engages in power and gas marketing and trading activities and invests in natural gas, natural gas liquids and oil production and pipeline infrastructure assets.

NEECH's other business activities are primarily conducted through NEET and FPL FiberNet. Through its subsidiaries, NEET owns and operates rate-regulated transmission facilities, the largest of which is owned by Lone Star, a rate-regulated transmission service provider in Texas. FPL FiberNet delivers wholesale and enterprise telecommunications services in Florida, Texas and certain areas of the South Central U.S.

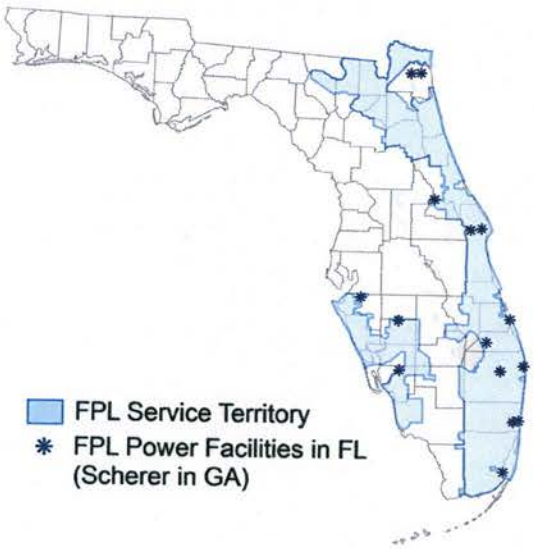
NEE seeks to create value in its two principal businesses by meeting its customers' needs more economically and more reliably than its competitors, as described in more detail in the following sections. NEE's strategy has resulted in profitable growth over sustained periods at both FPL and NEER. Management seeks to grow each business in a manner consistent with the varying opportunities available to it; however, management believes that the diversification and balance represented by FPL and NEER is a valuable characteristic of the enterprise and recognizes that each business contributes to NEE's credit profile in different ways. FPL and NEER, as well as other NEE subsidiaries, share common support functions with the objective of lowering costs and creating efficiencies for their businesses. During 2013, NEE and its subsidiaries commenced an enterprise-wide initiative focused mainly on improving productivity and reducing O&M expenses (cost savings initiative), and management expects to continue those efforts going forward.

In 2014, NEE and Hawaiian Electric Industries, Inc. (HEI) announced a proposed merger pursuant to which Hawaiian Electric Company, Inc., HEI's wholly owned electric utility subsidiary, will become a wholly owned subsidiary of NEE. The merger agreement contains certain termination rights for both NEE and HEI, including the right of either party to terminate the merger agreement if the merger has not been completed by June 3, 2016. Completion of the merger and the actual closing date remain subject to the satisfaction of certain conditions, including Hawaii Public Utilities Commission approval. See Note 1 - Proposed Merger for further discussion.

NEE'S OPERATING SUBSIDIARIES

I. FPL

FPL was incorporated under the laws of Florida in 1925 and is a wholly owned subsidiary of NEE. FPL is a rate-regulated electric utility and is the largest electric utility in the state of Florida and one of the largest electric utilities in the U.S. based on retail MWh sales. FPL, with 25,254 MW of generating capacity at December 31, 2015, supplies electric service throughout most of the east and lower west coasts of Florida, serving more than 9.5 million people through approximately 4.8 million customer accounts. At December 31, 2015, FPL's service territory and plant locations are as follows (see Item 2. Properties - Generation Facilities):



FRANCHISE AGREEMENTS AND COMPETITION

FPL's service to its retail customers is provided primarily under franchise agreements negotiated with municipalities or counties. Alternatively, municipalities and counties may form their own utility companies to provide service to their residents. In a very few cases, an FPL franchise agreement provides the respective municipality the right to buy the electrical assets serving local residents at the end of the agreement. However, during the term of a franchise agreement, which is typically 30 years, the municipality or county agrees not to form its own utility, and FPL has the right to offer electric service to residents. FPL currently holds 179 franchise agreements with various municipalities and counties in Florida with varying expiration dates through 2046. None of these franchise agreements expire in 2016, two expire in 2017 and 177 expire during the period 2018 through 2046. These franchise agreements cover approximately 88% of FPL's retail customer base in Florida. Negotiations are ongoing to renew the franchise agreements that expire in 2017. FPL considers its franchises to be adequate for the conduct of its business. FPL also provides service to 12 other municipalities and to 21 unincorporated areas within its service area without franchise agreements pursuant to the general obligation to serve as a public utility. FPL relies upon Florida law for access to public rights of way.

Because any customer may elect to provide his/her own electric services, FPL effectively must compete for an individual customer's business. As a practical matter, few customers provide their own service at the present time since FPL's cost of service is substantially lower than the cost of self-generation for the vast majority of customers. Changing technology, economic conditions and other factors could alter the favorable relative cost position that FPL currently enjoys; however, FPL seeks as a matter of strategy to ensure that it delivers superior value, in the form of high reliability, low bills and excellent customer service.

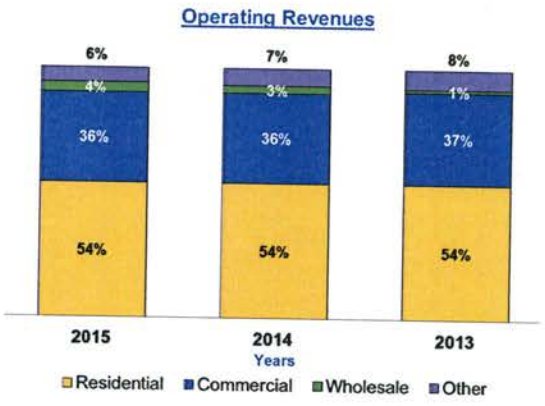
In addition to self-generation by residential, commercial and industrial customers, FPL also faces competition from other suppliers of electrical energy to wholesale customers and from alternative energy sources. In each of 2015, 2014 and 2013, operating revenues from wholesale and industrial customers combined represented approximately 5%, 5% and 3%, respectively, of FPL's total operating revenues.

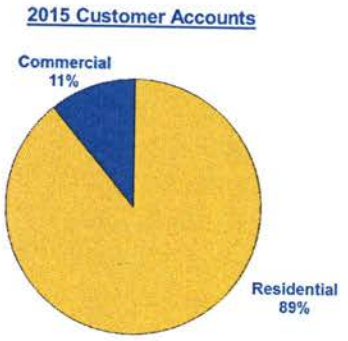
The FPSC promotes cost competitiveness in the building of new steam and solar generating capacity of 75 MW or greater by requiring investor-owned electric utilities, including FPL, to issue an RFP except when the FPSC determines that an exception from the RFP process is in the public interest. The RFP process allows independent power producers and others to bid to supply the new generating capacity. If a bidder has the most cost-effective alternative, meets other criteria such as financial viability and demonstrates adequate expertise and experience in building and/or operating generating capacity of the type proposed, the investor-owned electric utility would seek to negotiate a purchased power agreement with the selected bidder and request that the FPSC approve the terms of the purchased power agreement and, if appropriate, provide the required authorization for the construction of the bidder's generating capacity.

New nuclear power plants are exempt from the RFP requirement. See FPL Sources of Generation - Nuclear Operations below.

CUSTOMERS AND REVENUE

FPL's primary source of operating revenues is from its retail customer base; it also serves a limited number of wholesale customers within Florida. FPL revenues from wholesale sales increased in both 2015 and 2014, primarily due to an increase in contracted load served under existing and new wholesale contracts. The percentage of FPL's operating revenues and customer accounts by customer class were as follows:



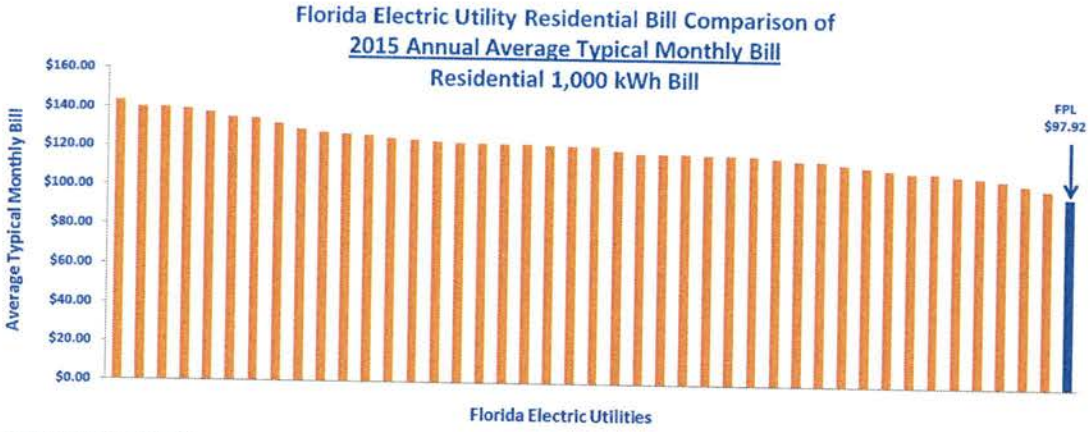


Industrial, Wholesale and Other collectively less than 1%

For both retail and wholesale customers, the prices (or rates) that FPL may charge are approved by regulatory bodies, by the FPSC in the case of retail customers, and by the FERC in the case of wholesale customers. In general, under U.S. and Florida law, regulated rates are intended to cover the cost of providing service, including a reasonable rate of return on invested capital. Since

the regulatory bodies have authority to determine the relevant cost of providing service and the appropriate rate of return on capital employed, there can be no guarantee that FPL will be able to earn any particular rate of return or recover all of its costs through regulated rates. See FPL Regulation below.

FPL seeks to maintain attractive rates for its customers. Since rates are largely cost-based, maintaining low rates requires a strategy focused on developing and maintaining a low-cost position, including the implementation of ideas generated from the cost savings initiative discussed above. A common benchmark used in the electric power industry for comparing rates across companies is the price of 1,000 kWh of consumption per month for a residential customer. FPL's 2015 average bill for 1,000 kWh of monthly residential usage was the lowest among reporting electric utilities within Florida as indicated below:



POWER DELIVERY

FPL provides service to its customers through an integrated transmission and distribution system that links its generation facilities to its customers. FPL also maintains interconnection facilities with neighboring utilities and non-utility generators inside its service territory, enabling it to buy and sell wholesale electricity and to enhance the reliability of its own network and support the reliability of neighboring networks. FPL's transmission system carries high voltage electricity from its generation facilities to substations where the electricity is stepped down to lower voltage levels and is sent through the distribution system to its customers.

A key element of FPL's strategy is to provide highly reliable service to its customers. The transmission and distribution system is susceptible to interruptions or outages from a wide variety of sources including weather, animal and vegetation interference, traffic accidents, equipment failure and many others, and FPL seeks to reduce or eliminate outages where economically practical and to restore service rapidly when outages occur. A common industry benchmark for transmission and distribution system reliability is the system average interruption duration index (SAIDI), which represents the number of minutes the average customer is without power during a time period. For the five years 2010 - 2014, FPL's average annual SAIDI was the best of the investor-owned utilities in Florida. FPL has accelerated its existing storm hardening and reliability program, to continue strengthening its infrastructure against tropical storms and hurricanes. Also, as part of its commitment to building a smarter, more reliable and efficient electric infrastructure, FPL has installed approximately 4.9 million smart meters and more than 35,000 other intelligent devices throughout the electric grid.

FPL SYSTEM CAPABILITY AND LOAD

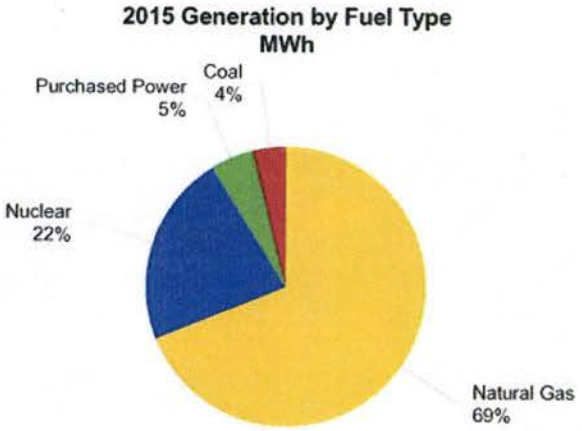
At December 31, 2015, FPL's resources for serving load consisted of 26,073 MW, of which 25,254 MW were from FPL-owned facilities (see Item 2. Properties - Generation Facilities) and approximately 819 MW were available through purchased power agreements (see FPL Sources of Generation - Purchased Power below). FPL customer usage and operating revenues are typically higher during the summer months, largely due to the prevalent use of air conditioning in FPL's service territory. Occasionally, unusually cold temperatures during the winter months result in significant increases in electricity usage for short periods of time. The highest peak load FPL has served to date was 24,346 MW, which occurred on January 11, 2010. FPL had adequate resources available at the time of this peak to meet customer demand.

FPL's projected reserve margin for the summer of 2016 is approximately 22%. This reserve margin is expected to be achieved through the combination of available output from FPL's active generation units, purchased power agreements and the capability to reduce peak demand through the implementation of demand side management programs, including load management which was estimated at December 31, 2015 to be capable of reducing demand by approximately 1,700 MW, and energy efficiency and conservation programs. See FPL Sources of Generation - Fossil Operations and - Nuclear Operations below regarding generation projects currently under construction.

FPL SOURCES OF GENERATION

FPL relies upon a mix of fuel sources for its generation facilities, along with purchased power, in order to maintain the flexibility to achieve a more economical fuel mix by responding to market and industry developments. See descriptions of fossil, nuclear and solar operations below and a listing of FPL's generation facilities in Item 2. Properties - Generation Facilities.

FPL's 2015 fuel mix based on MWh produced, including purchased power, was as follows:



Oil and Solar are collectively less than 1%

Fossil Operations (Natural Gas, Coal and Oil)

At December 31, 2015, FPL owned and operated 70 units that used fossil fuels, primarily natural gas, and had a joint ownership interest in 3 coal units. Combined, the fossil fleet provided 21,766 MW of generating capacity for FPL. These fossil units are out of service from time to time for routine maintenance or on standby during periods of reduced electricity demand. A common industry benchmark for fossil unit reliability is the equivalent forced outage rate (EFOR), which represents a generation unit's inability to provide electricity when required to operate. For the five years 2010 - 2014, FPL's average annual EFOR was in the top decile among its electric utility fossil fleet peers in the U.S.

FPL's natural gas plants require natural gas transportation, supply and storage. FPL has firm transportation contracts in place for existing pipeline capacity with five different transportation suppliers. These agreements provide for an aggregate maximum delivery quantity of 2,069,000 MMBtu/day with expiration dates ranging from 2016 to 2036 that together are expected to satisfy substantially all of the currently anticipated needs for natural gas transportation through the end of 2016. To the extent desirable, FPL also purchases interruptible natural gas transportation service from these natural gas transportation suppliers based on pipeline availability. FPL has several short- and medium-term natural gas supply contracts to provide a portion of FPL's anticipated needs for natural gas. The remainder of FPL's natural gas requirements is purchased in the spot market. FPL has an agreement for the storage of natural gas that expires in 2017. See Note 14 - Contracts.

In 2013, the FPSC approved FPL's 25-year natural gas transportation agreements with each of Sabal Trail and Florida Southeast Connection for a quantity of 400,000 MMBtu/day beginning on May 1, 2017 and increasing to 600,000 MMBtu/day on May 1, 2020. These new agreements, when combined with FPL's existing agreements, are expected to satisfy substantially all of FPL's natural gas transportation needs through at least 2020. FPL's firm commitments under the new agreements are contingent upon the occurrence of certain events, including the FERC's approval of applications by each of Sabal Trail and Florida Southeast Connection for authorization of their pipeline projects and of the application by Transcontinental Gas Pipe Line Company, LLC (Transco) for authorization of a pipeline expansion project and the lease of pipeline capacity to Sabal Trail, as well as completion of construction of the pipeline system to be built by Sabal Trail and Florida Southeast Connection. In February 2016, the FERC issued an order granting the requested authorizations, subject to certain conditions. Sabal Trail, Florida Southeast Connection and Transco are

evaluating the conditions, and one or more of them are currently expected to request a rehearing. See NEER - Generation and Other Operations - Natural Gas Pipelines below and Note 14 - Contracts.

In March 2015, after receiving FPSC approval, a wholly owned subsidiary of FPL partnered with a third party to develop up to 38 natural gas production wells in the Woodford Shale region in southeastern Oklahoma and in return began receiving its ownership share of the natural gas produced from these wells. In July 2015, the FPSC approved a set of guidelines under which FPL could participate in additional natural gas production projects through investments of up to $500 million annually with an escalating annual production cap as a percent of FPL's total natural gas burn, with an emphasis on investing in proven and probable reserves. These investments in long-term natural gas supplies will provide FPL with a physical hedge on the price of natural gas to fuel its fossil generation fleet. FPL will recover the costs associated with the investments in these natural gas production wells through the fuel clause. In 2015, the State of Florida Office of Public Counsel (Office of Public Counsel) and Florida Industrial Power Users Group have each filed notices of appeal to the Florida Supreme Court challenging the FPSC's approval of FPL's initial investment in the Woodford Shale natural gas production wells and challenging the FPSC's approval of the guidelines, which appeals are pending.

St. Johns River Power Park (SJRPP) Units Nos. 1 and 2, coal-fired units in which FPL has a joint ownership interest, have firm coal supply and transportation contracts for all of their fuel and transportation needs through 2017. Scherer Unit No. 4, the other coal-fired unit in which FPL has a joint ownership interest, has firm coal supply contracts for a portion of its fuel needs through 2016, and transportation contracts for all of its needs through 2019 and a portion of its needs through 2028. Any of the remaining fuel requirements for these coal-fired units, as well as for a 250 MW coal-fired generation facility located in Jacksonville, Florida that was purchased in September 2015 (Cedar Bay), will be obtained in the spot market. See Note 14 - Contracts and Note 1 - Rate Regulation. With respect to its oil plants, FPL obtains its fuel requirements in the spot market.

Capital Initiatives

New Generation Facility Proposed - In January 2016, the FPSC approved FPL's proposal to build a new approximately 1,600 MW natural gas-fired combined-cycle unit in Okeechobee County, Florida, with a planned in-service date of mid-2019. This new unit is also subject to approval by the Siting Board (comprised of the governor and cabinet) under the Florida Electrical Power Plant Siting Act, which decision is expected by the end of 2016.

Modernization Project - FPL is in the process of modernizing its Port Everglades power plant to a high-efficiency natural gas-fired unit that is expected to provide approximately 1,240 MW of capacity and be placed in service by April 2016.

Peaker Upgrade Project - FPL is in the process of replacing 44 of its 48 gas turbines at its Lauderdale, Port Everglades and Fort Myers facilities, totaling approximately 1,700 MW of capacity, with 7 high-efficiency, low-emission turbines at its Lauderdale and Fort Myers facilities, totaling approximately 1,610 MW of capacity, by December 2016. In addition, FPL is upgrading 2 additional simple-cycle combustion turbines at its Fort Myers facility, which are expected to add an additional 50 MW of capacity by December 2016.

Nuclear Operations

At December 31, 2015, FPL owned, or had undivided interests in, and operated the following four nuclear units with a total net generating capacity of 3,453 MW.

Facility	MW	Operating License Expiration Dates
St. Lucie Unit No. 1	981	2036
St. Lucie Unit No. 2	840	2043
Turkey Point Unit No. 3	811	2032
Turkey Point Unit No. 4	821	2033

FPL has several contracts for the supply of uranium and the conversion, enrichment and fabrication of nuclear fuel with expiration dates ranging from late February 2016 through 2031. See Note 14 - Commitments. NRC regulations require FPL to submit a plan for decontamination and decommissioning five years before the projected end of plant operation. FPL's current plans, under the applicable operating licenses, provide for prompt dismantlement of Turkey Point Units Nos. 3 and 4 with decommissioning activities commencing in 2032 and 2033, respectively. Current plans provide for St. Lucie Unit No. 1 to be mothballed beginning in 2036 with decommissioning activities to be integrated with the prompt dismantlement of St. Lucie Unit No. 2 commencing in 2043.

Projects to Add Additional Capacity. FPL's need petition for two additional nuclear units at its Turkey Point site was approved by the FPSC in 2008 and FPL is moving forward with activities necessary to obtain all permits, licenses and approvals necessary for construction and operation of the units. The two units are expected to add a total of approximately 2,200 MW of capacity. The timing of commercial operation will be subject to various regulatory approvals from the FPSC and other agencies which will be required throughout the licensing and development processes and the nuclear units are expected to be placed in-service in 2027 and 2028. The NRC's decision regarding issuance of the licenses for the two units is expected in mid-2017.

Nuclear Unit Scheduled Refueling Outages. FPL's nuclear units are periodically removed from service to accommodate normal refueling and maintenance outages, including inspections, repairs and certain other modifications. Scheduled nuclear refueling outages typically require the unit to be removed from service for variable lengths of time. The following table summarizes each unit's next scheduled refueling outage:

Facility	Next Scheduled Refueling Outage
St. Lucie Unit No. 1	September 2016
St. Lucie Unit No. 2	March 2017
Turkey Point Unit No. 3	March 2017
Turkey Point Unit No. 4	March 2016

Spent Nuclear Fuel. FPL's nuclear facilities use both on-site storage pools and dry storage casks to store spent nuclear fuel generated by these facilities, which are expected to provide sufficient storage of spent nuclear fuel at these facilities through license expiration. In 2014, the NRC issued its Continued Storage of Spent Nuclear Fuel Rule which supports the NRC's determination that licensees can safely store spent nuclear fuel at nuclear power plants indefinitely. Various parties have filed petitions with the U.S. Court of Appeals for the District of Columbia Circuit (D.C. Circuit) challenging the rule and requesting that the NRC suspend final reactor licensing decisions in all open NRC licensing proceedings (including the licensing proceeding for two additional nuclear units at FPL's Turkey Point site) alleging that the rule is deficient. Briefs were filed in November 2015 and oral argument has been scheduled for late February 2016.

Nuclear Waste Policy Act of 1982, as amended (Nuclear Waste Policy Act) - Under the Nuclear Waste Policy Act, the DOE is responsible for the development of a repository for the disposal of spent nuclear fuel and high-level radioactive waste. As required by the Nuclear Waste Policy Act, FPL is a party to contracts with the DOE to provide for disposal of spent nuclear fuel from its nuclear units.

The DOE was required to construct permanent disposal facilities and take title to and provide transportation and disposal for spent nuclear fuel by January 31, 1998 for a specified fee based on current generation from nuclear power plants which fee was subsequently set to zero effective May 2014. The DOE did not meet its statutory obligation for disposal of spent nuclear fuel under the Nuclear Waste Policy Act. In 2009, FPL and certain of FPL's nuclear plant joint owners entered into a settlement agreement (spent fuel settlement agreement) with the U.S. government agreeing to dismiss with prejudice lawsuits filed against the U.S. government seeking damages caused by the DOE's failure to dispose of spent nuclear fuel from FPL's nuclear plants. The spent fuel settlement agreement permits FPL to make annual filings to recover certain spent fuel storage costs incurred by FPL which are reimbursable by the U.S. government on an annual basis.

Yucca Mountain - In 2010, the DOE filed a motion with the NRC to withdraw its license application for a nuclear waste repository at Yucca Mountain, which request was denied. In 2011, the NRC issued an order suspending the Yucca Mountain licensing proceeding, which order was challenged, and in 2013, the D.C. Circuit issued an order requiring the NRC to proceed with the legally mandated licensing process for a nuclear waste repository at Yucca Mountain. The NRC has completed the technical review of the application and is planning to supplement the DOE's environmental impact statement. Certain requirements must be met before the NRC can issue a license for the repository.

Solar Operations

Solar generation can be provided primarily through two conventions: utility-owned and customer-owned or leased. In utility-owned solar generation, the energy generated goes directly to the electric grid, whereas customer-owned or leased solar generation generally goes directly to the location it is serving with any excess over that local need being fed back to the electric grid. There are two principal solar technologies used for utility-scale projects: PV and thermal. At December 31, 2015, FPL owned and operated two solar PV generation facilities, which provided a total of 35 MW of generating capacity, and a 75 MW solar thermal hybrid facility. FPL supports the advancement of solar generation primarily for its fuel diversity and emissions reduction benefits, and plans to continue to support, study and pursue solar generation that is beneficial for FPL's customers. FPL is in the process of building three solar PV projects that are expected to provide approximately 74 MW each and be placed into service by the end of 2016.

Purchased Power

In addition to owning generation facilities, FPL also purchases power and capacity from non-utility generators and other utilities to meet customer demand through long-term purchased power agreements. As of December 31, 2015, FPL's long-term purchased power agreements provided for the purchase of approximately 819 MW of power with expiration dates ranging from 2021 through 2034. See Note 14 - Contracts. On occasion, FPL may procure short-term power and capacity for both economic and reliability purposes. In September 2015, FPL assumed ownership of Cedar Bay and terminated FPL's long-term purchased power agreement for substantially all of the facility's capacity and energy. See Note 1 - Rate Regulation.

FPL ENERGY MARKETING AND TRADING

FPL's Energy Marketing & Trading division (EMT) buys and sells wholesale energy commodities, such as natural gas, oil and electricity. EMT procures natural gas and oil for FPL's use in power generation and sells excess natural gas, oil and electricity. EMT also uses derivative instruments (primarily swaps, options and forwards) to manage the commodity price risk inherent in the purchase and sale of fuel and electricity. Substantially all of the results of EMT's activities are passed through to customers in the fuel or capacity clauses. See FPL Regulation - FPL Rate Regulation below, Management's Discussion - Energy Marketing and Trading and Market Risk Sensitivity and Note 3.

FPL REGULATION

FPL's operations are subject to regulation by a number of federal, state and other organizations, including, but not limited to, the following:

- the FPSC, which has jurisdiction over retail rates, service territory, issuances of securities, planning, siting and construction of facilities, among other things;
- the FERC, which oversees the acquisition and disposition of generation, transmission and other facilities, transmission of electricity and natural gas in interstate commerce, proposals to build interstate natural gas pipelines and storage facilities, and wholesale purchases and sales of electric energy, among other things;
- the NERC, which, through its regional entities, establishes and enforces mandatory reliability standards, subject to approval by the FERC, to ensure the reliability of the U.S. electric transmission and generation system and to prevent major system blackouts;
- the NRC, which has jurisdiction over the operation of nuclear power plants through the issuance of operating licenses, rules, regulations and orders; and
- the EPA, which has the responsibility to maintain and enforce national standards under a variety of environmental laws. The EPA also works with industries and all levels of government, including federal and state governments, in a wide variety of voluntary pollution prevention programs and energy conservation efforts.

FPL Rate Regulation

The FPSC sets rates at a level that is intended to allow FPL the opportunity to collect from retail customers total revenues (revenue requirements) equal to FPL's cost of providing service, including a reasonable rate of return on invested capital. To accomplish this, the FPSC uses various ratemaking mechanisms, including, among other things, base rates and cost recovery clauses.

Base Rates. In general, the basic costs of providing electric service, other than fuel and certain other costs, are recovered through base rates, which are designed to recover the costs of constructing, operating and maintaining the utility system. These basic costs include O&M expenses, depreciation and taxes, as well as a return on FPL's investment in assets used and useful in providing electric service (rate base). At the time base rates are established, the allowed rate of return on rate base approximates the FPSC's determination of FPL's estimated weighted-average cost of capital, which includes its costs for outstanding debt and an allowed ROE. The FPSC monitors FPL's actual regulatory ROE through a surveillance report that is filed monthly by FPL with the FPSC. The FPSC does not provide assurance that any regulatory ROE will be achieved. Base rates are determined in rate proceedings or through negotiated settlements of those proceedings. Proceedings can occur at the initiative of FPL or upon action by the FPSC. Base rates remain in effect until new base rates are approved by the FPSC.

In January 2013, the FPSC issued a final order approving a stipulation and settlement between FPL and several intervenors in FPL's base rate proceeding (2012 rate agreement). Key elements of the 2012 rate agreement, which is effective from January 2013 through December 2016, include, among other things, the following:

- New retail base rates and charges were established in January 2013 resulting in an increase in retail base revenues of $350 million on an annualized basis.
- FPL's allowed regulatory ROE is 10.50%, with a range of plus or minus 100 basis points. If FPL's earned regulatory ROE falls below 9.50%, FPL may seek retail base rate relief. If the earned regulatory ROE rises above 11.50%, any party to the 2012 rate agreement other than FPL may seek a review of FPL's retail base rates.
- Retail base rates will be increased by the annualized base revenue requirements for FPL's three modernization projects (Cape Canaveral, Riviera Beach and Port Everglades) as each of the modernized power plants becomes operational. (Cape Canaveral and Riviera Beach became operational in April 2013 and April 2014, respectively, and Port Everglades is expected to be operational by April 2016.)
- Cost recovery of WCEC Unit No. 3, which was placed in service in May 2011, will continue to occur through the capacity clause.
- Subject to certain conditions, FPL may amortize, over the term of the 2012 rate agreement, a depreciation reserve surplus remaining at the end of 2012 under a previous rate agreement (approximately $224 million) and may amortize a portion of FPL's fossil dismantlement reserve up to a maximum of $176 million (collectively, the reserve), provided that in any year of the 2012 rate agreement, FPL must amortize at least enough reserve to maintain a 9.50% earned regulatory ROE but may not amortize any reserve that would result in an earned regulatory ROE in excess of 11.50%. See below regarding a subsequent reduction in the reserve amount.

- Future storm restoration costs would be recoverable on an interim basis beginning 60 days from the filing of a cost recovery petition, but capped at an amount that could produce a surcharge of no more than $4 for every 1,000 kWh of usage on residential bills during the first 12 months of cost recovery. Any additional costs would be eligible for recovery in subsequent years. If storm restoration costs exceed $800 million in any given calendar year, FPL may request an increase to the $4 surcharge to recover the amount above $800 million.
- An incentive mechanism whereby customers will receive 100% of certain gains, including, but not limited to, gains from the purchase and sale of electricity and natural gas (including transportation and storage), up to a specified threshold; gains exceeding that specified threshold will be shared by FPL and its customers (incentive mechanism).

In August 2015, the FPSC approved a stipulation and settlement between the Office of Public Counsel and FPL regarding issues relating to the ratemaking treatment for FPL's purchase of Cedar Bay. As part of this settlement, the amount of the reserve was reduced by $30 million to $370 million, unless FPL needs the entire $400 million reserve to maintain a minimum regulatory ROE of 9.50%. In October 2015, the Florida Industrial Power Users Group filed a notice of appeal challenging the FPSC's approval of this settlement, which is pending before the Florida Supreme Court.

In January 2016, FPL filed a formal notification with the FPSC indicating its intent to initiate a base rate proceeding, consisting of a four-year rate plan that would begin in January 2017 following the expiration of the 2012 rate agreement at the end of 2016. The notification stated that, based on preliminary estimates, FPL expects to request an increase to base annual revenue requirements of (i) approximately $860 million effective January 2017, (ii) approximately $265 million effective January 2018, and (iii) approximately $200 million effective when the proposed natural gas-fired combined-cycle unit in Okeechobee County, Florida becomes operational, which is expected to occur in mid-2019 (see FPL Sources of Generation - Fossil Operations - Capital Initiatives above). Under the proposed rate plan, FPL commits that if its requested adjustments to base annual revenue requirements are approved, it will not request further adjustments for 2020. In addition, FPL expects to propose an allowed regulatory ROE midpoint of 11.50%, which includes a 50 basis point performance adder. FPL expects to file its formal request to initiate a base rate proceeding in March 2016.

Cost Recovery Clauses. Cost recovery clauses, which are designed to permit full recovery of certain costs and provide a return on certain assets allowed to be recovered through the various clauses, include substantially all fuel, purchased power and interchange expense, certain construction-related costs and conservation and certain environmental-related costs. Cost recovery clause costs are recovered through levelized monthly charges per kWh or kW, depending on the customer's rate class. These cost recovery clause charges are calculated at least annually based on estimated costs and estimated customer usage for the following year, plus or minus true-up adjustments to reflect the estimated over or under recovery of costs for the current and prior periods. An adjustment to the levelized charges may be approved during the course of a year to reflect revised estimates.

Fuel costs and energy charges under the purchased power agreements are recovered from customers through the fuel clause, the most significant of the cost recovery clauses in terms of operating revenues. FPL uses a risk management fuel procurement program which has been approved by the FPSC. The FPSC reviews the program activities and results for prudence annually as part of its review of fuel costs. The program is intended to manage fuel price volatility by locking in fuel prices for a portion of FPL's fuel requirements. See FPL Energy Marketing and Trading above, Note 1 - Rate Regulation and Note 3. Costs associated with FPL's investments in natural gas production wells are also recovered through the fuel clause. See FPL Sources of Generation - Fossil Operations above.

Capacity payments to non-utility generators and other utilities, the cost of WCEC Unit No. 3 (reported as retail base revenues) and a portion of the acquisition cost of Cedar Bay, among other things, are recovered from customers through the capacity clause. See Note 1 - Rate Regulation. In accordance with the FPSC's nuclear cost recovery rule, FPL also recovers pre-construction costs and carrying charges (equal to a pretax AFUDC rate) on construction costs for new nuclear capacity through the capacity clause. As property related to the new nuclear capacity goes into service, construction costs and a return on investment are recovered through base rate increases effective beginning the following January. See FPL Sources of Generation - Nuclear Operations above.

Costs associated with implementing energy conservation programs are recovered from customers through the energy conservation cost recovery clause. Certain costs of complying with federal, state and local environmental regulations enacted after April 1993 and costs associated with FPL's three operating solar facilities are recovered through the environmental cost recovery clause (environmental clause).

The FPSC has the authority to disallow recovery of costs that it considers excessive or imprudently incurred. These costs may include, among others, fuel and O&M expenses, the cost of replacing power lost when fossil and nuclear units are unavailable, storm restoration costs and costs associated with the construction or acquisition of new facilities.

FERC

The Federal Power Act grants the FERC exclusive ratemaking jurisdiction over wholesale sales of electricity and the transmission of electricity and natural gas in interstate commerce. Pursuant to the Federal Power Act, electric utilities must maintain tariffs and rate schedules on file with the FERC which govern the rates, terms and conditions for the provision of FERC-jurisdictional wholesale power and transmission services. The Federal Power Act also gives the FERC authority to certify and oversee a national electric reliability organization with authority to establish and independently enforce mandatory reliability standards applicable to all users, owners and operators of the bulk-power system. See NERC below. Electric utilities are subject to accounting, record-keeping and

reporting requirements administered by the FERC. The FERC also places certain limitations on transactions between electric utilities and their affiliates.

NERC

The NERC has been certified by the FERC as the national electric reliability organization. The NERC's mandate is to ensure the reliability and security of the North American bulk-power system through the establishment and enforcement of reliability standards approved by FERC. The NERC's regional entities also enforce reliability standards approved by the FERC. FPL is subject to these reliability standards and incurs costs to ensure compliance with continually heightened requirements, and can incur significant penalties for failing to comply with them.

FPL Environmental Regulation

FPL is subject to environmental laws and regulations and is affected by some of the emerging issues described in the NEE Environmental Matters section below. FPL expects to seek recovery through the environmental clause for compliance costs associated with any new environmental laws and regulations.

FPL EMPLOYEES

FPL had approximately 8,800 employees at December 31, 2015. Approximately 34% of the employees are represented by the International Brotherhood of Electrical Workers (IBEW) under a collective bargaining agreement with FPL that expires October 31, 2017.

II. NEER

NEER was formed in 1998 to aggregate NEE's competitive energy businesses. It is a limited liability company organized under the laws of Delaware and is a wholly owned subsidiary of NEECH. Through its subsidiaries, NEER currently owns, develops, constructs, manages and operates electric generation facilities in wholesale energy markets primarily in the U.S., as well as in Canada and Spain. See Note 15. NEER is one of the largest wholesale generators of electric power in the U.S., with 21,140 MW of generating capacity across 25 states, 4 Canadian provinces and 1 Spanish province as of December 31, 2015. NEER produces the majority of its electricity from clean and renewable sources as described more fully below. NEER is the largest generator in North America of electric power from wind and utility-scale solar energy projects based on MWh produced.

NEER also engages in energy-related commodity marketing and trading activities, including entering into financial and physical contracts, to hedge the production from its generation assets that is not sold under long-term power supply agreements. These contracts primarily include power and gas commodities and their related products, as well as providing full energy and capacity requirements services primarily to distribution utilities in certain markets and offering customized power and gas and related risk management services to wholesale customers. In addition, NEER participates in natural gas, natural gas liquids and oil production through non-operating ownership interests, and in pipeline infrastructure development, construction, management and operations, through either wholly owned subsidiaries or noncontrolling or joint venture interests, hereafter referred to as the gas infrastructure business. NEER also hedges the expected output from its gas infrastructure production assets to protect against price movements. During the fourth quarter of 2015, the natural gas pipeline projects that were previously reported in Corporate and Other were moved to the NEER segment reflecting the overall scale of the natural gas pipeline investments and management of these projects within NEER's gas infrastructure business. See Note 15.

As discussed in the Overview above, during 2014, NEP was formed to acquire, manage and own contracted clean energy projects with stable, long-term cash flows through a limited partner interest in NEP OpCo. Through an indirect wholly owned subsidiary, NEE owns 101,440,000 common units of NEP OpCo representing a noncontrolling interest in NEP's operating projects of approximately 76.8% as of December 31, 2015. NEE owns a controlling general partner interest in NEP and consolidates NEP for financial reporting purposes. See Note 1 - NextEra Energy Partners, LP. As of December 31, 2015, NEP, through the combination of NEER's contribution of energy projects to NEP OpCo in connection with NEP's IPO in July 2014 and the acquisition of additional energy projects from NEER in 2015, owns a portfolio of 19 wind and solar projects with generating capacity totaling approximately 2,210 MW and long-term contracted natural gas pipeline assets as discussed below. In addition, NEP OpCo has a right of first offer for certain of NEER's assets (ROFO assets) if NEER should seek to sell the assets. The ROFO assets remaining as of December 31, 2015, include contracted wind and solar projects, some of which are under construction, with a combined capacity of approximately 1,076 MW. Included in the ROFO assets are three solar projects that, upon completion of construction, are expected to have a total generating capacity of 277 MW. In 2015, NEP OpCo issued 2 million NEP OpCo Class B Units to NEER in exchange for an approximately 50% ownership interest in the three solar projects. NEER, as holder of the Class B Units, will retain 100% of the economic interests if, and until, NEER offers to sell the economic interests to NEP and NEP accepts such offer. In October 2015, NEP completed the acquisition of the membership interests in NET Holdings Management, LLC (Texas pipeline business), a developer, owner and operator of a portfolio of seven intrastate long-term contracted natural gas pipeline assets located in Texas (Texas pipelines). See Generation and Other Operations - Contracted, Merchant and Other Operations - Other Operations below.

MARKETS AND COMPETITION

Electricity markets in the U.S. and Canada are regional and diverse in character. All are extensively regulated, and competition in these markets is shaped and constrained by regulation. The nature of the products offered varies based on the specifics of regulation in each region. Generally, in addition to the natural constraints on pricing freedom presented by competition, NEER may also face specific constraints in the form of price caps, or maximum allowed prices, for certain products. NEER's ability to sell the output of its generation facilities may also be constrained by available transmission capacity, which can vary from time to time and can have a significant impact on pricing.

The degree and nature of competition that NEER faces is different in wholesale markets and in retail markets. During 2015, approximately 92% of NEER's revenue was derived from wholesale electricity markets.

Wholesale power generation is a capital-intensive, commodity-driven business with numerous industry participants. NEER primarily competes on the basis of price, but believes the green attributes of NEER's generation assets, its creditworthiness and its ability to offer and manage reliable customized risk solutions to wholesale customers are competitive advantages. Wholesale power generation is a regional business that is highly fragmented relative to many other commodity industries and diverse in terms of industry structure. As such, there is a wide variation in terms of the capabilities, resources, nature and identity of the companies NEER competes with depending on the market. In wholesale markets, customers' needs are met through a variety of means, including long-term bilateral contracts, standardized bilateral products such as full requirements service and customized supply and risk management services.

In general, U.S. electricity markets encompass three classes of services: energy, capacity and ancillary services. Energy services relate to the physical delivery of power; capacity services relate to the availability of MW capacity of a power generation asset; and ancillary services are other services related to power generation assets, such as load regulation and spinning and non-spinning reserves. The exact nature of these classes of services is defined in part by regional tariffs. Not all regions have a capacity services class, and the specific definitions of ancillary services vary from region to region.

RTOs and ISOs exist in a number of regions within which NEER operates to coordinate generation and transmission across wide geographic areas and to run markets. NEER also has operations that fall within the Western Electricity Coordinating Council reliability region that are not under the jurisdiction of an established RTO or ISO. Although each RTO and ISO may have differing objectives and structures, some benefits of these entities include regional planning, managing transmission congestion, developing larger wholesale markets for energy and capacity, maintaining reliability and facilitating competition among wholesale electricity providers. NEER has operations that fall within the following RTOs and ISOs:

- Alberta Electric System Operator
- California Independent System Operator
- ERCOT
- Independent Electricity System Operator (in Ontario)
- ISO New England (ISO-NE)
- Midcontinent Independent System Operator, Inc.
- New York Independent System Operator
- PJM
- Southwest Power Pool

NEER competes in different regions to different degrees, but in general it seeks to enter into long-term bilateral contracts for the full output of its generation facilities, and, as of December 31, 2015, approximately 66% of NEER's generating capacity is fully committed under long-term contracts. Where long-term contracts are not in effect, NEER sells the output of its facilities into daily spot markets. In such cases, NEER will frequently enter into shorter term bilateral contracts, typically of less than three years duration, to hedge the price risk associated with selling into a daily spot market. Such bilateral contracts, which may be hedges either for physical delivery or for financial (pricing) offset, may only protect a portion of the revenue that NEER expects to derive from the associated generation facility and may not qualify for hedge accounting under GAAP. Contracts that serve the economic purpose of hedging some portion of the expected revenue of a generation facility but are not recorded as hedges under GAAP are referred to as "non-qualifying hedges" for adjusted earnings purposes. See Management's Discussion - Overview - Adjusted Earnings.

Certain facilities within the NEER wind and solar generation portfolio produce renewable energy credits (RECs) and other environmental attributes which are typically sold along with the energy from the plants under long-term contracts, or may be sold separately for the wind and solar generation not sold under long-term contracts. The purchasing party is solely entitled to the reporting rights and ownership of the environmental attributes.

While the majority of NEER's revenue is derived from the output of its generation facilities, NEER is also an active competitor in several regions in the wholesale full requirements business and in providing structured and customized power and fuel products and services to a variety of customers. In the full requirements service, typically, the supplier agrees to meet the customer's needs for a full range of products for every hour of the day, at a fixed price, for a predetermined period of time, thereby assuming the risk

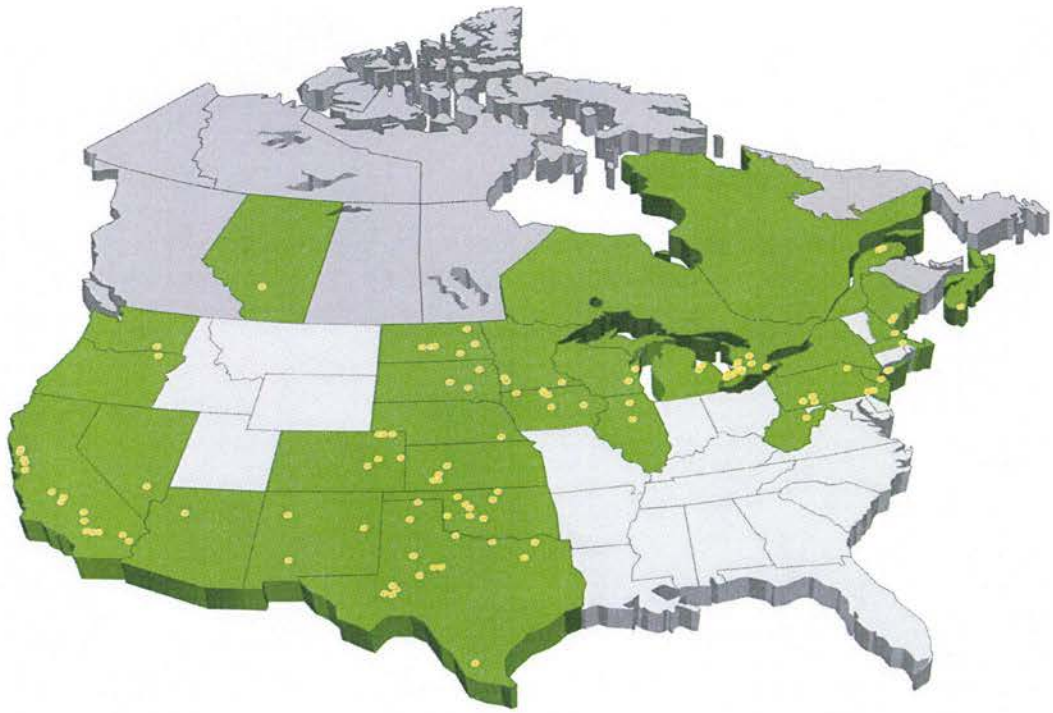
of fluctuations in the customer's volume requirements.

Expanded competition in a frequently changing regulatory environment presents both opportunities and risks for NEER. Opportunities exist for the selective acquisition of generation assets and for the construction and operation of efficient facilities that can sell power in competitive markets. NEER seeks to reduce its market risk by having a diversified portfolio by fuel type and location, as well as by contracting for the future sale of a significant amount of the electricity output of its facilities.

GENERATION AND OTHER OPERATIONS

NEER sells products associated with its own generation facilities (energy, capacity, RECs and ancillary services) in competitive markets in regions where those facilities are located. Customer transactions may be supplied from NEER generation facilities or from purchases in the wholesale markets, or from a combination thereof.

At December 31, 2015, the locations of NEER's generation facilities in North America are as follows:



- NEER generation facilities in operation
- U.S. states and Canadian provinces with projects in operation

At December 31, 2015, NEER managed or participated in the management of essentially all of its generation projects in which it has an ownership interest.

NEER categorizes its portfolio in a number of different ways for different business purposes. See a listing of NEER's generation facilities in Item 2. Properties - Generation Facilities. The following presentation details NEER operations and fuel/technology mix, which NEE commonly uses in communicating information about its business:

Contracted, Merchant and Other Operations

NEER's portfolio of generation operations based on the presence/absence of long-term power sales agreements and other operations is described below.

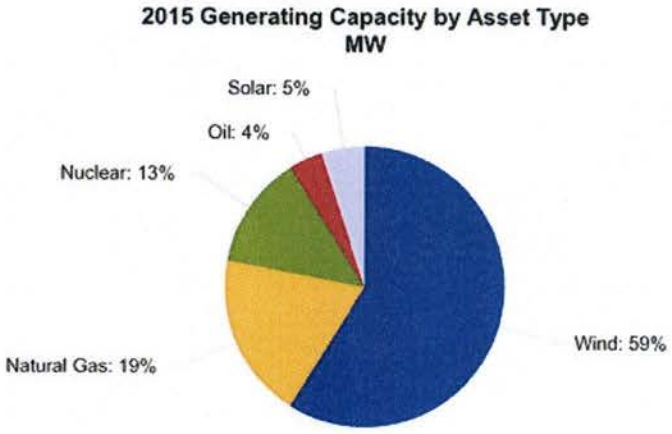
Contracted Generation Assets. Contracted generation assets are generation facilities with long-term power sales agreements for substantially all of their capacity and/or energy output and certain wind assets where long-term power sales agreements are expected to be executed. At December 31, 2015, NEER had 14,317 MW of contracted generation assets, substantially all of which have long-term power sales agreements, representing approximately 66% of its total operating generation portfolio. Essentially all of the output of these contracted generation assets were under power sales agreements, with a weighted-average remaining contract life of approximately 15 years, and the nuclear facilities have firm nuclear fuel-related contracts with expiration dates ranging from late February 2016 through 2032. See Note 14 - Contracts. Of the total capacity of contracted generation assets, 10,571 MW is wind generation, 1,621 MW is nuclear generation and 1,121 MW is solar generation. The remaining 1,004 MW use fuels such as natural gas and oil.

Merchant Generation Assets. Merchant generation assets are generation facilities that do not have long-term power sales agreements to sell their capacity and/or energy output, or, in the case of certain wind assets, are not expected to have long-term power sales agreements, and therefore require active marketing and hedging. At December 31, 2015, NEER's portfolio of merchant generation assets consists of 6,823 MW of owned wind, nuclear, natural gas, oil and solar generation facilities, including 846 MW of peak generation facilities. Approximately 59% (based on net MW capability) of the natural gas-fueled merchant generation assets have natural gas transportation agreements to provide for fluctuating natural gas requirements. See NEER Fuel/Technology Mix - Natural Gas Facilities below and Note 14 - Contracts. Derivative instruments (primarily swaps, options, futures and forwards) are generally used to lock in pricing and manage the commodity price risk inherent in power sales and fuel purchases. Managing market risk through these instruments introduces other types of risk, primarily counterparty, credit and operational risks.

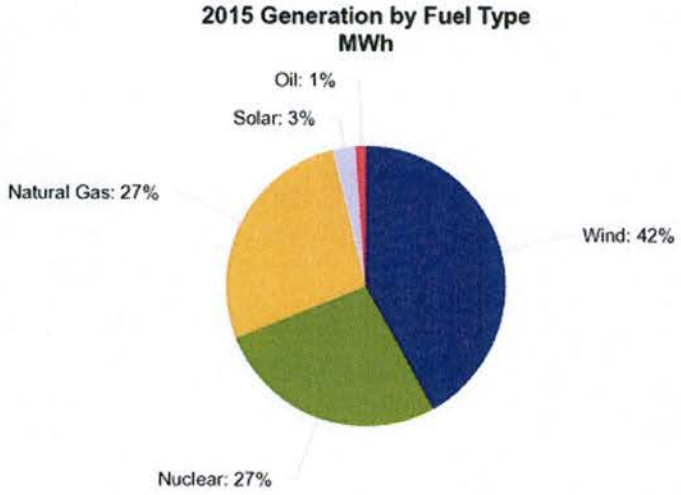
Other Operations. NEER's operations also include the gas infrastructure business and the customer supply and proprietary power and gas trading businesses. The gas infrastructure business includes non-operating ownership interests in investments located in oil and gas shale formations primarily in the Midwest and South regions of the U.S. NEER continues to pursue in a selective way opportunities in the upstream (exploration and production) area when it believes the return potential is attractive and to gain insight into the natural gas industry. The gas infrastructure business also has investments in pipeline infrastructure assets located primarily in the South, Southeast and Northeast regions of the U.S. During 2015, NEER, through NEP, acquired the Texas pipeline business, including pipelines with a total existing capacity of approximately 4 Bcf per day, of which 3 Bcf per day is contracted with firm ship-or-pay contracts that have a weighted-average remaining contract life of approximately 16 years as of December 31, 2015. In addition, subsidiaries of NEER are pursuing regulatory approvals to move forward with three natural gas pipeline projects either directly or through joint venture investments. See Natural Gas Pipelines for a description of the natural gas pipelines. See NEER Customer Supply and Proprietary Power and Gas Trading for a description of the customer supply and propriety power and gas trading businesses.

NEER Fuel/Technology Mix

NEER's power generation is produced using a variety of fuel sources as further described below.



NEER's power generation in terms of MWh produced for the year ended December 31, 2015 by fuel type is as follows:



Wind Facilities

At December 31, 2015, NEER had ownership interests in wind generation facilities with a total net generating capacity of 12,414 MW. NEER operates all of these wind facilities, which are located in 19 states in the U.S. and 4 provinces in Canada. During 2015, NEER added approximately 1,031 MW of new U.S. wind generation and 176 MW of new Canadian wind generation, and sold, decommissioned or dismantled wind facilities with generating capacity totaling 220 MW. NEER expects to add new contracted wind generation of approximately 1,400 MW in 2016. See Policy Incentives for Renewable Energy Projects below for additional discussion of NEER's expectations regarding wind development and construction.

Solar Facilities

At December 31, 2015, NEER had ownership interests in PV and solar thermal facilities with a total net generating capacity of 1,026 MW, including approximately 285 MW added in 2015. NEER operates the majority of these solar facilities, which are located in 4 states in the U.S. and 1 province in Canada. NEER expects to add new contracted solar generation of approximately 1,100 MW in 2016. In addition, NEER and its affiliates own solar thermal facilities with generating capacity of 99.8 MW in Spain (Spain solar projects). See Note 14 - Spain Solar Projects for developments that impact the Spain solar projects.

Natural Gas Facilities

At December 31, 2015, NEER had ownership interests in and operated natural gas facilities with a total net generating capacity of 4,083 MW. Approximately 1,004 MW of this net generating capacity is from contracted natural gas assets located throughout the Northeastern U.S. In November 2015, a subsidiary of NEER entered into an agreement to sell its ownership interest in its merchant natural gas generation facilities located in Texas, which have a total generating capacity of 2,884 MW at December 31, 2015. The transaction is expected to close in the first quarter of 2016, pending the receipt of necessary regulatory approvals and satisfaction of other customary closing conditions.

Nuclear Facilities

At December 31, 2015, NEER owned, or had undivided interests in, and operated the following four nuclear units with a total net generating capacity of 2,721 MW.

Facility	Location	MW	Portfolio Category	Operating License Expiration Dates
Seabrook	New Hampshire	1,100	Merchant	2030 (a)
Duane Arnold	Iowa	431	Contracted(b)	2034
Point Beach Unit No. 1	Wisconsin	595	Contracted(c)	2030
Point Beach Unit No. 2	Wisconsin	595	Contracted(c)	2033

(a) In 2010, NEER filed an application with the NRC to renew Seabrook's operating license for an additional 20 years, which license renewal is dependent on NRC regulatory approvals.
(b) NEER sells all of its share of the output of Duane Arnold under a long-term contract expiring in December 2025.
(c) NEER sells all of the output of Point Beach Units Nos. 1 and 2 under long-term contracts through their current operating license expiration dates.

NEER's nuclear facilities have several contracts for the supply of uranium and the conversion, enrichment and fabrication of nuclear fuel with expiration dates ranging from late February 2016 through 2032. See Note 14 - Contracts. NEER is responsible for all nuclear unit operations and the ultimate decommissioning of the nuclear units, the cost of which is shared on a pro-rata basis by the joint owners for the jointly-owned units. NRC regulations require plant owners to submit a plan for decontamination and decommissioning five years before the projected end of plant operation.

Nuclear Unit Scheduled Refueling Outages. NEER's nuclear units are periodically removed from service to accommodate normal refueling and maintenance outages, including inspections, repairs and certain other modifications. Scheduled nuclear refueling outages typically require the unit to be removed from service for variable lengths of time. The following table summarizes each unit's next scheduled refueling outage:

Facility	Next Scheduled Refueling Outage
Seabrook	April 2017
Duane Arnold	October 2016
Point Beach Unit No. 1	March 2016
Point Beach Unit No. 2	March 2017

Spent Nuclear Fuel. NEER's nuclear facilities use both on-site storage pools and dry storage casks to store spent nuclear fuel generated by these facilities, which are expected to provide sufficient storage of spent nuclear fuel at these facilities through license expiration.

As owners and operators of nuclear facilities, certain subsidiaries of NEER are subject to the Nuclear Waste Policy Act and are parties to the spent fuel settlement agreement described in FPL - FPL Sources of Generation - Nuclear Operations.

Oil Facilities

At December 31, 2015, NEER had 796 MW of oil-fired generation facilities located in Maine.

Policy Incentives for Renewable Energy Projects

U.S. federal, state and local governments have established various incentives to support the development of renewable energy projects. These incentives include accelerated tax depreciation, PTCs, ITCs, cash grants, tax abatements and RPS programs. Wind and solar projects qualify for the U.S. federal Modified Accelerated Cost Recovery System depreciation schedule. This schedule allows a taxpayer to recognize the depreciation of tangible property on a five-year basis even though the useful life of such property is generally greater than five years. The PTC currently provides an income tax credit for the production of electricity from utility-scale wind turbines for the first ten years of commercial operation. This incentive was created under the Energy Policy Act of 1992 and has been extended several times. Most recently, in December 2015, the PTC was extended for five years, subject to the phase down schedule in the table below. The Internal Revenue Service (IRS) previously issued guidance related to which projects will qualify for the PTC including, among other things, criteria for the beginning of construction of a project and the continuous program of construction or the continuous efforts to advance the project to completion. The IRS has not updated its guidance for the December 2015 extension. Alternatively, wind project developers can choose to receive a 30% ITC, in lieu of the PTC, subject to the phase down schedule in the table below.

Solar project developers are also eligible to receive a 30% ITC for new solar projects, or can elect to receive an equivalent cash payment from the U.S. Department of Treasury for the value of the 30% ITC (convertible ITC) for qualifying solar projects where construction began before the end of 2011 and the projects are placed in service before 2017. In December 2015, the 30% ITC for new solar projects was extended, subject to the following phase down schedule.

	Year construction of project begins							
	2015	2016	2017	2018	2019	2020	2021	2022
PTC[a]	100%	100%	80%	60%	40%	-	-	-
Wind ITC	30%	30%	24%	18%	12%	-	-	-
Solar ITC[b]	30%	30%	30%	30%	30%	26%	22%	10%

(a) Percentage of the full PTC available for wind projects that begin construction during the applicable year.
(b) ITC is limited to 10% for projects not placed in service before January 1, 2024.

Other countries, including Canada and Spain, provide for incentives like feed-in-tariffs for renewable energy projects. The feed-in-tariffs promote renewable energy investments by offering long-term contracts to renewable energy producers, typically based on the cost of generation of each technology.

Natural Gas Pipelines

At December 31, 2015, NEER had approximately $2.5 billion invested in the following natural gas pipelines:

	Miles of Pipeline	Pipeline Location/Route	NEER's Ownership	Total Capacity (per day)	Actual/Expected In-Service Dates
Operational:					
Texas Pipelines[a]	542	South Texas	72.98%[b]	4.05 Bcf	1950 - 2014
In Development or Under Construction:					
Sabal Trail[c]	515	Southwestern Alabama to Central Florida	33%	0.83 Bcf - 1.075 Bcf	Mid-2017 - Mid-2021
Florida Southeast Connection[c]	126	Central Florida to Martin County, Florida	100%	0.64 Bcf	Mid-2017
Mountain Valley Pipeline[d]	301	Marcellus and Utica shale regions to markets in the Mid-Atlantic and Southeast regions of the U.S.	35%[e]	2.00 Bcf	End of 2018

(a) Represents a portfolio of seven natural gas pipelines; of which a third party owns a 10% interest in a 120 mile pipeline with a daily capacity of approximately 2.3 Bcf. There are planned expansion projects for the three largest pipelines in the portfolio (which represent approximately 90% of total capacity per day of the Texas pipelines) that, if completed, are expected to provide an additional 1.5 Bcf of capacity per day by the end of 2017.
(b) Represents NEER's interest in the Texas pipelines.
(c) Construction of the natural gas pipelines is subject to certain conditions. See FPL - FPL Sources of Generation - Fossil Operations and Note 14 - Commitments and - Contracts.
(d) Construction of the natural gas pipeline is subject to certain conditions, including FERC approval. See Note 14 - Commitments.
(e) Represents expected ownership depending on the ultimate size and scope of the natural gas pipeline project.

NEER CUSTOMER SUPPLY AND PROPRIETARY POWER AND GAS TRADING

NEER's customer supply and proprietary power and gas trading businesses engage in energy-related commodity marketing and trading activities, provide commodities-related products to customers and include the operations of a retail electricity provider. PMI, a subsidiary of NEER, buys and sells wholesale energy commodities, such as electricity, natural gas and oil. PMI sells the output from NEER's plants that is not sold under long-term contracts and procures the fossil fuel for use by NEER's generation fleet. One of its primary roles is to manage the commodity risk of NEER's portfolio. PMI uses derivative instruments such as swaps, options, futures and forwards to manage the risk associated with fluctuating commodity prices and to optimize the value of NEER's power generation and gas infrastructure production assets. PMI also markets and trades energy-related commodity products and provides a wide range of electricity and fuel commodity products as well as marketing and trading services to customers. PMI's customer supply business provides full energy and capacity requirements to customers.

The results of the customer supply and proprietary power and gas trading activities are included in NEER's operating results. See Management's Discussion - Energy Marketing and Trading and Market Risk Sensitivity, Note 1 - Energy Trading and Note 3.

NEER REGULATION

The energy markets in which NEER operates are subject to domestic and foreign regulation, as the case may be, including local, state and federal regulation, and other specific rules.

At December 31, 2015, NEER had ownership interests in operating independent power projects located in the U.S. that have received exempt wholesale generator status as defined under the Public Utility Holding Company Act of 2005, which represent approximately 99% of NEER's net generating capacity in the U.S. Exempt wholesale generators own or operate a facility exclusively to sell electricity to wholesale customers. They are barred from selling electricity directly to retail customers. NEER's exempt wholesale generators produce electricity from wind, fossil fuels, solar and nuclear facilities. Essentially all of the remaining 1% of NEER's net generating capacity has qualifying facility status under the PURPA. NEER's qualifying facilities generate electricity primarily from wind, solar and fossil fuels. Qualifying facility status exempts the projects from, among other things, many of the provisions of the Federal Power Act, as well as state laws and regulations relating to rates and financial or organizational regulation of electric utilities. While projects with qualifying facility and/or exempt wholesale generator status are exempt from various restrictions, each project must still comply with other federal, state and local laws, including, but not limited to, those regarding siting, construction, operation, licensing, pollution abatement and other environmental laws.

Additionally, most of the NEER facilities located in the U.S. are subject to FERC regulations and market rules, the NERC's mandatory reliability standards and all of its facilities are subject to environmental laws and the EPA's environmental regulations, and its nuclear facilities are also subject to the jurisdiction of the NRC. See FPL - FPL Regulation for additional discussion of FERC, NERC, NRC and EPA regulations. With the exception of facilities located in ERCOT, the FERC has jurisdiction over various aspects of NEER's business in the U.S., including the oversight and investigation of competitive wholesale energy markets, regulation of the transmission and sale of natural gas, and oversight of environmental matters related to natural gas projects and major electricity policy initiatives. The PUCT has jurisdiction, including the regulation of rates and services, oversight of competitive markets, and enforcement of statutes and rules, over NEER facilities located in ERCOT.

NEER and its affiliates are also subject to federal and provincial or regional regulations in Canada and Spain related to energy operations, energy markets and environmental standards. In Canada, activities related to owning and operating wind and solar projects and participating in wholesale and retail energy markets are regulated at the provincial level. In Ontario, for example, electricity generation facilities must be licensed by the Ontario Energy Board and may also be required to complete registrations and maintain market participant status with the Independent Electricity System Operator, in which case they must agree to be bound by and comply with the provisions of the market rules for the Ontario electricity market as well as the mandatory reliability standards of the NERC.

NEER is subject to environmental laws and regulations, and is affected by some of the emerging issues related to renewable energy resources as described in the NEE Environmental Matters section below. In order to better anticipate potential regulatory changes, NEER continues to actively evaluate and participate in regional market redesigns of existing operating rules for the integration of renewable energy resources and for the purchase and sale of energy commodities.

NEER EMPLOYEES

NEER and its subsidiaries had approximately 5,000 employees at December 31, 2015. Certain subsidiaries of NEER have collective bargaining agreements with the IBEW, the Utility Workers Union of America, the Security Police and Fire Professionals of America and the International Union of Operating Engineers, which collectively represent approximately 18% of NEER's employees. The majority of the collective bargaining agreements have three-year terms and expire between September 2016 and 2019.

III. OTHER NEE OPERATING SUBSIDIARIES

Corporate and Other represents other business activities, primarily NEET and FPL FiberNet. See Note 15.

NEET

NEET, a wholly owned subsidiary of NEECH, is a limited liability company organized under the laws of Delaware. Through its subsidiaries, NEET owns and operates rate-regulated transmission facilities, the largest of which is owned by Lone Star, and is pursuing opportunities to develop, build and operate new transmission facilities throughout North America. In 2013, an entity in which an affiliate of NEET has a joint venture investment was selected to complete development work for a 250-mile transmission line in Northwestern Ontario, Canada. Once development is complete, subject to Ontario Energy Board approval, this entity is expected to construct, own and operate the new transmission line that is projected to begin service in 2020. In 2015, a wholly owned subsidiary of NEET was awarded the rights to develop, construct, own and operate two transmission support projects in California, which projects, subject to certain regulatory approvals, are expected to begin service in 2017 and 2019, respectively.

Lone Star

Lone Star, a rate-regulated transmission service provider in Texas, is a limited liability company organized under the laws of Delaware. Lone Star owns and operates approximately 330 miles of 345 kilovolt (kV) transmission lines and other associated facilities. Lone Star is subject to regulation by a number of federal, state and other agencies, including, but not limited to, the PUCT, the ERCOT, the NERC and the EPA, as well as limited regulations of the FERC. See FPL - FPL Regulation for further discussion of FERC, NERC and EPA regulations and NEE Environmental Matters. The PUCT has jurisdiction over a wide range of Lone Star's business activities, including, among others, rates charged to customers and certain aspects of the operation of transmission systems. The

PUCT sets rates at a level that allows Lone Star the opportunity to collect from customers total revenues (revenue requirements) equal to Lone Star's cost of providing service, including a reasonable rate of return on invested capital.

In 2014, the PUCT approved a stipulation and settlement between Lone Star and all intervenors relating to Lone Star's base rate petition. The stipulation and settlement provides for an annual revenue requirement of approximately $102 million based on a $694 million rate base, a regulatory equity ratio of 45%, an allowed regulatory ROE of 9.6% and certain operating expenses.

FPL FIBERNET

FPL FiberNet conducts its business through two separate wholly owned subsidiaries of NEECH. One subsidiary was formed in 2000 to enhance the value of NEE's fiber-optic network assets that were originally built to support FPL operations and the other was formed in 2011 to hold fiber-optic network assets which were acquired. Both subsidiaries are limited liability companies organized under the laws of Delaware. FPL FiberNet leases fiber-optic network capacity and dark fiber to FPL and other customers, primarily telephone, wireless, and internet companies. FPL FiberNet's networks cover most of the metropolitan areas in Florida and several in Texas. FPL FiberNet also has a long-haul network providing bandwidth at wholesale rates. The long-haul network connects major cities in Florida and Texas with additional connectivity to the Eastern and South Central U.S. At December 31, 2015, FPL FiberNet's network consisted of approximately 9,230 route miles. FPL FiberNet is subject to regulation by the Federal Communications Commission which has jurisdiction over wire and wireless communication networks and by the public utility commissions in the states in which it provides intrastate telecommunication services.

NEE ENVIRONMENTAL MATTERS

NEE and FPL are subject to domestic and foreign environmental laws and regulations, including extensive federal, state and local environmental statutes, rules and regulations. The following is a discussion of certain existing and emerging federal and state initiatives and rules, some of which could potentially have a material effect (either positive or negative) on NEE and its subsidiaries. FPL expects to seek recovery through the environmental clause for compliance costs associated with any new environmental laws and regulations.

- Clean Water Act Section 316(b). In 2014, the EPA issued its final rule under Section 316(b) of the Clean Water Act outlining the process and framework for determining the Best Technology Available to reduce the impact on aquatic organisms from once-through cooling water intake systems. Under the rule, potentially eleven of FPL's facilities and five of NEER's facilities may be required to add additional controls and/or make operational changes to comply. NEE and FPL are analyzing the final rule, and the ultimate impacts of the rule will evolve over years of site specific studies, permit evaluations and negotiations. Therefore, the impact of any final compliance obligations is uncertain at this time. Several groups filed petitions for review of the EPA's final rule and the U.S. Court of Appeals for the Second Circuit is scheduled to hear the case in August 2016.

- Avian/Bat Regulations and Wind Turbine Siting Guidelines. FPL, NEER and NEET are subject to numerous environmental regulations and guidelines related to threatened and endangered species and their habitats, as well as avian and bat species, for the siting, construction and ongoing operations of their facilities. The facilities most significantly affected are wind and solar facilities and transmission and distribution lines. The environmental laws in the U.S., including, among others, the Endangered Species Act, the Migratory Bird Treaty Act, and the Bald and Golden Eagle Protection Act and similar environmental laws in Canada provide for the protection of migratory birds, eagles and bats and endangered species of birds and bats and their habitats. Regulations have been adopted under some of these laws that contain provisions that allow the owner/operator of a facility to apply for a permit to undertake specific activities, including those associated with certain siting decisions, construction activities and operations. In addition to regulations, voluntary wind turbine siting guidelines established by the U.S. Fish and Wildlife Service set forth siting, monitoring and coordination protocols that are designed to support wind development in the U.S. while also protecting both birds and bats and their habitats. These guidelines include provisions for specific monitoring and study conditions which need to be met in order for projects to be in adherence with these voluntary guidelines. Complying with these environmental regulations and adhering to the provisions set forth in the voluntary wind turbine siting guidelines could result in additional costs or reduced revenues at existing and new wind and solar facilities and transmission and distribution facilities at FPL, NEER and NEET and, in the case of environmental regulations, failure to comply could result in fines and penalties.

- Regulation of GHG Emissions. The U.S. Congress and certain states and regions, as well as the Government of Canada and its provinces, have taken and continue to take certain actions, such as finalizing regulation or setting targets or goals, regarding the reduction of GHG emissions and the increase of renewable energy generation. Based on the most recent reference data available from government sources, NEE is among the lowest emitters, among electric generators, of GHG in the U.S. measured by its rate of emissions expressed as pounds of CO_2 per MWh of generation.

  In October 2015, the EPA's final rule for new fossil fuel-fired electric generation units regulated under Section 111(b) of the Clean Air Act became effective, which is not expected to have an impact on NEE or FPL. In December 2015, the EPA's final rule under Section 111(d) of the Clean Air Act (Clean Power Plan) to reduce carbon emissions from existing fossil fuel-fired electric generation units became effective. The Clean Power Plan sets emission rate targets for each state and requires each state to develop a compliance plan by the fall of 2016 to meet these emissions targets, with the option for states to apply for an extension to 2018. The Clean Power Plan indicates that compliance will start in 2022 with both interim and final target dates,

each with specific emissions reductions. NEE and FPL are analyzing the Clean Power Plan and the impact of any final compliance obligations cannot be determined until the state plans have been finalized. Numerous parties have challenged the Clean Power Plan and, in February 2016, the U.S. Supreme Court issued an order staying implementation of the Clean Power Plan pending resolution of legal challenges to the rule. The D.C. Circuit is scheduled to hear oral arguments on June 2, 2016.

NEER's plants operate in certain states and regions in the U.S. and provinces in Canada that continue to consider and implement regulatory proposals to reduce GHG emissions in addition to what is expected to be required for the Clean Power Plan. RPS, currently in place in approximately 30 states and 3 territories and the District of Columbia, require electricity providers in the state, territory or district to meet a certain percentage of their retail sales with energy from renewable sources. These standards vary, but the majority include requirements to meet 20% to 30% of the electricity providers' retail sales with energy from renewable sources by 2025. Approximately 8 other states in the U.S. have set renewable energy goals as well. Many Canadian provinces have enacted renewable energy goals and targets to reduce GHG emissions from historic levels which include various milestones and compliance mechanisms. NEER's plants operate in 23 states in the U.S. and 4 provinces in Canada that have a RPS or renewable energy goals and NEER believes that these standards and goals, as well as any final compliance obligations under the Clean Power Plan, will create incremental demand for renewable energy in the future.

Other GHG reduction initiatives including, among others, the Regional Greenhouse Gas Initiative and the California Greenhouse Gas Regulation aim to reduce emissions through a variety of programs and under varying timelines. Based on its clean generation portfolio, NEER expects to continue experiencing a positive impact on earnings as a result of these GHG reduction initiatives. Additionally, these initiatives provide NEER opportunities with regards to wind and solar development as well as favorable energy pricing.

- Waters of the U.S. In June 2015, the EPA issued a final rule redefining "waters of the U.S." under the Clean Water Act to expand the definition of waters of the U.S. to encompass previously unregulated waters, such as intermittent streams, non-navigable tributaries, isolated wetlands and adjacent other waters, which rule was subsequently challenged by various parties. In October 2015, the U.S. Court of Appeals for the Sixth Circuit issued a stay of the EPA's final rule pending further court proceedings to address which court has jurisdiction as well as challenges to the rule. The ultimate resolution of the issues surrounding this final rule is uncertain at this time.

WEBSITE ACCESS TO SEC FILINGS

NEE and FPL make their SEC filings, including the annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and any amendments to those reports, available free of charge on NEE's internet website, www.nexteraenergy.com, as soon as reasonably practicable after those documents are electronically filed with or furnished to the SEC. The information and materials available on NEE's website (or any of its subsidiaries' websites) are not incorporated by reference into this combined Form 10-K. The SEC maintains an internet website that contains reports, proxy and information statements, and other information regarding registrants that file electronically with the SEC at www.sec.gov.

EXECUTIVE OFFICERS OF NEE[a]

Name	Age	Position	Effective Date
Miguel Arechabala	55	Executive Vice President, Power Generation Division of NEE Executive Vice President, Power Generation Division of FPL	January 1, 2014
Deborah H. Caplan	53	Executive Vice President, Human Resources and Corporate Services of NEE Executive Vice President, Human Resources and Corporate Services of FPL	April 15, 2013
Paul I. Cutler	56	Treasurer of NEE Treasurer of FPL Assistant Secretary of NEE	February 19, 2003 February 18, 2003 December 10, 1997
Moray P. Dewhurst	60	Vice Chairman and Chief Financial Officer, and Executive Vice President - Finance of NEE Executive Vice President, Finance and Chief Financial Officer of FPL	October 5, 2011
Chris N. Froggatt	58	Vice President, Controller and Chief Accounting Officer of NEE	February 27, 2010
Joseph T. Kelliher	55	Executive Vice President, Federal Regulatory Affairs of NEE	May 18, 2009
Manoochehr K. Nazar	61	President Nuclear Division and Chief Nuclear Officer of NEE President Nuclear Division and Chief Nuclear Officer of FPL	May 23, 2014 May 30, 2014
Armando Pimentel, Jr.	53	President and Chief Executive Officer of NEER	October 5, 2011
James L. Robo	53	Chairman, President and Chief Executive Officer of NEE Chairman of FPL	December 13, 2013 May 2, 2012
Charles E. Sieving	43	Executive Vice President & General Counsel of NEE Executive Vice President of FPL	December 1, 2008 January 1, 2009
Eric E. Silagy	50	President and Chief Executive Officer of FPL	May 30, 2014
William L. Yeager	57	Executive Vice President, Engineering, Construction and Integrated Supply Chain of NEE Executive Vice President, Engineering, Construction and Integrated Supply Chain of FPL	January 1, 2013

(a) Information is as of February 19, 2016. Executive officers are elected annually by, and serve at the pleasure of, their respective boards of directors. Except as noted below, each officer has held his/her present position for five years or more and his/her employment history is continuous. Mr. Arechabala was president of NextEra Energy España, S.L., an indirect wholly owned subsidiary of NEE, from February 2010 to December 2013. Ms. Caplan was vice president and chief operating officer of FPL from May 2011 to April 2013 and vice president, integrated supply chain of NEE and FPL from July 2005 to May 2011. Mr. Dewhurst has been vice chairman of NEE since August 2009 and was chief of staff of NEE from August 2009 to October 2011. Mr. Dewhurst has announced his intention to retire from NEE and FPL in the spring of 2016. Mr. Nazar has been chief nuclear officer of NEE and FPL since January 2010 and was executive vice president, nuclear division of NEE and FPL from January 2010 to May 2014. Mr. Pimentel was chief financial officer of NEE and FPL from May 2008 to October 2011 and executive vice president, finance of NEE and FPL from February 2008 to October 2011. Mr. Robo has been president and chief executive officer of NEE since July 2012. Mr. Robo was the chief executive officer of FPL from May 2012 to May 2014 and president and chief operating officer of NEE from December 2006 to June 2012. Mr. Sieving was also assistant secretary of NEE from May 2010 to May 2011. Mr. Silagy has been president of FPL since December 2011. Mr. Silagy was senior vice president, regulatory and state governmental affairs of FPL from May 2010 to December 2011. Mr. Yeager was vice president, engineering, construction and integrated supply chain services of NEE and FPL from October 2012 to December 2012 and vice president, integrated supply chain of NEE and FPL from May 2011 to October 2012. From January 2005 to May 2011, Mr. Yeager was vice president, engineering and construction of FPL.

Item 1A. Risk Factors

Risks Relating to NEE's and FPL's Business

The business, financial condition, results of operations and prospects of NEE and FPL are subject to a variety of risks, many of which are beyond the control of NEE and FPL. The following is a description of important risks that may materially adversely affect the business, financial condition, results of operations and prospects of NEE and FPL and may cause actual results of NEE and FPL to differ substantially from those that NEE or FPL currently expects or seeks. In that event, the market price for the securities of NEE or FPL could decline. Accordingly, the risks described below should be carefully considered together with the other information set forth in this report and in future reports that NEE and FPL file with the SEC. The risks described below are not the only risks facing NEE and FPL. Additional risks and uncertainties may also materially adversely affect NEE's or FPL's business, financial condition, results of operations and prospects. Each of NEE and FPL has disclosed the material risks known to it to affect its business at this time. However, there may be further risks and uncertainties that are not presently known or that are not currently believed to be material that may in the future materially adversely affect the business, financial condition, results of operations or prospects of NEE and FPL.

Regulatory, Legislative and Legal Risks

NEE's and FPL's business, financial condition, results of operations and prospects may be materially adversely affected by the extensive regulation of their business.

The operations of NEE and FPL are subject to complex and comprehensive federal, state and other regulation. This extensive regulatory framework, portions of which are more specifically identified in the following risk factors, regulates, among other things and to varying degrees, NEE's and FPL's industries, businesses, rates and cost structures, operation of nuclear power facilities, construction and operation of electricity generation, transmission and distribution facilities and natural gas and oil production, natural gas, oil and other fuel transportation, processing and storage facilities, acquisition, disposal, depreciation and amortization of facilities and other assets, decommissioning costs and funding, service reliability, wholesale and retail competition, and commodities trading and derivatives transactions. In their business planning and in the management of their operations, NEE and FPL must address the effects of regulation on their business and any inability or failure to do so adequately could have a material adverse effect on their business, financial condition, results of operations and prospects.

NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected if they are unable to recover in a timely manner any significant amount of costs, a return on certain assets or a reasonable return on invested capital through base rates, cost recovery clauses, other regulatory mechanisms or otherwise.

FPL is a regulated entity subject to the jurisdiction of the FPSC over a wide range of business activities, including, among other items, the retail rates charged to its customers through base rates and cost recovery clauses, the terms and conditions of its services, procurement of electricity for its customers, issuances of securities, and aspects of the siting, construction and operation of its generation plants and transmission and distribution systems for the sale of electric energy. The FPSC has the authority to disallow recovery by FPL of costs that it considers excessive or imprudently incurred and to determine the level of return that FPL is permitted to earn on invested capital. The regulatory process, which may be adversely affected by the political, regulatory and economic environment in Florida and elsewhere, limits FPL's ability to increase earnings. The regulatory process also does not provide any assurance as to achievement of authorized or other earnings levels, or that FPL will be permitted to earn an acceptable return on capital investments it wishes to make. NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected if any material amount of costs, a return on certain assets or a reasonable return on invested capital cannot be recovered through base rates, cost recovery clauses, other regulatory mechanisms or otherwise. Certain other subsidiaries of NEE are regulated transmission utilities subject to the jurisdiction of their regulators and are subject to similar risks.

Regulatory decisions that are important to NEE and FPL may be materially adversely affected by political, regulatory and economic factors.

The local and national political, regulatory and economic environment has had, and may in the future have, an adverse effect on FPSC decisions with negative consequences for FPL. These decisions may require, for example, FPL to cancel or delay planned development activities, to reduce or delay other planned capital expenditures or to pay for investments or otherwise incur costs that it may not be able to recover through rates, each of which could have a material adverse effect on the business, financial condition, results of operations and prospects of NEE and FPL. Certain other subsidiaries of NEE are subject to similar risks.

FPL's use of derivative instruments could be subject to prudence challenges and, if found imprudent, could result in disallowances of cost recovery for such use by the FPSC.

The FPSC engages in an annual prudence review of FPL's use of derivative instruments in its risk management fuel procurement program and should it find any such use to be imprudent, the FPSC could deny cost recovery for such use by FPL. Such an outcome could have a material adverse effect on FPL's business, financial condition, results of operations and prospects.

Any reductions to, or the elimination of, governmental incentives or policies that support utility scale renewable energy, including, but not limited to, tax incentives, RPS, feed-in tariffs or the Clean Power Plan, or the imposition of additional taxes or other assessments on renewable energy, could result in, among other items, the lack of a satisfactory market for the development of new renewable energy projects, NEER abandoning the development of renewable energy projects, a loss of NEER's investments in renewable energy projects and reduced project returns, any of which could have a material adverse effect on NEE's business, financial condition, results of operations and prospects.

NEER depends heavily on government policies that support utility scale renewable energy and enhance the economic feasibility of developing and operating wind and solar energy projects in regions in which NEER operates or plans to develop and operate renewable energy facilities. The federal government, a majority of the 50 U.S. states and portions of Canada and Spain provide incentives, such as tax incentives, RPS, feed-in tariffs or the Clean Power Plan, that support or are designed to support the sale of energy from utility scale renewable energy facilities, such as wind and solar energy facilities. As a result of budgetary constraints, political factors or otherwise, governments from time to time may review their policies that support renewable energy and consider actions that would make the policies less conducive to the development and operation of renewable energy facilities. Any reductions to, or the elimination of, governmental incentives that support renewable energy, such as those reductions that have been enacted in Spain and are applicable to NEER's solar generation facilities in that country, or the imposition of additional taxes or other assessments on renewable energy, could result in, among other items, the lack of a satisfactory market for the development of new renewable energy projects, NEER abandoning the development of renewable energy projects, a loss of NEER's investments in the projects and reduced project returns, any of which could have a material adverse effect on NEE's business, financial condition, results of operations and prospects.

NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected as a result of new or revised laws, regulations, interpretations or other regulatory initiatives.

NEE's and FPL's business is influenced by various legislative and regulatory initiatives, including, but not limited to, new or revised laws, regulations, interpretations and other regulatory initiatives regarding deregulation or restructuring of the energy industry, regulation of the commodities trading and derivatives markets, and regulation of environmental matters, such as regulation of air emissions, regulation of water consumption and water discharges, and regulation of gas and oil infrastructure operations, as well as associated environmental permitting. Changes in the nature of the regulation of NEE's and FPL's business could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects. NEE and FPL are unable to predict future legislative or regulatory changes, initiatives or interpretations, although any such changes, initiatives or interpretations may increase costs and competitive pressures on NEE and FPL, which could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

FPL has limited competition in the Florida market for retail electricity customers. Any changes in Florida law or regulation which introduce competition in the Florida retail electricity market, such as government incentives that facilitate the installation of solar generation facilities on residential or other rooftops at below cost, or would permit third-party sales of electricity, could have a material adverse effect on FPL's business, financial condition, results of operations and prospects. There can be no assurance that FPL will be able to respond adequately to such regulatory changes, which could have a material adverse effect on FPL's business, financial condition, results of operations and prospects.

NEER is subject to FERC rules related to transmission that are designed to facilitate competition in the wholesale market on practically a nationwide basis by providing greater certainty, flexibility and more choices to wholesale power customers. NEE cannot predict the impact of changing FERC rules or the effect of changes in levels of wholesale supply and demand, which are typically driven by factors beyond NEE's control. There can be no assurance that NEER will be able to respond adequately or sufficiently quickly to such rules and developments, or to any other changes that reverse or restrict the competitive restructuring of the energy industry in those jurisdictions in which such restructuring has occurred. Any of these events could have a material adverse effect on NEE's business, financial condition, results of operations and prospects.

NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected if the rules implementing the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) broaden the scope of its provisions regarding the regulation of OTC financial derivatives and make certain provisions applicable to NEE and FPL.

The Dodd-Frank Act, enacted into law in July 2010 provides for, among other things, substantially increased regulation of the OTC derivatives market and futures contract markets. While the legislation is broad and detailed, there are still portions of the legislation that either require implementing rules to be adopted by federal governmental agencies or otherwise require further interpretive guidance.

NEE and FPL continue to monitor the development of rules related to the Dodd-Frank Act and have taken steps to comply with those rules that affect their businesses. A number of rules have been finalized and are effective, but there are rules yet to be finalized and rules that have been finalized but may be amended in the future.

NEE and FPL cannot predict the impact any proposed rules will have on their ability to hedge their commodity and interest rate risks or on OTC derivatives markets as a whole, but they could potentially have a material adverse effect on NEE's and FPL's risk exposure, as well as reduce market liquidity and further increase the cost of hedging activities.

NEE and FPL are subject to numerous environmental laws, regulations and other standards that may result in capital expenditures, increased operating costs and various liabilities, and may require NEE and FPL to limit or eliminate certain operations.

NEE and FPL are subject to domestic and foreign environmental laws and regulations, including, but not limited to, extensive federal, state and local environmental statutes, rules and regulations relating to air quality, water quality and usage, climate change, emissions of greenhouse gases, including, but not limited to, CO_2, waste management, hazardous wastes, marine, avian and other wildlife mortality and habitat protection, historical artifact preservation, natural resources, health (including, but not limited to, electric and magnetic fields from power lines and substations), safety and RPS, that could, among other things, prevent or delay the development of power generation, power or natural gas transmission, or other infrastructure projects, restrict the output of some existing facilities, limit the availability and use of some fuels required for the production of electricity, require additional pollution control equipment, and otherwise increase costs, increase capital expenditures and limit or eliminate certain operations.

There are significant capital, operating and other costs associated with compliance with these environmental statutes, rules and regulations, and those costs could be even more significant in the future as a result of new requirements, the current trend toward more stringent standards, and stricter or more expansive application of existing environmental regulations. For example, among other new, potential or pending changes are federal regulation of CO_2 emissions under the Clean Power Plan and state and federal regulation of the use of hydraulic fracturing or similar technologies to drill for natural gas and related compounds used by NEE's gas infrastructure business.

Violations of current or future laws, rules, regulations or other standards could expose NEE and FPL to regulatory and legal proceedings, disputes with, and legal challenges by, third parties, and potentially significant civil fines, criminal penalties and other sanctions. Proceedings could include, for example, litigation regarding property damage, personal injury, common law nuisance and enforcement by citizens or governmental authorities of environmental requirements such as air, water and soil quality standards.

NEE's and FPL's business could be negatively affected by federal or state laws or regulations mandating new or additional limits on the production of greenhouse gas emissions.

Federal or state laws or regulations may be adopted that would impose new or additional limits on the emissions of greenhouse gases, including, but not limited to, CO_2 and methane, from electric generation units using fossil fuels like coal and natural gas. Although it is currently subject to a stay issued by the U.S. Supreme Court, the Clean Power Plan is an example of such a new regulation at the federal level. The potential effects of greenhouse gas emission limits on NEE's and FPL's electric generation units are subject to significant uncertainties based on, among other things, the timing of the implementation of any new requirements, the required levels of emission reductions, the nature of any market-based or tax-based mechanisms adopted to facilitate reductions, the relative availability of greenhouse gas emission reduction offsets, the development of cost-effective, commercial-scale carbon capture and storage technology and supporting regulations and liability mitigation measures, and the range of available compliance alternatives.

While NEE's and FPL's electric generation units emit greenhouse gases at a lower rate of emissions than most of the U.S. electric generation sector, the results of operations of NEE and FPL could be materially adversely affected to the extent that new federal or state laws or regulations impose any new greenhouse gas emission limits. Any future limits on greenhouse gas emissions could:

- create substantial additional costs in the form of taxes or emission allowances;
- make some of NEE's and FPL's electric generation units uneconomical to operate in the long term;
- require significant capital investment in carbon capture and storage technology, fuel switching, or the replacement of high-emitting generation facilities with lower-emitting generation facilities; or
- affect the availability or cost of fossil fuels.

There can be no assurance that NEE or FPL would be able to completely recover any such costs or investments, which could have a material adverse effect on their business, financial condition, results of operations and prospects.

Extensive federal regulation of the operations of NEE and FPL exposes NEE and FPL to significant and increasing compliance costs and may also expose them to substantial monetary penalties and other sanctions for compliance failures.

NEE and FPL are subject to extensive federal regulation, which generally imposes significant and increasing compliance costs on NEE's and FPL's operations. Additionally, any actual or alleged compliance failures could result in significant costs and other potentially adverse effects of regulatory investigations, proceedings, settlements, decisions and claims, including, among other items, potentially significant monetary penalties. As an example, under the Energy Policy Act of 2005, NEE and FPL, as owners and operators of bulk-power transmission systems and/or electric generation facilities, are subject to mandatory reliability standards. Compliance with these mandatory reliability standards may subject NEE and FPL to higher operating costs and may result in increased capital expenditures. If FPL or NEE is found not to be in compliance with these standards, it may incur substantial monetary

penalties and other sanctions. Both the costs of regulatory compliance and the costs that may be imposed as a result of any actual or alleged compliance failures could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

Changes in tax laws, as well as judgments and estimates used in the determination of tax-related asset and liability amounts, could materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's and FPL's provision for income taxes and reporting of tax-related assets and liabilities require significant judgments and the use of estimates. Amounts of tax-related assets and liabilities involve judgments and estimates of the timing and probability of recognition of income, deductions and tax credits, including, but not limited to, estimates for potential adverse outcomes regarding tax positions that have been taken and the ability to utilize tax benefit carryforwards, such as net operating loss and tax credit carryforwards. Actual income taxes could vary significantly from estimated amounts due to the future impacts of, among other things, changes in tax laws, regulations and interpretations, the financial condition and results of operations of NEE and FPL, and the resolution of audit issues raised by taxing authorities. Ultimate resolution of income tax matters may result in material adjustments to tax-related assets and liabilities, which could materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's and FPL's business, financial condition, results of operations and prospects may be materially adversely affected due to adverse results of litigation.

NEE's and FPL's business, financial condition, results of operations and prospects may be materially affected by adverse results of litigation. Unfavorable resolution of legal proceedings in which NEE is involved or other future legal proceedings, including, but not limited to, class action lawsuits, may have a material adverse effect on the business, financial condition, results of operations and prospects of NEE and FPL.

Operational Risks

NEE's and FPL's business, financial condition, results of operations and prospects could suffer if NEE and FPL do not proceed with projects under development or are unable to complete the construction of, or capital improvements to, electric generation, transmission and distribution facilities, gas infrastructure facilities or other facilities on schedule or within budget.

NEE's and FPL's ability to complete construction of, and capital improvement projects for, their electric generation, transmission and distribution facilities, gas infrastructure facilities and other facilities on schedule and within budget may be adversely affected by escalating costs for materials and labor and regulatory compliance, inability to obtain or renew necessary licenses, rights-of-way, permits or other approvals on acceptable terms or on schedule, disputes involving contractors, labor organizations, land owners, governmental entities, environmental groups, Native American and aboriginal groups, lessors, joint venture partners and other third parties, negative publicity, transmission interconnection issues and other factors. If any development project or construction or capital improvement project is not completed, is delayed or is subject to cost overruns, certain associated costs may not be approved for recovery or otherwise be recoverable through regulatory mechanisms that may be available, and NEE and FPL could become obligated to make delay or termination payments or become obligated for other damages under contracts, could experience the loss of tax credits or tax incentives, or delayed or diminished returns, and could be required to write off all or a portion of their investment in the project. Any of these events could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE and FPL may face risks related to project siting, financing, construction, permitting, governmental approvals and the negotiation of project development agreements that may impede their development and operating activities.

NEE and FPL own, develop, construct, manage and operate electric-generation and transmission facilities and natural gas transmission facilities. A key component of NEE's and FPL's growth is their ability to construct and operate generation and transmission facilities to meet customer needs. As part of these operations, NEE and FPL must periodically apply for licenses and permits from various local, state, federal and other regulatory authorities and abide by their respective conditions. Should NEE or FPL be unsuccessful in obtaining necessary licenses or permits on acceptable terms, should there be a delay in obtaining or renewing necessary licenses or permits or should regulatory authorities initiate any associated investigations or enforcement actions or impose related penalties or disallowances on NEE or FPL, NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected. Any failure to negotiate successful project development agreements for new facilities with third parties could have similar results.

The operation and maintenance of NEE's and FPL's electric generation, transmission and distribution facilities, gas infrastructure facilities and other facilities are subject to many operational risks, the consequences of which could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's and FPL's electric generation, transmission and distribution facilities, gas infrastructure facilities and other facilities are subject to many operational risks. Operational risks could result in, among other things, lost revenues due to prolonged outages, increased

expenses due to monetary penalties or fines for compliance failures, liability to third parties for property and personal injury damage, a failure to perform under applicable power sales agreements or other agreements and associated loss of revenues from terminated agreements or liability for liquidated damages under continuing agreements, and replacement equipment costs or an obligation to purchase or generate replacement power at higher prices.

Uncertainties and risks inherent in operating and maintaining NEE's and FPL's facilities include, but are not limited to:

- risks associated with facility start-up operations, such as whether the facility will achieve projected operating performance on schedule and otherwise as planned;
- failures in the availability, acquisition or transportation of fuel or other necessary supplies;
- the impact of unusual or adverse weather conditions and natural disasters, including, but not limited to, hurricanes, tornadoes, icing events, floods, earthquakes and droughts;
- performance below expected or contracted levels of output or efficiency;
- breakdown or failure, including, but not limited to, explosions, fires, leaks or other major events, of equipment, transmission and distribution lines or pipelines;
- availability of replacement equipment;
- risks of property damage or human injury from energized equipment, hazardous substances or explosions, fires, leaks or other events;
- availability of adequate water resources and ability to satisfy water intake and discharge requirements;
- inability to identify, manage properly or mitigate equipment defects in NEE's and FPL's facilities;
- use of new or unproven technology;
- risks associated with dependence on a specific type of fuel or fuel source, such as commodity price risk, availability of adequate fuel supply and transportation, and lack of available alternative fuel sources;
- increased competition due to, among other factors, new facilities, excess supply, shifting demand and regulatory changes; and
- insufficient insurance, warranties or performance guarantees to cover any or all lost revenues or increased expenses from the foregoing.

NEE's and FPL's business, financial condition, results of operations and prospects may be negatively affected by a lack of growth or slower growth in the number of customers or in customer usage.

Growth in customer accounts and growth of customer usage each directly influence the demand for electricity and the need for additional power generation and power delivery facilities, as well as the need for energy-related commodities such as natural gas. Customer growth and customer usage are affected by a number of factors outside the control of NEE and FPL, such as mandated energy efficiency measures, demand side management requirements, and economic and demographic conditions, such as population changes, job and income growth, housing starts, new business formation and the overall level of economic activity. A lack of growth, or a decline, in the number of customers or in customer demand for electricity or natural gas and other fuels may cause NEE and FPL to fail to fully realize the anticipated benefits from significant investments and expenditures and could have a material adverse effect on NEE's and FPL's growth, business, financial condition, results of operations and prospects.

NEE's and FPL's business, financial condition, results of operations and prospects can be materially adversely affected by weather conditions, including, but not limited to, the impact of severe weather.

Weather conditions directly influence the demand for electricity and natural gas and other fuels and affect the price of energy and energy-related commodities. In addition, severe weather and natural disasters, such as hurricanes, floods, tornadoes, icing events and earthquakes, can be destructive and cause power outages and property damage, reduce revenue, affect the availability of fuel and water, and require NEE and FPL to incur additional costs, for example, to restore service and repair damaged facilities, to obtain replacement power and to access available financing sources. Furthermore, NEE's and FPL's physical plant could be placed at greater risk of damage should changes in the global climate produce unusual variations in temperature and weather patterns, resulting in more intense, frequent and extreme weather events, abnormal levels of precipitation and, particularly relevant to FPL, a change in sea level. FPL operates in the east and lower west coasts of Florida, an area that historically has been prone to severe weather events, such as hurricanes. A disruption or failure of electric generation, transmission or distribution systems or natural gas production, transmission, storage or distribution systems in the event of a hurricane, tornado or other severe weather event, or otherwise, could prevent NEE and FPL from operating their business in the normal course and could result in any of the adverse consequences described above. Any of the foregoing could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

At FPL and other businesses of NEE where cost recovery is available, recovery of costs to restore service and repair damaged facilities is or may be subject to regulatory approval, and any determination by the regulator not to permit timely and full recovery of the costs incurred could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

Changes in weather can also affect the production of electricity at power generation facilities, including, but not limited to, NEER's wind and solar facilities. For example, the level of wind resource affects the revenue produced by wind generation facilities. Because the levels of wind and solar resources are variable and difficult to predict, NEER's results of operations for individual wind and solar facilities specifically, and NEE's results of operations generally, may vary significantly from period to period, depending on the level

of available resources. To the extent that resources are not available at planned levels, the financial results from these facilities may be less than expected.

Threats of terrorism and catastrophic events that could result from terrorism, cyber attacks, or individuals and/or groups attempting to disrupt NEE's and FPL's business, or the businesses of third parties, may materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.

NEE and FPL are subject to the potentially adverse operating and financial effects of terrorist acts and threats, as well as cyber attacks and other disruptive activities of individuals or groups. There have been cyber attacks on energy infrastructure such as substations, gas pipelines and related assets in the past and there may be such attacks in the future. NEE's and FPL's generation, transmission and distribution facilities, fuel storage facilities, information technology systems and other infrastructure facilities and systems could be direct targets of, or otherwise be materially adversely affected by, such activities.

Terrorist acts, cyber attacks or other similar events affecting NEE's and FPL's systems and facilities, or those of third parties on which NEE and FPL rely, could harm NEE's and FPL's business, for example, by limiting their ability to generate, purchase or transmit power, natural gas or other energy-related commodities by limiting their ability to bill customers and collect and process payments, and by delaying their development and construction of new generation, distribution or transmission facilities or capital improvements to existing facilities. These events, and governmental actions in response, could result in a material decrease in revenues, significant additional costs (for example, to repair assets, implement additional security requirements or maintain or acquire insurance), significant fines and penalties, and reputational damage, could materially adversely affect NEE's and FPL's operations (for example, by contributing to disruption of supplies and markets for natural gas, oil and other fuels), and could impair NEE's and FPL's ability to raise capital (for example, by contributing to financial instability and lower economic activity). In addition, the implementation of security guidelines and measures has resulted in and is expected to continue to result in increased costs. Such events or actions may materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.

The ability of NEE and FPL to obtain insurance and the terms of any available insurance coverage could be materially adversely affected by international, national, state or local events and company-specific events, as well as the financial condition of insurers. NEE's and FPL's insurance coverage does not provide protection against all significant losses.

Insurance coverage may not continue to be available or may not be available at rates or on terms similar to those presently available to NEE and FPL. The ability of NEE and FPL to obtain insurance and the terms of any available insurance coverage could be materially adversely affected by international, national, state or local events and company-specific events, as well as the financial condition of insurers. If insurance coverage is not available or obtainable on acceptable terms, NEE or FPL may be required to pay costs associated with adverse future events. NEE and FPL generally are not fully insured against all significant losses. For example, FPL is not fully insured against hurricane-related losses, but would instead seek recovery of such uninsured losses from customers subject to approval by the FPSC, to the extent losses exceed restricted funds set aside to cover the cost of storm damage. A loss for which NEE or FPL is not fully insured could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE invests in gas and oil producing and transmission assets through NEER's gas infrastructure business. The gas infrastructure business is exposed to fluctuating market prices of natural gas, natural gas liquids, oil and other energy commodities. A prolonged period of low gas and oil prices could impact NEER's gas infrastructure business and cause NEER to delay or cancel certain gas infrastructure projects and for certain existing projects to be impaired, which could materially adversely affect NEE's results of operations.

Natural gas and oil prices are affected by supply and demand, both globally and regionally. Factors that influence supply and demand include operational issues, natural disasters, weather, political instability, conflicts, new discoveries, technological advances, economic conditions and actions by major oil-producing countries. There can be significant volatility in market prices for gas and oil, and price fluctuations could have a material effect on the financial performance of gas and oil producing and transmission assets. For example, in a low gas and oil price environment, NEER would generate less revenue from its gas infrastructure investments in gas and oil producing properties, and as a result certain investments might become less profitable or incur losses. Prolonged periods of low oil and gas prices could also result in oil and gas production and transmission projects to be delayed or cancelled or to experience lower returns, and for certain projects to become impaired, which could materially adversely affect NEE's results of operations.

If supply costs necessary to provide NEER's full energy and capacity requirement services are not favorable, operating costs could increase and materially adversely affect NEE's business, financial condition, results of operations and prospects.

NEER provides full energy and capacity requirements services primarily to distribution utilities, which include load-following services and various ancillary services, to satisfy all or a portion of such utilities' power supply obligations to their customers. The supply costs for these transactions may be affected by a number of factors, including, but not limited to, events that may occur after such utilities have committed to supply power, such as weather conditions, fluctuating prices for energy and ancillary services, and the ability of the distribution utilities' customers to elect to receive service from competing suppliers. NEER may not be able to recover

all of its increased supply costs, which could have a material adverse effect on NEE's business, financial condition, results of operations and prospects.

Due to the potential for significant volatility in market prices for fuel, electricity and renewable and other energy commodities, NEER's inability or failure to manage properly or hedge effectively the commodity risks within its portfolios could materially adversely affect NEE's business, financial condition, results of operations and prospects.

There can be significant volatility in market prices for fuel, electricity and renewable and other energy commodities. NEE's inability or failure to manage properly or hedge effectively its assets or positions against changes in commodity prices, volumes, interest rates, counterparty credit risk or other risk measures, based on factors both from within, or wholly or partially outside of, NEE's control, may materially adversely affect NEE's business, financial condition, results of operations and prospects.

Sales of power on the spot market or on a short-term contractual basis may cause NEE's results of operations to be volatile.

A portion of NEER's power generation facilities operate wholly or partially without long-term power purchase agreements. Power from these facilities is sold on the spot market or on a short-term contractual basis. Spot market sales are subject to market volatility, and the revenue generated from these sales is subject to fluctuation that may cause NEE's results of operations to be volatile. NEER and NEE may not be able to manage volatility adequately, which could then have a material adverse effect on NEE's business, financial condition, results of operations and prospects.

Reductions in the liquidity of energy markets may restrict the ability of NEE to manage its operational risks, which, in turn, could negatively affect NEE's results of operations.

NEE is an active participant in energy markets. The liquidity of regional energy markets is an important factor in NEE's ability to manage risks in these operations. Over the past several years, other market participants have ceased or significantly reduced their activities in energy markets as a result of several factors, including, but not limited to, government investigations, changes in market design and deteriorating credit quality. Liquidity in the energy markets can be adversely affected by price volatility, restrictions on the availability of credit and other factors, and any reduction in the liquidity of energy markets could have a material adverse effect on NEE's business, financial condition, results of operations and prospects.

NEE's and FPL's hedging and trading procedures and associated risk management tools may not protect against significant losses.

NEE and FPL have hedging and trading procedures and associated risk management tools, such as separate but complementary financial, credit, operational, compliance and legal reporting systems, internal controls, management review processes and other mechanisms. NEE and FPL are unable to assure that such procedures and tools will be effective against all potential risks, including, without limitation, employee misconduct. If such procedures and tools are not effective, this could have a material adverse effect on NEE's business, financial condition, results of operations and prospects.

If price movements significantly or persistently deviate from historical behavior, NEE's and FPL's risk management tools associated with their hedging and trading procedures may not protect against significant losses.

NEE's and FPL's risk management tools and metrics associated with their hedging and trading procedures, such as daily value at risk, earnings at risk, stop loss limits and liquidity guidelines, are based on historical price movements. Due to the inherent uncertainty involved in price movements and potential deviation from historical pricing behavior, NEE and FPL are unable to assure that their risk management tools and metrics will be effective to protect against material adverse effects on their business, financial condition, results of operations and prospects.

If power transmission or natural gas, nuclear fuel or other commodity transportation facilities are unavailable or disrupted, FPL's and NEER's ability to sell and deliver power or natural gas may be limited.

FPL and NEER depend upon power transmission and natural gas, nuclear fuel and other commodity transportation facilities, many of which they do not own. Occurrences affecting the operation of these facilities that may or may not be beyond FPL's and NEER's control (such as severe weather or a generation or transmission facility outage, pipeline rupture, or sudden and significant increase or decrease in wind generation) may limit or halt the ability of FPL and NEER to sell and deliver power and natural gas, or to purchase necessary fuels and other commodities, which could materially adversely impact NEE's and FPL's business, financial condition, results of operations and prospects.

NEE and FPL are subject to credit and performance risk from customers, hedging counterparties and vendors.

NEE and FPL are exposed to risks associated with the creditworthiness and performance of their customers, hedging counterparties and vendors under contracts for the supply of equipment, materials, fuel and other goods and services required for their business operations and for the construction and operation of, and for capital improvements to, their facilities. Adverse conditions in the energy industry or the general economy, as well as circumstances of individual customers, hedging counterparties and vendors,

may adversely affect the ability of some customers, hedging counterparties and vendors to perform as required under their contracts with NEE and FPL. For example, the prolonged downturn in oil and natural gas prices has adversely affected the financial stability of a number of enterprises in the energy industry, including some with which NEE does business.

If any hedging, vending or other counterparty fails to fulfill its contractual obligations, NEE and FPL may need to make arrangements with other counterparties or vendors, which could result in material financial losses, higher costs, untimely completion of power generation facilities and other projects, and/or a disruption of their operations. If a defaulting counterparty is in poor financial condition, NEE and FPL may not be able to recover damages for any contract breach.

NEE and FPL could recognize financial losses or a reduction in operating cash flows if a counterparty fails to perform or make payments in accordance with the terms of derivative contracts or if NEE or FPL is required to post margin cash collateral under derivative contracts.

NEE and FPL use derivative instruments, such as swaps, options, futures and forwards, some of which are traded in the OTC markets or on exchanges, to manage their commodity and financial market risks, and for NEE to engage in trading and marketing activities. Any failures by their counterparties to perform or make payments in accordance with the terms of those transactions could have a material adverse effect on NEE's or FPL's business, financial condition, results of operations and prospects. Similarly, any requirement for FPL or NEE to post margin cash collateral under its derivative contracts could have a material adverse effect on its business, financial condition, results of operations and prospects. These risks may be increased during periods of adverse market or economic conditions affecting the industries in which NEE participates.

NEE and FPL are highly dependent on sensitive and complex information technology systems, and any failure or breach of those systems could have a material adverse effect on their business, financial condition, results of operations and prospects.

NEE and FPL operate in a highly regulated industry that requires the continuous functioning of sophisticated information technology systems and network infrastructure. Despite NEE's and FPL's implementation of security measures, all of their technology systems are vulnerable to disability, failures or unauthorized access due to such activities. If NEE's or FPL's information technology systems were to fail or be breached, sensitive confidential and other data could be compromised and NEE and FPL could be unable to fulfill critical business functions.

NEE's and FPL's business is highly dependent on their ability to process and monitor, on a daily basis, a very large number of transactions, many of which are highly complex and cross numerous and diverse markets. Due to the size, scope, complexity and geographical reach of NEE's and FPL's business, the development and maintenance of information technology systems to keep track of and process information is critical and challenging. NEE's and FPL's operating systems and facilities may fail to operate properly or become disabled as a result of events that are either within, or wholly or partially outside of, their control, such as operator error, severe weather or terrorist activities. Any such failure or disabling event could materially adversely affect NEE's and FPL's ability to process transactions and provide services, and their business, financial condition, results of operations and prospects.

NEE and FPL add, modify and replace information systems on a regular basis. Modifying existing information systems or implementing new or replacement information systems is costly and involves risks, including, but not limited to, integrating the modified, new or replacement system with existing systems and processes, implementing associated changes in accounting procedures and controls, and ensuring that data conversion is accurate and consistent. Any disruptions or deficiencies in existing information systems, or disruptions, delays or deficiencies in the modification or implementation of new information systems, could result in increased costs, the inability to track or collect revenues and the diversion of management's and employees' attention and resources, and could negatively impact the effectiveness of the companies' control environment, and/or the companies' ability to timely file required regulatory reports.

NEE and FPL also face the risks of operational failure or capacity constraints of third parties, including, but not limited to, those who provide power transmission and natural gas transportation services.

NEE's and FPL's retail businesses are subject to the risk that sensitive customer data may be compromised, which could result in a material adverse impact to their reputation and/or the results of operations of the retail business.

NEE's and FPL's retail businesses require access to sensitive customer data in the ordinary course of business. NEE's and FPL's retail businesses may also need to provide sensitive customer data to vendors and service providers who require access to this information in order to provide services, such as call center services, to the retail businesses. If a significant breach occurred, the reputation of NEE and FPL could be materially adversely affected, customer confidence could be diminished, or customer information could be subject to identity theft. NEE and FPL would be subject to costs associated with the breach and/or NEE and FPL could be subject to fines and legal claims, any of which may have a material adverse effect on the business, financial condition, results of operations and prospects of NEE and FPL.

NEE and FPL could recognize financial losses as a result of volatility in the market values of derivative instruments and limited liquidity in OTC markets.

NEE and FPL execute transactions in derivative instruments on either recognized exchanges or via the OTC markets, depending on management's assessment of the most favorable credit and market execution factors. Transactions executed in OTC markets have the potential for greater volatility and less liquidity than transactions on recognized exchanges. As a result, NEE and FPL may not be able to execute desired OTC transactions due to such heightened volatility and limited liquidity.

In the absence of actively quoted market prices and pricing information from external sources, the valuation of derivative instruments involves management's judgment and use of estimates. As a result, changes in the underlying assumptions or use of alternative valuation methods could affect the reported fair value of these derivative instruments and have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE and FPL may be materially adversely affected by negative publicity.

From time to time, political and public sentiment may result in a significant amount of adverse press coverage and other adverse public statements affecting NEE and FPL. Adverse press coverage and other adverse statements, whether or not driven by political or public sentiment, may also result in investigations by regulators, legislators and law enforcement officials or in legal claims. Responding to these investigations and lawsuits, regardless of the ultimate outcome of the proceeding, can divert the time and effort of senior management from NEE's and FPL's business.

Addressing any adverse publicity, governmental scrutiny or enforcement or other legal proceedings is time consuming and expensive and, regardless of the factual basis for the assertions being made, can have a negative impact on the reputation of NEE and FPL, on the morale and performance of their employees and on their relationships with their respective regulators. It may also have a negative impact on their ability to take timely advantage of various business and market opportunities. The direct and indirect effects of negative publicity, and the demands of responding to and addressing it, may have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's and FPL's business, financial condition, results of operations and prospects may be materially adversely affected if FPL is unable to maintain, negotiate or renegotiate franchise agreements on acceptable terms with municipalities and counties in Florida.

FPL must negotiate franchise agreements with municipalities and counties in Florida to provide electric services within such municipalities and counties, and electricity sales generated pursuant to these agreements represent a very substantial portion of FPL's revenues. If FPL is unable to maintain, negotiate or renegotiate such franchise agreements on acceptable terms, it could contribute to lower earnings and FPL may not fully realize the anticipated benefits from significant investments and expenditures, which could materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.

Increasing costs associated with health care plans may materially adversely affect NEE's and FPL's results of operations.

The costs of providing health care benefits to employees and retirees have increased substantially in recent years. NEE and FPL anticipate that their employee benefit costs, including, but not limited to, costs related to health care plans for employees and former employees, will continue to rise. The increasing costs and funding requirements associated with NEE's and FPL's health care plans may materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's and FPL's business, financial condition, results of operations and prospects could be negatively affected by the lack of a qualified workforce or the loss or retirement of key employees.

NEE and FPL may not be able to service customers, grow their business or generally meet their other business plan goals effectively and profitably if they do not attract and retain a qualified workforce. Additionally, the loss or retirement of key executives and other employees may materially adversely affect service and productivity and contribute to higher training and safety costs.

Over the next several years, a significant portion of NEE's and FPL's workforce, including, but not limited to, many workers with specialized skills maintaining and servicing the nuclear generation facilities and electrical infrastructure, will be eligible to retire. Such highly skilled individuals may not be able to be replaced quickly due to the technically complex work they perform. If a significant amount of such workers retire and are not replaced, the subsequent loss in productivity and increased recruiting and training costs could result in a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected by work strikes or stoppages and increasing personnel costs.

Employee strikes or work stoppages could disrupt operations and lead to a loss of revenue and customers. Personnel costs may also increase due to inflationary or competitive pressures on payroll and benefits costs and revised terms of collective bargaining agreements with union employees. These consequences could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's ability to successfully identify, complete and integrate acquisitions is subject to significant risks, including, but not limited to, the effect of increased competition for acquisitions resulting from the consolidation of the power industry.

NEE is likely to encounter significant competition for acquisition opportunities that may become available as a result of the consolidation of the power industry in general. In addition, NEE may be unable to identify attractive acquisition opportunities at favorable prices and to complete and integrate them successfully and in a timely manner.

NEP's acquisitions may not be completed and, even if completed, NEE may not realize the anticipated benefits of any acquisitions, which could materially adversely affect NEE's business, financial condition, results of operations and prospects.

NEE may not realize the anticipated benefits from the Texas pipeline business. Although NEP has made a number of acquisitions of wind and solar generation projects, the Texas pipeline business is the first third party acquisition by NEP and is NEP's first acquisition of natural gas pipeline assets.

In the future NEP may make additional acquisitions of assets which are inherently risky and NEE may not realize the anticipated benefits of any acquisitions, which could materially adversely affect NEE's business, financial condition, results of operations and prospects.

Nuclear Generation Risks

The construction, operation and maintenance of NEE's and FPL's nuclear generation facilities involve environmental, health and financial risks that could result in fines or the closure of the facilities and in increased costs and capital expenditures.

NEE's and FPL's nuclear generation facilities are subject to environmental, health and financial risks, including, but not limited to, those relating to site storage of spent nuclear fuel, the disposition of spent nuclear fuel, leakage and emissions of tritium and other radioactive elements in the event of a nuclear accident or otherwise, the threat of a terrorist attack and other potential liabilities arising out of the ownership or operation of the facilities. NEE and FPL maintain decommissioning funds and external insurance coverage which are intended to reduce the financial exposure to some of these risks; however, the cost of decommissioning nuclear generation facilities could exceed the amount available in NEE's and FPL's decommissioning funds, and the exposure to liability and property damages could exceed the amount of insurance coverage. If NEE or FPL is unable to recover the additional costs incurred through insurance or, in the case of FPL, through regulatory mechanisms, their business, financial condition, results of operations and prospects could be materially adversely affected.

In the event of an incident at any nuclear generation facility in the U.S. or at certain nuclear generation facilities in Europe, NEE and FPL could be assessed significant retrospective assessments and/or retrospective insurance premiums as a result of their participation in a secondary financial protection system and nuclear insurance mutual companies.

Liability for accidents at nuclear power plants is governed by the Price-Anderson Act, which limits the liability of nuclear reactor owners to the amount of insurance available from both private sources and an industry retrospective payment plan. In accordance with this Act, NEE maintains $375 million of private liability insurance per site, which is the maximum obtainable, and participates in a secondary financial protection system, which provides up to $13.1 billion of liability insurance coverage per incident at any nuclear reactor in the U.S. Under the secondary financial protection system, NEE is subject to retrospective assessments and/or retrospective insurance premiums of up to $1.0 billion ($509 million for FPL), plus any applicable taxes, per incident at any nuclear reactor in the U.S. or at certain nuclear generation facilities in Europe, regardless of fault or proximity to the incident, payable at a rate not to exceed $152 million ($76 million for FPL) per incident per year. Such assessments, if levied, could materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.

NRC orders or new regulations related to increased security measures and any future safety requirements promulgated by the NRC could require NEE and FPL to incur substantial operating and capital expenditures at their nuclear generation facilities.

The NRC has broad authority to impose licensing and safety-related requirements for the operation and maintenance of nuclear generation facilities, the addition of capacity at existing nuclear generation facilities and the construction of nuclear generation facilities, and these requirements are subject to change. In the event of non-compliance, the NRC has the authority to impose fines or shut down a nuclear generation facility, or to take both of these actions, depending upon its assessment of the severity of the situation, until compliance is achieved. Any of the foregoing events could require NEE and FPL to incur increased costs and capital expenditures, and could reduce revenues.

Any serious nuclear incident occurring at a NEE or FPL plant could result in substantial remediation costs and other expenses. A major incident at a nuclear facility anywhere in the world could cause the NRC to limit or prohibit the operation or licensing of any domestic nuclear generation facility. An incident at a nuclear facility anywhere in the world also could cause the NRC to impose

additional conditions or other requirements on the industry, or on certain types of nuclear generation units, which could increase costs, reduce revenues and result in additional capital expenditures.

The inability to operate any of NEER's or FPL's nuclear generation units through the end of their respective operating licenses could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

The operating licenses for NEE's and FPL's nuclear generation facilities extend through at least 2030. If the facilities cannot be operated for any reason through the life of those operating licenses, NEE or FPL may be required to increase depreciation rates, incur impairment charges and accelerate future decommissioning expenditures, any of which could materially adversely affect their business, financial condition, results of operations and prospects.

Various hazards posed to nuclear generation facilities, along with increased public attention to and awareness of such hazards, could result in increased nuclear licensing or compliance costs which are difficult or impossible to predict and could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

The threat of terrorist activity, as well as recent international events implicating the safety of nuclear facilities, could result in more stringent or complex measures to keep facilities safe from a variety of hazards, including, but not limited to, natural disasters such as earthquakes and tsunamis, as well as terrorist or other criminal threats. This increased focus on safety could result in higher compliance costs which, at present, cannot be assessed with any measure of certainty and which could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's and FPL's nuclear units are periodically removed from service to accommodate normal refueling and maintenance outages, and for other purposes. If planned outages last longer than anticipated or if there are unplanned outages, NEE's and FPL's results of operations and financial condition could be materially adversely affected.

NEE's and FPL's nuclear units are periodically removed from service to accommodate normal refueling and maintenance outages, including, but not limited to, inspections, repairs and certain other modifications. In addition, outages may be scheduled, often in connection with a refueling outage, to replace equipment, to increase the generating capacity at a particular nuclear unit, or for other purposes, and those planned activities increase the time the unit is not in operation. In the event that a scheduled outage lasts longer than anticipated or in the event of an unplanned outage due to, for example, equipment failure, such outages could materially adversely affect NEE's or FPL's business, financial condition, results of operations and prospects.

Liquidity, Capital Requirements and Common Stock Risks

Disruptions, uncertainty or volatility in the credit and capital markets may negatively affect NEE's and FPL's ability to fund their liquidity and capital needs and to meet their growth objectives, and can also materially adversely affect the results of operations and financial condition of NEE and FPL.

NEE and FPL rely on access to capital and credit markets as significant sources of liquidity for capital requirements and other operations requirements that are not satisfied by operating cash flows. Disruptions, uncertainty or volatility in those capital and credit markets, including, but not limited to, the conditions of the most recent financial crises in the U.S. and abroad, could increase NEE's and FPL's cost of capital. If NEE or FPL is unable to access regularly the capital and credit markets on terms that are reasonable, it may have to delay raising capital, issue shorter-term securities and incur an unfavorable cost of capital, which, in turn, could adversely affect its ability to grow its business, could contribute to lower earnings and reduced financial flexibility, and could have a material adverse effect on its business, financial condition, results of operations and prospects.

Although NEE's competitive energy subsidiaries have used non-recourse or limited-recourse, project-specific or other financing in the past, market conditions and other factors could adversely affect the future availability of such financing. The inability of NEE's subsidiaries, including, without limitation, NEECH and NEP and their respective subsidiaries, to access the capital and credit markets to provide project-specific or other financing for electric generation or other facilities or acquisitions on favorable terms, whether because of disruptions or volatility in those markets or otherwise, could necessitate additional capital raising or borrowings by NEE and/or NEECH in the future.

The inability of subsidiaries that have existing project-specific or other financing arrangements to meet the requirements of various agreements relating to those financings could give rise to a project-specific financing default which, if not cured or waived, might result in the specific project, and potentially in some limited instances its parent companies, being required to repay the associated debt or other borrowings earlier than otherwise anticipated, and if such repayment were not made, the lenders or security holders would generally have rights to foreclose against the project assets and related collateral. Such an occurrence also could result in NEE expending additional funds or incurring additional obligations over the shorter term to ensure continuing compliance with project-specific financing arrangements based upon the expectation of improvement in the project's performance or financial returns over the longer term. Any of these actions could materially adversely affect NEE's business, financial condition, results of operations and prospects, as well as the availability or terms of future financings for NEE or its subsidiaries.

NEE's, NEECH's and FPL's inability to maintain their current credit ratings may materially adversely affect NEE's and FPL's liquidity and results of operations, limit the ability of NEE and FPL to grow their business, and increase interest costs.

The inability of NEE, NEECH and FPL to maintain their current credit ratings could materially adversely affect their ability to raise capital or obtain credit on favorable terms, which, in turn, could impact NEE's and FPL's ability to grow their business and service indebtedness and repay borrowings, and would likely increase their interest costs. In addition, certain agreements and guarantee arrangements would require posting of additional collateral in the event of a ratings downgrade. Some of the factors that can affect credit ratings are cash flows, liquidity, the amount of debt as a component of total capitalization, NEE's overall business mix and political, legislative and regulatory actions. There can be no assurance that one or more of the ratings of NEE, NEECH and FPL will not be lowered or withdrawn entirely by a rating agency.

NEE's and FPL's liquidity may be impaired if their credit providers are unable to fund their credit commitments to the companies or to maintain their current credit ratings.

The inability of NEE's, NEECH's and FPL's credit providers to fund their credit commitments or to maintain their current credit ratings could require NEE, NEECH or FPL, among other things, to renegotiate requirements in agreements, find an alternative credit provider with acceptable credit ratings to meet funding requirements, or post cash collateral and could have a material adverse effect on NEE's and FPL's liquidity.

Poor market performance and other economic factors could affect NEE's defined benefit pension plan's funded status, which may materially adversely affect NEE's and FPL's business, financial condition, liquidity and results of operations and prospects.

NEE sponsors a qualified noncontributory defined benefit pension plan for substantially all employees of NEE and its subsidiaries. A decline in the market value of the assets held in the defined benefit pension plan due to poor investment performance or other factors may increase the funding requirements for this obligation.

NEE's defined benefit pension plan is sensitive to changes in interest rates, since, as interest rates decrease the funding liabilities increase, potentially increasing benefits costs and funding requirements. Any increase in benefits costs or funding requirements may have a material adverse effect on NEE's and FPL's business, financial condition, liquidity, results of operations and prospects.

Poor market performance and other economic factors could adversely affect the asset values of NEE's and FPL's nuclear decommissioning funds, which may materially adversely affect NEE's and FPL's liquidity and results of operations.

NEE and FPL are required to maintain decommissioning funds to satisfy their future obligations to decommission their nuclear power plants. A decline in the market value of the assets held in the decommissioning funds due to poor investment performance or other factors may increase the funding requirements for these obligations. Any increase in funding requirements may have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

Certain of NEE's investments are subject to changes in market value and other risks, which may materially adversely affect NEE's liquidity, financial results and results of operations.

NEE holds other investments where changes in the fair value affect NEE's financial results. In some cases there may be no observable market values for these investments, requiring fair value estimates to be based on other valuation techniques. This type of analysis requires significant judgment and the actual values realized in a sale of these investments could differ materially from those estimated. A sale of an investment below previously estimated value, or other decline in the fair value of an investment, could result in losses or the write-off of such investment, and may have a material adverse effect on NEE's liquidity, financial condition and results of operations.

NEE may be unable to meet its ongoing and future financial obligations and to pay dividends on its common stock if its subsidiaries are unable to pay upstream dividends or repay funds to NEE.

NEE is a holding company and, as such, has no material operations of its own. Substantially all of NEE's consolidated assets are held by its subsidiaries. NEE's ability to meet its financial obligations, including, but not limited to, its guarantees, and to pay dividends on its common stock is primarily dependent on its subsidiaries' net income and cash flows, which are subject to the risks of their respective businesses, and their ability to pay upstream dividends or to repay funds to NEE.

NEE's subsidiaries are separate legal entities and have no independent obligation to provide NEE with funds for its payment obligations. The subsidiaries have financial obligations, including, but not limited to, payment of debt service, which they must satisfy before they can provide NEE with funds. In addition, in the event of a subsidiary's liquidation or reorganization, NEE's right to participate in a distribution of assets is subject to the prior claims of the subsidiary's creditors.

The dividend-paying ability of some of the subsidiaries is limited by contractual restrictions which are contained in outstanding financing agreements and which may be included in future financing agreements. The future enactment of laws or regulations also may prohibit or restrict the ability of NEE's subsidiaries to pay upstream dividends or to repay funds.

NEE may be unable to meet its ongoing and future financial obligations and to pay dividends on its common stock if NEE is required to perform under guarantees of obligations of its subsidiaries.

NEE guarantees many of the obligations of its consolidated subsidiaries, other than FPL, through guarantee agreements with NEECH. These guarantees may require NEE to provide substantial funds to its subsidiaries or their creditors or counterparties at a time when NEE is in need of liquidity to meet its own financial obligations. Funding such guarantees may materially adversely affect NEE's ability to meet its financial obligations or to pay dividends.

NEP may not be able to access sources of capital on commercially reasonable terms, which would have a material adverse effect on its ability to consummate future acquisitions and on the value of NEE's limited partner interest in NEP OpCo.

NEE understands that NEP expects to finance acquisitions of clean energy projects partially or wholly through the issuance of additional common units. NEP needs to be able to access the capital markets on commercially reasonable terms when acquisition opportunities arise. NEP's ability to access the equity capital markets is dependent on, among other factors, the overall state of the capital markets and investor appetite for investment in clean energy projects in general and NEP's common units in particular. An inability to obtain equity financing on commercially reasonable terms could limit NEP's ability to consummate future acquisitions and to effectuate its growth strategy in the manner currently contemplated. Furthermore there may not be sufficient availability under NEP OpCo's subsidiaries' revolving credit facility or other financing arrangements on commercially reasonable terms when acquisition opportunities arise. If debt financing is available, it may be available only on terms that could significantly increase NEP's interest expense, impose additional or more restrictive covenants and reduce cash distributions to its unitholders. An inability to access sources of capital on commercially reasonable terms could significantly limit NEP's ability to consummate future acquisitions and to effectuate its growth strategy. NEP's inability to effectively consummate future acquisitions could have a material adverse effect on NEP's ability to grow its business and make cash distributions to its unitholders.

Through an indirect wholly owned subsidiary, NEE owns a limited partner interest in NEP OpCo. NEP's inability to access the capital markets on commercially reasonable terms and effectively consummate future acquisitions could have a material adverse effect on NEP's ability to grow its cash distributions to its unitholders, including NEE, and on the value of NEE's limited partnership interest in NEP OpCo.

Disruptions, uncertainty or volatility in the credit and capital markets may exert downward pressure on the market price of NEE's common stock.

The market price and trading volume of NEE's common stock are subject to fluctuations as a result of, among other factors, general credit and capital market conditions and changes in market sentiment regarding the operations, business and financing strategies of NEE and its subsidiaries. As a result, disruptions, uncertainty or volatility in the credit and capital markets may, for example, have a material adverse effect on the market price of NEE's common stock.

Item 1B. Unresolved Staff Comments

None

Item 2. Properties

NEE and its subsidiaries maintain properties which are adequate for their operations; the principal properties are described below.

Generation Facilities

FPL

At December 31, 2015, the electric generation, transmission, distribution and general facilities of FPL represented approximately 50%, 11%, 33% and 6%, respectively, of FPL's gross investment in electric utility plant in service and other property. At December 31, 2015, FPL had the following generation facilities:

FPL Facilities	Location	No. of Units	Fuel	Net Capability (MW)[a]
Fossil				
Combined-cycle				
Cape Canaveral	Cocoa, FL	1	Gas/Oil	1,210
Fort Myers	Fort Myers, FL	1	Gas	1,470
Lauderdale	Dania, FL	2	Gas/Oil	884
Manatee	Parrish, FL	1	Gas	1,141
Martin	Indiantown, FL	1	Gas/Oil/Solar Thermal	1,135 [b]
Martin	Indiantown, FL	2	Gas	938
Riviera	Riviera Beach, FL	1	Gas/Oil	1,212
Sanford	Lake Monroe, FL	2	Gas	2,010
Turkey Point	Florida City, FL	1	Gas/Oil	1,187
West County	West Palm Beach, FL	3	Gas/Oil	3,657
Steam turbines				
Cedar Bay	Jacksonville, FL	1	Coal	250
Manatee	Parrish, FL	2	Gas/Oil	1,618
Martin	Indiantown, FL	2	Gas/Oil	1,626
St. Johns River Power Park	Jacksonville, FL	2	Coal/Petroleum Coke	254 [c]
Scherer	Monroe County, GA	1	Coal	634 [d]
Turkey Point	Florida City, FL	1	Gas/Oil	396
Simple-cycle combustion turbines				
Fort Myers	Fort Myers, FL	2	Gas/Oil	314
Gas turbines				
Fort Myers	Fort Myers, FL	11	Oil	594
Lauderdale	Dania, FL	24	Gas/Oil	824
Port Everglades	Port Everglades, FL	12	Gas/Oil	412
Nuclear				
St. Lucie	Hutchinson Island, FL	2	Nuclear	1,821 [e]
Turkey Point	Florida City, FL	2	Nuclear	1,632
Solar PV				
DeSoto	Arcadia, FL	1	Solar PV	25
Space Coast	Cocoa, FL	1	Solar PV	10
TOTAL				25,254 [f]

(a) Represents FPL's net ownership interest in warm weather peaking capability.
(b) The megawatts generated by the 75 MW solar thermal hybrid facility replace steam produced by this unit and therefore are not incremental.
(c) Represents FPL's 20% ownership interest in each of SJRPP Units Nos. 1 and 2, which are jointly owned with JEA.
(d) Represents FPL's approximately 76% ownership of Scherer Unit No. 4, which is jointly owned with JEA.
(e) Excludes Orlando Utilities Commission's and the Florida Municipal Power Agency's combined share of approximately 15% of St. Lucie Unit No. 2.
(f) Substantially all of FPL's properties are subject to the lien of FPL's mortgage.

NEER

At December 31, 2015, NEER had the following generation facilities (see Item 1. Business - II. NEER - Generation and Other Operations - Contracted, Merchant and Other Operations for definition of contracted and merchant facilities):

NEER Facilities	Location	Fuel	Net Capability (MW)[a]
Contracted			
Adelaide Wind[b]	Middlesex County, Ontario, Canada	Wind	60
Ashtabula Wind[b][c]	Barnes County, ND	Wind	148
Ashtabula Wind II[c]	Griggs & Steele Counties, ND	Wind	120
Ashtabula Wind III[b][d]	Barnes County, ND	Wind	62
Baldwin Wind[b][d]	Burleigh County, ND	Wind	102
Blackwell Wind[c][e]	Kay County, OK	Wind	60
Bluewater Wind[b][d]	Huron County, Ontario, Canada	Wind	60
Bornish Wind[b]	Middlesex County, Ontario, Canada	Wind	73
Breckinridge[c]	Garfield County, OK	Wind	98
Buffalo Ridge	Lincoln County, MN	Wind	26
Butler Ridge Wind[b][c]	Dodge County, WI	Wind	54
Cabazon[b]	Riverside County, CA	Wind	39
Carousel Wind[c]	Kit Carson County, CO	Wind	150
Cedar Bluff Wind[c]	Ellis, Ness, Rush & Trego Counties, KS	Wind	198
Cerro Gordo[b]	Cerro Gordo County, IA	Wind	41
Cimarron[b]	Gray County, KS	Wind	166
Conestogo Wind[b][d]	Wellington County, Ontario, Canada	Wind	23
Crystal Lake I[b][c]	Hancock County, IA	Wind	150
Crystal Lake II[f]	Winnebago County, IA	Wind	200
Crystal Lake III[f]	Winnebago County, IA	Wind	66
Day County Wind[b]	Day County, SD	Wind	99
Diablo Wind[b]	Alameda County, CA	Wind	20
East Durham Wind	Grey County, Ontario, Canada	Wind	22
Elk City Wind[b][d]	Roger Mills & Beckham Counties, OK	Wind	99
Elk City Wind II	Roger Mills & Beckham Counties, OK	Wind	101
Endeavor Wind	Osceola County, IA	Wind	100
Endeavor Wind II	Osceola County, IA	Wind	50
Ensign Wind	Gray County, KS	Wind	99
Ghost Pine Wind	Kneehill County, Alberta, Canada	Wind	82
Golden Hills Wind[c]	Alameda County, CA	Wind	86
Golden West Wind[c]	El Paso County, CO	Wind	249
Goshen[b]	Huron County, Ontario, Canada	Wind	102
Gray County	Gray County, KS	Wind	112
Green Power	Riverside County, CA	Wind	17
Hancock County[b]	Hancock County, IA	Wind	98
High Winds[b]	Solano County, CA	Wind	162
Indian Mesa	Pecos County, TX	Wind	83
Javelina Wind[b]	Webb County, TX	Wind	250
Jericho Wind[b][d]	Lambton & Middlesex Counties, Ontario, Canada	Wind	149
King Mountain[b][f]	Upton County, TX	Wind	278
Lake Benton II[b]	Pipestone County, MN	Wind	103
Langdon Wind[b][c]	Cavalier County, ND	Wind	118
Langdon Wind II[b][c]	Cavalier County, ND	Wind	41
Lee / DeKalb Wind	Lee & DeKalb Counties, IL	Wind	217

Wolf Ridge Wind[c][e]	Cooke County, TX	Wind	112
Total Merchant Wind			1,843
Paradise Solar	West Deptford, NJ	Solar PV	5
Forney[b]	Forney, TX	Gas	1,824 [i]
Lamar Power Partners[b]	Paris, TX	Gas	1,060 [i]
Marcus Hook 50	Marcus Hook, PA	Gas	50
Investment in joint venture - Sayreville	Sayreville, NJ	Gas	145
Total Merchant Natural Gas			3,079
Nuclear - Seabrook	Seabrook, NH	Nuclear	1,100 [j]
Maine - Cape, Wyman	Various - ME	Oil	796 [k]
Total Merchant			6,823
Total Generating Capability			21,140
Noncontrolling Interest			(480)
Total Net Generating Capability			20,660

(a) Represents NEER's net ownership interest in plant capacity.
(b) These generation facilities are encumbered by liens against their assets securing various financings.
(c) NEER owns these wind facilities together with third-party investors with differential membership interests. See Note 1 - Sale of Differential Membership Interests.
(d) These generation facilities are part of the NEP portfolio and subject to an approximately 23.2% noncontrolling interest.
(e) Various financings are secured by the pledge of NEER's membership interests in the entities owning these wind facilities.
(f) These generation facilities have approximately 325 MW of generating capacity that is not fully committed under long-term contracts.
(g) NEP owns an approximately 50% equity method investment in these solar projects. See Note 9 - NEER.
(h) Excludes Central Iowa Power Cooperative and Corn Belt Power Cooperative's combined share of 30%.
(i) See Note 1 - Assets and Liabilities Associated with Assets Held for Sale for discussion of the pending sale of these facilities.
(j) Excludes Massachusetts Municipal Wholesale Electric Company's, Taunton Municipal Lighting Plant's and Hudson Light & Power Department's combined share of 11.77%.
(k) Excludes six other energy-related partners' combined share of 16%.

Transmission and Distribution

At December 31, 2015, FPL owned and operated 601 substations and the following electric transmission and distribution lines:

Nominal Voltage	Overhead Lines Circuit/Pole Miles	Trench and Submarine Cables Miles
500 kV	1,106 (a)	—
230 kV	3,197	25
138 kV	1,581	52
115 kV	758	—
69 kV	164	14
Total circuit miles	6,806	91
Less than 69 kV (pole miles)	42,301	25,506

(a) Includes approximately 75 miles owned jointly with JEA.

At December 31, 2015, NEER owned and operated 182 substations and approximately 1,098 circuit miles of transmission lines ranging from 69 kV to 345 kV and NEET owned and operated 6 substations and approximately 624 circuit miles of 345 kV transmission lines.

See Item 1. Business - NEER - Generation and Other Operations - Natural Gas Pipelines for a description of NEER's natural gas pipelines in operation.

Character of Ownership

Substantially all of FPL's properties are subject to the lien of FPL's mortgage, which secures most debt securities issued by FPL. The majority of FPL's real property is held in fee and is free from other encumbrances, subject to minor exceptions which are not of a nature as to substantially impair the usefulness to FPL of such properties. Some of FPL's electric lines are located on parcels of land which are not owned in fee by FPL but are covered by necessary consents of governmental authorities or rights obtained from owners of private property. The majority of NEER's generation facilities, pipeline facilities and transmission assets are owned by NEER subsidiaries and a number of those facilities and assets, including all of the Texas pipelines, are encumbered by liens securing various financings. Additionally, the majority of NEER's generation facilities, pipeline facilities and transmission lines are located on land leased or under easement from owners of private property. The majority of NEET's transmission assets are encumbered by liens securing financings and the majority of its transmission lines are located on land leased or under easement from owners of private property. See Generation Facilities and Note 1 - Electric Plant, Depreciation and Amortization.

Item 3. Legal Proceedings

NEE and FPL are parties to various legal and regulatory proceedings in the ordinary course of their respective businesses. For information regarding legal proceedings that could have a material adverse effect on NEE or FPL, see Note 14 - Legal Proceedings. Such descriptions are incorporated herein by reference.

Item 4. Mine Safety Disclosures

Not applicable

PART II

Item 5. Market for Registrants' Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Common Stock Data. All of FPL's common stock is owned by NEE. NEE's common stock is traded on the New York Stock Exchange under the symbol "NEE." The high and low sales prices for the common stock of NEE as reported in the consolidated transaction reporting system of the New York Stock Exchange and the cash dividends per share declared for each quarter during the past two years are as follows:

	2015			2014		
Quarter	High	Low	Cash Dividends	High	Low	Cash Dividends
First	$ 112.64	$ 97.48	$ 0.77	$ 96.13	$ 83.97	$ 0.725
Second	$ 106.63	$ 97.23	$ 0.77	$ 102.51	$ 93.28	$ 0.725
Third	$ 109.98	$ 93.74	$ 0.77	$ 102.46	$ 91.79	$ 0.725
Fourth	$ 105.85	$ 95.84	$ 0.77	$ 110.84	$ 90.33	$ 0.725

The amount and timing of dividends payable on NEE's common stock are within the sole discretion of NEE's Board of Directors. The Board of Directors reviews the dividend rate at least annually (generally in February) to determine its appropriateness in light of NEE's financial position and results of operations, legislative and regulatory developments affecting the electric utility industry in general and FPL in particular, competitive conditions, change in business mix and any other factors the Board of Directors deems relevant. The ability of NEE to pay dividends on its common stock is dependent upon, among other things, dividends paid to it by its subsidiaries. There are no restrictions in effect that currently limit FPL's ability to pay dividends to NEE. In February 2016, NEE announced that it would increase its quarterly dividend on its common stock from $0.77 per share to $0.87 per share. See Management's Discussion - Liquidity and Capital Resources - Covenants with respect to dividend restrictions and Note 11 - Common Stock Dividend Restrictions regarding dividends paid by FPL to NEE.

As of the close of business on January 31, 2016, there were 20,919 holders of record of NEE's common stock.

Issuer Purchases of Equity Securities. Information regarding purchases made by NEE of its common stock during the three months ended December 31, 2015 is as follows:

Period	Total Number of Shares Purchased[a]	Average Price Paid Per Share	Total Number of Shares Purchased as Part of a Publicly Announced Program	Maximum Number of Shares that May Yet be Purchased Under the Program[b]
10/1/2015 - 10/31/15	—	—	—	13,274,748
11/1/2015 - 11/30/15	2,487	$ 100.43	—	13,274,748
12/1/2015 - 12/31/15	1,063	$ 98.01	—	13,274,748
Total	3,550	$ 99.71	—	

(a) Includes: (1) in November 2015, shares of common stock withheld from employees to pay certain withholding taxes upon the vesting of stock awards granted to such employees under the NextEra Energy, Inc. Amended and Restated 2011 Long Term Incentive Plan; and (2) in December 2015, shares of common stock withheld from employees to pay certain withholding taxes upon the vesting of stock awards granted to such employees under the NextEra Energy, Inc. Amended and Restated Long-Term Incentive Plan (former LTIP) and shares of common stock purchased as a reinvestment of dividends by the trustee of a grantor trust in connection with NEE's obligation under a February 2006 grant under the former LTIP to an executive officer of deferred retirement share awards.

(b) In February 2005, NEE's Board of Directors authorized common stock repurchases of up to 20 million shares of common stock over an unspecified period, which authorization was most recently reaffirmed and ratified by the Board of Directors in July 2011.

Item 6. Selected Financial Data

	Years Ended December 31,				
	2015	2014	2013	2012	2011
SELECTED DATA OF NEE (millions, except per share amounts):					
Operating revenues	**$ 17,486**	$ 17,021	$ 15,136	$ 14,256	$ 15,341
Income from continuing operations[a]	**$ 2,762**	$ 2,469	$ 1,677	$ 1,911	$ 1,923
Net income[a][b]	**$ 2,762**	$ 2,469	$ 1,908	$ 1,911	$ 1,923
Net income attributable to NEE:					
Income from continuing operations[a]	**$ 2,752**	$ 2,465	$ 1,677	$ 1,911	$ 1,923
Gain from discontinued operations[b]	**—**	—	231	—	—
Total	**$ 2,752**	$ 2,465	$ 1,908	$ 1,911	$ 1,923
Earnings per share attributable to NEE - basic:					
Continuing operations[a]	**$ 6.11**	$ 5.67	$ 3.95	$ 4.59	$ 4.62
Net income[a][b]	**$ 6.11**	$ 5.67	$ 4.50	$ 4.59	$ 4.62
Earnings per share attributable to NEE - assuming dilution:					
Continuing operations[a]	**$ 6.06**	$ 5.60	$ 3.93	$ 4.56	$ 4.59
Net income[a][b]	**$ 6.06**	$ 5.60	$ 4.47	$ 4.56	$ 4.59
Dividends paid per share of common stock	**$ 3.08**	$ 2.90	$ 2.64	$ 2.40	$ 2.20
Total assets[c][d]	**$ 82,479**	$ 74,605	$ 69,007	$ 64,144	$ 56,933
Long-term debt, excluding current maturities[d]	**$ 26,681**	$ 24,044	$ 23,670	$ 22,881	$ 20,555
SELECTED DATA OF FPL (millions):					
Operating revenues	**$ 11,651**	$ 11,421	$ 10,445	$ 10,114	$ 10,613
Net income	**$ 1,648**	$ 1,517	$ 1,349	$ 1,240	$ 1,068
Total assets[d]	**$ 42,523**	$ 39,222	$ 36,420	$ 34,786	$ 31,759
Long-term debt, excluding current maturities[d]	**$ 9,956**	$ 9,328	$ 8,405	$ 8,262	$ 7,427
Energy sales (kWh)	**120,032**	113,196	107,643	105,109	106,662
Energy sales:					
Residential	**49.0%**	48.8%	50.1%	50.8%	51.2%

Other	**4**	4	3	3	3
Total	**4,775**	4,709	4,627	4,576	4,547
Average price billed to customers (cents per kWh)	**9.48**	9.97	9.47	9.51	9.83

(a) Includes net unrealized mark-to-market after-tax gains (losses) associated with non-qualifying hedges of approximately $183 million, $153 million, $(53) million, $(34) million and $190 million, respectively. Also, on an after-tax basis, 2013 includes impairment and other charges related to the Spain Solar projects of approximately $342 million and 2011 includes loss on the sale of natural gas-fired generation assets of approximately $98 million. See Management's Discussion - Overview - Adjusted Earnings.

(b) 2013 includes an after-tax gain from discontinued operations of $231 million. See Note 6.

(c) Includes assets held for sale of approximately $1,009 million in 2015 and $335 million in 2012. See Note 1 - Assets and Liabilities Associated with Assets Held for Sale.

(d) Reflects reclassification of debt issuance costs for 2011 through 2014. See Note 1 - Debt Issuance Costs.

(e) Includes the net change in unbilled sales.

(f) Winter season includes November and December of the current year and January to March of the following year (for 2015, through February 19, 2016).

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

NEE's operating performance is driven primarily by the operations of its two principal subsidiaries, FPL, which serves approximately 4.8 million customer accounts in Florida and is one of the largest rate-regulated electric utilities in the U.S., and NEER, which together with affiliated entities is the largest generator in North America of renewable energy from the wind and sun based on MWh produced. The table below presents net income (loss) attributable to NEE and earnings (loss) per share, assuming dilution, attributable to NEE by reportable segment - FPL and NEER, and by Corporate and Other, which is primarily comprised of the operating results of NEET, FPL FiberNet and other business activities, as well as other income and expense items, including interest expense, income taxes and eliminating entries (see Note 15 for additional segment information, including reported results from continuing operations). The following discussions should be read in conjunction with the Notes to Consolidated Financial Statements contained herein and all comparisons are with the corresponding items in the prior year.

	Net Income (Loss) Attributable to NEE			Earnings (Loss) Per Share, assuming dilution		
	Years Ended December 31,			Years Ended December 31,		
	2015	2014	2013	**2015**	2014	2013
	(millions)					
FPL	**$ 1,648**	$ 1,517	$ 1,349	**$ 3.63**	$ 3.45	$ 3.16
NEER[a][b]	**1,092**	989	556	**2.41**	2.25	1.30
Corporate and Other[b]	**12**	(41)	3	**0.02**	(0.10)	0.01
NEE	**$ 2,752**	$ 2,465	$ 1,908	**$ 6.06**	$ 5.60	$ 4.47

(a) NEER's results reflect an allocation of interest expense from NEECH based on a deemed capital structure of 70% debt and allocated shared service costs.
(b) NEER's and Corporate and Other's results for 2014 and 2013 were retrospectively adjusted to reflect a segment change as further discussed in Note 15.

During 2014, NEP, through NEER, was formed to acquire, manage and own contracted clean energy projects with stable, long-term cash flows through a limited partner interest in NEP OpCo. On July 1, 2014, NEP completed its IPO as further described in Note 1 - NextEra Energy Partners, LP. See Item 1. Business - II. NEER. In December 2014, NEE and HEI announced a proposed merger. See Item 1. Business - Overview.

For the five years ended December 31, 2015, NEE delivered a total shareholder return of approximately 137.0%, above the S&P 500's 80.8% return, the S&P 500 Utilities' 68.8% return and the Dow Jones U.S. Electricity's 61.7% return. The historical stock performance of NEE's common stock shown in the performance graph below is not necessarily indicative of future stock price performance.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN*

	12/10	12/11	12/12	12/13	12/14	12/15
NextEra Energy, Inc.	100.00	121.86	143.69	183.89	235.23	236.98
S&P 500	100.00	102.11	118.45	156.82	178.29	180.75
S&P 500 Utilities	100.00	119.91	121.46	137.51	177.36	168.77
Dow Jones US Electricity	100.00	117.73	118.93	132.81	170.96	161.74

*$100 invested on 12/31/10 in stock or index, including reinvestment of dividends.
Fiscal year ending December 31.

Adjusted Earnings

NEE prepares its financial statements under GAAP. However, management uses earnings excluding certain items (adjusted earnings), a non-GAAP financial measure, internally for financial planning, for analysis of performance, for reporting of results to the Board of Directors and as an input in determining performance-based compensation under NEE's employee incentive compensation plans. NEE also uses adjusted earnings when communicating its financial results and earnings outlook to analysts and investors. NEE's management believes adjusted earnings provides a more meaningful representation of the company's fundamental earnings power. Although the excluded amounts are properly included in the determination of net income under GAAP, management believes that the amount and/or nature of such items make period to period comparisons of operations difficult and potentially confusing. Adjusted earnings do not represent a substitute for net income, as prepared under GAAP.

Adjusted earnings exclude the unrealized mark-to-market effect of non-qualifying hedges (as described below) and OTTI losses on securities held in NEER's nuclear decommissioning funds, net of the reversal of previously recognized OTTI losses on securities sold and losses on securities where price recovery was deemed unlikely (collectively, OTTI reversals). However, other adjustments may be made from time to time with the intent to provide more meaningful and comparable results of ongoing operations.

NEE and NEER segregate into two categories unrealized mark-to-market gains and losses on derivative transactions. The first category, referred to as non-qualifying hedges, represents certain energy derivative transactions and certain interest rate derivative transactions entered into as economic hedges, which do not meet the requirements for hedge accounting, or for which hedge accounting treatment is not elected or has been discontinued. Changes in the fair value of those transactions are marked to market and reported in the consolidated statements of income, resulting in earnings volatility because the economic offset to the positions are not marked to market. As a consequence, NEE's net income reflects only the movement in one part of economically-linked transactions. For example, a gain (loss) in the non-qualifying hedge category for certain energy derivatives is offset by decreases (increases) in the fair value of related physical asset positions in the portfolio or contracts, which are not marked to market under GAAP. For this reason, NEE's management views results expressed excluding the unrealized mark-to-market impact of the non-qualifying hedges as a meaningful measure of current period performance. The second category, referred to as trading activities, which is included in adjusted earnings, represents the net unrealized effect of actively traded positions entered into to take advantage of expected market price movements and all other commodity hedging activities. In January 2016, NEE discontinued hedge accounting for all of its remaining interest rate and foreign currency derivative instruments, which could result in increased volatility in the non-qualifying hedge category in the future. At FPL, substantially all changes in the fair value of energy derivative transactions are deferred as a regulatory asset or liability until the contracts are settled, and, upon settlement, any gains or losses are passed through the fuel clause. See Note 3.

In 2013, an after-tax gain from discontinued operations of $231 million ($216 million recorded at NEER and $15 million recorded at Corporate and Other) was recorded in NEE's consolidated statements of income related to the sale of its ownership interest in a portfolio of hydropower generation plants and related assets located in Maine and New Hampshire (see Note 6). In addition, during 2013, an after-tax loss of $43 million ($41 million recorded at NEER and $2 million recorded at Corporate and Other) was recorded associated with the decision to pursue the sale of NEER's ownership interests in oil-fired generation plants located in Maine (Maine fossil). During 2014, NEER decided not to pursue the sale of Maine fossil and recorded an after-tax gain of $12 million to increase Maine fossil's carrying value to its estimated fair value. See Note 4 - Nonrecurring Fair Value Measurements. Also in 2013, NEER recorded an impairment of $300 million and other related charges ($342 million after-tax) related to the Spain solar projects in NEE's consolidated statements of income. See Note 4 - Nonrecurring Fair Value Measurements In order to make period to period comparisons more meaningful, adjusted earnings also exclude the items discussed above, as well as costs incurred in 2015 associated with the proposed merger pursuant to which, if consummated, Hawaiian Electric Company, Inc. will become a wholly owned subsidiary of NEE (see Note 1 - Proposed Merger) and, beginning in the third quarter of 2013, the after-tax operating results associated with the Spain solar projects.

The following table provides details of the adjustments to net income considered in computing NEE's adjusted earnings discussed above.

	Years Ended December 31,		
	2015	2014	2013
		(millions)	
Net unrealized mark-to-market after-tax gains (losses) from non-qualifying hedge activity[a]	$ 183	$ 153	$ (53)
Income (loss) from OTTI after-tax losses on securities held in NEER's nuclear decommissioning funds, net of OTTI reversals[b]	$ (15)	$ (2)	$ 1
After-tax gain from discontinued operations[c]	$ —	$ —	$ 231
After-tax gain (loss) associated with Maine fossil[d]	$ —	$ 12	$ (43)
After-tax charges recorded by NEER associated with the impairment of the Spain solar projects	$ —	$ —	$ (342)
After-tax operating results of NEER's Spain solar projects	$ 5	$ (32)	$ (4)
After-tax merger-related expenses - Corporate and Other	$ (20)	$ —	$ —

(a) For 2015, 2014 and 2013, approximately $175 million of gains, $171 million of gains and $54 million of losses, respectively, are included in NEER's net income; the balance is included in Corporate and Other.
(b) For 2015, 2014 and 2013, approximately $14 million of losses, $1 million of income and $1 million of income, respectively, are included in NEER's net income; the balance is included in Corporate and Other.
(c) For 2013, approximately $216 million of the gain is included in NEER's net income; the balance is included in Corporate and Other.
(d) For 2014, all of the gain is included in NEER's net income. For 2013, approximately $41 million of the loss is included in NEER's net income; the balance is included in Corporate and Other.

The change in unrealized mark-to-market activity from non-qualifying hedges is primarily attributable to changes in forward power and natural gas prices and interest rates, as well as the reversal of previously recognized unrealized mark-to-market gains or losses as the underlying transactions were realized.

2015 Summary

Net income attributable to NEE for 2015 was higher than 2014 by $287 million, or $0.46 per share, assuming dilution, due to higher results at FPL, NEER and Corporate and Other.

FPL's increase in net income in 2015 was primarily driven by continued investments in plant in service while earning an 11.50% regulatory ROE on its retail rate base and higher AFUDC - equity related to construction projects. In 2015, FPL's average typical residential 1,000 kWh bill was the lowest among reporting electric utilities within Florida and approximately 30% below the national average based on a rate per kWh as of July 2015.

NEER's results increased in 2015 reflecting earnings from new investments, higher customer supply and proprietary power and gas trading results as well as the absence of the 2014 NEP-related charge and costs, partly offset by higher growth-related interest and general and administrative expenses and lower results from the existing assets. In 2015, NEER added approximately 1,207 MW of wind capacity in the U.S. and Canada and 285 MW of solar capacity in the U.S., and increased its backlog of contracted renewable development projects. Additionally, a subsidiary of NEP completed the acquisition of the Texas pipeline assets. During the fourth quarter of 2015, the natural gas pipeline projects that were previously reported in Corporate and Other were moved to the NEER segment (see Note 15).

In November 2015, a subsidiary of NEER entered into an agreement to sell its ownership interest in its merchant natural gas generation facilities located in Texas which have a total generating capacity of 2,884 MW at December 31, 2015. See Note 1 - Assets and Liabilities Associated with Assets Held for Sale.

Corporate and Other's results in 2015 increased primarily due to favorable income tax adjustments, 2015 investment gains compared to 2014 investment losses and the absence of debt reacquisition losses recorded in 2014. These positives were partly offset by costs associated with the proposed merger.

NEE and its subsidiaries, including FPL, require funds to support and grow their businesses. These funds are primarily provided by cash flow from operations, borrowings or issuances of short- and long-term debt and proceeds from differential membership investors and, from time to time, issuance of equity securities. As of December 31, 2015, NEE's total net available liquidity was approximately $7.7 billion, of which FPL's portion was approximately $3.1 billion.

RESULTS OF OPERATIONS

Net income attributable to NEE for 2015 was $2.75 billion, compared to $2.47 billion in 2014 and $1.91 billion in 2013. In 2015, net income attributable to NEE improved due to higher results at FPL, NEER and Corporate and Other. In 2014, net income attributable to NEE improved due to higher results at FPL and NEER partly offset by lower results at Corporate and Other.

NEE's effective income tax rate for all periods presented reflects the benefit of PTCs for NEER's wind projects, as well as ITCs and deferred income tax benefits associated with convertible ITCs for solar and certain wind projects at NEER. PTCs, ITCs and deferred income tax benefits associated with convertible ITCs can significantly affect NEE's effective income tax rate depending on the amount of pretax income. The amount of PTCs recognized can be significantly affected by wind generation and by the roll off of PTCs on certain wind projects after ten years of production (PTC roll off). In addition, NEE's effective income tax rate for 2014 was unfavorably affected by a noncash income tax charge of approximately $45 million associated with structuring Canadian assets in connection with the creation of NEP and for 2013 was unfavorably affected by the establishment of a full valuation allowance on the deferred tax assets associated with the Spain solar projects. See Note 1 - Income Taxes and - Sale of Differential Membership Interests, Note 4 - Nonrecurring Fair Value Measurements and Note 5. Also see Item 1. Business - NEER - Generation and Other Operations - NEER Fuel/Technology Mix - Policy Incentives for Renewable Energy Projects.

FPL: Results of Operations

FPL obtains its operating revenues primarily from the sale of electricity to retail customers at rates established by the FPSC through base rates and cost recovery clause mechanisms. FPL's net income for 2015, 2014 and 2013 was $1,648 million, $1,517 million and $1,349 million, respectively, representing an increase in 2015 of $131 million and an increase in 2014 of $168 million.

The use of reserve amortization is permitted under the 2012 rate agreement. See Item 1. Business - FPL - FPL Regulation - FPL Rate Regulation - Base Rates for additional information on the 2012 rate agreement. In order to earn a targeted regulatory ROE, subject to limitations associated with the 2012 rate agreement, reserve amortization is calculated using a trailing thirteen-month average of retail rate base and capital structure in conjunction with the trailing twelve months regulatory retail base net operating income, which primarily includes the retail base portion of base and other revenues, net of O&M, depreciation and amortization, interest and tax expenses. In general, the net impact of these income statement line items is adjusted, in part, by reserve amortization to earn a targeted regulatory ROE. In certain periods, reserve amortization must be reversed so as not to exceed the targeted regulatory ROE. The drivers of FPL's net income not reflected in the reserve amortization calculation typically include wholesale and transmission service revenues and expenses, cost recovery clause revenues and expenses, AFUDC - equity and costs not allowed to be recovered from retail customers by the FPSC. In 2015 and 2014, FPL recorded the reversal of reserve amortization of approximately $15 million and $33 million, respectively, and, in 2013, FPL recorded reserve amortization of $155 million.

FPL's regulatory ROE for 2015 and 2014 was 11.50%, compared to 10.96% in 2013. The 2013 regulatory ROE of 10.96% reflects approximately $32 million of after-tax charges associated with the cost savings initiative. These charges were not offset by additional reserve amortization. Excluding the impact of these charges, FPL's regulatory ROE for 2013 would have been approximately 11.25%.

In 2015, the growth in earnings for FPL was primarily driven by the following:

- higher earnings on investment in plant in service of approximately $77 million. Investment in plant in service grew FPL's average retail rate base in 2015 by approximately $1.0 billion reflecting, among other things, ongoing transmission and distribution additions and the modernized Riviera Beach power plant placed in service in April 2014,
- higher AFUDC - equity of $32 million primarily related to the modernization project at Port Everglades and other investments,
- higher earnings of approximately $22 million due to increased use of equity to finance investments, and
- higher cost recovery clause earnings of $10 million primarily related to earnings associated with the incentive mechanism,

partly offset by,

- higher nonrecoverable expenses.

In 2014, the growth in earnings for FPL was primarily driven by the following:

- higher earnings on investment in plant in service of approximately $105 million. Investment in plant in service grew FPL's average retail rate base in 2014 by approximately $2.3 billion reflecting, among other things, the modernized Riviera Beach power plant and ongoing transmission and distribution additions,
- growth in wholesale services provided which increased earnings by $47 million,
- the absence of $32 million of after-tax charges associated with the cost savings initiative recorded in 2013, and
- higher earnings of $30 million related to the increase in the targeted regulatory ROE from 11.25% to 11.50%,

partly offset by,

- lower cost recovery clause results of $22 million primarily due to the transfer of new nuclear capacity to retail rate base as discussed below under Retail Base, Cost Recovery Clauses and Interest Expense, and
- lower AFUDC - equity of $19 million primarily related to the Riviera Beach and Cape Canaveral power plants being placed in service in April 2014 and April 2013, respectively.

FPL's operating revenues consisted of the following:

	Years Ended December 31,		
	2015	2014	2013
	(millions)		
Retail base	$ 5,653	$ 5,347	$ 4,951
Fuel cost recovery	3,875	3,876	3,334
Net deferral of retail fuel revenues	(1)	—	—
Net recognition of previously deferred retail fuel revenues	—	—	44
Other cost recovery clauses and pass-through costs, net of any deferrals	1,645	1,766	1,837
Other, primarily wholesale and transmission sales, customer-related fees and pole attachment rentals	479	432	279
Total	$ 11,651	$ 11,421	$ 10,445

Retail Base

FPSC Rate Orders

FPL's retail base revenues for all years presented reflect the 2012 rate agreement as retail base rates and charges were designed to increase retail base revenues approximately $350 million on an annualized basis. In addition, retail base revenues increased in 2015 and 2014 through a $234 million annualized retail base rate increase associated with the Riviera Beach power plant and, in 2014, a $164 million annualized retail base rate increase associated with the Cape Canaveral power plant. The 2012 rate agreement:

- remains in effect until December 2016,
- establishes FPL's allowed regulatory ROE at 10.50%, with a range of plus or minus 100 basis points, and
- allows for an additional retail base rate increase as the modernized Port Everglades project becomes operational (which is expected by April 2016).

In January 2016, FPL filed a formal notification with the FPSC indicating its intent to initiate a base rate proceeding. See Item 1. Business - FPL - FPL Regulation - FPL Rate Regulation - Base Rates for additional information on the 2012 rate agreement and details of FPL's formal notification.

In 2015 and 2014, retail base revenues increased approximately $43 million and $192 million, respectively, related to the modernized Riviera Beach power plant being placed in service in April 2014. Additionally, 2014 included approximately $53 million of additional retail base revenues related to the Cape Canaveral power plant being placed in service in April 2013. Additional retail base revenues of approximately $115 million were recorded in 2014, primarily related to new nuclear capacity which was placed in service in 2013 as permitted by the FPSC's nuclear cost recovery rule. See Cost Recovery Clauses below for discussion of the nuclear cost recovery rule.

Retail Customer Usage and Growth

In 2015 and 2014, FPL experienced a 1.4% and 1.8% increase, respectively, in the average number of customer accounts and a 4.2% increase and 0.4% decrease, respectively, in the average usage per retail customer, which collectively, together with other factors, increased revenues by approximately $263 million and $36 million, respectively. The increase in 2015 usage per retail customer is due to favorable weather. An improvement in the Florida economy contributed to the increased revenues for both periods. FPL expects year over year weather-normalized usage per customer to be between flat and 0.5% negative.

Cost Recovery Clauses

Revenues from fuel and other cost recovery clauses and pass-through costs, such as franchise fees, revenue taxes and storm-related surcharges, are largely a pass-through of costs. Such revenues also include a return on investment allowed to be recovered through the cost recovery clauses on certain assets, primarily related to solar and environmental projects, natural gas reserves and nuclear capacity. See Item 1. - I. FPL - FPL Regulation - FPL Rate Regulation - Cost Recovery Clauses. Fluctuations in fuel cost recovery revenues are primarily driven by changes in fuel and energy charges which are included in fuel, purchased power and interchange expense in the consolidated statements of income, as well as by changes in energy sales. Fluctuations in revenues from other cost recovery clauses and pass-through costs are primarily driven by changes in storm-related surcharges, capacity charges, franchise fee costs, the impact of changes in O&M and depreciation expenses on the underlying cost recovery clause, investment in solar and environmental projects, investment in nuclear capacity until such capacity goes into service and is recovered in base rates, pre-construction costs associated with the development of two additional nuclear units at the Turkey Point site and changes in energy sales. Capacity charges are included in fuel, purchased power and interchange expense and franchise fee costs are included in taxes other than income taxes and other in the consolidated statements of income. Underrecovery or overrecovery of cost recovery clause and other pass-through costs (deferred clause and franchise expenses and revenues) can significantly affect NEE's and FPL's operating cash flows. The 2015 net overrecovery was approximately $176 million and positively affected NEE's and FPL's cash flows from operating activities in 2015, while the 2014 net underrecovery was approximately $67 million and negatively affected NEE's and FPL's cash flows from operating activities in 2014.

The slight decrease in fuel cost recovery revenues in 2015 reflects lower revenues from the incentive mechanism and lower revenues from interchange power sales totaling approximately $118 million and a lower average fuel factor of approximately $96 million, partly offset by increased revenues of $213 million related to higher energy sales. The increase in fuel cost recovery revenues in 2014 is primarily due to a higher average fuel factor of approximately $329 million and higher energy sales of $158 million, as well as higher interchange power sales, partly offset by lower revenues from the incentive mechanism, totaling approximately $55 million.

The declines in 2015 revenues from other cost recovery clauses and pass-through costs were largely due to reductions in expenses associated with energy conservation and capacity clause programs. The decrease in revenues from other cost recovery clauses and pass-through costs in 2014 primarily reflects higher revenues in 2013 associated with the FPSC's nuclear cost recovery rule reflective of higher earnings on additional nuclear capacity investments and the shift to the collection of nuclear capacity recovery through retail base revenues (see Retail Base above). The nuclear cost recovery rule provides for the recovery of prudently incurred pre-construction costs and carrying charges (equal to the pretax AFUDC rate) on construction costs and a return on investment for new nuclear capacity through levelized charges under the capacity clause. The same rule provides for the recovery of construction costs, once property related to the new nuclear capacity goes into service, through a retail base rate increase effective beginning the following January.

In 2015, 2014 and 2013, cost recovery clauses contributed $103 million, $93 million and $115 million, respectively, to FPL's net income. The increase in 2015 primarily relates to gains associated with the incentive mechanism, investments in gas reserves and the recovery of a return on the regulatory asset associated with the purchase of the Cedar Bay facility discussed below. The decrease in 2014 in cost recovery clause results is primarily due to the collection of retail base revenues related to new nuclear capacity which was placed in service in 2013 (see Retail Base above). In 2015 and 2014, there was minimal contribution to net income from the nuclear cost recovery rule as all nuclear uprates have been placed in service and associated costs are now collected through base rates.

In September 2015, FPL assumed ownership of Cedar Bay and terminated its long-term purchased power agreement for substantially all of the facility's capacity and energy for a purchase price of approximately $521 million. The FPSC approved a stipulation and settlement between the Office of Public Counsel and FPL regarding issues relating to the ratemaking treatment for the purchase of this facility. FPL will recover the purchase price and associated income tax gross-up as a regulatory asset which will be amortized over approximately nine years. See Note 1 - Rate Regulation for further discussion.

Other

The increase in other revenues for 2015, which did not result in a significant contribution to earnings, primarily reflects higher wholesale and transmission service revenues along with other miscellaneous service revenues. The increase in other revenues for 2014 primarily reflects higher wholesale revenues associated with an increase in contracted load served under existing contracts.

Other Items Impacting FPL's Consolidated Statements of Income

Fuel, Purchased Power and Interchange Expense
The major components of FPL's fuel, purchased power and interchange expense are as follows:

	Years Ended December 31,		
	2015	2014	2013
		(millions)	
Fuel and energy charges during the period	**$ 3,593**	$ 3,951	$ 3,519
Net deferral of retail fuel costs	**—**	(109)	(148)
Net recognition of deferred retail fuel costs	**220**	—	—
Other, primarily capacity charges, net of any capacity deferral	**463**	533	554
Total	**$ 4,276**	$ 4,375	$ 3,925

The decrease in fuel and energy charges in 2015 was due to lower fuel and energy prices of approximately $491 million and a decrease of $68 million in costs related to the incentive mechanism, partly offset by higher energy sales of approximately $201 million. The increase in fuel and energy charges in 2014 was due to higher fuel and energy prices of approximately $202 million, higher energy sales of approximately $187 million and an increase of $43 million in costs related to the incentive mechanism. In addition, FPL recognized approximately $220 million of deferred retail fuel costs in 2015, compared to the deferral of retail fuel costs of $109 million and $148 million in 2014 and 2013, respectively. The decrease in other in 2015 is primarily due to lower capacity fees in part related to the termination of the Cedar Bay long-term purchased power agreement after FPL assumed ownership of Cedar Bay in September 2015.

O&M Expenses
FPL's O&M expenses decreased $79 million in 2014, primarily due the absence of 2013 transition costs associated with the cost savings initiative, as well as realized costs savings from this initiative.

Depreciation and Amortization Expense
The major components of FPL's depreciation and amortization expense are as follows:

	Years Ended December 31,		
	2015	2014	2013
		(millions)	
Reserve reversal (amortization) recorded under the 2012 rate agreement	**$ 15**	$ 33	$ (155)
Other depreciation and amortization recovered under base rates	**1,359**	1,211	1,105
Depreciation and amortization recovered under cost recovery clauses and securitized storm-recovery cost amortization	**202**	188	209
Total	**$ 1,576**	$ 1,432	$ 1,159

The reserve amortization, or reversal of such amortization, recorded in all periods presented reflects adjustments to the depreciation and fossil dismantlement reserve provided under the 2012 rate agreement in order to achieve the targeted regulatory ROE. At December 31, 2015, approximately $263 million of the reserve remains available for future amortization over the term of the 2012 rate agreement. Reserve amortization is recorded as a reduction to (or when reversed as an increase to) regulatory liabilities - accrued asset removal costs on the consolidated balance sheets. See Note 1 - Rate Regulation regarding a $30 million reduction in the reserve available for amortization under the 2012 rate agreement. The increase in other depreciation and amortization expense recovered under base rates is due to higher amortization expenses primarily associated with, in 2015, analog meters and, in 2015 and 2014, higher plant in service balances.

Taxes Other Than Income Taxes and Other
Taxes other than income taxes and other increased $39 million in 2015 primarily due to higher property taxes reflecting growth in plant in service balances. The increase of $43 million in 2014 was primarily due to higher franchise and revenue taxes, neither of which impact net income, as well as higher property taxes reflecting growth in plant in service balances, partly offset by lower payroll taxes.

Interest Expense
The increase in interest expense in 2015 primarily reflects higher average debt balances, partly offset by lower average interest rates. The increase in interest expense in 2014 reflects higher average interest rates related to higher fixed rate debt balances, lower AFUDC - debt and higher average debt balances. The change in AFUDC - debt is due to the same factors as described below in AFUDC - equity. Interest expense on storm-recovery bonds, as well as certain other interest expense on clause-recoverable investments (collectively, clause interest), do not significantly affect net income, as the clause interest is recovered either under cost recovery clause mechanisms or through a storm-recovery bond surcharge. Clause interest for 2015, 2014 and 2013 amounted to approximately $41 million, $42 million and $58 million, respectively, and reflects the shift of nuclear capacity recovery through retail base revenues (see Retail Base and Cost Recovery Clauses above).

AFUDC - Equity
The increase in AFUDC - equity in 2015 is primarily due to additional AFUDC - equity recorded on construction expenditures associated with the modernization project at Port Everglades, the investments in new compressor parts technology at select combined-cycle units and the peaker upgrade project, partly offset by lower AFUDC - equity associated with the Riviera Beach power plant which was placed in service in April 2014. The decrease in AFUDC - equity in 2014 was primarily due to lower AFUDC - equity associated with the Riviera Beach power plant and the Cape Canaveral power plant which was placed in service in April 2013, partly offset by additional AFUDC - equity recorded on construction expenditures associated with the Port Everglades modernization project.

Capital Initiatives
FPL is in the process of modernizing its Port Everglades power plant to a high-efficiency natural gas-fired unit that is expected to provide approximately 1,240 MW of capacity and be placed in service by April 2016. FPL is also in the process of replacing 44 of its 48 gas turbines at its Lauderdale, Port Everglades and Fort Myers facilities, totaling approximately 1,700 MW of capacity, with 7 high efficiency, low-emission turbines at its Lauderdale and Fort Myers facilities, totaling approximately 1,610 MW of capacity, by December 2016. In addition, FPL is upgrading 2 additional simple-cycle combustion turbines at its Fort Myers facility, which are expected to add an additional 50 MW of capacity by December 2016. FPL plans to continue to strengthen the transmission and distribution infrastructure and to build three solar PV projects that are expected to provide approximately 74 MW each and be placed into service by the end of 2016. In January 2016, the FPSC approved FPL's proposal to build a new approximately 1,600 MW natural gas-fired combined-cycle unit in Okeechobee County, Florida. See Item 1. Business - FPL.

NEER: Results of Operations

NEER owns, develops, constructs, manages and operates electric generation facilities in wholesale energy markets primarily in the U.S. and Canada. NEER also provides full energy and capacity requirements services, engages in power and gas marketing and trading activities and invests in natural gas, natural gas liquids and oil production and pipeline infrastructure assets. NEER's net income less net income attributable to noncontrolling interests for 2015, 2014 and 2013 was $1,092 million, $989 million and $556 million, respectively, resulting in an increase in 2015 of $103 million and an increase in 2014 of $433 million. The primary drivers, on an after-tax basis, of these changes are in the following table.

	Increase (Decrease) From Prior Period	
	Years Ended December 31,	
	2015	2014
	(millions)	
New investments[a]	$ 138	$ 134
Existing assets[a]	(96)	26
Gas infrastructure[b]	(7)	(27)
Customer supply and proprietary power and gas trading[b]	110	14
Asset sales	(9)	6
NEP-related charge and costs	67	(67)
Interest and general and administrative expenses	(99)	(42)
Other, primarily income taxes	(15)	13
Change in unrealized mark-to-market non-qualifying hedge activity[c]	4	225
Change in OTTI losses on securities held in nuclear decommissioning funds, net of OTTI reversals[c]	(15)	—
Gain on 2013 discontinued operations[c]	—	(216)
Change in Maine fossil gain/loss[c]	(12)	53
Charges associated with the 2013 impairment of the Spain solar projects[c]	—	342
Operating results of the Spain solar projects[c]	37	(28)
Increase in net income less net income attributable to noncontrolling interests	$ 103	$ 433

(a) Includes PTCs, ITCs and deferred income tax and other benefits associated with convertible ITCs for wind and solar projects, as applicable, (see Note 1 - Electric Plant, Depreciation and Amortization, - Income Taxes and - Sale of Differential Membership Interests and Note 5) but excludes allocation of interest expense or corporate general and administrative expenses. Results from projects are included in new investments during the first twelve months of operation or ownership. An electric energy project's results are included in existing assets beginning with the thirteenth month of operation.
(b) Excludes allocation of interest expense and corporate general and administrative expenses.
(c) See Overview - Adjusted Earnings for additional information.

New Investments

In 2015, results from new investments increased due to:

- higher earnings of approximately $146 million related to the addition of approximately 2,571 MW of wind generation and 910 MW of solar generation during or after 2014, and
- higher earnings of approximately $16 million related to the acquisition of the Texas pipelines and the development of three additional natural gas pipelines,

partly offset by,

- lower deferred income tax and other benefits associated with convertible ITCs of $21 million and ITCs of $3 million.

In 2014, results from new investments increased primarily due to:

- higher earnings of approximately $120 million related to the addition of approximately 1,678 MW of wind generation and 545 MW of solar generation during or after 2013, and
- higher deferred income tax and other benefits associated with ITCs of $25 million,

partly offset by,

- lower deferred income tax and other benefits associated with convertible ITCs of $15 million.

Existing Assets

In 2015, results from NEER's existing asset portfolio decreased primarily due to:

- lower results from wind assets of $122 million primarily due to weaker wind resource offset in part by a favorable ITC impact related to changes in state income tax laws and favorable pricing,

partly offset by,

- higher results from merchant assets in the ERCOT region of approximately $27 million primarily due to the absence of a 2014 outage.

In 2014, results from NEER's existing asset portfolio increased primarily due to:

- higher results from wind assets of $29 million reflecting stronger wind resource and increased availability, favorable pricing and lower operating expenses, partly offset by PTC roll off,
- higher results of $19 million from merchant assets in the ERCOT region and $11 million from other contracted natural gas assets primarily due to favorable market conditions, and
- increased results of $11 million at Maine fossil due to additional generation and favorable pricing related to extreme winter weather,

partly offset by,

- lower results from the nuclear assets of approximately $30 million primarily due to lower pricing and scheduled outages in 2014, offset in part by higher nuclear decommissioning gains, and
- lower results of $14 million due to the absence of the hydro assets which were sold in the first quarter of 2013.

Gas Infrastructure

The decrease in gas infrastructure results in 2015 reflects increased depreciation expense mainly related to both higher depletion rates and increased production in 2015, as well as the absence of 2014 gains on the sale of investments in certain wells (collectively, approximately $46 million), partly offset by gains of $42 million related to exiting the hedged positions on a number of future gas production opportunities; such gains were previously reflected in unrealized mark-to-market non-qualifying hedge activity. The decrease in gas infrastructure results in 2014 is primarily due to increased depreciation expense mainly related to higher depletion rates and operating lease expenses and lower revenues (collectively, approximately $31 million) as well as $5 million of after-tax impairment charges on two oil and gas producing properties reflecting a decline in oil and natural gas prices, partly offset by gains on the sale of investments in certain wells. Further declines in the price of oil and natural gas commodity products could result in additional impairments of NEER's oil and gas producing properties. However, an impairment analysis performed under GAAP does not take into consideration the mark-to-market value of hedged positions. NEER hedges the expected output from its oil and gas producing properties for a period of time to help protect against price movements; the fair value of such hedged positions at December 31, 2015 was approximately $390 million. At December 31, 2015, approximately $2.2 billion of NEE's property, plant and equipment, net relates to the gas infrastructure business' ownership interests in investments located in oil and gas shale formations.

Customer Supply and Proprietary Power and Gas Trading

Results from customer supply and proprietary power and gas trading increased in 2015 primarily due to improved margins and favorable market conditions compared to lower results in the full requirements business in 2014 due to the impact of extreme winter weather. In 2014, results from customer supply and proprietary power and gas trading increased primarily due to higher power and gas trading results and gains on gas purchase contracts, partly offset by lower results in the full requirements business reflecting the impact of extreme winter weather and market conditions in the Northeast.

Asset Sales

Asset sales in 2015 primarily include after-tax gains of approximately $5 million on the sale of a 41 MW wind project, offset by the absence of gains recorded in 2014. Asset sales in 2014 primarily include an after-tax gain of approximately $14 million on the sale of a 75 MW wind project that became operational during 2014, offset by after-tax gains of approximately $8 million recorded in 2013.

NEP-related Charge and Costs

For 2014, NEER's results reflect an approximately $45 million noncash income tax charge associated with structuring Canadian assets and $22 million in NEP IPO transaction costs.

Interest and General and Administrative Expenses

Interest and general and administrative expenses includes interest expense, differential membership costs and other corporate general and administrative expenses. In 2015 and 2014, interest and general and administrative expenses reflect higher borrowing and other costs to support the growth of the business.

Other Factors

Supplemental to the primary drivers of the changes in NEER's net income less net income attributable to noncontrolling interests discussed above, the discussion below describes changes in certain line items set forth in NEE's consolidated statements of income as they relate to NEER.

Operating Revenues

Operating revenues for 2015 increased $248 million primarily due to:

- higher revenues from new investments of approximately $225 million,
- higher revenues from the customer supply business and proprietary power and gas trading business of $218 million reflecting favorable market conditions, and

- higher revenues from the gas infrastructure business of $96 million primarily reflecting gains recorded upon exiting the hedged positions on a number of future gas production opportunities and the acquisition of the Texas pipelines,

partly offset by,

- lower unrealized mark-to-market gains from non-qualifying hedges ($275 million for 2015 compared to $372 million of gains on such hedges for 2014), and
- lower revenues from existing assets of $195 million reflecting lower wind generation due to weaker wind resource, lower revenues at Marcus Hook 750 and in the ERCOT region due to lower gas prices and lower revenues at Seabrook reflecting a refueling outage, offset in part by higher revenues at Point Beach due to the absence of a 2014 outage and price escalation under the power sales agreement, higher dispatch in Maine due to 2015 weather conditions and higher revenues from the Spain solar projects.

Operating revenues for 2014 increased $863 million primarily due to:

- higher unrealized mark-to-market gains from non-qualifying hedges ($372 million for 2014 compared to $116 million of losses on such hedges for 2013),
- higher revenues from new investments of approximately $282 million, and
- higher revenues from the customer supply business of $120 million,

partly offset by,

- lower revenues from existing assets of $13 million reflecting lower contracted revenues at Duane Arnold and the Spain solar projects and lower revenues in the New England Power Pool (NEPOOL) region reflecting a scheduled outage at Seabrook, partly offset by higher wind generation due to stronger wind resource and increased availability and higher revenues in the ERCOT region primarily due to favorable market conditions, and
- lower revenues from the gas infrastructure business and other O&M service agreements.

Operating Expenses

Operating expenses for 2015 increased $138 million primarily due to:

- higher operating expenses associated with new investments of approximately $123 million,
- higher O&M expenses reflecting higher costs associated with growth in the NEER business, higher taxes other than income taxes and other reflecting the absence of 2014 gains on the sale of investments in certain wells in the gas infrastructure business and the absence of the 2014 reimbursement by a vendor of certain O&M-related costs, and
- higher depreciation associated with the gas infrastructure business of $50 million primarily related to higher depletion rates and increased production,

partly offset by,

- lower fuel expense of approximately $146 million primarily in the ERCOT region and at Marcus Hook 750.

Operating expenses for 2014 decreased $3 million primarily due to:

- the absence of a $300 million impairment charge in 2013 related to the Spain solar projects, and
- lower other operating expenses reflecting the reimbursement by a vendor of certain O&M-related costs as well as the absence of implementation costs recorded in 2013 related to the cost savings initiative, partly offset by the NEP-related expenses,

partly offset by,

- higher fuel expense of approximately $171 million primarily in the ERCOT region and the customer supply business,
- higher operating expenses associated with new investments of approximately $123 million, and
- higher depreciation expense of approximately $24 million associated with the gas infrastructure business primarily related to higher depletion rates.

Interest Expense

NEER's interest expense for 2015 decreased $42 million primarily reflecting the absence of approximately $64 million of losses related to changes in the fair value of interest rate swaps for which hedge accounting was discontinued in 2013, partly offset by higher average debt balances. Interest expense increased $139 million for 2014 primarily reflecting the approximately $64 million of losses related to changes in the fair value of interest rate swaps, as well as higher average debt balances.

Benefits Associated with Differential Membership Interests - net

Benefits associated with differential membership interests - net for all periods presented reflect benefits recognized by NEER as third-party investors received their portion of the economic attributes, including income tax attributes, of the underlying wind projects, net of associated costs. See Note 1 - Sale of Differential Membership Interests.

Equity in Earnings of Equity Method Investees

Equity in earnings of equity method investees increased in 2015 and 2014 primarily due to NEER's 50% equity investment in a 550 MW solar project that commenced partial operations at the end of 2013 and full operations by the end of 2014.

Gains on Disposal of Assets - net

Gains on disposal of assets - net for 2015, 2014 and 2013 primarily reflect gains on sales of securities held in NEER's nuclear decommissioning funds. Gains on disposal of assets - net also reflect, in 2015, a pretax gain of approximately $6 million on the

sale of a 41 MW wind project, in 2014, a pretax gain of approximately $23 million on the sale of a 75 MW wind project and, in 2013, a pretax gain of approximately $14 million on the sale of a portfolio of wind assets with generating capacity totaling 223 MW.

Tax Credits, Benefits and Expenses

PTCs from wind projects and ITCs and deferred income tax benefits associated with convertible ITCs from solar and certain wind projects are reflected in NEER's earnings. PTCs are recognized as wind energy is generated and sold based on a per kWh rate prescribed in applicable federal and state statutes, and were approximately $149 million, $186 million and $209 million in 2015, 2014 and 2013, respectively. A portion of the PTCs have been allocated to investors in connection with sales of differential membership interests. In addition, NEE's effective income tax rate for 2015, 2014 and 2013 was affected by deferred income tax benefits associated with ITCs and convertible ITCs of $89 million, $84 million and $74 million, respectively. NEE's effective income tax rate for 2014 was unfavorably affected by a noncash income tax charge of approximately $45 million associated with structuring Canadian assets and for 2013 was unfavorably affected by the establishment of a full valuation allowance on the deferred tax assets associated with the Spain solar projects. See Note 5 and Overview - Adjusted Earnings for additional information.

Capital Initiatives

NEER expects to add new contracted wind generation of approximately 1,400 MW and new contracted solar generation of approximately 1,100 MW in 2016 and will continue to pursue other additional investment opportunities that may develop. Projects developed by NEER might be offered for sale to NEP if NEER should seek to sell the projects. NEER will also continue to invest in the development of its natural gas pipeline infrastructure assets. See Item 1. Business - NEER - Generation and Other Operations - Natural Gas Pipelines.

Sale of Assets to NEP

In January 2015 and February 2015, indirect subsidiaries of NEER sold a 250 MW wind facility located in Texas and an approximately 20 MW solar facility located in California, respectively, to indirect subsidiaries of NEP.

In May 2015, an indirect subsidiary of NEER sold four wind generation facilities with contracted generating capacity totaling approximately 664 MW located in North Dakota, Oklahoma, Washington and Oregon to an indirect subsidiary of NEP.

In October 2015, an indirect subsidiary of NEER sold a 149 MW wind generation facility located in Ontario, Canada to an indirect subsidiary of NEP.

Corporate and Other: Results of Operations

Corporate and Other is primarily comprised of the operating results of NEET, FPL FiberNet and other business activities, as well as corporate interest income and expenses. Corporate and Other allocates a portion of NEECH's corporate interest expense and shared service costs to NEER. Interest expense is allocated based on a deemed capital structure of 70% debt and, for purposes of allocating NEECH's corporate interest expense, the deferred credit associated with differential membership interests sold by NEER's subsidiaries is included with debt. Each subsidiary's income taxes are calculated based on the "separate return method," except that tax benefits that could not be used on a separate return basis, but are used on the consolidated tax return, are recorded by the subsidiary that generated the tax benefits. Any remaining consolidated income tax benefits or expenses are recorded at Corporate and Other. The major components of Corporate and Other's results, on an after-tax basis, are as follows:

	Years Ended December 31,		
	2015	2014	2013
	(millions)		
Interest expense, net of allocations to NEER	$ (87)	$ (95)	$ (109)
Interest income	32	31	32
Federal and state income tax benefits (expenses)	20	(7)	15
Merger-related expenses	(20)	—	—
Other - net	67	30	65
Net income (loss)	$ 12	$ (41)	$ 3

The decrease in interest expense, net of allocations to NEER in 2015 and 2014 reflects lower average debt balances due in part to a higher allocation of interest costs to NEER reflecting growth in NEER's business. The federal and state income tax benefits (expenses) reflect consolidating income tax adjustments, including, in 2015, favorable changes in state income tax laws and, in 2013, a $15 million income tax benefit recorded as a gain from discontinued operations, net of federal income taxes (see Overview - Adjusted Earnings).

Other - net includes all other corporate income and expenses, as well as other business activities. The increase in other - net for 2015 primarily reflects 2015 investment gains compared to 2014 investment losses and the absence of debt reacquisition losses recorded in 2014. The decrease in other in 2014 primarily reflects after-tax investment losses in 2014, lower results from NEET and debt reacquisition losses. Substantially all of such investment losses and gains, on a pretax basis, is reflected in other - net in NEE's consolidated statements of income.

LIQUIDITY AND CAPITAL RESOURCES

NEE and its subsidiaries, including FPL, require funds to support and grow their businesses. These funds are used for, among other things, working capital, capital expenditures, investments in or acquisitions of assets and businesses, payment of maturing debt obligations and, from time to time, redemption or repurchase of outstanding debt or equity securities. It is anticipated that these requirements will be satisfied through a combination of cash flows from operations, short- and long-term borrowings, the issuance of short- and long-term debt and, from time to time, equity securities, and proceeds from differential membership investors, consistent with NEE's and FPL's objective of maintaining, on a long-term basis, a capital structure that will support a strong investment grade credit rating. NEE, FPL and NEECH rely on access to credit and capital markets as significant sources of liquidity for capital requirements and other operations that are not satisfied by operating cash flows. The inability of NEE, FPL and NEECH to maintain their current credit ratings could affect their ability to raise short- and long-term capital, their cost of capital and the execution of their respective financing strategies, and could require the posting of additional collateral under certain agreements.

In October 2015, NEE authorized a program to purchase, from time to time, up to $150 million of common units representing limited partner interests of NEP. Under the program, any purchases may be made in amounts, at prices and at such times as NEE or its subsidiaries deem appropriate, all subject to market conditions and other considerations. The purchases may be made in the open market or in privately negotiated transactions. Any purchases will be made in such quantities, at such prices, in such manner and on such terms and conditions as determined by NEE or its subsidiaries in their discretion, based on factors such as market and business conditions, applicable legal requirements and other factors. The common unit purchase program does not require NEE to acquire any specific number of common units and may be modified or terminated by NEE at any time. NEE owns and controls the general partner of NEP and beneficially owns approximately 76.9% of NEP's voting power at December 31, 2015. The purpose of the program is not to cause NEP's common units to be delisted from the New York Stock Exchange or to cause the common units to be deregistered with the SEC. As of December 31, 2015, NEE had purchased approximately $0.6 million of NEP common units under this program. Also in October 2015, NEP put in place an at-the-market equity issuance program pursuant to which NEP may issue from time to time, up to $150 million of its common units. As of December 31, 2015, NEP had issued approximately $26 million of its common units under this program.

Cash Flows

NEE's increase in cash flows from operating activities for 2015 and 2014 primarily reflects operating cash generated from additional wind and solar facilities that were placed in service during or after 2014 and 2013, respectively. FPL's cash flows from operating activities remained essentially flat in 2015 and 2014 compared to the prior year period, and, in 2015, reflects the purchase of Cedar Bay. See Note 1 - Rate Regulation.

Sources and uses of NEE's and FPL's cash for 2015, 2014 and 2013 were as follows:

	NEE			FPL

NEE's primary capital requirements are for expanding and enhancing FPL's electric system and generation facilities to continue to provide reliable service to meet customer electricity demands and for funding NEER's investments in independent power and other projects. The following table provides a summary of the major capital investments for 2015, 2014 and 2013.

Liquidity

At December 31, 2015, NEE's total net available liquidity was approximately $7.7 billion, of which FPL's portion was approximately $3.1 billion. The table below provides the components of FPL's and NEECH's net available liquidity at December 31, 2015.

	FPL	NEECH	Total	Maturity Date FPL	Maturity Date NEECH
		(millions)			
Bank revolving line of credit facilities[a]	$ 3,000	$ 4,850	$ 7,850	2016 - 2021	2016 - 2021
Issued letters of credit	(6)	(410)	(416)

Issued letters of credit	—	(443)	(443)		
	—	207	207		
Subtotal	3,194	4,682	7,876		
Cash and cash equivalents	23	546	569		
Outstanding commercial paper and notes payable	(156)	(630)	(786)		
Net available liquidity	$ 3,061	$ 4,598	$ 7,659		

(a) Provide for the funding of loans up to $7,850 million ($3,000 million for FPL) and the issuance of letters of credit up to $3,950 million ($1,070 million for FPL). The entire amount of the credit facilities is available for general corporate purposes and to provide additional liquidity in the event of a loss to the companies' or their subsidiaries' operating facilities (including, in the case of FPL, a transmission and distribution property loss). FPL's bank revolving line of credit facilities are also available to support the purchase of $718 million of pollution control, solid waste disposal and industrial development revenue bonds (tax exempt bonds) in the event they are tendered by individual bond holders and not remarketed prior to maturity. Approximately $2,255 million of FPL's and $3,700 million of NEECH's bank revolving line of credit facilities expire in 2021.

(b) Only available for the issuance of letters of credit.

As of February 19, 2016, 68 banks participate in FPL's and NEECH's revolving credit facilities, with no one bank providing more than 6% of the combined revolving credit facilities. European banks provide approximately 30% of the combined revolving credit facilities. Pursuant to a 1998 guarantee agreement, NEE guarantees the payment of NEECH's debt obligations under its revolving credit facilities. In order for FPL or NEECH to borrow or to have letters of credit issued under the terms of their respective revolving credit facilities and, also for NEECH, its letter of credit facilities, FPL, in the case of FPL, and NEE, in the case of NEECH, are required, among other things, to maintain a ratio of funded debt to total capitalization that does not exceed a stated ratio. The FPL and NEECH revolving credit facilities also contain default and related acceleration provisions relating to, among other things, failure of FPL and NEE, as the case may be, to maintain the respective ratio of funded debt to total capitalization at or below the specified ratio. At December 31, 2015, each of NEE and FPL was in compliance with its required ratio.

Additionally, at December 31, 2015, certain subsidiaries of NEER and NEP had credit or loan facilities with available liquidity as set forth in the table below. In order for the applicable borrower to borrow or to have letters of credit issued under the terms of the agreements for some of the NEER facilities listed below, among other things, NEE is required to maintain a ratio of funded debt to total capitalization that does not exceed a stated ratio. These NEER agreements also generally contain covenants and default and related acceleration provisions relating to, among other things, failure of NEE to maintain a ratio of funded debt to total capitalization at or below the specified ratio. Some of the payment obligations of the borrowers under the NEER agreements listed below ultimately are guaranteed by NEE.

	Amount	Amount Remaining Available at December 31, 2015	Rate	Maturity Date	Related Project Use
		(millions)			
NEER:					
Canadian revolving credit facilities[a]	C$850	$458	Variable	Various	Canadian renewable generation assets
Limited-recourse construction and term loan facility	$425	$106	Variable	2035	Construction and development of a 250 MW solar PV project in California
Limited-recourse construction and term loan facility	$619	$98	Variable	2035	Construction and development of a 250 MW solar PV project in Nevada
Cash grant bridge loan facilities	$250	$250	Variable	2018	Construction and development of a 250 MW solar PV project in Nevada
NEP:					
Senior secured revolving credit facility[b]	$250	$221	Variable	2019	Working capital, expansion projects, acquisitions and general business purposes
Senior secured limited-recourse revolving loan facility[c]	$150	$150	Variable	2020	General business purposes

(a) Available for general corporate purposes; the current intent is to use these facilities for the purchase, development, construction and/or operation of Canadian renewable generation assets. Consists of three credit facilities with expiration dates ranging from February 28, 2016 to April 2016.

(b) NEP OpCo and one of its direct subsidiaries are required to comply with certain financial covenants on a quarterly basis and NEP OpCo's ability to pay cash distributions to its unit holders is subject to certain other restrictions. The revolving credit facility includes borrowing capacity for letters of credit and incremental commitments to increase the revolving credit facility up to $1 billion in the aggregate. Borrowings under the revolving credit facility are guaranteed by NEP OpCo and NEP.

(c) A certain NEP subsidiary (borrower) is required to satisfy certain conditions, including among other things, maintaining a leverage ratio at the time of any borrowing that does not exceed a specified ratio. Borrowings under this revolving loan facility are secured by liens on certain of the borrower's assets and certain of the borrower's subsidiaries' assets, as well as the ownership interest in the borrower. Contains default and related acceleration provisions relating to, among other things, failure of the borrower to maintain a leverage ratio at or below the specified rate and a minimum interest coverage ratio.

Storm Restoration Costs

As of December 31, 2015, FPL had the capacity to absorb up to approximately $119 million in future prudently incurred storm restoration costs without seeking recovery through a rate adjustment from the FPSC or filing a petition with the FPSC. See Note 1 – Revenues and Rates.

Capital Support

Guarantees, Letters of Credit, Surety Bonds and Indemnifications (Guarantee Arrangements)

Certain subsidiaries of NEE, including FPL, issue guarantees and obtain letters of credit and surety bonds, as well as provide indemnities, to facilitate commercial transactions with third parties and financings. Substantially all of the guarantee arrangements are on behalf of NEE's or FPL's consolidated subsidiaries, as discussed in more detail below. NEE and FPL are not required to recognize liabilities associated with guarantee arrangements issued on behalf of their consolidated subsidiaries unless it becomes probable that they will be required to perform. At December 31, 2015, NEE and FPL believe it is unlikely that they would be required to perform under, or otherwise incur any losses associated with, these guarantee arrangements.

As of December 31, 2015, NEE subsidiaries had approximately $3.3 billion in guarantees related primarily to equity contribution agreements associated with the development, construction and financing of certain power generation facilities, engineering, procurement and construction agreements and natural gas pipeline development projects. In addition, as of December 31, 2015, NEE subsidiaries had approximately $4.6 billion in guarantees ($21 million for FPL) related to obligations under purchased power agreements, indemnifications associated with asset divestitures, nuclear-related activities, the non-receipt of proceeds from cash grants under the Recovery Act and the payment obligations related to renewable tax credits, as well as other types of contractual obligations.

In some instances, subsidiaries of NEE elect to issue guarantees instead of posting other forms of collateral required under certain financing arrangements. As of December 31, 2015, these guarantees totaled approximately $935 million and support, among other things, required cash management reserves, O&M service agreement requirements and other specific project financing requirements.

Subsidiaries of NEE also issue guarantees to support customer supply and proprietary power and gas trading activities, including the buying and selling of wholesale and retail energy commodities. As of December 31, 2015, the estimated mark-to-market exposure (the total amount that these subsidiaries of NEE could be required to fund based on energy commodity market prices at December 31, 2015) plus contract settlement net payables, net of collateral posted for obligations under these guarantees totaled $656 million.

As of December 31, 2015, subsidiaries of NEE also had approximately $1.0 billion of standby letters of credit ($6 million for FPL) and approximately $317 million of surety bonds ($77 million for FPL) to support certain of the commercial activities discussed above. FPL's and NEECH's credit facilities are available to support the amount of the standby letters of credit.

In addition, as part of contract negotiations in the normal course of business, certain subsidiaries of NEE, including FPL, have agreed and in the future may agree to make payments to compensate or indemnify other parties for possible unfavorable financial consequences resulting from specified events. The specified events may include, but are not limited to, an adverse judgment in a lawsuit or the imposition of additional taxes due to a change in tax law or interpretations of the tax law. NEE and FPL are unable to estimate the maximum potential amount of future payments under some of these contracts because events that would obligate them to make payments have not yet occurred or, if any such event has occurred, they have not been notified of its occurrence.

Certain guarantee arrangements described above contain requirements for NEECH and FPL to maintain a specified credit rating. For a discussion of credit rating downgrade triggers see Credit Ratings below. NEE has guaranteed certain payment obligations of NEECH, including most of its debt and all of its debentures and commercial paper issuances, as well as most of its payment guarantees and indemnifications, and NEECH has guaranteed certain debt and other obligations of NEER and its subsidiaries.

Shelf Registration

In July 2015, NEE, NEECH and FPL filed a shelf registration statement with the SEC for an unspecified amount of securities which became effective upon filing. The amount of securities issuable by the companies is established from time to time by their respective boards of directors. As of February 19, 2016, securities that may be issued under the registration statement include, depending on the registrant, senior debt securities, subordinated debt securities, junior subordinated debentures, first mortgage bonds, common stock, preferred stock, stock purchase contracts, stock purchase units, warrants and guarantees related to certain of those securities. As of February 19, 2016, the board-authorized capacity available to issue securities was approximately $4.8 billion for NEE and NEECH (issuable by either or both of them up to such aggregate amount) and $1.9 billion for FPL.

Contractual Obligations and Estimated Capital Expenditures

NEE's and FPL's commitments at December 31, 2015 were as follows:

	2016	2017	2018	2019	2020	Thereafter	Total
				(millions)			
Long-term debt, including interest:[a]							
FPL	$ 500	$ 800	$ 884	$ 481	$ 412 [b]	$ 15,601 [b]	$ 18,678
NEER	1,846	877	1,715	659	774	5,173	11,044
Corporate and Other	1,099	2,355	1,301	1,873	1,338	12,793	20,759
Purchase obligations:							
FPL[c]	5,320	4,525	4,105	4,345	4,310	13,740	36,345
NEER[d]	3,670	735	610	130	85	530	5,760
Corporate and Other[d]	60	5	5	—	5	—	75
Elimination of FPL's purchase obligations to NEER[d]	—	(59)	(87)	(84)	(81)	(1,246)	(1,557)
Asset retirement activities:[e]							
FPL[f]	11	16	10	3	—	8,200	8,240
NEER[g]	1	—	—	—	—	13,199	13,200
Other commitments:							
NEER[h]	115	138	187	191	95	405	1,131
Total	$ 12,622	$ 9,392	$ 8,730	$ 7,598	$ 6,938	$ 68,395	$ 113,675

(a) Includes principal, interest and interest rate swaps. Variable rate interest was computed using December 31, 2015 rates. See Note 13.
(b) Includes $718 million of tax exempt bonds that permit individual bond holders to tender the bonds for purchase at any time prior to maturity. In the event bonds are tendered for purchase, they would be remarketed by a designated remarketing agent in accordance with the related indenture. If the remarketing is unsuccessful, FPL would be required to purchase the tax exempt bonds. As of December 31, 2015, all tax exempt bonds tendered for purchase have been successfully remarketed. FPL's bank revolving line of credit facilities are available to support the purchase of tax exempt bonds.
(c) Represents required capacity and minimum charges under long-term purchased power and fuel contracts (see Note 14 - Contracts), and projected capital expenditures through 2020 (see Note 14 - Commitments).
(d) See Note 14 - Contracts.
(e) Represents expected cash payments adjusted for inflation for estimated costs to perform asset retirement activities.
(f) At December 31, 2015, FPL had approximately $3,430 million in restricted funds for the payment of future expenditures to decommission FPL's nuclear units, which are included in NEE's and FPL's special use funds. See Note 13.
(g) At December 31, 2015, NEER's 88.23% portion of Seabrook's and 70% portion of Duane Arnold's and its Point Beach's restricted funds for the payment of future expenditures to decommission its nuclear units totaled approximately $1,634 million and are included in NEE's special use funds. See Note 13.
(h) Represents estimated cash distributions related to differential membership interests and payments related to the acquisition of certain development rights. For further discussion of differential membership interests, see Note 1 - Sale of Differential Membership Interests.

Credit Ratings

NEE's and FPL's liquidity, ability to access credit and capital markets, cost of borrowings and collateral posting requirements under certain agreements are dependent on their credit ratings. At February 19, 2016, Moody's Investors Service, Inc. (Moody's), Standard & Poor's Ratings Services (S&P) and Fitch Ratings (Fitch) had assigned the following credit ratings to NEE, FPL and NEECH:

	Moody's[a]	S&P[a]	Fitch[a]
NEE:[b]			
Corporate credit rating	Baa1	A-	A-
FPL:[b]			
Corporate credit rating	A1	A-	A
First mortgage bonds	Aa2	A	AA-
Pollution control, solid waste disposal and industrial development revenue bonds[c]	VMIG-1/P-1	A-2	F1
Commercial paper	P-1	A-2	F1
NEECH:[b]			
Corporate credit rating	Baa1	A-	A-
Debentures	Baa1	BBB+	A-
Junior subordinated debentures	Baa2	BBB	BBB
Commercial paper	P-2	A-2	F1

(a) A security rating is not a recommendation to buy, sell or hold securities and should be evaluated independently of any other rating. The rating is subject to revision or withdrawal at any time by the assigning rating organization.
(b) The outlook indicated by each of Moody's, S&P and Fitch is stable.
(c) Short-term ratings are presented as all bonds outstanding are currently paying a short-term interest rate. At FPL's election, a portion or all of the bonds may be adjusted to a long-term interest rate.

NEE and its subsidiaries, including FPL, have no credit rating downgrade triggers that would accelerate the maturity dates of outstanding debt. A change in ratings is not an event of default under applicable debt instruments, and while there are conditions to drawing on the credit facilities noted above, the maintenance of a specific minimum credit rating is not a condition to drawing on these credit facilities.

Commitment fees and interest rates on loans under these credit facilities' agreements are tied to credit ratings. A ratings downgrade also could reduce the accessibility and increase the cost of commercial paper and other short-term debt issuances and borrowings and additional or replacement credit facilities. In addition, a ratings downgrade could result in, among other things, the requirement that NEE subsidiaries, including FPL, post collateral under certain agreements and guarantee arrangements, including, but not limited to, those related to fuel procurement, power sales and purchases, nuclear decommissioning funding, debt-related reserves and trading activities. FPL's and NEECH's credit facilities are available to support these potential requirements.

Covenants

NEE's charter does not limit the dividends that may be paid on its common stock. As a practical matter, the ability of NEE to pay dividends on its common stock is dependent upon, among other things, dividends paid to it by its subsidiaries. For example, FPL pays dividends to NEE in a manner consistent with FPL's long-term targeted capital structure. However, the mortgage securing FPL's first mortgage bonds contains provisions which, under certain conditions, restrict the payment of dividends to NEE and the issuance of additional first mortgage bonds. Additionally, in some circumstances, the mortgage restricts the amount of retained earnings that FPL can use to pay cash dividends on its common stock. The restricted amount may change based on factors set out in the mortgage. Other than this restriction on the payment of common stock dividends, the mortgage does not restrict FPL's use of retained earnings. As of December 31, 2015, no retained earnings were restricted by these provisions of the mortgage and, in light of FPL's current financial condition and level of earnings, management does not expect that planned financing activities or dividends would be affected by these limitations.

FPL may issue first mortgage bonds under its mortgage subject to its meeting an adjusted net earnings test set forth in the mortgage, which generally requires adjusted net earnings to be at least twice the annual interest requirements on, or at least 10% of the aggregate principal amount of, FPL's first mortgage bonds including those to be issued and any other non-junior FPL indebtedness. As of December 31, 2015, coverage for the 12 months ended December 31, 2015 would have been approximately 7.8 times the annual interest requirements and approximately 3.8 times the aggregate principal requirements. New first mortgage bonds are also limited to an amount equal to the sum of 60% of unfunded property additions after adjustments to offset property retirements, the amount of retired first mortgage bonds or qualified lien bonds and the amount of cash on deposit with the mortgage trustee. As of December 31, 2015, FPL could have issued in excess of $11.8 billion of additional first mortgage bonds based on the unfunded property additions and in excess of $6.3 billion based on retired first mortgage bonds. As of December 31, 2015, no cash was deposited with the mortgage trustee for these purposes.

In September 2006, NEE and NEECH executed a Replacement Capital Covenant (September 2006 RCC) in connection with NEECH's offering of $350 million principal amount of Series B Enhanced Junior Subordinated Debentures due 2066 (Series B junior

subordinated debentures). The September 2006 RCC is for the benefit of persons that buy, hold or sell a specified series of long-term indebtedness (covered debt) of NEECH (other than the Series B junior subordinated debentures) or, in certain cases, of NEE. FPL Group Capital Trust I's 5 7/8% Preferred Trust Securities have been initially designated as the covered debt under the September 2006 RCC. The September 2006 RCC provides that NEECH may redeem, and NEE or NEECH may purchase, any Series B junior subordinated debentures on or before October 1, 2036, only to the extent that the redemption or purchase price does not exceed a specified amount of proceeds from the sale of qualifying securities, subject to certain limitations described in the September 2006 RCC. Qualifying securities are securities that have equity-like characteristics that are the same as, or more equity-like than, the Series B junior subordinated debentures at the time of redemption or purchase, which are sold within 180 days prior to the date of the redemption or repurchase of the Series B junior subordinated debentures.

In June 2007, NEE and NEECH executed a Replacement Capital Covenant (June 2007 RCC) in connection with NEECH's offering of $400 million principal amount of its Series C Junior Subordinated Debentures due 2067 (Series C junior subordinated debentures). The June 2007 RCC is for the benefit of persons that buy, hold or sell a specified series of covered debt of NEECH (other than the Series C junior subordinated debentures) or, in certain cases, of NEE. FPL Group Capital Trust I's 5 7/8% Preferred Trust Securities have been initially designated as the covered debt under the June 2007 RCC. The June 2007 RCC provides that NEECH may redeem or purchase, or satisfy, discharge or defease (collectively, defease), and NEE and any majority-owned subsidiary of NEE or NEECH may purchase, any Series C junior subordinated debentures on or before June 15, 2037, only to the extent that the principal amount defeased or the applicable redemption or purchase price does not exceed a specified amount raised from the issuance, during the 180 days prior to the date of that redemption, purchase or defeasance, of qualifying securities that have equity-like characteristics that are the same as, or more equity-like than, the applicable characteristics of the Series C junior subordinated debentures at the time of redemption, purchase or defeasance, subject to certain limitations described in the June 2007 RCC.

In September 2007, NEE and NEECH executed a Replacement Capital Covenant (September 2007 RCC) in connection with NEECH's offering of $250 million principal amount of its Series D Junior Subordinated Debentures due 2067 (Series D junior subordinated debentures). The September 2007 RCC is for the benefit of persons that buy, hold or sell a specified series of covered debt of NEECH (other than the Series D junior subordinated debentures) or, in certain cases, of NEE. FPL Group Capital Trust I's 5 7/8% Preferred Trust Securities have been initially designated as the covered debt under the September 2007 RCC. The September 2007 RCC provides that NEECH may redeem, purchase, or defease, and NEE and any majority-owned subsidiary of NEE or NEECH may purchase, any Series D junior subordinated debentures on or before September 1, 2037, only to the extent that the principal amount defeased or the applicable redemption or purchase price does not exceed a specified amount raised from the issuance, during the 180 days prior to the date of that redemption, purchase or defeasance, of qualifying securities that have equity-like characteristics that are the same as, or more equity-like than, the applicable characteristics of the Series D junior subordinated debentures at the time of redemption, purchase or defeasance, subject to certain limitations described in the September 2007 RCC.

New Accounting Rules and Interpretations

Amendments to the Consolidation Analysis - In February 2015, the Financial Accounting Standards Board (FASB) issued an accounting standard update which modifies the current consolidation guidance. See Note 1 - Variable Interest Entities.

Presentation of Debt Issuance Costs - In April 2015, the FASB issued an accounting standard update which changes the presentation of debt issuance costs in financial statements. See Note 1 - Debt Issuance Costs.

Revenue Recognition - In May 2014, the FASB issued a new accounting standard related to the recognition of revenue from contracts with customers and required disclosures. See Note 1 - Revenues and Rates.

Classification of Deferred Taxes - In November 2015, the FASB issued an accounting standard update which simplifies the classification of deferred taxes. See Note 1 - Income Taxes.

Financial Instruments - In January 2016, the FASB issued an accounting standard update which modifies guidance regarding certain aspects of recognition, measurement, presentation and disclosure of financial instruments. See Note 4 - Financial Instruments Accounting Standard Update.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

NEE's and FPL's significant accounting policies are described in Note 1 to the consolidated financial statements, which were prepared under GAAP. Critical accounting policies are those that NEE and FPL believe are both most important to the portrayal of their financial condition and results of operations, and require complex, subjective judgments, often as a result of the need to make estimates and assumptions about the effect of matters that are inherently uncertain. Judgments and uncertainties affecting the application of those policies may result in materially different amounts being reported under different conditions or using different assumptions.

NEE and FPL consider the following policies to be the most critical in understanding the judgments that are involved in preparing their consolidated financial statements:

Accounting for Derivatives and Hedging Activities

NEE and FPL use derivative instruments (primarily swaps, options, futures and forwards) to manage the commodity price risk inherent in the purchase and sale of fuel and electricity, as well as interest rate and foreign currency exchange rate risk associated primarily with outstanding and forecasted debt issuances and borrowings. In addition, NEE, through NEER, uses derivatives to optimize the value of power generation and gas infrastructure assets and engages in power and gas marketing and trading activities to take advantage of expected future favorable price movements.

Nature of Accounting Estimates

Accounting pronouncements require the use of fair value accounting if certain conditions are met, which requires significant judgment to measure the fair value of assets and liabilities. This applies not only to traditional financial derivative instruments, but to any contract having the accounting characteristics of a derivative. Much of the existing accounting guidance related to derivatives focuses on when certain contracts for the purchase and sale of power and certain fuel supply contracts can be excluded from derivative accounting rules, however the guidance does not address all contract issues. As a result, significant judgment must be used in applying derivatives accounting guidance to contracts. In the event changes in interpretation occur, it is possible that contracts that currently are excluded from derivatives accounting rules would have to be recorded on the balance sheet at fair value, with changes in the fair value recorded in the statement of income.

Assumptions and Accounting Approach

NEE's and FPL's derivative instruments, when required to be marked to market, are recorded on the balance sheet at fair value. Fair values for some of the longer-term contracts where liquid markets are not available are derived through internally developed models which estimate the fair value of a contract by calculating the present value of the difference between the contract price and the forward prices. Forward prices represent the price at which a buyer or seller could contract today to purchase or sell a commodity at a future date. The near-term forward market for electricity is generally liquid and therefore the prices in the early years of the forward curves reflect observable market quotes. However, in the later years, the market is much less liquid and forward price curves must be developed using factors including the forward prices for the commodities used as fuel to generate electricity, the expected system heat rate (which measures the efficiency of power plants in converting fuel to electricity) in the region where the purchase or sale takes place, and a fundamental forecast of expected spot prices based on modeled supply and demand in the region. NEE estimates the fair value of interest rate and foreign currency derivatives using a discounted cash flows valuation technique based on the net amount of estimated future cash inflows and outflows related to the derivative agreements. The assumptions in these models are critical since any changes therein could have a significant impact on the fair value of the derivative.

At FPL, substantially all changes in the fair value of energy derivative transactions are deferred as a regulatory asset or liability until the contracts are settled, and, upon settlement, any gains or losses are passed through the fuel clause. See Note 3.

In NEE's non-rate regulated operations, predominantly NEER, essentially all changes in the derivatives' fair value for power purchases and sales, fuel sales and trading activities are recognized on a net basis in operating revenues; fuel purchases used in the production of electricity are recognized in fuel, purchased power and interchange expense; and the equity method investees' related activity is recognized in equity in earnings of equity method investees in NEE's consolidated statements of income.

For those interest rate and foreign currency transactions accounted for as cash flow hedges, much of the effects of changes in fair value are reflected in OCI, a component of common shareholders' equity, rather than being recognized in current earnings. For those transactions accounted for as fair value hedges, the effects of changes in fair value are reflected in current earnings offset by changes in the fair value of the item being hedged.

Certain hedging transactions at NEER are entered into as economic hedges but the transactions do not meet the requirements for hedge accounting, hedge accounting treatment is not elected or hedge accounting has been discontinued. Changes in the fair value of those transactions are marked to market and reported in the consolidated statements of income, resulting in earnings volatility. These changes in fair value are captured in the non-qualifying hedge category in computing adjusted earnings. This could be significant to NEER's results because the economic offset to the positions are not marked to market. As a consequence, NEE's net income reflects only the movement in one part of economically-linked transactions. For example, a gain (loss) in the non-qualifying hedge category for certain energy derivatives is offset by decreases (increases) in the fair value of related physical asset positions in the portfolio or contracts, which are not marked to market under GAAP. For this reason, NEE's management views results expressed excluding the unrealized mark-to-market impact of the non-qualifying hedges as a meaningful measure of current period performance. For additional information regarding derivative instruments, see Note 3, Overview and Energy Marketing and Trading and Market Risk Sensitivity.

Accounting for Pension Benefits

NEE sponsors a qualified noncontributory defined benefit pension plan for substantially all employees of NEE and its subsidiaries. Management believes that, based on actuarial assumptions and the well-funded status of the pension plan, NEE will not be required to make any cash contributions to the qualified pension plan in the near future. The qualified pension plan has a fully funded trust dedicated to providing benefits under the plan. NEE allocates net periodic income associated with the pension plan to its subsidiaries annually using specific criteria.

Nature of Accounting Estimates

For the pension plan, the benefit obligation is the actuarial present value, as of the December 31 measurement date, of all benefits attributed by the pension benefit formula to employee service rendered to that date. The amount of benefit to be paid depends on a number of future events incorporated into the pension benefit formula, including estimates of the average life of employees/survivors and average years of service rendered. The projected benefit obligation is measured based on assumptions concerning future interest rates and future employee compensation levels. NEE derives pension income from actuarial calculations based on the plan's provisions and various management assumptions including discount rate, rate of increase in compensation levels and expected long-term rate of return on plan assets.

Assumptions and Accounting Approach

Accounting guidance requires recognition of the funded status of the pension plan in the balance sheet, with changes in the funded status recognized in other comprehensive income within shareholders' equity in the year in which the changes occur. Since NEE is the plan sponsor, and its subsidiaries do not have separate rights to the plan assets or direct obligations to their employees, this accounting guidance is reflected at NEE and not allocated to the subsidiaries. The portion of previously unrecognized actuarial gains and losses and prior service costs or credits that are estimated to be allocable to FPL as net periodic (income) cost in future periods and that otherwise would be recorded in AOCI are classified as regulatory assets and liabilities at NEE in accordance with regulatory treatment.

Net periodic pension income is included in O&M expenses, and is calculated using a number of actuarial assumptions. Those assumptions for the years ended December 31, 2015, 2014 and 2013 include:

	2015	2014	2013
Discount rate	**3.95%**	4.80%	4.00%
Salary increase	**4.10%**	4.00%	4.00%
Expected long-term rate of return[(a)]	**7.35%**	7.75%	7.75%

(a) In 2015, an expected long-term rate of return of 7.75% is presented net of investment management fees.

In developing these assumptions, NEE evaluated input, including other qualitative and quantitative factors, from its actuaries and consultants, as well as information available in the marketplace. In addition, for the expected long-term rate of return on pension plan assets, NEE considered different models, capital market return assumptions and historical returns for a portfolio with an equity/bond asset mix similar to its pension fund, as well as its pension fund's historical compounded returns. NEE believes that 7.35% is a reasonable long-term rate of return, net of investment management fees, on its pension plan assets. NEE will continue to evaluate all of its actuarial assumptions, including its expected rate of return, at least annually, and will adjust them as appropriate.

NEE utilizes in its determination of pension income a market-related valuation of plan assets. This market-related valuation reduces year-to-year volatility and recognizes investment gains or losses over a five-year period following the year in which they occur. Investment gains or losses for this purpose are the difference between the expected return calculated using the market-related value of plan assets and the actual return realized on those plan assets. Since the market-related value of plan assets recognizes gains or losses over a five-year period, the future value of plan assets will be affected as previously deferred gains or losses are recognized. Such gains and losses together with other differences between actual results and the estimates used in the actuarial valuations are deferred and recognized in determining pension income only to the extent they exceed 10% of the greater of projected benefit obligations or the market-related value of plan assets.

The following table illustrates the effect on net periodic income of changing the critical actuarial assumptions discussed above, while holding all other assumptions constant:

	Change in Assumption	Decrease in 2015 Net Periodic Income	
		NEE	FPL
		(millions)	
Expected long-term rate of return	(0.5)%	$ (18)	$ (11)
Discount rate	0.5%	$ (3)	$ (2)
Salary increase	0.5%	$ (2)	$ (1)

NEE also utilizes actuarial assumptions about mortality to help estimate obligations of the pension plan. NEE has adopted the latest revised mortality tables and mortality improvement scales released by the Society of Actuaries, which adoption did not have a material impact on the pension plan's obligation.

See Note 2.

Carrying Value of Long-Lived Assets

NEE evaluates long-lived assets for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable.

Nature of Accounting Estimates

The amount of future net cash flows, the timing of the cash flows and the determination of an appropriate interest rate all involve estimates and judgments about future events. In particular, the aggregate amount of cash flows determines whether an impairment exists, and the timing of the cash flows is critical in determining fair value. Because each assessment is based on the facts and circumstances associated with each long-lived asset, the effects of changes in assumptions cannot be generalized.

Assumptions and Accounting Approach

An impairment loss is required to be recognized if the carrying value of the asset exceeds the undiscounted future net cash flows associated with that asset. The impairment loss to be recognized is the amount by which the carrying value of the long-lived asset exceeds the asset's fair value. In most instances, the fair value is determined by discounting estimated future cash flows using an appropriate interest rate. See Note 4 - Nonrecurring Fair Value Measurements and Management's Discussion - NEER: Results of Operations - Gas Infrastructure.

Decommissioning and Dismantlement

The components of NEE's and FPL's decommissioning of nuclear plants, dismantlement of plants and other accrued asset removal costs are as follows:

	FPL								NEE	
	Nuclear Decommissioning		Fossil/Solar Dismantlement		Interim Removal Costs and Other		NEECH[a]			
	December 31,		December 31,		December 31,		December 31,		December 31,	
	2015	2014	**2015**	2014	**2015**	2014	**2015**	2014	**2015**	2014
	(millions)									
AROs	**$ 1,764**	$ 1,303	**$ 53**	$ 48	**$ 5**	$ 4	**$ 647**	$ 631	**$ 2,469**	$ 1,986
Less capitalized ARO asset net of accumulated depreciation	**375**	—	**38**	18	**—**	—	**—**	—	**413**	18
Accrued asset removal costs[b]	**279**	280	**315**	311	**1,327**	1,307	**9**	6	**1,930**	1,904
Asset retirement obligation regulatory expense difference[b]	**2,147**	2,239	**37**	20	**(2)**	(2)	**—**	—	**2,182**	2,257
Accrued decommissioning, dismantlement and other accrued asset removal costs	**$ 3,815** [c]	$ 3,822 [c]	**$ 367** [c]	$ 361 [c]	**$ 1,330** [c]	$ 1,309 [c]	**$ 656**	$ 637	**$ 6,168**	$ 6,129

(a) Primarily NEER.
(b) Regulatory liability on NEE's and FPL's consolidated balance sheets.
(c) Represents total amount accrued for ratemaking purposes.

Nature of Accounting Estimates

The calculation of the future cost of retiring long-lived assets, including nuclear decommissioning and plant dismantlement costs, involves estimating the amount and timing of future expenditures and making judgments concerning whether or not such costs are considered a legal obligation. Estimating the amount and timing of future expenditures includes, among other things, making projections of when assets will be retired and ultimately decommissioned and how costs will escalate with inflation. In addition, NEE and FPL also make interest rate and rate of return projections on their investments in determining recommended funding requirements for nuclear decommissioning costs. Periodically, NEE and FPL are required to update these estimates and projections which can affect the annual expense amounts recognized, the liabilities recorded and the annual funding requirements for nuclear decommissioning costs. For example, an increase of 0.25% in the assumed escalation rates for nuclear decommissioning costs would increase NEE's and FPL's asset retirement obligations and conditional asset retirement obligations (collectively, AROs) as of December 31, 2015 by $191 million and $149 million, respectively.

Assumptions and Accounting Approach

NEE and FPL each account for AROs under accounting guidance that requires a liability for the fair value of an ARO to be recognized in the period in which it is incurred if it can be reasonably estimated, with the offsetting associated asset retirement costs capitalized as part of the carrying amount of the long-lived assets.

FPL - For ratemaking purposes, FPL accrues and funds for nuclear plant decommissioning costs over the expected service life of each unit based on studies that are filed with the FPSC. The studies reflect, among other things, the expiration dates of the operating licenses for FPL's nuclear units. The most recent studies, filed in 2015, indicate that FPL's portion of the future cost of decommissioning its four nuclear units, including spent fuel storage above what is expected to be refunded by the DOE under the spent fuel settlement agreement, is approximately $7.5 billion, or $2.9 billion expressed in 2015 dollars.

FPL accrues the cost of dismantling its fossil and solar plants over the expected service life of each unit based on studies filed with the FPSC. Unlike nuclear decommissioning, dismantlement costs are not funded. The most recent studies became effective January 1, 2010. At December 31, 2015, FPL's portion of the ultimate cost to dismantle its fossil and solar units is approximately $752 million, or $411 million expressed in 2015 dollars. The majority of the dismantlement costs are not considered AROs. FPL accrues for interim removal costs over the life of the related assets based on depreciation studies approved by the FPSC. Any differences between the ARO amou nt recorded and the amount recorded for ratemaking purposes are reported as a regulatory liability in accordance with regulatory accounting.

NEER - NEER records a liability for the present value of its expected decommissioning costs which is determined using various internal and external data and applying a probability percentage to a variety of scenarios regarding the life of the plant and timing of decommissioning. The liability is being accreted using the interest method through the date decommissioning activities are expected to be complete. At December 31, 2015, the ARO for nuclear decommissioning of NEER's nuclear plants totaled approximately $423 million. NEER's portion of the ultimate cost of decommissioning its nuclear plants, including costs associated with spent fuel storage above what is expected to be refunded by the DOE under the spent fuel settlement agreement, is estimated to be approximately $11.8 billion, or $1.9 billion expressed in 2015 dollars.

See Note 1 - Asset Retirement Obligations and - Decommissioning of Nuclear Plants, Dismantlement of Plants and Other Accrued Asset Removal Costs and Note 13.

Regulatory Accounting

NEE's and FPL's regulatory assets and liabilities are as follows:

	NEE		FPL	
	December 31,		December 31,	
	2015	2014	**2015**	2014
	(millions)			
Regulatory assets:				
Current:				
Deferred clause and franchise expenses	**$ 75**	$ 268	**$ 75**	$ 268
Derivatives	**$ 218**	$ 364	**$ 218**	$ 364
Other	**$ 210**	$ 116	**$ 209**	$ 111
Noncurrent:				
Purchased power agreement termination	**$ 726**	$ —	**$ 726**	$ —
Securitized storm-recovery costs	**$ 208**	$ 294	**$ 208**	$ 294
Other	**$ 844**	$ 657	**$ 579**	$ 468
Regulatory liabilities:				
Current, included in other current liabilities	**$ 14**	$ 26	**$ 12**	$ 24
Noncurrent:				
Accrued asset removal costs	**$ 1,930**	$ 1,904	**$ 1,921**	$ 1,898
Asset retirement obligation regulatory expense difference	**$ 2,182**	$ 2,257	**$ 2,182**	$ 2,257
Other	**$ 494**	$ 476	**$ 492**	$ 476

Nature of Accounting Estimates

Regulatory assets and liabilities represent probable future revenues that will be recovered from or refunded to customers through the ratemaking process. Regulatory assets and liabilities are included in rate base or otherwise earn (pay) a return on investment during the recovery period.

Assumptions and Accounting Approach

Accounting guidance allows regulators to create assets and impose liabilities that would not be recorded by non-rate regulated entities. If NEE's rate-regulated entities, primarily FPL, were no longer subject to cost-based rate regulation, the existing regulatory assets and liabilities would be written off unless regulators specify an alternative means of recovery or refund. In addition, the regulators, including the FPSC for FPL, have the authority to disallow recovery of costs that it considers excessive or imprudently incurred. Such costs may include, among others, fuel and O&M expenses, the cost of replacing power lost when fossil and nuclear units are unavailable, storm restoration costs and costs associated with the construction or acquisition of new facilities. The continued applicability of regulatory accounting is assessed at each reporting period.

ENERGY MARKETING AND TRADING AND MARKET RISK SENSITIVITY

NEE and FPL are exposed to risks associated with adverse changes in commodity prices, interest rates and equity prices. Financial instruments and positions affecting the financial statements of NEE and FPL described below are held primarily for purposes other than trading. Market risk is measured as the potential loss in fair value resulting from hypothetical reasonably possible changes in commodity prices, interest rates or equity prices over the next year. Management has established risk management policies to monitor and manage such market risks, as well as credit risks.

Commodity Price Risk

NEE and FPL use derivative instruments (primarily swaps, options, futures and forwards) to manage the commodity price risk inherent in the purchase and sale of fuel and electricity. In addition, NEE, through NEER, uses derivatives to optimize the value of power generation and gas infrastructure assets and engages in power and gas marketing and trading activities to take advantage of expected future favorable price movements. See Critical Accounting Policies and Estimates - Accounting for Derivatives and Hedging Activities and Note 3.

During 2014 and 2015, the changes in the fair value of NEE's consolidated subsidiaries' energy contract derivative instruments were as follows:

	Trading	Hedges on Owned Assets: Non-Qualifying	Hedges on Owned Assets: FPL Cost Recovery Clauses	NEE Total
		(millions)		
Fair value of contracts outstanding at December 31, 2013	$ 301	$ 563	$ 46	$ 910
Reclassification to realized at settlement of contracts	(51)	58	(121)	(114)
Inception value of new contracts	(4)	—	—	(4)
Net option premium purchases (issuances)	(65)	2	—	(63)
Changes in fair value excluding reclassification to realized	139	275	(288)	126
Fair value of contracts outstanding at December 31, 2014	320	898	(363)	855
Reclassification to realized at settlement of contracts	**(227)**	**(359)**	**471**	(115)
Inception value of new contracts	**18**	**3**	—	21
Net option premium purchases (issuances)	**(45)**	**3**	—	(42)
Changes in fair value excluding reclassification to realized	**293**	**640**	**(326)**	607
Fair value of contracts outstanding at December 31, 2015	**359**	**1,185**	**(218)**	**1,326**
Net margin cash collateral paid (received)				**(371)**
Total mark-to-market energy contract net assets (liabilities) at December 31, 2015	**$ 359**	**$ 1,185**	**$ (218)**	**$ 955**

NEE's total mark-to-market energy contract net assets (liabilities) at December 31, 2015 shown above are included on the consolidated balance sheets as follows:

	December 31, 2015
	(millions)
Current derivative assets	**$ 695**
Assets held for sale	**57**
Noncurrent derivative assets	**1,185**
Current derivative liabilities	**(694)**
Liabilities associated with assets held for sale	**(16)**
Noncurrent derivative liabilities	**(272)**
NEE's total mark-to-market energy contract net assets	**$ 955**

The sources of fair value estimates and maturity of energy contract derivative instruments at December 31, 2015 were as follows:

	Maturity						
	2016	2017	2018	2019	2020	Thereafter	Total
	(millions)						
Trading:							
Quoted prices in active markets for identical assets	$ (25)	$ 23	$ 8	$ 4	$ —	$ —	$ 10
Significant other observable inputs	28	18	15	(5)	1	(17)	40
Significant unobservable inputs	160	79	17	19	11	23	309
Total	163	120	40	18	12	6	359
Owned Assets - Non-Qualifying:							
Quoted prices in active markets for identical assets	12	—	8	4	—	—	24
Significant other observable inputs	293	206	117	78	62	75	831
Significant unobservable inputs	43	34	35	25	20	173	330
Total	348	240	160	107	82	248	1,185
Owned Assets - FPL Cost Recovery Clauses:							
Quoted prices in active markets for identical assets	—	—	—	—	—	—	—
Significant other observable inputs	(218)	—	—	—	—	—	(218)
Significant unobservable inputs	(1)	1	—	—	—	—	—
Total	(219)	1	—	—	—	—	(218)
Total sources of fair value	$ 292	$ 361	$ 200	$ 125	$ 94	$ 254	$ 1,326

With respect to commodities, NEE's Exposure Management Committee (EMC), which is comprised of certain members of senior management, and NEE's chief executive officer are responsible for the overall approval of market risk management policies and the delegation of approval and authorization levels. The EMC and NEE's chief executive officer receive periodic updates on market positions and related exposures, credit exposures and overall risk management activities.

NEE uses a value-at-risk (VaR) model to measure commodity price market risk in its trading and mark-to-market portfolios. The VaR is the estimated nominal loss of market value based on a one-day holding period at a 95% confidence level using historical simulation methodology. As of December 31, 2015 and 2014, the VaR figures are as follows:

	Trading			Non-Qualifying Hedges and Hedges in FPL Cost Recovery Clauses[a]			Total		
	FPL	NEER	NEE	FPL	NEER	NEE	FPL	NEER	NEE
	(millions)								
December 31, 2014	$ —	$ 2	$ 2	$ 65	$ 62	$ 24	$ 65	$ 64	$ 24
December 31, 2015	$ —	$ 3	$ 3	$ 51	$ 44	$ 23	$ 51	$ 46	$ 25
Average for the year ended December 31, 2015	$ —	$ 1	$ 1	$ 35	$ 35	$ 24	$ 35	$ 35	$ 23

(a) Non-qualifying hedges are employed to reduce the market risk exposure to physical assets or contracts which are not marked to market. The VaR figures for the non-qualifying hedges and hedges in FPL cost recovery clauses category do not represent the economic exposure to commodity price movements.

Interest Rate Risk

NEE's and FPL's financial results are exposed to risk resulting from changes in interest rates as a result of their respective issuances of debt, investments in special use funds and other investments. NEE and FPL manage their respective interest rate exposure by monitoring current interest rates, entering into interest rate contracts and using a combination of fixed rate and variable rate debt. Interest rate contracts are used to mitigate and adjust interest rate exposure when deemed appropriate based upon market conditions or when required by financing agreements.

The following are estimates of the fair value of NEE's and FPL's financial instruments that are exposed to interest rate risk:

	December 31, 2015		December 31, 2014	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
	(millions)			
NEE:				
Fixed income securities:				
Special use funds	$ 1,789	$ 1,789 (a)	$ 1,965	$ 1,965 (a)
Other investments:				
Debt securities	$ 124	$ 124 (a)	$ 124	$ 124 (a)
Primarily notes receivable	$ 512	$ 722 (b)	$ 525	$ 679 (b)
Long-term debt, including current maturities	$ 28,897	$ 30,412 (c)	$ 27,876	$ 30,337 (c)
Interest rate contracts - net unrealized losses	$ (285)	$ (285) (d)	$ (216)	$ (216) (d)
FPL:				
Fixed income securities - special use funds	$ 1,378	$ 1,378 (a)	$ 1,568	$ 1,568 (a)
Long-term debt, including current maturities	$ 10,020	$ 11,028 (c)	$ 9,473	$ 11,105 (c)

(a) Primarily estimated using quoted market prices for these or similar issues.
(b) Primarily estimated using a discounted cash flow valuation technique based on certain observable yield curves and indices considering the credit profile of the borrower.
(c) Estimated using either quoted market prices for the same or similar issues or discounted cash flow valuation technique, considering the current credit spread of the debtor.
(d) Modeled internally using discounted cash flow valuation technique and applying a credit valuation adjustment.

The special use funds of NEE and FPL consist of restricted funds set aside to cover the cost of storm damage for FPL and for the decommissioning of NEE's and FPL's nuclear power plants. A portion of these funds is invested in fixed income debt securities primarily carried at estimated fair value. At FPL, changes in fair value, including any OTTI losses, result in a corresponding adjustment to the related liability accounts based on current regulatory treatment. The changes in fair value of NEE's non-rate regulated operations result in a corresponding adjustment to OCI, except for impairments deemed to be other than temporary, including any credit losses, which are reported in current period earnings. Because the funds set aside by FPL for storm damage could be needed at any time, the related investments are generally more liquid and, therefore, are less sensitive to changes in interest rates. The nuclear decommissioning funds, in contrast, are generally invested in longer-term securities, as decommissioning activities are not scheduled to begin until at least 2030 (2032 at FPL).

As of December 31, 2015, NEE had interest rate contracts with a notional amount of approximately $8.3 billion related to long-term debt issuances, of which $2.2 billion are fair value hedges at NEECH that effectively convert fixed-rate debt to a variable-rate instrument. The remaining $6.1 billion of notional amount of interest rate contracts relate to cash flow hedges to manage exposure to the variability of cash flows associated with variable-rate debt instruments, which primarily relate to NEER debt issuances. At December 31, 2015, the estimated fair value of NEE's fair value hedges and cash flow hedges was approximately $(14) million and $(271) million, respectively. See Note 3.

Based upon a hypothetical 10% decrease in interest rates, which is a reasonable near-term market change, the net fair value of NEE's net liabilities would increase by approximately $1,009 million ($506 million for FPL) at December 31, 2015.

Equity Price Risk

NEE and FPL are exposed to risk resulting from changes in prices for equity securities. For example, NEE's nuclear decommissioning reserve funds include marketable equity securities primarily carried at their market value of approximately $2,674 million and $2,634 million ($1,598 million and $1,561 million for FPL) at December 31, 2015 and 2014, respectively. At December 31, 2015, a hypothetical 10% decrease in the prices quoted by stock exchanges, which is a reasonable near-term market change, would result in a $246 million ($146 million for FPL) reduction in fair value. For FPL, a corresponding adjustment would be made to the related liability accounts based on current regulatory treatment, and for NEE's non-rate regulated operations, a corresponding adjustment would be made to OCI to the extent the market value of the securities exceeded amortized cost and to OTTI loss to the extent the market value is below amortized cost.

Credit Risk

NEE and its subsidiaries are also exposed to credit risk through their energy marketing and trading operations. Credit risk is the risk that a financial loss will be incurred if a counterparty to a transaction does not fulfill its financial obligation. NEE manages counterparty credit risk for its subsidiaries with energy marketing and trading operations through established policies, including counterparty credit limits, and in some cases credit enhancements, such as cash prepayments, letters of credit, cash and other collateral and guarantees.

Credit risk is also managed through the use of master netting agreements. NEE's credit department monitors current and forward credit exposure to counterparties and their affiliates, both on an individual and an aggregate basis. For all derivative and contractual transactions, NEE's energy marketing and trading operations, which include FPL's energy marketing and trading division, are exposed to losses in the event of nonperformance by counterparties to these transactions. Some relevant considerations when assessing NEE's energy marketing and trading operations' credit risk exposure include the following:

- Operations are primarily concentrated in the energy industry.
- Trade receivables and other financial instruments are predominately with energy, utility and financial services related companies, as well as municipalities, cooperatives and other trading companies in the U.S.
- Overall credit risk is managed through established credit policies and is overseen by the EMC.
- Prospective and existing customers are reviewed for creditworthiness based upon established standards, with customers not meeting minimum standards providing various credit enhancements or secured payment terms, such as letters of credit or the posting of margin cash collateral.
- Master netting agreements are used to offset cash and non-cash gains and losses arising from derivative instruments with the same counterparty. NEE's policy is to have master netting agreements in place with significant counterparties.

Based on NEE's policies and risk exposures related to credit, NEE and FPL do not anticipate a material adverse effect on their financial statements as a result of counterparty nonperformance. As of December 31, 2015, approximately 94% of NEE's and 100% of FPL's energy marketing and trading counterparty credit risk exposure is associated with companies that have investment grade credit ratings.

Item 8. Financial Statements and Supplementary Data

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

NextEra Energy, Inc.'s (NEE) and Florida Power & Light Company's (FPL) management are responsible for establishing and maintaining adequate internal control over financial reporting as defined in the Securities Exchange Act of 1934 Rules 13a-15(f) and 15d-15(f). The consolidated financial statements, which in part are based on informed judgments and estimates made by management, have been prepared in conformity with generally accepted accounting principles applied on a consistent basis.

To aid in carrying out this responsibility, we, along with all other members of management, maintain a system of internal accounting control which is established after weighing the cost of such controls against the benefits derived. In the opinion of management, the overall system of internal accounting control provides reasonable assurance that the assets of NEE and FPL and their subsidiaries are safeguarded and that transactions are executed in accordance with management's authorization and are properly recorded for the preparation of financial statements. In addition, management believes the overall system of internal accounting control provides reasonable assurance that material errors or irregularities would be prevented or detected on a timely basis by employees in the normal course of their duties. Any system of internal accounting control, no matter how well designed, has inherent limitations, including the possibility that controls can be circumvented or overridden and misstatements due to error or fraud may occur and not be detected. Also, because of changes in conditions, internal control effectiveness may vary over time. Accordingly, even an effective system of internal control will provide only reasonable assurance with respect to financial statement preparation and reporting.

The system of internal accounting control is supported by written policies and guidelines, the selection and training of qualified employees, an organizational structure that provides an appropriate division of responsibility and a program of internal auditing. NEE's written policies include a Code of Business Conduct & Ethics that states management's policy on conflicts of interest and ethical conduct. Compliance with the Code of Business Conduct & Ethics is confirmed annually by key personnel.

The Board of Directors pursues its oversight responsibility for financial reporting and accounting through its Audit Committee. This Committee, which is comprised entirely of independent directors, meets regularly with management, the internal auditors and the independent auditors to make inquiries as to the manner in which the responsibilities of each are being discharged. The independent auditors and the internal audit staff have free access to the Committee without management's presence to discuss auditing, internal accounting control and financial reporting matters.

In accordance with the U.S. Securities and Exchange Commission's published guidance, we have excluded from our current assessment the internal control over financial reporting for NET Holdings Management, LLC, which was acquired on October 1, 2015 and whose financial statements reflect total assets and operating revenues consisting of approximately three percent and less than one percent, respectively, of NextEra Energy's consolidated total assets and operating revenues as of and for the year ended December 31, 2015. NextEra Energy will include NET Holdings Management, LLC in its assessment as of December 31, 2016.

Management assessed the effectiveness of NEE's and FPL's internal control over financial reporting as of December 31, 2015, using the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in the *Internal Control - Integrated Framework (2013)*. Based on this assessment, management believes that NEE's and FPL's internal control over financial reporting was effective as of December 31, 2015.

NEE's and FPL's independent registered public accounting firm, Deloitte & Touche LLP, is engaged to express an opinion on NEE's and FPL's consolidated financial statements and an opinion on NEE's and FPL's internal control over financial reporting. Their reports are based on procedures believed by them to provide a reasonable basis to support such opinions. These reports appear on the following pages.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders
NextEra Energy, Inc. and Florida Power & Light Company:

We have audited the internal control over financial reporting of NextEra Energy, Inc. and subsidiaries (NextEra Energy) and Florida Power & Light Company and subsidiaries (FPL) as of December 31, 2015, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. As described in Management's Report on Internal Control Over Financial Reporting, management excluded from its assessment of NextEra Energy the internal control over financial reporting at NET Holdings Management, LLC, which was acquired on October 1, 2015 and whose financial statements constitute three percent of total assets and less than one percent of operating revenues of NextEra Energy's consolidated financial statement amounts as of and for the year ended December 31, 2015. Accordingly, our audit did not include the internal control over financial reporting at NET Holdings Management, LLC. NextEra Energy's and FPL's management are responsible for maintaining effective internal control over financial reporting and for their assessments of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on NextEra Energy's and FPL's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audits included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, NextEra Energy and FPL maintained, in all material respects, effective internal control over financial reporting as of December 31, 2015, based on the criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended December 31, 2015 of NextEra Energy and FPL and our report dated February 19, 2016 expressed an unqualified opinion on those financial statements and included an explanatory paragraph regarding NextEra Energy's and FPL's adoption of a new accounting standard in 2015.

February 19, 2016

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders
NextEra Energy, Inc. and Florida Power & Light Company:

We have audited the accompanying consolidated balance sheets of NextEra Energy, Inc. and subsidiaries (NextEra Energy) and the separate consolidated balance sheets of Florida Power & Light Company and subsidiaries (FPL) as of December 31, 2015 and 2014, and NextEra Energy's and FPL's related consolidated statements of income, NextEra Energy's consolidated statements of comprehensive income, NextEra Energy's and FPL's consolidated statements of cash flows, NextEra Energy's consolidated statements of equity, and FPL's consolidated statements of common shareholder's equity for each of the three years in the period ended December 31, 2015. These financial statements are the responsibility of NextEra Energy's and FPL's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of NextEra Energy, Inc. and subsidiaries and the financial position of Florida Power & Light Company and subsidiaries at December 31, 2015 and 2014, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2015, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1 to the consolidated financial statements, NextEra Energy and FPL have changed their classification and presentation of deferred taxes in 2015 due to the adoption of FASB ASU 2015-17, *Income Taxes – Balance Sheet Classification of Deferred Taxes*. The adoption of ASU 2015-17 was applied prospectively.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), NextEra Energy's and FPL's internal control over financial reporting as of December 31, 2015, based on the criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 19, 2016 expressed an unqualified opinion on NextEra Energy's and FPL's internal control over financial reporting.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2015, 2014 and 2013

1. Summary of Significant Accounting and Reporting Policies

Basis of Presentation - The operations of NextEra Energy, Inc. (NEE) are conducted primarily through its wholly owned subsidiary Florida Power & Light Company (FPL) and its wholly owned indirect subsidiary NextEra Energy Resources, LLC (NEER). FPL, a rate-regulated electric utility, supplies electric service to approximately 4.8 million customer accounts throughout most of the east and lower west coasts of Florida. NEER invests in independent power projects through both controlled and consolidated entities and noncontrolling ownership interests in joint ventures essentially all of which are accounted for under the equity method. NEER also participates in natural gas, natural gas liquids and oil production through non-operating ownership interests and in pipeline infrastructure through either wholly owned subsidiaries or noncontrolling or joint venture interests. See Note 15 for a discussion of the movement of the natural gas pipeline projects to the NEER segment from Corporate and Other.

The consolidated financial statements of NEE and FPL include the accounts of their respective majority-owned and controlled subsidiaries. Intercompany balances and transactions have been eliminated in consolidation. Amounts included in the consolidated financial statements and the accompanying Notes have been adjusted to reflect the retrospective application of a Financial Accounting Standards Board (FASB) accounting standard update related to the presentation of debt issuance costs in the financial statements. See Debt Issuance Costs below. In addition, certain amounts included in prior years' consolidated financial statements have been reclassified to conform to the current year's presentation. The preparation of financial statements requires the use of estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and the disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

NextEra Energy Partners, LP - NEE, through NEER, formed NextEra Energy Partners, LP (NEP) to acquire, manage and own contracted clean energy projects with stable, long-term cash flows through a limited partner interest in NextEra Energy Operating Partners, LP (NEP OpCo). On July 1, 2014, NEP closed its initial public offering (IPO) by issuing 18,687,500 common units representing limited partner interests. The proceeds from the sale of the common units, net of underwriting discounts, commissions and structuring fees, were approximately $438 million. NEP used such proceeds to purchase 18,687,500 common units of NEP OpCo, of which approximately $288 million was used to purchase common units from an indirect wholly owned subsidiary of NEE and $150 million was used to purchase common units from NEP OpCo. Through an indirect wholly owned subsidiary, NEE retained 74,440,000 units of NEP OpCo representing a 79.9% interest in NEP's operating projects. Additionally, NEE owns a controlling general partner interest in NEP and consolidates this entity for financial reporting purposes and presents NEP's limited partner interest as a noncontrolling interest in NEE's consolidated financial statements. Certain equity and asset transactions between NEP, NEER and NEP OpCo involve the exchange of cash, energy projects and ownership interests in NEP OpCo. These exchanges are accounted for under the profit sharing method and resulted in a profit sharing liability of approximately $447 million and $299 million at December 31, 2015 and 2014, respectively, which is reflected in noncurrent other liabilities on NEE's consolidated balance sheets. The profit sharing liability will be amortized into income on a straight-line basis over the estimated useful lives of the underlying energy projects held by NEP OpCo. During the purchase price adjustment period associated with the IPO, which is expected to extend into the fourth quarter of 2016, approximately $288 million of the profit sharing liability is subject to potential adjustment and will not be amortized.

During 2015, NEP sold an additional 11,857,925 common units and purchased an additional 11,857,925 NEP OpCo common units. Also, in 2015, a subsidiary of NEE purchased 27,000,000 of NEP OpCo's common units. After giving effect to these transactions, NEE's interest in NEP's operating projects is approximately 76.8% as of December 31, 2015. As of December 31, 2015, NEP, through NEER's contribution of energy projects to NEP OpCo, owns a portfolio of 19 wind and solar projects with generating capacity totaling approximately 2,210 megawatts (MW), as well as a portfolio of seven long-term contracted natural gas pipeline assets located in Texas.

Rate Regulation - FPL is subject to rate regulation by the Florida Public Service Commission (FPSC) and the Federal Energy Regulatory Commission (FERC). Its rates are designed to recover the cost of providing electric service to its customers including a reasonable rate of return on invested capital. As a result of this cost-based regulation, FPL follows the accounting guidance that allows regulators to create assets and impose liabilities that would not be recorded by non-rate regulated entities. Regulatory assets and liabilities represent probable future revenues that will be recovered from or refunded to customers through the ratemaking process.

Cost recovery clauses, which are designed to permit full recovery of certain costs and provide a return on certain assets allowed to be recovered through various clauses, include substantially all fuel, purchased power and interchange expense, certain construction-related costs for FPL's planned additional nuclear units at Turkey Point and FPL's solar generation facilities, and conservation and certain environmental-related costs. Revenues from cost recovery clauses are recorded when billed; FPL achieves matching of costs and related revenues by deferring the net underrecovery or overrecovery. Any underrecovered costs or overrecovered revenues are collected from or returned to customers in subsequent periods.

In September 2015, FPL assumed ownership of a 250 MW coal-fired generation facility located in Jacksonville, Florida (Cedar Bay) and terminated its long-term purchased power agreement for substantially all of the facility's capacity and energy for a purchase price of approximately $521 million. The FPSC approved a stipulation and settlement between the State of Florida Office of Public Counsel and FPL regarding issues relating to the ratemaking treatment for Cedar Bay. Key elements of the settlement included, among other things, the following:

- FPL will recover the purchase price and associated income tax gross-up as a regulatory asset which will be amortized over approximately nine years. Approximately $709 million will be recovered through the capacity clause with a return on the portion of the unamortized balance associated with the purchase price and $138 million will be recovered through base rates until FPL's next test year for a general base rate proceeding, at which time the unamortized balance will be transferred to the capacity clause for continued recovery until fully amortized. At December 31, 2015, the regulatory assets, net of amortization, totaled approximately $817 million and are included in purchased power agreement termination and current other regulatory assets on NEE's and FPL's consolidated balance sheets.
- The reserve amount that is available for amortization under the 2012 rate agreement, which is effective through December 2016, was reduced by $30 million to $370 million, unless FPL needs the entire $400 million reserve to maintain a minimum regulatory ROE of 9.50%. See Revenues and Rates - FPL Rates Effective January 2013 through December 2016 below.

In October 2015, the Florida Industrial Power Users Group filed a notice of appeal challenging the FPSC's approval of this settlement, which is pending before the Florida Supreme Court.

If FPL were no longer subject to cost-based rate regulation, the existing regulatory assets and liabilities would be written off unless regulators specify an alternative means of recovery or refund. In addition, the FPSC has the authority to disallow recovery of costs that it considers excessive or imprudently incurred. The continued applicability of regulatory accounting is assessed at each reporting period.

Revenues and Rates - FPL's retail and wholesale utility rate schedules are approved by the FPSC and the FERC, respectively. FPL records unbilled base revenues for the estimated amount of energy delivered to customers but not yet billed. FPL's unbilled base revenues are included in customer receivables on NEE's and FPL's consolidated balance sheets and amounted to approximately $246 million and $223 million at December 31, 2015 and 2014, respectively. FPL's operating revenues also include amounts resulting from cost recovery clauses (see Rate Regulation above), franchise fees, gross receipts taxes and surcharges related to storm-recovery bonds (see Note 9 - FPL). Franchise fees and gross receipts taxes are imposed on FPL; however, the FPSC allows FPL to include in the amounts charged to customers the amount of the gross receipts tax for all customers and the franchise amount for those customers located in the jurisdiction that imposes the fee. Accordingly, franchise fees and gross receipts taxes are reported gross in operating revenues and taxes other than income taxes and other in NEE's and FPL's consolidated statements of income and were approximately $722 million, $716 million and $680 million in 2015, 2014 and 2013, respectively. The revenues from the surcharges related to storm-recovery bonds included in operating revenues in NEE's and FPL's consolidated statements of income were approximately $115 million, $109 million and $108 million in 2015, 2014 and 2013, respectively. FPL also collects municipal utility taxes which are reported gross in customer receivables and accounts payable on NEE's and FPL's consolidated balance sheets.

FPL Rates Effective January 2013 through December 2016 - In January 2013, the FPSC issued a final order approving a stipulation and settlement between FPL and several intervenors in FPL's base rate proceeding (2012 rate agreement). Key elements of the 2012 rate agreement, which is effective from January 2013 through December 2016, include, among other things, the following:

- New retail base rates and charges were established in January 2013 resulting in an increase in retail base revenues of $350 million on an annualized basis.
- FPL's allowed regulatory return on common equity (ROE) is 10.50%, with a range of plus or minus 100 basis points. If FPL's earned regulatory ROE falls below 9.50%, FPL may seek retail base rate relief. If the earned regulatory ROE rises above 11.50%, any party to the 2012 rate agreement other than FPL may seek a review of FPL's retail base rates.
- Retail base rates will be increased by the annualized base revenue requirements for FPL's three modernization projects (Cape Canaveral, Riviera Beach and Port Everglades) as each of the modernized power plants becomes operational. (Cape Canaveral and Riviera Beach became operational in April 2013 and April 2014, respectively, and Port Everglades is expected to be operational by April 2016.)
- Cost recovery of FPL's West County Energy Center (WCEC) Unit No. 3 will continue to occur through the capacity cost recovery clause (capacity clause) (reported as retail base revenues).
- Subject to certain conditions, FPL may amortize, over the term of the 2012 rate agreement, a depreciation reserve surplus remaining at the end of 2012 under a previous rate agreement (approximately $224 million) and may amortize a portion of FPL's fossil dismantlement reserve up to a maximum of $176 million (collectively, the reserve), provided that in any year of the 2012 rate agreement, FPL must amortize at least enough reserve to maintain a 9.50% earned regulatory ROE but may not amortize any reserve that would result in an earned regulatory ROE in excess of 11.50%. See Rate Regulation above regarding a subsequent reduction in the reserve amount.
- Future storm restoration costs would be recoverable on an interim basis beginning 60 days from the filing of a cost recovery petition, but capped at an amount that could produce a surcharge of no more than $4 for every 1,000 kilowatt-hours (kWh) of

usage on residential bills during the first 12 months of cost recovery. Any additional costs would be eligible for recovery in subsequent years. If storm restoration costs exceed $800 million in any given calendar year, FPL may request an increase to the $4 surcharge to recover the amount above $800 million.

- An incentive mechanism whereby customers will receive 100% of certain gains, including but not limited to, gains from the purchase and sale of electricity and natural gas (including transportation and storage), up to a specified threshold. The gains exceeding that specified threshold will be shared by FPL and its customers.

2016 Base Rate Proceeding - In January 2016, FPL filed a formal notification with the FPSC indicating its intent to initiate a base rate proceeding, consisting of a four-year rate plan that would begin in January 2017 following the expiration of the 2012 rate agreement at the end of 2016. The notification stated that, based on preliminary estimates, FPL expects to request an increase to base annual revenue requirements of (i) approximately $860 million effective January 2017, (ii) approximately $265 million effective January 2018, and (iii) approximately $200 million effective when the proposed natural gas-fired combined-cycle unit in Okeechobee County, Florida becomes operational, which is expected to occur in mid-2019 assuming it receives approval by the Siting Board (comprised of the governor and cabinet) under the Florida Electrical Power Plant Siting Act. Under the proposed rate plan, FPL commits that if its requested adjustments to base annual revenue requirements are approved, it will not request further adjustments for 2020. In addition, FPL expects to propose an allowed regulatory return on common equity midpoint of 11.50%, which includes a 50 basis point performance adder. FPL expects to file its formal request to initiate a base rate proceeding in March 2016.

NEER's revenue is recorded on the basis of commodities delivered, contracts settled or services rendered and includes estimated amounts yet to be billed to customers. Certain commodity contracts for the purchase and sale of power that meet the definition of a derivative are recorded at fair value with subsequent changes in fair value recognized as revenue. See Energy Trading below and Note 3.

In May 2014, the FASB issued a new accounting standard which provides guidance on the recognition of revenue from contracts with customers and requires additional disclosures about the nature, amount, timing and uncertainty of revenue and cash flows from an entity's contracts with customers. The standard will be effective for NEE and FPL beginning January 1, 2018 and may be applied retrospectively to each prior period presented or retrospectively with the cumulative effect recognized as of the date of initial application. NEE and FPL are currently evaluating the effect the adoption of this standard will have, if any, on their consolidated financial statements.

Electric Plant, Depreciation and Amortization - The cost of additions to units of property of FPL and NEER is added to electric plant in service. In accordance with regulatory accounting, the cost of FPL's units of utility property retired, less estimated net salvage value, is charged to accumulated depreciation. Maintenance and repairs of property as well as replacements and renewals of items determined to be less than units of utility property are charged to other operations and maintenance (O&M) expenses. At December 31, 2015, the electric generation, transmission, distribution and general facilities of FPL represented approximately 50%, 11%, 33% and 6%, respectively, of FPL's gross investment in electric utility plant in service and other property. Substantially all of FPL's properties are subject to the lien of FPL's mortgage, which secures most debt securities issued by FPL. A number of NEER's generation and pipeline facilities are encumbered by liens securing various financings. The net book value of NEER's assets serving as collateral was approximately $13.9 billion at December 31, 2015. The American Recovery and Reinvestment Act of 2009, as amended (Recovery Act), provided for an option to elect a cash grant (convertible investment tax credits (ITCs)) for certain renewable energy property (renewable property). Convertible ITCs are recorded as a reduction in property, plant and equipment on NEE's and FPL's consolidated balance sheets and are amortized as a reduction to depreciation and amortization expense over the estimated life of the related property. At December 31, 2015 and 2014, convertible ITCs, net of amortization, were approximately $1.8 billion ($153 million at FPL) and $1.6 billion ($159 million at FPL). At December 31, 2015 and 2014, approximately $207 million and $1 million, respectively, of such convertible ITCs are included in other receivables on NEE's consolidated balance sheets.

Depreciation of FPL's electric property is primarily provided on a straight-line average remaining life basis. FPL includes in depreciation expense a provision for fossil and solar plant dismantlement, interim asset removal costs, accretion related to asset retirement obligations (see Decommissioning of Nuclear Plants, Dismantlement of Plants and Other Accrued Asset Removal Costs below), storm recovery amortization and amortization of pre-construction costs associated with planned nuclear units recovered through a cost recovery clause. For substantially all of FPL's property, depreciation studies are typically performed and filed with the FPSC at least every four years. As part of a previous rate agreement, the FPSC approved new depreciation rates which became effective January 1, 2010. In accordance with the 2012 rate agreement, FPL is not required to file depreciation studies during the effective period of the agreement and the previously approved depreciation rates remain in effect. As discussed in Revenues and Rates above, the use of reserve amortization is permitted under the 2012 rate agreement. FPL files a twelve-month forecast with the FPSC each year which contains a regulatory ROE intended to be earned based on the best information FPL has at that time assuming normal weather. This forecast establishes a fixed targeted regulatory ROE. In order to earn the targeted regulatory ROE in each reporting period under the 2012 rate agreement, reserve amortization is calculated using a trailing thirteen-month average of retail rate base and capital structure in conjunction with the trailing twelve months regulatory retail base net operating income, which primarily includes the retail base portion of base and other revenues net of O&M, depreciation and amortization, interest and tax expenses. In general, the net impact of these income statement line items is adjusted, in part, by reserve amortization or its reversal to earn the targeted regulatory ROE. In accordance with the 2012 rate agreement, FPL recorded approximately $(15) million, $(33) million and $155 million of reserve (reversal) amortization in 2015, 2014 and 2013, respectively. The reserve is

amortized as a reduction of (or reversed as an increase to) regulatory liabilities - accrued asset removal costs on NEE's and FPL's consolidated balance sheets. The weighted annual composite depreciation and amortization rate for FPL's electric utility plant in service, including capitalized software, but excluding the effects of decommissioning, dismantlement and the depreciation adjustments discussed above, was approximately 3.3%, 3.3% and 3.4% for 2015, 2014 and 2013, respectively.

NEER's electric plant in service less salvage value, if any, are depreciated primarily using the straight-line method over their estimated useful lives. At December 31, 2015 and 2014, wind, nuclear, natural gas and solar plants represented approximately 62% and 63%, 11% and 12%, 3% and 8%, and 9% and 7%, respectively, of NEER's depreciable electric plant in service and other property. The estimated useful lives of NEER's plants range primarily from 25 to 30 years for wind, natural gas and solar plants and from 25 to 47 years for nuclear plants. NEER reviews the estimated useful lives of its fixed assets on an ongoing basis. NEER's oil and gas production assets, representing approximately 7% and 6%, respectively, of NEER's depreciable electric plant in service and other property at December 31, 2015 and 2014, are accounted for under the successful efforts method. Depletion expenses for the acquisition of reserve rights and development costs are recognized using the unit of production method.

Nuclear Fuel - FPL and NEER have several contracts for the supply of uranium, conversion, enrichment and fabrication of nuclear fuel. See Note 14 - Contracts. FPL's and NEER's nuclear fuel costs are charged to fuel expense on a unit of production method.

Construction Activity - Allowance for funds used during construction (AFUDC) is a non-cash item which represents the allowed cost of capital, including an ROE, used to finance FPL construction projects. The portion of AFUDC attributable to borrowed funds is recorded as a reduction of interest expense and the remainder is recorded as other income. FPSC rules limit the recording of AFUDC to projects that have an estimated cost in excess of 0.5% of a utility's plant in service balance and require more than one year to complete. FPSC rules allow construction projects below the 0.5% threshold as a component of rate base. During 2015, 2014 and 2013, FPL capitalized AFUDC at a rate of 6.34%, 6.34% and 6.52%, respectively, which amounted to approximately $88 million, $50 million and $81 million, respectively. See Note 14 - Commitments.

FPL's construction work in progress includes construction materials, progress payments on major equipment contracts, engineering costs, AFUDC and other costs directly associated with the construction of various projects. Upon completion of the projects, these costs are transferred to electric utility plant in service and other property. Capitalized costs associated with construction activities are charged to O&M expenses when recoverability is no longer probable. See Rate Regulation above for information on recovery of costs associated with new nuclear capacity and solar generation facilities.

NEER capitalizes project development costs once it is probable that such costs will be realized through the ultimate construction of a power plant or sale of development rights. At December 31, 2015 and 2014, NEER's capitalized development costs totaled approximately $133 million and $122 million, respectively, which are included in noncurrent other assets on NEE's consolidated balance sheets. These costs include land rights and other third-party costs directly associated with the development of a new project. Upon commencement of construction, these costs either are transferred to construction work in progress or remain in other assets, depending upon the nature of the cost. Capitalized development costs are charged to O&M expenses when it is no longer probable that these costs will be realized.

NEER's construction work in progress includes construction materials, progress payments on major equipment contracts, third-party engineering costs, capitalized interest and other costs directly associated with the construction and development of various projects. Interest capitalized on construction projects amounted to approximately $100 million, $104 million and $109 million during 2015, 2014 and 2013, respectively. Interest expense allocated from NextEra Energy Capital Holdings, Inc. (NEECH) to NEER is based on a deemed capital structure of 70% debt. Upon commencement of plant operation, costs associated with construction work in progress are transferred to electric plant in service and other property.

Asset Retirement Obligations - NEE and FPL each account for asset retirement obligations and conditional asset retirement obligations (collectively, AROs) under accounting guidance that requires a liability for the fair value of an ARO to be recognized in the period in which it is incurred if it can be reasonably estimated, with the offsetting associated asset retirement costs capitalized as part of the carrying amount of the long-lived assets. The asset retirement cost is subsequently allocated to expense, for NEE's non-rate regulated operations, and regulatory liability, for FPL, using a systematic and rational method over the asset's estimated useful life. Changes in the ARO resulting from the passage of time are recognized as an increase in the carrying amount of the liability and as accretion expense, which is included in depreciation and amortization expense in the consolidated statements of income for NEE's non-rate regulated operations, and ARO and regulatory liability, in the case of FPL. Changes resulting from revisions to the timing or amount of the original estimate of cash flows are recognized as an increase or a decrease in the asset retirement cost, or income when asset retirement cost is depleted, in the case of NEE's non-rate regulated operations, and ARO and regulatory liability, in the case of FPL. See Decommissioning of Nuclear Plants, Dismantlement of Plants and Other Accrued Asset Removal Costs below and Note 13.

Decommissioning of Nuclear Plants, Dismantlement of Plants and Other Accrued Asset Removal Costs - For ratemaking purposes, FPL accrues for the cost of end of life retirement and disposal of its nuclear, fossil and solar plants over the expected service life of each unit based on nuclear decommissioning and fossil and solar dismantlement studies periodically filed with the FPSC. In addition, FPL accrues for interim removal costs over the life of the related assets based on depreciation studies approved by the

FPSC. As approved by the FPSC, FPL previously suspended its annual decommissioning accrual. For financial reporting purposes, FPL recognizes decommissioning and dismantlement liabilities in accordance with accounting guidance that requires a liability for the fair value of an ARO to be recognized in the period in which it is incurred. Any differences between expense recognized for financial reporting purposes and the amount recovered through rates are reported as a regulatory liability in accordance with regulatory accounting. See Revenues and Rates, Electric Plant, Depreciation and Amortization, Asset Retirement Obligations above and Note 13.

Nuclear decommissioning studies are performed at least every five years and are submitted to the FPSC for approval. FPL filed updated nuclear decommissioning studies with the FPSC in December 2015. These studies reflect FPL's current plans, under the operating licenses, for prompt dismantlement of Turkey Point Units Nos. 3 and 4 following the end of plant operation with decommissioning activities commencing in 2032 and 2033, respectively, and provide for St. Lucie Unit No. 1 to be mothballed beginning in 2036 with decommissioning activities to be integrated with the prompt dismantlement of St. Lucie Unit No. 2 in 2043. These studies also assume that FPL will be storing spent fuel on site pending removal to a United States (U.S.) government facility. The studies indicate FPL's portion of the ultimate costs of decommissioning its four nuclear units, including costs associated with spent fuel storage above what is expected to be refunded by the U.S. Department of Energy (DOE) under a spent fuel settlement agreement, to be approximately $7.5 billion, or $2.9 billion expressed in 2015 dollars.

Restricted funds for the payment of future expenditures to decommission FPL's nuclear units are included in nuclear decommissioning reserve funds, which are included in special use funds on NEE's and FPL's consolidated balance sheets. Marketable securities held in the decommissioning funds are primarily classified as available for sale and carried at fair value. See Note 4. FPL does not currently make contributions to the decommissioning funds, other than the reinvestment of dividends and interest. Fund earnings, consisting of dividends, interest and realized gains and losses, as well as any changes in unrealized gains and losses are not recognized in income and are reflected as a corresponding offset in the related regulatory liability accounts. During 2015, 2014 and 2013 fund earnings on decommissioning funds were approximately $96 million, $91 million and $167 million, respectively. The tax effects of amounts not yet recognized for tax purposes are included in deferred income taxes.

Fossil and solar plant dismantlement studies are typically performed at least every four years and are submitted to the FPSC for approval. FPL's latest fossil and solar plant dismantlement studies became effective January 1, 2010 and resulted in an annual expense of $18 million which is recorded in depreciation and amortization expense in NEE's and FPL's consolidated statements of income. At December 31, 2015, FPL's portion of the ultimate cost to dismantle its fossil and solar units is approximately $752 million, or $411 million expressed in 2015 dollars. In accordance with the 2012 rate agreement, FPL is not required to file fossil and solar dismantlement studies during the effective period of the agreement.

NEER records nuclear decommissioning liabilities for Seabrook Station (Seabrook), Duane Arnold Energy Center (Duane Arnold) and Point Beach Nuclear Power Plant (Point Beach) in accordance with accounting guidance that requires a liability for the fair value of an ARO to be recognized in the period in which it is incurred. The liability is being accreted using the interest method through the date decommissioning activities are expected to be complete. See Note 13. At December 31, 2015 and 2014, NEER's ARO related to nuclear decommissioning was approximately $423 million and $462 million, respectively, and was determined using various internal and external data and applying a probability percentage to a variety of scenarios regarding the life of the plant and timing of decommissioning. NEER's portion of the ultimate cost of decommissioning its nuclear plants, including costs associated with spent fuel storage above what is expected to be refunded by the DOE under a spent fuel settlement agreement, is estimated to be approximately $11.8 billion, or $1.9 billion expressed in 2015 dollars.

Seabrook files a comprehensive nuclear decommissioning study with the New Hampshire Nuclear Decommissioning Financing Committee (NDFC) every four years; the most recent study was filed in 2015. Seabrook's decommissioning funding plan is also subject to annual review by the NDFC. Currently, there are no ongoing decommissioning funding requirements for Seabrook, Duane Arnold and Point Beach, however, the U.S. Nuclear Regulatory Commission (NRC), and in the case of Seabrook, the NDFC, has the authority to require additional funding in the future. NEER's portion of Seabrook's, Duane Arnold's and Point Beach's restricted funds for the payment of future expenditures to decommission these plants is included in nuclear decommissioning reserve funds, which are included in special use funds on NEE's consolidated balance sheets. Marketable securities held in the decommissioning funds are primarily classified as available for sale and carried at fair value. Market adjustments result in a corresponding adjustment to other comprehensive income (OCI), except for unrealized losses associated with marketable securities considered to be other than temporary, including any credit losses, which are recognized as other than temporary impairment losses on securities held in nuclear decommissioning funds in NEE's consolidated statements of income. Fund earnings are recognized in income and are reinvested in the funds. See Note 4. The tax effects of amounts not yet recognized for tax purposes are included in deferred income taxes.

Major Maintenance Costs - FPL recognizes costs associated with planned major nuclear maintenance in accordance with regulatory treatment and records the related accrual as a regulatory liability. FPL expenses costs associated with planned fossil maintenance as incurred. FPL's estimated nuclear maintenance costs for each nuclear unit's next planned outage are accrued over the period from the end of the last outage to the end of the next planned outage. Any difference between the estimated and actual costs is included in O&M expenses when known. The accrued liability for nuclear maintenance costs at December 31, 2015 and 2014 totaled approximately $48 million and $50 million, respectively, and is included in regulatory liabilities - other on NEE's and FPL's consolidated

balance sheets. For the years ended December 31, 2015, 2014 and 2013, FPL recognized approximately $90 million, $76 million and $92 million, respectively, in nuclear maintenance costs which are primarily included in O&M expenses in NEE's and FPL's consolidated statements of income.

NEER uses the deferral method to account for certain planned major maintenance costs. NEER's major maintenance costs for its nuclear generation units and combustion turbines are capitalized and amortized on a unit of production method over the period from the end of the last outage to the beginning of the next planned outage. NEER's capitalized major maintenance costs, net of accumulated amortization, totaled approximately $97 million and $141 million at December 31, 2015 and 2014, respectively, and are included in noncurrent other assets on NEE's consolidated balance sheets. For the years ended December 31, 2015, 2014 and 2013, NEER amortized approximately $79 million, $81 million and $93 million in major maintenance costs which are included in O&M expenses in NEE's consolidated statements of income.

Cash Equivalents - Cash equivalents consist of short-term, highly liquid investments with original maturities of three months or less.

Restricted Cash - At December 31, 2015 and 2014, NEE had approximately $244 million ($75 million for FPL) and $228 million ($38 million for FPL), respectively, of restricted cash included in other current assets on NEE's and FPL's consolidated balance sheets, which was primarily related to margin cash collateral requirements, debt service payments and bond proceeds held for construction at FPL. Where offsetting positions exist, restricted cash related to margin cash collateral is netted against derivative instruments. See Note 3.

Allowance for Doubtful Accounts - FPL maintains an accumulated provision for uncollectible customer accounts receivable that is estimated using a percentage, derived from historical revenue and write-off trends, of the previous five months of revenue. Additional amounts are included in the provision to address specific items that are not considered in the calculation described above. NEER regularly reviews collectibility of its receivables and establishes a provision for losses estimated as a percentage of accounts receivable based on the historical bad debt write-off trends for its retail electricity provider operations and, when necessary, using the specific identification method for all other receivables.

Inventory - FPL values materials, supplies and fossil fuel inventory using a weighted-average cost method. NEER's materials, supplies and fossil fuel inventories are carried at the lower of weighted-average cost or market, unless evidence indicates that the weighted-average cost (even if in excess of market) will be recovered with a normal profit upon sale in the ordinary course of business.

Energy Trading - NEE provides full energy and capacity requirements services primarily to distribution utilities, which include load-following services and various ancillary services, in certain markets and engages in power and gas marketing and trading activities to optimize the value of electricity and fuel contracts, generation facilities and gas infrastructure assets, as well as to take advantage of projected favorable commodity price movements. Trading contracts that meet the definition of a derivative are accounted for at fair value and realized gains and losses from all trading contracts, including those where physical delivery is required, are recorded net for all periods presented. See Note 3.

Securitized Storm-Recovery Costs, Storm Fund and Storm Reserve - In connection with the 2007 storm-recovery bond financing (see Note 9 - FPL), the net proceeds to FPL from the sale of the storm-recovery property were used primarily to reimburse FPL for its estimated net of tax deficiency in its storm and property insurance reserve (storm reserve) and provide for a storm and property insurance reserve fund (storm fund). Upon the issuance of the storm-recovery bonds, the storm reserve deficiency was reclassified to securitized storm-recovery costs and is recorded as a regulatory asset on NEE's and FPL's consolidated balance sheets. As storm-recovery charges are billed to customers, the securitized storm-recovery costs are amortized and included in depreciation and amortization expense in NEE's and FPL's consolidated statements of income. Marketable securities held in the storm fund are classified as available for sale and are carried at fair value with market adjustments, including any other than temporary impairment losses, resulting in a corresponding adjustment to the storm reserve. Fund earnings, net of taxes, are reinvested in the fund. The tax effects of amounts not yet recognized for tax purposes are included in deferred income taxes. The storm fund is included in special use funds on NEE's and FPL's consolidated balance sheets and was approximately $74 million and $75 million at December 31, 2015 and 2014, respectively. See Note 4.

The storm reserve that was reestablished in an FPSC financing order related to the issuance of the storm-recovery bonds was not initially reflected on NEE's and FPL's consolidated balance sheets because the associated regulatory asset did not meet the specific recognition criteria under the accounting guidance for certain regulated entities. As a result, the storm reserve will be recognized as a regulatory liability as the storm-recovery charges are billed to customers and charged to depreciation and amortization expense in NEE's and FPL's consolidated statements of income. Furthermore, the storm reserve will be reduced as storm costs are reimbursed. As of December 31, 2015, FPL had the capacity to absorb up to approximately $119 million in future prudently incurred storm restoration costs without seeking recovery through a rate adjustment from the FPSC or filing a petition with the FPSC.

Impairment of Long-Lived Assets - NEE evaluates long-lived assets for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is required to be recognized if the carrying value of the asset exceeds the undiscounted future net cash flows associated with that asset. The impairment loss to be recognized is the

amount by which the carrying value of the long-lived asset exceeds the asset's fair value. In most instances, the fair value is determined by discounting estimated future cash flows using an appropriate interest rate. See Note 4 - Nonrecurring Fair Value Measurements.

Goodwill and Other Intangible Assets - NEE's goodwill and other intangible assets are as follows:

	Weighted-Average Useful Lives	December 31,	
		2015	2014
	(years)	(millions)	
Goodwill (by reporting unit):			
NEER segment:			
Gas infrastructure, primarily Texas pipelines		$ 635	$ —
Customer supply		72	72
Generation assets		43	47
Other		28	28
Total goodwill		$ 778	$ 147
Other intangible assets not subject to amortization, primarily land easements		$ 143	$ 143
Other intangible assets subject to amortization:			
Customer relationships associated with gas infrastructure	40	$ 720	$ —
Purchased power agreements	22	328	348
Other, primarily transmission and development rights and customer lists	22	136	139
Total		1,184	487
Accumulated amortization		(120)	(125)
Total other intangible assets subject to amortization - net		$ 1,064	$ 362

NEE's goodwill relates to various acquisitions which were accounted for using the purchase method of accounting. Other intangible assets subject to amortization are amortized, primarily on a straight-line basis, over their estimated useful lives. For the years ended December 31, 2015, 2014 and 2013, amortization expense was approximately $17 million, $15 million and $13 million, respectively, and is expected to be approximately $38 million, $37 million, $36 million, $35 million and $35 million for 2016, 2017, 2018, 2019 and 2020, respectively.

Goodwill and other intangible assets are included in noncurrent other assets on NEE's consolidated balance sheets. Goodwill and other intangible assets not subject to amortization are assessed for impairment at least annually by applying a fair value-based analysis. Other intangible assets subject to amortization are periodically reviewed when impairment indicators are present to assess recoverability from future operations using undiscounted future cash flows.

Debt Issuance Costs - Effective December 31, 2015, NEE and FPL retrospectively adopted an accounting standard update which changed the presentation of debt issuance costs in the consolidated financial statements. This standard update requires that debt issuance costs be presented on the balance sheet as a direct deduction from the carrying amount of the related debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs was not affected by this standard update. Upon adoption, NEE reclassified debt issuance costs of $324 million ($85 million for FPL) as of December 31, 2014 from noncurrent other assets to long-term debt.

Pension Plan - NEE allocates net periodic pension income to its subsidiaries based on the pensionable earnings of the subsidiaries' employees. Accounting guidance requires recognition of the funded status of the pension plan in the balance sheet, with changes in the funded status recognized in other comprehensive income within shareholders' equity in the year in which the changes occur. Since NEE is the plan sponsor, and its subsidiaries do not have separate rights to the plan assets or direct obligations to their employees, this accounting guidance is reflected at NEE and not allocated to the subsidiaries. The portion of previously unrecognized actuarial gains and losses and prior service costs or credits that are estimated to be allocable to FPL as net periodic (income) cost in future periods and that otherwise would be recorded in accumulated other comprehensive income (AOCI) are classified as regulatory assets and liabilities at NEE in accordance with regulatory treatment.

Stock-Based Compensation - NEE accounts for stock-based payment transactions based on grant-date fair value. Compensation costs for awards with graded vesting are recognized on a straight-line basis over the requisite service period for the entire award. See Note 11 - Stock-Based Compensation.

Income Taxes - Deferred income taxes are recognized on all significant temporary differences between the financial statement and tax bases of assets and liabilities. In connection with the tax sharing agreement between NEE and its subsidiaries, the income tax provision at each subsidiary reflects the use of the "separate return method," except that tax benefits that could not be used on a

separate return basis, but are used on the consolidated tax return, are recorded by the subsidiary that generated the tax benefits. Any remaining consolidated income tax benefits or expenses are recorded at the corporate level. Included in other regulatory assets and other regulatory liabilities on NEE's and FPL's consolidated balance sheets is the revenue equivalent of the difference in deferred income taxes computed under accounting rules, as compared to regulatory accounting rules. The net regulatory asset totaled $283 million ($268 million for FPL) and $250 million ($236 million for FPL) at December 31, 2015 and 2014, respectively, and is being amortized in accordance with the regulatory treatment over the estimated lives of the assets or liabilities for which the deferred tax amount was initially recognized.

NEER recognizes ITCs as a reduction to income tax expense when the related energy property is placed into service. Production tax credits (PTCs) are recognized as wind energy is generated and sold based on a per kWh rate prescribed in applicable federal and state statutes and are recorded as a reduction of current income taxes payable, unless limited by tax law in which instance they are recorded as deferred tax assets. NEE and FPL record a deferred income tax benefit created by the convertible ITCs on the difference between the financial statement and tax bases of renewable property. For NEER, this deferred income tax benefit is recorded in income tax expense in the year that the renewable property is placed in service. For FPL, this deferred income tax benefit is offset by a regulatory liability, which is amortized as a reduction of depreciation expense over the approximate lives of the related renewable property in accordance with the regulatory treatment. At December 31, 2015 and 2014, the net deferred income tax benefits associated with FPL's convertible ITCs were approximately $48 million and $50 million, respectively, and are included in other regulatory assets and regulatory liabilities on NEE's and FPL's consolidated balance sheets.

A valuation allowance is recorded to reduce the carrying amounts of deferred tax assets when it is more likely than not that such assets will not be realized. NEE recognizes interest income (expense) related to unrecognized tax benefits (liabilities) in interest income and interest expense, respectively, net of the amount deferred at FPL. At FPL, the offset to accrued interest receivable (payable) on income taxes is classified as a regulatory liability (regulatory asset) which will be amortized to income (expense) over a five-year period upon settlement in accordance with regulatory treatment. All tax positions taken by NEE in its income tax returns that are recognized in the financial statements must satisfy a more-likely-than-not threshold. See Note 5.

In November 2015, the FASB issued an accounting standard update which simplifies the classification of deferred taxes by eliminating the requirement to separate deferred tax assets and liabilities between current and noncurrent amounts, and instead requires deferred taxes to be presented as noncurrent on the balance sheet. NEE and FPL decided to early adopt this standard update effective for the year ended December 31, 2015, and to apply it prospectively.

Sale of Differential Membership Interests - Certain subsidiaries of NEER sold their Class B membership interest in entities that have ownership interests in wind facilities, with generating capacity totaling approximately 5,272 MW at December 31, 2015, to third-party investors. In exchange for the cash received, the holders of the Class B membership interests will receive a portion of the economic attributes of the facilities, including income tax attributes, for variable periods. The transactions are not treated as a sale under the accounting rules and the proceeds received are deferred and recorded as a liability in deferral related to differential membership interests - VIEs on NEE's consolidated balance sheets. The deferred amount is being recognized in benefits associated with differential membership interests - net in NEE's consolidated statements of income as the Class B members receive their portion of the economic attributes. NEE continues to operate and manage the wind facilities, and consolidates the entities that own the wind facilities.

Variable Interest Entities (VIEs) - An entity is considered to be a VIE when its total equity investment at risk is not sufficient to permit the entity to finance its activities without additional subordinated financial support, or its equity investors, as a group, lack the characteristics of having a controlling financial interest. A reporting company is required to consolidate a VIE as its primary beneficiary when it has both the power to direct the activities of the VIE that most significantly impact the VIE's economic performance, and the obligation to absorb losses or the right to receive benefits from the VIE that could potentially be significant to the VIE. NEE and FPL evaluate whether an entity is a VIE whenever reconsideration events as defined by the accounting guidance occur. See Note 9.

In February 2015, the FASB issued an accounting standard update that will modify current consolidation guidance. The standard makes changes to both the variable interest entity model and the voting interest entity model, including modifying the evaluation of whether limited partnerships or similar legal entities are VIEs or voting interest entities and amending the guidance for assessing how relationships of related parties affect the consolidation analysis of VIEs. The standard is effective for NEE and FPL beginning January 1, 2016. NEE and FPL continue to evaluate the effect the adoption of this standard will have on their consolidated financial statements.

Proposed Merger - In 2014, NEE and Hawaiian Electric Industries, Inc. (HEI) entered into an Agreement and Plan of Merger (the merger agreement) pursuant to which Hawaiian Electric Company, Inc., HEI's wholly owned electric utility subsidiary, will become a wholly owned subsidiary of NEE and each outstanding share of HEI common stock will be converted into the right to receive 0.2413 shares of NEE common stock. Completion of the merger and the actual closing date remain subject to the satisfaction of certain conditions, including Hawaii Public Utilities Commission approval. The merger agreement contains certain termination rights and provides that, upon termination of the merger agreement under specified circumstances, HEI or NEE, as the case may be, would be required to pay to the other party a termination fee of $90 million and reimburse the other party for up to $5 million of its documented out-of-pocket expenses incurred in connection with the merger agreement.

Assets and Liabilities Associated with Assets Held for Sale - In November 2015, a subsidiary of NEER entered into an agreement to sell its ownership interest in its merchant natural gas generation facilities located in Texas, which have a total generating capacity of 2,884 MW at December 31, 2015. The transaction is expected to close in the first quarter of 2016, pending the receipt of necessary regulatory approvals and satisfaction of other customary closing conditions. The carrying amounts of the major classes of assets and liabilities related to the facilities that were classified as held for sale on NEE's consolidated balance sheets primarily represent property, plant and equipment and the related long-term debt.

2. Employee Retirement Benefits

Employee Pension Plan and Other Benefits Plans - NEE sponsors a qualified noncontributory defined benefit pension plan for substantially all employees of NEE and its subsidiaries. NEE also has a supplemental executive retirement plan (SERP), which includes a non-qualified supplemental defined benefit pension component that provides benefits to a select group of management and highly compensated employees, and sponsors a contributory postretirement plan for other benefits for retirees of NEE and its subsidiaries meeting certain eligibility requirements. The total accrued benefit cost of the SERP and postretirement plans is approximately $321 million ($230 million for FPL) and $355 million ($237 million for FPL) at December 31, 2015 and 2014, respectively.

Plan Assets, Benefit Obligations and Funded Status - The changes in assets, benefit obligations and the funded status of the pension plan are as follows:

	2015	2014
	(millions)	
Change in plan assets:		
Fair value of plan assets at January 1	$ 3,698	$ 3,692
Actual return on plan assets	(8)	203
Benefit payments	(127)	(197)
Fair value of plan assets at December 31	$ 3,563	$ 3,698
Change in benefit obligation:		
Obligation at January 1	$ 2,454	$ 2,236
Service cost	70	61
Interest cost	97	101
Plan amendments	—	(9)
Actuarial losses (gains) - net	(86)	262
Benefit payments	(127)	(197)
Obligation at December 31[a]	$ 2,408	$ 2,454
Funded status:		
Prepaid benefit costs at NEE at December 31	$ 1,155	$ 1,244
Prepaid benefit costs at FPL at December 31	$ 1,243	$ 1,189

(a) NEE's accumulated pension benefit obligation, which includes no assumption about future salary levels, at December 31, 2015 and 2014 was approximately $2,366 million and $2,400 million, respectively.

NEE's unrecognized amounts included in accumulated other comprehensive income (loss) yet to be recognized as components of prepaid pension cost are as follows:

	2015	2014
	(millions)	
Components of AOCI:		
Unrecognized prior service cost (net of $1 and $1 tax benefit, respectively)	$ (2)	$ (2)
Unrecognized losses (net of $38 and $10 tax benefit, respectively)	(60)	(16)
Total	$ (62)	$ (18)

NEE's unrecognized amounts included in regulatory assets yet to be recognized as components of net prepaid pension cost are as follows:

	2015	2014
	(millions)	
Unrecognized prior service cost	$ 9	$ 10
Unrecognized losses	232	128
Total	$ 241	$ 138

The following table provides the assumptions used to determine the benefit obligation for the pension plan. These rates are used in determining net periodic income in the following year.

	2015	2014
Discount rate	4.35%	3.95%
Salary increase	4.10%	4.10%

NEE's investment policy for the pension plan recognizes the benefit of protecting the plan's funded status, thereby avoiding the necessity of future employer contributions. Its broad objectives are to achieve a high rate of total return with a prudent level of risk taking while maintaining sufficient liquidity and diversification to avoid large losses and preserve capital over the long term.

The NEE pension plan fund's current target asset allocation, which is expected to be reached over time, is 45% equity investments, 32% fixed income investments, 13% alternative investments and 10% convertible securities. The pension fund's investment strategy emphasizes traditional investments, broadly diversified across the global equity and fixed income markets, using a combination of different investment styles and vehicles. The pension fund's equity and fixed income holdings consist of both directly held securities as well as commingled investment arrangements such as common and collective trusts, pooled separate accounts, registered investment companies and limited partnerships. The pension fund's convertible security assets are principally direct holdings of convertible securities and includes a convertible security oriented limited partnership. The pension fund's alternative investment holdings consist of absolute return oriented limited partnerships that use a broad range of investment strategies on a global basis as well as other alternative investments, such as private equity, income and real estate oriented investments in limited partnerships.

The fair value measurements of NEE's pension plan assets by fair value hierarchy level are as follows:

	December 31, 2015[a]			
	Quoted Prices in Active Markets for Identical Assets or Liabilities (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
	(millions)			
Equity securities[b]	$ 910	$ 21	$ 1	$ 932
Equity commingled vehicles[c]	—	792	—	792
U.S. Government and municipal bonds	110	13	—	123

(c) Includes foreign investments of $306 million.
(d) Includes foreign investments of $88 million.
(e) Includes foreign investments of $200 million. Reflects the retrospective application of an accounting standard update in 2015 whereby certain investments that are measured at fair value using the net asset value per share (or its equivalent) practical expedient are excluded from the fair value hierarchy.

Expected Cash Flows - The following table provides information about benefit payments expected to be paid by the pension plan for each of the following calendar years (in millions):

2016	$ 144
2017	$ 150
2018	$ 155
2019	$ 160
2020	$ 163
2021 - 2025	$ 865

Net Periodic (Income) Cost - The components of net periodic (income) cost for the plans is as follows:

	Pension Benefits			Postretirement Benefits		
	2015	2014	2013	**2015**	2014	2013
			(millions)			
Service cost	**$ 70**	$ 61	$ 72	$ 3	$ 3	$ 4
Interest cost	**97**	101	94	13	16	14
Expected return on plan assets	**(253)**	(241)	(238)	(1)	(1)	(1)
Amortization of prior service cost (benefit)	**1**	5	7	(3)	(3)	(2)
Amortization of losses	**—**	—	2	2	—	2
Special termination benefits	**—**	—	46	—	—	—
Net periodic (income) cost at NEE	**$ (85)**	$ (74)	$ (17)	**$ 14**	$ 15	$ 17
Net periodic (income) cost at FPL	**$ (55)**	$ (47)	$ (7)	**$ 11**	$ 11	$ 13

Other Comprehensive Income - The components of net periodic income (cost) recognized in OCI for the pension plan is as follows:

	2015	2014	2013
		(millions)	
Prior service benefit (net of $3 tax expense)	$ —	$ 4	$ —
Net gains (losses) (net of $27 and $29 tax benefit and $58 tax expense, respectively)	(44)	(45)	91
Amortization of prior service benefit	—	1	2
Total	$ (44)	$ (40)	$ 93

Regulatory Assets (Liabilities) - The components of net periodic (income) cost recognized during the year in regulatory assets (liabilities) for the pension plan is as follows:

	2015	2014
	(millions)	
Prior service benefit	$ —	$ (12)
Unrecognized losses	104	226
Amortization of prior service benefit	(1)	(3)
Total	$ 103	$ 211

The assumptions used to determine net periodic income for the pension plan are as follows:

	2015	2014	2013
Discount rate	3.95%	4.80%	4.00%
Salary increase	4.10%	4.00%	4.00%
Expected long-term rate of return[a][b]	7.35%	7.75%	7.75%

(a) In developing the expected long-term rate of return on assets assumption for its pension plan, NEE evaluated input, including other qualitative and quantitative factors, from its actuaries and consultants, as well as information available in the marketplace. NEE considered different models, capital market return assumptions and historical returns for a portfolio with an equity/bond asset mix similar to its pension fund. NEE also considered its pension fund's historical compounded returns.
(b) In 2015, an expected long-term rate of return of 7.75% is presented net of investment management fees.

Employee Contribution Plans - NEE offers employee retirement savings plans which allow eligible participants to contribute a percentage of qualified compensation through payroll deductions. NEE makes matching contributions to participants' accounts. Defined contribution expense pursuant to these plans was approximately $63 million, $59 million and $46 million for NEE ($40 million, $37 million and $30 million for FPL) for the years ended December 31, 2015, 2014 and 2013, respectively. See Note 11 - Employee Stock Ownership Plan.

3. Derivative Instruments

NEE and FPL use derivative instruments (primarily swaps, options, futures and forwards) to manage the commodity price risk inherent in the purchase and sale of fuel and electricity, as well as interest rate and foreign currency exchange rate risk associated primarily with outstanding and forecasted debt issuances and borrowings, and to optimize the value of NEER's power generation and gas infrastructure assets.

With respect to commodities related to NEE's competitive energy business, NEER employs risk management procedures to conduct its activities related to optimizing the value of its power generation and gas infrastructure assets, providing full energy and capacity requirements services primarily to distribution utilities, and engaging in power and gas marketing and trading activities to take advantage of expected future favorable price movements and changes in the expected volatility of prices in the energy markets. These risk management activities involve the use of derivative instruments executed within prescribed limits to manage the risk associated with fluctuating commodity prices. Transactions in derivative instruments are executed on recognized exchanges or via the over-the-counter (OTC) markets, depending on the most favorable credit terms and market execution factors. For NEER's power generation and gas infrastructure assets, derivative instruments are used to hedge the commodity price risk associated with the fuel requirements of the assets, where applicable, as well as to hedge all or a portion of the expected output of these assets. These hedges are designed to reduce the effect of adverse changes in the wholesale forward commodity markets associated with NEER's power generation and gas infrastructure assets. With regard to full energy and capacity requirements services, NEER is required to vary the quantity of energy and related services based on the load demands of the customers served. For this type of transaction, derivative instruments are used to hedge the anticipated electricity quantities required to serve these customers and reduce the effect of unfavorable changes in the forward energy markets. Additionally, NEER takes positions in the energy markets based on differences between actual forward market levels and management's view of fundamental market conditions, including supply/demand imbalances, changes in traditional flows of energy, changes in short- and long-term weather patterns and anticipated

regulatory and legislative outcomes. NEER uses derivative instruments to realize value from these market dislocations, subject to strict risk management limits around market, operational and credit exposure.

Derivative instruments, when required to be marked to market, are recorded on NEE's and FPL's consolidated balance sheets as either an asset or liability measured at fair value. At FPL, substantially all changes in the derivatives' fair value are deferred as a regulatory asset or liability until the contracts are settled, and, upon settlement, any gains or losses are passed through the fuel and purchased power cost recovery clause (fuel clause). For NEE's non-rate regulated operations, predominantly NEER, essentially all changes in the derivatives' fair value for power purchases and sales, fuel sales and trading activities are recognized on a net basis in operating revenues; fuel purchases used in the production of electricity are recognized in fuel, purchased power and interchange expense; and the equity method investees' related activity is recognized in equity in earnings of equity method investees in NEE's consolidated statements of income. Settlement gains and losses are included within the line items in the consolidated statements of income to which they relate. Transactions for which physical delivery is deemed not to have occurred are presented on a net basis in the consolidated statements of income. For commodity derivatives, NEE believes that, where offsetting positions exist at the same location for the same time, the transactions are considered to have been netted and therefore physical delivery has been deemed not to have occurred for financial reporting purposes. Settlements related to derivative instruments are primarily recognized in net cash provided by operating activities in NEE's and FPL's consolidated statements of cash flows.

While most of NEE's derivatives are entered into for the purpose of managing commodity price risk, optimizing the value of NEER's power generation and gas infrastructure assets, reducing the impact of volatility in interest rates on outstanding and forecasted debt issuances and borrowings and managing foreign currency exchange risk, hedge accounting is only applied where specific criteria are met and it is practicable to do so. In order to apply hedge accounting, the transaction must be designated as a hedge and it must be highly effective in offsetting the hedged risk. Additionally, for hedges of forecasted transactions, the forecasted transactions must be probable. For interest rate and foreign currency derivative instruments, generally NEE assesses a hedging instrument's effectiveness by using nonstatistical methods including dollar value comparisons of the change in the fair value of the derivative to the change in the fair value or cash flows of the hedged item. Hedge effectiveness is tested at the inception of the hedge and on at least a quarterly basis throughout its life. The effective portion of the gain or loss on a derivative instrument designated as a cash flow hedge is reported as a component of OCI and is reclassified into earnings in the period(s) during which the transaction being hedged affects earnings or when it becomes probable that a forecasted transaction being hedged would not occur. The ineffective portion of net unrealized gains (losses) on these hedges is reported in earnings in the current period. In April 2013, NEE discontinued hedge accounting for cash flow hedges related to interest rate swaps associated with the solar projects in Spain (see Note 14 - Spain Solar Projects). At December 31, 2015, NEE's AOCI included amounts related to interest rate cash flow hedges with expiration dates through October 2036 and foreign currency cash flow hedges with expiration dates through September 2030. Approximately $50 million of net losses included in AOCI at December 31, 2015 is expected to be reclassified into earnings within the next 12 months as principal and/or interest payments are made. Such amounts assume no change in interest rates, currency exchange rates or scheduled principal payments. In January 2016, NEE discontinued hedge accounting for its cash flow and fair value hedges related to interest rate and foreign currency derivative instruments.

Fair Value of Derivative Instruments - The tables below present NEE's and FPL's gross derivative positions at December 31, 2015 and December 31, 2014, as required by disclosure rules. However, the majority of the underlying contracts are subject to master netting agreements and generally would not be contractually settled on a gross basis. Therefore, the tables below also present the derivative positions on a net basis, which reflect the offsetting of positions of certain transactions within the portfolio, the contractual ability to settle contracts under master netting arrangements and the netting of margin cash collateral (see Note 4 - Recurring Fair Value Measurements for netting information), as well as the location of the net derivative position on the consolidated balance sheets.

(a) Reflects the netting of approximately $197 million in margin cash collateral received from counterparties.
(b) Reflects the netting of approximately $97 million in margin cash collateral received from counterparties.
(c) Reflects the netting of approximately $20 million in margin cash collateral paid to counterparties.
(d) Reflects the netting of approximately $10 million in margin cash collateral paid to counterparties.

At December 31, 2015 and 2014, NEE had approximately $27 million and $60 million (none at FPL), respectively, in margin cash collateral received from counterparties that was not offset against derivative assets in the above presentation. These amounts are included in current other liabilities on NEE's consolidated balance sheets. Additionally, at December 31, 2015 and 2014, NEE had approximately $116 million and $122 million (none at FPL), respectively, in margin cash collateral paid to counterparties that was not offset against derivative assets or liabilities in the above presentation. These amounts are included in current other assets on NEE's consolidated balance sheets.

Income Statement Impact of Derivative Instruments - Gains (losses) related to NEE's cash flow hedges are recorded in NEE's consolidated financial statements (none at FPL) as follows:

	Year Ended December 31, 2015			Year Ended December 31, 2014			Year Ended December 31, 2013		
	Interest Rate Contracts	**Foreign Currency Swaps**	**Total**	Interest Rate Contracts	Foreign Currency Swaps	Total	Interest Rate Contracts	Foreign Currency Swaps	Total
				(millions)					
Gains (losses) recognized in OCI	**$ (113)**	**$ (12)**	**$ (125)**	$ (132)	$ (89)	$ (221)	$ 150	$ (21)	$ 129
Losses reclassified from AOCI to net income	**$ (73)** [a]	**$ (15)** [b]	**$ (88)**	$ (77) [a]	$ (78) [b]	$ (155)	$ (61) [a]	$ (44) [b]	$ (105)

(a) Included in interest expense.
(b) For 2015, 2014 and 2013, losses of approximately $11 million, $8 million and $4 million, respectively, are included in interest expense and the balances are included in other - net.

For the years ended December 31, 2015, 2014 and 2013, NEE recorded gains (losses) of approximately $(4) million, $20 million and $(65) million, respectively, on fair value hedges which resulted in corresponding increases (decreases) in the related debt.

Gains (losses) related to NEE's derivatives not designated as hedging instruments are recorded in NEE's consolidated statements of income as follows:

	Years Ended December 31,		
	2015	2014	2013
		(millions)	
Commodity contracts:[a]			
Operating revenues	**$ 932**	$ 420	$ 76
Fuel, purchased power and interchange	**8**	1	—
Foreign currency swap - other - net	**—**	(1)	(72)
Interest rate contracts - interest expense	**8**	(64)	3
Total	**$ 948**	$ 356	$ 7

(a) For the years ended December 31, 2015, 2014 and 2013, FPL recorded gains (losses) of approximately $(326) million, $(289) million and $81 million, respectively, related to commodity contracts as regulatory liabilities (assets) on its consolidated balance sheets.

Notional Volumes of Derivative Instruments - The following table represents net notional volumes associated with derivative instruments that are required to be reported at fair value in NEE's and FPL's consolidated financial statements. The table includes significant volumes of transactions that have minimal exposure to commodity price changes because they are variably priced agreements. These volumes are only an indication of the commodity exposure that is managed through the use of derivatives. They do not represent net physical asset positions or non-derivative positions and their hedges, nor do they represent NEE's and FPL's net economic exposure, but only the net notional derivative positions that fully or partially hedge the related asset positions. NEE and FPL had derivative commodity contracts for the following net notional volumes:

Commodity Type	**December 31, 2015**				December 31, 2014			
	NEE		**FPL**		NEE		FPL	
				(millions)				
Power	**(112)**	**MWh[a]**	**—**		(73)	MWh[a]	—	
Natural gas	**1,321**	**MMBtu[b]**	**833**	**MMBtu[b]**	1,436	MMBtu[b]	845	MMBtu[b]
Oil	**(9)**	**barrels**	**—**		(11)	barrels	—	

(a) Megawatt-hours
(b) One million British thermal units

At December 31, 2015 and 2014, NEE had interest rate contracts with notional amounts totaling approximately $8.3 billion and $7.4 billion, respectively, and foreign currency swaps with notional amounts totaling $715 million and $661 million, respectively.

Credit-Risk-Related Contingent Features - Certain derivative instruments contain credit-risk-related contingent features including, among other things, the requirement to maintain an investment grade credit rating from specified credit rating agencies and certain financial ratios, as well as credit-related cross-default and material adverse change triggers. At December 31, 2015 and 2014, the aggregate fair value of NEE's derivative instruments with credit-risk-related contingent features that were in a liability position was approximately $2.2 billion ($224 million for FPL) and $2.7 billion ($369 million for FPL), respectively.

If the credit-risk-related contingent features underlying these agreements and other commodity-related contracts were triggered, certain subsidiaries of NEE, including FPL, could be required to post collateral or settle contracts according to contractual terms which generally allow netting of contracts in offsetting positions. Certain contracts contain multiple types of credit-related triggers. To the extent these contracts contain a credit ratings downgrade trigger, the maximum exposure is included in the following credit ratings collateral posting requirements. If FPL's and NEECH's credit ratings were downgraded to BBB/Baa2 (a two level downgrade for FPL and a one level downgrade for NEECH from the current lowest applicable rating), applicable NEE subsidiaries would be required to post collateral such that the total posted collateral would be approximately $250 million ($20 million at FPL) as of December 31, 2015 and $700 million ($130 million at FPL) as of December 31, 2014. If FPL's and NEECH's credit ratings were downgraded to below investment grade, applicable NEE subsidiaries would be required to post additional collateral such that the total posted collateral would be approximately $2.5 billion ($0.6 billion at FPL) and $2.8 billion ($0.7 billion at FPL) as of December 31, 2015 and 2014, respectively. Some contracts do not contain credit ratings downgrade triggers, but do contain provisions that require certain financial measures be maintained and/or have credit-related cross-default triggers. In the event these provisions were triggered, applicable NEE subsidiaries could be required to post additional collateral of up to approximately $660 million ($120 million at FPL) and $850 million ($200 million at FPL) as of December 31, 2015 and 2014, respectively.

Collateral related to derivatives may be posted in the form of cash or credit support in the normal course of business. At December 31, 2015, applicable NEE subsidiaries have posted approximately $123 million ($3 million at FPL) in the form of letters of credit which

could be applied toward the collateral requirements described above. At December 31, 2014, applicable NEE subsidiaries have posted approximately $20 million (none at FPL) in cash and $236 million (none at FPL), respectively, in the form of letters of credit which could be applied toward the collateral requirements described above. FPL and NEECH have credit facilities generally in excess of the collateral requirements described above that would be available to support, among other things, derivative activities. Under the terms of the credit facilities, maintenance of a specific credit rating is not a condition to drawing on these credit facilities, although there are other conditions to drawing on these credit facilities.

Additionally, some contracts contain certain adequate assurance provisions where a counterparty may demand additional collateral based on subjective events and/or conditions. Due to the subjective nature of these provisions, NEE and FPL are unable to determine an exact value for these items and they are not included in any of the quantitative disclosures above.

4. Fair Value Measurements

The fair value of assets and liabilities are determined using either unadjusted quoted prices in active markets (Level 1) or pricing inputs that are observable (Level 2) whenever that information is available and using unobservable inputs (Level 3) to estimate fair value only when relevant observable inputs are not available. NEE and FPL use several different valuation techniques to measure the fair value of assets and liabilities, relying primarily on the market approach of using prices and other market information for identical and/or comparable assets and liabilities for those assets and liabilities that are measured at fair value on a recurring basis. NEE's and FPL's assessment of the significance of any particular input to the fair value measurement requires judgment and may affect their placement within the fair value hierarchy levels. Non-performance risk, including the consideration of a credit valuation adjustment, is also considered in the determination of fair value for all assets and liabilities measured at fair value.

Cash Equivalents and Restricted Cash - NEE primarily holds investments in money market funds. The fair value of these funds is calculated using current market prices.

Special Use Funds and Other Investments - NEE and FPL hold primarily debt and equity securities directly, as well as indirectly through commingled funds. Substantially all directly held equity securities are valued at their quoted market prices. For directly held debt securities, multiple prices and price types are obtained from pricing vendors whenever possible, which enables cross-provider validations. A primary price source is identified based on asset type, class or issue of each security. Commingled funds, which are similar to mutual funds, are maintained by banks or investment companies and hold certain investments in accordance with a stated set of objectives. The fair value of commingled funds is primarily derived from the quoted prices in active markets of the underlying securities. Because the fund shares are offered to a limited group of investors, they are not considered to be traded in an active market.

Derivative Instruments - NEE and FPL measure the fair value of commodity contracts using prices observed on commodities exchanges and in the OTC markets, or through the use of industry-standard valuation techniques, such as option modeling or discounted cash flows techniques, incorporating both observable and unobservable valuation inputs. The resulting measurements are the best estimate of fair value as represented by the transfer of the asset or liability through an orderly transaction in the marketplace at the measurement date.

Most exchange-traded derivative assets and liabilities are valued directly using unadjusted quoted prices. For exchange-traded derivative assets and liabilities where the principal market is deemed to be inactive based on average daily volumes and open interest, the measurement is established using settlement prices from the exchanges, and therefore considered to be valued using other observable inputs.

NEE, through its subsidiaries, including FPL, also enters into OTC commodity contract derivatives. The majority of these contracts are transacted at liquid trading points, and the prices for these contracts are verified using quoted prices in active markets from exchanges, brokers or pricing services for similar contracts.

NEE, through NEER, also enters into full requirements contracts, which, in most cases, meet the definition of derivatives and are measured at fair value. These contracts typically have one or more inputs that are not observable and are significant to the valuation of the contract. In addition, certain exchange and non-exchange traded derivative options at NEE have one or more significant inputs that are not observable, and are valued using industry-standard option models.

In all cases where NEE and FPL use significant unobservable inputs for the valuation of a commodity contract, consideration is given to the assumptions that market participants would use in valuing the asset or liability. The primary input to the valuation models for commodity contracts is the forward commodity curve for the respective instruments. Other inputs include, but are not limited to, assumptions about market liquidity, volatility, correlation and contract duration as more fully described below in Significant Unobservable Inputs Used in Recurring Fair Value Measurements. In instances where the reference markets are deemed to be inactive or do not have transactions for a similar contract, the derivative assets and liabilities may be valued using significant other observable inputs and potentially significant unobservable inputs. In such instances, the valuation for these contracts is established using techniques including extrapolation from or interpolation between actively traded contracts, or estimated basis adjustments from liquid trading points. NEE and FPL regularly evaluate and validate the inputs used to determine fair value by a number of

methods, consisting of various market price verification procedures, including the use of pricing services and multiple broker quotes to support the market price of the various commodities. In all cases where there are assumptions and models used to generate inputs for valuing derivative assets and liabilities, the review and verification of the assumptions, models and changes to the models are undertaken by individuals that are independent of those responsible for estimating fair value.

NEE uses interest rate contracts and foreign currency swaps to mitigate and adjust interest rate and foreign currency exchange exposure related primarily to certain outstanding and forecasted debt issuances and borrowings when deemed appropriate based on market conditions or when required by financing agreements. NEE estimates the fair value of these derivatives using a discounted cash flows valuation technique based on the net amount of estimated future cash inflows and outflows related to the agreements.

Recurring Fair Value Measurements - NEE's and FPL's financial assets and liabilities and other fair value measurements made on a recurring basis by fair value hierarchy level are as follows:

	December 31, 2015

(a) Includes the effect of the contractual ability to settle contracts under master netting arrangements and the netting of margin cash collateral payments and receipts. NEE and FPL also have contract settlement receivable and payable balances that are subject to the master netting arrangements but are not offset within the consolidated balance sheets and are recorded in customer receivables - net and accounts payable, respectively.
(b) Includes restricted cash of approximately $61 million ($36 million for FPL) in other current assets on the consolidated balance sheets.
(c) Excludes investments accounted for under the equity method and loans not measured at fair value on a recurring basis. See Fair Value of Financial Instruments Recorded at the Carrying Amount below.
(d) Primarily invested in commingled funds whose underlying securities would be Level 1 if those securities were held directly by NEE or FPL.
(e) See Note 3 - Fair Value of Derivative Instruments for a reconciliation of net derivatives to NEE's and FPL's consolidated balance sheets.

(a) Includes the effect of the contractual ability to settle contracts under master netting arrangements and the netting of margin cash collateral payments and receipts. NEE and FPL also have contract settlement receivable and payable balances that are subject to the master netting arrangements but are not offset within the consolidated balance sheets and are recorded in customer receivables - net and accounts payable, respectively.
(b) Excludes investments accounted for under the equity method and loans not measured at fair value on a recurring basis. See Fair Value of Financial Instruments Recorded at the Carrying Amount below.
(c) Primarily invested in commingled funds whose underlying securities would be Level 1 if those securities were held directly by NEE or FPL.
(d) See Note 3 - Fair Value of Derivative Instruments for a reconciliation of net derivatives to NEE's and FPL's consolidated balance sheets.

Significant Unobservable Inputs Used in Recurring Fair Value Measurements - The valuation of certain commodity contracts requires the use of significant unobservable inputs. All forward price, implied volatility, implied correlation and interest rate inputs used in the valuation of such contracts are directly based on third-party market data, such as broker quotes and exchange settlements, when that data is available. If third-party market data is not available, then industry standard methodologies are used to develop inputs that maximize the use of relevant observable inputs and minimize the use of unobservable inputs. Observable inputs, including some forward prices, implied volatilities and interest rates used for determining fair value are updated daily to reflect the best available market information. Unobservable inputs which are related to observable inputs, such as illiquid portions of forward price or volatility curves, are updated daily as well, using industry standard techniques such as interpolation and extrapolation, combining observable forward inputs supplemented by historical market and other relevant data. Other unobservable inputs, such as implied correlations, customer migration rates from full requirements contracts and some implied volatility curves, are modeled using proprietary models based on historical data and industry standard techniques.

All price, volatility, correlation and customer migration inputs used in valuation are subject to validation by the Trading Risk

Management group. The Trading Risk Management group performs a risk management function responsible for assessing credit, market and operational risk impact, reviewing valuation methodology and modeling, confirming transactions, monitoring approval processes and developing and monitoring trading limits. The Trading Risk Management group is separate from the transacting group. For markets where independent third-party data is readily available, validation is conducted daily by directly reviewing this market data against inputs utilized by the transacting group, and indirectly by critically reviewing daily risk reports. For markets where independent third-party data is not readily available, additional analytical reviews are performed on at least a quarterly basis. These analytical reviews are designed to ensure that all price and volatility curves used for fair valuing transactions are adequately validated each quarter, and are reviewed and approved by the Trading Risk Management group. In addition, other valuation assumptions such as implied correlations and customer migration rates are reviewed and approved by the Trading Risk Management group on a periodic basis. Newly created models used in the valuation process are also subject to testing and approval by the Trading Risk Management group prior to use and established models are reviewed annually, or more often as needed, by the Trading Risk Management group.

On a monthly basis, the Exposure Management Committee (EMC), which is comprised of certain members of senior management, meets with representatives from the Trading Risk Management group and the transacting group to discuss NEE's and FPL's energy risk profile and operations, to review risk reports and to discuss fair value issues as necessary. The EMC develops guidelines required for an appropriate risk management control infrastructure, which includes implementation and monitoring of compliance with Trading Risk Management policy. The EMC executes its risk management responsibilities through direct oversight and delegation of its responsibilities to the Trading Risk Management group, as well as to other corporate and business unit personnel.

The significant unobservable inputs used in the valuation of NEE's commodity contracts categorized as Level 3 of the fair value hierarchy at December 31, 2015 are as follows:

Transaction Type	Fair Value at December 31, 2015		Valuation Technique(s)	Significant Unobservable Inputs	Range
	Assets	Liabilities			
	(millions)				
Forward contracts - power	$ 636	$ 252	Discounted cash flow	Forward price (per MWh)	$6 — $113
Forward contracts - gas	24	25	Discounted cash flow	Forward price (per MMBtu)	$1 — $6
Forward contracts - other commodity related	16	6	Discounted cash flow	Forward price (various)	$(18) — $55
Options - power	68	58	Option models	Implied correlations	(5)% — 99%
				Implied volatilities	1% — 308%
Options - primarily gas	105	164	Option models	Implied correlations	(5)% — 99%
				Implied volatilities	1% — 195%
Full requirements and unit contingent contracts	330	35	Discounted cash flow	Forward price (per MWh)	$(20) — $239
				Customer migration rate[a]	—% — 20%
Total	$ 1,179	$ 540			

(a) Applies only to full requirements contracts.

The sensitivity of NEE's fair value measurements to increases (decreases) in the significant unobservable inputs is as follows:

Significant Unobservable Input	Position	Impact on Fair Value Measurement
Forward price	Purchase power/gas	Increase (decrease)
	Sell power/gas	Decrease (increase)
Implied correlations	Purchase option	Decrease (increase)
	Sell option	Increase (decrease)
Implied volatilities	Purchase option	Increase (decrease)
	Sell option	Decrease (increase)
Customer migration rate	Sell power[a]	Decrease (increase)

(a) Assumes the contract is in a gain position.

In addition, the fair value measurement of interest rate swap liabilities related to the solar projects in Spain of approximately $101 million at December 31, 2015 includes a significant credit valuation adjustment. The credit valuation adjustment, considered an unobservable input, reflects management's assessment of non-performance risk of the subsidiaries related to the solar projects in Spain that are party to the swap agreements.

The reconciliation of changes in the fair value of derivatives that are based on significant unobservable inputs is as follows:

	Years Ended December 31,					
	2015		2014		2013	
	NEE	FPL	NEE	FPL	NEE	FPL
	(millions)					
Fair value of net derivatives based on significant unobservable inputs at December 31 of prior year	$ 622	$ 5	$ 622	$ —	$ 566	$ 2
Realized and unrealized gains (losses):						
Included in earnings[a]	451	—	(77)	—	299	—
Included in other comprehensive income	11	—	18	—	—	—
Included in regulatory assets and liabilities	3	3	7	7	—	—
Purchases	180	—	55	—	101	—
Settlements	(473)	(8)	194	(2)	(55)	(2)
Issuances	(202)	—	(122)	—	(173)	—
Transfers in[b]	(13)	—	80	—	(120)	—
Transfers out[b]	(41)	—	(155)	—	4	—
Fair value of net derivatives based on significant unobservable inputs at December 31	$ 538	$ —	$ 622	$ 5	$ 622	$ —
The amount of gains (losses) for the period included in earnings attributable to the change in unrealized gains (losses) relating to derivatives still held at the reporting date[c]	$ 277	$ —	$ 248	$ —	$ 329	$ —

(a) For the year ended December 31, 2015, $462 million of realized and unrealized gains are reflected in the consolidated statements of income in operating revenues and the balance is primarily reflected in interest expense. For the year December 31, 2014, $79 million of realized and unrealized losses are reflected in the consolidated statements of income in interest expense and the balance is primarily reflected in operating revenues. For the year ended December 31, 2013, $302 million of realized and unrealized gains are reflected in the consolidated statements of income in operating revenues and the balance is primarily reflected in interest expense.

(b) Transfers into Level 3 were a result of decreased observability of market data and, in 2013, a significant credit valuation adjustment. Transfers from Level 3 to Level 2 were a result of increased observability of market data. NEE's and FPL's policy is to recognize all transfers at the beginning of the reporting period.

(c) For the years ended December 31, 2015, 2014, and 2013, $289 million, $328 million, and $330 million of unrealized gains are reflected in the consolidated statements of income in operating revenues and the balance is reflected in interest expense.

Contingent Consideration - NEE recorded a liability related to a contingent holdback as part of the acquisition of seven long-term contracted natural gas pipeline assets located in Texas. See Note 8.

Nonrecurring Fair Value Measurements - NEE tests long-lived assets for recoverability whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. In February 2013, the Spanish government enacted a new law that made further changes to the economic framework of renewable energy projects including, among other things, changes that negatively affect the projected economics of the 99.8 MW of solar thermal facilities that affiliates of NEER were constructing in Spain (Spain solar projects) (see Note 14 - Spain Solar Projects). Due to the February 2013 change in law, NEER performed a recoverability analysis, considering, among other things, working with lenders to restructure the financing agreements, abandoning the projects or selling the projects, and concluded that the undiscounted cash flows of the Spain solar projects were less than the carrying value of the projects. Accordingly, NEER performed a fair value analysis based on the income approach to determine the amount of the impairment. Based on the fair value analysis, property, plant and equipment with a carrying amount of approximately $800 million were written down to their estimated fair value of $500 million as of March 31, 2013, resulting in an impairment of $300 million (which is recorded as a separate line item in NEE's consolidated statements of income for the year ended December 31, 2013) and other related charges ($342 million after-tax, see Note 5).

The estimate of the fair value was based on the discounted cash flows which were determined using a market participant view of the Spain solar projects upon completion and final commissioning of the projects. As part of the valuation, NEER used observable inputs where available, including the revised renewable energy pricing under the February 2013 change in law. Significant unobservable inputs (Level 3), including forecasts of generation, estimates of tariff escalation rates and estimated costs of debt and equity capital, were also used in the estimation of fair value. In addition, NEER made certain assumptions regarding the projected capital and maintenance expenditures based on the estimated costs to complete the Spain solar projects and ongoing capital and maintenance expenditures. An increase in the revenue and generation forecasts, a decrease in the projected capital and maintenance expenditures or a decrease in the weighted-average cost of capital each would result in an increased fair market value. Changes in the opposite direction of those unobservable inputs would result in a decreased fair market value. See Note 14 - Spain Solar Projects for a discussion of additional developments that could potentially impact the Spain solar projects.

In 2013, NEER initiated a plan and received internal authorization to pursue the sale of its ownership interests in oil-fired generation plants located in Maine (Maine fossil) with a total generating capacity of 796 MW. In connection with the decision to sell Maine fossil, a loss of approximately $67 million ($43 million after-tax) was originally reflected in net gain from discontinued operations, net of income taxes in NEE's consolidated statements of income for the year ended December 31, 2013. The fair value measurement (Level 3) was based on the estimated sales price less the estimated costs to sell. The estimated sales price was estimated using

an income approach based primarily on capacity revenue forecasts. In 2014, NEER decided not to pursue the sale of Maine fossil due to the divergence between the achievable sales price and management's view of the assets' value, which increased as a result of significant market changes. Accordingly, the Maine fossil assets were written-up to management's current estimate of fair value resulting in a gain of approximately $21 million ($12 million after-tax). The fair value measurement (Level 3) was estimated using an income approach based primarily on the updated capacity revenue forecasts. Based on NEER's decision to retain Maine fossil, the $67 million loss recorded during the year ended December 31, 2013 was reclassified from discontinued operations to income from continuing operations and together with the $21 million gain recorded during the year ended December 31, 2014 are included as a separate line item in NEE's consolidated statements of income.

Fair Value of Financial Instruments Recorded at the Carrying Amount - The carrying amounts of cash equivalents, commercial paper and notes payable approximate their fair values. The carrying amounts and estimated fair values of other financial instruments, excluding those recorded at fair value and disclosed above in Recurring Fair Value Measurements, are as follows:

	December 31, 2015		December 31, 2014	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
	(millions)			
NEE:				
Special use funds[a]	$ 675	$ 675	$ 567	$ 567
Other investments - primarily notes receivable	$ 512	$ 722 [b]	$ 525	$ 679 [b]
Long-term debt, including current maturities	$ 28,897 [c]	$ 30,412 [d]	$ 27,552	$ 30,013 [d]
FPL:				
Special use funds[a]	$ 528	$ 528	$ 395	$ 395
Long-term debt, including current maturities	$ 10,020	$ 11,028 [d]	$ 9,388	$ 11,020 [d]

(a) Primarily represents investments accounted for under the equity method and loans not measured at fair value on a recurring basis.
(b) Primarily classified as held to maturity. Fair values are primarily estimated using a discounted cash flow valuation technique based on certain observable yield curves and indices considering the credit profile of the borrower (Level 3). Notes receivable bear interest primarily at fixed rates and mature by 2029. Notes receivable are considered impaired and placed in non-accrual status when it becomes probable that all amounts due cannot be collected in accordance with the contractual terms of the agreement. The assessment to place notes receivable in non-accrual status considers various credit indicators, such as credit ratings and market-related information. As of December 31, 2015 and 2014, NEE had no notes receivable reported in non-accrual status.
(c) Excludes debt totaling $938 million reflected in liabilities associated with assets held for sale on NEE's consolidated balance sheet for which the carrying amount approximates fair value. See Note 1 - Assets and Liabilities Associated with Assets Held for Sale.
(d) As of December 31, 2015 and 2014, for NEE, approximately $18,031 million and $19,973 million, respectively, is estimated using quoted market prices for the same or similar issues (Level 2); the balance is estimated using a discounted cash flow valuation technique, considering the current credit spread of the debtor (Level 3). For FPL, primarily estimated using quoted market prices for the same or similar issues (Level 2).

Special Use Funds - The special use funds noted above and those carried at fair value (see Recurring Fair Value Measurements above) consist of FPL's storm fund assets of approximately $74 million and $75 million at December 31, 2015 and 2014, respectively and NEE's and FPL's nuclear decommissioning fund assets of $5,064 million and $5,091 million at December 31, 2015 and 2014 ($3,430 million and $3,449 million, respectively, for FPL). The investments held in the special use funds consist of equity and debt securities which are primarily classified as available for sale and carried at estimated fair value. The amortized cost of debt and equity securities is approximately $1,823 million and $1,505 million, respectively, at December 31, 2015 and $1,906 million and $1,366 million, respectively, at December 31, 2014 ($1,409 million and $732 million, respectively, at December 31, 2015 and $1,519 million and $664 million, respectively, at December 31, 2014 for FPL). For FPL's special use funds, consistent with regulatory treatment, changes in fair value, including any other than temporary impairment losses, result in a corresponding adjustment to the related regulatory liability accounts. For NEE's non-rate regulated operations, changes in fair value result in a corresponding adjustment to OCI, except for unrealized losses associated with marketable securities considered to be other than temporary, including any credit losses, which are recognized as other than temporary impairment losses on securities held in nuclear decommissioning funds in NEE's consolidated statements of income. Debt securities included in the nuclear decommissioning funds have a weighted-average maturity at December 31, 2015 of approximately eight years at both NEE and FPL. FPL's storm fund primarily consists of debt securities with a weighted-average maturity at December 31, 2015 of approximately three years. The cost of securities sold is determined using the specific identification method.

Realized gains and losses and proceeds from the sale or maturity of available for sale securities are as follows:

	NEE			FPL		
	Years Ended December 31,			Years Ended December 31,		
	2015	2014	2013	**2015**	2014	2013
	(millions)					
Realized gains	**$ 194**	$ 211	$ 246	**$ 70**	$ 120	$ 182
Realized losses	**$ 87**	$ 115	$ 88	**$ 43**	$ 94	$ 59
Proceeds from sale or maturity of securities	**$ 4,643**	$ 4,092	$ 4,190	**$ 3,724**	$ 3,349	$ 3,342

The unrealized gains on available for sale securities are as follows:

	NEE		FPL	
	December 31,		December 31,	
	2015	2014	**2015**	2014
	(millions)			
Equity securities	**$ 1,166**	$ 1,267	**$ 863**	$ 896
Debt securities	**$ 17**	$ 66	**$ 14**	$ 54

The unrealized losses on available for sale debt securities and the fair value of available for sale debt securities in an unrealized loss position are as follows:

	NEE		FPL	
	December 31,		December 31,	
	2015	2014	**2015**	2014
	(millions)			
Unrealized losses[a]	**$ 51**	$ 7	**$ 45**	$ 5
Fair value	**$ 1,129**	$ 542	**$ 861**	$ 434

(a) Unrealized losses on available for sale debt securities in an unrealized loss position for greater than twelve months at December 31, 2015 and 2014 were not material to NEE or FPL.

Regulations issued by the FERC and the NRC provide general risk management guidelines to protect nuclear decommissioning funds and to allow such funds to earn a reasonable return. The FERC regulations prohibit, among other investments, investments in any securities of NEE or its subsidiaries, affiliates or associates, excluding investments tied to market indices or mutual funds. Similar restrictions applicable to the decommissioning funds for NEER's nuclear plants are included in the NRC operating licenses for those facilities or in NRC regulations applicable to NRC licensees not in cost-of-service environments. With respect to the decommissioning fund for Seabrook, decommissioning fund contributions and withdrawals are also regulated by the NDFC pursuant to New Hampshire law.

The nuclear decommissioning reserve funds are managed by investment managers who must comply with the guidelines of NEE and FPL and the rules of the applicable regulatory authorities. The funds' assets are invested giving consideration to taxes, liquidity, risk, diversification and other prudent investment objectives.

Financial Instruments Accounting Standard Update - In January 2016, the FASB issued an accounting standard update which modifies current guidance for financial instruments. The standard requires that equity investments (except investments accounted for under the equity method and investments that are consolidated) be measured at fair value with changes in fair value recognized in net income and provides an option for those equity investments that do not have readily determinable fair values to be measured at cost minus impairment (plus or minus changes resulting from observable price changes). The standard also makes certain changes to presentation and disclosure requirements of financial instruments. The standard is effective for NEE and FPL beginning January 1, 2018 and will be applied retrospectively with the cumulative effect recognized as of the date of initial application. NEE and FPL are currently evaluating the effect the adoption of this standard will have, if any, on their consolidated financial statements.

5. Income Taxes

The components of income taxes are as follows:

	NEE			FPL		
	Years Ended December 31,			Years Ended December 31,		
	2015	2014	2013	**2015**	2014	2013
	(millions)					
Federal:						
Current	**$ 10**	$ —	$ (145)	**$ 423**	$ 240	$ 174
Deferred	**1,194**	1,077	853	**399**	542	540
Total federal	**1,204**	1,077	708	**822**	782	714
State:						
Current	**31**	(29)	69	**58**	68	44
Deferred	**(7)**	128	—	**77**	60	77
Total state	**24**	99	69	**135**	128	121
Total income taxes	**$ 1,228**	$ 1,176	$ 777	**$ 957**	$ 910	$ 835

A reconciliation between the effective income tax rates and the applicable statutory rate is as follows:

	NEE			FPL		
	Years Ended December 31,			Years Ended December 31,		
	2015	2014	2013	**2015**	2014	2013
Statutory federal income tax rate	**35.0 %**	35.0 %	35.0 %	**35.0 %**	35.0 %	35.0 %
Increases (reductions) resulting from:						
State income taxes - net of federal income tax benefit	**0.4**	1.8	1.8	**3.4**	3.4	3.6
PTCs and ITCs - NEER	**(4.1)**	(5.1)	(8.5)	**—**	—	—
Convertible ITCs - NEER	**(0.8)**	(1.4)	(2.5)	**—**	—	—
Valuation allowance associated with Spain solar projects[a]	**—**	0.7	5.2	**—**	—	—
Charges associated with Canadian assets	**—**	1.3	—	**—**	—	—
Other - net	**0.3**	—	0.7	**(1.7)**	(0.9)	(0.4)
Effective income tax rate	**30.8 %**	32.3 %	31.7 %	**36.7 %**	37.5 %	38.2 %

(a) Reflects a full valuation allowance on deferred tax assets associated with the Spain solar projects. See Note 4 - Nonrecurring Fair Value Measurements.

The income tax effects of temporary differences giving rise to consolidated deferred income tax liabilities and assets are as follows:

	NEE		FPL	
	December 31,		December 31,	
	2015	2014	**2015**	2014
	(millions)			
Deferred tax liabilities:				
Property-related	**$ 12,204**	$ 11,700	**$ 8,040**	$ 7,457
Pension	**455**	489	**480**	459
Nuclear decommissioning trusts	**219**	258	**—**	—
Net unrealized gains on derivatives	**528**	390	**—**	—
Investments in partnerships and joint ventures	**403**	291	**—**	—
Other	**1,196**	769	**695**	435

Net operating loss carryforwards	**604**	1,070	**4**	—
Tax credit carryforwards	**2,916**	2,742	**—**	—
ARO and accrued asset removal costs	**759**	737	**697**	686
Other	**836**	820	**303**	318
Valuation allowance[a]	**(223)**	(323)	**—**	—
Net deferred tax assets	**5,471**	5,627	**1,485**	1,477
Net deferred income taxes	**$ 9,534**	$ 8,270	**$ 7,730**	$ 6,874

(a) Amount relates to a valuation allowance related to the Spain solar projects, deferred state tax credits and state operating loss carryforwards.

Deferred tax assets and liabilities are included on the consolidated balance sheets as follows:

	NEE		FPL	
	December 31,		December 31,	
	2015	2014	**2015**	2014
	(millions)			
Deferred income taxes - current assets	**$ —** [a]	$ 739	**$ —** [a]	$ —
Noncurrent other assets	**293**	264	**—**	—
Other current liabilities	**—** [a]	(12)	**—** [a]	(39)
Deferred income taxes - noncurrent liabilities	**(9,827)**	(9,261)	**(7,730)**	(6,835)
Net deferred income taxes	**$ (9,534)**	$ (8,270)	**$ (7,730)**	$ (6,874)

(a) Effective December 31, 2015, all deferred taxes are classified as noncurrent. See Note 1 - Income Taxes.

The components of NEE's deferred tax assets relating to net operating loss carryforwards and tax credit carryforwards at December 31, 2015 are as follows:

	Amount		Expiration Dates
	(millions)		
Net operating loss carryforwards:			
Federal	$ 361		2026-2035
State	153		2016-2035
Foreign	90	(a)	2017-2024
Net operating loss carryforwards	$ 604		
Tax credit carryforwards:			
Federal	$ 2,585		2022-2035
State	331	(b)	2016-2037
Tax credit carryforwards	$ 2,916		

(a) Includes $89 million of net operating loss carryforwards with an indefinite expiration period.
(b) Includes $158 million of ITC carryforwards with an indefinite expiration period.

6. Discontinued Operations

In 2013, a subsidiary of NEER completed the sale of its ownership interest in a portfolio of hydropower generation plants and related assets with a total generating capacity of 351 MW located in Maine and New Hampshire. The sales price primarily included the assumption by the buyer of $700 million in related debt. In connection with the sale, a gain of approximately $372 million ($231 million after-tax) is reflected in gain from discontinued operations, net of income taxes in NEE's consolidated statements of income for the year ended December 31, 2013. The operations of the hydropower generation plants, exclusive of the gain, were not material to NEE's consolidated statements of income for the year ended December 31, 2013.

See Note 4 - Nonrecurring Fair Value Measurements for a discussion of the decision not to pursue the sale of Maine fossil and the related financial statement impacts.

7. Jointly-Owned Electric Plants

Certain NEE subsidiaries own undivided interests in the jointly-owned facilities described below, and are entitled to a proportionate share of the output from those facilities. The subsidiaries are responsible for their share of the operating costs, as well as providing their own financing. Accordingly, each subsidiary includes its proportionate share of the facilities and related revenues and expenses in the appropriate balance sheet and statement of income captions. NEE's and FPL's respective shares of direct expenses for these facilities are included in fuel, purchased power and interchange expense, O&M expenses, depreciation and amortization expense and taxes other than income taxes and other in NEE's and FPL's consolidated statements of income.

NEE's and FPL's proportionate ownership interest in jointly-owned facilities is as follows:

	December 31, 2015			
	Ownership Interest	Gross Investment(a)	Accumulated Depreciation(a)	Construction Work in Progress
		(millions)		
FPL:				
St. Lucie Unit No. 2	85%	$ 2,190	$ 777	$ 23
St. Johns River Power Park units and coal terminal	20%	$ 398	$ 207	$ 2
Scherer Unit No. 4	76%	$ 1,130	$ 378	$ —
NEER:				
Duane Arnold	70%	$ 435	$ 126	$ 24
Seabrook	88.23%	$ 1,111	$ 239	$ 67
Wyman Station Unit No. 4	84.35%	$ 74	$ 51	$ —
Corporate and Other:				
Transmission substation assets located in Seabrook, New Hampshire	88.23%	$ 73	$ 19	$ 3

(a) Excludes nuclear fuel.

8. Texas Pipeline Business Acquisition

On October 1, 2015, a subsidiary of NEP acquired 100% of the membership interests in NET Holdings Management, LLC (Texas pipeline business), a developer, owner and operator of a portfolio of seven long-term contracted natural gas pipeline assets located in Texas (Texas pipelines). One of the acquired pipelines is subject to a 10% noncontrolling interest. The aggregate purchase price of approximately $2 billion included approximately $934 million in cash consideration and the assumption of approximately $706 million in existing debt of the Texas pipeline business and its subsidiaries at closing and excluded post-closing working capital adjustments of approximately $2 million. The purchase price is subject to (i) a $200 million holdback payable, in whole or in part, upon satisfaction of financial performance and capital expenditure thresholds relating to planned expansion projects (contingent holdback) and (ii) a $200 million holdback retained to satisfy any indemnification obligations of the sellers through April 2017. The $200 million indemnity holdback may be reduced by up to $10 million depending on certain post-closing employee retention thresholds. If successful, NEP may spend up to an additional $100 million of capital expenditures for the planned expansion projects, bringing the total transaction size of the acquisition to approximately $2.1 billion. NEP incurred approximately $13 million in acquisition-related costs during the year ended December 31, 2015, which are reflected in O&M expenses in NEE's consolidated statements of income.

Under the acquisition method, the purchase price was allocated to the assets acquired and liabilities assumed on October 1, 2015 based on their estimated fair value. All fair value measurements of assets acquired and liabilities assumed, including the noncontrolling interest, were based on significant estimates and assumptions, including Level 3 inputs, which require judgment. Estimates and assumptions include the projected timing and amount of future cash flows, discount rates reflecting risk inherent in future cash flows and future market prices. The excess of the purchase price over the estimated fair value of assets acquired and liabilities assumed was recognized as goodwill at the acquisition date. The goodwill arising from the acquisition consists largely of growth opportunities from the Texas pipeline business. Upon full settlement of the contingent holdback, all of the goodwill is expected to be deductible for income tax purposes over a 15 year period. A liability of approximately $186 million was recognized as of the acquisition date for each of the contingent holdback and the indemnity holdback, reflecting the fair value of the expected future payments. NEP determined this fair value measurement based on management's probability assessment. The significant inputs and assumptions used in the fair value measurement included the estimated probability of executing contracts related to financial performance and capital expenditure thresholds as well as the appropriate discount rate.

The valuation of the acquired net assets is subject to change as additional information related to the estimates is obtained during the measurement period. The primary areas of the purchase price allocation that are not yet finalized relate to identifiable intangible assets and residual goodwill.

The following table summarizes the estimated fair value of assets acquired and liabilities assumed for the acquisition of the Texas pipeline business:

	Amounts Recognized as of October 1, 2015 (millions)
Assets	
Property, plant and equipment	$ 806
Cash	1
Other receivables and current other assets	21
Noncurrent other assets (other intangible assets, see Note 1 - Goodwill and Other Intangible Assets)	720
Noncurrent other assets (goodwill, see Note 1 - Goodwill and Other Intangible Assets)	622
Total assets	$ 2,170
Liabilities	
Long-term debt, including current portion	$ 706
Accounts payable and current other liabilities	46
Noncurrent other liabilities, primarily acquisition holdbacks	415
Total liabilities	1,167
Less noncontrolling interest at fair value	69
Total cash consideration	$ 934

9. Variable Interest Entities (VIEs)

As of December 31, 2015, NEE has twenty-four VIEs which it consolidates and has interests in certain other VIEs which it does not consolidate.

FPL - FPL is considered the primary beneficiary of, and therefore consolidates, a VIE that is a wholly owned bankruptcy remote special purpose subsidiary that it formed in 2007 for the sole purpose of issuing storm-recovery bonds pursuant to the securitization provisions of the Florida Statutes and a financing order of the FPSC. FPL is considered the primary beneficiary because FPL has the power to direct the significant activities of the VIE, and its equity investment, which is subordinate to the bondholder's interest in the VIE, is at risk. Storm restoration costs incurred by FPL during 2005 and 2004 exceeded the amount in FPL's funded storm and property insurance reserve, resulting in a storm reserve deficiency. In 2007, the VIE issued $652 million aggregate principal amount of senior secured bonds (storm-recovery bonds), primarily for the after-tax equivalent of the total of FPL's unrecovered balance of the 2004 storm restoration costs, the 2005 storm restoration costs and to reestablish FPL's storm and property insurance reserve. In connection with this financing, net proceeds, after debt issuance costs, to the VIE (approximately $644 million) were used to acquire the storm-recovery property, which includes the right to impose, collect and receive a storm-recovery charge from all customers receiving electric transmission or distribution service from FPL under rate schedules approved by the FPSC or under special contracts, certain other rights and interests that arise under the financing order issued by the FPSC and certain other collateral pledged by the VIE that issued the bonds. The storm-recovery bonds are payable only from and are secured by the storm-recovery property. The bondholders have no recourse to the general credit of FPL. The assets of the VIE were approximately $230 million and $279 million at December 31, 2015 and 2014, respectively, and consisted primarily of storm-recovery property, which are included in securitized storm-recovery costs on NEE's and FPL's consolidated balance sheets. The liabilities of the VIE were approximately $278 million and $338 million at December 31, 2015 and 2014, respectively, and consisted primarily of storm-recovery bonds, which are included in long-term debt on NEE's and FPL's consolidated balance sheets.

FPL entered into a purchased power agreement effective in 1995 with a 330 MW coal-fired facility to purchase substantially all of the facility's capacity and electrical output over a substantial portion of its estimated useful life. The facility is considered a VIE because FPL absorbs a portion of the facility's variability related to changes in the market price of coal through the price it pays per MWh (energy payment). Since FPL does not control the most significant activities of the facility, including operations and maintenance, FPL is not the primary beneficiary and does not consolidate this VIE. The energy payments paid by FPL will fluctuate as coal prices change. This fluctuation does not expose FPL to losses since the energy payments paid by FPL to the facility are recovered through the fuel clause as approved by the FPSC.

NEER - NEE consolidates twenty-three NEER VIEs. NEER is considered the primary beneficiary of these VIEs since NEER controls the most significant activities of these VIEs, including operations and maintenance, as well as construction, and through its equity ownership has the obligation to absorb expected losses of these VIEs.

A NEER VIE consolidates two entities which own and operate natural gas/oil electric generation facilities with the capability of producing 110 MW. This VIE sells its electric output under power sales contracts to a third party, with expiration dates in 2018 and 2020. The power sales contracts provide the offtaker the ability to dispatch the facilities and require the offtaker to absorb the cost of fuel. This VIE uses third-party debt and equity to finance its operations. The debt is secured by liens against the generation facilities and the other assets of these entities. The debt holders have no recourse to the general credit of NEER for the repayment of debt. The assets and liabilities of the VIE were approximately $84 million and $47 million, respectively, at December 31, 2015 and $85 million and $55 million, respectively, at December 31, 2014, and consisted primarily of property, plant and equipment and long-term debt.

Two indirect subsidiaries of NEER each contributed, to a NEP subsidiary, an approximately 50% ownership interest in three entities which own solar PV facilities that, upon completion of construction, are expected to have a total generating capacity of 277 MW, of which approximately 153 MW have been placed in service as of December 31, 2015. Each of the two indirect subsidiaries of NEER is considered a VIE since it has insufficient equity at risk, and is consolidated by NEER. The VIEs use third-party debt and equity to finance a portion of development and construction activities and require subordinated financing from NEER to complete the facility under construction. These VIEs will sell their electric output to third parties under power sales contracts with expiration dates in 2035 and 2036. The debt balances are secured by liens against the assets of the entities. The debt holders have no recourse to the general credit of NEER. The assets and liabilities of these VIEs were approximately $657 million and $626 million, respectively, at December 31, 2015, and consisted primarily of property, plant and equipment and long-term debt.

The other twenty NEER VIEs consolidate several entities which own and operate wind electric generation facilities with the capability of producing a total of 5,272 MW. These VIEs sell their electric output either under power sales contracts to third parties with expiration dates ranging from 2018 through 2041 or in the spot market. The VIEs use third-party debt and/or equity to finance their operations. Certain investors that hold no equity interest in the VIEs hold differential membership interests, which give them the right to receive a portion of the economic attributes of the generation facilities, including certain tax attributes. The debt is secured by liens against the generation facilities and the other assets of these entities or by pledges of NEER's ownership interest in these entities. The debt holders have no recourse to the general credit of NEER for the repayment of debt. The assets and liabilities of these VIEs totaled approximately $7.6 billion and $5.0 billion, respectively, at December 31, 2015. Sixteen of the twenty were VIEs at December 31, 2014 and were consolidated; the assets and liabilities of those VIEs totaled approximately $6.6 billion and $4.1 billion, respectively, at December 31, 2014. At December 31, 2015 and 2014, the assets and liabilities of the VIEs consisted primarily of property, plant and equipment, deferral related to differential membership interests and long-term debt.

Other - As of December 31, 2015 and 2014, several NEE subsidiaries have investments totaling approximately $602 million ($476 million at FPL) and $716 million ($606 million at FPL), respectively, in certain special purpose entities, which consisted primarily of investments in mortgage-backed securities. These investments are included in special use funds and other investments on NEE's consolidated balance sheets and in special use funds on FPL's consolidated balance sheets. As of December 31, 2015, NEE subsidiaries, including FPL, are not the primary beneficiary and therefore do not consolidate any of these entities because they do not control any of the ongoing activities of these entities, were not involved in the initial design of these entities and do not have a controlling financial interest in these entities.

10. Investments in Partnerships and Joint Ventures

Certain subsidiaries of NEE, primarily NEER, have noncontrolling non-majority owned interests in various partnerships and joint ventures, essentially all of which own electric generation facilities. At December 31, 2015 and 2014, NEE's investments in partnerships and joint ventures totaled approximately $1,063 million and $663 million, respectively, which are included in other investments on NEE's consolidated balance sheets. NEER's interest in these partnerships and joint ventures range from approximately 29% to 50%. At December 31, 2015 and 2014, the principal entities included in NEER's investments in partnerships and joint ventures were Desert Sunlight Investment Holdings, LLC, and Northeast Energy, LP, and in 2015 also included Sabal Trail Transmission, LLC and Cedar Point II Wind, LP.

Summarized combined information for these principal entities is as follows:

	2015	2014
	(millions)	
Net income	$ 213	$ 171
Total assets	$ 3,339	$ 2,636
Total liabilities	$ 1,307	$ 1,645
Partners'/members' equity	$ 2,032	$ 991
NEER's share of underlying equity in the principal entities	$ 874	$ 495
Difference between investment carrying amount and underlying equity in net assets[a]	(3)	(4)
NEER's investment carrying amount for the principal entities	$ 871	$ 491

(a) The majority of the difference between the investment carrying amount and the underlying equity in net assets is being amortized over the remaining life of the investee's assets.

In 2004, a trust created by NEE sold $300 million of 5 7/8% preferred trust securities to the public and $9 million of common trust securities to NEE. The trust is an unconsolidated 100%-owned finance subsidiary. The proceeds from the sale of the preferred and common trust securities were used to buy 5 7/8% junior subordinated debentures maturing in March 2044 from NEECH. NEE has fully and unconditionally guaranteed the preferred trust securities and the junior subordinated debentures.

11. Common Shareholders' Equity

Earnings Per Share - The reconciliation of NEE's basic and diluted earnings per share attributable to NEE from continuing operations is as follows:

	Years Ended December 31,		
	2015	2014	2013
	(millions, except per share amounts)		
Numerator - income from continuing operations attributable to NEE[a]	$ 2,752	$ 2,465	$ 1,677
Denominator:			
Weighted-average number of common shares outstanding - basic	450.5	434.4	424.2
Equity units, performance share awards, options, forward sale agreements and restricted stock[b]	3.5	5.7	2.8
Weighted-average number of common shares outstanding - assuming dilution	454.0	440.1	427.0
Earnings per share attributable to NEE from continuing operations:			
Basic	$ 6.11	$ 5.67	$ 3.95
Assuming dilution	$ 6.06	$ 5.60	$ 3.93

(a) Calculated as income from continuing operations less net income attributable to noncontrolling interests from NEE's consolidated statements of income.
(b) Calculated using the treasury stock method. Performance share awards are included in diluted weighted-average number of common shares outstanding based upon what would be issued if the end of the reporting period was the end of the term of the award.

Common shares issuable pursuant to equity units, the forward sale agreement described below, stock options and performance share awards and restricted stock which were not included in the denominator above due to their antidilutive effect were approximately 3.5 million, 2.6 million and 7.1 million for the years ended December 31, 2015, 2014 and 2013, respectively.

Issuance of Common Stock and Forward Sale Agreement - In November 2013, NEE sold 4.5 million shares of its common stock at a price of $88.03 per share, and a forward counterparty borrowed and sold 6.6 million shares of NEE's common stock in connection with a forward sale agreement. In December 2014, NEE physically settled the forward sale agreement by delivering 6.6 million shares of its common stock to the forward counterparty in exchange for cash proceeds of approximately $552 million. The forward sale price used to determine the cash proceeds received by NEE was calculated based on the initial forward sale price of $88.03 per share less certain adjustments as specified in the forward sale agreement. Prior to the settlement date, the forward sale agreement had a dilutive effect on NEE's earnings per share when the average market price per share of NEE's common stock was above the adjusted forward sale price per share.

Common Stock Dividend Restrictions - NEE's charter does not limit the dividends that may be paid on its common stock. FPL's mortgage securing FPL's first mortgage bonds contains provisions which, under certain conditions, restrict the payment of dividends and other distributions to NEE. These restrictions do not currently limit FPL's ability to pay dividends to NEE.

Employee Stock Ownership Plan - The employee retirement savings plans of NEE include a leveraged ESOP feature. Shares of common stock held by the trust for the employee retirement savings plans (Trust) are used to provide all or a portion of the employers' matching contributions. Dividends received on all shares, along with cash contributions from the employers, are used to pay principal and interest on an ESOP loan held by a subsidiary of NEECH. Dividends on shares allocated to employee accounts and used by the Trust for debt service are replaced with shares of common stock, at prevailing market prices, in an equivalent amount. For purposes of computing basic and fully diluted earnings per share, ESOP shares that have been committed to be released are considered outstanding.

ESOP-related compensation expense was approximately $63 million, $59 million and $46 million in 2015, 2014 and 2013, respectively. The related share release was based on the fair value of shares allocated to employee accounts during the period. Interest income on the ESOP loan is eliminated in consolidation. ESOP-related unearned compensation included as a reduction of common shareholders' equity at December 31, 2015 was approximately $1 million, representing unallocated shares at the original issue price. The fair value of the ESOP-related unearned compensation account using the closing price of NEE common stock at December 31, 2015 was approximately $11 million.

Stock-Based Compensation - Net income for the years ended December 31, 2015, 2014 and 2013 includes approximately $60 million, $60 million and $67 million, respectively, of compensation costs and $23 million, $23 million and $26 million, respectively, of income tax benefits related to stock-based compensation arrangements. Compensation cost capitalized for the years ended December 31, 2015, 2014 and 2013 was not material. As of December 31, 2015, there were approximately $70 million of unrecognized compensation costs related to nonvested/nonexercisable stock-based compensation arrangements. These costs are expected to be recognized over a weighted-average period of 1.8 years.

At December 31, 2015, approximately 17 million shares of common stock were authorized for awards to officers, employees and non-employee directors of NEE and its subsidiaries under NEE's: (a) Amended and Restated 2011 Long Term Incentive Plan, (b) 2007 Non-Employee Directors Stock Plan and (c) earlier equity compensation plans under which shares are reserved for issuance under existing grants, but no additional shares are available for grant under the earlier plans. NEE satisfies restricted stock and performance share awards by issuing new shares of its common stock or by purchasing shares of its common stock in the open market. NEE satisfies stock option exercises by issuing new shares of its common stock. NEE generally grants most of its stock-based compensation awards in the first quarter of each year.

Restricted Stock and Performance Share Awards - Restricted stock typically vests within three years after the date of grant and is subject to, among other things, restrictions on transferability prior to vesting. The fair value of restricted stock is measured based upon the closing market price of NEE common stock as of the date of grant. Performance share awards are typically payable at the end of a three-year performance period if the specified performance criteria are met. The fair value of performance share awards is estimated primarily based upon the closing market price of NEE common stock as of the date of grant less the present value of expected dividends, multiplied by an estimated performance multiple which is subsequently trued up based on actual performance.

The activity in restricted stock and performance share awards for the year ended December 31, 2015 was as follows:

	Shares	Weighted-Average Grant Date Fair Value Per Share
Restricted Stock:		
Nonvested balance, January 1, 2015	579,497	$ 75.65
Granted	303,150	$ 103.58
Vested	(274,620)	$ 73.92
Forfeited	(44,367)	$ 99.99
Nonvested balance, December 31, 2015	563,660	$ 89.60
Performance Share Awards:		
Nonvested balance, January 1, 2015	996,227	$ 67.19
Granted	567,437	$ 77.12
Vested	(609,321)	$ 53.55
Forfeited	(39,144)	$ 79.36
Nonvested balance, December 31, 2015	915,199	$ 81.90

The weighted-average grant date fair value per share of restricted stock granted for the years ended December 31, 2014 and 2013 was $93.46 and $74.02 respectively. The weighted-average grant date fair value per share of performance share awards granted for the years ended December 31, 2014 and 2013 was $71.52 and $58.53, respectively.

The total fair value of restricted stock and performance share awards vested was $108 million, $85 million and $82 million for the years ended December 31, 2015, 2014 and 2013, respectively.

Options - Options typically vest within three years after the date of grant and have a maximum term of ten years. The exercise price of each option granted equals the closing market price of NEE common stock on the date of grant. The fair value of the options is estimated on the date of the grant using the Black-Scholes option-pricing model and based on the following assumptions:

	2015	2014	2013
Expected volatility[a]	**18.91%**	20.32%	20.08 - 20.15%
Expected dividends	**3.11%**	3.11%	3.28 - 3.64%
Expected term (years)[b]	**7.0**	7.0	7.0
Risk-free rate	**1.84%**	2.17%	1.15 - 1.40%

(a) Based on historical experience.
(b) Based on historical exercise and post-vesting cancellation experience adjusted for outstanding awards.

Option activity for the year ended December 31, 2015 was as follows:

	Shares Underlying Options	Weighted-Average Exercise Price Per Share	Weighted-Average Remaining Contractual Term (years)	Aggregate Intrinsic Value (millions)
Balance, January 1, 2015	2,825,035	$ 59.04		
Granted	229,158	$ 103.62		
Exercised	(187,692)	$ 47.03		
Forfeited	—	—		
Expired	—	—		
Balance, December 31, 2015	2,866,501	$ 63.39	5.3	$ 116
Exercisable, December 31, 2015	2,415,194	$ 57.62	4.7	$ 112

The weighted-average grant date fair value of options granted was $13.62, $14.09 and $9.20 per share for the years ended December 31, 2015, 2014 and 2013, respectively. The total intrinsic value of stock options exercised was approximately $11 million, $30 million and $14 million for the years ended December 31, 2015, 2014 and 2013, respectively.

Cash received from option exercises was approximately $9 million, $26 million and $14 million for the years ended December 31, 2015, 2014 and 2013, respectively. The tax benefits realized from options exercised were approximately $4 million, $11 million and $5 million for the years ended December 31, 2015, 2014 and 2013, respectively.

Preferred Stock - NEE's charter authorizes the issuance of 100 million shares of serial preferred stock, $0.01 par value, none of which are outstanding. FPL's charter authorizes the issuance of 10,414,100 shares of preferred stock, $100 par value, 5 million shares of subordinated preferred stock, no par value, and 5 million shares of preferred stock, no par value, none of which are outstanding.

Accumulated Other Comprehensive Income (Loss) - The components of AOCI, net of tax, are as follows:

	Accumulated Other Comprehensive Income (Loss)					
	Net Unrealized Gains (Losses) on Cash Flow Hedges	Net Unrealized Gains (Losses) on Available for Sale Securities	Defined Benefit Pension and Other Benefits Plans	Net Unrealized Gains (Losses) on Foreign Currency Translation	Other Comprehensive Income (Loss) Related to Equity Method Investee	Total
			(millions)			
Balances, December 31, 2012	$ (266)	$ 96	$ (74)	$ 12	$ (23)	$ (255)
Other comprehensive income (loss) before reclassifications	84	118	95	(45)	7	259
Amounts reclassified from AOCI	67 (a)	(17) (b)	2	—	—	52

Total long-term debt		$ 26,681		$ 24,044	

(a) Principal on the storm-recovery bonds is due on the final maturity date (the date by which the principal must be repaid to prevent a default) for each tranche, however, it is being paid semiannually and sequentially.
(b) Tax exempt bonds that permit individual bond holders to tender the bonds for purchase at any time prior to maturity. In the event bonds are tendered for purchase, they would be remarketed by a designated remarketing agent in accordance with the related indenture. If the remarketing is unsuccessful, FPL would be required to purchase the tax exempt bonds. As of December 31, 2015, all tax exempt bonds tendered for purchase have been successfully remarketed. FPL's bank revolving line of credit facilities are available to support the purchase of tax exempt bonds.
(c) Variable rate is based on an underlying index plus a margin except for in 2014 approximately $983 million of NEER's senior secured limited-recourse term loans is based on the greater of an underlying index or a floor, plus a margin.
(d) Debt issuance costs were reclassified from noncurrent other assets to long-term debt to reflect the retrospective adoption of an accounting standard update. See Note 1 - Debt Issuance Costs.
(e) Interest rate contracts, primarily swaps, have been entered into for the majority of these debt issuances. See Note 3.
(f) Issued by a wholly owned subsidiary of NEECH and collateralized by a third-party note receivable held by that subsidiary. See Note 4 - Fair Value of Financial Instruments Recorded at the Carrying Amount.
(g) Excludes debt totaling $938 million reflected in liabilities associated with assets held for sale on NEE's consolidated balance sheet. See Note 1 - Assets and Liabilities Associated with Assets Held for Sale.
(h) See Note 14 - Spain Solar Projects for discussion of events of default related to debt associated with the Spain solar projects.

Minimum annual maturities of long-term debt for NEE are approximately $2,220 million, $2,882 million, $2,819 million, $2,044 million and $1,578 million for 2016, 2017, 2018, 2019 and 2020, respectively. The respective amounts for FPL are approximately $64 million, $367 million, $472 million, $76 million and $10 million.

At December 31, 2015 and 2014, short-term borrowings had a weighted-average interest rate of 2.10% (0.83% for FPL) and 0.40% (0.40% for FPL), respectively. Available lines of credit aggregated approximately $7.9 billion ($4.9 billion for NEECH and $3.0 billion for FPL) at December 31, 2015. These facilities provide for the issuance of letters of credit of up to approximately $4.0 billion ($2.9 billion for NEECH and $1.1 billion for FPL). The issuance of letters of credit is subject to the aggregate commitment of the relevant banks to issue letters of credit under the applicable facility. While no direct borrowings were outstanding at December 31, 2015, letters of credit totaling $410 million and $6 million were outstanding under the NEECH and FPL credit facilities, respectively.

NEE has guaranteed certain payment obligations of NEECH, including most of those under NEECH's debt, including all of its debentures and commercial paper issuances, as well as most of its payment guarantees and indemnifications. NEECH has guaranteed certain debt and other obligations of NEER and its subsidiaries.

In August 2013, NEECH completed a remarketing of approximately $402.4 million aggregate principal amount of its Series D Debentures due September 1, 2015, which constitutes a portion of the $402.5 million aggregate principal amount of such debentures (Debentures) that were issued in September 2010 as components of equity units issued concurrently by NEE (2010 equity units). The Debentures are fully and unconditionally guaranteed by NEE. In connection with the remarketing of the Debentures, the interest rate on the Debentures was reset to 1.339% per year, and interest is payable on March 1 and September 1 of each year, commencing September 1, 2013. In connection with the settlement of the contracts to purchase NEE common stock that were issued as components of the 2010 equity units, in August and September 2013, NEE issued a total of 5,946,530 shares of common stock in exchange for $402.5 million.

In September 2013, NEE sold $500 million of equity units (initially consisting of Corporate Units). Each equity unit has a stated amount of $50 and consists of a contract to purchase NEE common stock (stock purchase contract) and, initially, a 5% undivided beneficial ownership interest in a Series G Debenture due September 1, 2018 issued in the principal amount of $1,000 by NEECH (see table above). Each stock purchase contract requires the holder to purchase by no later than September 1, 2016 (the final settlement date) for a price of $50 in cash, a number of shares of NEE common stock (subject to antidilution adjustments) based on a price per share range of $82.70 to $99.24. If purchased on the final settlement date, as of December 31, 2015, the number of shares issued would (subject to antidilution adjustments) range from 0.6088 shares if the applicable market value of a share of common stock is less than or equal to $82.70 to 0.5073 shares if the applicable market value of a share is equal to or greater than $99.24, with applicable market value to be determined using the average closing prices of NEE common stock over a 20-day trading period ending August 29, 2016. Total annual distributions on the equity units will be at the rate of 5.799%, consisting of interest on the debentures (1.45% per year) and payments under the stock purchase contracts (4.349% per year). The interest rate on the debentures is expected to be reset on or after March 1, 2016. A holder of the equity unit may satisfy its purchase obligation with proceeds raised from remarketing the NEECH debentures that are part of its equity unit. The undivided beneficial ownership interest in the NEECH debenture that is a component of each Corporate Unit is pledged to NEE to secure the holder's obligation to purchase NEE common stock under the related stock purchase contract. If a successful remarketing does not occur on or before the third business day prior to the final settlement date, and a holder has not notified NEE of its intention to settle the stock purchase contract with cash, the debentures that are components of the Corporate Units will be used to satisfy in full the holders' obligations to purchase NEE common stock under the related stock purchase contracts on the final settlement date. The debentures are fully and unconditionally guaranteed by NEE.

In May 2015, NEECH completed a remarketing of $600 million aggregate principal amount of its Series E Debentures due June 1, 2017 (Debentures) that were issued in May 2012 as components of equity units issued concurrently by NEE (May 2012 equity units). The Debentures are fully and unconditionally guaranteed by NEE. In connection with the remarketing of the Debentures, the interest rate on the Debentures was reset to 1.586% per year, and interest is payable on June 1 and December 1 of each year, commencing June 1, 2015. In connection with the settlement of the contracts to purchase NEE common stock that were issued as components of the May 2012 equity units, on June 1, 2015, NEE issued 7,860,000 shares of common stock in exchange for $600 million.

In August 2015, NEECH completed a remarketing of approximately $650 million aggregate principal amount of its Series F Debentures due September 1, 2017, which constitutes a portion of the $650 million aggregate principal amount of such debentures (Debentures) that were issued in September 2012 as components of equity units issued by NEE (September 2012 equity units). The Debentures are fully and unconditionally guaranteed by NEE. In connection with the remarketing, the interest rate on all of the Debentures was reset to 2.056% per year and interest is payable on March 1 and September 1 of each year, commencing September 1, 2015. In connection with the settlement of the contracts to purchase NEE common stock that were issued as components of the September 2012 equity units, in August and September 2015, NEE issued a total of 8,173,099 shares of common stock in exchange for $650 million.

In September 2015, NEE sold $700 million of equity units (initially consisting of Corporate Units). Each equity unit has a stated amount of $50 and consists of a contract to purchase NEE common stock (stock purchase contract) and, initially, a 5% undivided beneficial ownership interest in a Series H Debenture due September 1, 2020 issued in the principal amount of $1,000 by NEECH. Each stock purchase contract requires the holder to purchase by no later than September 1, 2018 (the final settlement date) for a price of $50 in cash, a number of shares of NEE common stock (subject to antidilution adjustments) based on a price per share

range of $95.35 to $114.42. If purchased on the final settlement date, as of December 31, 2015, the number of shares issued would (subject to antidilution adjustments) range from 0.5244 shares if the applicable market value of a share of common stock is less than or equal to $95.35 to 0.4370 shares if the applicable market value of a share is equal to or greater than $114.42, with applicable market value to be determined using the average closing prices of NEE common stock over a 20-day trading period ending August 29, 2018. Total annual distributions on the equity units will be at the rate of 6.371%, consisting of interest on the debentures (2.36% per year) and payments under the stock purchase contracts (4.011% per year). The interest rate on the debentures is expected to be reset on or after March 1, 2018. A holder of the equity unit may satisfy its purchase obligation with proceeds raised from remarketing the NEECH debentures that are part of its equity unit. The undivided beneficial ownership interest in the NEECH debenture that is a component of each Corporate Unit is pledged to NEE to secure the holder's obligation to purchase NEE common stock under the related stock purchase contract. If a successful remarketing does not occur on or before the third business day prior to the final settlement date, and a holder has not notified NEE of its intention to settle the stock purchase contract with cash, the debentures that are components of the Corporate Units will be used to satisfy in full the holders' obligations to purchase NEE common stock under the related stock purchase contracts on the final settlement date. The debentures are fully and unconditionally guaranteed by NEE.

Prior to the issuance of NEE's common stock, the stock purchase contracts, if dilutive, will be reflected in NEE's diluted earnings per share calculations using the treasury stock method. Under this method, the number of shares of NEE common stock used in calculating diluted earnings per share is deemed to be increased by the excess, if any, of the number of shares that would be issued upon settlement of the stock purchase contracts over the number of shares that could be purchased by NEE in the market, at the average market price during the period, using the proceeds receivable upon settlement.

13. Asset Retirement Obligations

FPL's ARO relates primarily to the nuclear decommissioning obligation of its nuclear units. FPL's AROs other than nuclear decommissioning are not significant. The accounting provisions result in timing differences in the recognition of legal asset retirement costs for financial reporting purposes and the method the FPSC allows FPL to recover in rates. NEER's ARO relates primarily to the nuclear decommissioning obligation of its nuclear plants and obligations for the dismantlement of its wind facilities located on leased property. See Note 1 - Decommissioning of Nuclear Plants, Dismantlement of Plants and Other Accrued Asset Removal Costs.

A rollforward of NEE's and FPL's ARO is as follows:

	FPL	NEER	NEE
		(millions)	
Balances, December 31, 2013	$ 1,285	$ 565	$ 1,850
Liabilities incurred	1	29	30
Accretion expense	70	38	108
Liabilities settled	—	(1)	(1)
Revision in estimated cash flows - net	(1)	—	(1)
Balances, December 31, 2014	1,355	631	1,986
Liabilities incurred	**5**	**46**	**51**
Accretion expense	**73**	**43**	**116**
Liabilities settled	**(20)**	**(2)**	**(22)**
Revision in estimated cash flows - net	**409** [a]	**(71)** [b]	**338**
Balances, December 31, 2015	**$ 1,822**	**$ 647**	**$ 2,469**

(a) Primarily reflects the effect of revised cost estimates for decommissioning FPL's nuclear units consistent with the updated nuclear decommissioning studies filed with the FPSC in December 2015.
(b) Primarily reflects the effect of revised cost estimates for decommissioning NEER's nuclear units and a change in assumptions relating to spent fuel costs, partly offset by increased escalation rates.

Restricted funds for the payment of future expenditures to decommission NEE's and FPL's nuclear units included in special use funds on NEE's and FPL's consolidated balance sheets are as follows (see Note 4 - Special Use Funds):

	FPL	NEER	NEE
		(millions)	
Balances, December 31, 2015	**$ 3,430**	**$ 1,634**	**$ 5,064**
Balances, December 31, 2014	$ 3,449	$ 1,642	$ 5,091

NEE and FPL have identified but not recognized ARO liabilities related to electric transmission and distribution and telecommunications assets resulting from easements over property not owned by NEE or FPL. These easements are generally perpetual and only require retirement action upon abandonment or cessation of use of the property or facility for its specified purpose. The ARO liability is not estimable for such easements as NEE and FPL intend to use these properties indefinitely. In the event NEE and FPL decide to abandon or cease the use of a particular easement, an ARO liability would be recorded at that time.

14. Commitments and Contingencies

Commitments - NEE and its subsidiaries have made commitments in connection with a portion of their projected capital expenditures. Capital expenditures at FPL include, among other things, the cost for construction or acquisition of additional facilities and equipment to meet customer demand, as well as capital improvements to and maintenance of existing facilities and the procurement of nuclear fuel. At NEER, capital expenditures include, among other things, the cost, including capitalized interest, for construction and development of wind and solar projects and the procurement of nuclear fuel, as well as the investment in the development and construction of its natural gas pipeline assets. Capital expenditures for Corporate and Other primarily include the cost to meet customer-specific requirements and maintain the fiber-optic network for the fiber-optic telecommunications business (FPL FiberNet) and the cost to maintain existing transmission facilities at NextEra Energy Transmission, LLC.

At December 31, 2015, estimated capital expenditures for 2016 through 2020 for which applicable internal approvals (and also FPSC approvals for FPL, if required) have been received were as follows:

	2016	2017	2018	2019	2020	Total
			(millions)			
FPL:						
Generation:[a]						
New[b][c]	$ 1,085	$ 45	$ —	$ —	$ —	$ 1,130
Existing	620	960	680	520	550	3,330
Transmission and distribution	1,930	1,990	1,985	2,485	2,335	10,725
Nuclear fuel	170	125	190	170	210	865
General and other	245	265	240	185	185	1,120
Total	$ 4,050	$ 3,385	$ 3,095	$ 3,360	$ 3,280	$ 17,170
NEER:						
Wind[d]	$ 2,040	$ 75	$ 30	$ 25	$ 25	$ 2,195
Solar[e]	1,240	10	—	—	—	1,250
Nuclear, including nuclear fuel	300	240	270	310	265	1,385
Natural gas pipelines[f]	1,020	740	465	35	15	2,275
Other	495	60	75	50	65	745
Total	$ 5,095	$ 1,125	$ 840	$ 420	$ 370	$ 7,850
Corporate and Other	$ 215	$ 160	$ 115	$ 140	$ 135	$ 765

(a) Includes AFUDC of approximately $76 million, $14 million and $11 million for 2016 through 2018, respectively.
(b) Includes land, generation structures, transmission interconnection and integration and licensing.
(c) Excludes capital expenditures of approximately $1.0 billion for the natural gas-fired combined-cycle unit in Okeechobee County, Florida for the period from the end of 2016 (when approval by the Florida Power Plant Siting Board (Siting Board), comprised of the Florida governor and cabinet is expected) through 2019. Also excludes capital expenditures for the construction costs for the two additional nuclear units at FPL's Turkey Point site beyond what is required to receive and maintain an NRC license for each unit.
(d) Consists of capital expenditures for new wind projects and related transmission totaling approximately 1,365 MW.
(e) Includes capital expenditures for new solar projects and related transmission totaling approximately 1,045 MW.
(f) Includes capital expenditures for construction of three natural gas pipelines, including equity contributions associated with equity investments in joint ventures for two pipelines and AFUDC associated with the third pipeline. The natural gas pipelines are subject to certain conditions. See Contracts below.

The above estimates are subject to continuing review and adjustment and actual capital expenditures may vary significantly from these estimates.

Contracts - In addition to the commitments made in connection with the estimated capital expenditures included in the table in Commitments above, FPL has commitments under long-term purchased power and fuel contracts. As of December 31, 2015, FPL is obligated under a take-or-pay purchased power contract to pay for approximately 375 MW annually through 2021. FPL also has various firm pay-for-performance contracts to purchase approximately 444 MW from certain cogenerators and small power producers with expiration dates ranging from 2025 through 2034. The purchased power contracts provide for capacity and energy payments. Energy payments are based on the actual power taken under these contracts. Capacity payments for the pay-for-performance contracts are subject to the facilities meeting certain contract conditions. FPL has contracts with expiration dates through 2036 for the purchase and transportation of natural gas and coal, and storage of natural gas. In addition, FPL has entered into 25-year natural gas transportation agreements with each of Sabal Trail Transmission, LLC (Sabal Trail, an entity in which a wholly owned NEER subsidiary has a 33% ownership interest), and Florida Southeast Connection, LLC (Florida Southeast Connection, a wholly owned

NEER subsidiary), each of which will build, own and operate a pipeline that will be part of a natural gas pipeline system, for a quantity of 400,000 MMBtu/day beginning on May 1, 2017 and increasing to 600,000 MMBtu/day on May 1, 2020. These agreements contain firm commitments that are contingent upon the occurrence of certain events, including FERC approval on acceptable terms and the completion of construction of the pipeline system to be built by Sabal Trail and Florida Southeast Connection. See Commitments above.

As of December 31, 2015, NEER has entered into contracts with expiration dates ranging from late February 2016 through 2032 primarily for the purchase of wind turbines, wind towers and solar modules and related construction and development activities, as well as for the supply of uranium, conversion, enrichment and fabrication of nuclear fuel and has made commitments for the construction of the natural gas pipelines. Approximately $5.2 billion of related commitments are included in the estimated capital expenditures table in Commitments above. In addition, NEER has contracts primarily for the purchase, transportation and storage of natural gas and firm transmission service with expiration dates ranging from March 2016 through 2033.

The required capacity and/or minimum payments under the contracts discussed above as of December 31, 2015 were estimated as follows:

	2016	2017	2018	2019	2020	Thereafter
			(millions)			
FPL:						
Capacity charges[a]	$ 185	$ 170	$ 140	$ 120	$ 110	$ 690
Minimum charges, at projected prices:[b]						
Natural gas, including transportation and storage[c]	$ 1,020	$ 930	$ 870	$ 865	$ 920	$ 13,050
Coal, including transportation	$ 65	$ 40	$ —	$ —	$ —	$ —
NEER	$ 3,670	$ 735	$ 625	$ 135	$ 85	$ 535
Corporate and Other[d][e]	$ 60	$ 5	$ 5	$ —	$ 5	$ —

(a) Capacity charges under these contracts, substantially all of which are recoverable through the capacity clause, totaled approximately $434 million, $485 million and $487 million for the years ended December 31, 2015, 2014 and 2013, respectively. Energy charges under these contracts, which are recoverable through the fuel clause, totaled approximately $262 million, $299 million and $263 million for the years ended December 31, 2015, 2014 and 2013, respectively.
(b) Recoverable through the fuel clause.
(c) Includes approximately $200 million, $295 million, $290 million, $360 million and $7,885 million in 2017, 2018, 2019, 2020 and thereafter, respectively, of firm commitments, subject to certain conditions as noted above, related to the natural gas transportation agreements with Sabal Trail and Florida Southeast Connection.
(d) Includes an approximately $35 million commitment to invest in clean power and technology businesses through 2021.
(e) Excludes approximately $1,115 million, in 2016, of joint obligations of NEECH and NEER which are included in the NEER amounts above.

Insurance - Liability for accidents at nuclear power plants is governed by the Price-Anderson Act, which limits the liability of nuclear reactor owners to the amount of insurance available from both private sources and an industry retrospective payment plan. In accordance with this Act, NEE maintains $375 million of private liability insurance per site, which is the maximum obtainable, and participates in a secondary financial protection system, which provides up to $13.1 billion of liability insurance coverage per incident at any nuclear reactor in the U.S. Under the secondary financial protection system, NEE is subject to retrospective assessments of up to $1.0 billion ($509 million for FPL), plus any applicable taxes, per incident at any nuclear reactor in the U.S., payable at a rate not to exceed $152 million ($76 million for FPL) per incident per year. NEE and FPL are contractually entitled to recover a proportionate share of such assessments from the owners of minority interests in Seabrook, Duane Arnold and St. Lucie Unit No. 2, which approximates $15 million, $38 million and $19 million, plus any applicable taxes, per incident, respectively.

NEE participates in a nuclear insurance mutual company that provides $2.75 billion of limited insurance coverage per occurrence per site for property damage, decontamination and premature decommissioning risks at its nuclear plants and a sublimit of $1.5 billion for non-nuclear perils. The proceeds from such insurance, however, must first be used for reactor stabilization and site decontamination before they can be used for plant repair. NEE also participates in an insurance program that provides limited coverage for replacement power costs if a nuclear plant is out of service for an extended period of time because of an accident. In the event of an accident at one of NEE's or another participating insured's nuclear plants, NEE could be assessed up to $187 million ($112 million for FPL), plus any applicable taxes, in retrospective premiums in a policy year. NEE and FPL are contractually entitled to recover a proportionate share of such assessments from the owners of minority interests in Seabrook, Duane Arnold and St. Lucie Unit No. 2, which approximates $3 million, $5 million and $4 million, plus any applicable taxes, respectively.

Due to the high cost and limited coverage available from third-party insurers, NEE does not have property insurance coverage for a substantial portion of either its transmission and distribution property or natural gas pipeline assets, and has no property insurance coverage for FPL FiberNet's fiber-optic cable. Should FPL's future storm restoration costs exceed the reserve amount established through the issuance of storm-recovery bonds by a VIE in 2007, FPL may recover storm restoration costs, subject to prudence review by the FPSC, either through surcharges approved by the FPSC or through securitization provisions pursuant to Florida law.

In the event of a loss, the amount of insurance available might not be adequate to cover property damage and other expenses incurred. Uninsured losses and other expenses, to the extent not recovered from customers in the case of FPL or Lone Star

Transmission, LLC, would be borne by NEE and/or FPL and/or their affiliates, as the case may be, and could have a material adverse effect on NEE's and FPL's financial condition, results of operations and liquidity.

Spain Solar Projects - In March 2013 and May 2013, events of default occurred under the project-level financing agreements for the Spain solar projects as a result of changes of law that occurred in December 2012 and February 2013. These changes of law negatively affected the projected economics of the projects and caused the project-level financing to be unsupportable by expected future project cash flows. Under the project-level financing, events of default (including those discussed below) provide for, among other things, a right by the lenders (which they have not exercised) to accelerate the payment of the project-level debt. Accordingly, in 2013, the project-level debt and the associated derivative liabilities related to interest rate swaps were classified as current maturities of long-term debt and current derivative liabilities, respectively, on NEE's consolidated balance sheets, and totaled $559 million and $101 million, respectively, as of December 31, 2015. In July 2013, the Spanish government published a new law that created a new economic framework for the Spanish renewable energy sector. Additional regulatory pronouncements from the Spanish government needed to complete and implement the framework were finalized in June 2014. Based on NEE's assessment, the regulatory pronouncements do not indicate a further impairment of the Spain solar projects. However, the Spanish government's interpretation of the new remuneration scheme resulted in a reduction to 2013 revenues of approximately $19 million which was reflected in operating revenues for the year ended December 31, 2014 in NEE's consolidated statements of income. In December 2015, the Spanish government determined that such a reduction was not warranted and refunded approximately $17 million, which was reflected in operating revenues for the year ended December 31, 2015. Since the third quarter of 2014, events of default have occurred under the project-level financing agreements related to certain debt service coverage ratio covenants not being met. The project-level subsidiaries have requested the lenders to waive the events of default related to the debt service coverage ratio.

Impairments recorded due to the changes of law caused the project-level subsidiaries in Spain to have a negative net equity position on their balance sheets, which requires them under Spanish law to commence liquidation proceedings if the net equity position is not restored to specified levels. Prior to 2015, Spanish law had provided an exemption applicable to the project-level subsidiaries that enabled the exclusion of asset-related impairments in the equity calculation. Such exemption was not granted for 2015, and therefore, the project-level subsidiaries commenced liquidation on April 23, 2015. The liquidators are reviewing the liquidation balance sheets and inventory schedules and will make recommendations to NextEra Energy España, S.L. (NEE España), the NEER subsidiary in Spain that is the direct shareholder of the project-level subsidiaries, to either restructure the project-level debt or file for insolvency. The liquidation event could cause the lenders to seek to accelerate the payment of the project-related debt and/or foreclose on the project assets, which they have not done to date. However, as part of a settlement agreement reached in December 2013 between NEECH, NEE España, the project-level subsidiaries and the lenders, the future recourse of the lenders under the project-level financing is effectively limited to the letters of credit described below and to the assets of the project-level subsidiaries. Under the settlement agreement, the lenders, among other things, irrevocably waived events of default related to changes of law that existed at the time of the settlement as described above, and NEECH affiliates provided for the project-level subsidiaries to post approximately €37 million (approximately $40 million as of December 31, 2015) in letters of credit to fund operating and debt service reserves under the project-level financing, of which €14 million (approximately $15 million) has been drawn as of December 31, 2015. NEE España, the project-level subsidiaries and the lenders have been in negotiations to seek to restructure the project-level financing; however, there can be no assurance that the project-level financing will be successfully restructured or that the lenders will not exercise remedies available to them under the project financing agreements for, among other things, current and future events of default, if any, or for the commencement of liquidation by the project level subsidiaries.

Legal Proceedings - In 1995 and 1996, NEE, through an indirect subsidiary, purchased from Adelphia Communications Corporation (Adelphia) 1,091,524 shares of Adelphia common stock and 20,000 shares of Adelphia preferred stock (convertible into 2,358,490 shares of Adelphia common stock) for an aggregate price of approximately $35,900,000. On January 29, 1999, Adelphia repurchased all of these shares for $149,213,130 in cash. In June 2004, Adelphia, Adelphia Cablevision, L.L.C. and the Official Committee of Unsecured Creditors of Adelphia filed a complaint against NEE and its indirect subsidiary in the U.S. Bankruptcy Court, Southern District of New York. The complaint alleges that the repurchase of these shares by Adelphia was a fraudulent transfer, in that at the time of the transaction Adelphia (i) was insolvent or was rendered insolvent, (ii) did not receive reasonably equivalent value in exchange for the cash it paid, and (iii) was engaged or about to engage in a business or transaction for which any property remaining with Adelphia had unreasonably small capital. The complaint seeks the recovery for the benefit of Adelphia's bankruptcy estate of the cash paid for the repurchased shares, plus interest from January 29, 1999. NEE filed an answer to the complaint. NEE believes that the complaint is without merit because, among other reasons, Adelphia will be unable to demonstrate that (i) Adelphia's repurchase of shares from NEE, which repurchase was at the market value for those shares, was not for reasonably equivalent value, (ii) Adelphia was insolvent at the time of the stock repurchase, or (iii) the stock repurchase left Adelphia with unreasonably small capital. The trial was completed in May 2012 and closing arguments were heard in July 2012. In May 2014, the U.S. Bankruptcy Court, Southern District of New York, issued its decision after trial, finding, among other things, that Adelphia was not insolvent, or rendered insolvent, at the time of the stock repurchase. The bankruptcy court further ruled that Adelphia was not left with inadequate capital or equitably insolvent at the time of the stock repurchase. The decision after trial represented proposed findings of fact and conclusions of law which were subject to de novo review by the U.S. District Court for the Southern District of New York. In March 2015, the U.S. District Court issued a final order which effectively affirmed the findings of the U.S. Bankruptcy Court in NEE's favor. In April 2015, Adelphia filed an appeal of the final order to the U.S. Court of Appeals for the Second Circuit.

NEE and FPL are vigorously defending, and believe that they or their affiliates have meritorious defenses to, the lawsuit described

above. In addition to the legal proceeding discussed above, NEE and its subsidiaries, including FPL, are involved in other legal and regulatory proceedings, actions and claims in the ordinary course of their businesses. Entities in which subsidiaries of NEE, including FPL, have a partial ownership interest are also involved in legal and regulatory proceedings, actions and claims, the liabilities from which, if any, would be shared by such subsidiary. In the event that NEE and FPL, or their affiliates, do not prevail in the lawsuit described above or these other legal and regulatory proceedings, actions and claims, there may be a material adverse effect on their financial statements. While management is unable to predict with certainty the outcome of the lawsuit described above or these other legal and regulatory proceedings, actions and claims, based on current knowledge it is not expected that their ultimate resolution, individually or collectively, will have a material adverse effect on the financial statements of NEE or FPL.

15. Segment Information

NEE's reportable segments are FPL, a rate-regulated electric utility, and NEER, a competitive energy business. NEER's segment information includes an allocation of interest expense from NEECH based on a deemed capital structure of 70% debt and allocated shared service costs. Corporate and Other represents other business activities, and eliminating entries. During the fourth quarter of 2015, the natural gas pipeline projects that were previously reported in Corporate and Other were moved to the NEER segment reflecting the overall scale of the natural gas pipeline investments and management of these projects within NEER's gas infrastructure business. Prior year amounts for NEER and Corporate and Other were adjusted to reflect this segment change. NEE's operating revenues derived from the sale of electricity represented approximately 92%, 91% and 92% of NEE's operating revenues for the years ended December 31, 2015, 2014 and 2013, respectively. Approximately 2%, 2% and 1% of operating revenues were from foreign sources for the years ended December 31, 2015, 2014 and 2013, respectively. At December 31, 2015 and 2014, approximately 3% and 4%, respectively, of long-lived assets were located in foreign countries.

NEE's segment information is as follows:

	2015				2014				2013

(a) Interest expense allocated from NEECH is based on a deemed capital structure of 70% debt. For this purpose, the deferred credit associated with differential membership interests sold by NEER subsidiaries is included with debt. Residual NEECH corporate interest expense is included in Corporate and Other.
(b) NEER includes an impairment charge of $300 million in 2013 related to the Spain solar projects. See Note 4 - Nonrecurring Fair Value Measurements.
(c) NEER includes PTCs that were recognized based on its tax sharing agreement with NEE. See Note 1 - Income Taxes.
(d) NEER includes after-tax charges of $342 million in 2013 associated with the impairment of the Spain solar projects. See Note 4 - Nonrecurring Fair Value Measurements.
(e) See Note 6.
(f) Reflects reclassification of debt issuance costs of $324 million ($85 million for FPL) in 2014 and $298 million ($68 million for FPL) in 2013. See Note 1 - Debt Issuance Costs.

16. Summarized Financial Information of NEECH

NEECH, a 100% owned subsidiary of NEE, provides funding for, and holds ownership interests in, NEE's operating subsidiaries other than FPL. NEECH's debentures and junior subordinated debentures including those that were registered pursuant to the Securities Act of 1933, as amended, are fully and unconditionally guaranteed by NEE. Condensed consolidating financial information is as follows:

(a) In the opinion of NEE and FPL, all adjustments, which consist of normal recurring accruals necessary to present a fair statement of the amounts shown for such periods, have been made. Results of operations for an interim period generally will not give a true indication of results for the year.
(b) The sum of the quarterly amounts may not equal the total for the year due to rounding.
(c) The sum of the quarterly amounts may not equal the total for the year due to rounding and changes in weighted-average number of common shares outstanding.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

None

Item 9A. Controls and Procedures

Disclosure Controls and Procedures

As of December 31, 2015, each of NEE and FPL had performed an evaluation, under the supervision and with the participation of its management, including NEE's and FPL's chief executive officer and chief financial officer, of the effectiveness of the design and operation of each company's disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 Rules 13a-15(e) and 15d-15(e)). Based upon that evaluation, the chief executive officer and chief financial officer of each of NEE and FPL concluded that the company's disclosure controls and procedures were effective as of December 31, 2015.

Internal Control Over Financial Reporting

(a) Management's Annual Report on Internal Control Over Financial Reporting

See Item 8. Financial Statements and Supplementary Data.

(b) Attestation Report of the Independent Registered Public Accounting Firm

See Item 8. Financial Statements and Supplementary Data.

(c) Changes in Internal Control Over Financial Reporting

NEE and FPL are continuously seeking to improve the efficiency and effectiveness of their operations and of their internal controls. This results in refinements to processes throughout NEE and FPL. However, there has been no change in NEE's or FPL's internal control over financial reporting (as defined in the Securities Exchange Act of 1934 Rules 13a-15(f) and 15d-15(f)) that occurred during NEE's and FPL's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, NEE's or FPL's internal control over financial reporting.

Item 9B. Other Information

None

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information required by this item will be included under the headings "Business of the Annual Meeting," "Information About NextEra Energy and Management" and "Corporate Governance and Board Matters" in NEE's Proxy Statement which will be filed with the SEC in connection with the 2016 Annual Meeting of Shareholders (NEE's Proxy Statement) and is incorporated herein by reference, or is included in Item 1. Business - Executive Officers of NEE.

NEE has adopted the NextEra Energy, Inc. Code of Ethics for Senior Executive and Financial Officers (the Senior Financial Executive Code), which is applicable to the chief executive officer, the chief financial officer, the chief accounting officer and other senior executive and financial officers. The Senior Financial Executive Code is available under Corporate Governance in the Investor Relations section of NEE's internet website at www.nexteraenergy.com. Any amendments or waivers of the Senior Financial Executive Code which are required to be disclosed to shareholders under SEC rules will be disclosed on the NEE website at the address listed above.

Item 11. Executive Compensation

The information required by this item will be included in NEE's Proxy Statement under the headings "Executive Compensation" and "Corporate Governance and Board Matters" and is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this item relating to security ownership of certain beneficial owners and management will be included in NEE's Proxy Statement under the heading "Information About NextEra Energy and Management" and is incorporated herein by reference.

Securities Authorized For Issuance Under Equity Compensation Plans

NEE's equity compensation plan information as of December 31, 2015 is as follows:

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by security holders	5,036,579 (a)	$ 63.39 (b)	10,480,752
Equity compensation plans not approved by security holders	—	—	—
Total	5,036,579	$ 63.39	10,480,752

(a) Includes an aggregate of 2,866,501 outstanding options, 1,949,762 unvested performance share awards (at maximum payout), 16,564 deferred fully vested performance shares and 181,792 deferred stock awards (including future reinvested dividends) under the NextEra Energy, Inc. Amended and Restated 2011 Long Term Incentive Plan and former LTIP, and 21,960 fully vested shares deferred by directors under the NextEra Energy, Inc. 2007 Non-Employee Directors Stock Plan and its predecessor, the FPL Group, Inc. Amended and Restated Non-Employee Directors Stock Plan.

(b) Relates to outstanding options only.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by this item, to the extent applicable, will be included in NEE's Proxy Statement under the heading "Corporate Governance and Board Matters" and is incorporated herein by reference.

Item 14. Principal Accounting Fees and Services

NEE - The information required by this item will be included in NEE's Proxy Statement under the heading "Audit-Related Matters" and is incorporated herein by reference.

FPL - The following table presents fees billed for professional services rendered by Deloitte & Touche LLP, the member firms of Deloitte Touche Tohmatsu, and their respective affiliates (collectively, Deloitte & Touche) for the fiscal years ended December 31, 2015 and 2014. The amounts presented below reflect allocations from NEE for FPL's portion of the fees, as well as amounts billed directly to FPL.

	2015	2014
Audit fees[a]	$ 3,909,000	$ 3,939,000
Audit-related fees[b]	97,000	128,000
Tax fees[c]	63,000	59,000
All other fees[d]	14,000	21,000
Total	$ 4,083,000	$ 4,147,000

(a) Audit fees consist of fees billed for professional services rendered for the audit of FPL's and NEE's annual consolidated financial statements for the fiscal year, the reviews of the financial statements included in FPL's and NEE's Quarterly Reports on Form 10-Q during the fiscal year and the audit of the effectiveness of internal control over financial reporting, comfort letters, consents, and other services related to SEC matters and services in connection with annual and semi-annual filings of NEE's financial statements with the Japanese Ministry of Finance.

(b) Audit-related fees consist of fees billed for assurance and related services that are reasonably related to the performance of the audit or review of FPL's and NEE's consolidated financial statements and are not reported under audit fees. These fees primarily related to agreed-upon procedures and attestation services.

(c) Tax fees consist of fees billed for professional services rendered for tax compliance, tax advice and tax planning. In 2015 and 2014, approximately $28,000 and $24,000, respectively, was paid related to tax advice and planning services. All other tax fees in 2015 and in 2014 related to tax compliance services.

(d) All other fees consist of fees for products and services other than the services reported under the other named categories. In 2015 and 2014, these fees related to training.

In accordance with the requirements of Sarbanes-Oxley Act of 2002, the Audit Committee Charter and the Audit Committee's pre-approval policy for services provided by the independent registered public accounting firm, all services performed by Deloitte & Touche are approved in advance by the Audit Committee, except for audits of certain trust funds where the fees are paid by the trust. Audit and audit-related services specifically identified in an appendix to the pre-approval policy are pre-approved by the Audit Committee each year. This pre-approval allows management to request the specified audit and audit-related services on an as-needed basis during the year, provided any such services are reviewed with the Audit Committee at its next regularly scheduled meeting. Any audit or audit-related service for which the fee is expected to exceed $250,000, or that involves a service not listed on the pre-approval list, must be specifically approved by the Audit Committee prior to commencement of such service. In addition, the Audit Committee approves all services other than audit and audit-related services performed by Deloitte & Touche in advance of the commencement of such work. The Audit Committee has delegated to the Chair of the committee the right to approve audit, audit-related, tax and other services, within certain limitations, between meetings of the Audit Committee, provided any such decision is presented to the Audit Committee at its next regularly scheduled meeting. At each Audit Committee meeting (other than meetings held to review earnings materials), the Audit Committee reviews a schedule of services for which Deloitte & Touche has been engaged since the prior Audit Committee meeting under existing pre-approvals and the estimated fees for those services. In 2015 and 2014, none of the amounts presented above represent services provided to NEE or FPL by Deloitte & Touche that were approved by the Audit Committee after services were rendered pursuant to Rule 2-01(c)(7)(i)(C) of Regulation S-X (which provides for a waiver of the otherwise applicable pre-approval requirement if certain conditions are met).

PART IV

Item 15. Exhibits, Financial Statement Schedules

(a) 1. Financial Statements

2. Financial Statement Schedules - Schedules are omitted as not applicable or not required.

3. Exhibits (including those incorporated by reference)

Certain exhibits listed below refer to "FPL Group" and "FPL Group Capital," and were effective prior to the change of the name FPL Group, Inc. to NextEra Energy, Inc., and of the name FPL Group Capital Inc to NextEra Energy Capital Holdings, Inc., during 2010.

[1] The Compensation Committee has expressly identified these items and acknowledged that they are subject to Internal Revenue Code Section 409A. In particular, these items include: (i) the additional deferred compensation provided by the designation of certain officers as Class A Executives, effective on or after January 1, 2006; and (ii) the additional deferred compensation set forth in SERP Amendment #4 to the Prior Plan (meaning amounts deferred by certain senior officers specified by the Compensation Committee who became participants in the SERP on or after April 1, 1997 at the rate of two times the basic credit and, to the extent applicable, the transition credit under the cash balance formula in the SERP for their pensionable earnings on or after January 1, 2006). Importantly, nothing in Amendment #4 to the Prior Plan, the SERP, Compensation Committee resolutions, or any other document shall be construed as subjecting to Code Section 409A any deferrals made under the SERP prior to January 1, 2005, except as expressly noted herein.

Exhibit 10(jj)

NEXTERA ENERGY, INC.

NON-EMPLOYEE DIRECTOR COMPENSATION SUMMARY

(Effective January 1, 2016)

Annual Retainer (payable quarterly in common stock or cash)	$80,000
Board or Committee meeting fee	$2,000/meeting
Audit Committee Chair retainer (annual) (payable quarterly)	$20,000
Lead Director retainer (annual) (payable quarterly)	$25,000
Other Committee Chair retainer (annual) (payable quarterly)	$15,000
Annual grant of restricted stock (under 2007 Non-Employee Directors Stock Plan)	That number of shares determined by dividing $140,000 by closing price of NextEra Energy common stock on effective date of grant (rounded up to the nearest 10 shares)
Miscellaneous	- Travel and Accident Insurance (including spouse coverage) - One director accrues dividends and interest on the phantom stock units granted to him upon the termination of the Non-Employee Director Retirement Plan in 1996 - Travel and related expenses while on Board business, and actual administrative or similar expenses incurred for Board or Committee business, are paid or reimbursed by the Company. Directors may travel on Company aircraft in accordance with the Company's Aviation Policy (primarily to or from Board meetings and while on Board business; in limited circumstances for other reasons if the Company would incur little if any incremental cost, space is available and the aircraft is already in use for another authorized purpose - may be accompanied by immediate family members when space is available). - Directors may participate in the Company's Deferred Compensation Plan. - Directors may participate in the Company's matching gift program, which matches gifts to educational institutions to a maximum of $10,000 per donor.

Form of

PERFORMANCE SHARE AWARD AGREEMENT
for the Performance Period beginning [ ]
and ending [ ]

under the

NEXTERA ENERGY, INC. AMENDED AND RESTATED
2011 LONG TERM INCENTIVE PLAN

This Performance Share Award Agreement ("Agreement") between NextEra Energy, Inc. (hereinafter called the "Company") and _____ (hereinafter called the "Grantee") is dated _____, 20__. All capitalized terms used in this Agreement which are not defined herein shall have the meanings ascribed to such terms in the NextEra Energy, Inc. Amended and Restated 2011 Long Term Incentive Plan, as amended from time to time (the "Plan").

1. *Grant of Performance Share Award.* The Company hereby grants to the Grantee a Performance Share Award ("Award") which confers upon the Grantee the right to receive a number of shares ("Performance Shares") of Stock, determined as set forth in section 2 hereof. The par value of the Performance Shares shall be deemed paid by the promise by the Grantee to perform future Service to the Company or an Affiliate. The Grantee's right to receive the Performance Shares shall be subject to the terms and conditions set forth in this Agreement and in the Plan. The performance period for which the Award is granted is the period beginning on [ ] and ending on [ ] (such period hereinafter referred to as the "Performance Period").

The "Target" number of Performance Shares granted to the Grantee for the Performance Period is _____.

2. *Payment of Performance Share Award.*

(a) Payment of the Award shall be conditioned upon (i) the Company's achievement of the Code Section 162(m) corporate performance objective(s) established by the Committee for the Performance Period (the "Section 162(m) Objective"), (ii) certification by the Committee of (1) achievement of the Section 162(m) Objective for the Performance Period and (2) the Company's achievement of any secondary corporate performance objective(s) which were established by the Committee for the Performance Period for determining the percentage of the Target number of Performance Shares that actually may become vested under the Award (the

"Award Performance Objectives," which are attached hereto as Exhibit "A"), and (iii) Committee approval of the number of Performance Shares to be paid to the Grantee. Subject to the provisions of the Plan, the Grantee shall have the right to payment of that percentage of the Grantee's Target number of Performance Shares set forth in section 1 hereof which is equal to the percentage achievement of the Award Performance Objectives (including an individual performance modifier based on an assessment by the Company's chief executive officer or the Committee of the Grantee's individual relative contribution to the attainment of the Award Performance Objectives) certified by the Committee for the Performance Period, which will be between 0% and 200%, inclusive (the "Achieved Percentage"). In no event will the Grantee vest in or have a right to payment of more than 200% of such Target number of Performance Shares. The Committee has the discretion to reduce the payout. If the Committee does not certify that the Section 162(m) Objective has been achieved for the Performance Period, the Grantee will forfeit all, and will not vest in any, of the Performance Shares and, in such a case for purposes of this Agreement, the Achieved Percentage shall be 0%.

(b) Notwithstanding the foregoing or the provisions of section 4 hereof or any other provision of this Agreement or the Plan, if (i) the Grantee is a party to an Executive Retention Employment Agreement with the Company (as amended from time to time, "Retention Agreement") and has not waived his or her rights, either entirely or in pertinent part, under such Retention Agreement, (ii) the Effective Date (as defined in the Retention Agreement) has occurred and the Employment Period (as defined in the Retention Agreement) has commenced and has not terminated pursuant to section 3(b) of the Retention Agreement, and (iii) a Change of Control (as defined in the Retention Agreement) has occurred, then, so long as the Grantee is then providing Service:

(1) fifty percent (50%) of the Performance Shares, earned at a deemed achievement level equal to the higher of (x) the Target number of Performance Shares set forth in this Agreement or (y) the average level (expressed as a percentage of the Target number of Performance Shares set forth in this Agreement) of achievement in respect of similar performance stock-based awards which matured over the three fiscal years immediately preceding the fiscal year in which such Change of Control occurred (such higher level, the "Deemed Performance Award Achievement Level"), shall vest upon such Change of Control and shall be payable as soon as practicable thereafter (but in all cases within thirty days after such Change of Control); and

(2) the other fifty percent (50%) of the Performance Shares (earned at the Deemed Performance Award Achievement level calculated as set forth in subsection (1), above) shall vest on the date after such Change of Control which is the earlier of (i) one year after the date on which such Change of Control occurred, if the Grantee is then providing Service to the Company

or an Affiliate (including to a successor to the Company or such Affiliate), or (ii) the date on which the Grantee's Service to the Company or an Affiliate (including to a successor to the Company or such Affiliate) terminates, and shall be payable (whether under clause (i) or clause (ii) of this section 2(b)(2)) as soon as practicable thereafter (and in any event no later than the 15th day of the third month following the end of the first taxable year in which the right to such payment arises).

(c) Notwithstanding the provisions of sections 2(a) and 4 hereof or any other provision of this Agreement or the Plan, if the Grantee is not a party to a Retention Agreement and so long as the Grantee is still providing Service upon the occurrence of a Change in Control (as defined, as of the date hereof, in the Plan for all purposes of this Agreement), fifty percent (50%) of the Performance Shares, earned at the Deemed Performance Award Achievement Level, shall vest upon such Change in Control and shall be payable as soon as practicable thereafter (but in all cases within thirty days after such Change in Control). The remainder of the Performance Shares shall remain outstanding (on a converted basis, if applicable) and shall remain subject to the terms and conditions of the Plan. If the Grantee provides Service to the Company or an Affiliate (including to a successor to the Company or such Affiliate) from the date of such Change in Control to the date of the first anniversary of such Change in Control or if, prior to the first anniversary of such Change in Control, the Grantee is involuntarily terminated other than for Cause or Disability, the fifty percent (50%) of the Performance Shares outstanding immediately prior to such Change in Control that did not vest at the time of such Change in Control shall vest on the date which is the earlier of (a) the first anniversary of such Change in Control or (b) the date on which the Grantee's Service to the Company or an Affiliate (including to a successor to the Company or such Affiliate) terminates and shall be payable (whether under clause (a) or clause (b) of this section 2(c)) as soon as practicable thereafter (but in no event later than the 15th day of the third month following the end of the first taxable year in which the right to such payment arises). The deemed level of achievement with respect to such awards shall be the Deemed Performance Award Achievement Level.

(d) If, as a result of a Change of Control or a Change in Control, as applicable, shares of Stock are exchanged for or converted into a different form of equity security and/or the right to receive other property (including cash), payment in respect of the Performance Shares shall, to the maximum extent practicable, be made in the same form.

3 . *Form of Payment of Award.* Subject to section 2(d) hereof, the Award shall be payable in shares of Stock. Upon delivery of Performance Shares to the Grantee, the Company shall have the right to withhold from any such distribution, in order to meet the Company's obligations for the payment of withholding taxes, shares of Stock with a Fair Market Value equal to the minimum statutory withholding for taxes (including federal and state income taxes and payroll

taxes applicable to the supplemental taxable income relating to such distribution) and any other tax liabilities for which the Company has an obligation relating to such distribution. For the purpose of this Agreement, the date of determination of Fair Market Value shall be the date as of which the Grantee's rights to payments under the Award are determined by the Committee in accordance with section 2 hereof.

Delivery of Performance Shares shall occur as soon as administratively practicable following the Committee's determination of the Grantee's right to such delivery.

4 . *Termination of Service.* Except as otherwise set forth herein, the Grantee must remain in continuous Service (including to any successors to the Company or an Affiliate) through the Performance Period for the Award to vest. Except as otherwise set forth (a) herein, (b) in the Plan in connection with a Change in Control if the Grantee is not a party to a Retention Agreement, or (c) in a Retention Agreement to which the Grantee is a party in connection with a Change of Control (as defined in such Retention Agreement), in the event the Grantee's Service (including to any successors to the Company or an Affiliate) terminates during the Performance Period, the Grantee's right to payment of the Award shall be determined as follows:

(a) If the Grantee's termination of Service is due to resignation, discharge, or retirement prior to age 65 not meeting the condition set forth in section 4(c) hereof, all rights to the Award shall be immediately forfeited.

(b) If the Grantee's termination of Service during the Performance Period is due to (1) Disability, (2) death, or (3) retirement on or after age 65 not meeting the condition set forth in section 4(c) hereof:

(i) The Grantee's Target number of Performance Shares for the Performance Period shall be reduced to a prorated number (equal to (a) the total number of full days of the Grantee's Service completed during the Performance Period divided by the total number of days in the Performance Period, multiplied by (b) the Target number of Performance Shares granted to Grantee as set forth in section 1 hereof, and rounded to the nearest Performance Share, with 0.5 of a Performance Share being rounded up to the nearest share) of Performance Shares; and

(ii) The Grantee's right to Performance Shares under section 2 hereof shall be determined as the Grantee's Target number of Performance Shares, reduced as set forth in section 4(b)(i) hereof, times the Achieved Percentage; and

(iii) Payment of Awards under this section 4(b) shall be made after the end of the Performance Period at the time and in the manner specified in section 3 hereof.

Notwithstanding the foregoing, if, after termination of Service but prior to payment of the Award, the Grantee breaches any provision hereof, including without limitation the provisions of section 9 hereof, the Grantee shall immediately forfeit all rights to the Award.

(c) If the Grantee's termination of Service is due to retirement on or after age 50, and if, but only if, such retirement is evidenced by a writing which specifically acknowledges that this provision shall apply to such retirement and is executed by the Company's chief executive officer (or, if the Grantee is an executive officer, by a member of the Committee or the chief executive officer at the direction of the Committee, other than with respect to himself), the Grantee's Target number of Performance Shares for the Performance Period shall be as set forth in section 1 hereof and the Grantee's right to Performance Shares under section 2 hereof shall be determined as the Grantee's Target number of Performance Shares times the Achieved Percentage. Payment of the Award under this section 4(c) shall be made after the end of the Performance Period at the time and in the manner specified in section 3 hereof. Notwithstanding the foregoing, if, after termination of Service but prior to payment of the Award, the Grantee breaches any provision hereof, including without limitation the provisions of section 9 hereof, the Grantee shall immediately forfeit all rights to the Award.

(d) If the Grantee's Service is terminated during the Performance Period for any reason other than as set forth in sections 4(a), (b), and (c) hereof, or if an ambiguity exists as to the interpretation of those sections, the Committee shall determine whether the Award shall be forfeited or whether the Grantee shall be entitled to full vesting or pro rata vesting as set forth above based upon full days of Service completed during the Performance Period. Payment of the Award under this section 4(d) shall be made after the end of the Performance Period at the time and in the manner specified in section 3 hereof. Notwithstanding the foregoing, if, after termination of Service but prior to payment of the Award, the Grantee breaches any provision hereof, including without limitation the provisions of section 9 hereof, the Grantee shall immediately forfeit all rights to the Award.

5 . *Adjustments.* If the number of outstanding shares of Stock is increased or decreased or the shares of Stock are changed into or exchanged for a different number of shares or kind of capital stock or other securities of the Company on account of any recapitalization, reclassification, stock split, reverse stock split, spin-off, combination of stock, exchange of stock, stock dividend or other distribution payable in capital stock, or other increase or decrease in shares of Stock effected without receipt of consideration by the Company, then the Target number of Performance Shares granted hereunder shall be adjusted proportionately. No adjustment shall be made in connection with the payment by the Company of any cash dividend on its Stock or in

connection with the issuance by the Company of any warrants, rights, or options to acquire additional shares of Stock or of securities convertible into Stock.

6. *No Rights of Stock Ownership*. This grant of Performance Shares does not entitle the Grantee to any interest in or to any dividend, voting, or other rights normally attributable to Stock ownership.

7. *Nonassignability*. The Grantee's rights and interest in the Performance Shares may not be sold, transferred, assigned, pledged, exchanged, hypothecated or otherwise disposed of except by will or the laws of descent and distribution.

8. *Effect Upon Employment.* This Agreement is not to be construed as giving any right to the Grantee for continuous employment by the Company or a Subsidiary or other Affiliate. The Company and its Subsidiaries and other Affiliates retain the right to terminate the Grantee at will and with or without cause at any time (subject to any rights the Grantee may have under the Grantee's Retention Agreement).

9. *Protective Covenants.* In consideration of the Award granted under this Agreement, the Grantee covenants and agrees as follows (the "Protective Covenants"):

(a) During the Grantee's Service with the Company, and for a two-year period following the termination of the Grantee's Service with the Company, the Grantee agrees not to (i) compete or attempt to compete for, or act as a broker or otherwise participate in, any projects in which the Company has at any time done any work or undertaken any development efforts, or (ii) directly or indirectly solicit any of the Company's customers, vendors, contractors, agents, or any other parties with which the Company has an existing or prospective business relationship, for the benefit of the Grantee or for the benefit of any third party, nor shall the Grantee accept consideration or negotiate or enter into agreements with such parties for the benefit of the Grantee or any third party.

(b) During the Grantee's Service with the Company and for a two-year period following the termination of the Grantee's Service with the Company, the Grantee shall not, directly or indirectly, on behalf of the Grantee or for any other business, person or entity, entice, induce or solicit or attempt to entice, induce or solicit any employee of the Company or its Subsidiaries or other Affiliates to leave the Company's employ (or the employ of any such Subsidiary or other Affiliate) or to hire or to cause any employee of the Company to become employed for any reason whatsoever.

(c) The Grantee shall not, at any time or in any way, disparage the Company or its current or former officers, directors, and employees, orally or in writing, or make any statements that may be derogatory or detrimental to the Company's good name or business reputation.

(d) The Grantee acknowledges that the Company would not have an adequate remedy at law for monetary damages if the Grantee breaches these Protective Covenants. Therefore, in addition to all remedies to which the Company may be entitled for a breach or threatened breach of these Protective Covenants, including but not limited to monetary damages, the Company will be entitled to specific enforcement of these Protective Covenants and to injunctive or other equitable relief as a remedy for a breach or threatened breach. In addition, upon any breach of these Protective Covenants or any separate confidentiality agreement or confidentiality provision between the Company and the Grantee, all of the Grantee's rights to receive Performance Shares not theretofore delivered under this Agreement shall be forfeited.

(e) For purposes of this section 9, the term "Company" shall include all Subsidiaries and other Affiliates of the Company (such Subsidiaries and other Affiliates being hereinafter referred to as the "NextEra Entities"). The Company and the Grantee agree that each of the NextEra Entities is an intended third-party beneficiary of this section 9, and further agree that each of the NextEra Entities is entitled to enforce the provisions of this section 9 in accordance with its terms.

(f) Notwithstanding anything to the contrary contained in this Agreement, the terms of these Protective Covenants shall survive the termination of this Agreement and shall remain in effect.

10. *Successors and Assigns.* This Agreement shall inure to the benefit of and shall be binding upon the Company and the Grantee and their respective heirs, successors and assigns.

11. *Incorporation of Plan's Terms; Other Governing Provisions.* This Agreement is made under and subject to the provisions of the Plan, and all the provisions of the Plan are also provisions of this Agreement, provided, however, (a) if there is a difference or conflict between the provisions of this Agreement and the mandatory provisions of the Plan, such mandatory provisions of the Plan shall govern, (b) if there is a difference or conflict between the provisions of this Agreement and the non-mandatory provisions of the Plan, the provisions of this Agreement shall govern, and (c) if there is a difference or conflict between the provisions of this Agreement and/or a provision of the Plan with a provision of a Retention Agreement, such provision of such Retention Agreement shall govern. Any Retention Agreement constitutes "another agreement with the Grantee" within the meaning of the Plan (including without limitation sections 17.3 and 17.4 thereof). The Company and Committee retain all authority and

powers granted by the Plan and not expressly limited by this Agreement. The Grantee acknowledges that he or she may not and shall not rely on any statement of account or other communication or document issued in connection with the Plan other than the Plan, this Agreement, and any document signed by an authorized representative of the Company that is designated as an amendment of the Plan or this Agreement.

12. *Interpretation*. The Committee shall have the authority to interpret and construe all provisions of this Agreement, and any such interpretation or construction, and any other determination contemplated to be made under the Plan or this Agreement, by the Committee shall be final, binding and conclusive, absent manifest error.

13. *Governing Law/Jurisdiction/Waiver of Jury Trial.* This Agreement shall be construed and interpreted in accordance with the laws of the State of Florida, without regard to its conflict of laws principles. All suits, actions, and proceedings relating to this Agreement or the Plan shall be brought only in the courts of the State of Florida located in Palm Beach County or in the United States District Court for the Southern District of Florida in West Palm Beach, Florida. The Company and the Grantee hereby consent to the personal jurisdiction of the courts described in this section 13 for the purpose of all suits, actions, and proceedings relating to the Agreement or the Plan. The Company and the Grantee each waive all objections to venue and to all claims that a court chosen in accordance with this section 13 is improper based on a venue or a forum non conveniens claim.

TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, THE PARTIES HEREBY KNOWINGLY, VOLUNTARILY AND INTENTIONALLY WAIVE ANY RIGHT WHICH ANY PARTY MAY HAVE TO TRIAL BY JURY IN RESPECT OF ANY PROCEEDING, LITIGATION OR COUNTERCLAIM BASED ON, OR ARISING OUT OF, UNDER OR IN CONNECTION WITH THIS AGREEMENT.

14. *Amendment.* This Agreement may be amended, in whole or in part and in any manner not inconsistent with the provisions of the Plan, at any time and from time to time, by written agreement between the Company and the Grantee.

15. *Data Privacy*. By entering into this Agreement, the Grantee: (i) authorizes the Company or any of the NextEra Entities, and any agent of the Company or any of the NextEra Entities administering the Plan or providing Plan recordkeeping services, to disclose to the Company or any of the NextEra Entities such information and data as the Company or any such NextEra Entities shall reasonably request in order to facilitate the administration of this Agreement; and (ii) authorizes the Company or any of the NextEra Entities to store and transmit such information

in electronic form, provided such information is appropriately safeguarded in accordance with Company policy.

By signing this Agreement, the Grantee accepts and agrees to all of the foregoing terms and provisions and to all the terms and provisions of the Plan incorporated herein by reference and confirms that the Grantee has received a copy of the Plan.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the date and year first above written.

Rule 13a-14(a)/15d-14(a) Certification

I, James L. Robo, certify that:

1. I have reviewed this Form 10-K for the annual period ended December 31, 2015 of NextEra Energy, Inc. (the registrant);
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Exhibit 31(c)

Rule 13a-14(a)/15d-14(a) Certification

I, Eric E. Silagy, certify that:

1. I have reviewed this Form 10-K for the annual period ended December 31, 2015 of Florida Power & Light Company (the registrant);
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Exhibit 31(d)

Rule 13a-14(a)/15d-14(a) Certification

I, Moray P. Dewhurst, certify that:

1. I have reviewed this Form 10-K for the annual period ended December 31, 2015 of Florida Power & Light Company (the registrant);
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

The foregoing certification is being furnished as an exhibit to the Report pursuant to Item 601(b)(32) of Regulation S-K and Section 906 of the Sarbanes-Oxley Act of 2002 and, accordingly, is not being filed with the Securities and Exchange Commission as part of the Report and is not to be incorporated by reference into any filing of the registrant under the Securities Act of 1933 or the Securities Exchange Act of 1934 (whether made before or after the date of the Report, irrespective of any general incorporation language contained in such filing).

Exhibit 4 (a)

Underwriting Agreement, dated June 10, 2015, with respect to the Broward County Series 2015 Bonds.

$85,000,000
BROWARD COUNTY, FLORIDA

Industrial Development Revenue Bonds
(Florida Power & Light Company Project)
Series 2015

UNDERWRITING AGREEMENT

UNDERWRITING AGREEMENT, dated June 10, 2015, between Broward County, Florida (the "Issuer"), and Morgan Stanley & Co. LLC (the "Underwriter").

1. Description of Bonds. The Issuer proposes to issue and sell $85,000,000 aggregate principal amount of its Industrial Development Revenue Bonds (Florida Power & Light Company Project), Series 2015, with the terms specified in Schedule I hereto (the "Bonds"), pursuant to a Trust Indenture, to be dated as of June 1, 2015 (the "Indenture"), by and between the Issuer and The Bank of New York Mellon Trust Company, N.A., as trustee (the "Trustee"), and pursuant to a resolution adopted by the Issuer on June 2, 2015 (the "Resolution"). The Bonds will be payable, except to the extent payable from bond proceeds and other moneys pledged therefor, solely from, and secured by a pledge of, the revenues to be derived by the Issuer under a Loan Agreement, to be dated as of June 1, 2015 (the "Loan Agreement"), by and between the Issuer and Florida Power & Light Company (the "Company").

2. Purchase, Sale and Closing. On the basis of the representations and warranties contained herein and in the Letter of Representation, hereinafter defined, and subject to the terms and conditions set forth herein and in the Official Statement, hereinafter defined, the Underwriter will purchase from the Issuer, and the Issuer will sell to such Underwriter, the Bonds. The price for the Bonds will be 100% of the principal amount thereof less an underwriting fee of $74,375 and out-of-pocket expenses of $2,878.11. The closing will be held at the office of Locke Lord LLP, 525 Okeechobee Blvd, Suite 1600, West Palm Beach, FL 33401, at 9:00 A.M. New York time on June 11, 2015, or such other date, time or place as may be agreed upon by the parties hereto. The hour and date of such closing are herein called the "Closing Date". The Bonds will be delivered in New York, New York in registered form in the name of a nominee of The Depository Trust Company, and will be made available to the Underwriter for inspection at such place as may be agreed upon by the Issuer, the Company and the Underwriter.

The Issuer acknowledges and agrees that: (i) the primary role of the Underwriter, as underwriter, is to purchase securities, for resale to investors, in an arm's length commercial transaction among the Issuer, the Company and the Underwriter and that the Underwriter has financial and other interests that differ from those of the Issuer; (ii) the Underwriter is acting solely as principal and is not acting as a municipal advisor, financial advisor or fiduciary to the Issuer and has not assumed any advisory or fiduciary responsibility to the Issuer with respect to the transaction contemplated hereby and the discussions, undertakings and procedures leading thereto (irrespective of whether the Underwriter has provided other services or are currently providing other services to the Issuer on other matters); (iii) the only obligations the Underwriter has to the Issuer with respect to the transaction contemplated hereby expressly are set forth in this Agreement and, with respect to its role as remarketing agent, in the Indenture and the

Remarketing Agreement, dated June 11, 2015, between the Company and the Underwriter; and (iv) the Issuer has consulted its own financial and/or municipal, legal, accounting, tax and other advisors, as applicable, to the extent it has deemed appropriate.

3. Representations of the Issuer. The Issuer represents and warrants to the Underwriter that:

(a) The Issuer has approved the delivery of an Official Statement, dated June 3, 2015, for use in connection with the sale and distribution of the Bonds. Appendix A to such Official Statement describes certain matters relating to the Company and is sometimes herein separately referred to as "Appendix A." Such Official Statement, as amended and supplemented, including in each case Appendix A and all documents incorporated by reference therein, Appendix B, Appendix C and Appendix D, is herein referred to as the "Official Statement", and all references herein to matters described, contained or set forth in the Official Statement shall, unless specifically stated otherwise, include Appendix A and all documents incorporated by reference therein, Appendix B, Appendix C and Appendix D. For the purposes of this Agreement, all documents filed by the Company pursuant to Section 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), after the date of the Official Statement and incorporated by reference in the Official Statement shall be deemed to be a supplement to the Official Statement. The information with respect to the Issuer contained in the Official Statement under the heading "Disclosure Required By Florida Blue Sky Regulations" does not contain an untrue statement of a material fact or omit to state a material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading. The Issuer assumes no responsibilities for the accuracy, sufficiency or fairness of any statements in the Official Statement or any supplements thereto other than statements and information therein relating to the Issuer under the captions "Introductory Statement" and "Disclosure Required By Florida Blue Sky Regulations".

(b) The Issuer will not at any time authorize an amendment or supplement (including an amendment or supplement resulting from the filing of a document incorporated by reference) to the Official Statement without prior notice to the Company, the Underwriter, and Ballard Spahr LLP, counsel for the Underwriter, or any such amendment or supplement to which the Company or the Underwriter shall reasonably object in writing, or which shall be unsatisfactory to Ballard Spahr LLP. At the date hereof, the information with respect to the Issuer in the Official Statement is true and correct.

(c) The Issuer is a validly existing political subdivision of the State of Florida with full legal right, power and authority under the laws of the State of Florida, including particularly Part II of Chapter 159, Florida Statutes, as amended, to consummate the transactions involving the Issuer contemplated herein and in the Official Statement and to fulfill the terms hereof on the part of the Issuer to be fulfilled.

(d) The consummation of the transactions contemplated herein and in the Official Statement and the fulfillment of the terms hereof on the part of the Issuer to be fulfilled, have been duly authorized by all necessary action of the Issuer in accordance with the laws of the State of Florida.

(e) The execution and delivery by the Issuer of the Loan Agreement and the Indenture, the pledge and assignment by the Issuer to the Trustee of certain of its rights under the Loan Agreement, the consummation by the Issuer on its part of the transactions contemplated herein and in the Official Statement and the fulfillment of the terms hereof by the Issuer and the compliance by the Issuer with all the terms and provisions of the Indenture and the Loan Agreement will not conflict with, or constitute a breach of or default under, any constitutional provision, statute or ordinance, any indenture, mortgage, deed of trust, resolution or other agreement or instrument to which the Issuer is now a party or by which it is now bound, or, to the knowledge of the Issuer, any order, rule or regulation applicable to the Issuer of any court or governmental agency or body having jurisdiction over the Issuer or any of its activities or properties.

(f) Except as disclosed in or contemplated by the Official Statement, as it may be amended or supplemented, there is no action, suit, proceeding, inquiry or investigation, at law or in equity, or before or by any court, public board or body to which the Issuer is a party, pending or, to the knowledge of the Issuer, threatened against the Issuer, (i) to restrain or enjoin the issuance or sale of the Bonds or the performance by the Issuer of the Loan Agreement or the Indenture including without limitation assignment to the Trustee of the Issuer's right to receive Loan Repayments (as defined in the Loan Agreement) and certain other rights under the Loan Agreement as security for the Bonds, or (ii) wherein an unfavorable decision, ruling or finding would (A) have a material adverse effect on the transactions contemplated herein or in the Official Statement or (B) adversely affect or put in question the validity or enforceability of the Bonds, the Indenture, the Loan Agreement, this Agreement, the Letter of Representation, dated the date hereof, in the form attached hereto as Exhibit F (the "Letter of Representation") from the Company to the Issuer and the Underwriter or any other agreement, instrument or document to which the Issuer is a party or by which it is bound relating to the consummation of the transactions contemplated herein or in the Official Statement.

4. Underwriter's Representation. The Underwriter intends to make a public offering of the Bonds for sale upon the terms set forth in the Official Statement.

5. Covenants of the Issuer. The Issuer agrees that:

(a) As soon as practicable following execution hereof (but in no event later than the earlier of two business days after the date hereof and the day prior to the Closing Date), in order that the Underwriter may comply with paragraph (b)(3) of Rule 15c2-12 ("Rule 15c2-12") promulgated by the Securities and Exchange Commission (the "SEC") under the Exchange Act, the Issuer shall direct the Company to deliver to the Underwriter the final Official Statement, in such quantities as the Underwriter may reasonably request. Upon the issuance thereof, the Issuer will direct the Company to deliver to the Underwriter copies of all amendments and supplements to the Official Statement (other than documents incorporated by reference therein).

(b) It will cooperate with the Company and the Underwriter in connection with the preparation of the Official Statement and any amendment or supplement thereto which the Company may be required to furnish the Underwriter pursuant to the Letter of Representation.

(c) It will furnish such proper information as may be lawfully required and otherwise cooperate in qualifying the Bonds for offer and sale under the blue sky laws of such jurisdictions as the Underwriter may designate, provided that the Issuer shall not be required to qualify as a dealer in securities, or to file any consents to service of process, under the laws of any jurisdiction, or to meet other requirements deemed by the Issuer to be unduly burdensome.

(d) It will not take or omit to take any action the taking or omission of which would cause the proceeds from the sale of the Bonds to be applied in a manner contrary to that provided for in the Indenture and the Loan Agreement, as each may be amended from time to time.

(e) At the request of the Underwriter or the Company, it will take such action as is necessary and within its power and at the sole expense of the Company to assure or maintain the status of the interest on the Bonds as excluded from gross income for purposes of the Internal Revenue Code of 1986, as amended (the "Code"), and the regulations thereunder.

The foregoing covenants are conditioned upon the Company's compliance with Section 2 of the Letter of Representation.

6. Conditions of Underwriter's Obligation. The obligation of the Underwriter to purchase and pay for the Bonds shall be subject to the accuracy of, and compliance with, the representations and warranties of the Issuer and the Company contained herein and in the Letter of Representation, respectively, to the performance by the Issuer and the Company of their obligations to be performed hereunder and under the Letter of Representation, respectively, at and prior to the Closing Date and to the following conditions:

(a) At the Closing Date, the Indenture, the Loan Agreement, Continuing Disclosure Undertaking between the Company and the Trustee to be dated as of the Closing Date (the "CDU") and the Letter of Representation shall be in full force and effect, and if executed subsequent to the execution hereof and prior to the Closing Date, shall not have been amended, modified or supplemented except as may have been agreed to in writing by the Underwriter; provided, however, that the acceptance of delivery of the Bonds by the Underwriter on the Closing Date shall be deemed to constitute such approval; and the Underwriter shall have received an executed counterpart or certified copy of the Indenture, the CDU and the Loan Agreement.

(b) At the Closing Date, the Bonds shall have been duly authorized, executed and authenticated in accordance with the provisions of the Indenture.

(c) At the Closing Date, no order, decree or injunction of any court of competent jurisdiction shall have been issued, or proceedings therefor shall have been commenced, nor shall any order, ruling, regulation or official statement by any governmental official, body or board, have been issued, nor shall any legislation have been enacted, with the purpose or effect of prohibiting or limiting the issuance, offering or sale of the Bonds as contemplated herein or in the Official Statement or the performance of the Indenture or the Loan Agreement, in accordance with their respective terms.

(d) At the Closing Date, there shall be in full force and effect an authorization of the Florida Public Service Commission with respect to the participation of the Company in the

transactions contemplated herein and in the Official Statement, and containing no provision unacceptable to the Underwriter by reason of the fact that it is materially adverse to the Company, it being understood that no authorization in effect at the time of the execution hereof by the Underwriter contains any such unacceptable provision.

(e) At the Closing Date, the Underwriter shall have received opinions, dated the Closing Date, of the Office of the County Attorney for Broward County, Florida substantially in the form of Exhibit A hereto, Locke Lord LLP, as Bond Counsel substantially in the forms of Appendix B to the Official Statement and Exhibit B hereto, Liebler, Gonzalez & Portuondo, substantially in the form of Exhibit C hereto and Morgan, Lewis & Bockius LLP, as counsel to the Company, substantially in forms of Exhibits D-1 and D-2 hereto, and Ballard Spahr LLP, as counsel for the Underwriter, substantially in the form of Exhibit E hereto, respectively, but with such changes as the Underwriter shall approve.

(f) At the Closing Date, the Underwriter shall have received from Deloitte & Touche LLP an "agreed-upon procedures letter", in form and substance satisfactory to the Underwriter, setting forth the procedures undertaken with respect to the review of the audited financial statements of the Company appearing in the Official Statement and providing certain conclusions regarding the information with respect to which such review procedures were applied.

(g) At the Closing Date, the Underwriter shall have received from the Issuer a certificate of its Mayor or Vice Mayor of County Commissioners, dated the Closing Date, stating in effect that each of the representations and warranties of the Issuer set forth herein is true, accurate and complete in all material respects at and as of the Closing Date and that each of the obligations of the Issuer hereunder to be performed by it at or prior to the Closing Date has been performed.

(h) At the Closing Date, the Underwriter shall have received a certified copy of the Resolution of the Issuer authorizing the issuance and sale of the Bonds.

(i) Since the date of the Official Statement, as it may be amended or supplemented (including amendments or supplements resulting from the filing of documents incorporated by reference therein), and up to the Closing Date, there shall have been no material adverse change in the business, properties or financial condition of the Company and its subsidiaries taken as a whole, except as reflected in or contemplated by the Official Statement, as it may be so amended or supplemented, and, since such date and up to the Closing Date, there shall have been no transaction entered into by the Company or any of its subsidiaries that is material to the Company and its subsidiaries taken as a whole, other than transactions reflected in or contemplated by the Official Statement, as it may be so amended or supplemented, and transactions in the ordinary course of business.

(j) At the Closing Date, the Underwriter shall have received from the Company a certificate, dated the Closing Date, signed by the President or any Vice President or the Treasurer or any Assistant Treasurer of the Company to the effect of paragraph (i) above and stating in effect that the representations and warranties of the Company set forth in the Letter of Representation are true, accurate and complete in all material respects at and as of the Closing

Date and that each of the obligations of the Company under the Letter of Representation to be performed at or prior to the Closing Date has been performed.

(k) At the Closing Date, the Underwriter shall have received from the Company evidence satisfactory to the Underwriter to the effect that Moody's Investors Service, Inc., Standard and Poor's Rating Services, a Division of The McGraw Hill Companies, Inc. and Fitch Ratings Inc. have or will provide a short term rating of "P-1", "A-2" and "F1", respectively, with respect to the Bonds.

In case any of the conditions specified above in this Section 6 shall not have been fulfilled, this Agreement may be terminated by the Underwriter upon mailing or delivering written notice thereof to the Issuer and the Company. Any such termination shall be without liability of any party to any other party except as otherwise provided in Section 3 of the Letter of Representation.

7. Termination.

(a) This Agreement may be terminated by the Underwriter by delivering written notice thereof to the Issuer and the Company, at or prior to the Closing Date, if:

(i) after the date hereof and at or prior to the Closing Date there shall have occurred any general suspension of trading in securities on the New York Stock Exchange or there shall have been established by the New York Stock Exchange or by the SEC or by any federal or state agency or by the decision of any court any limitation on prices for such trading or any restrictions on the distribution of securities, or a general banking moratorium declared by New York or federal authorities, the effect of which on the financial markets of the United States shall be such as to make it impracticable for the Underwriter to enforce contracts for the sale of the Bonds;

(ii) there shall have occurred any new outbreak of hostilities including, but not limited to, an escalation of hostilities which existed prior to the date of this Agreement or other national or international calamity or crisis, the effect of which on the financial markets of the United States shall be such as to make it impracticable for the Underwriter to enforce contracts for the sale of the Bonds;

(iii) after the date hereof and at or prior to the Closing Date, legislation shall be enacted by the Congress or adopted by either House thereof or a decision shall be rendered by a federal court, including the Tax Court of the United States, or a ruling, regulation or order by or on behalf of the Treasury Department of the United States, the Internal Revenue Service or other governmental agency shall be issued or proposed with respect to the imposition of federal income taxation upon receipts, revenues or other income of the same kind and character expected to be derived by the Issuer, including, without limitation, loan repayments and other amounts under the Loan Agreement, or upon interest received on bonds of the same kind and character as the Bonds, with the result in any such case that it is impracticable, in the reasonable judgment of the Underwriter, for the Underwriter to enforce contracts for the sale of the Bonds;

(iv) the subject matter of any amendment or supplement to the Official Statement prepared and furnished by the Issuer or the Company renders it, in the reasonable

judgment of the Underwriter, either inadvisable to proceed with the offering or inadvisable to proceed with the delivery of the Bonds to be purchased hereunder;

(v) a stop order, release, regulation or no-action letter by or on behalf of SEC or any other governmental agency having jurisdiction of the subject matter shall have been issued or made to the effect that the issuance, offering or sale of the Bonds, including all the underlying obligations as contemplated hereby or by the Official Statement, or any document relating to the issuance, offering or sale of the Bonds is or would be in violation of any provision of the federal securities laws at the Closing Date, including, but not limited to, the Securities Act and the Trust Indenture Act of 1939, as amended; or

(vi) there shall have occurred a material adverse change in the financial markets of the United States, the effect of which shall make it impracticable for the Underwriter to enforce contracts for the sale of the Bonds.

(b) This Agreement shall terminate upon the termination of the Letter of Representation as provided in Section 4 thereof.

(c) Any termination of this Agreement pursuant to this Section 7 shall be without liability of any party to any other party except as otherwise provided in Section 3 of the Letter of Representation or the Memorandum of Agreement dated April 28, 2015 between the County and the Company and the related letter dated May 20, 2015 from the Treasurer of the Company to the Board of County Commissioners.

8. Truth-In-Bonding Statement. The Issuer is proposing to issue $85,000,000 principal amount of Bonds for the purpose of acquisition, construction and equipping of certain wastewater facilities and solid waste facilities of the Company, including functionally related and subordinate facilities, at its plant sites located in Broward County, more fully described in the Indenture. The Bonds are expected to be repaid over a period of 30 years. The Bonds will initially bear interest at a variable rate. At a forecasted average interest rate of 2.40%, total interest paid over the life of the Bonds will be $61,144,108.79.

The source of repayment or security for this proposal is the payments by the Company under a Loan Agreement securing the Bonds. Authorizing the Bonds will result in zero moneys of the County not being available to finance other services of the County each year for 30 years. An itemized list setting forth the nature and estimated amounts of expenses to be incurred by the Underwriter in connection with the issuance of the Bonds is set forth on Schedule II attached hereto.

9. Miscellaneous. The validity and interpretation of this Agreement shall be governed by the law of the State of Florida. This Agreement shall inure to the benefit of the Issuer, the Underwriter and the Company, and their respective successors. Nothing in this Agreement is intended or shall be construed to give to any other person, firm or corporation any legal or equitable right, remedy or claim under or in respect of this Agreement or any provision herein contained. The term "successors" as used in this Agreement shall not include any purchaser, as such purchaser, of any Bonds from or through the Underwriter. This Agreement may be executed by any one or more of the parties hereto in any number of counterparts, each of which

shall be deemed to be an original, but all such counterparts shall together constitute one and the same instrument.

The representations and warranties of the Issuer contained in Section 3 hereof shall remain operative and in full force and effect, regardless of any investigation made by or on behalf of the Underwriter, and shall survive the delivery of the Bonds.

10. Notices and other Actions. All notices, demands and formal actions hereunder will be in writing mailed, telecopied or delivered to:

(the "Underwriter" named in the
Underwriting Agreement dated
June __, 2015 (the "Agreement")
relating to the Bonds referred to below)

Ladies and Gentlemen:

I am County Attorney for Broward County, Florida, (the "Issuer") and as such have acted as Issuer's counsel in connection with the issuance and sale of $85,000,000 aggregate principal amount of the Issuer's Industrial Development Revenue Bonds (Florida Power & Light Company Project), Series 2015 (the "Bonds"). The Bonds are being issued pursuant to a resolution adopted by the Issuer on June 2, 2015 (the "Resolution") to finance a portion of the cost of acquisition, construction and equipping of certain wastewater facilities and solid waste facilities located at the Port Everglades Energy Center and the Lauderdale Power Plant (the "Project") of Florida Power & Light Company (the "Company"), all as more particularly described in the Trust Indenture, dated as of June 1, 2015 (the "Indenture"), between the Issuer and The Bank of New York Mellon Trust Company, N.A., as trustee (the "Trustee"). The issuance of the Bonds and the Projects were approved by the Issuer in the Resolution.

Based upon such review as I deemed necessary, I am of the opinion that:

(1) The Issuer is a validly existing political subdivision of the State of Florida with full legal right, power and authority under the laws of the State of Florida, including particularly Part II of Chapter 159, Florida Statutes, as amended, to execute and perform its obligations under the Loan Agreement, dated as of June 1, 2015 between the Company and the Issuer (the "Loan Agreement"), the Agreement, the Indenture and the Bonds.

(2) The Resolution is a valid resolution of the Issuer, duly adopted by the Issuer at a meeting duly noticed, called and held in accordance with the Constitution and laws of the State of Florida.

(3) The acceptance by the Issuer of the Letter of Representation dated June __, 2015 from the Company (the "Letter of Representation") has been duly authorized, and said Letter of Representation has been validly accepted by the Issuer.

(4) No approval, consent or authorization of any Florida governmental authority or public agency not already obtained is required in connection with the consummation by the Issuer of the transactions contemplated by the Official Statement or by the Agreement or the performance of the Issuer's obligations under the Loan Agreement, the Indenture or the Agreement, other than any approval, consent or authorization required by Florida's securities or blue sky laws, as to which I express no opinion.

(5) The Issuer has duly approved the use and distribution of the Official Statement, dated June 3, 2015 (the "Official Statement") at the meeting wherein the Resolution was adopted and has duly authorized with such changes therein as shall be approved by the Company in order to reflect the final terms and details of each Series of the Bonds.

(6) To the best of my knowledge, neither the making or the performance by the Issuer of the Loan Agreement, the Indenture or the Agreement, nor the acceptance by the Issuer of the Letter of Representation, violates or conflicts with any provision of the Broward County Code of Ordinances or Charter, or any resolution, agreement or instrument to which the Issuer is a party or by which it is bound, or, to my knowledge, any order, rule or regulation applicable to the Issuer of any court or governmental agency or body having jurisdiction over the Issuer or any of its activities or properties.

(7) Except as disclosed in or contemplated by the Official Statement, I have not been made aware of any action, suit, proceeding or investigation at law or in equity or before or by any court, public board or body, to which the Issuer is a party which is pending or, threatened against or affecting the Issuer wherein an unfavorable decision, finding or ruling would adversely affect (i) the transactions contemplated by the Indenture, the Loan Agreement, the Official Statement or by the Agreement, (ii) the validity or enforceability of the Bonds, the Indenture or the Loan Agreement, or (iii) the exclusion from gross income for federal income tax purposes of interest on the Bonds.

Very truly yours,

EXHIBIT B

June 11, 2015

Morgan Stanley & Co. LLC
1585 Broadway, 16th Floor
New York, NY 10036

The Bank of New York Mellon Trust Company, N.A.

Ladies and Gentlemen:

Concurrently herewith, we have delivered our approving opinion as bond counsel (the "Approving Opinion"), relating to $85,000,000 aggregate principal amount of Broward County, Florida Industrial Development Revenue Bonds (Florida Power & Light Company Project), Series 2015 initially dated June 11, 2015 (the "Bonds"), and examined a record of proceedings relating thereto. Capitalized words used in this opinion shall have the same meanings as are given such capitalized words in the Official Statement related to the Bonds dated June 3, 2015.

The opinions herein are supplemental to and are subject to all qualifications and limitations contained in our Approving Opinion, except that we also opine with respect to the federal securities laws of the United States of America. Although the Approving Opinion was addressed only to the Issuer, Morgan Stanley & Co. LLC and The Bank of New York Mellon Trust Company, N.A. are authorized to rely upon the Approving Opinion to the same extent as if it were addressed to them. Subject to the foregoing, we are of the opinion that:

(1) In connection with the offering and sale of the Bonds to the public, neither the Bonds nor any securities evidenced thereby are required to be registered under the 1933 Act and neither the Indenture nor any other instrument is required to be qualified under the 1939 Act.

(2) The statements in the Official Statement relating to the Bonds, the Indenture and the Agreement under the captions "The Series 2015 Bonds" (except for certain information and statements provided by The Depository Trust Company under "The Series 2015 Bonds -- Book-Entry System", as to which, with your permission, we express no opinion), "The Agreement" and "The Indenture", insofar as they describe the provisions of the Bonds, the Agreement and the Indenture, are fair and accurate statements or summaries of the matters set forth therein. The statements pertaining to the Bonds in the Official Statement under the caption "Tax Matters" fairly and accurately present the information purported to be shown.

This letter is furnished by us solely for your benefit in connection with the original issuance and delivery of the Bonds and may not, without our express written consent, be relied upon by any other person.

Respectfully yours,

Morgan Stanley & Co. LLC
1585 Broadway
New York, New York 10036
(the "Underwriter" named in the
Underwriting Agreement dated
June __, 2015 (the "Agreement")
relating to the Bonds referred to below)

Ladies and Gentlemen:

With reference to the issuance by Broward County, Florida (the "Issuer") and sale to the Underwriter named in the Agreement of $85,000,000 aggregate principal amount of the Issuer's Industrial Development Revenue Bonds (Florida Power & Light Company Project), Series 2015 (the "Bonds"), issued under the Trust Indenture, dated as of June 1, 2015 (the "Indenture"), by and between the Issuer and The Bank of New York Mellon Trust Company, N.A., as trustee (the "Trustee"), we advise you that, as counsel for Florida Power & Light Company (the "Company"), we have reviewed (a) the Indenture; (b) the Loan Agreement, dated as of June 1, 2015 (the "Loan Agreement"), by and between the Company and the Issuer; (c) the Letter of Representation, dated June __, 2015 (the "Letter of Representation"), from the Company to the Issuer and the Underwriter; (d) the Remarketing Agreement, dated June __, 2015 (the "Remarketing Agreement"), by and between the Company and Morgan Stanley & Co. LLC, as remarketing agent ("Remarketing Agent"); (e) the Continuing Disclosure Undertaking, dated June __, 2015 (the "Continuing Disclosure Undertaking"), by and between the Company and the Trustee; (f) the Tender Agreement, dated June __, 2015 (the "Tender Agreement"), among The Bank of New York Mellon Trust Company, N.A., as Trustee, tender agent and registrar, the Company and the Remarketing Agent; (g) the Official Statement, dated June __, 2015, including Appendix A and all documents incorporated by reference therein (the "Official Statement"); (h) the Company's Restated Articles of Incorporation, as amended to the date hereof (the "Charter"), and (i) the Company's Amended and Restated Bylaws, as amended to the date hereof (the "Bylaws"). We have also reviewed the order issued by the Florida Public Service Commission ("FPSC") authorizing, among other things, the issuance and sale of debt securities in 2015. We are providing this letter pursuant to Section 6(e) of the Agreement.

For purposes of rendering the opinions contained in this opinion letter, we have not reviewed any documents other than the documents listed above. We have also not reviewed any documents that may be referred to in or incorporated by reference into any of the documents listed above.

This opinion letter has been prepared and is to be construed in accordance with the "Report on Third-Party Legal Opinion Customary Practice in Florida, dated December 3, 2011" (the "Report"). The Report is incorporated by reference into this opinion letter. We have assumed the genuineness of all signatures, the legal capacity of natural persons, the authenticity of the documents submitted to us as originals, the conformity to the original documents of all documents submitted to us as certified, facsimile or photostatic copies, and the authenticity of the originals of all documents submitted to us as copies. We have also assumed the legal existence, power and authority of the Issuer and that the Loan Agreement constitutes a valid and binding obligation of the Issuer. In rendering the opinions set forth herein, we have relied, without investigation, on each of the assumptions implicitly included in all opinions of Florida counsel that are set forth in the Report in "Common Elements of Opinions – Assumptions".

As to any facts that are material to the opinions hereinafter expressed, we have relied without investigation upon the representations of the Company contained in the Letter of Representation and upon certificates of officers of the Company.

Based on the foregoing, and subject to the qualifications and limitations set forth herein, it is our opinion that:

1. The Company is a validly existing corporation and is in good standing under the laws of the State of Florida.

2. The Loan Agreement has been duly and validly authorized by all necessary corporate action, has been duly and validly executed and delivered, and is a valid and binding agreement of the Company enforceable in accordance with its terms, subject to the effect of bankruptcy, insolvency, reorganization, fraudulent conveyance, receivership, moratorium and other laws affecting the rights and remedies of creditors generally and of general principles of equity and the effect of applicable public policy on the enforceability of provisions relating to indemnification contained in Section 7.3 therein.

3. The Loan Agreement is being executed and delivered pursuant to the authority contained in an order of the FPSC, which authority is adequate to permit such action. To our knowledge, said authorization is still in full force and effect, and no further approval, authorization, consent or order of any other Florida public board or body is legally required for the performance of the Company's obligations under the Loan Agreement or in connection with any other agreement of the Company entered into in connection therewith.

4. The Letter of Representation has been duly and validly authorized by all necessary corporate action and has been duly and validly executed and delivered.

5. The Remarketing Agreement has been duly and validly authorized by all necessary corporate action, has been duly and validly executed and delivered.

6. The Continuing Disclosure Undertaking has been duly and validly authorized by all necessary corporate action, has been duly and validly executed and delivered.

7. The Tender Agreement has been duly and validly authorized by all necessary corporate action, has been duly and validly executed and delivered, and is a valid and binding

agreement of the Company enforceable in accordance with its terms, subject to the effect of bankruptcy, insolvency, reorganization, fraudulent conveyance, receivership, moratorium and other laws affecting the rights and remedies of creditors generally and of general principles of equity.

8. The consummation by the Company of the transactions contemplated in the Letter of Representation, and the fulfillment by the Company of the terms of the Loan Agreement and the Letter of Representation, will not result in a breach of any of the terms or provisions of the Charter or the Bylaws.

This letter is limited to the laws of the State of Florida insofar as they bear on matters covered hereby. In our examination of laws, rules and regulations for purposes of this letter, our review was limited to those laws, rules and regulations that a Florida counsel exercising customary professional diligence would reasonably be expected to recognize as being applicable to transactions of the type contemplated by the Loan Agreement. The laws, rules and regulations that are defined as the Excluded Laws in the "Common Elements of Opinions-Limitations to Laws of Specific Jurisdictions or to Substantive Areas of Law; Excluded Areas of Law" section of the Report are expressly excluded from the scope of this opinion letter.

This letter is rendered to you in connection with the above described transaction. This letter may not be relied upon by you for any other purpose, or relied upon or furnished to any other person, firm or corporation without our prior written permission. This letter is expressed as of the date hereof, and we do not assume any obligation to update or supplement it to reflect any fact or circumstance that hereafter comes to our attention, or any change in law that hereafter occurs.

Respectfully submitted,

LIEBLER, GONZALEZ & PORTUONDO

Fort Lauderdale, Florida

Morgan Stanley & Co. LLC
1585 Broadway
New York, New York 10036
(the "Underwriter" named in the
Underwriting Agreement dated
June __, 2015 (the "Agreement")
relating to the Bonds referred to below)

Ladies and Gentlemen:

With reference to the issuance by Broward County, Florida (the "Issuer") and sale to the Underwriter named in the Agreement of $85,000,000 aggregate principal amount of the Issuer's Industrial Development Revenue Bonds (Florida Power & Light Company Project), Series 2015 (the "Bonds"), issued under the Trust Indenture, dated as of June 1, 2015 (the "Indenture"), by and between the Issuer and The Bank of New York Mellon Trust Company, N.A., as trustee (the "Trustee"), we advise you that, as counsel for Florida Power & Light Company (the "Company"), we have reviewed (a) the Indenture; (b) the Loan Agreement, dated as of June 1, 2015 (the "Loan Agreement"), by and between the Company and the Issuer; (c) the Letter of Representation, dated June __, 2015 (the "Letter of Representation"), from the Company to the Issuer and the Underwriter; (d) the Remarketing Agreement, dated June __, 2015 (the "Remarketing Agreement"), by and between the Company and Morgan Stanley & Co. LLC; (e) the Continuing Disclosure Undertaking, dated June __, 2015 (the "Continuing Disclosure Undertaking"), by and between the Company and the Trustee; and (f) the Official Statement, dated June 3, 2015, including Appendix A and all documents incorporated by reference therein (the "Official Statement"). We are providing this letter pursuant to Section 6(e) of the Agreement.

We have assumed the genuineness of all signatures, the legal capacity of natural persons, the authenticity of the documents submitted to us as originals, the conformity to the original documents of all documents submitted to us as certified, facsimile or photostatic copies, and the authenticity of the originals of all documents submitted to us as copies. We have also assumed that the Letter of Representation constitutes a valid and binding obligation of each party thereto other than the Company.

As to any facts that are material to the opinions hereinafter expressed, we have relied without investigation upon the representations of the Company contained in the Letter of Representation and upon certificates of officers of the Company.

Based on the foregoing, and subject to the qualifications and limitations set forth herein, it is our opinion that:

1. The statements made in the Official Statement under the captions "The Series 2015 Bonds", "The Agreement", "The Indenture", and "Continuing Disclosure", insofar as they purport to constitute summaries of the terms of the documents referred to therein, fairly summarize in all material respects such documents, except that we do not express any opinion or belief as to the information contained in the Official Statement under the caption "The Series 2015 Bonds—Book-Entry System".

2. Assuming that the Letter of Representation has been duly and validly authorized by all necessary corporate action and has been duly and validly executed and delivered, the Letter of Representation is a valid and binding agreement of the Company enforceable in accordance with its terms, subject to the effect of bankruptcy, insolvency, reorganization, fraudulent conveyance, receivership, moratorium and other laws affecting the rights and remedies of creditors generally and of general principles of equity and the effect of applicable public policy on the enforceability of provisions relating to indemnification provision contained in Section 7.3 therein.

3. Assuming that the Remarketing Agreement has been duly and validly authorized by all necessary corporate action and has been duly and validly executed and delivered, the Remarketing Agreement is a valid and binding agreement of the Company enforceable in accordance with its terms, subject to the effect of bankruptcy, insolvency, reorganization, fraudulent conveyance, receivership, moratorium and other laws affecting the rights and remedies of creditors generally and of general principles of equity and the effect of applicable public policy on the enforceability of provisions relating to indemnification contained in Section 3 therein.

4. Assuming that the Continuing Disclosure Undertaking has been duly and validly authorized by all necessary corporate action and has been duly and validly executed and delivered, the Continuing Disclosure Undertaking is a valid and binding agreement of the Company enforceable in accordance with its terms, subject to the effect of bankruptcy, insolvency, reorganization, fraudulent conveyance, receivership, moratorium and other laws affecting the rights and remedies of creditors generally and of general principles of equity.

5. The consummation by the Company of the transactions contemplated in the Letter of Representation, and the fulfillment by the Company of the terms of the Loan Agreement and the Letter of Representation, will not result in a breach of any of the terms or provisions of, or constitute a default under, any agreement or instrument filed as an exhibit to any of the Company's reports heretofore filed with the Securities and Exchange Commission pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, that is incorporated by reference into the Official Statement to which the Company is now a party, except where such breach or default would not have a material adverse effect on the business, properties or financial condition of the Company and its subsidiaries, taken as a whole.

As counsel to the Company, we express no opinion concerning the validity of the Bonds or the status of the interest thereon under federal income tax laws. We have assumed that the Bonds have been validly issued and that the interest thereon is not included, with certain exceptions, in the gross income of the owners thereof for purposes of federal income taxation. Locke Lord LLP, Bond Counsel, has rendered opinions, of even date herewith, to that effect. On the basis of such assumptions and such opinions, it is our opinion that, in connection with the offer and sale of the Bonds as contemplated in the Official Statement, it is not necessary to register any security under the Securities Act of 1933, as amended, or to qualify any indenture under the Trust Indenture Act of 1939, as amended.

This letter is limited to the laws of the State of New York and the federal laws of the United States insofar as they bear on matters covered hereby. In our examination of laws, rules and regulations for purposes of this letter, our review was limited to those laws, rules and regulations that, in our experience, are generally known to be applicable to transactions of the type contemplated by the Agreement.

This letter is rendered to you in connection with the above-described transaction. This letter may not be relied upon by you for any other purpose, or relied upon or furnished to any other person, firm or corporation without our prior written permission. This letter is expressed as of the date hereof, and we do not assume any obligation to update or supplement it to reflect any fact or circumstance that hereafter comes to our attention, or any change in law that hereafter occurs.

Very truly yours,

New York, New York 10036
(the "Underwriter" named in the
Underwriting Agreement dated
June __, 2015 (the "Agreement")
relating to the Bonds referred to below)

Ladies and Gentlemen:

With reference to the issuance by Broward County, Florida (the "Issuer") and sale to the Underwriter named in the Agreement of $85,000,000 aggregate principal amount of the Issuer's Industrial Development Revenue Bonds (Florida Power & Light Company Project), Series 2015 (the "Bonds"), issued under the Trust Indenture, dated as of June 1, 2015 (the "Indenture"), by and between the Issuer and The Bank of New York Mellon Trust Company, N.A., as trustee (the "Trustee"), we advise you that, as counsel for Florida Power & Light Company (the "Company"), we have reviewed (a) the Indenture; (b) the Loan Agreement, dated as of June 1, 2015, by and between the Company and the Issuer; (c) the Letter of Representation, dated June __, 2015, from the Company to the Issuer and the Underwriter; (d) the Remarketing Agreement, dated June __, 2015, by and between the Company and Morgan Stanley & Co. LLC; (e) the Continuing Disclosure Undertaking, dated June __, 2015, by and between the Company and the Trustee; and (f) the Official Statement, dated June 3, 2015, including Appendix A and all documents incorporated by reference therein (the "Official Statement"). We are providing this letter pursuant to Section 6(e) of the Agreement.

We refer you to the Official Statement. As counsel to the Company, we reviewed the Official Statement and participated in discussions with your representatives and certain officers and employees of the Company, certain of its other legal counsel, its independent registered public accounting firm, Bond Counsel and your counsel regarding such documents and information and related matters.

The purpose of our professional engagement was not to establish or confirm factual matters set forth in the Official Statement and we have not undertaken any obligation to verify independently any of such factual matters. Moreover, many of the determinations required to be made in the preparation of the Official Statement involve matters of a non-legal nature.

Subject to the foregoing, we confirm to you, on the basis of the information we gained in the course of performing the services referred to above, that each of the documents incorporated by reference in the Official Statement (except as to the financial statements, schedules and other financial, statistical and accounting data, including any such data presented in interactive data

format, and assessments or reports on the effectiveness of internal control over financial reporting, as to which we make no comment), at the time such document was filed with the Securities and Exchange Commission, appeared on its face to be appropriately responsive in all material respects to the applicable requirements of the Securities Exchange Act of 1934, as amended. Furthermore, subject to the foregoing, nothing came to our attention that caused us to believe that the Official Statement, as of its date, and as of the date hereof, contained or contains any untrue statement of a material fact or omitted or omits to state any material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading; provided, however, that (a) we are not passing upon and do not assume any responsibility for the accuracy or completeness of, or otherwise verified, the statements contained in the Official Statement (except as and to the extent set forth in paragraph 1 in our letter, dated the date hereof delivered to you pursuant to Section 6(e) of the Agreement), (b) we do not express any belief with respect to the financial statements, schedules, notes, other financial, statistical and accounting information derived therefrom, including any such information presented in interactive data format, and assessments or reports on the effectiveness of internal control over financial reporting, in each case contained in the Official Statement or incorporated by reference, as the case may be, at the respective times as of which the advisements set forth in this paragraph are provided and (c) we do not express any belief with respect to statements made in the Official Statement under the captions "The Issuer", "Tax Matters", or "Disclosure Required by Florida Blue Sky Regulations" or any statements in the Official Statement regarding the exclusion from gross income for federal income tax purposes of interest on the Bonds.

This letter is limited to the laws of the State of New York and the federal laws of the United States insofar as they bear on matters covered hereby.

This letter is rendered to you in connection with the above-described transaction. This letter may not be relied upon by you for any other purpose, or relied upon or furnished to any other person, firm or corporation without our prior written permission. This letter is expressed as of the date hereof, and we do not assume any obligation to update or supplement it to reflect any fact or circumstance that hereafter comes to our attention, or any change in law that hereafter occurs.

Very truly yours,

June __, 2015

Morgan Stanley & Co. LLC, as Underwriter
1585 Broadway
New York, New York 10036

Re: $85,000,000 Broward County, Florida Industrial Development Revenue Bonds (Florida Power & Light Company Project) Series 2015

Ladies and Gentlemen:

We have acted as counsel to Morgan Stanley & Co. LLC (the "Underwriter") in connection with the issuance by Broward County, Florida (the "Issuer") of the above-captioned bonds (the "Series 2015 Bonds"). The Series 2015 Bonds are being issued on the date hereof pursuant to a Trust Indenture dated as of June 1, 2015 (the "Indenture") between the Issuer and Florida Power & Light Company (the "Borrower"). Each term used but not defined herein has the meaning assigned to such term in the Underwriting Agreement dated June 10, 2015 (the "Underwriting Agreement") by and between the Issuer and the Underwriter.

In connection with our engagement, we have examined originals or copies of the documents delivered at the closing on June 11, 2015, as listed in the Closing Index dated as of the closing date, and such laws as we deemed necessary. We have also reviewed, and believe you may reasonably rely upon, the opinions delivered to you today pursuant to the provisions of the Underwriting Agreement by the County Attorney for Broward County, Florida, Locke Lord LLP, as Bond Counsel, and Liebler, Gonzalez & Portuondo and Morgan, Lewis & Bockius LLP, as co-counsel to the Company.

Based upon the foregoing, we are of the opinion that:

(1) The conditions in the Underwriting Agreement relating to your obligation to purchase the Series 2015 Bonds have been satisfied.

(2) No registration need be made with the Securities and Exchange Commission under the Securities Act of 1933, as amended, in connection with the offering and sale of the Series 2015 Bonds, and neither the Indenture nor any other instrument is required to be qualified under the Trust Indenture Act of 1939, as amended, in connection with the offering and sale of the Series 2015 Bonds.

(3) The Continuing Disclosure Undertaking dated June 11, 2015 between the Borrower and The Bank of New York Mellon Trust Company, N.A., as trustee (the "Trustee"), complies as to form with the requirements of Rule 15c2-12 (the "Rule") under the Securities Exchange Act of 1934.

We have participated in the preparation of the Official Statement, dated June 3, 2015 (including the appendices thereto, the "Official Statement") relating to the offering and sale of the Series 2015 Bonds. We have also participated in certain discussions with the officials of the Borrower and others in order to assist the Underwriter in its investigation of the business affairs of the Borrower. In addition to our examination of the Closing Documents, we have participated with the Underwriter by telephone with officials of the Borrower and its counsel on June 3, 2015 to review the present business of the Borrower and its operations and financial condition, and to inquire about the prospective business, operations and financial condition of the Borrower and the accuracy of the factual statements contained in the Official Statement.

Except for the review of documents and the discussions referred to above, we have not made any independent investigation of the Borrower's business affairs or any independent verification of the statements of fact contained in the Official Statement. On the basis of our participation, we do not believe that the Official Statement, as of its date, or as of the date hereof, in each case except for (i) financial projections or other financial or statistical data included or incorporated by reference therein, (ii) the information relating to The Depository Trust Company under the heading "THE SERIES 2015 BONDS — Book-Entry System", and (iii) Appendix C of the Official Statement.

We are furnishing this letter to the Underwriter solely for its benefit. We disclaim any obligation to update this letter. This letter is not to be used, circulated, quoted or otherwise referred to or relied upon for any other purpose or by any other person, provided it may be included in any Closing Index. This letter is not intended to and may not be relied upon by holders of the Bonds or any party who is not the Underwriter.

Very truly yours,

EXHIBIT F

FLORIDA POWER & LIGHT COMPANY

LETTER OF REPRESENTATION

_____, 2015

To: Broward County, Florida
Fort Lauderdale, Florida

Morgan Stanley & Co. LLC
1585 Broadway
New York, New York 10036

(the "Underwriter" named in the
Underwriting Agreement dated
the date hereof (the "Agreement")
relating to the Bonds referred to below)

Ladies and Gentlemen:

In consideration of the issuance and sale by Broward County, Florida (the "Issuer") of $85,000,000 aggregate principal amount of its Industrial Development Revenue Bonds (Florida Power & Light Company Project), Series 2015 (the "Bonds") and the purchase of the Bonds by the Underwriter pursuant to the Agreement, Florida Power & Light Company (the "Company") represents, warrants and covenants to and agrees with the Issuer and the Underwriter, and the Issuer and the Underwriter by their acceptance hereof agree with the Company as follows (all terms not specifically defined in this Letter of Representation shall have the same meanings herein as in the Agreement):

1. Representations and Warranties of the Company. The Company represents and warrants that:

(a) When the Official Statement shall be issued and at the Closing Date, the Official Statement, as it may be amended or supplemented (including amendments or supplements resulting from the filing of documents incorporated by reference therein), will not contain an untrue statement of a material fact or omit to state a material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading; provided, that the foregoing representations and warranties in this subsection (a) shall not apply to statements in or omissions from the Official Statement under the captions "Tax Matters", "Underwriting" (second paragraph only) and "Disclosure Required By Florida Blue Sky Regulations" or in Appendices B, C and D or in the statements on the cover page with respect to the initial public offering price, tax matters or in the statement on the page (i) with respect to stabilization of the market price of the Bonds by the Underwriter.

(b) The documents incorporated by reference in Appendix A to the Official Statement, as amended or supplemented, fully complied, at the time they were filed with the Securities and Exchange Commission (the "Commission"), in all material respects with the applicable provisions of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and the applicable instructions, rules and regulations of the Commission thereunder.

(c) The financial statements contained or incorporated by reference in Appendix A to the Official Statement present fairly the consolidated financial condition and results of operations of the Company and its subsidiaries taken as a whole at the respective dates or for the respective periods to which they apply; and such financial statements have been prepared in each case in accordance with generally accepted accounting principles consistently applied throughout the periods involved except as otherwise indicated in the Official Statement.

(d) Since the most recent dates as of which information is given in the Official Statement, as it may be amended or supplemented (including amendments or supplements resulting from the filing of documents incorporated by reference therein), there has not been any material adverse change in the business, properties or financial condition of the Company, and its subsidiaries taken as a whole, nor has any transaction been entered into by the Company or any of its subsidiaries that is material to FPL and its subsidiaries taken as whole, other than changes and transactions reflected in or contemplated by the Official Statement, as it may be amended or supplemented, and transactions in the ordinary course of business. The Company and its subsidiaries do not have any material contingent obligation which is not reflected in or contemplated by the Official Statement, as it may be amended or supplemented.

(e) The consummation of the transactions contemplated herein and in the Official Statement and the fulfillment of the terms of the Loan Agreement and this Letter of Representation, on the part of the Company to be fulfilled, have been duly authorized by all necessary corporate action of the Company in accordance with the provisions of its Restated Articles of Incorporation, as amended (the "Charter"), its Amended and Restated Bylaws (the "Bylaws") and applicable law, and this Letter of Representation constitutes, and the Loan Agreement and the CDU when executed and delivered by the Company will constitute, legal, valid and binding obligations of the Company in accordance with their terms, except as limited by bankruptcy, insolvency or other laws affecting creditors' rights generally and general equity principles, and subject to any principles of public policy limiting the right to enforce the indemnification provisions contained in Section 6 herein and Section 7.3 of the Loan Agreement.

(f) The consummation of the transactions contemplated herein and in the Official Statement and the fulfillment of the terms of the Loan Agreement, the CDU and this Letter of Representation will not result in a breach of any of the terms or provisions of, or constitute a default under the Charter or Bylaws of the Company or any indenture, mortgage, deed of trust or other agreement or instrument to which the Company is now a party, except where such breach or default would not have a material adverse effect on the business, properties, or financial condition of the Company and its subsidiaries taken as a whole.

(g) The terms and conditions of the Agreement as they relate to the Company and the Company's participation in the transactions contemplated thereby are satisfactory to it.

1A. Acknowledgment of the Company. The Company acknowledges and agrees that: (i) the primary role of the Underwriter, as underwriter, is to purchase securities, for resale to investors, in an arm's length commercial transaction among the Issuer, the Company and the Underwriter and that the Underwriter has financial and other interests that differ from those of the Company; (ii) the Underwriter is acting solely as principal and is not acting as a municipal advisor, financial advisor or fiduciary to the Company and has not assumed any advisory or fiduciary responsibility the Company with respect to the transaction contemplated hereby and the discussions, undertakings and procedures leading thereto (irrespective of whether the Underwriter has provided other services or are currently providing other services to the Company on other matters); (iii) the only obligations the Underwriter has to the Company with respect to the transaction contemplated hereby expressly are set forth in this Agreement and, with respect to its role as remarketing agent, in the Indenture and the Remarketing Agreement, dated June 11, 2015, between the Company and the Underwriter; and (iv) the Company has consulted its own financial and/or municipal, legal, accounting, tax and other advisors, as applicable, to the extent it has deemed appropriate.

2. Covenants of the Company. The Company agrees that:

(a) As soon as practicable following execution hereof (but in no event later than the earlier of two business days after the date hereof and the day prior to the Closing Date), in order that the Underwriter may comply with paragraph (b)(3) of Rule 15c2-12 ("Rule 15c2-12") promulgated by the SEC under the Exchange Act, the Company shall deliver to the Underwriter the final Official Statement, in such quantities as the Underwriter may reasonably request. Upon the issuance thereof, the Company will deliver to the Underwriter copies of all amendments and supplements to the Official Statement.

(b) At its expense, if requested by the Underwriter, it will cause to be prepared and furnished to the Underwriter one copy of each of the documents incorporated by reference in the Official Statement, as it may be amended or supplemented, and as many additional copies of such documents incorporated by reference as shall be requested of the Underwriter by prospective purchasers of the Bonds.

(c) It will furnish such proper information as may be lawfully required and otherwise cooperate in qualifying the Bonds for offer and sale under the blue sky laws of such jurisdictions as the Underwriter may designate, provided that the Company shall not be required to qualify as a foreign corporation or dealer in securities, or to file any consents to service of process, under the laws of any jurisdiction, or to meet other requirements deemed by the Company to be unduly burdensome.

(d) It will not take or omit to take any action the taking or omission of which would cause the proceeds from the sale of the Bonds to be applied in a manner contrary to that provided for in the Indenture and the Loan Agreement, as each may be amended from time to time.

3. Expenses.

(a) Upon the issuance and delivery of the Bonds by the Issuer to the Underwriter, the Company will pay, or cause to be paid, all expenses (including reasonable out-of-pocket

expenses of the Underwriter) and costs incident to the authorization, issuance, printing, sale and delivery, as the case may be, of the underwriting papers, the Bonds, the Official Statement, this Letter of Representation and the blue sky survey, including without limitation (A) any taxes, other than transfer taxes, in connection with the issuance of the Bonds hereunder; (B) any rating agency fees; (C) the fees of the Trustee; (D) the fees and disbursements of Bond Counsel, County Attorney and the Company; (E) the fees of the Issuer; and (F) the fees and disbursements (including filing fees) of Ballard Spahr LLP, counsel for the Underwriter.

(b) If the Agreement is terminated in accordance with the provisions of Sections 6 or 7(b) thereof, the Company will pay all the expenses referred to in subsection (a) of this Section 3, and the reasonable out-of-pocket expenses of the Underwriter, not in excess, however, of an aggregate of $5,000 and the Underwriter will pay the remainder of its expenses.

(c) If the Agreement is terminated in accordance with the provisions of Section 7(a) thereof, the Company will pay all the expenses referred to in subsection (a) of this Section 3 and the Underwriter will pay the remainder of its expenses.

(d) If the Underwriter shall fail or refuse, otherwise than for some reason sufficient to justify, in accordance with the terms of the Agreement, the cancellation or termination of its obligation thereunder, to purchase and pay for the Bonds as provided in Section 2 thereof, the Underwriter will pay all the expenses referred to in subsection (a) of this Section 3.

(e) The Issuer shall not in any event be liable to the Underwriter or the Company for any expenses or costs incident to the issuance and sale of the Bonds nor for damages on account of loss of anticipated profits. The Company shall not in any event be liable to the Underwriter for damages on account of loss of anticipated profits. Nothing herein shall be construed to relieve the Underwriter of its liability for its default under the Agreement.

4. Conditions of the Company's Obligation. The obligation of the Company to participate in the transactions contemplated herein and in the Official Statement shall be subject to the condition that, on the Closing Date, there shall be in full force and effect an authorization of the Florida Public Service Commission with respect to the participation of the Company in such transactions, and containing no provision unacceptable to the Company by reason of the fact that it is materially adverse to the Company, it being understood that no authorization in effect at the time of the execution of this Letter of Representation contains any such unacceptable provision. In case the aforesaid condition shall not have been fulfilled, this Letter of Representation and the Company's obligation to participate in the transactions contemplated herein and in the Official Statement may be terminated by the Company, upon mailing or delivering written notice thereof to the Underwriter, except that the obligations of the Company under Section 3 hereof shall survive.

5. Representation of the Issuer. The acceptance and confirmation of this Letter of Representation by the Issuer shall constitute a representation and warranty by the Issuer to the Company that the representations and warranties contained in Section 3 of the Agreement are true as of the date hereof and will be true in all material respects as of the Closing Date.

6. Indemnification.

(a) The Company agrees to indemnify and hold harmless the Issuer and any official or employee thereof, the Underwriter and each person who controls the Underwriter within the meaning of Section 15 of the Securities Act of 1933, as amended (the "Securities Act"), against any and all losses, claims, damages or liabilities, joint or several, to which they or any of them may become subject and to reimburse each of them for any legal or other expenses (including, to the extent hereinafter provided, reasonable counsel fees) when and as incurred by them in connection with investigating any such losses, claims, damages or liabilities or in connection with defending any actions, insofar as such losses, claims, damages, liabilities, expenses or actions arise out of or are based upon any untrue statement or alleged untrue statement of a material fact contained in the Official Statement, as amended or supplemented (if any amendments or supplements thereto, including documents incorporated by reference, shall have been furnished), or the omission or alleged omission to state therein a material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading; provided, however, that the indemnity agreement contained in this Section 6 shall not apply to the Underwriter (or any person controlling the Underwriter) on account of any such losses, claims, damages, liabilities, expenses or actions arising out of, or based upon, any such untrue statement or alleged untrue statement, or any such omission or alleged omission, under the captions "Tax Matters" (except to the extent that such statement or omission is based upon an untrue statement of or an omission to state, or an alleged untrue statement of or omission to state, a material fact in the engineering facts and representations and conclusions of the Company concerning the Projects (as defined in the Loan Agreement) contained in the closing certificate furnished to Locke Lord LLP, as Bond Counsel, and except to the extent that such statement or omission is based upon the Company's continuing compliance with Section 148(f) of the Internal Revenue Code of 1986, as amended, and the regulations thereunder) and "Underwriting" (second paragraph only) or in the statement on the page (i) with respect to stabilization of the market price of the Bonds by the Underwriter or in the statements on the cover page with respect to the initial public offering price or tax matters (except to the extent that such statement or omission is based upon an untrue statement of or an omission to state, or an alleged untrue statement of or omission to state, a material fact in the engineering facts and representations and conclusions of the Company concerning the Projects contained in the closing certificate furnished to Locke Lord LLP, as Bond Counsel, and except to the extent that such statement or omission is based upon the Company's continuing compliance with Section 148(f) of the Internal Revenue Code of 1986, as amended, and the regulations thereunder); and provided, further, that the indemnity agreement contained in this Section 6 shall not inure to the benefit of the Underwriter (or of any person controlling such Underwriter) on account of any such losses, claims, damages, liabilities, expenses or actions arising from the sale of Bonds to any person if such Underwriter shall have failed to send or give to such person (i) with or prior to the written confirmation of such sale, a copy of the Official Statement or the Official Statement as amended or supplemented, if any amendments or supplements thereto shall have been timely furnished at or prior to the time of written confirmation of the sale involved, but exclusive of any documents incorporated by reference therein unless, with respect to the delivery of any amendment or supplement, the alleged omission or alleged untrue statement is not corrected in such amendment or supplement at the time of confirmation, or (ii) with or prior to the delivery of such Bonds to such person, a copy of any amendment or supplement to the Official Statement which shall have been furnished subsequent to such written confirmation and prior to the delivery of such Bonds to such person,

exclusive of any documents incorporated by reference therein unless, with respect to the delivery of any amendment or supplement, the alleged omission or alleged untrue statement was not corrected in such amendment or supplement at the time of such delivery. The Issuer agrees to notify promptly the Company, and the Underwriter agrees to notify promptly the Company and the Issuer, of the commencement of any litigation or proceedings against it, any of its aforesaid officials or employees or any person controlling it as aforesaid, in connection with the issuance and sale of the Bonds.

(b) The Underwriter agrees to indemnify and hold harmless the Issuer and any official or employee thereof, and the Company, its officers and directors, and each person who controls the Company within the meaning of Section 15 of the Securities Act, against any and all losses, claims, damages or liabilities, joint or several, to which they or any of them may become subject and to reimburse each of them for any legal or other expenses (including, to the extent hereinafter provided, reasonable counsel fees) when and as incurred by them in connection with investigating any such losses, claims, damages or liabilities, or in connection with defending any actions, insofar as such losses, claims, damages, liabilities, expenses or actions arise out of or are based upon any untrue statement or alleged untrue statement of a material fact contained in the Official Statement, as amended or supplemented (if any amendments or supplements thereto shall have been furnished), or the omission or alleged omission to state therein a material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading, but only with respect to information contained under the caption "Underwriting" (second paragraph only) or in the statements on the cover page with respect to the initial public offering price and terms of offering or in the statement on the page (i) with respect to stabilization of the market price of the Bonds by the Underwriter. The Issuer and the Company each agree promptly to notify the Underwriter, the Issuer and the Company, as the case may be, of the commencement of any litigation or proceedings against it, any of its aforesaid officials or employees, or any of its aforesaid officers and directors or any person controlling it as aforesaid, in connection with the issuance and sale of the Bonds.

(c) The Company, the Underwriter and the Issuer each agree that, upon the receipt of notice of the commencement of any action against it, any of its aforesaid officers and directors, any of its aforesaid officials or employees or any person controlling it as aforesaid, as the case may be, in respect of which indemnity may be sought on account of any indemnity agreement contained herein, it will promptly give written notice of the commencement thereof to the party or parties against whom indemnity shall be sought hereunder, but the omission so to notify such indemnifying party or parties of any such action shall not relieve such indemnifying party or parties from any liability which it or they may have to the indemnified party otherwise than on account of such indemnity agreement. In case such notice of any such action shall be so given, such indemnifying party shall be entitled to participate at its own expense in the defense or, if it so elects, to assume (in conjunction with any other indemnifying parties) the defense of such action, in which event such defense shall be conducted by counsel chosen by such indemnifying party or parties satisfactory to the indemnified party or parties and who shall be defendant or defendants in such action, and such defendant or defendants shall bear the fees and expenses of any additional counsel retained by them; but if the indemnifying party shall elect not to assume the defense of such action, such indemnifying party will reimburse such indemnified party or parties for the reasonable fees and expenses of any counsel retained by them; provided, however, if the defendants in any such action include both the indemnified party and the indemnifying

party and counsel for the indemnifying party shall have reasonably concluded that there may be a conflict of interest involved in the representation by such counsel of both the indemnifying party and the indemnified party, the indemnified party or parties shall have the right to select separate counsel, satisfactory to the indemnifying party, to participate in the defense of such action on behalf of such indemnified party or parties (it being understood, however, that the indemnifying party shall not be liable for the expenses of more than one separate counsel representing the indemnified parties who are parties to such action).

7. Miscellaneous. The validity and interpretation of this Letter of Representation shall be governed by the law of the State of Florida. This Letter of Representation shall inure to the benefit of the Company, the Issuer, the Underwriter and, with respect to the provisions of Section 6 hereof, each official, employee, officer, director and controlling person referred to in said Section 6, and their respective successors. Nothing in this Letter of Representation is intended or shall be construed to give to any other person, firm or corporation any legal or equitable right, remedy or claim under or in respect of this Letter of Representation or any provision herein contained. The term "successors" as used herein shall not include any purchaser, as such purchaser, of any Bonds from or through the Underwriter.

The indemnity agreements of the Company and the Underwriter contained in Section 6 hereof and the representations and warranties of the Company and the Issuer contained herein shall remain operative and in full force and effect, regardless of any investigation made by or on behalf of the Issuer or any official or employee thereof, the Underwriter or any controlling person thereof, or the Company or any director, officer or controlling person thereof, and shall survive the delivery of the Bonds. The agreements contained in Section 3 hereof to pay expenses shall survive the termination of the Agreement and this Letter of Representation.

This Letter of Representation may be executed in several counterparts, each of which shall be regarded as an original and all of which shall constitute one and the same agreement. This Letter of Representation shall become effective upon the execution and acceptance thereof and the effectiveness of the Agreement, and it shall terminate as provided in Section 4 hereof or upon the termination of the Agreement.

8. Notices. All communications hereunder shall be in writing or by telecopy and, if to the Underwriter, shall be mailed or delivered to them or, if to the Issuer, shall be mailed or delivered to it at Broward County, Florida, 115 S. Andrews Avenue, Fort Lauderdale, Florida 33301, Attention: Chief Financial Officer or, if to the Company, shall be mailed or delivered to Florida Power & Light Company, 700 Universe Boulevard, Juno Beach, Florida 33408, Attention: Treasurer.

If the foregoing correctly sets forth our understanding, please indicate your acceptance thereof in the space provided below for that purpose, whereupon this letter agreement and your acceptance shall constitute a binding agreement between us.

Very truly yours,

FLORIDA POWER & LIGHT COMPANY

Exhibit 4 (b)

Underwriting Agreement, dated November 16, 2015, with respect to the Mortgage Bonds.

FLORIDA POWER & LIGHT COMPANY

FIRST MORTGAGE BONDS

UNDERWRITING AGREEMENT

November 16, 2015

To the Representatives named in Schedule II
hereto, on behalf of the Underwriters
named in Schedule II hereto

Ladies and Gentlemen:

1. Introductory. Florida Power & Light Company, a Florida corporation ("**FPL**"), proposes to issue and sell its first mortgage bonds ("**First Mortgage Bonds**") of the series designation, with the terms and in the principal amount specified in *Schedule I* hereto (the "**Bonds**"). FPL hereby confirms its agreement with the several Underwriters (as defined below) as set forth herein.

The term "**Underwriters**" as used herein shall be deemed to mean the entity or several entities named in *Schedule II* hereto and any underwriter substituted as provided in *Section 5* hereof, and the term "**Underwriter**" shall be deemed to mean one of such Underwriters. If the entity or entities listed as a Representative in *Schedule II* hereto (the "**Representatives**") are the same as the entity or entities listed as Underwriters in *Schedule II* hereto, then the terms "**Underwriters**" and "**Representatives,**" as used herein, shall each be deemed to refer to such entity or entities. The Representatives represent that they have been authorized by each Underwriter to enter into this agreement on behalf of such Underwriter and to act for it in the manner herein provided. All obligations of the Underwriters hereunder are several and not joint. If more than one entity is named as a Representative in *Schedule II* hereto, any action under or in respect of this agreement may be taken by such entities jointly as the Representatives or by one of the entities acting on behalf of the Representatives and such action will be binding upon all the Underwriters.

2. Description of Bonds. The Bonds will be a series of First Mortgage Bonds issued by FPL under its Mortgage and Deed of Trust, dated as of January 1, 1944, to Deutsche Bank Trust Company Americas (formerly known as Bankers Trust Company), as Trustee (the "**Mortgage Trustee**"), and The Florida National Bank of Jacksonville (now resigned), as heretofore supplemented and as it will be further supplemented by a supplemental indenture relating to the Bonds (the "**Supplemental Indenture**") in substantially the form heretofore delivered to the Representatives. Such Mortgage and Deed of Trust as it has been and will be so supplemented is hereinafter called the "**Mortgage.**"

3. Representations and Warranties of FPL. FPL represents and warrants to the several Underwriters that:

(a) FPL has filed with the Securities and Exchange Commission (the "**Commission**") a joint registration statement with NextEra Energy, Inc., a Florida corporation ("**NEE**"), and NextEra Energy Capital Holdings, Inc., a Florida corporation ("**NEE Capital**"), on Form S-3 (Registration Statement Nos. 333-205558, 333-205558-01 and 333-205558-02) ("**Registration Statement No. 333-205558**"), for the registration under the Securities Act of 1933, as amended (the "**Securities Act**"), of

(i) an unspecified aggregate amount of (A) shares of FPL's serial Preferred Stock, $100 par value and shares of FPL's Preferred Stock without par value, (B) warrants of FPL, (C) First Mortgage Bonds, (D) senior debt securities of FPL, and (E) subordinated debt securities of FPL;

(ii) an unspecified aggregate amount of (A) shares of NEE's common stock, $.01 par value ("**Common Stock**"), (B) shares of NEE's preferred stock, $.01 par value ("**NEE Preferred Stock**"), (C) contracts to purchase Common Stock or NEE Preferred Stock or other agreements or instruments requiring NEE to issue Common Stock or NEE Preferred Stock (collectively, "**Stock Purchase Contracts**"), (D) units, each representing ownership of a Stock Purchase Contract and any of debt securities of NEE Capital, debt securities of NEE, or debt securities of third parties, including U.S. Treasury securities, (E) warrants of NEE, (F) senior debt securities of NEE, (G) subordinated debt securities of NEE, and (H) junior subordinated debentures of NEE;

(iii) an unspecified aggregate amount of (A) guarantees of NEE related to the NEE Capital Senior Debt Securities (as defined below) and NEE Capital Preferred Stock (as defined below), (B) subordinated guarantees of NEE related to NEE Capital Subordinated Debentures (as defined below), and (C) junior subordinated guarantees of NEE Capital Junior Subordinated Debentures (as defined below); and

(iv) an unspecified aggregate amount of (A) shares of NEE Capital's preferred stock, $.01 par value ("**NEE Capital Preferred Stock**"), (B) senior debt securities of NEE Capital ("**NEE Capital Senior Debt Securities**"), (C) subordinated debt securities of NEE Capital ("**NEE Capital Subordinated Debt Securities**"), and (D) junior subordinated debentures of NEE Capital ("**NEE Capital Junior Subordinated Debentures**").

Such registration statement has become effective and no stop order suspending such effectiveness has been issued under the Securities Act and no proceedings for that purpose have been instituted or are pending or, to the knowledge of FPL, threatened by the Commission.

References herein to the term "**Registration Statement**" (i) as of any given time means Registration Statement No. 333-205558, as amended or supplemented to such

time, including all documents incorporated by reference therein as of such time pursuant to Item 12 of Form S-3 ("**Incorporated Documents**") and any prospectus, preliminary prospectus supplement or prospectus supplement relating to the Bonds (any reference to any preliminary prospectus supplement or any prospectus supplement shall be understood to include the Base Prospectus (as defined below)) deemed to be a part thereof as of such time pursuant to Rule 430B under the Securities Act ("**Rule 430B**") that has not been superseded or modified as of such time and (ii) without reference to any given time means the Registration Statement as of 8:25 A.M., New York City time, on the date hereof (which date and time is the earlier of the date and time of (A) the first use of the preliminary prospectus supplement relating to the Bonds and (B) the first contract of sale of the Bonds), which time shall be considered the "**Effective Date**" of the Registration Statement. For purposes of the definition of Registration Statement in the preceding sentence, information contained in any prospectus, preliminary prospectus supplement or prospectus supplement that is deemed retroactively to be a part of the Registration Statement pursuant to Rule 430B shall be considered to be included in the Registration Statement as of the time specified in Rule 430B. References herein to the term "**Pricing Prospectus**" means (i) the prospectus relating to FPL forming a part of Registration Statement No. 333-205558, including all Incorporated Documents (the "**Base Prospectus**"), and (ii) any prospectus, preliminary prospectus supplement or prospectus supplement relating to the Bonds deemed to be a part of such registration statement that has not been superseded or modified (for purposes of the definition of Pricing Prospectus with respect to a particular offering of the Bonds, information contained in a prospectus, preliminary prospectus supplement or prospectus supplement relating to the Bonds that is deemed retroactively to be a part of the Registration Statement pursuant to Rule 430B shall be considered to be included in the Pricing Prospectus as of the time that prospectus, preliminary prospectus supplement or prospectus supplement is filed with the Commission pursuant to Rule 424 under the Securities Act ("**Rule 424**")). References herein to the term "**Prospectus**" means the Pricing Prospectus that discloses the public offering price and other final terms of the Bonds and otherwise satisfies Section 10(a) of the Securities Act.

The prospectus supplement relating to the Bonds proposed to be filed pursuant to Rule 424 shall be substantially in the form delivered to the Representatives prior to the execution of this agreement. Each of the Underwriters acknowledges that on or subsequent to the Closing Date (as defined in *Section 5* hereof), FPL may file a post-effective amendment to the Registration Statement pursuant to Rule 462(d) under the Securities Act or a Current Report on Form 8-K in order to file one or more unqualified opinions of counsel and any documents executed in connection with the offering of the Bonds.

(b) The Registration Statement constitutes an "automatic shelf registration statement" (as defined in Rule 405 under the Securities Act ("**Rule 405**")) filed within three years of the date hereof; the Registration Statement became effective upon filing; no notice of objection of the Commission with respect to the use of the Registration Statement pursuant to Rule 401(g)(2) under the Securities Act has been received by FPL and not removed; and with respect to the Bonds, FPL is a "well-known seasoned issuer"

within the meaning of subparagraph (1)(ii) of the definition of "well-known seasoned issuer" in Rule 405 and is not an "ineligible issuer" (in each case as defined in Rule 405).

(c) The Registration Statement at the Effective Date fully complied, and the Prospectus, both as of the date hereof and at the Closing Date, and the Registration Statement and the Mortgage, at the Closing Date, will fully comply, in all material respects with the applicable provisions of the Securities Act and the Trust Indenture Act of 1939, as amended, respectively, and, in each case, the applicable instructions, rules and regulations of the Commission thereunder; the Registration Statement, at the Effective Date, did not, and the Registration Statement, at the Closing Date, will not, contain an untrue statement of a material fact, or omit to state a material fact required to be stated therein or necessary to make the statements therein not misleading; the Prospectus, both as of the date hereof and at the Closing Date, will not include an untrue statement of a material fact or omit to state a material fact necessary in order to make the statements contained therein, in the light of the circumstances under which they were made, not misleading; provided, that the foregoing representations and warranties in this *Section 3(c)* shall not apply to statements or omissions made in reliance upon and in conformity with information furnished in writing to FPL by or on behalf of any Underwriter through the Representatives expressly for use in connection with the preparation of the Registration Statement or the Prospectus, or to any statements in or omissions from the Statements of Eligibility on Form T-1, or amendments thereto, filed as exhibits to the Registration Statement (collectively, the "**Statements of Eligibility**") or to any statements or omissions made in the Registration Statement or the Prospectus relating to The Depository Trust Company ("**DTC**") Book-Entry-Only System that are based solely on information contained in published reports of DTC; and the Incorporated Documents, when filed with the Commission, fully complied or will fully comply in all material respects with the applicable provisions of the Securities Exchange Act of 1934, as amended (the "**Exchange Act**"), and the applicable instructions, rules and regulations of the Commission thereunder.

(d) As of the Applicable Time (as defined below), the Pricing Disclosure Package (as defined below) did not contain an untrue statement of a material fact or omit to state a material fact necessary in order to make the statements contained therein, in the light of the circumstances under which they were made, not misleading; provided, that the foregoing representations and warranties in this *Section 3(d)* shall not apply to statements or omissions made in reliance upon and in conformity with information furnished in writing to FPL by or on behalf of any Underwriter through the Representatives expressly for use in connection with the preparation of the Pricing Prospectus, any preliminary prospectus supplement or any Issuer Free Writing Prospectus (as defined below), or to any statements in or omissions from the Pricing Prospectus, any preliminary prospectus supplement or any Issuer Free Writing Prospectus relating to the DTC Book-Entry-Only System that are based solely on information contained in published reports of DTC. References to the term "**Pricing Disclosure Package**" means the documents listed in *Schedule III*, taken together as a whole. References to the term "**Issuer Free Writing Prospectus**" means an issuer free writing prospectus, as defined in Rule 433 under the Securities Act ("**Rule 433**"). References to the term "**Applicable Time**" means 4:42 P.M., New York City time, on the date hereof.

(e) As of the Applicable Time, no Issuer Free Writing Prospectus includes any information that conflicts with the information contained in the Registration Statement, the Prospectus or the Pricing Prospectus, including any document incorporated by reference therein that has not been superseded or modified.

(f) The financial statements included as part of or incorporated by reference in the Pricing Disclosure Package, the Prospectus and the Registration Statement present fairly the consolidated financial condition and results of operations of FPL and its subsidiaries taken as a whole at the respective dates or for the respective periods to which they apply; such financial statements have been prepared in each case in accordance with generally accepted accounting principles consistently applied throughout the periods involved except as otherwise indicated in the Pricing Disclosure Package, the Prospectus and the Registration Statement; and Deloitte & Touche LLP, who has audited the audited financial statements of FPL, is an independent registered public accounting firm as required by the Securities Act and the Exchange Act and the rules and regulations of the Commission thereunder.

(g) Except as reflected in or contemplated by the Pricing Disclosure Package, since the respective most recent times as of which information is given in the Pricing Disclosure Package, there has not been any material adverse change in the business, properties or financial condition of FPL and its subsidiaries taken as a whole, whether or not in the ordinary course of business, nor has any transaction been entered into by FPL or any of its subsidiaries that is material to FPL and its subsidiaries taken as a whole, other than changes and transactions contemplated by the Pricing Disclosure Package and transactions in the ordinary course of business. FPL and its subsidiaries have no contingent obligation material to FPL and its subsidiaries taken as a whole, which is not disclosed in or contemplated by the Pricing Disclosure Package.

(h) The execution and delivery of this agreement and the consummation of the transactions herein contemplated by FPL, and the fulfillment of the terms hereof on the part of FPL to be fulfilled, have been duly authorized by all necessary corporate action of FPL in accordance with the provisions of its Restated Articles of Incorporation, its Amended and Restated Bylaws and applicable law, and the Bonds when issued and delivered by FPL as provided herein will constitute valid and binding obligations of FPL enforceable against FPL in accordance with their terms, except as limited or affected by bankruptcy, insolvency, reorganization, receivership, moratorium, fraudulent conveyance or other laws affecting mortgagees' and other creditors' rights and remedies generally and general principles of equity and to concepts of materiality, reasonableness, good faith and fair dealing and the discretion of the court before which any matter is brought.

(i) The execution and delivery of this agreement and the consummation of the transactions herein contemplated by FPL, the fulfillment of the terms hereof on the part of FPL to be fulfilled, and the compliance by FPL with all the terms and provisions of the Mortgage will not result in a breach of any of the terms or provisions of, or constitute a default under, FPL's Restated Articles of Incorporation or Amended and Restated Bylaws, or any indenture, mortgage, deed of trust or other agreement or instrument to which FPL or any of its subsidiaries is now a party, or violate any law or any order, rule,

decree or regulation applicable to FPL or any of its subsidiaries of any federal or state court, regulatory board or body or administrative agency having jurisdiction over FPL or any of its subsidiaries or any of their respective property, except where such breach, default or violation would not have a material adverse effect on the business, properties or financial condition of FPL and its subsidiaries taken as a whole.

(j) FPL has no direct or indirect significant subsidiaries (as defined in Regulation S-X (17 CFR Part 210)).

(k) FPL has been duly organized, is validly existing and is in good standing under the laws of its jurisdiction of organization, and is duly qualified to do business and is in good standing as a foreign corporation in each jurisdiction in which its ownership of properties or the conduct of its businesses requires such qualification, except where the failure so to qualify would not have a material adverse effect on the business, properties or financial condition of FPL and its subsidiaries taken as a whole, and has the power and authority as a corporation necessary to own or hold its properties and to conduct the businesses in which it is engaged.

(l) The Bonds will conform in all material respects to the description thereof in the Pricing Disclosure Package and the Prospectus.

(m) The Mortgage (i) has been duly authorized by FPL by all necessary corporate action, has been duly executed and delivered by FPL and is a valid and binding instrument enforceable against FPL in accordance with its terms, except as limited or affected by bankruptcy, insolvency, reorganization, receivership, moratorium, fraudulent conveyance or other laws affecting mortgagees' and other creditors' rights and remedies generally and general principles of equity and to concepts of materiality, reasonableness, good faith and fair dealing and the discretion of the court before which any matter is brought and (ii) conforms in all material respects to the description thereof in the Pricing Disclosure Package and the Prospectus.

(n) FPL is not, and after giving effect to the offering and sale of the Bonds and the application of the proceeds therefrom as described in the Pricing Disclosure Package and the Prospectus, will not be, an "investment company" within the meaning of the Investment Company Act of 1940, as amended.

(o) Except as described in the Pricing Disclosure Package and the Prospectus, FPL or its subsidiaries have valid franchises, licenses and permits adequate for the conduct of the business of FPL and its subsidiaries as described in the Pricing Disclosure Package and the Prospectus, except where the failure to have such franchises, licenses and permits would not reasonably be expected to have a material adverse effect on FPL and its subsidiaries taken as a whole.

(p) The interactive data in eXtensible Business Reporting Language filed as exhibits to FPL's Form 10-K for the year ended December 31, 2014 and Forms 10-Q for the quarters ended March 31, 2015, June 30, 2015 and September 30, 2015 fairly presents

the information called for in all material respects and has been prepared in accordance with the Commission's rules and guidelines applicable thereto.

4. Purchase and Sale. Subject to the terms and conditions in this agreement (including the representations and warranties herein contained), FPL agrees to sell to the respective Underwriters named in *Schedule II* hereto, severally and not jointly, and the respective Underwriters agree, severally and not jointly, to purchase from FPL for an aggregate purchase price of $595,122,000, the respective principal amount of the Bonds set forth opposite their respective names in *Schedule II* hereto.

The Underwriters agree to make a *bona fide* public offering of the Bonds as set forth in the Pricing Disclosure Package, such public offering to be made as soon after the execution of this agreement as practicable, subject, however, to the terms and conditions of this agreement. The Underwriters have advised FPL that the Bonds will be offered to the public at the amount per Bond as set forth in *Schedule I* hereto as the Price to Public and to certain dealers selected by the Representatives at a price which represents a concession. Such dealers' concession may not be in excess of 0.400% of the principal amount per Bond under the Price to Public.

Each Underwriter agrees that (i) no information that is presented by it to investors has been or will be inconsistent with the information contained in the Pricing Disclosure Package as it may then be amended or supplemented and (ii) it will make no offer that would constitute a Free Writing Prospectus that is required to be filed by FPL pursuant to Rule 433 other than an Issuer Free Writing Prospectus in accordance with *Section 6(h)* hereof. References to the term "**Free Writing Prospectus**" means a free writing prospectus as defined in Rule 405.

5. Time, Date and Place of Closing, Default of Underwriter. Delivery of the Bonds and payment therefor by wire transfer in federal funds shall be made at 9:00 A.M., New York City time, on the settlement date set forth on *Schedule I*, at the offices of Morgan, Lewis & Bockius LLP, 101 Park Avenue, New York, New York 10178, or at such other time, date or place as may be agreed upon in writing by FPL and the Representatives. The time and date of such delivery and payment are herein called the "**Closing Date**."

The Bonds shall be delivered to the Representatives for the respective accounts of the Underwriters against payment by the several Underwriters through the Representatives of the purchase price therefor. Delivery of the Bonds shall be made through the facilities of DTC unless FPL and the Representatives shall otherwise agree. For the purpose of expediting the checking of the Bonds by the Representatives on behalf of the Underwriters, FPL (if delivery of the Bonds shall be made otherwise than through the facilities of DTC) agrees to make such Bonds available to the Representatives for such purpose at the offices of Morgan, Lewis & Bockius LLP, 101 Park Avenue, New York, New York 10178, not later than 2:00 P.M., New York City time, on the business day preceding the Closing Date, or at such other time, date or place as may be agreed upon by FPL and the Representatives.

If any Underwriter shall fail to purchase and pay for the principal amount of the Bonds which such Underwriter has agreed to purchase and pay for hereunder (otherwise than by reason of any failure on the part of FPL to comply with any of the provisions contained herein), the non-defaulting Underwriters shall be obligated to purchase and pay for (in addition to the

respective principal amount of the Bonds set forth opposite their respective names in *Schedule II* hereto) the principal amount of the Bonds which such defaulting Underwriter or Underwriters failed to purchase and pay for, up to a principal amount thereof equal to, in the case of each such remaining Underwriter, ten percent (10%) of the aggregate principal amount of the Bonds which is set forth opposite the name of each such remaining Underwriter in said *Schedule II*, and such remaining Underwriters shall have the right, within 24 hours of receipt of such notice, either to (i) purchase and pay for (in such proportion as may be agreed upon among them) the remaining principal amount of the Bonds which the defaulting Underwriter or Underwriters agreed but failed to purchase, or (ii) substitute another Underwriter or Underwriters, satisfactory to FPL, to purchase and pay for the remaining principal amount of the Bonds which the defaulting Underwriter or Underwriters agreed but failed to purchase. If any of the Bonds would still remain unpurchased, then FPL shall be entitled to a further period of 24 hours within which to procure another party or other parties that (i) are members of the Financial Industry Regulatory Authority, Inc. or else are not eligible for membership in said Authority but who agree (A) to make no sales within the United States, its territories or its possessions or to persons who are citizens thereof or residents therein and (B) in making sales to comply with said Authority's Conduct Rules, and (ii) are satisfactory to the Representatives to purchase such Bonds on the terms herein set forth. In the event that, within the respective prescribed periods, (i) the non-defaulting Underwriters notify FPL that they have arranged for the purchase of such Bonds or (ii) FPL notifies the non-defaulting Underwriters that it has arranged for the purchase of such Bonds, the non-defaulting Underwriters or FPL shall have the right to postpone the Closing Date for a period of not more than three full business days beyond the expiration of the respective prescribed periods in order to effect whatever changes may thus be made necessary in the Registration Statement, the Prospectus or in any other documents or arrangements. In the event that neither the non-defaulting Underwriters nor FPL has arranged for the purchase of such Bonds by another party or parties as above provided, then this agreement shall terminate without any liability on the part of FPL or any Underwriter (other than an Underwriter which shall have failed or refused, otherwise than for some reason sufficient to justify, in accordance with the terms hereof, the cancellation or termination of its obligations hereunder, to purchase and pay for the Bonds which such Underwriter has agreed to purchase as provided in *Section 4* hereof), except as otherwise provided in *Section 6(d)*, *Section 6(f)* and *Section 9* hereof.

6. Covenants of FPL. FPL agrees with the several Underwriters that:

(a) FPL will timely file the Prospectus and any preliminary prospectus supplement used in connection with the offering of the Bonds with the Commission pursuant to Rule 424. FPL has complied and will comply with Rule 433 in connection with the offering and sale of the Bonds, including applicable provisions in respect of timely filing with the Commission, legending and record-keeping.

(b) FPL will prepare a final term sheet, containing a description of the pricing terms of the Bonds, substantially in the form of *Schedule I* hereto and approved by the Representatives and will timely file such term sheet with the Commission pursuant to Rule 433.

(c) FPL will, upon request, deliver to the Representatives and to Counsel for the Underwriters (as defined below) one signed copy of the Registration Statement or, if

a signed copy is not available, one conformed copy of the Registration Statement certified by an officer of FPL to be in the form as originally filed, including all Incorporated Documents and exhibits, except those incorporated by reference, which relate to the Bonds, including a signed or conformed copy of each consent and certificate included therein or filed as an exhibit thereto. As soon as practicable after the date hereof, FPL will deliver or cause to be delivered to the Underwriters through the Representatives as many copies of the Prospectus and any Issuer Free Writing Prospectus as the Representatives may reasonably request for the purposes contemplated by the Securities Act.

(d) FPL has paid or caused to be paid or will pay or cause to be paid all expenses in connection with the (i) preparation and filing of the Registration Statement, any preliminary prospectus supplement, the Prospectus and any Issuer Free Writing Prospectus, (ii) issuance and delivery of the Bonds as provided in *Section 5* hereof, (iii) preparation, execution, filing and recording of the Supplemental Indenture and (iv) printing and delivery to the Representatives for the account of the Underwriters, in reasonable quantities, of copies of the Registration Statement, any preliminary prospectus supplement, the Prospectus, any Issuer Free Writing Prospectus and the Supplemental Indenture. FPL will pay or cause to be paid all taxes, if any (but not including any transfer taxes), on the issuance of the Bonds and recordation of the Supplemental Indenture. FPL shall not, however, be required to pay any amount for any expenses of the Representatives or any of the Underwriters, except that if this agreement shall be terminated in accordance with the provisions of *Section 7*, *Section 8*, or *Section 10* hereof, FPL will pay or cause to be paid the fees and disbursements of Counsel for the Underwriters, whose fees and disbursements the Underwriters agree to pay in any other event, and FPL shall reimburse or cause to be reimbursed the Underwriters for out-of-pocket expenses reasonably incurred by them in connection with the transactions contemplated by this agreement, not in excess, however, of an aggregate of $5,000 for such out-of-pocket expenses. FPL shall not in any event be liable to any of the several Underwriters for damages on account of loss of anticipated profits.

(e) During a period of nine months after the date hereof, if any event relating to or affecting FPL shall occur which, in the opinion of FPL, should be set forth in a supplement to or an amendment of the Prospectus (including an Issuer Free Writing Prospectus) in order to make the Prospectus, in the light of the circumstances pertaining when it is delivered to a purchaser, not misleading, FPL will forthwith at its expense prepare, file with the Commission, if required, and furnish to the Representatives a reasonable number of copies of such supplement or supplements or amendment or amendments to the Prospectus (including an Issuer Free Writing Prospectus) which will supplement or amend the Prospectus so that as supplemented or amended it will not include an untrue statement of a material fact or omit to state a material fact necessary in order to make the statements contained therein, in the light of the circumstances pertaining when the Prospectus is delivered to a purchaser, not misleading; provided that should such event relate solely to activities of any of the Underwriters, then the Underwriters shall assume the expense of preparing and furnishing copies of any such amendment or supplement. In case any Underwriter is required to deliver a Prospectus after the expiration of nine months after the date hereof, FPL upon the request of the

Representatives will furnish to the Representatives, at the expense of such Underwriter, a reasonable quantity of a supplemented or amended Prospectus or supplements or amendments to the Prospectus complying with Section 10 of the Securities Act.

(f) FPL will furnish such proper information as may be lawfully required and otherwise cooperate in qualifying the Bonds for offer and sale under the blue sky laws of such United States jurisdictions as the Representatives may designate and will pay or cause to be paid filing fees and expenses (including fees of counsel not to exceed $5,000 and reasonable disbursements of counsel), provided that FPL shall not be required to qualify as a foreign corporation or dealer in securities, or to file any consents to service of process under the laws of any jurisdiction, or to meet other requirements deemed by FPL to be unduly burdensome.

(g) FPL will timely file such reports pursuant to the Exchange Act as are necessary in order to make generally available to its security holders (including holders of the Bonds) as soon as practicable an earnings statement (which need not be audited, unless required so to be under Section 11(a) of the Securities Act) for the purposes of, and to provide the benefits contemplated by, the last paragraph of Section 11(a) of the Securities Act.

(h) Prior to the termination of the offering of the Bonds, FPL will not file any amendment to the Registration Statement or any amendment or supplement to the Prospectus or any amendment or supplement to the Pricing Disclosure Package without prior notice to the Representatives and to Hunton & Williams LLP, who are acting as counsel for the several Underwriters ("**Counsel for the Underwriters**"), or any such amendment or supplement to which the Representatives shall reasonably object in writing, or which shall be unsatisfactory to Counsel for the Underwriters. FPL has not made any offer relating to the Bonds that would constitute an Issuer Free Writing Prospectus or that would otherwise constitute a Free Writing Prospectus required to be filed by FPL with the Commission or retained by FPL under Rule 433, other than a pricing term sheet substantially in the form as set forth on *Schedule I*, and FPL will not make any such offer without prior notice to the Representatives and to Counsel for the Underwriters, or any such offer to which the Representatives shall reasonably object in writing, or which shall be unsatisfactory to Counsel for the Underwriters.

(i) FPL will advise the Representatives promptly of the filing of the Prospectus pursuant to Rule 424, of the filing of any material pursuant to Rule 433 and of any amendment or supplement to the Pricing Disclosure Package or the Registration Statement or, prior to the termination of the offering of the Bonds, of official notice of the institution of proceedings for, or the entry of, a stop order suspending the effectiveness of the Registration Statement, of receipt from the Commission of any notice of objection to the use of the Registration Statement or any post-effective amendment thereto pursuant to Rule 401(g)(2) under the Securities Act, and, if such a stop order should be entered, or notice of objection should be received, use every commercially reasonable effort to obtain the prompt removal thereof.

(j) If there occurs an event or development as a result of which the Pricing Disclosure Package would include an untrue statement of a material fact or would omit to state a material fact necessary in order to make the statements therein, in the light of the circumstances then pertaining, not misleading, FPL promptly will notify the Representatives so that any use of the Pricing Disclosure Package may cease until it is amended or supplemented.

(k) On or before the Closing Date, FPL will, if applicable, cause (i) at least one counterpart of the Supplemental Indenture to be duly recorded in the States of Florida or Georgia and (ii) all intangible and documentary stamp taxes due in connection with the issuance of the Bonds and the recording of the Supplemental Indenture to be paid. Within 30 days following the Closing Date, FPL will, if applicable, cause the Supplemental Indenture to be duly recorded in all other counties in which property of FPL which is subject to the lien of the Mortgage is located.

(l) All the property to be subjected to the lien of the Mortgage will be adequately described therein.

7. Conditions of Underwriters' Obligations to Purchase and Pay for the Bonds. The several obligations of the Underwriters to purchase and pay for the Bonds shall be subject to the performance by FPL of its obligations to be performed hereunder on or prior to the Closing Date and to the following conditions:

(a) The representations and warranties made by FPL herein and qualified by materiality shall be true and correct in all respects and the representations and warranties made by FPL herein that are not qualified by materiality shall be true and correct in all material respects as of the Closing Date, in each case, as if made on and as of such date and the Representatives shall have received, prior to payment for the Bonds, a certificate from FPL dated the Closing Date and signed by an officer of FPL to that effect.

(b) No stop order suspending the effectiveness of the Registration Statement shall be in effect on the Closing Date; no order of the Commission directed to the adequacy of any Incorporated Document shall be in effect on the Closing Date; no proceedings for either such purpose shall be pending before, or threatened by, the Commission on the Closing Date; and no notice of objection by the Commission to the use of the Registration Statement or any post-effective amendment thereto pursuant to Rule 401(g)(2) under the Securities Act shall have been received by FPL and not removed by the Closing Date; and the Representatives shall have received, prior to payment for the Bonds, a certificate from FPL dated the Closing Date and signed by an officer of FPL to the effect that, to the best of his or her knowledge, no such orders are in effect, no proceedings for either such purpose are pending before, or to the knowledge of FPL threatened by, the Commission, and no such notice of objection has been received and not removed.

(c) On the Closing Date, there shall be in full force and effect an authorization of the Florida Public Service Commission with respect to the issuance and sale of the Bonds on the terms herein stated or contemplated, and containing no provision

unacceptable to the Representatives by reason of the fact that it is materially adverse to FPL, it being understood that no authorization provided to Counsel for the Underwriters and in effect at the date hereof contains any such unacceptable provision.

(d) On the Closing Date, the Representatives shall have received from Squire Patton Boggs (US) LLP, counsel to FPL, Morgan, Lewis & Bockius LLP, counsel to FPL, and Hunton & Williams LLP, Counsel for the Underwriters, opinions (with a copy for each of the Underwriters) in substantially the form and substance prescribed in *Schedule IV*, *Schedule V*, and *Schedule VI* hereto (i) with such changes therein as may be agreed upon by FPL and the Representatives, with the approval of Counsel for the Underwriters, and (ii) if the Prospectus relating to the Bonds shall be supplemented or amended after the Prospectus shall have been filed with the Commission pursuant to Rule 424, with any changes therein necessary to reflect such supplementation or amendment.

(e) On the date hereof and on the Closing Date, the Representatives shall have received from Deloitte & Touche LLP a letter or letters (which may refer to letters previously delivered to the Representatives) (with copies thereof for each of the Underwriters) dated the respective dates of delivery thereof to the effect that (i) they are an independent registered public accounting firm with respect to FPL within the meaning of the Securities Act and the Exchange Act and the applicable published rules and regulations thereunder; (ii) in their opinion, the consolidated financial statements of FPL audited by them and incorporated by reference in the Pricing Prospectus or the Pricing Prospectus and the Prospectus, as applicable, comply as to form in all material respects with the applicable accounting requirements of the Securities Act and the Exchange Act and the published rules and regulations thereunder; (iii) on the basis of performing a review of interim financial information as described in the Public Company Accounting Oversight Board (United States) ("**PCAOB**") AU Section 722, Interim Financial Information, on the unaudited condensed consolidated financial statements of FPL, if any, incorporated by reference in the Pricing Prospectus or the Pricing Prospectus and the Prospectus, as applicable, a reading of the latest available interim unaudited condensed consolidated financial statements of FPL, if any, since the close of FPL's most recent audited fiscal year, a reading of the minutes and consents of the Board of Directors, the Finance Committee of the Board of Directors and the Stock Issuance Committee of the Board of Directors and of the sole common shareholder of FPL since the end of the most recent audited fiscal year, and inquiries of officials of FPL who have responsibility for financial and accounting matters (it being understood that the foregoing procedures do not constitute an audit made in accordance with standards of the PCAOB and they would not necessarily reveal matters of significance with respect to the comments made in such letter, and accordingly that Deloitte & Touche LLP makes no representation as to the sufficiency of such procedures for the several Underwriters' purposes), nothing has come to their attention which caused them to believe that (a) the unaudited condensed consolidated financial statements of FPL, if any, incorporated by reference in the Pricing Prospectus or the Pricing Prospectus and the Prospectus, as applicable, (1) do not comply as to form in all material respects with the applicable accounting requirements of the Securities Act and the Exchange Act and the published rules and regulations thereunder and (2) except as disclosed in the Pricing Prospectus or the Pricing Prospectus and the

Prospectus, as applicable, are not in conformity with generally accepted accounting principles applied on a basis substantially consistent with that of the audited consolidated financial statements of FPL incorporated by reference in the Pricing Prospectus or the Pricing Prospectus and the Prospectus, as applicable; (b) at the date of the latest available interim balance sheet read by them and at a specified date not more than five days prior to the date of such letter, there was any change in the common stock or additional paid-in capital or increase in the preferred stock or long-term debt including current maturities and excluding fair value swaps, if any, and unamortized premium and discount on long-term debt of FPL and its subsidiaries, or decrease in common shareholder's equity of FPL and its subsidiaries, in each case as compared with amounts shown in the most recent condensed consolidated balance sheet, if any, incorporated by reference in the Pricing Prospectus or the Pricing Prospectus and the Prospectus, as applicable, except in all instances for changes, increases or decreases which the Pricing Prospectus or the Pricing Prospectus and the Prospectus, as applicable, discloses have occurred or may occur, or as occasioned by the declaration, provision for, or payment of dividends, or which are described in such letter; or (c) for the period from the date of the most recent condensed consolidated balance sheet, if any, incorporated by reference in the Pricing Prospectus or the Pricing Prospectus and the Prospectus, as applicable, to the latest available interim balance sheet read by them and for the period from the date of the latest available interim balance sheet read by them to a specified date not more than five days prior to the date of such letter, there were any decreases, as compared with the corresponding period in the preceding year, in total consolidated operating revenues or in net income, except in all instances for decreases which the Pricing Prospectus or the Pricing Prospectus and the Prospectus, as applicable, discloses have occurred or may occur, or which are described in such letter; and (iv) they have carried out certain procedures and made certain findings, as specified in such letter, with respect to certain amounts included in the Pricing Prospectus or the Pricing Prospectus and the Prospectus, as applicable, and Exhibit 12(b) to the Registration Statement and such other items as the Representatives may reasonably request.

(f) Since the respective most recent times as of which information is given in the Pricing Disclosure Package, and up to the Closing Date, (i) there shall have been no material adverse change in the business, properties or financial condition of FPL and its subsidiaries taken as a whole, except as disclosed in or contemplated by the Pricing Disclosure Package, and (ii) there shall have been no transaction entered into by FPL or any of its subsidiaries that is material to FPL and its subsidiaries taken as a whole, other than transactions disclosed in or contemplated by the Pricing Disclosure Package, and transactions in the ordinary course of business; and at the Closing Date the Representatives shall have received a certificate to such effect from FPL signed by an officer of FPL.

(g) All legal proceedings to be taken in connection with the issuance and sale of the Bonds shall have been satisfactory in form and substance to Counsel for the Underwriters.

In case any of the conditions specified above in this *Section 7* shall not have been fulfilled, this agreement may be terminated by the Representatives upon mailing or delivering

written notice thereof to FPL. Any such termination shall be without liability of any party to any other party except as otherwise provided in *Section 6(d)* and *Section 6(f)* hereof.

8. Conditions of FPL's Obligations. The obligation of FPL to deliver the Bonds shall be subject to the following conditions:

(a) No stop order suspending the effectiveness of the Registration Statement shall be in effect on the Closing Date; no order of the Commission directed to the adequacy of any Incorporated Document shall be in effect on the Closing Date; no proceedings for either such purpose shall be pending before, or threatened by, the Commission on the Closing Date; and no notice of objection by the Commission to the use of the Registration Statement or any post-effective amendment thereto pursuant to Rule 401(g)(2) under the Securities Act shall have been received by FPL and not removed by the Closing Date.

(b) On the Closing Date, there shall be in full force and effect an authorization of the Florida Public Service Commission with respect to the issuance and sale of the Bonds on the terms herein stated or contemplated, and containing no provision unacceptable to FPL by reason of the fact that it is materially adverse to FPL, it being understood that no authorization in effect at the date hereof contains any such unacceptable provision.

In case the conditions specified above in this *Section 8* shall not have been fulfilled, this agreement may be terminated by FPL upon mailing or delivering written notice thereof to the Representatives. Any such termination shall be without liability of any party to any other party except as otherwise provided in *Section 6(d)* and *Section 6(f)* hereof.

9. Indemnification.

(a) FPL agrees to indemnify and hold harmless each Underwriter, each officer and director of each Underwriter and each person (a "**Controlling Person**") who controls any Underwriter within the meaning of Section 15 of the Securities Act or Section 20 of the Exchange Act, against any and all losses, claims, damages or liabilities, joint or several, to which they or any of them may become subject under the Securities Act or any other statute or common law, and to reimburse each such Underwriter, officer, director and Controlling Person for any legal or other expenses (including, to the extent hereinafter provided, reasonable counsel fees) when and as incurred by them in connection with investigating any such losses, claims, damages or liabilities or in connection with defending any actions, insofar as such losses, claims, damages, liabilities, expenses or actions arise out of or are based upon an untrue statement or alleged untrue statement of a material fact contained in any preliminary prospectus supplement, including all Incorporated Documents, or in the Registration Statement, the Pricing Prospectus, the Prospectus or any Issuer Free Writing Prospectus, or the omission or alleged omission to state therein a material fact required to be stated therein or necessary to make the statements therein not misleading; provided, however, that the indemnity agreement contained in this *Section 9(a)* shall not apply to any such losses, claims, damages, liabilities, expenses or actions arising out of, or based upon, any such

untrue statement or alleged untrue statement, or any such omission or alleged omission, if such statement or omission was made in reliance upon and in conformity with information furnished in writing, to FPL by or on behalf of any Underwriter, through the Representatives, expressly for use in connection with the preparation of any preliminary prospectus supplement, the Registration Statement, the Pricing Prospectus, the Prospectus or any Issuer Free Writing Prospectus or any amendment or supplement to any thereof, or arising out of, or based upon, statements in or omissions from the Statements of Eligibility; and provided, further, that the indemnity agreement contained in this *Section 9(a)* in respect of any preliminary prospectus supplement, the Pricing Prospectus, any Issuer Free Writing Prospectus or the Prospectus shall not inure to the benefit of any Underwriter (or of any officer or director or Controlling Person of such Underwriter) on account of any such losses, claims, damages, liabilities, expenses or actions arising from the sale of the Bonds to any person in respect of any preliminary prospectus supplement, the Pricing Prospectus, any Issuer Free Writing Prospectus or the Prospectus, each as may be then supplemented or amended, furnished by such Underwriter to a person to whom any of the Bonds were sold (excluding in all cases, however, any document then incorporated by reference therein), insofar as such indemnity relates to any untrue or misleading statement made in or omission from such preliminary prospectus supplement, Pricing Prospectus, Issuer Free Writing Prospectus or Prospectus, if a copy of a supplement or amendment to such preliminary prospectus supplement, Pricing Prospectus, Prospectus or Issuer Free Writing Prospectus (excluding in all cases, however, any document then incorporated by reference therein) (i) is furnished on a timely basis by FPL to the Underwriter, (ii) is required by law or regulation to have been conveyed to such person by or on behalf of such Underwriter, at or prior to the entry into the contract of sale of the Bonds with such person, but was not so conveyed (which conveyance may be oral or written) by or on behalf of such Underwriter and (iii) would have cured the defect giving rise to such loss, claim, damage or liability. The indemnity agreement of FPL contained in this *Section 9(a)* and the representations and warranties of FPL contained in *Section 3* hereof shall remain operative and in full force and effect, regardless of any investigation made by or on behalf of any Underwriter or any of its officers, directors or Controlling Persons, and shall survive the delivery of the Bonds. Each Underwriter agrees promptly to notify FPL, and each other Underwriter, of the commencement of any litigation or proceedings against the notifying Underwriter, or any of its officers, directors or Controlling Persons, in connection with the issuance and sale of the Bonds.

(b) Each Underwriter, severally and not jointly, agrees to indemnify and hold harmless FPL, its officers and directors, and each person who controls FPL within the meaning of Section 15 of the Securities Act or Section 20 of the Exchange Act against any and all losses, claims, damages or liabilities, joint or several, to which they or any of them may become subject under the Securities Act or any other statute or common law and to reimburse each of them for any legal or other expenses (including, to the extent hereinafter provided, reasonable counsel fees) when and as incurred by them in connection with investigating any such losses, claims, damages or liabilities or in connection with defending any actions, insofar as such losses, claims, damages, liabilities, expenses or actions arise out of or are based upon an untrue statement or alleged untrue statement of a material fact contained in any preliminary prospectus

supplement, the Registration Statement, the Pricing Prospectus, the Prospectus or any Issuer Free Writing Prospectus, or the omission or alleged omission to state therein a material fact required to be stated therein or necessary to make the statements therein not misleading if such statement or omission was made in reliance upon and in conformity with information furnished in writing to FPL by or on behalf of such Underwriter, through the Representatives, expressly for use in connection with the preparation of any preliminary prospectus supplement, the Registration Statement, the Pricing Prospectus, the Prospectus or any Issuer Free Writing Prospectus or any amendment or supplement to any thereof. The Underwriters hereby furnish to FPL in writing, expressly for use in the preliminary prospectus supplement dated November 16, 2015, the Registration Statement, the Pricing Prospectus, the Prospectus and any Issuer Free Writing Prospectus, the following: under "Underwriting" in the preliminary prospectus supplement dated November 16, 2015, the Pricing Prospectus and the Prospectus, the fourth sentence in the third paragraph; the entire fourth paragraph (including the table immediately following the third sentence) except for the first sentence; the entire fifth paragraph; the third sentence in the sixth paragraph; and the entire seventh, eighth and ninth paragraphs. FPL acknowledges that the statements identified in the preceding sentence constitute the only information furnished in writing by or on behalf of the several Underwriters expressly for inclusion in the preliminary prospectus supplement dated November 16, 2015, the Registration Statement, the Pricing Prospectus, the Prospectus or any Issuer Free Writing Prospectus. The respective indemnity agreement of each Underwriter contained in this *Section 9(b)* shall remain operative and in full force and effect, regardless of any investigation made by or on behalf of FPL or any of its officers or directors or any person who controls FPL within the meaning of Section 15 of the Securities Act or Section 20 of the Exchange Act, or by or on behalf of any other Underwriter or any of its officers, directors or Controlling Persons, and shall survive the delivery of the Bonds. FPL agrees promptly to notify the Representatives of the commencement of any litigation or proceedings against FPL (or any of its controlling persons within the meaning of Section 15 of the Securities Act or Section 20 of the Exchange Act) or any of its officers or directors in connection with the issuance and sale of the Bonds.

(c) FPL and each of the several Underwriters each agree that, upon the receipt of notice of the commencement of any action against it, its officers and directors, or any person controlling it as aforesaid, in respect of which indemnity or contribution may be sought under the provisions of this *Section 9* it will promptly give written notice of the commencement thereof to the party or parties against whom indemnity or contribution shall be sought thereunder, but the omission so to notify such indemnifying party or parties of any such action shall not relieve such indemnifying party or parties from any liability which it or they may have to the indemnified party otherwise than on account of this indemnity agreement. In case such notice of any such action shall be so given, such indemnifying party or parties shall be entitled to participate at its own expense in the defense or, if it so elects, to assume (in conjunction with any other indemnifying parties) the defense of such action, in which event such defense shall be conducted by counsel chosen by such indemnifying party or parties and reasonably satisfactory to the indemnified party or parties who shall be defendant or defendants in such action, and such defendant or defendants shall bear the fees and expenses of any additional counsel retained by them; but if the indemnifying party or parties shall elect not to assume the

defense of such action, such indemnifying party or parties will reimburse such indemnified party or parties for the reasonable fees and expenses of any counsel retained by them; provided, however, if the defendants in any such action include both the indemnified party and the indemnifying party and counsel for the indemnifying party shall have reasonably concluded that there may be a conflict of interest involved in the representation by such counsel of both the indemnifying party and the indemnified party, the indemnified party or parties shall have the right to select separate counsel, satisfactory to the indemnifying party or parties, to participate in the defense of such action on behalf of such indemnified party or parties at the expense of the indemnifying party or parties (it being understood, however, that the indemnifying party or parties shall not be liable for the expenses of more than one separate counsel representing the indemnified parties who are parties to such action). FPL and each of the several Underwriters each agree that without the prior written consent of the other parties to such action who are parties to this agreement, which consent shall not be unreasonably withheld, it will not settle, compromise or consent to the entry of any judgment in any claim or proceeding in respect of which such party intends to seek indemnity or contribution under the provisions of this *Section 9*, unless such settlement, compromise or consent (i) includes an unconditional release of such other parties from all liability arising out of such claim or proceeding and (ii) does not include a statement as to or an admission of fault, culpability or a failure to act by or on behalf of such other parties.

(d) If, or to the extent, the indemnification provided for in *Section 9(a)* or *Section 9(b)* hereof shall be unenforceable under applicable law by an indemnified party, each indemnifying party agrees to contribute to such indemnified party with respect to any and all losses, claims, damages, liabilities and expenses for which each such indemnification provided for in *Section 9(a)* or *Section 9(b)* hereof shall be unenforceable, in such proportion as shall be appropriate to reflect (i) the relative fault of FPL on the one hand and the Underwriters on the other hand in connection with the statements or omissions which have resulted in such losses, claims, damages, liabilities and expenses, (ii) the relative benefits received by FPL on the one hand and the Underwriters on the other hand from the offering of the Bonds pursuant to this agreement, and (iii) any other relevant equitable considerations; provided, however, that no indemnified party guilty of fraudulent misrepresentation (within the meaning of Section 11(f) of the Securities Act) shall be entitled to contribution with respect thereto from any indemnifying party not guilty of such fraudulent misrepresentation. Relative fault shall be determined by reference to, among other things, whether the untrue or alleged untrue statement of a material fact or the omission or alleged omission to state a material fact relates to information supplied by FPL or the Underwriters and each such party's relative intent, knowledge, access to information and opportunity to correct or prevent such untrue statement or omission. FPL and each of the Underwriters agree that it would not be just and equitable if contribution pursuant to this *Section 9(d)* were to be determined by pro rata allocation or by any other method of allocation which does not take account of the equitable considerations referred to above. Notwithstanding the provisions of this *Section 9(d)*, no Underwriter shall be required to contribute in excess of the amount equal to the excess of (i) the total price at which the Bonds underwritten by it were offered to the public, over (ii) the amount of any damages which such Underwriter has otherwise been required to pay by reason of any such untrue or alleged untrue

statement or omission or alleged omission. The obligations of each Underwriter to contribute pursuant to this *Section 9(d)* are several and not joint and shall be in the same proportion as such Underwriter's obligation to underwrite the Bonds is to the total principal amount of the Bonds set forth in *Schedule II* hereto.

10. Termination. This agreement may be terminated by the Representatives by delivering written notice thereof to FPL, at any time prior to the Closing Date, if after the date hereof and at or prior to the Closing Date:

(a) (i) there shall have occurred any general suspension of trading in securities on The New York Stock Exchange, Inc. (the "**NYSE**") or there shall have been established by the NYSE or by the Commission or by any federal or state agency or by the decision of any court any limitation on prices for such trading or any general restrictions on the distribution of securities, or trading in any securities of FPL shall have been suspended or limited by any exchange located in the United States or on the over-the-counter market located in the United States or a general banking moratorium declared by New York or federal authorities or (ii) there shall have occurred any material adverse change in the financial markets in the United States, any outbreak of hostilities, including, but not limited to, an escalation of hostilities which existed prior to the date hereof, any other national or international calamity or crisis or any material adverse change in financial, political or economic conditions affecting the United States, the effect of any such event specified in this clause (ii) being such as to make it, in the reasonable judgment of the Representatives, impracticable or inadvisable to proceed with the offering of the Bonds as contemplated in the Pricing Disclosure Package or for the Underwriters to enforce contracts for the sale of the Bonds; or

(b) (i) there shall have been any downgrading or any notice of any intended or potential downgrading in the ratings accorded to the Bonds or any securities of FPL which are of the same class as the Bonds by either Moody's Investors Service, Inc. ("**Moody's**") or Standard & Poor's Ratings Services, a Standard & Poor's Financial Services LLC business ("**S&P**"), or (ii) either Moody's or S&P shall have publicly announced that it has under surveillance or review, with possible negative implications, its ratings of the Bonds or any securities of FPL which are of the same class as the Bonds, the effect of any such event specified in (i) or (ii) above being such as to make it, in the reasonable judgment of the Representatives, impracticable or inadvisable to proceed with the offering of the Bonds as contemplated in the Pricing Disclosure Package or for the Underwriters to enforce contracts for the sale of the Bonds.

This agreement may also be terminated at any time prior to the Closing Date if in the judgment of the Representatives the subject matter of any amendment or supplement to the Registration Statement or the Prospectus or any Issuer Free Writing Prospectus prepared and furnished by FPL after the date hereof reflects a material adverse change in the business, properties or financial condition of FPL and its subsidiaries taken as a whole which renders it either inadvisable to proceed with such offering, if any, or inadvisable to proceed with the delivery of the Bonds to be purchased hereunder. Any termination of this agreement pursuant to this *Section 10* shall be without liability of any party to any other party except as otherwise provided in *Section 6(d)* and *Section 6(f)* hereof.

11. Miscellaneous.

(a) The validity and interpretation of this agreement shall be governed by the laws of the State of New York without regard to conflicts of law principles thereunder. This agreement shall inure to the benefit of, and be binding upon, FPL, the several Underwriters and, with respect to the provisions of *Section 9* hereof, each officer, director or controlling person referred to in said *Section 9*, and their respective successors. Nothing in this agreement is intended or shall be construed to give to any other person or entity any legal or equitable right, remedy or claim under or in respect of this agreement or any provision herein contained. The term "successors" as used in this agreement shall not include any purchaser, as such purchaser, of any Bonds from any of the several Underwriters.

(b) FPL acknowledges and agrees that the Underwriters are acting solely in the capacity of arm's length contractual counterparties to FPL with respect to the offering of the Bonds as contemplated by this agreement and not as financial advisors or fiduciaries to FPL in connection herewith. Additionally, none of the Underwriters is advising FPL as to any legal, tax, investment, accounting or regulatory matters in any jurisdiction in connection with the offering of the Bonds as contemplated by this agreement. Any review by the Underwriters of FPL in connection with the offering of the Bonds contemplated by this agreement and the transactions contemplated by this agreement will not be performed on behalf of FPL.

12. Notices. All communications hereunder shall be in writing and, if to the Underwriters, shall be mailed or delivered to the Representatives at the address set forth in *Schedule II* hereto, or if to FPL, shall be mailed or delivered to it at 700 Universe Boulevard, Juno Beach, Florida 33408, Attention: Treasurer.

13. Counterparts. This agreement may be executed in any number of counterparts by the parties hereto on separate counterparts, each of which, when so executed and delivered, shall be deemed an original, but all such counterparts shall together constitute one and the same instrument.

If the foregoing correctly sets forth our understanding, please indicate your acceptance on behalf of the Underwriters in the space provided below for that purpose, whereupon this letter and your acceptance on behalf of the Underwriters shall constitute a binding agreement between FPL and the Underwriters.

Very truly yours,

Florida Power & Light Company

as Representatives of the Underwriters
named in Schedule II to the Agreement,
as herein described

Ladies and Gentlemen:

We have acted as counsel to Florida Power & Light Company ("FPL") (a) in connection with the authorization and issuance by FPL of $600,000,000 aggregate principal amount of its First Mortgage Bonds, 3.125% Series due December 1, 2025 (the "Bonds"), issued under the Mortgage and Deed of Trust dated as of January 1, 1944, as the same is supplemented by one hundred and twenty four indentures supplemental thereto, the latest of which (the "One Hundred Twenty-Fourth Supplemental Indenture") is dated as of November 1, 2015 (such Mortgage as so supplemented being hereinafter called the "Mortgage") from FPL to Deutsche Bank Trust Company Americas, as Trustee ("Mortgage Trustee"), and (b) in connection with the sale of the Bonds to you in accordance with the Underwriting Agreement, dated November 16, 2015 (the "Agreement"), between you and FPL. Capitalized terms used in this opinion but not defined shall have the meanings set forth in the Agreement.

We have participated in the preparation of or reviewed (1) Registration Statement Nos. 333-205558, 333-205558-01 and 333-205558-02) (the "Registration Statement"), which Registration Statement was filed jointly by FPL, NextEra Energy, Inc. and NextEra Energy Capital Holdings, Inc. with the Securities and Exchange Commission (the "Commission") under the Securities Act of 1933, as amended (the "Securities Act"); (2) the Base Prospectus dated July 8, 2015 forming a part of the Registration Statement, as supplemented by a preliminary prospectus supplement, subject to completion, dated November 16, 2015 relating to the Bonds, both such prospectus and preliminary prospectus supplement, subject to completion, filed with

the Commission pursuant to Rule 424(b) under the Securities Act ("Rule 424") (references herein to the "Preliminary Prospectus" as of any given date shall refer to such prospectus, as supplemented by the preliminary prospectus supplement, subject to completion, dated November 16, 2015 relating to the Bonds filed with the Commission pursuant to Rule 424, and as further amended and supplemented to such date, including the Incorporated Documents); (3) the pricing term sheet, dated November 16, 2015 (the "Pricing Term Sheet") filed with the Commission pursuant to Rule 433 under the Securities Act; (4) the Base Prospectus dated July 8, 2015 forming a part of the Registration Statement, as supplemented by a prospectus supplement dated November 16, 2015 relating to the Bonds, both such prospectus and prospectus supplement filed with the Commission pursuant to Rule 424 (references herein to the "Prospectus" as of any given date shall refer to such prospectus, as supplemented by such prospectus supplement, and as further amended and supplemented to such date, including the Incorporated Documents); (5) the Mortgage; (6) the corporate proceedings of FPL with respect to the Registration Statement and with respect to the authorization, issuance and sale of the Bonds; (7) FPL's Restated Articles of Incorporation (the "Charter") and Amended and Restated Bylaws as amended to the date hereof (the "Bylaws"); and (8) such other corporate records, certificates and other documents and such questions of law as we have considered necessary or appropriate for the purposes of this opinion. We have also reviewed the order issued by the Florida Public Service Commission ("FPSC") authorizing, among other things, the issuance and sale of debt securities in 2015, including the Bonds.

Upon the basis of the foregoing, we advise you that:

I.

FPL is a validly organized and existing corporation and its status is active under the laws of the State of Florida.

II.

FPL is a corporation duly authorized by its Charter to conduct the business which it is now conducting as set forth in the Pricing Disclosure Package and the Prospectus; FPL is subject, as to retail rates and services, issuance of securities, accounting and certain other matters, to the jurisdiction of the FPSC; and FPL is subject, as to wholesale rates, accounting and certain other matters, to the jurisdiction of the Federal Energy Regulatory Commission.

III.

The Mortgage has been duly authorized by FPL by all necessary corporate action, has been duly and validly executed and delivered by FPL, and is a valid and binding obligation of FPL enforceable against FPL in accordance with its terms, except as limited or affected by bankruptcy, insolvency, reorganization, receivership, moratorium, fraudulent conveyance or other laws affecting mortgagees' and other creditors' rights and remedies generally and general principles of equity and to concepts of materiality, reasonableness, good faith and fair dealing and the discretion of the court before which any matter is brought.

IV.

The Bonds are valid and binding obligations of FPL enforceable against FPL in accordance with their terms, except as limited or affected by bankruptcy, insolvency, reorganization, receivership, moratorium, fraudulent conveyance or other laws affecting mortgagees' and other creditors' rights and remedies generally and general principles of equity and to concepts of materiality, reasonableness, good faith and fair dealing and the discretion of the court before which any matter is brought, and are entitled to the benefit of the security afforded by the Mortgage.

V.

Except as to the financial statements and other financial or statistical data contained or incorporated by reference therein, as to which we express no opinion, and except for those parts of the Registration Statement that constitute the Statements of Eligibility, as to which we express no opinion, the Registration Statement, at the Effective Date, and the Prospectus, as of the date of the Agreement, complied as to form in all material respects with the applicable requirements of the Securities Act and the applicable instructions, rules and regulations of the Commission thereunder. The Incorporated Documents (except as to the financial statements and other financial or statistical data contained or incorporated by reference therein, as to which we express no opinion), at the times they were filed with the Commission, complied as to form in all material respects with the applicable requirements of the Securities Exchange Act of 1934, as amended, and the applicable instructions, rules and regulations of the Commission thereunder. The Registration Statement is an "automatic shelf registration statement" (as defined in Rule 405) that was filed not more than three years prior to the date of the Agreement. The Registration Statement became, and is, at the date hereof, effective under the Securities Act, and to the best of our knowledge, no proceedings for a stop order with respect thereto are pending or threatened under Section 8 of the Securities Act.

VI.

The consummation of the transactions contemplated in the Agreement and the fulfillment of the terms contained in the Agreement and the compliance by FPL with all the terms and provisions of the Mortgage will not result in a breach of any of the terms or provisions of, or constitute a default under, the Charter or the Bylaws or any indenture, mortgage, deed of trust or other agreement or instrument the terms of which are known to us to which FPL is now a party, except where such breach or default would not have a material adverse effect on the business, properties or financial condition of FPL and its subsidiaries taken as a whole.

VII.

The Bonds are being issued and sold pursuant to the authority contained in an order of the FPSC, which authority is adequate to permit the issuance and sale of the Bonds. To the best of our knowledge, said authorization is still in full force and effect, and no further approval, authorization, consent or order of any public board or body (other than in connection or in compliance with the provisions of the blue sky laws of any jurisdiction, as to which we express

no opinion, and other than those which have been already obtained) is legally required for the authorization of the issuance and sale of the Bonds.

VIII.

The statements made in the Pricing Disclosure Package and the Prospectus under the headings "Description of Bonds" and "Certain Terms of the Offered Bonds," insofar as they purport to constitute summaries of the terms of the documents referred to therein, constitute accurate summaries of the terms of such documents in all material respects.

IX.

The Mortgage is duly qualified under the Trust Indenture Act of 1939, as amended.

X.

As to the Mortgaged and Pledged Property, as defined in the Mortgage, FPL has satisfactory title to any easements and personal properties, and good and marketable or insurable title in fee simple to any other real properties (except as FPL's interest is stated to be otherwise), subject only to Excepted Encumbrances, as defined in the Mortgage, to any lien, if any, existing or placed thereon at the time of acquisition thereof by FPL, to minor defects and encumbrances customarily found in the case of properties of like size and character and which, in our opinion, would not impair the use thereof by FPL (all of which title exceptions, encumbrances, liens and defects are hereinafter referred to as "Exceptions"), and to the lien of the Mortgage; the Mortgage constitutes a valid, direct, and first mortgage lien upon the Mortgaged and Pledged Property now owned by FPL, subject, however, to the Exceptions and as set forth in the last sentence of this paragraph; and the description of properties in the Mortgage is adequate to constitute the Mortgage a lien on Mortgaged and Pledged Property hereafter acquired by FPL, subject, however, to the Exceptions and except as limited or affected by bankruptcy, insolvency, reorganization, receivership, moratorium, fraudulent conveyance or other laws affecting mortgagees' and other creditors' rights and remedies generally and general principles of equity and to concepts of materiality, reasonableness, good faith and fair dealing and the discretion of the court before which any matter is brought. The One Hundred Twenty-Fourth Supplemental Indenture is in proper form for recording in all places required; and upon such recording, the One Hundred Twenty-Fourth Supplemental Indenture will constitute adequate record notice to perfect the lien of the Mortgage as to all Mortgaged and Pledged Property acquired by FPL subsequent to the recording of the One Hundred Twenty-Third Supplemental Indenture to the Mortgage and prior to the recording of the One Hundred Twenty-Fourth Supplemental Indenture.

XI.

Except as stated or referred to in the Pricing Disclosure Package and the Prospectus, to our knowledge after due inquiry, there is no material pending legal proceeding to which FPL or any of its subsidiaries is a party or of which property of FPL or any of its subsidiaries is the subject which is reasonably likely to be determined adversely and, if determined adversely, might reasonably be expected to have a material adverse effect on FPL and its subsidiaries taken as a whole and, to the best of our knowledge, no such proceeding is known to be contemplated by governmental authorities.

XII.

The Agreement has been duly and validly authorized, executed and delivered by FPL.

In rendering the foregoing opinion, we have assumed that the certificates representing the Bonds will conform to specimens examined by us and that the Bonds will be duly authenticated, in accordance with the Mortgage, by the Mortgage Trustee under the Mortgage and will be delivered against payment of the purchase price as provided in the Agreement and that the signatures on all documents examined by us are genuine, assumptions which we have not independently verified.

Other than with respect to the opinion expressed in Paragraph VIII hereof, we have not ourselves checked the accuracy or completeness of, or otherwise verified, the information furnished with respect to matters in the Registration Statement, the Preliminary Prospectus, the Prospectus and the Pricing Term Sheet. We have generally reviewed and discussed such information with certain officers and employees of FPL, certain of its other legal counsel, its independent registered public accounting firm and your representatives. On the basis of such review and discussion, but without independent check or verification except as stated, nothing has come to our attention that would lead us to believe (except as to the financial statements and other financial or statistical data contained or incorporated by reference therein, as to which we express no belief, and except for those parts of the Registration Statement that constitute the Statements of Eligibility, as to which we express no belief), that (i) the Registration Statement at the Effective Date contained an untrue statement of a material fact or omitted to state a material fact required to be stated therein or necessary in order to make the statements contained therein not misleading, (ii) the Pricing Disclosure Package, at the Applicable Time, included an untrue statement of a material fact or omitted to state any material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading, or (iii) the Prospectus as of the date of the Agreement included, or at the date hereof includes, an untrue statement of a material fact or the Prospectus as of the date of the Agreement omitted, or at the date hereof omits, to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading.

This opinion is limited to the laws of the States of Florida, New York and Georgia and the federal laws of the United States insofar as they bear on matters covered hereby. As to all matters of New York law, we have relied, with your consent, upon an opinion of even date herewith addressed to you by Morgan, Lewis & Bockius LLP, New York, New York. As to all matters of law affecting Mortgaged and Pledged Property located in the State of Georgia, we have relied, with your consent, upon an opinion of even date herewith addressed to you and us by McDaniel & Scott, P.C., Decatur, Georgia and our opinion in Paragraph X as to such Mortgaged and Pledged Property is subject to the qualifications and limitations set forth in that opinion. As to all matters of Florida law, Morgan, Lewis & Bockius LLP and Hunton & Williams LLP are hereby authorized to rely upon this opinion as though it were rendered to each of them.

This opinion is rendered to you in connection with the above-described transaction. This opinion may not be relied upon by you for any other purpose, or relied upon or furnished to any

other person, firm or corporation without our prior written permission. This opinion is expressed as of the date hereof, and we do not assume any obligation to update or supplement it to reflect any fact or circumstance that hereafter comes to our attention, or any change in law that hereafter occurs.

Very truly yours,

SQUIRE PATTON BOGGS (US) LLP

as Representatives of the Underwriters
named in Schedule II to the Agreement,
as herein described

Ladies and Gentlemen:

We have acted as counsel to Florida Power & Light Company ("FPL") (a) in connection with the authorization and issuance by FPL of $600,000,000 aggregate principal amount of its First Mortgage Bonds, 3.125% Series due December 1, 2025 (the "Bonds"), issued under the Mortgage and Deed of Trust dated as of January 1, 1944, as the same is supplemented by one hundred and twenty four indentures supplemental thereto, the latest of which (the "One Hundred Twenty-Fourth Supplemental Indenture") is dated as of November 1, 2015 (such Mortgage as so supplemented being hereinafter called the "Mortgage") from FPL to Deutsche Bank Trust Company Americas, as Trustee ("Mortgage Trustee"), and (b) in connection with the sale of the Bonds to you in accordance with the Underwriting Agreement, dated November 16, 2015 (the "Agreement"), between you and FPL. Capitalized terms used in this opinion but not defined shall have the meanings set forth in the Agreement.

We have participated in the preparation of or reviewed (1) Registration Statement Nos. 333-205558, 333-205558-01 and 333-205558-02) (the "Registration Statement"), which Registration Statement was filed jointly by FPL, NextEra Energy, Inc. and NextEra Energy Capital Holdings, Inc. with the Securities and Exchange Commission (the "Commission") under the Securities Act of 1933, as amended (the "Securities Act"); (2) the Base Prospectus dated July 8, 2015 forming a part of the Registration Statement, as supplemented by a preliminary prospectus supplement, subject to completion, dated November 16, 2015 relating to the Bonds, both such prospectus and preliminary prospectus supplement, subject to completion, filed with the Commission pursuant to Rule 424(b) under the Securities Act ("Rule 424") (references

herein to the "Preliminary Prospectus" as of any given date shall refer to such prospectus, as supplemented by the preliminary prospectus supplement, subject to completion, dated November 16, 2015 relating to the Bonds filed with the Commission pursuant to Rule 424, and as further amended and supplemented to such date, including the Incorporated Documents); (3) the pricing term sheet, dated November 16, 2015 (the "Pricing Term Sheet") filed with the Commission pursuant to Rule 433 under the Securities Act; (4) the Base Prospectus dated July 8, 2015 forming a part of the Registration Statement, as supplemented by a prospectus supplement dated November 16, 2015 relating to the Bonds, both such prospectus and prospectus supplement filed with the Commission pursuant to Rule 424 (references herein to the "Prospectus" as of any given date shall refer to such prospectus, as supplemented by such prospectus supplement, and as further amended and supplemented to such date, including the Incorporated Documents); (5) the Mortgage; (6) the corporate proceedings of FPL with respect to the Registration Statement and with respect to the authorization, issuance and sale of the Bonds; (7) FPL's Restated Articles of Incorporation (the "Charter") and Amended and Restated Bylaws as amended to the date hereof (the "Bylaws"); and (8) such other corporate records, certificates and other documents and such questions of law as we have considered necessary or appropriate for the purposes of this opinion. We have also reviewed the order issued by the Florida Public Service Commission ("FPSC") authorizing, among other things, the issuance and sale of debt securities in 2015, including the Bonds.

Upon the basis of the foregoing, we advise you that:

I.

The Mortgage has been duly authorized by FPL by all necessary corporate action, has been duly and validly executed and delivered by FPL, and is a valid and binding obligation of FPL enforceable against FPL in accordance with its terms, except as limited or affected by bankruptcy, insolvency, reorganization, receivership, moratorium, fraudulent conveyance or other laws affecting mortgagees' and other creditors' rights and remedies generally and general principles of equity and to concepts of materiality, reasonableness, good faith and fair dealing and the discretion of the court before which any matter is brought.

II.

The Bonds are valid and binding obligations of FPL enforceable against FPL in accordance with their terms, except as limited or affected by bankruptcy, insolvency, reorganization, receivership, moratorium, fraudulent conveyance or other laws affecting mortgagees' and other creditors' rights and remedies generally and general principles of equity and to concepts of materiality, reasonableness, good faith and fair dealing and the discretion of the court before which any matter is brought, and are entitled to the benefit of the security afforded by the Mortgage.

III.

Except as to the financial statements and other financial or statistical data contained or incorporated by reference therein, as to which we express no opinion, and except for those parts of the Registration Statement that constitute the Statements of Eligibility, as to which we express no opinion, the Registration Statement, at the Effective Date, and the Prospectus, as of the date

of the Agreement, complied as to form in all material respects with the applicable requirements of the Securities Act and the applicable instructions, rules and regulations of the Commission thereunder. The Incorporated Documents (except as to the financial statements and other financial or statistical data contained or incorporated by reference therein, as to which we express no opinion), at the times they were filed with the Commission, complied as to form in all material respects with the applicable requirements of the Securities Exchange Act of 1934, as amended, and the applicable instructions, rules and regulations of the Commission thereunder. The Registration Statement is an "automatic shelf registration statement" (as defined in Rule 405) that was filed not more than three years prior to the date of the Agreement. The Registration Statement became, and is, at the date hereof, effective under the Securities Act, and to the best of our knowledge, no proceedings for a stop order with respect thereto are pending or threatened under Section 8 of the Securities Act.

IV.

The consummation of the transactions contemplated in the Agreement and the fulfillment of the terms contained in the Agreement and the compliance by FPL with all the terms and provisions of the Mortgage will not result in a breach of any of the terms or provisions of, or constitute a default under, the Charter or the Bylaws or any indenture, mortgage, deed of trust or other agreement or instrument the terms of which are known to us to which FPL is now a party, except where such breach or default would not have a material adverse effect on the business, properties or financial condition of FPL and its subsidiaries taken as a whole.

V.

The Bonds are being issued and sold pursuant to the authority contained in an order of the FPSC, which authority is adequate to permit the issuance and sale of the Bonds. To the best of our knowledge, said authorization is still in full force and effect, and no further approval, authorization, consent or order of any public board or body (other than in connection or in compliance with the provisions of the blue sky laws of any jurisdiction, as to which we express no opinion, and other than those which have been already obtained) is legally required for the authorization of the issuance and sale of the Bonds.

VI.

The statements made in the Pricing Disclosure Package and the Prospectus under the headings "Description of Bonds" and "Certain Terms of the Offered Bonds," insofar as they purport to constitute summaries of the terms of the documents referred to therein, constitute accurate summaries of the terms of such documents in all material respects.

VII.

The Mortgage is duly qualified under the Trust Indenture Act of 1939, as amended.

VIII.

The Agreement has been duly and validly authorized, executed and delivered by FPL.

In rendering the foregoing opinion, we have assumed that the certificates representing the Bonds will conform to specimens examined by us and that the Bonds will be duly authenticated, in accordance with the Mortgage, by the Mortgage Trustee under the Mortgage and will be delivered against payment of the purchase price as provided in the Agreement and that the signatures on all documents examined by us are genuine, assumptions which we have not independently verified.

Other than with respect to the opinion expressed in Paragraph VI hereof, we have not ourselves checked the accuracy or completeness of, or otherwise verified, the information furnished with respect to matters in the Registration Statement, the Preliminary Prospectus, the Prospectus and the Pricing Term Sheet. We have generally reviewed and discussed such information with certain officers and employees of FPL, certain of its other legal counsel, its independent registered public accounting firm and your representatives. On the basis of such review and discussion, but without independent check or verification except as stated, nothing has come to our attention that would lead us to believe (except as to the financial statements and other financial or statistical data contained or incorporated by reference therein, as to which we express no belief, and except for those parts of the Registration Statement that constitute the Statements of Eligibility, as to which we express no belief), that (i) the Registration Statement at the Effective Date contained an untrue statement of a material fact or omitted to state a material fact required to be stated therein or necessary in order to make the statements contained therein not misleading, (ii) the Pricing Disclosure Package, at the Applicable Time, included an untrue statement of a material fact or omitted to state any material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading, or (iii) the Prospectus as of the date of the Agreement included, or at the date hereof includes, an untrue statement of a material fact or the Prospectus as of the date of the Agreement omitted, or at the date hereof omits, to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading.

This opinion is limited to the laws of the States of New York and Florida and the federal laws of the United States insofar as they bear on matters covered hereby. As to all matters of Florida law, we have relied, with your consent, upon an opinion of even date herewith addressed to you by Squire Patton Boggs (US) LLP, West Palm Beach, Florida. As to all matters of New York law, Squire Patton Boggs (US) LLP is hereby authorized to rely upon this opinion as though it were rendered to Squire Patton Boggs (US) LLP.

This opinion is rendered to you in connection with the above-described transaction. This opinion may not be relied upon by you for any other purpose, or relied upon or furnished to any other person, firm or corporation without our prior written permission. This opinion is expressed as of the date hereof, and we do not assume any obligation to update or supplement it to reflect any fact or circumstance that hereafter comes to our attention, or any change in law that hereafter occurs.

Very truly yours,

MORGAN, LEWIS & BOCKIUS LLP

Florida Power & Light Company
$600,000,000 First Mortgage Bonds, 3.125% Series due December 1, 2025

Ladies and Gentlemen:

We have acted as counsel for you in connection with your several purchases from Florida Power & Light Company ("FPL") of $600,000,000 aggregate principal amount of FPL's First Mortgage Bonds, 3.125% Series due December 1, 2025 (the "Bonds"), issued under FPL's Mortgage and Deed of Trust dated as of January 1, 1944, with Deutsche Bank Trust Company Americas, as Trustee, which has been amended and supplemented in the past and which will be supplemented again by one or more supplemental indentures relating to these Bonds (as so amended and supplemented, the "Mortgage"), pursuant to the Underwriting Agreement, dated November 16, 2015 (the "Agreement"), between you and FPL. Capitalized terms used in this opinion but not defined shall have the meanings set forth in the Agreement.

In connection with the foregoing, we have examined such documents and satisfied ourselves as to such other matters as we have deemed necessary in order to enable us to express this opinion. We have assumed that the certificates representing the Bonds will conform to specimens examined by us and that the Bonds will be duly authenticated, in accordance with the Mortgage, by the Trustee and will be delivered against payment of the purchase price as provided in the Agreement, assumptions which we have not independently verified.

For purposes of the opinions expressed below, we have assumed without verification (i) the authenticity of all documents submitted to us as originals; (ii) the conformity to the originals of all documents submitted as certified or photostatic copies and the authenticity of the originals of such documents; (iii) the genuineness of signatures not witnessed by us; and (iv) the legal capacity of natural persons.

As to factual matters, we have relied upon representations and warranties included in the Agreement and upon certificates of officers of FPL being delivered to you today pursuant to Section 7(a) of the Agreement, and upon certificates of public officials, without independent investigation. Whenever the phrase "to the best of our knowledge" is used herein, it refers to the actual knowledge of the attorneys involved in this transaction, without independent investigation.

We do not purport to express an opinion on any laws other than the laws of the State of New York, the United States of America and, to the extent set forth herein, the laws of the State of Florida. As to all matters of Florida law, we have, with your consent, relied upon the opinion of even date herewith addressed to you by Squire Patton Boggs (US) LLP, counsel for FPL. We express no opinion or belief as to the incorporation of FPL, titles to property, franchises or the lien of the Mortgage.

Based on the foregoing, we are of the opinion that:

I.

The Mortgage has been duly authorized by FPL by all necessary corporate action, has been duly and validly executed and delivered by FPL, and is a valid and binding obligation of FPL enforceable against FPL in accordance with its terms, except as limited or affected by bankruptcy, insolvency, reorganization, receivership, moratorium, fraudulent conveyance or other laws affecting mortgagees' and other creditors' rights and remedies generally and general principles of equity and to concepts of materiality, reasonableness, good faith and fair dealing and the discretion of the court before which any matter is brought.

II.

The Bonds are valid and binding obligations of FPL enforceable against FPL in accordance with their terms, except as limited or affected by bankruptcy, insolvency, reorganization, receivership, moratorium, fraudulent conveyance or other laws affecting mortgagees' and other creditors' rights and remedies generally and general principles of equity and to concepts of materiality, reasonableness, good faith and fair dealing and the discretion of the court before which any matter is brought, and are entitled to the benefit of the security afforded by the Mortgage.

III.

Registration Statement Nos. 333-205558, 333-205558-01 and 333-205558-02) (the "Registration Statement") is an "automatic shelf registration statement" (as defined in Rule 405) that was filed not more than three years prior to the date of the Agreement. The Registration Statement has become, and is, at the Closing Date, effective under the Securities Act, and to the

best of our knowledge, no proceedings for a stop order with respect to the Registration Statement are pending or threatened under Section 8 of the Securities Act.

IV.

The statements made in the Pricing Disclosure Package and the Prospectus under the headings "Description of Bonds" and "Certain Terms of the Offered Bonds," insofar as they purport to constitute summaries of the terms of the documents referred to therein, constitute accurate summaries of the terms of such documents in all material respects.

V.

The Mortgage is duly qualified under the Trust Indenture Act of 1939, as amended.

VI.

The Agreement has been duly and validly authorized, executed and delivered by FPL.

This opinion is given to you solely for your use as the Underwriters in connection with the Agreement and the transactions contemplated thereunder, and it is not to be quoted, in whole or in part, or otherwise referred to, nor is it to be filed with any governmental agency or any other person, nor is it to be relied upon by any person other than you or for any other purpose without our express written consent. This opinion is expressed as of the date hereof, and we do not assume any obligation to update or supplement it to reflect any fact or circumstance that hereafter comes to our attention, or any change in law that hereafter occurs.

Very truly yours,

Florida Power & Light Company
$600,000,000 First Mortgage Bonds, 3.125% Series due December 1, 2025

Ladies and Gentlemen:

We have acted as counsel for you in connection with your several purchases from Florida Power & Light Company ("FPL") of $600,000,000 aggregate principal amount of FPL's First Mortgage Bonds, 3.125% Series due December 1, 2025 (the "Bonds"), issued under FPL's Mortgage and Deed of Trust dated as of January 1, 1944, with Deutsche Bank Trust Company Americas, as Trustee, which has been amended and supplemented in the past and which will be supplemented again by one or more supplemental indentures relating to these Bonds (as so amended and supplemented, the "Mortgage"), pursuant to the Underwriting Agreement, dated November 16, 2015 (the "Agreement"), between you and FPL. Capitalized terms used in this letter but not defined shall have the meanings set forth in the Agreement.

In passing on the form of the Registration Statement and the form of the Prospectus, we necessarily assume the correctness and completeness of the statements made or included therein by FPL and take no responsibility therefor, except insofar as such statements relate to us and as set forth in paragraph IV in our opinion letter to you dated as of the date hereof. Other than with respect to the opinion expressed in said paragraph IV, we have not ourselves checked the accuracy or completeness of, or otherwise verified, the information furnished with respect to matters in the Registration Statement, the Preliminary Prospectus, the Prospectus and the Pricing Term Sheet. We have generally reviewed and discussed such information with certain officers

and employees of FPL, certain of its legal counsel, its independent registered public accounting firm and your representatives.

On the basis of such review and discussion, but without independent check or verification except as stated, nothing has come to our attention that would lead us to believe that

(i) the Registration Statement, at the Effective Date, contained an untrue statement of a material fact or omitted to state a material fact required to be stated therein or necessary in order to make the statements contained therein not misleading;

(ii) the Pricing Disclosure Package, at the Applicable Time, included an untrue statement of a material fact or omitted to state any material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading; or

(iii) the Prospectus as of the date of the Agreement included, or at the date hereof includes, an untrue statement of a material fact or the Prospectus as of the date of the Agreement omitted, or at the date hereof omits, to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading.

Subject to and on the basis of the foregoing, we further advise you that

(iv) the Registration Statement, at the Effective Date, and the Prospectus, as of the date of the Agreement, complied as to form in all material respects with the applicable requirements of the Securities Act and the applicable instructions, rules and regulations of the Commission thereunder; and

(v) the Incorporated Documents, at the times they were filed with the Commission, complied as to form in all material respects with the applicable requirements of the Exchange Act and the applicable instructions, rules and regulations of the Commission thereunder.

With respect to the foregoing paragraphs (i) - (v), we express no view or belief and make no statement with respect to (a) the financial statements and other financial or statistical data contained or incorporated by reference in the Registration Statement or the exhibits thereto, the Pricing Disclosure Package or the Prospectus and (b) those parts of the Registration Statement that constitute the Statements of Eligibility.

This letter is furnished to you solely for your use as the Underwriters in connection with the Agreement and the transactions contemplated thereunder, and it is not to be quoted, in whole or in part, or otherwise referred to, nor is it to be filed with any governmental agency or any other person, nor is it to be relied upon by any person other than you or for any other purpose without our express written consent. This letter is expressed as of the date hereof, and we do not assume any obligation to advise you of facts or circumstances that hereafter come to our attention, or of changes in law that hereafter occur, which could affect the views contained herein.

Very truly yours,

Exhibit 4 (c)

Letter of Representation, dated June 10, 2015, with respect to the Broward County Series 2015 Bonds.

Blanket Issuer Letter of Representations

New York, NY 10041-0099

Ladies and Gentlemen:

This letter sets forth our understanding with respect to all issues (the "Securities") that Issuer shall request be made eligible for deposit by The Depository Trust Company ("DTC").

To induce DTC to accept the Securities as eligible for deposit at DTC, and to act in accordance with DTC's Rules with respect to the Securities, Issuer represents to DTC that Issuer will comply with the requirements stated in DTC's Operational Arrangements, as they may be amended from time to time.

Note:

Schedule A contains statements that DTC believes accurately describe DTC, the method of effecting book-entry transfers of securities distributed through DTC, and certain related matters.

Very truly yours,

Broward County, Florida

Exhibit 4 (d)

Remarketing Agreement, dated June 11, 2015, with respect to the Broward County Series 2015 Bonds.

REMARKETING AGREEMENT

This Remarketing Agreement (the "Agreement") dated June 11, 2015 is made by and between Florida Power & Light Company (the "Company") and Morgan Stanley & Co. LLC (the "Remarketing Agent").

Broward County, Florida, a political subdivision of the State of Florida (the "Issuer"), is issuing $85,000,000 aggregate principal amount of its Industrial Development Revenue Bonds (Florida Power & Light Company Project) Series 2015 (the "Bonds") under and pursuant to a Trust Indenture between the Issuer and The Bank of New York Mellon Trust Company, N.A. as trustee (the "Trustee"), dated as of June 1, 2015 (the "Indenture"). The Bonds will be secured by an assignment of rights to receive payments from the Company under a Loan Agreement, dated as of June 1, 2015 between the Issuer and the Company (the "Loan Agreement"). The Bonds will initially bear interest at a Daily Interest Rate (as defined in the Indenture). Intending to be legally bound, the parties hereto agree as follows:

1. Appointment and Acceptance. The Company hereby appoints Morgan Stanley & Co. LLC as the Remarketing Agent (the "Remarketing Agent") for the Bonds, and the Remarketing Agent hereby accepts such appointment and agrees to perform the duties and obligations imposed upon it as Remarketing Agent under the Indenture and hereunder, including, without limitation, the duties and obligations to take such actions and enter into such documents as may be necessary to effectuate a direction given pursuant to Section 201(j) of the Indenture, and agrees to use its best efforts to offer for sale and to sell the Bonds which it has been advised by The Bank of New York Mellon Trust Company, N.A., as tender agent (the "Tender Agent"), have been tendered pursuant to and in accordance with the Indenture.

2. Fees and Expenses. The Company shall pay the Remarketing Agent, as compensation for its services hereunder, a fee equal to 0.07% per annum of the weighted average principal amount of the Bonds outstanding during each three month period that the Bonds bear interest at a Daily Interest Rate, a Weekly Interest Rate (as defined in the Indenture) or a Commercial Paper Term Rate (as defined in the Indenture), payable quarterly on each January 1, April 1, July 1 and October 1, commencing July 1, 2015. The parties expect other arrangements to be made in the event that the Bonds are adjusted to bear interest at a Long-Term Interest Rate (as defined in the Indenture) or to an alternate interest rate established in accordance with Section 201(j) of the Indenture. The Remarketing Agent will not be entitled to compensation after this Agreement shall be terminated or after the term of appointment of the Remarketing Agent shall have expired except for a pro rata portion of the fee in respect of the period in which such termination or expiration occurs. The Trustee shall have no responsibility, obligation or liability with respect to any payment hereunder.

3. Disclosure Document. If the Remarketing Agent determines that it is necessary or desirable to use a disclosure document in connection with the remarketing of the Bonds, the Remarketing Agent will notify the Company of such determination. If the Remarketing Agent or the Company determines that it is necessary or desirable to use a disclosure document in connection with the remarketing of the Bonds, the Company will provide

the Remarketing Agent with a disclosure document satisfactory to the Remarketing Agent and its counsel in respect of the Bonds. The Company will supply the Remarketing Agent with such number of copies of the disclosure document as the Remarketing Agent reasonably requests from time to time. The Company will supplement and amend the disclosure document (which may include the Official Statement distributed in connection with the initial sale of the Bonds (the "Official Statement")) so that at all times the document will not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements in the disclosure document, in the light of the circumstances under which they were made, not misleading.

4. Indemnification. The Company agrees to indemnify and hold harmless the Remarketing Agent and any member, officer, official or employee of the Remarketing Agent, and each person, if any, who controls the Remarketing Agent, within the meaning of Section 15 of the Securities Act of 1933, as amended (the "Act") (collectively called the "Indemnified Parties"), against any and all losses, claims, damages or liabilities to which they or any of them may become subject and to reimburse each of them for any legal or other expenses (including, to the extent hereinafter provided, reasonable counsel fees) when and as incurred by them in connection with investigating any such losses, claims, damages or liabilities or in connection with defending any actions, insofar as such losses, claims, damages, liabilities, expenses or actions arise out of or are based upon any untrue statement or alleged untrue statement of a material fact contained in the disclosure document referred to in Section 3 hereof or the alleged omission from the disclosure document referred to in Section 3 hereof of any material fact relating to the Projects (as defined in the Indenture) or the Company necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading; provided, however, that the Company will not be liable in any such case to the extent that any such loss, claim, damage, liability, expense or action arises out of or is based upon an untrue statement or alleged untrue statement or alleged omission made in any of such documents in reliance upon and in conformity with written information furnished to the Company by the Remarketing Agent specifically for use therein. This indemnity agreement is in addition to any liability which the Company may otherwise have. In case any action shall be brought against one or more of the Indemnified Parties based upon the disclosure document referred to in Section 3 hereof and in respect of which indemnity may be sought against the Company, the Indemnified Parties shall promptly give written notice to the Company, but the omission so to notify the Company of any action shall not relieve the Company from any liability that it may have to the Indemnified Party otherwise than on account of this indemnity agreement. In case such notice of any action shall be so given, the Company shall be entitled to participate at its own expense in the defense or, if it so elects, to assume the defense of such action, in which event such defense shall be conducted by counsel chosen by the Company and satisfactory to the Indemnified Party or Indemnified Parties who shall be defendant or defendants in such action, and such defendant or defendants shall bear the fees and expenses of any additional counsel retained by them; but if the Company shall elect not to assume the defense of such action, the Company will reimburse such Indemnified Party or Indemnified Parties for the reasonable fees and expenses of any counsel retained by them; provided, however, that if the defendants in any such action include both an Indemnified Party and the Company, and counsel for the Company shall have reasonably concluded that there may be a conflict of interest involved in the representation by such counsel of both the Company and any Indemnified Party, the Indemnified Parties shall have the right to select separate counsel, satisfactory to the Company, to participate in the defense of such action

on behalf of such Indemnified Parties at the expense of the Company (it being understood, however, that the Company shall not be liable for the expenses of more than one separate counsel representing the Indemnified Party or Indemnified Parties who are parties to such action). The Company shall not be liable for any settlement of any such action effected without its consent, but if settled with the consent of the Company or if there be a final judgment for the plaintiff in any such action with or without consent, the Company agrees to indemnify and hold harmless the Indemnified Parties from and against any loss or liability by reason of such settlement or judgment.

5. Remarketing Agent's Liabilities. The Remarketing Agent shall incur no liability to the Company or to any other party for its actions as Remarketing Agent pursuant to the terms hereof and of the Indenture except for its negligence or willful misconduct and except as otherwise specifically provided herein. The Remarketing Agent will not be liable to the Company on account of the failure of any person to whom the Remarketing Agent has sold a Bond to pay for it or to deliver any document in respect of such sale. The undertaking of the Remarketing Agent to remarket any Bonds pursuant to the Indenture shall be on a "best efforts" basis.

6. Resignation or Removal and Expiration of Term of Appointment of Remarketing Agent. The Company may remove the Remarketing Agent at any time by giving at least 5 business days' notice to the Remarketing Agent, the Issuer and the Trustee. The Remarketing Agent may at any time resign and be discharged of the duties and obligations created by this Agreement by giving at least 45 calendar days' notice to the Company, the Issuer, the Tender Agent and the Trustee. The term of appointment of the Remarketing Agent shall expire upon each adjustment of the interest rate determination method for the Bonds pursuant to the Indenture; provided, however, that if the Company appoints the Remarketing Agent as the successor Remarketing Agent with respect to such new interest rate determination method, then this Agreement shall, at the option of the Company, remain in full force and effect without necessity of supplement or amendment and the Remarketing Agent shall be deemed to accept its appointment as successor Remarketing Agent as of the date of conversion to such new interest rate determination method. The provisions of Sections 4 and 5 will continue in effect as to transactions prior to the date of termination or expiration, and each party will pay the other any amounts owing at the time of termination or expiration.

7. Suspension. The Remarketing Agent may suspend its remarketing obligations under this Agreement at any time that any of the following circumstances shall have occurred and be continuing and, in the reasonable judgment of the Remarketing Agent, render it impracticable for the Remarketing Agent to perform its obligations under this Agreement:

(i) Any event shall have occurred, or information shall have become known, which, in the Remarketing Agent's reasonable opinion, makes untrue, incorrect or misleading in any material respect any statement or information contained in the disclosure document referred to in Section 3 hereof, as the information contained therein may have been supplemented or amended by the other information furnished to the Remarketing Agent in accordance with the terms and provisions contained herein, or causes such disclosure document, as so supplemented or amended, to contain an untrue, incorrect or misleading statement of a

material fact required to be stated therein or necessary to make the statements therein, in light of the circumstances under which they were made, not misleading;

(ii) There shall have occurred any general suspension of trading in securities on the New York Stock Exchange;

(iii) There shall have occurred a general banking moratorium declared by New York or Federal authorities;

(iv) There shall have occurred any new outbreak of hostilities including, but not limited to, an escalation of hostilities which existed prior to the date of this Agreement or other national or international calamity or crisis;

(v) There shall have occurred a material adverse change in the financial markets of the United States;

(vi) For any reason, a change in applicable tax laws or securities laws would require registration under the Act in connection with the remarketing of the Bonds; or

(vii) There shall have occurred a material adverse change in the financial condition of the Company and its subsidiaries taken as a whole, which material adverse change, in the Remarketing Agent's reasonable judgment, materially adversely affects the marketability of the Bonds (such right to be exercised by the Remarketing Agent in good faith).

In the event of any suspension pursuant to this paragraph, the Remarketing Agent declaring such suspension shall notify the Company thereof as soon as reasonably practicable in accordance with Section 14 hereof. Notwithstanding the declaration of suspension by the Remarketing Agent, the Remarketing Agent shall continue to determine and give notice of the interest rate on the Bonds as provided in the Indenture. Notwithstanding any provisions in this Agreement to the contrary, upon the declaration of suspension by the Remarketing Agent, the Company, upon approval by the Issuer and upon notification in writing to the Remarketing Agent, may immediately remove the Remarketing Agent

8. Dealing in Securities by Remarketing Agent. The Remarketing Agent, in its individual capacity, either as principal or agent, may in its sole discretion, buy, sell, own, hold and deal in any of the Bonds, and may join in any action which any bondholder may be entitled to take with like effect as if it did not act in any capacity hereunder. The Remarketing Agent, in its individual capacity, either as principal or agent, may also engage in or be interested in any financial or other transaction with the Company and may act as depositary, trustee or agent for any committee or body of bondholders with respect to other obligations of the Company, as freely as if it did not act in any capacity hereunder. The Company acknowledges that the Remarketing Agent is a full service firm that, together with its affiliates, is engaged in securities trading and brokerage activities and provides investment banking, financing and financial advisory services. In the ordinary course of its trading, brokerage and financing activities, the Remarketing Agent (and/or its affiliates) may at any time hold long or short positions, and may trade or otherwise effect transactions, for their own accounts or the accounts of customers, in debt or equity securities or financial instruments (including bank loans and other obligations) of the Company.

9. Remarketing Agent's Performance.

(i) The duties and obligations of the Remarketing Agent as Remarketing Agent shall be determined solely by the express provisions of this Agreement, the Indenture and the Tender Agreement by and among the Trustee, the Borrower and the Underwriter, dated June 1, 2015 (the "Tender Agreement"). The Remarketing Agent as Remarketing Agent shall not be responsible for the performance of any duties or obligations other than as are specifically set forth in this Agreement, the Indenture, and the Tender Agreement and no implied covenants or obligations shall be read into this Agreement or the Indenture against the Remarketing Agent.

(ii) The Remarketing Agent may conclusively rely upon any notice or document given or furnished to the Remarketing Agent and conforming to the requirements of this Agreement, the Indenture or the Tender Agreement and shall be protected in acting upon any such notice or document reasonably believed by it to be genuine and to have been given, signed or presented by the proper party or parties.

10. Compliance with MSRB Rule 34(c) and Agreement to Provide Liquidity Documents.

(i) In connection with its services under this Agreement, the Remarketing Agent will be required to comply with Rule G-34(c) ("Rule G-34(c)") of the Municipal Securities Rulemaking Board. Rule G-34(c) and related MSRB guidance requires the Remarketing Agent to submit to the MSRB's Short-term Obligation Rate Transparency System (the "SHORT System"):

(a) certain information with respect to each interest rate determination for variable rate demand obligations; and

(b) current copies of (A) the Indenture, (B) the Loan Agreement, (C) any other document that establishes an obligation to provide liquidity for variable rate demand obligations, and (D) those documents that include provisions detailing critical aspects of the liquidity provisions for variable rate demand obligations, including, but not limited to, (1) the notice period for bondholder tenders and (2) the term out (amortization) period for variable rate demand obligations held by the liquidity provider; ((A) through (D), collectively, the "Liquidity Documents").

(ii) In order to assist the Remarketing Agent to comply with its obligations under Rule G-34(c), the Company shall provide the Remarketing Agent, in the form of a word-searchable PDF file or in such other form as the Remarketing Agent shall notify the Company in writing as required by the MSRB, the following documents at the following times:

(a) A copy of the executed Liquidity Documents;

(b) No later than ten business days prior to the proposed date of any amendment, including an extension or renewal of the expiration date, or replacement or termination of the then current Liquidity Documents, written

notice that the current Liquidity Documents are proposed to be amended, extended, renewed, replaced or terminated and the expected date of execution and delivery of the amendment, extension, renewal, replacement or termination of the Liquidity Documents;

(c) Within one business day after the execution and delivery of any amendment, including any renewal, extension, replacement or termination of the then current Liquidity Documents, a copy of the executed amendment, renewal, extension, replacement or termination thereof; and

(d) No later than ten business days after receiving a request from the Remarketing Agent for any document relating to the liquidity supporting the Bonds, such document requested by the Remarketing Agent relating to the liquidity supporting the Bonds.

(iii) The Company agrees with the Remarketing Agent as follows:

(a) the Remarketing Agent will not redact any information in the Liquidity Documents that the Company provides to the Remarketing Agent, and will have no liability to the Company or any other party for any disclosure of confidential or sensitive information resulting from its compliance with Rule G-34(c);

(b) all Liquidity Documents and information filed by the Remarketing Agent pursuant to the requirements of Rule G-34(c) will be publicly available on the SHORT System, in the form such Liquidity Documents and information is provided to the Remarketing Agent; and

(c) in the event the Company does not provide the Remarketing Agent with a copy of a document described in this Section 10, the Company acknowledges that the Remarketing Agent may file a notice with the SHORT System that such document will not be provided at such time as is specified by the MSRB and in the SHORT System users' manual.

(iv) The Remarketing Agent acknowledges and agrees that pursuant to Rule G-34 and MSRB Notice 2011-17, the Company has the right to redact certain information that may be contained in a Liquidity Document. The Company represents and warrants that any Liquidity Document that is redacted by the Company and provided to the Remarketing Agent pursuant to this Section of the Agreement shall be redacted in a manner that is not inconsistent with MSRB Notice 2011-17.

(v) The Company shall pay or reimburse the Remarketing Agent for all reasonable charges and expenses incurred in obtaining the documents required to be filed pursuant to Rule G-34(c).

(vi) In the event additional legal or regulatory requirements are imposed on the Remarketing Agent's performance of its obligations under this Agreement, the Company agrees to cooperate with the Remarketing Agent and shall provide such documents and

take such other steps as may be reasonably requested by the Remarketing Agent in order to comply with such additional requirements.

11. No Advisory or Fiduciary Role. The Company acknowledges and agrees that: (i) the transaction contemplated by this Agreement is an arm's length, commercial transaction between the Company and the Remarketing Agent in which the Remarketing Agent is acting solely as a principal and is not acting as a "municipal advisor" (as defined in Section 15B of the Exchange Act), financial advisor or fiduciary to the Company; (ii) the Remarketing Agent has not assumed any advisory or fiduciary responsibility to the Company with respect to the transaction contemplated hereby and the discussions, undertakings and procedures leading thereto (irrespective of whether the Remarketing Agent or its affiliates have provided other services or is currently providing other services to the Company on other matters); (iii) the only obligations the Remarketing Agent has to the Company with respect to the transaction contemplated hereby expressly are set forth in this Agreement; and (iv) the Company has consulted its own legal, accounting, tax, financial and other advisors, as applicable, to the extent it has deemed appropriate. The Company agrees that it will not claim that the Remarketing Agent is a "municipal advisor" within the meaning of Section 15B of the Exchange Act, or owes a fiduciary or similar duty to the Company in connection with the transaction contemplated by this Agreement or the process leading thereto.

12. Intention of Parties. It is the express intention of the parties hereto that no purchase, sale or transfer of any Bonds, as herein provided, shall constitute or be construed to be the extinguishment of any Bond or the indebtedness represented thereby or the reissuance of any Bond or the refunding of any indebtedness represented thereby.

13. Compliance with Indenture and Tender Agreement. The Remarketing Agent represents that it is qualified to act as Remarketing Agent and agrees to abide by all of the provisions of the Indenture and the Tender Agreement, insofar as they govern its activities as Remarketing Agent for the Bonds. In particular, the Remarketing Agent (in its capacity as Remarketing Agent) hereby agrees to keep such books and records as shall be consistent with prudent industry practice and will make such books and records available for inspection by the Issuer, the Trustee, the Tender Agent and the Company at all reasonable times.

14. Notices. Unless otherwise provided, all notices, requests, demands and formal actions hereunder shall be in writing and mailed or delivered, as follows:

If to the Company:

Florida Power & Light Company
700 Universe Boulevard
Juno Beach, Florida 33408
Attention: Treasurer

If to the Trustee:

The Bank of New York Mellon Trust Company, N.A.
10161 Centurion Parkway

Jacksonville, Florida 32256
Attention: Corporate Trust Department

If to the Issuer:

Broward County, Florida
115 South Andrews Avenue
Fort Lauderdale, Florida 33301
Attention: Clerk of the Board of County Commissioners

If to the Tender Agent:

The Bank of New York Mellon Trust Company, N.A.
10161 Centurion Parkway
Jacksonville, Florida 32256
Attention: Corporate Trust Department

If to the Remarketing Agent, at its Principal Office, as defined in the Indenture, which is:

Morgan Stanley & Co. LLC
1585 Broadway
New York, New York 10036
Attention: Municipal Short Term Products

Each of the above parties may, by written notice given hereunder to the others, designate any further or different addresses to which subsequent notices, certificates, requests, or other communications shall be sent. In addition, the parties hereto may agree to any other means by which subsequent notices, certificates, requests or other communications may be sent.

15. Governing Law. This Agreement will be governed by and construed in accordance with the laws of the State of New York.

Tender Agreement, dated as of June 1, 2015, with respect to the Broward County Series 2015 Bonds.

TENDER AGREEMENT

among

THE BANK OF NEW YORK MELLON TRUST COMPANY, N.A.,
as Trustee, Tender Agent and Registrar

and

FLORIDA POWER & LIGHT COMPANY

and

MORGAN STANLEY & CO. LLC
as Remarketing Agent

Dated as of June 1, 2015

$85,000,000
Broward County, Florida
Industrial Development Revenue Bonds
(Florida Power & Light Company Project)
Series 2015

TENDER AGREEMENT

This TENDER AGREEMENT, dated as of June 1, 2015, is among THE BANK OF NEW YORK MELLON TRUST COMPANY, N.A., as Trustee, Tender Agent and Registrar (in such respective capacities, the "Trustee", the "Tender Agent" and the "Registrar"); FLORIDA POWER & LIGHT COMPANY (the "Company"); and MORGAN STANLEY & CO. LLC as Remarketing Agent (the "Remarketing Agent"); or the permitted successors and assigns of any of the foregoing;

WHEREAS, Broward County, Florida (the "Issuer") proposes to issue its Industrial Development Revenue Bonds (Florida Power & Light Company Project), Series 2015 (the "Bonds"), in the aggregate principal amount of $85,000,000 pursuant to the Trust Indenture dated as of June 1, 2015 (the "Indenture") from the Issuer to the Trustee; and

WHEREAS, the Company has appointed The Bank of New York Mellon Trust Company, N.A., as Tender Agent and Registrar, and The Bank of New York Mellon Trust Company, N.A. has accepted such appointment and agreed to perform the duties and obligations imposed on it as Tender Agent and Registrar under the Indenture; and

WHEREAS, the Bonds and the Indenture provide, among other things, that the Bonds may be tendered for purchase from time to time by the Owners thereof at their option and that the Bonds shall be tendered for purchase from time to time by the Owners thereof upon the occurrence of certain events, in accordance with the provisions of the Bonds and the Indenture; and

WHEREAS, pursuant to the terms of the Indenture, the Remarketing Agent has agreed to use its best efforts to remarket any Bond tendered for purchase;

NOW, THEREFORE, in consideration of the premises and in order to provide for the coordination of said arrangements, the parties hereby agree as follows:

Section 1. Defined Terms. Capitalized terms used in this Agreement and not defined herein shall have the meanings assigned to them in the Indenture.

Section 2. Qualification of Tender Agent and Registrar. The Tender Agent and Registrar hereby represents that it is qualified to serve as Tender Agent under the requirements of Section 1402(b) of the Indenture and as Registrar under the requirements of Section 920 of the Indenture.

Section 3. Establishment of Purchase Fund.

(a) In accordance with Section 1401(b)(ii) of the Indenture, there is hereby established with the Tender Agent a separate segregated trust fund designated the "Broward County, Florida Industrial Development Revenue Bonds (Florida Power & Light Company Project), Series 2015 Purchase Fund" (the "Purchase Fund"). In accordance with Section 1401(b)(ii) of the Indenture, there are also hereby established two separate accounts in such Purchase Fund to be designated respectively the "Remarketing Account" and the "Company

Moneys Account." The Tender Agent may establish one or more additional accounts in the Purchase Fund for such purposes as the Tender Agent determines to be necessary including, but not limited to, an account for the deposit of moneys held for the Owners of Undelivered Bonds.

(b) All moneys received by the Tender Agent pursuant to Section 1403(b)(i) or (iii) of the Indenture shall be deposited in the Company Moneys Account of the Purchase Fund and held in trust until paid for the purchase of Bonds in accordance with the provisions of Section 1403 of the Indenture.

(c) All moneys received by the Tender Agent from the Remarketing Agent on behalf of purchasers of Bonds pursuant to Section 1403(b)(ii) of the Indenture on account of remarketed Bonds shall be deposited in the Remarketing Account of the Purchase Fund and held in trust until paid for the purchase of Bonds in accordance with the provisions of Section 1403 of the Indenture.

Section 4. Deposit of Bonds. The Tender Agent agrees to accept and hold all Bonds delivered to it for purchase pursuant to the Indenture as agent and bailee of, and in escrow for the benefit of the respective Owners which shall have so delivered such Bonds until moneys representing the purchase price of such Bonds shall have been delivered to or for the account of or to the order of such Owners pursuant to the Indenture.

Section 5. Remarketing Mechanics for Bonds.

(a) Daily Interest Rate Period. (i) Not later than 11:00 a.m. (New York City time) on each Business Day, the Tender Agent shall give electronic notice to the Remarketing Agent, the Trustee and the Company of each notice from an Owner pursuant to Section 202(a) of the Indenture that the Tender Agent has received on such Business Day (or during the immediately preceding Business Day if received after 10:30 a.m. on such preceding Business Day). Such electronic notice by the Tender Agent shall specify the principal amount of the Bonds for which it has received such notice (the "Daily Put Bonds"), the names of the Owners thereof, if any of such Owners shall have provided instructions to the Tender Agent regarding the payment or purchase of its Bonds (the "Standing Payment Instructions") and any requested change therein and the date specified as the date such Bonds are to be purchased (each such date, and any other date on which Bonds are to be purchased under the Indenture, is referred to herein as a "Tender Purchase Date"); provided that, if the Tender Purchase Date is a date other than the Business Day on which notice is received from an Owner, the Tender Agent shall specify the purchase price for such Bonds not later than 11:00 a.m. (New York City time) on such Tender Purchase Date.

(ii) Not later than 11:45 a.m. (New York City time) on the Tender Purchase Date with respect to all Daily Put Bonds, the Tender Agent shall electronically confirm with the Trustee the aggregate amount of the interest payable as of the Tender Purchase Date on such Daily Put Bonds. Not later than 12:30 p.m. (New York City time) on any such Tender Purchase Date the Remarketing Agent shall give electronic notice to the Tender Agent and the Registrar of (A) the principal amount of Daily Put Bonds which have been remarketed in accordance with the Indenture and the portion of the purchase price thereof which shall be deposited in the

Remarketing Account of the Purchase Fund on such Tender Purchase Date by the Remarketing Agent on behalf of the purchasers (the "New Purchasers") of the Daily Put Bonds, stating that such amount paid as such purchase price is then held by the Remarketing Agent for transfer to the Tender Agent and deposit into the Remarketing Account, and (B) the name, address, taxpayer identification number of the New Purchasers (such information is hereinafter referred to as "New Registration Information") necessary for the Registrar to prepare replacement certificates for the New Purchasers and any requested Standing Payment Instructions from such New Purchasers. The Remarketing Agent shall deliver to the Tender Agent for deposit into the Remarketing Account of the Purchase Fund in immediately available funds on such Tender Purchase Date such amount paid as such purchase price by or on behalf of the New Purchasers.

(iii) If the Remarketing Agent has been unable to remarket all Daily Put Bonds on such Tender Purchase Date, not later than 12:30 p.m. (New York City time) on such Tender Purchase Date the Remarketing Agent shall give electronic notice to the Company, the Trustee and the Tender Agent that it has been unable to remarket all such Daily Put Bonds, specifying the aggregate purchase price of the portion not remarketed.

(iv) If the Remarketing Agent has not advised the Tender Agent, in accordance with subsection (ii) above, that it is then holding moneys for transfer to the Tender Agent and deposit into the Remarketing Account, or upon receipt from the Remarketing Agent of the notice described in subsection (iii) above, and unless sufficient moneys are then on deposit in the Company Moneys Account of the Purchase Fund to pay the purchase price of all Daily Put Bonds, if the Tender Agent has neither received the advice referred to in subsection (ii) above or the purchase price of the Daily Put Bonds specified in the electronic notice from the Remarketing Agent described in subsection (iii) above, the Tender Agent shall immediately demand payment from the Company electronically of the amount necessary to provide sufficient moneys on the Tender Purchase Date to pay the purchase price of such Daily Put Bonds. The Company shall deliver, or cause to be delivered, to the Tender Agent for deposit into the Company Moneys Account of the Purchase Fund in immediately available funds on such Tender Purchase Date the amount so demanded.

(b) Weekly Interest Rate Period. (i) Not later than 10:30 a.m. (New York City time) on each Business Day succeeding a day on which the Tender Agent receives a notice from an Owner pursuant to Section 202(b) of the Indenture, the Tender Agent shall give electronic notice to the Remarketing Agent and the Company, specifying the principal amount of the Bonds for which it has received such notice (the "Weekly Put Bonds"), the Tender Purchase Date for such Weekly Put Bonds and the names of the Owners thereof and, if any of such Owners shall have Standing Payment Instructions, any requested changes therein.

(ii) Not later than 11:00 a.m. (New York City time) on the Tender Purchase Date, the Remarketing Agent shall give electronic notice to the Tender Agent and the Registrar of (A) the principal amount of Weekly Put Bonds which have been remarketed in accordance with the Indenture and the portion of the purchase price thereof which shall be deposited in the Remarketing Account of the Purchase Fund on the Tender Purchase Date by the Remarketing Agent on behalf of the New Purchasers of such Weekly Put Bonds, stating that such amount paid as such purchase price is then held by the Remarketing Agent (or to be held by the Remarketing

Agent on the Tender Purchase Date) for transfer to the Tender Agent and deposit into the Remarketing Account, and (B) the New Registration Information and any Standing Payment Instructions for the New Purchasers. The Remarketing Agent shall deliver to the Tender Agent for deposit into the Remarketing Account of the Purchase Fund in immediately available funds on such Tender Purchase Date such amount paid as such purchase price by or on behalf of the New Purchasers.

(iii) If the Remarketing Agent has been unable to remarket all Weekly Put Bonds for delivery on such Tender Purchase Date, not later than 11:00 a.m. (New York City time) on the Tender Purchase Date the Remarketing Agent shall give electronic notice to the Company, the Trustee and the Tender Agent that it has been unable to remarket all such Weekly Put Bonds, specifying the aggregate purchase price of the portion not remarketed.

(iv) If the Remarketing Agent has not advised the Tender Agent, in accordance with subsection (ii) above, that it is then holding moneys for transfer to the Tender Agent and deposit into the Remarketing Account, or upon receipt from the Remarketing Agent of the notice described in subsection (iii) above, and unless sufficient moneys are then on deposit in the Company Moneys Account of the Purchase Fund to pay the purchase price of all Weekly Put Bonds, if the Tender Agent has neither received the advice referred to in subsection (ii) above or the purchase price of the Weekly Put Bonds specified in the notice from the Remarketing Agent described in subsection (iii) above, the Tender Agent shall immediately demand payment from the Company electronically of the amount necessary to provide sufficient moneys on the Tender Purchase Date to pay the purchase price of such Weekly Put Bonds. The Company shall deliver, or cause to be delivered, to the Tender Agent for deposit into the Company Moneys Account of the Purchase Fund in immediately available funds on such Tender Purchase Date the amount so demanded.

(c) Mandatory Tenders for Purchase on First Day of Each Interest Rate Period.

(i) Not later than 10:30 a.m. (New York City time) on the Business Day succeeding the date of mailing of any notice of mandatory tender for purchase sent to Owners of the Bonds in accordance with the Indenture, the Tender Agent shall give electronic notice to the Trustee, the Company, and the Remarketing Agent specifying the principal amount (together with any premium, if applicable) of Bonds subject to mandatory tender for purchase (the "Mandatory Put Bonds"), the Tender Purchase Date for such Mandatory Put Bonds and the names of the Owners thereof and, if any of such Owners shall have Standing Payment Instructions, any requested changes therein.

(ii) Not later than 12:30 p.m. (New York City time) on any such Tender Purchase Date, the Remarketing Agent shall give electronic notice to the Tender Agent and the Registrar of (A) the principal amount of Mandatory Put Bonds which have been remarketed in accordance with the Indenture and the portion of the purchase price thereof which shall be deposited in the Remarketing Account of the Purchase Fund on the Tender Purchase Date by the Remarketing Agent on behalf of the New Purchasers of such Mandatory Put Bonds stating that such amount paid as such purchase price is then held by the Remarketing Agent for transfer to the Tender Agent and deposit into the Remarketing Account, and (B) the New Registration

Information and any Standing Payment Instructions for the New Purchasers. The Remarketing Agent shall deliver to the Tender Agent for deposit into the Remarketing Account of the Purchase Fund in immediately available funds on such Tender Purchase Date such amount paid as such purchase price by or on behalf of the New Purchasers.

(iii) If the Remarketing Agent has been unable to remarket all Mandatory Put Bonds for delivery on such Tender Purchase Date, not later than 12:30 p.m. (New York City time) on such Tender Purchase Date, the Remarketing Agent shall give electronic notice to the Company, the Trustee and the Tender Agent that it has been unable to remarket all such Mandatory Put Bonds, specifying the aggregate purchase price of the portion not remarketed.

(iv) If the Remarketing Agent has not advised the Tender Agent, in accordance with subsection (ii) above, that it is then holding moneys for transfer to the Tender Agent and deposit into the Remarketing Account, or upon receipt from the Remarketing Agent of the notice described in subsection (iii) above, and unless sufficient moneys are then on deposit in the Company Moneys Account of the Purchase Fund to pay the purchase price of all Mandatory Put Bonds, if the Tender Agent has neither received the advice referred to in subsection (ii) above or the purchase price of the Mandatory Put Bonds specified in the notice from the Remarketing Agent described in subsection (iii) above, the Tender Agent shall immediately demand payment from the Company electronically of the amount necessary to provide sufficient moneys on the Tender Purchase Date to pay the purchase price of such Mandatory Put Bonds. The Company shall deliver, or cause to be delivered, to the Tender Agent for deposit into the Company Moneys Account of the Purchase Fund in immediately available funds on such Tender Purchase Date the amount so demanded.

(d) Mandatory Tender for Purchase on Day Next Succeeding the Last Day of Each Commercial Paper Term.

(i) Not later than 10:15 a.m. (New York City time) on the day next succeeding the last day of any Commercial Paper Term (the "CP Date") with respect to a Bond, unless such day is the first day of a new Interest Rate Period (in which event Section 5(c) hereof shall be applicable), the Tender Agent shall give electronic notice to the Remarketing Agent and the Company, specifying the principal amount of each Bond then bearing interest at a Commercial Paper Term Rate, and to which such CP Date relates, the principal amount of such Bonds to be purchased on such CP Date (the "CP Put Bonds"), and the names of the Owners of the CP Put Bonds and, if any of such Owners shall have Standing Payment Instructions, any requested changes therein.

(ii) Not later than 12:30 p.m. (New York City time) on each CP Date, the Remarketing Agent shall give electronic notice to the Tender Agent and the Registrar of (A) the principal amount of CP Put Bonds which have been remarketed in accordance with the Indenture and the portion of the purchase price thereof which shall be deposited in the Remarketing Account of the Purchase Fund by the Remarketing Agent on behalf of the New Purchasers of the CP Put Bonds stating that such amount paid as such purchase price is then held by the Remarketing Agent for transfer to the Tender Agent and deposit into the Remarketing Account, and (B) the New Registration Information and any Standing Payment Instructions for the New

Purchasers and the Commercial Paper Term and the Commercial Paper Term Rate for each CP Put Bond so remarketed. The Remarketing Agent shall deliver to the Tender Agent for deposit into the Remarketing Account of the Purchase Fund in immediately available funds on such CP Date such amount paid as such purchase price by or on behalf of the New Purchasers.

(iii) If the Remarketing Agent has been unable to remarket all CP Put Bonds on such CP Date, not later than 12:30 p.m. (New York City time) on such CP Date the Remarketing Agent shall give electronic notice to the Company, the Trustee and the Tender Agent that it has been unable to remarket all such CP Put Bonds, specifying the aggregate purchase price of the portion not remarketed.

(iv) If the Remarketing Agent has not advised the Tender Agent, in accordance with subsection (ii) above, that it is then holding moneys for transfer to the Tender Agent and deposit into the Remarketing Account, or upon receipt from the Remarketing Agent of the notice described in subsection (iii) above, and unless sufficient moneys are then on deposit in the Company Moneys Account of the Purchase Fund to pay the purchase price of all CP Put Bonds, if the Tender Agent has neither received the advice referred to in subsection (ii) above or the purchase price of the CP Put Bonds specified in the notice from the Remarketing Agent described in subsection (iii) above, the Tender Agent shall immediately demand payment from the Company electronically of the amount necessary to provide sufficient moneys on the CP Date to pay the purchase price of such CP Put Bonds. The Company shall deliver, or cause to be delivered, to the Tender Agent for deposit into the Company Moneys Account of the Purchase Fund in immediately available funds on such CP Date the amount so demanded.

Section 6. DTC Procedures. The parties hereto acknowledge that, as provided in the Indenture, the Bonds will on the date of issuance thereof be deposited into the book-entry-only system maintained by The Depository Trust Company ("DTC") and while so deposited shall be registered as a single bond in the name of DTC's nominee, Cede & Co. The Tender Agent and the Registrar agree that, so long as the Bonds are held by DTC in its book-entry-only system, tenders of Bonds shall be accomplished in accordance with DTC's Delivery Order Procedures and the Tender Agent shall accept notices of tender in the form set forth as Exhibit B to the Indenture.

Section 7. Undelivered Bonds. The Tender Agent shall, as to any Undelivered Bonds, (i) notify the Remarketing Agent of the existence thereof and (ii) direct the Registrar to place a stop transfer against such Undelivered Bonds. Upon the delivery of such Undelivered Bond, the Tender Agent shall direct the Registrar to release any such stop transfer.

Section 8. Delivery of Bonds. A principal amount of Bonds equal to the principal amount of Bonds purchased by New Purchasers shall be delivered by the Registrar to the Tender Agent, registered in the names of the New Purchasers. Such Bonds shall be held available at the office of the Tender Agent to be picked up by the Remarketing Agent at or after 2:00 p.m. (New York City time) (5:00 p.m., New York City time, in connection with any remarketing of Bonds described in Section 5(c) hereof in connection with an adjustment to a Long-Term Interest Rate Period) on the Tender Purchase Date or CP Date, as the case may be, against delivery of funds for deposit into the Remarketing Account of the Purchase Fund equal to the purchase price of

such Bonds which have been remarketed. Bonds which have been purchased from moneys in the Company Moneys Account of the Purchase Fund shall be held or delivered as directed by the Company in accordance with Section 1407(c) of the Indenture.

Section 9. Notices. Any notices required to be given pursuant to this Agreement shall be sent to the address, telecopy or other electronic transmission number or address for notices, if any, filed with the Trustee at the date hereof or such address, telecopy or other electronic transmission number or address of any party hereto as such party shall have specified by written notice to each of the other parties.

Section 10. Governing Law. This Agreement shall be governed by and construed and interpreted in accordance with, the laws of the State of Florida.

Section 11. General.

(a) Payment of Tender Agent, Registrar and Trustee; Indemnification. The Company shall pay all reasonable fees, charges and out-of-pocket expenses of the Tender Agent, the Registrar and the Trustee (and their respective counsel) for acting under and pursuant to this Agreement or the Indenture. In addition, the Company shall indemnify and save harmless each of the Tender Agent, the Registrar and the Trustee and their respective officers and employees from and against any and all losses, costs, charges, expenses, judgments and liabilities arising out of claims made by third parties arising out of the transactions contemplated by this Agreement or the Indenture; provided, however, that such indemnification shall not apply to any such losses, costs, charges, expenses, judgments or liabilities caused by the gross negligence or willful misconduct of the party seeking such indemnity or of its officers or employees.

(b) Tender Agent's Performance. The Tender Agent shall perform only such duties as are specifically set forth in this Agreement or the Indenture. No provision of this Agreement or the Indenture shall require the Tender Agent to risk its own funds or otherwise incur any financial liability in the performance of its duties hereunder. No provision of this Agreement or the Indenture shall be construed to relieve the Tender Agent from liability resulting primarily from its own negligent action or its own negligent failure to act, except that:

(i) the duties and obligations of the Tender Agent shall be determined solely by the express provisions of this Agreement and the Indenture and the Tender Agent shall not be liable except for the performance of such duties and obligations as are specifically set forth in this Agreement and the Indenture, and no implied covenants or obligations shall be read into this Agreement or the Indenture against the Tender Agent, and the Tender Agent shall not be liable under this Agreement except for its gross negligence or willful misconduct; and

(ii) in the absence of bad faith on the part of the Tender Agent, the Tender Agent may conclusively rely, as to the truth of the statements therein, upon any telecopy or other electronically transmitted message or written certificate furnished to the Tender Agent which conforms to the requirements of this Agreement and the Indenture; and

(iii) the Tender Agent shall not be liable for any error of judgment made by a responsible officer or officers of the Tender Agent unless it shall be proved that the Tender Agent was grossly negligent in ascertaining the pertinent facts; and

(iv) the Tender Agent shall be entitled to the same exculpatory provisions as are set forth with respect to the Trustee in the Indenture.

(c) Payments. Any provisions of this Agreement or any statute to the contrary notwithstanding, the Tender Agent hereby waives any rights to, or liens for, its fees, charges and expenses for services hereunder from funds in the Purchase Fund. The Tender Agent agrees that it will be reimbursed and compensated for its fees, charges and expenses for acting under and pursuant to this Agreement only from payments to be made by the Company pursuant to Section 11(a) hereof.

(d) Term of Tender Agreement. Subject to the provisions of Section 1402(b) of the Indenture, this Agreement shall remain in full force and effect until such time as the principal of and premium, if any, and interest on all Bonds outstanding under the Indenture shall have been paid and all payments required under this Agreement shall have been made; provided, that if the Company and the Tender Agent shall have fulfilled all of their respective obligations hereunder, this Agreement shall terminate; provided further, that the obligations of the Company under Section 11(a) of this Agreement shall continue in full force and effect until such obligations shall have been satisfied.

(e) Resignation and Removal. The Tender Agent may resign from the performance of any of the duties hereunder upon at least 60 days' notice in accordance with Section 1402 of the Indenture. The Tender Agent may be removed as specified in Section 1402 of the Indenture. In the event of the resignation or removal of the Tender Agent, the Tender Agent shall pay over, assign and deliver any moneys and Bonds held by it in such capacity, and shall deliver all records relating thereto, to its successor or, if there be no successor, to the Trustee. However, such resigning or removed Tender Agent may retain copies of any records turned over for archival purposes. The delivery, transfer and assignment of such moneys, Bonds and documents by the Tender Agent to its successor or the Trustee, as the case may be, shall be sufficient, without the requirement of any additional act or the requirement of any indemnity to be given by the Tender Agent, to relieve the Tender Agent of all further responsibility for the exercise of the rights and the performance of the obligations vested in the Tender Agent pursuant to this Tender Agreement. Any termination or resignation hereunder shall not affect the Tender Agent's rights to the payment of fees earned or charges incurred through the effective date of such resignation or termination, as the case may be.

(f) Force Majeure. The Tender Agent shall not be liable for any failure or delays arising out of conditions beyond its reasonable control including, but not limited to, work stoppages, fires, civil disobedience, riots, rebellions, storms, electrical, mechanical, computer or communications facilities failures, acts of God and similar occurrences.

(g) Amendment of Indenture. The Company and the Trustee agree not to consent to any modification, change of or supplement to the Indenture which affects the rights or obligations of the Tender Agent without the Tender Agent's prior written consent.

(h) Successors and Assigns. The rights, duties and obligations of the Company, the Trustee, the Remarketing Agent, the Tender Agent and the Registrar hereunder shall inure, without further act, to their respective successors and permitted assigns; provided, however, that (i) the Tender Agent and the Registrar may not assign its respective obligations under this Agreement without the prior written consent of the Company, (ii) any successor or assignee of the Tender Agent must be authorized by law to perform the duties of the Tender Agent under the Indenture and (iii) no other party hereto may assign its respective obligations hereunder without the prior written consent of the Tender Agent.

(i) Counterparts. This Agreement may be executed in any number of counterparts each of which shall be an original, with the same effect as if the signatures thereto and hereto were upon the same instrument.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be duly executed and delivered by their respective officers or signatories thereunto duly authorized as of the date first above written.

Exhibit 5 (a)

(a)(i) See Exhibit 1(e), Pages 37 and 38 (as to Underwriter and fee) of the Official Statement with respect to the Broward County Series 2015 Bonds. (a)(ii) See Exhibit 3(b), cover page (as to fee) and Page S-19 (as to Underwriters) of the Prospectus Supplement with respect to the Mortgage Bonds.

Exhibit 5 (b)

Merrill Lynch, Pierce, Fenner & Smith Incorporated, SunTrust Robinson Humphrey, Inc., Citigroup Global Markets Inc. and Goldman, Sachs & Co. act as private placement agents and/or dealers with respect to the commercial paper in return for which they receive fees based on the differential between the bid and ask price for the commercial paper.

Commercial paper dealers' agreements, and the use of placement agents/dealers in public company commercial paper programs, are standard practice, and the fees charged are consistent with fees charged to companies of similar creditworthiness for commercial paper transactions. The services provided by the placement agents/dealers are described in Exhibits 4(f), 4(g), 4(h), 4(i), 4(j), 4(k), 4(l) and 4(m).
