DOCUMENT NO. 02485-16
FPSC - COMMISSION CLERK

BEFORE THE
FLORIDA PUBLIC SERVICE COMMISSION

In the Matter of:

DOCKET NO. 150269-WS

APPLICATION FOR LIMITED PROCEEDING WATER RATE INCREASE IN MARION, PASCO, AND SEMINOLE COUNTIES, BY UTILITIES, INC. OF FLORIDA.
_____/

PROCEEDINGS:	CUSTOMER MEETING
COMMISSION STAFF PARTICIPATING:	CURT MOURING JENNIFER CRAWFORD TOM BALLINGER DICK DURBIN
IN ATTENDANCE:	CHAIRMAN JULIE BROWN COMMISSIONER LISA POLAK EDGAR COMMISSIONER ART GRAHAN COMMISSIONER RONALD A. BRISÉ COMMISSIONER JIMMY PATRONIS
DATE:	Tuesday, April 12, 2016
TIME:	Commenced at 9:00 a.m. Concluded at 1:14 p.m.
PLACE:	Summertree Recreation Facility 12005 Paradise Point Way New Port Richey, Florida 34654
TRANSCRIBED BY:	LINDA BOLES, CRR, RPR Official FPSC Reporter (850) 413-6734

P R O C E E D I N G S

MR. MOURING: Okay. Thank you. First of all, I'd like to thank all of you for taking the time to come here this morning to share your comments with the Florida Public Service Commission staff regarding the Utilities, Inc. of Florida's request for a limited proceeding rate increase in Docket No. 150269-WS. Customer meetings are an important part of the proceeding to gather feedback from the customers.

I would like to start by introducing myself. My name is Curt Mouring from the Florida -- I'm the Public Utilities Supervisor in the Accounting and Finance Division at the Florida Public Service Commission. With me today I have Tom Ballinger, who's the Division Director of our Engineering Division, and I also have Jennifer Crawford, who is our -- an Attorney Supervisor in our General Counsel's Office.

Is this better?

(Affirmative response from audience.)

Okay. Let's do this then.

Also this morning we have -- I believe we have four Commissioners with us: Commissioner Brisé, Chairman Brown, Commissioner Edgar, and Commissioner Patronis.

UNIDENTIFIED SPEAKER: Can they stand up so we

know who they are?

COMMISSIONER EDGAR: Good morning.

CHAIRMAN BROWN: Good morning.

COMMISSIONER BRISÉ: Good morning.

COMMISSIONER PATRONIS: Good morning.

(Applause.)

MR. MOURING: They're all here because they're interested in hearing directly from you, the customers.

I would like to also mention that if you'd like to speak with the Commissioners, address the Commissioners during the decision-making process -- that's not where we are at this point, we're just gathering information and receiving comments -- if you'd like to address the Commissioners at the Agenda Conference in Tallahassee, that will be tentatively scheduled sometime in -- probably around the August time frame.

I also have a brief presentation. But before we go into that, I'm going to turn the microphone over to Commissioner Mariano for some brief comments.

(Applause.)

COMMISSIONER MARIANO: Thank you very much. And I'd like to start out by thanking the PSC Commissioners for coming forward to make the trip down here. We've taken trips up to see them. To see them

down here taking the interest in what's so important to everybody here for so many years, I greatly appreciate you coming down here to listen to the folks, because this is what's it's all about, it's the people. (Applause.)

I'd like to thank Senator Simpson for being here this morning, such a diligent fighter for the people every step of the way. Representative Corcoran -- Jared is here. I greatly appreciate those guys helping make things happen. (Applause.)

I'm asking to -- and, by the way, for the people here, thank you for coming out again, for taking the trips to Tallahassee to let these folks know in their decision-making process how bad your customer service has been, how much you want to see a resolution to this. Getting good water shouldn't be that hard, and going through this process to try to make it right is what we're going to try to do every step of the way, so getting your input is critical.

And I want to say the Water Alliance Committee that you have representing you has done an absolutely phenomenal job. Phenomenal. (Applause.) I've never seen a leadership that has come together listening to the people, bringing the message forward, trying to work with a utility that continually seems to

try to sabotage -- the latest one, with that letter that just went the night before -- to confuse everybody in here about what was really going on. Because we had done questionnaires ahead of time to get an appeal to people so that could be done. It was a dirty trick that shouldn't have happened, and I hope you really take a look at it as far as customer service goes. What they tried to do is actually muddy the waters for what everyone was thinking about in what should have been a really clear out, laid out situation that never should have happened. So, please, pay attention to that, how they do business.

So I am asking that the rate increases requested by Utilities, Inc. of Florida in this limited proceeding be denied. I have been a -- (applause) -- I've been a Pasco County Commissioner for these past 11 years, and I will tell you, through Utilities, I have seen the problems from before even being elected. It was one of my driving forces, in fact, to get in there to try to help serve the people every step of the way. So watching this go on all the way, I will tell you, you folks have been the best as far as getting organized, getting things done.

For the -- my constituents, they have suffered for years with poor water quality, a poor

quality of customer service provided to them by Utilities, Inc. of Florida. I have reviewed the history of Utilities, Inc., ownership of the Summertree and waste -- water and wastewater systems, including the Public Service Commission orders issued when Utilities, Inc. was first permitted to buy the system. You should know that the reason provided in support of Utilities, Inc. buying the system included poor water quality, operations, and service. That was in 1991, and Utilities, Inc. was tasked with the responsibility to fix those problems.

The PSC gave them a state of confidence that they had other systems in Florida, they could come forward and do so. And I will tell you, clearly the problems back in 1991 are identical to what's happened from all these years. Nothing good has happened to these folks every step of the way.

I have -- since 1990, Utilities, Inc. has had several owners. The most recent owner purchase was only a couple of years ago. So during all these rate increases, all these studies, we're going to try to make this situation right, bring them to the table, find a permanent solution, through all that time, another sale just happened. And, frankly, if there's a way to look at that sale, the County would have loved

to have come to the table and actually negotiate to buy the system then. That was never even provided to the County. It was just done and approved and it went forward. Had we had the opportunity, we could have stepped forward to buy that system. We never had the opportunity. (Applause.)

Within weeks when they purchased the system, the system then went through. Did they look at how they could reduce bonds? Did they look at how to improve service, to improve water quality, explore opportunities to maintain or even reduce rates? These inquiries never appeared. And, again, not even to look at is the best thing to sell to Pasco County? We're already providing the sewer system, which happened early. To us, it would have made the most sense to head up, which we'll talk about in just a second.

Particularly in the last few years the water quality has deteriorated and little has been done to correct this problem. But water rates and wastewater rates of the utility have been increased to the point that my constituents in Summertree are paying among the highest rates in the region for poor water quality and poor customer service.

The lack of consideration shown by Utilities, Inc. for its customers, thus demonstrated by the fact

that this utility chose to file a request for another significant increase in Summertree rates on December 30th of 2015, right between the holiday season. Happy New Year. The week between Christmas and other holidays is just the wrong time to do it. This, in my opinion, was a disreputable act, particularly given the fact that the utility is already collecting such high rates, but it appears to be a typical action of the utility.

I am forced to inquire why the Commission has never (phonetic) considered granting Utilities, Inc. a rate increase at this time when the utility has already notified the Commission that it was in the process of reorganizing itself. What were the principal end results of the reorganization? Should it be maybe to reduce costs and, thus, the ability to maintain the same or reduced rates being charged? If not, why would the utility even consider such a reorganization?

The utility was purchased in two parts back in 1990. The sewer part was for $20,000. Now they knew they had a bad system, so they knew they were going to do something to improve it. So instead of spending a fortune redoing the system, which didn't make sense, they then hooked up to the County. Smart move. They had to raise the rates to kind of help those levels. But while the County rates only increased minimally over

those years, the sewer rates climbed and climbed and climbed at much higher rates. I don't understand how that happens.

The water system was built in part -- was bought for 230,000. Now at that time, reading the order, there were four wells they had. One was collapsed, not working. The other one was loaded with iron. The other two wells they didn't really comment on, but from what I read, from having an expert come in and take a look at it, those experts took a look at the system and they found that for all these years they're pumping out of the high iron wells, not using the other wells better than they could have. But what they should have done at that point in time was probably do the same exact thing and interconnect to the County. And that's still the best situation. But instead, all they've done is just improve, improve their rates up and up and up, improved the value -- their perceived value of the system going all the way through. It hasn't been the right step every step of the way. But, again, 25 years later, still the same problems.

This -- the rate increase they have before you, one of the things they're actually reaching into is actually looking at -- these folks are trying to find a way to conserve water. Now all the years, doing all the

flushing that goes on because of the bad wells, all that flushing that goes on, that's spending and spending and spending, raising up the rates, no penalty. These people have to pay for it. But when they go find a way to conserve rates, what does Utilities, Inc. do? They go and try to grab all that money, that they had found lost revenue to try to get more money. It doesn't make sense.

I would just think that you would find it insulting to your intelligence after all the years of wasting resources by their own poor management, and part of their rate penalizes the Summertree residents by finding a way to conserve water. Every rate increase that's been granted has driven up the value. The investment has been minimal every step of the way. They don't treat the sewer, and now the best water solution is to connect to the County.

Chairman Brown, you and I sat on the committee to review the regulation of private water and wastewater utilities. Do you see any public purpose why they even have a right to have a certificate of authorization? Do we need that?

We, the people, don't need this company. We don't need the system. They don't provide water in the future is (phonetic) the best system. They don't

provide sewer. Why do we need this company? And with the poor quality of service these people have faced time and time again, it just doesn't make sense to me.

So, please, I say until the utility has completed its reorganization, filed an application at the Commission, the Office of Public Counsel, and all the customers of -- all of Utilities, Inc. (unintelligible). In addition, the announced proper reorganization -- given the fact that bonds should have reduced from both these events, it appears totally unfair to give the utility rate increases based upon the alleged decreases in (unintelligible) types of cost when they should be offsetting decreases in others.

We, the people of Summertree, in order to form a more perfect union -- community, actually -- (unintelligible) (laughter), you know, to deny this rate increase and go back to reduced rates at more reasonable levels. Thank you, folks, for coming, but, please, deny the rate increase. Thank you, folks, for coming. (Applause.) I've got to go to a board of county commission meeting, folks, but thank you very much. (Applause.)

MR. MOURING: All right. Also I'd like to point out -- I'm sorry -- I think I left off Commissioner Graham. He is also attending this meeting

here this morning.

So at this point, I'm going to go ahead and go through staff's brief presentation just to kind of explain a little bit about the utility's application, and then we'll open it up for comments.

So, again, we're here for the customer meeting in Docket No. 150269-WS. That's Utilities, Inc. of Florida, application for a limited proceeding rate increase.

Again, my name is Curt Mouring. I'm with the Florida Public Service Commission. I'm the Public Utilities Supervisor in the Division of Accounting and Finance; Tom Ballinger, the Director of the Division of Accounting; and Jennifer Crawford, Attorney Supervisor in the Office of the General Counsel. Thank you.

Just a little bit about their last -- the utility filed a limited proceeding on December 30th, 2015. The utility's last rate proceeding was in Docket No. 120209-WS, and the order was issued in that docket on January 10th, 2014.

The reasons that the utility has provided in its rate increase petition are to achieve revenues established in a prior Commission order that have not materialized due to declines in irrigation service in Pasco County, and also to recover costs associated with

capital projects in Marion, Pasco, and Seminole Counties.

As you walked in, I believe you received a copy of the Special Report. This has a lot of information in it. We've got the docket number right there, which for any correspondence that you'd like to send in to the Commission, please reference that docket number so that we know where to -- so that we know which docket it belongs to. Also on page 4, it lists the present and proposed rates for Summertree. Those are going to be about halfway down the page. And at the very bottom you've got the typical residential bills at the current rates and the proposed Phase I and Phase II rates at 3-, 6- and 10,000-gallon consumption levels.

The limited proceeding, or LIMP process, it's a much less formal process than a formal rate case. It costs less than going straight to a formal hearing, and it can be protested by an affected party. Again, the purpose of this customer meeting is to hear -- receive comments from you, the customers, regarding the quality of the service provided, the quality of the product, as well as the utility's interactions with you, comments about the proposed rate increase, and to hopefully answer any questions that you may have.

And, again, this is the customers'

('unintelligible), not the utility's. The utility does have some representatives here. I saw them just a little bit ago. I see them in the back corner there. Also the Office of Public Counsel is here. I saw J.R. Kelly and Erik Sayler here.

If you wish to speak, I think there's a couple of clipboards floating around in the back there. Just please sign in. And also you can, the last sheet of the customer -- of the Special Report is a pre-addressed comment form that you guys can fill out, fold up, tape it together, put a stamp on it. It's already got the docket number on there. Again, this isn't required. But if you send in any correspondence you'd like, just please reference the docket number.

The Office of Public Counsel, they are an advocacy group that advocate for consumers -- advocate for consumers before the Public Service Commission. There's their 800 number and their website, Floridaopc.gov. I think that's also in your Special Report. The Commission Consumer Affairs Hotline and the Florida PSC's website, this information is also in your Special Report.

And please remember that tonight's meeting -- or today's meeting is being recorded. Come forward to the microphone and please state your name, address, and

spell your last name. Before we open up the customer comments, though, I think we're going to hear from Senator Simpson. (Applause.)

SENATOR SIMPSON: And thank you, and I appreciate everyone coming out today. I appreciate the PSC Commission being here. I know it's a good journey for everyone, and -- but I think this is a very, very important issue. I think what we've got is an issue of fairness.

So I've been a senator for four years, and one of my first bills was the Consumer Protection Water Act, which we thought would finally bring some rationale and reasoning into dealing with monopolies. Right? We're talking about a monopoly here. No one in this room has the opportunity, other than buying bottled water, to change their utility. And, of course, if they all bought bottled water for all of their utilities, they would have to pay more money because they would be using less water. And so I think it's an extremely unfair place that we find ourselves in.

And what we're asking the PSC to do is to, again -- I said two years ago that there would probably be legislation that would come forth if there were going to be rate increases. I would ask the PSC to deny rate increases of any kind until there is a fairness to this

whole system. Maybe Utilities, Inc. does not have the ability to provide affordable water in a scenario that we work here in, and I think legislation has never been proposed that would say that if you have a certain number of customers and you cannot provide clean but secondary water quality standards in place, water at an affordable cost, not at any cost because we can do it at any cost, but at an affordable cost relative to your adjacent water vendors, then we have to deny those rate increases until we find out what that solution is.

Every time we increase rates on this, on Summertree, we are essentially making it more valuable in the future for someone to purchase Utilities, Inc. And so the system is working against our constituents in that we are providing rate increases and we're building a layer at a time. If there are ten layers that need to be removed to allow clean drinking water to come to Summertree under the current conditions, let's find out what that is. Let's find out what the cost of that is when we have alternatives.

Again, we can hook to the County. And I know the County has had concerns, you know, about, well, what if the internal maintenance requirements of the system that exists -- all of those solutions should be evaluated and in a common sense fashion -- or a rate --

rates (phonetic). We have placed Summertree and all other monopolistic operations in a lose/lose situation. We have said that you have one place to get your water. We have said that if you do things to be more efficient, we're going to increase your rates. Because if you use less water, well, there's a certain amount of fixed costs that we still have to recover. Everything we have done in these laws, which are 30, 40, 50 years old, I presume, has been against the customer.

The attempt that we did two years ago with the Consumer Protection Water Act I thought would take into consideration these types of problems, and it would give the PSC the ability to deny rate increases until we get to a real solution.

Every time a rate increase is put in place, I'll say again, we are making consumers worse off and the more egregiousness of their situation, and we are making the utility in a better position to continue to fight against the consumers. And so I think there's got to be a bit of fairness. I think the law that we passed two years ago, under no circumstance did it say that rate increases should happen when the total problem has not been solved.

And so I would urge you to not give any rate increases. I would also urge that we do a proper

evaluation of the last 25 years of how we got to where we are because I think, you know, we could have made a better decision ten years ago or we could have made a better decision 15 years ago. And I normally don't like to use hindsight as a measure because I've made plenty of mistakes in my life I'd like better hindsight on. But the reality is that this is Utility's, Inc.'s business model, as is any other utility, and at any point in time, 20 years ago, you know, 15 years ago and so on, better decisions could have been made. But probably decisions were made based on profit, not based on doing what's the right thing.

So what I would say is at this point in time the PSC should do the right thing and not do what is based on old laws that are advantageous for monopolies. And by doing the right thing, I mean do not do anymore rate increases. And what I would also propose is, and just as I said a couple of years ago in one of the meetings in Tallahassee, I suspect that there will be additional legislation because of what we have now been through for the last two years since the past legislation passed that will greatly restrict the opportunity of monopolies to continue to increase rates on water customers, especially when you still have these secondary water quality standards.

I think there is a matrix that we can work on that will be advantageous to a system like Summertree when you have adjacent utilities that can supply the water 10, 15, 20, 25 percent cheaper that meet all the secondary water quality standards. I think that has to be considered when you're looking at a utility asking for a rate increase. And I think the PSC has the ability to do those things now based on the law that was passed and based on the outpouring in this community, and well over 65 percent of the folks are going to support not having a rate increase and attesting to the fact that the secondary water quality standards have not been met, and nothing is being proposed that are going to meet those standards, and from what I have seen, I don't think have the ability to meet those standards.

The existing system at (unintelligible), but what are we willing to make these constituents pay for water to do that? $80 a month? $60 a month? Because that's the direction we're going in. Right? We don't ever hear where we're going to get a rate decrease. Every time we do something, we're going to increase rates, and every time we do something, it's not any better.

And so the fact that I've been for four years now involved in the situation, I believe it's time to --

it's way overdue. And I think until the PSC makes a strong decision that there are not going to be any rate increases, not a rate increase until we get to the bottom of it and what is the ultimate best solution for our constituents, not what can we do for five more dollars a month, what can we do for ten more dollars a month, what can we do to hook up to the County water where we have actually good secondary water quality standards at an affordable price? And so until we get to that solution, I would suggest that we have no rate increases. And I would also suggest that the legislature look very closely at this legislation again next year to be more helpful and have more tools in our toolbox to address these issues.

So thank you for having me here this morning, and I look forward to listening to the conversation.

(Applause.)

MR. MOURING: Also from Representative Corcoran's office we have Jared Ochs that's here to make a few comments on behalf of Representative Corcoran.

MR. OCHS: Hi, everybody. Thanks for coming out today. I know you've probably seen me a couple of times before. This is one of my favorite communities in Pasco. And you probably -- you folks are probably the most well-organized and courageous folks for standing up

to this corporation that has just been basically making your life miserable.

Unfortunately, Representative Corcoran was unable to make it this morning, but if you will indulge me, I have some prepared remarks that he was going to say.

"First, I would like to welcome and thank Ann Marie Ryan and the rest of the Summertree Water Alliance -- (applause) -- for continuing to stand up to UIF and for your presence here today.

"I would also like to thank the members of the PSC for their attendance here today as well. I know it is quite rare for all five members of the PSC to attend a staff-conducted customer meeting. I also know that you care about doing the right thing. Your presence here is indicative of the seriousness of this issue before you, so I thank you for coming. (Applause.)

"I feel like I am Bill Murray in the movie *Groundhog Day* speaking before you today because apparently -- because approximately three years ago, in November of 2013, Senator Simpson, Tax Collector Fasano, Commissioner Mariano, and a huge gathering of Summertree residents and I all testified at a similar rate increase before the PSC for more than eight hours. Here we are again. We have UIF requesting another rate increase

when the quality of the water imposed upon Summertree has not improved in three years. In fact, according to the Office of Public Counsel, there were similar secondary water standard concerns approximately 23 years ago when UIF initially purchased the system.

"During that meeting three years ago, the PSC and its staff heard story after story regarding the excessively poor quality of water these residents have been forced to purchase from UIF. Like clockwork, UIF applies to this Commission seeking rate increases every opportunity it has.

"I want to thank the PSC because at that meeting the PSC approved a rate increase much smaller than what UIF had requested, and also ordered UIF to work with the community to address their concerns, empowering the community to determine the eventual best course of action to improve the quality of water within their community. Because of that decision, it looks like Summertree will eventually be interconnected with Pasco County, who will begin providing a higher quality water to our residents. (Applause.)

"Some of you even wanted to go so far as to deny any rate increase at all in that meeting three years ago, but it was said the law required a rate increase, and the PSC suggested the legislature take

corrective action to empower the PSC to act on the consumers' behalf in matters such as this. Senator Simpson and I did just that.

"During the 2014 legislative session, we were successful in passing Senate Bill 272, the Consumer Water Protection Act, that gives water consumers throughout Florida a more equitable seat at the table when dealing with large corporations like UIF and its parent companies.

"As Senator Simpson and I clearly stated in our letter to Madam Chair Brown, the intent of the legislation was to protect Florida consumers from paying high prices for substandard water.

"Over the past three years, the quality of water Summertree residents have been provided has not improved. An average rate increase of more than $6 a month for poor quality water that does not meet secondary drinking water standards is unconscionable. It becomes a moral hazard when government rewards large corporations for bad behavior. The government was created to serve the people, not corporations.

(Applause.)

"When setting rates for a water utility, the PSC now has the ability to consider secondary drinking water standards established by the Department of

Environmental Protection. If those standards are not met, the PSC has been delegated the ability to penalize the utility for failing to adequately resolve each issue. (Applause.) This can include fines, a reduction of return on equity of up to 100 basis points, the denial of all or part of a rate increase until the quality of service is satisfactory, or the revocation of the utility's certificate of authorization. (Applause.)

"Therefore, we would respectfully ask the PSC to deny the entire rate increase. (Applause.) After 23 years of providing substandard water, the utility has been given more than enough time to improve the quality of water it provides to these residents. Enough is enough. At some point the utility needs to be punished for their bad behavior."

Again, I would like to thank everyone for attending today's meeting. Please don't hesitate to reach out to us in the future if there's anything we can do for you. Thank you. (Applause.)

MR. MOURING: Also I believe the Office of Public Counsel has asked for a couple of minutes to address the customers before we take comments.

MR. SAYLER: Thank you. To the staff and the Commissioners, thank you for the opportunity to speak

this morning. Also I want to say thank you to all the customers who came out today wearing red. We know how important this is for you. And also thank you to Senator Simpson and Representative Corcoran's offices for being out here today. I know the customers feel your support greatly. And we've been with these customers for over two years now, almost three years working on this quality of water issue.

To introduce you to me, if you don't recall, my name is Erik Sayler with the Office of Public Counsel, and -- (applause) -- and we are your representatives before the Public Service Commission in utility rate cases such as this one. And our job is to look at the rate increase filing, and we have done so. We have identified a number of concerns and issues, we've submitted those to the Commission staff, and are engaging on that. And we're going to vigorously oppose any aspect of this rate increase that we feel is unreasonable or imprudent, just to let you know.

Some of the areas that we're looking at is the Phase I rate increase due to the lost irrigation revenues for this community. We're also looking at the cost of the interconnection. In addition, rate case expense.

Many of you received a letter a couple of

weeks ago and -- from Utilities, Inc. that implied that you got some misinformation or bad information from the Summertree Water Alliance. Let me tell you today, our office has been working with the Summertree Water Alliance for a long time to get accurate information out to you, the customers, as it relates to all aspects of this rate increase. And we also have been working with them to be able to provide information so you can make an informed decision as it relates to the survey ballot that you received a few weeks ago, and that is actually due next Monday. So if you haven't filled it out, fill it out. So we've been working to get that accurate information out for you, so just to let you know.

Now turning to the reason for the purpose of this meeting today, it is very important. You play a very, very important role in this proceeding. You have five Commissioners who have traveled from Tallahassee, from Panama City, from Tampa, Orlando, Jacksonville to hear your comments today. This is being live streamed on the internet worldwide. So it's very important that if you have an opportunity to share your concerns about the quality of service; the quality of the water product, the taste, color, smell; your history and how much you've spent on bottled water, things of that nature; if you have had issues with the customer

service; if you feel the utility has not treated you well; if you have issues with the rate increase, these -- and anything else that you want to share today will be on the record, and this Commission, these Commissioners will consider that as they consider whether and how much -- or whether to authorize a rate increase for these customers.

So if you haven't signed up, I would encourage you to sign up. Or if you're not a public speaker, on the back of this form, please fill that out. You can fill it out and leave it with the Commission staff today. You can fill it out and mail it in, scan it, email it. But it's important for your voice to be heard. This is your opportunity. Again, thank you for coming out today, and we'll be around all day. So thank you. (Applause.)

MR. MOURING: All right. Can we get the projector shut off, please? And we'll go ahead and we'll move through the list -- go through the list of customers starting with Ann Marie Ryan. (Applause.)

MS. RYAN: Good morning, everybody. I'd like to thank the Commissioners from the Public Service Commission for coming down from Tallahassee to be here with us today. It was a long trip and much appreciated. I'd like to thank Senator Simpson, Representative

Corcoran and his aide coming down -- Jared for coming today. I'd like to thank Commissioner Mariano. You know, we've had all five Commissioners from Pasco County also working with us, and we have to keep that in mind. We've been very fortunate. I'd like to thank J.R. Kelly, Erik Sayler. They've been indispensable for keeping us on course and keep us with the facts.

And also I want to thank the Summertree community. You are amazing. Thank you for always being there for me and giving us support. But I can't go on without saying we have an amazing task force. We have amazing facility and membership from the presidents of all of our organizations, and this is why we've been able to get to where we are today.

I'm just going to step aside after this introduction and I'll finish up. Our task force is coming first, and then I'll finish my message later.

(Applause.)

UNIDENTIFIED SPEAKER: Before I start, I want to bring some evidence of the water here. I want to present this to you. I labeled what this is. It's the water out of the toilet tank reservoir. And if you look closely, if you shake it, you'll see a sediment film that develops in there. This has never happened in any other residence I've lived in, and we don't understand

what's in the water to cause this. And this is the same water that gets sent to our kitchen and showers to consume.

This also -- I just cleaned out the aerators, and if you look at the bottom, you'll see sediment there. Excuse me one second. This is a picture of what was in those aerators. I don't know what that long, round thing is, but I'll pass this down. I know you don't want to take that back home with you. Feel free to leave it here. But this is what we look at every day. Thank you. (Applause.)

MR. ROBIDA: My name is Lee Robida, R-o-b-i-d-a. I live at Summertree at 11210 Merganser Way, New Port Richey, Florida.

Part 1. I'm expressing my view of the corporate culture of Utilities, Inc. via the quoted words of John Hoy. It's published in truthout.org titled "Private Water Industry says Water Bills 'Have to Go Up,'" as written by Aaron Cantú May 14th, 2015. Mr. Cantú was present at the Southeast Conference of the National Association of Water Companies meeting held April 29th/30th, 2015, in Charleston, South Carolina. NAWC is the voice of the private water industry.

I quote, "John Hoy, President of Utilities, Inc. was more blunt. 'What it comes down to is how do

we educate and prep customers for understanding what the value of water is?' Hoy said. 'There is a belief that water should be cheap. We are fighting the perception that anything over $30 a month is a lot. Water continues to be the lowest utility bill. We have to go up for that. We have to do more to change the belief that we can keep water rates down for all needs coming.'

"'There's a new movement out there gaining steam that's fighting privatization,' said John Hoy of Utilities, Inc., 'that everything our sector does is bad. That it should be providing water. We are gearing up and are ready to get the message across.'" End quote.

Part 2. Summertree is not alone with this battle with Utilities, Inc., which is located in 15 states. The following three communities and/or residents either have or still may be in the process of protesting and rallying against Utilities, Inc. over unsatisfactory water and sewer quality and/or unsatisfactory rates.

Exhibit A, plus UI via Facebook, (unintelligible), South Carolina, 27 spilled sewer issues for the community. If the United States EPA hadn't intervene with the issuing of notice of violations to Utilities, Inc., d/b/a Tega Cay Water

Services, as well the City of Tega Cay having to purchase UI sewer operations in 2014.

Exhibit B, (unintelligible) Estates Homeowners Association, Abita Springs, Louisiana. April 11th, 2016, residents are voicing their concerns with the PSC last night over the upcoming, quote, Louisiana PSC vote on making Utilities, Inc. of Louisiana latest rate increase, Docket 33595 permanent. As quoted by a posting on their Facebook community, "We were hit with water and wastewater charge increases when we received correspondence from Utilities, Inc. of Louisiana (unintelligible) back in mid-July 2015. Price increases are one thing, but having your bills for a certain service doubled or, in some cases, tripled raises some flags."

Exhibit C and last exhibit. Utilities, Inc. Doing business as Carolina Water Services, Charlotte, North Carolina. Customers protesting higher charges on their services from CWS and filing a protest with the North Carolina Utility Commission.

(unintelligible) Docket W354-347, Utilities, Inc. seeking to collect from customers $763 per meter. William and Suzanne Foster, Docket W354-348, seeking to collect from customer charges that customer used over 33 gallons of water for one period.

My closing statement. It's not just Summertree residents fighting for better quality water at better rates, it's customers and ratepayers networking together nationwide fighting Utilities, Inc.'s corporate culture. Thank you, Commissioners, for coming. Thank you, Pasco County. (Applause.)

MS. CRAWFORD: Jennifer Crawford. I'm the legal staff. We just -- it's amazing seeing this many faces out here. I've been here almost 20 years with the Public Service Commission, and having a room like this is a remarkable statement. It's very important. You are here to address the staff and tell us your concerns, and we want to hear from everybody. And I'm seeing we have a lot of names signed up, so we're going to need to try to move along quickly. So we need to have folks observe -- we have a little timer here on the podium. You've got the green light that means you've got three minutes. When you're down to the last 30 seconds, you're going to see that yellow light come on. And then when the red light comes on, we do need you to wrap up quickly so we can go on and make sure every voice gets heard. Okay? So if you could do that for us.

And if you have heard something today and you just want to say "I agree with this person" or "I heard what the senator or the representative said, I echo

that" and you -- that's what you want to have heard and you're ready to move on so others can have time to speak, that's fine too.

So if you could, when your name is called, come up to the podium. If you could give us your address as well and then your comments, and try to observe the lights for us. And tell staff what you want to say, and then we'll make sure, the best we can, that everybody gets a chance to be heard. Thank you.

MR. GOFF: All right. So my name is Brian. I'm here on behalf of Amanda Murphy. She represents West Pasco, so some of you may be familiar with her. I wasn't planning on speaking, so I'll be quick (unintelligible).

First, I want to apologize on behalf of the Representative that she couldn't be here today. Her son-in-the law is in the hospital, so she's in Lakeland watching her grandbaby while they try and get that taken care of. But the fortunate part about speaking after Commissioner Mariano, Jared, and Senator Simpson is that everything that could be said has already been said. So we're here to echo that sentiment and say that it is amazing that you guys have turned out in this big a number because you're really setting the bar and showing what a community that comes here can do. The last one

of these that I came to a couple of months ago, maybe six people showed up. So you guys, my hats off to you, and I applaud you guys what you guys are doing to stand up for your rights for affordable, clean water. And I'm just here on behalf of the Representative to ask that it's denied, the rate increase for Utilities, Inc. of Florida. (Applause.)

MR. MOURING: Okay. The first name that I have is Carolyn Kovarik.

MS. KOVARIK: Good morning. My name is Carolyn Kovarik, K-o-v-a-r-i-k. I live at 11829 Bayonet Lane in the New Port Richey division of Summertree. I have been purchasing water for 18 years because the inferior quality of water delivered to my faucets is not fit to drink. And to think they are asking for a rate increase for their poor quality product is absolutely unthinkable. And I thank you. (Applause.)

MS. CRISTIANO: Good morning. My name is Maria Cristiano. I live at 11609 Bayonet Lane. Water is not a life -- a luxury of life but a necessity to our body. Hydration, hydration, hydration. Therefore, clean water is a must. We've heard many times you get what you pay for; however, Utilities, Inc. believes you get what we give you and like it. Well, no more. We will no longer accept substandard water at very

expensive rates.

Utilities, Inc. has been increasing our rates for years and we've never received anything for it. We've all worked hard for what we've gotten and needed. Now we will work harder for what we want. And if it takes ridding Summertree of public utilities, that's what we will fight for. My name is Maria Cristiano, and I approve this message. (Applause.)

MS. MACK: Good morning, Commissioners.

MS. CRAWFORD: Ms. Mack?

MS. MACK: Yes. My name is Lorraine Mack, and I'm a member of the Summertree Task Force. I have four -- three comments.

First, I would like to respond to John Hoy's letter which was sent to all Summertree customers dated March 21st. This letter was inappropriate and caused much confusion in the community about voting to interconnect with Pasco County.

Second, I would like you to refer to the last paragraph in the letter. If it were UIF's desire to move forward as quickly as possible, then why did it take over 25 years to come to this point to get it interconnected to Pasco County? Even their own engineer's report suggests that going to Pasco County was the best way to go. UIF's solution was a

$2.5 million investment. We could not afford this because it would have cost an additional $38 per month for water for 22 years plus sewer charges. For this reason, the task force pursued alternative funding with the help of the county and state and saved $2.1 million. This is a senior community, and we consider the treatment from UIF to be elder abuse and greed.

Third, we have a lot of illness in this community. Most people here need to buy bottled water because you can't drink or cook with the water. Now the utility wants us to pay more for water we cannot drink. That's outrageous.

Four, dealing with UIF has been a nightmare. UIF was directed by the PSC to work with the task force and OPC to come to an agreement which will provide Summertree quality, good water. We all agreed to be transparent in all we do. UIF did not do this. UIF knew they had some problems with the wording of the survey ballot that they hoped to draft. They knew for several weeks that they would not send out that version of the survey ballot. They didn't tell OPC or the task force this until a week before the survey ballot was to be mailed. UIF deliberately refused to send the letter and -- excuse me -- and ballot that was worked for on several months over the phone with OPC, UIF, and the

task force, thus leading the Summertree Task Force to spend additional money and time to do what the PSC required UIF to accomplish.

In conclusion, UIF's business practices are immoral in nature. Please, Commissioners, no increases in our rates until UIF fixes the water quality issues or UIF sells Summertree to Pasco. Thank you. (Applause.)

MR. HOEHN: Good morning. Thank you for being here. I'll start right in with we are asking for no rate increase for Utilities, Inc.

MS. CRAWFORD: I'm sorry. If I could just interrupt you. Could you give your name and address, please? Thank you.

MR. HOEHN: Oh, I'm sorry. My name is Chuck Hoehn, spelled H-o-e-h-n. I live here in Summertree at 12130 Tournament View Avenue. It seems as though the UIF has gotten a rate increase every time they ask for it. Nothing has been done for us to justify it. We still have the same smelly -- smell and color in our water that we have always had. We are asking Pasco County to be allowed to do the interconnect so that we can get good, drinkable water like all of our neighbors are enjoying.

We also would like to have the Utilities, Inc. sell their Summertree property to Pasco County. They

have not shown good faith in trying to negotiate with us as the Public Service Commission has directed them to do. We don't want to do business with them. We want them off our property. (Applause.)

That was all I had to say, but I want to add, I just want to go on record as saying I agree with everything that Senator Simpson and Commissioner Mariano has said. Thank you for being here. (Applause.)

MR. NEILSON: Good morning. My name is Rich Neilson. I live at 11605 English Elm Drive, New Port Richey, Florida. I'm a member of the Summertree Water Alliance. I'm also president of Arborwood at Summertree.

I'm speaking on behalf of myself, my association, and our residents. We bought Utilities, Inc. water for many, many years. When Arborwood was built, we had 20 meters because water was cheap. The meters were costing us $24,000 a year. Then we had to pay for the water. The last time we did that for a full year, our total bill was $113,000 that we paid to Utilities, Inc. That included the meters. That was over 20 percent of our operating budget. It was not sustainable. We elected to go to wells, our own wells, because, number one, we couldn't afford it. Number two, it would not be productive to connect to Pasco County

water with using the system as it was. It cost us a lot of money to convert. We're still paying back some of that money. But we did the right thing.

I also want to say that two of the Utilities, Inc.'s wells are on ground owned by Arborwood at Summertree Association. That's Well 13, which is a very bad well. It's down by our pool. And I think it's Well 7, but I could be wrong. It's on Pear Tree Drive.

(unintelligible) Utilities, Inc. filed for a rate increase because of loss of revenue. I want to point out that from 1991 until 2015, my association cut the grass, we paid for their expensive water to irrigate, we did the improvement (phonetic) that we planted around their fences. We got not one cent.

Thank you to SWFWMD. In 2015, they told us -- they told the utility that they would not renew their water usage permit unless they had an easement agreement with Arborwood. We didn't want to give it to them. We had no choice because what other source of water could we have in a very short time? So we did give them a limited agreement, and we are getting a small fee from Utilities, Inc. for us to cut their grass and trim the bushes. The reason they had to use us is because we had to irritate -- we wouldn't give an agreement unless they agreed to irrigation. We had it. So we -- that was the

best option to go, and we did the right thing there.

Let's talk about loss of revenue. My association lost $84,000 over the 24 years that they paid us nothing. So I just want the Commission to know that, and I want to thank the Commission. And I also wanted to say personally in my own home I have a water softener, I have filters, and, yes, my water at times smells very bad. And it's just not right to continue to have rate increases, rate increases, rate increases when nothing is done. Their own survey said connect to Pasco. Let's connect to Pasco. Let's get the job done and not give anything to (unintelligible). Thank you very much. (Applause.)

MR. YOUNGS: Addison Youngs, 11244 Golf Round Drive, New Port Richey, Florida 34654. I'm a member of the Summertree Task Force.

THE AUDIENCE: We can't hear you. We can't hear you.

MR. YOUNGS: Can you hear me now?

THE AUDIENCE: Yes.

MR. YOUNGS: Thank you. I'll try not to be redundant because I agree with everything that's been said prior. However, I wish that the Commission will take into consideration our health issue.

Two things that we need in life: Food and

water. Food we can manage, but we're having difficulties already, as said, managing the water that is unsuccessfully and unacceptably provided to Summertree residents. In your decision, whereas Summertree and Utilities, Inc. is concerned, I hope that you will consider our health issues. Thank you. (Applause.)

MS. TSAMBARLIS: I'm number two on your list. My name is Christine Tsambarlis, T-s-a-m-b-a-r-l-i-s. My address is 11651 Bayonet Lane, New Port Richey.

I did write a letter, which I did submit instead of reading to everyone because it is things that have already been said, but I do want to say we believe that Utilities, Inc. sees us as a revenue stream, a cash cow rather than people. Thank you. (Applause.)

MS. SPLENDORIO: (unintelligible) so I want to speak.

MS. CRAWFORD: Your name and address?

MS. SPLENDORIO: My name is Lucille Splendorio, S-p-l-e-n-d-o-r-i-o, 11841 Bayonet Lane.

Before I came to Summertree, I lived in Bear Creek, had Pasco utilities. I had a home, a pool, a washer, dryer. I never paid more than $30 a month for water. When I moved here, I moved into a one-bedroom, no washer and dryer, no pool. I have never paid a bill

less than 38- to $40. The water is nauseating.

My sister visited me from New York, had to brush her teeth with bottled water, would not even shower -- (applause) -- in her pajamas drove to my mom's to take her shower. This is a disgrace.

We need to have Pasco utilities or this confounded UIF needs to do something for these people. Thank you very, very much. (Applause.)

MS. MACK: I'm Suzanne Mack (phonetic). I wanted to thank the task force for their comments. I just wanted to say that we realize that the Public Service Commission heard a lot of these issues from past decisions, and we know that you're working hard to find ways to meet our challenges. Summertree residents need your continued support to assist us in denying UIF a rate increase. We're willing to work -- we are willing to work with Utilities, Inc.

I have tried since 19 -- since 2006, this is my tenth year. Back in 2005 and '06, Utilities, Inc. failed seven of their eight quarters for primary water issues. I got a group together, we sat down with Patrick Flynn and tried to discuss where we -- we did what we could do. They decided to go to chloramine, and so our plans to put some kind of a flotation system on our -- this changed.

As a result of going to chloramine, we have been having a lot of other problems. We -- the chloramines have caused the buildup of biologics causing algae and (unintelligible) to build up in our pipes. They treat the system by putting a big (unintelligible) through about once a year, which leaves particulates which are really horrible as well.

We've been dealing with this issue for 25 years. The Commission was here in 1991, and they had just inherited this (unintelligible). And the problems then were hard water, taste, color, and odor. Here we are in 2016. Our problems are hard water, taste, color, and odor.

We have the law that Senator Simpson and Richard Corcoran helped bring to fruition. That was the first time this community of less than 3,000 people had the opportunity to have the same water as other people in this county and state. We are in America, not a third world nation. We shouldn't have needed a law for our utility company to step up to the plate.

We approached them. I want you to know that everything that has taken place here in this development has been because of the commitment of our community and the wonderful people and leaders that stepped forward to do this. This has become our full-time job. We've

earned our living, we've worked hard, we came here to retire. This has become our job. We should be able to get up, turn on our water and live our lives. It's taken us lots of money, lots of time and very little progress. We've had tremendous support from our electorate, and we can thank Senator Simpson, Representative Corcoran, Amanda Murphy for also helping with getting that law through. We've had all five commissioners of Pasco County meet with us over and over.

We met with agencies. And I wanted to specifically thank Commissioner Graham, who was the chair in 2013, who is still here, trying to go through -- the commitment that you made in giving us the opportunity to speak and join together has made all the difference. We were never heard before, and it's important. It's intimidating for us to come up to Tallahassee; it's expensive for us to get up there. But when big corporations have attorneys and that's the only voice you hear, you don't understand what we have to live with every day. So the time that you took to take care is very well spent. It gives us faith and it gives us courage. The reason this world doesn't step up is because they think we don't make a difference. They think that nothing changes. I do believe that you will

help us make a change. We aren't the only people in this state with problems or in this country. We have Flint, Michigan. We had two very serious problems here with Aloha and Aqua. We wouldn't probably be here if we hadn't stepped up every step of the way.

Patrick Flynn can't deny that I've been here ten years. John Hoy just came on for -- just two years ago. We're very angry and upset that they stepped away from a PAA order that you gave us to bring this to fruition. Because of the efforts of our community, our OPC office, we were able to get our ballots out there. You all have our decision, and I do believe that we will be connecting -- to interconnect with Pasco water. That will solve the water connection.

But the failure to see us as individuals and to have fair pricing -- one more thing and I will go. I just want to say it on the record before I go. I had misspoke in one of my interviews for not -- this is not what I do for a profession. I had said that we had the highest water in Pasco County, and I meant to say that we had higher -- that we all had higher water than Pasco County. I just wanted that to be clear. We have had the highest water in Pasco County. Now that goes, I think, to Orangewood, which is also one of Utilities, Inc.'s holdings, but it's not us. And that's because

you held the line back in 2013 to hold things back when we came for a solution or we'd still be in that status.

So we would hope that you will continue to support us and anybody else who has issues like this in the future, and I thank you for your time. (Applause.)

MS. CRAWFORD: We're going to go ahead and start calling names from the list now. And I think what Curt is going to do is he'll call two or three names. The first person will come up to speak, and then just the next number two, number three be ready to come up after, and that way we'll call a couple at a time so we can hopefully move things along. And it could -- I know everybody is really passionate about what they have to say, but we do want to make sure every voice is heard. We are recording. We need to make sure that recording stays clear. So if you could suppress the applause, it's really important that we hear from everybody, and we want to make sure that it's a clear recording and that it is broadcast clearly. Okay?

UNIDENTIFIED SPEAKER: I would just like -- for the record, I would like to submit -- we have 846 questionnaires that we put together prior to -- of the ballot just to show you how people feel. We did all this work for the, for this event as well as for the public -- for the Pasco County Commission. Thank you.

(Applause.)

MR. MOURING: Thank you.

MS. CRAWFORD: If anybody has any paperwork or anything they do want to submit to staff, give it to me, I'll be happy to take that. Thank you.

MR. MOURING: Okay. Our next speaker is Nancy Hefner, followed by Marian Ritchie and Alan Ritchie.

MS. HEFNER: Hi. I'm Nancy Hefner, H-e-f-n-e-r. I live at 11 --

THE AUDIENCE: We can't hear you.

MS. HEFNER: I live at 11551 Holly Ann Drive in The Villas at Summertree. We've been here since 2006. We feel that there is nothing that justifies a rate increase. We have to treat the water and/or filter it at least twice to make it usable. When the water runs into my washing machine, it is yellow. It has to be treated before I can wash my clothes.

UIF paperwork warns against using the water if you have a compromised immune system. Most of us that live in Summertree have one form or another of a poor immunity system. There is just no justification for them to recoup the monies that they have lost because we put in the wells to use for our lawns. We have lived in Seminole and Largo and had none of these problems of smell, taste, or the cost that we are enduring. Please

convince UIF to sell to Pasco. I don't even understand why this community had to go through this extreme situation to get clean and healthy drinking water, and I really don't want to see another Flint here at Summertree. Thank you. (Applause.)

MS. RITCHIE: Marian Ritchie, R-i-t-c-h-i-e, 11937 Bayonet Lane. We are not satisfied with the quality of the water from Utilities, Inc. nor with the price. We have to buy all our drinking water, and we wonder why we have to pay such high rates for something that doesn't (unintelligible). Thank you. (Applause.)

MR. RITCHIE: Alan Ritchie, R-i-t-c-h-i-e. I live at 11937 Bayonet Lane. The quality of the water is absolutely despicable here. I can't understand allowing anybody an increase when they can't give you a reasonable quality of water. All my drinking water, we buy it. And I just hope you -- I agree with -- I agree with everything that's gone on before us, and thank you. (Applause.)

MR. MOURING: Thank you. Our next speaker is Ralph Kessler, followed by Margaret Highfield and Phil Alix.

MR. KESSLER: Ralph Kessler, 11233 Holly Ann Drive, New Port Richey. I've only been in the community for a year. And I was told when I came here, "Hey, the

water is all taken care of, all settled." So this has been going on for a long time.

I agree with everything that's been said. I would like to see Utilities, Inc. be done away with and hooked up to Pasco County water to the benefit of everybody here.

I showed a screen earlier (unintelligible) for drinking water. What it ought to have been was a fire hose because every time I turn around and look down the street, they're running water down the street and I'm paying for it, and that's ridiculous. Thank you very much for being here. (Applause.)

MR. ALIX: Phil Alix, 11416 Windstar Court. Everything that's been said, I can't add anything else, but to appreciate the severity of the situation, you have to live here seven days a week to understand what the --

THE AUDIENCE: We can't hear you.

MR. ALIX: I said you have to -- to appreciate the severity of the situation, you have to live here on a seven-day-a-week basis to appreciate it. (Applause.)

MR. MOURING: Thank you. Did we -- did we not have Margaret Highfield? Okay.

Eileen Ball, and the next two will be Fleurette Brindise and Carol Povolny.

MS. BALL: Hi. My name is Eileen Ball, and I want to thank you for coming and listening to us. I live at 11423 Merganser Way, New Port Richey. I've lived here for 14 months. I have lived in seven different states and have never had an issue with water. It never dawned on me when I bought my house to check what the water was like.

My sister lives in Wesley Chapel. I go to her house to shower. I spent $7,000 on a water everything, and I still have smelly, nasty, slimy water. I emptied my dishwasher this morning and almost brought the silverware that was in there because it was so slimy and I couldn't believe it. And I bought a -- whatever, you know the drill.

But basically I want to concur with everything that everybody said, and, please, we really do need your help. I am also a nurse, and every time I look in my toilet, I want to vomit because I know what all that junk is, and it's not pretty. Thank you. (Applause.)

MS. BRINDISE: Good morning, y'all. I'm not really (unintelligible), but anyway my name is Fleurette Brindise, B-r-i-n-d-i-s-e. I live at 11924 Carissa Lane in Summertree. And I'm just here to tell you that I think UIF's request for a rate increase is reprehensible. The water stinks, the color stinks,

everything about it, and I think we should be hooked up to Pasco County. Thank you for listening to my little tirade. (Applause.)

MS. POVOLNY: My name is Carol Povolny, P-o-v-o-l-n-y. I live at 12122 Loblolly Pine Drive. For 15 years we've been paying for terrible water at a very high rate. It's got a bad taste, bad color, bad smell, black scum in the toilet tanks. Please, do not give them a rate increase. We want to be hooked up to Pasco water. We want Utilities, Inc. out of here. Thank you. (Applause.)?

MR. MOURING: The next name is Robert Povolny, and the next two will be Maureen Vecere and Margaret Reale.

MR. POVOLNY: Hi. My name is Robert Povolny, P-o-v-o-l-n-y, 12122 Loblolly Pine Drive, New Port Richey. (Unintelligible.)

THE AUDIENCE: We can't hear you.

MR. POVOLNY: I just wanted to add five years ago I purchased a full home water filtration system which cost us $3,000 hoping that this would solve our water problems. It didn't. We have to buy water. We estimate it's $300 a year, between that and the filtration system. So as you can see, we're not very happy with. We'd like Pasco water and we'd like

Utilities out. Thank you. (Applause.)

MS. VECERE: I am Maureen Vecere, V, as in Victor, e-c-e-r-e. I originally came from a Pasco County water supplier district. I lived there 20 years. My husband died. I came here hoping to reduce my cost of living; however, I was so surprised by the quality of the water. It's deplorable. And as far as I'm concerned, they can take Utilities, Inc. and ban them from all of Florida. People should not be subjected to such conditions. And they could take a hundred years before they could meet the quality and superior service that Pasco County served me when I lived in Port Richey. Thank you ever so much, and I appreciate all of you coming here. (Applause.)

MR. MOURING: Thank you. Erika Milligan, and the next two will be Linda O'Day and Joanne Bonney.

MS. MILLIGAN: Good morning, and thank you for coming. I don't need to say --

MS. CRAWFORD: Get a little closer.

MS. MILLIGAN: Oh. Erika Milligan, M-i-l-l-i-g-a-n, 12114 Loblolly Pine Drive. (Unintelligible) that they should not have to pay for water they can't drink. I've had to pay for water that I cannot drink for 13 years, and I think we should get some relief.

I also wanted to say that it is ridiculous to expect Pasco County to pay top dollar for a second rate facility.

And, last, just to show how incompetent the company is, the letter they sent to us stated that they made their rate increase application on December 30th, 2016. A very neat trick. Thank you.

MR. MOURING: Thank you.

MS. O'DAY: Linda O'Day, O, apostrophe, d-a-y, 11818 Boynton Lane, New Port Richey, Florida. And I think practically everything has been said except for the fact that my doctor told me "Not only don't drink it, but don't even shower in it." Thank you all for coming. (Applause.)

MR. MOURING: Thank you.

MS. BONNEY: Hi. My name is Joanne Bonney, B-o-n-n-e-y, and I live at 11609 Holly Ann Drive. I would like to say everything that has been said. And I know the water is very bad. We don't even use it to cook with. We have to buy bottled water to drink even if -- and it smells, and the toilets, they get all brown. Everything gets brown. Even your clothes don't smell good. And I agree with everybody that's -- what has been said, and I thank you for all coming down.

MR. MOURING: Thank you. The next name we

have is Naida Flynn, followed by Mike Geaghan and Anthony Loquencio.

MS. FLYNN: We live in America. We should not have to fight and work this hard to get decent water out of our taps. We earned our right to quality. We will not tolerate this. Please deny their rate increase. Thank you.

MS. CRAWFORD: Ma'am, I'm sorry. If we could get your name and address for the record. Thank you.

MS. FLYNN: Naida Flynn, F, as in France, l-y-n-n, 11607 Rose Tree Drive. Thank you.

MR. GEAGHAN: Good morning. My name is Mike Geaghan, G-e-a-g-h-a-n, and I live at 11643 Bayonet Lane. While I agree with everybody, the poor quality of the water is enough of a reason to deny this rate increase. I would also like to say that I think the poor quality of the water, the services, and the exorbitant rates are an outcome. They're an outcome of the laws that (unintelligible) monopoly pricing. I think that the price model, which is cost plus profit equals the price that you charge, is an antiquated and inappropriate method for pricing the water. I feel that you should consider a model that looks at the market price minus the cost, which would then give the utility the appropriate price (phonetic).

While I know that monopolies are difficult to determine market price, I think in this case it's pretty easy to look at a very close monopoly, which is the Pasco County utilities, in determining that.

Additionally, I would say that the Commissioners and that the staff should require the utilities to present definite cost reduction plans on a yearly basis. I think this would also require the utilities to consider the fact that perhaps price decreases are possible, not just price increases. Thank you. (Applause.)

MR. MOURING: Thank you.

MR. LOQUENCIO: My name is Anthony Loquencio. I live at 11809 Bayonet Lane, New Port Richey. I just wanted to say I've lived in many parts of this country and never had such poor quality of water at extreme prices, and I can't understand why the Public Service Commission would even think about granting another increase. Thank you. (Applause.)

MR. MOURING: Thank you. And the next name we have is Darlene McManus, followed by Candice Morrill and Gerrell Barker.

MS. McMANUS: Hi. I'm Darlene McManus, M-c-M-a-n-u-s, and I live at 11800 Carissa Lane in Pointe West.

First of all, I'd like to say I agree with everything that has already been said. I first moved here in October of 2015. When I first moved here, I noticed a horrendous smell every time I used the water or flushed the toilet or took a shower. I contacted the condo office and requested that maintenance come and check my property for a sewer leak or blockage on the sewer vent on my roof. They did so and found nothing wrong. Subsequently I was informed that it was neither of those, it was the water.

I have to buy bottled water or filter my water. I have to use bottled water or filtered water to cook with. In my opinion, the only thing that UIF's water is good for is flushing your toilet, and even that stinks. (Applause.)

I'm asking that the Commission deny UIF's request for a rate increase, and I also believe that we need to connect with Pasco County water. Thank you very much. (Applause.)

MS. MORRILL: Hi. My name is Candice Morrill, M-o-r-r-i-l-l, 11917 Boynton Lane. And I agree with everybody, but I noticed one thing that nobody brought up. I am a snow bird, and once I'm here for my six months, my hair, which is super manageable, goes to being stiff, my fingernails no longer grow, they just

split off at the cuticle. I have a dog who actually had a little toilet bowl for his water to drink, and we noticed when we put it in at night, in the morning his little toilet was yellow like he peed in it overnight. So we had to start giving him bottled water because he was getting sick. And our pets have to do what we give them, and it's not fair that they have to suffer with the rest of us. Thank you.

MR. MOURING: Thank you. Our next speaker will be Marcia Polancih, followed by Judith Brinton and Ilene Hess.

MS. BRINTON: Hi. I'm Judith Brinton, B, as in boy, r-i-n, as in Nancy, t-o-n. I live in Arborwood at Summertree. The address is 11635 White Ash Drive. I agree with most of everything that's been said ahead of me. The quality of water here is abominable. I've been here since 1986. The water has changed over the years. It's gotten worse. I don't like it when I turn on the water and I get black out. I don't like it when the smell is enough to choke a horse.

I see here where Utilities has a mission statement where in part they say that they're committed to providing safe, reliable, cost-effective service to their customers. I'm one of their customers. I don't see where it's safe.

They also state that they are looking for a fair return for their shareholders. I think that's the biggest reason they want their increase. I want to know if any of their shareholders live in Summertree. Do any of their shareholders drink this water, try to bathe in this water? Thank you. (Applause.)

MS. HESS: Good morning. I'm not close enough either. Good morning. My name is Ilene Hess, H-e-s-s. I live at 11614 White Ash Drive. Since this started, I've changed what I was going to say about ten times, but when we went to Tallahassee the last time, and thank you so much for coming this way instead, when we went there last time, we were told that Utilities, Inc. a few times ago were given 2,000 -- $2 million, excuse me, $2 million to fix everything. What they did is they flushed our hydrants. And they were told at that time that they had to do something right away. The Commission actually didn't even really want to give them anything at that time because they felt that they hadn't done what they had promised to do, but laws prevented them from working with us at that time.

I really, really hope that something can be done this time because everything that everybody has stated so far is totally accurate, totally true. And our costs just don't start and stop at our water bill.

I have a filter coming in my home, I have a water filter system, which, of course, all that softener runs through. It's not really good for our health either. And I have filters in my refrigerator, and I have to buy the bottled water. So there's a lot more cost beyond that. Thank you so much.

MR. MOURING: All right. Thank you. Our next speaker will be J. H. Robbins, followed by Russell Spaulding and Patricia Peery.

MR. ROBBINS: Good morning. My name is Jerry Robbins. I live at 11150 Paradise Pointe Way. Obviously I agree with everything that's been said at this point. I would just like to say that had I known what the quality of the water was like -- the taste of it, the smell of it every morning when you get up to brush your teeth, or when you pick up a fresh towel that's been laundered by this water and you smell this foul odor, every time you lay your head down at night on a pillow that's been freshly laundered, and again this odor comes up to your nostrils. It's offensive.

We need to hook up to Pasco County water. It's just an unconscionable act of keeping us aged and senior citizens captive in this manner. So I ask the counsel and the Commission to please support us (unintelligible). Thank you.

MR. MOURING: Thank you.

MR. SPAULDING: My name is Russell Spaulding. I live at 11821 Ivywood Place. I'm new to this area. I just moved here from Michigan. I might add, not the Flint area. I've never had any issue with water before. This is totally different to me. I've never had a water softener. I've never had to buy bottled water. I think buying bottled water is not good for the environment with all these plastic bottles floating around. Like I said, I've never had a water softener before. I don't even know how to deal with one of those.

I just recently got out of the hospital with kidney failure. I don't even know if I should be drinking this water. I agree with everything that's been said prior to this, so I want to thank the Commissioners for coming.

MR. WINTERS: Can I take the place of Ms. Peery?

MR. MOURING: Have you already signed up to speak?

MR. WINTERS: No, I didn't sign up. (Unintelligible).

MR. MOURING: Okay. That's fine. State your name, please.

MR. WINTERS: My name is Ed Winters,

11800 Ivywood Place. I'd like to say about the water -- now I'm a plumber by trade, a plumber from New Jersey. And I've taken the hose out, the hose out from the sink and looked at it. It's clear, you can see through the thing, and it's all black in there. And that's the same with the hot water heater. I had to dump the 40 gallons of water out. And it wouldn't all come out of the hot water heater, so I put some Clorox in there and that helps and I got the water out. I drained the tank. I don't know how many other people have to drain their tanks, but I'm telling you it's really bad.

But, anyhow, even the tanks in the toilet, I have to clean out the tanks because Pat is very fussy about it being clean. Everything has to be clean. And underneath where the water comes out from your toilet when it flushes, those little tiny holes, it's all black. I mean, really black. We had to scrub that out. What did we use on that again? I forget what the name of that strong stuff is. But, boy, I'll tell you, it's --

UNIDENTIFIED SPEAKER: Hydrochloric acid.

MR. WINTERS: But, anyhow, the other thing I'd like to say, being a plumber up in New Jersey, we had to go to a plant, a water plant, and they have sewer water that goes through, and this is the Hackensack sewer

department, the water goes through that system. And at the end, the guy took a glass and he drank the water. It purified it. And he said it's been tested and everything else. Then it goes back into the Hackensack River water again. We get the water from the Hackensack River in New Jersey, and then it goes through the sewer and so forth and so on. Just to say that we really, really need good tasting water.

And the other thing is also we have to buy bottled water like everybody else. Everybody has mentioned that before. So we -- we really need that good water. Because up in New Jersey, we have great water. Okay. Thank you so much.

MR. MOURING: All right. Thank you. The next name is Judith Larkin, followed by Elizabeth Chrufe and Louise Giffin.

MS. LARKIN: My name is Judith -- I don't think I need it. My name is Judith Ann Larkin, L-a-r-k-i-n. I have lived for 30 years in the community of Pointe West Summertree. I would like to enjoy connecting with the utilities, the Pasco utilities, and I object entirely to the water rates over the ensuing years. Thank you very much for coming.

MR. MOURING: Thank you.

MS. CHRUFE: Good morning. My name is

Elizabeth Chrufe, 11910 Bayonet Lane. I am also a snow bird from New York where we drink clean water in New York. When I look at the Commissioners, I hope you're listening.

I think of Utilities as a restaurant where you put in an order for filet mignon at $25, which would be cheap, but a second waiter comes over and he says, "But I can offer you this really awful hamburger at a much higher rate. Would you like to purchase it?" You know that your answer would be no.

We really want Utilities out of here. The people here, many are on fixed incomes. They deserve clean, potable water. Thank you.

MR. MOURING: Thank you. David Schaffer and Robert Bonney and Sheila Donald.

MR. SCHAFFER: Good morning. My name is David Schaffer. That's S-c-h-a-f-f-e-r. I live at 11918 Bayonet Lane here in New Port Richey. I'm a 30-year veteran of the police department. For 19 of those 30 years I was a forensic investigator. The water that we have coming out of our faucets I have seen in some of our crime scenes and some of our homicide scenes. That's how bad the water is.

I also did work for a sewer treatment plant up on Long Island called the (unintelligible) Plants. The

effluent water coming out of those plants were cleaner than the water that we're getting out of our faucets.

Once every month I have to take all the screens out of my faucets to get rid of the sand and other debris that's in it. Now it's serious that we end up as retirees still having to pay exorbitant water costs. They charged me for 3,000 gallons of using water in one month, which I know I never used. They claimed I have a swimming pool.

Now this whole program is serious. It's so serious that Ann Marie, who is doing all this pushing, she has received personal losses and medical losses, but she's still fighting to get the bills and everything lowered to get rid of the water authority and get us hooked up to Pasco County. I hope that, through your diligence, you will realize that we need help.

Our politicians are the greatest politicians. I never thought I'd ever say that, but we actually trust our local politicians. I thank you for coming, and thank you for allowing me to speak.

MR. MOURING: Thank you.

MS. LARSEN: Hi. I'm Mary Larsen. I think you might have mispronounced my name and I didn't come up earlier. But I live at 11627 Foxworth Lane here in New Port Richey.

As far as that rate increase is concerned, it's ridiculous, and I wouldn't drink the water even if it was free. I've never tasted such disgusting water, and I've lived in many places in the United States.

I'm also concerned, as a retired nurse, about health hazards drinking that water. I agree with everything that everyone else has said in the past. And we also spend about $50 a month on bottled water, not to mention the water softener products and the filter expense. Thank you very much for listening to our problems.

MS. DONALD: My name is Sheila Donald, D-o-n-a-l-d, 11612 Foxworth Lane. We are taxpayers who voted. We should have the right to the same Pasco utility services as our neighboring communities. My water is -- sometimes I've had black water, I've had green water. And I really do not want Utilities, Inc. any longer. Please help us. Thank you.

MR. MOURING: Thank you. The next name is Tom Warrick, followed by Deanna Warrick and Marilyn Little.

MR. WARRICK: My name is Tom, Earl T. Warrick. I live at 11308 Clear Oak Circle here in Summertree. It's funny, I wrote this down before one of the Commissioners said it, but we're talking about a rate increase. We should be talking about a penalty charge

to Utilities, Inc. for every month and every week that we have to have the bad water. They haven't improved on it for 20 years. We ought to turn it over to Pasco County and see what they can do. But we ought to have Utilities, Inc. completely out of the picture.

As long as -- if we get the Pasco water and then continue having to pay a fee to Utilities, Inc., that's not fair. They have not -- they have not provided it, which they should not get any of the benefits.

I have filters on my house coming in -- I've lived in five different homes that I have purchased and owned -- and I have filters coming in my house. Before it gets to the water softener, I've got a water softener and I have filters in the refrigerator, and then I've got a reverse osmosis for -- so water that we drink goes through an additional reverse osmosis.

But the problem with reverse osmosis, you -- it takes the water and it takes the clean water out of the water and the bad water discharges. That's the way that particular unit works. So I'm discharging -- for every five pints of water, I'm discharging four.

So it's a -- my sister come down, said, "You've got water running all the time." Well, that water is bad water that I can't drink. That's the way

the reverse osmosis works. So my thought here is that we should -- as you people, you should put yourself in our -- you're servants. You have taken that job to be a servant. Do your job as a servant and realize our problems and come to our rescue. Thank you.

MR. MOURING: Thank you.

MS. WARRICK: My name is Deanna Warrick, W-a-r-r-i-c-k. I live at 11308 Clear Oak Circle, New Port Richey, Summertree. And my husband addressed some of our clear water issues. I'm addressing a letter from Mr. John Hoy, and one thing he said, the average monthly water bill in Summertree over the past year was about $22, plus an additional $34 for sewer. There are other water and sewer systems in Pasco County that charge much more than that. And I'm sorry, I'm not a lawyer, so I may be in trouble, but I wrote beside that "lie."

I have four different water bills from our home, and I can give you a whole year's worth. I save a year's worth of water bills every year. First of all, March 21st, '16, I paid a water bill of 97.31. June 22nd, '15, 117.15. May 21st, '15, 102.51. 4/21/15, 113.84. Where's my $50 water bill? (Applause.)

MR. MOURING: Thank you.

MS. LITTLE: My name is Marilyn Little, L-i-t-t-l-e. I live at 11546 Holly Ann Drive.

I'm new to the community. No one told me about the water, so my Keurig has already bit the dust, clogged up. But I'm not new to Utilities. I had them in Charlotte, North Carolina. I found my bill here for North Carolina to -- when the city took us in, changed the water, my bills were half of what Utilities charged.

I also have a son and daughter-in-law in (unintelligible), who have Utilities -- or Summer Place. And the only thing that I can say about Utilities is that they know how to raise their rates. (Unintelligible).

MR. MOURING: Thank you. Maureen Bellinger, Kathleen McClary, I apologize if (unintelligible), and Sally Shumway.

MS. BELLINGER: Good morning, everyone. I'm Maureen Bellinger, B-e-l-l-i-n-g-e-r, at 11934 Bayonet Lane. I'd just like to agree with what everybody has said and urge you not to let them raise these rates. I'm also a snow bird. I live in New Hyde Park, New York, and there's no comparison to this water. So thanks for coming.

MR. MOURING: Thank you.

MS. McCLARY: Hi. My name is Kathleen McClary (phonetic), 11205 Paradise Pointe Way, New Port Richey, Summertree, Cross Creek. Thank you for listening to all

of us. And I want to thank, by the way, everyone in this room because I'm here three and a half years, and all the work they've done before I even came here, I thank you for that.

I want to start -- when we came, it was a brand new house. So I had a new washer, a new dryer, okay, a new refrigerator, new appliances. Everything is new, so everything should work properly. I should have no problems. Right? I'm going to be really specific because I think it would be a good picture.

I didn't know what hard water was. I found out. Hard water is, like one lady said, I don't want to shower. I have nice, curly hair. It's Brillo. Okay? My laundry -- try drying yourself with a towel. Even though you put dryer sheets in it, it's like drying with sandpaper. That's what I call it, sandpaper. Not comfortable. Same thing for your wearing your clothes. I found out it also destroys your clothes, so you have to spend more money on clothing.

Let me see. What was the other thing? There was more to this. Okay. And then, as I say, I'm a retired nurse. I am extremely concerned because when I see stuff floating in water -- now, you know, there's microbes in there you can't see that are okay, but I see stuff floating in my water. We all use the bottled

water, filters, all that good stuff. I didn't realize -- since I've come down here, I've been to the dermatologist twice, can't figure out why I'm scratching constantly. I have a rash. And it never dawned on me, I've been showering, you know, every day. The dermatologist told me, "You're going to have to stop bathing. Water isn't healthy for you." How insane. There's no reason.

Water is a basic, food and water. I have no problem, you see, with food, but water, that's a problem. I need good water and I need somebody to look at that.

Oh, and we all talk about smell. I'm going to be really distinct here. Okay? I don't smell rotten eggs; I smell feces. That bothers me when I get up in the morning and I go wash my face and that's what I smell. And then you get up in the morning and say, "Oh, my God, how am I supposed to wash with this?"

I don't know of a solution, but I certainly appreciate you listening to me, and I would be thankful for any help that could be done for this. And thank you to all my friends here. Thank you very much.

(Applause.)

MR. MOURING: Thank you.

MS. SHUMWAY: Good morning. My name is Sally

Shumway, S-h-u-m-w-a-y. I live at 11811 Pampas Drive here in Summertree. I appreciate your being here this morning. I support and totally agree with everything that's been so far -- said so far this morning. Thank you.

MR. MOURING: Thank you. Marilynn Lampe, Anne Laboda, and Dawn Bergson.

MS. LAMPE: Hi. My name is Marilynn Lampe, L-a-m-p-e. I live at 12002 Bayonet Lane in New Port Richey. And I appreciate everything that everyone has said. My water is yellow, and I think Utilities does not deserve an increase, and I think we should hook up to Pasco and let Pasco do the interconnection. Thank you. (Applause.)

MR. MOURING: Thank you.

MS. LABODA: My name is an Anne Laboda, A-n-n-e L-a-b-o-d-a. I believe that we have a problem with our water that correlates with that of Flint, Michigan; that is, contaminated water.

I ask this question of the Public Service Commission members: Do you enjoy clean water in your homes? Do you believe that we are entitled to have the same clean water in our homes?

Utilities, Inc. keeps raising our rates based on a very dishonest way of justification. They should

not be allowed to receive any raises at any time ever. Why are they allowed to do business in our county, our state, even in our country? We plead with you and, yes, we beg, we beg you to keep them from continuing business in our area as well as our country -- our state. And, remember, when you return home and turn on your taps for a clean glass of water, that we deserve the same thing.

To our county commissioners, especially Jack Mariano, to Senator Simpson, to Representative Corcoran, Ann Marie and her group, and all involved in rectifying our situation, thank you. However, it took Senator Fasano seven years, seven years to get rid of a different water company, and I believe it was Aqua. Please don't let it take that long for us. Many of us in our 80s may not have seven years. We do not want this company to raise our rates again and again and again, and we don't want them here at all. Thank you.

MR. MOURING: Thank you.

MS. BERGSON: Hello. My name is Dawn Bergson. I reside at 12106 (unintelligible) Avenue. Basically our water stinks, literally and figuratively. (unintelligible) UIF expects us to drink this stuff. Open a hot water tap. What do you get? The water is a horrible stink. The water is filled with sediment that leaves a scale on everything it settles on. It fouls

everything it flows through. Slime clings to everything, in the toilet tank and I'm sure in our hot water heaters too, our showerheads, the faucets, dishwasher, (unintelligible), coffee makers, ice makers, toilets, hot water heaters, all fouled by the buildup or clogged by the scale and sediment in the water. The life expectancy of the appliance is greatly diminished due to the water. At best, we repair what we can. At worst, we hire and pay for a pro to do the repairs. At the very worst, we have to replace the appliances. Then we start all over again.

Beyond the monthly bill, it's costing us big time in dollars, time, and aggravation. We pay for bottled water, water filtration systems, products to remove the scale, maintenance, repair costs, all out replacement of appliances when repair costs more than a new unit when they're beyond repair.

UIF, their latest request to get another rate increase is outrageous. And for the PSC to approve yet another and larger rate increase for UIF is unconscionable. Where is the accountability? No business should be guaranteed a profit of any amount just for existing. Earn it by producing a quality product at a reasonable price. Quit preying on small communities and using them as an ATM machine. Thank

you, Senator Simpson, for the new law that stops UIF and their ilk for treating us like second-class citizens just because of the size of the community. I (unintelligible) law will be enacted in the future to rectify this (unintelligible) guarantee of profits.

UIF, if you can't produce quality water for a price competitive to Pasco County or FGUA, then you don't belong in business. I don't even want you as the middleman. My wish is to be connected to Pasco County and say goodbye to UIF forever. Thank you. (Applause.)

MS. CRAWFORD: Just for the benefit of those coming in, go ahead and get signed in. We are asking that folks limit themselves to three minutes for their comments. We have a light system. The yellow light indicates you have 30 seconds left, the red light indicates your three minutes has expired. If you would, when you come to the microphone, be sure to give your name and your address. Thank you.

THE AUDIENCE: We can't hear you.

MS. CRAWFORD: Shall I repeat? Sorry. Usually volume, with me, is not an issue.

For the benefit of those still coming in the room, please go ahead and get seated. We do want to hear from everybody, so we are asking that you limit your comments to three minutes. There's a light system

on the podium. A green light means you're good to go. Yellow means you have 30 seconds left. Red means you've hit the end of your three minutes. We do want to hear from everyone. Is that the end of that? Yes. So thank you very much.

MR. MOURING: Okay. The next name is Marla Owca, Linda McKeehan, and the Sanders.

MS. OWCA: My name is Marla Owca, and I live at 11927 Bayonet Lane, New Port Richey. I've owned my house since 1999, and I agree with the others that it seems to have -- the quality of the water seems to have gotten worse. I have a whole house filter. I still see residue in my ice cube maker, that sort of thing. I want, and I know I speak for every person here, simply clean, safe water at a fair price. And I thank you.

MR. MOURING: Thank you.

MS. McKEEHAN: Hello. My name is Linda McKeehan. I'm at 11450 Turtle Dove Place. Thank you for coming. And I can imagine you're getting overwhelmed with all these comments that we're making today, but we really appreciate your being here and listening to us.

My water is very bad. We have an irrigation system for our -- watering system for watering our plants, and to me the water that we're getting in our

home is no different than that. The reason I say that is because we put a clear plastic backpack in our bathroom, in our bath shower area, and within a week it's as brown as brown can be. I think every day when I shower, like, "Oh, my gosh, this is what I'm showering in. I'm showering in" (unintelligible). Like, hello, you know. So, yes, I am for hooking up to Pasco County and getting rid of Utilities, Inc. altogether.

And I had a big thing to say, but the people have said so much today that there's no point going over it again and again. So thank you very much. Bye.

(Applause.)

MR. MOURING: Thank you.

MS. SANDERS: Good morning. My name is (unintelligible) Sanders, S-a-n-d-e-r-s. I live at 11230 Kiskadee Circle here in Summertree. I'd like to thank the Commissioners for coming. I really appreciate them sitting and listening to all of us. And I agree with Senator Simpson, with Commissioner Mariano, Ann Marie Ryan, and I don't want to be redundant, everything that everyone has said.

We moved here in June three years ago. And when we bought the house, we did turn on the faucet. It was an inventory (phonetic) home. We turned on the faucet and there was a very bad smell. So we were told

by the builder that the home had been sitting there for a while, and if it was running for a while, it wouldn't smell. That's not the case. It's been three years; it still smells.

So I don't want to be redundant with everything that everyone has said, but, please, take consideration that no rate increase, and also hooking us up to Pasco County water would be great. Thank you so much. (Applause.)

MR. MOURING: Thank you.

Louise Hackett, Lin Jacquette, and Charles Cutria.

MS. JACQUETTE: My name is Lin Jacquette. Hackett. My home is 11340 Cherry Way Lane. I want to thank all of you for coming and spending time with us. You have heard it all: the smell, the taste, the stains, the health issues. I'm not going to repeat everything that we've all been through, but I want to ask you, please, don't let (unintelligible) for clean water and no increase (unintelligible). Thank you.

MR. MOURING: Thank you.

MS. COPENHAFER: Good morning. My name is Terry Copenhafer. I live at 12137 Loblolly Pine Drive, New Port Richey. I would like to say that (unintelligible) Utilities, Inc. raises our rates.

Enough is enough. Our rates have increased 2 percent only once in 11 years. We want Pasco County as our utility provider. Summertree rates go up regardless of whether the economy is good or bad. The price of oil and commodities have gone down rapidly, but we've seen a decrease in rates as well. This is the only increase. Water is a necessity, not a luxury.

We are not satisfied with Utilities, Inc.'s water rates. I agree with everything that's been said already, and I appreciate your time and your consideration for us. Thank you. Thank you all very much.

SPEAKER: Good morning. My name is (unintelligible). I live at (unintelligible).

THE AUDIENCE: We can't hear you.

SPEAKER: Turtle Dove Place in Cross Creek. And, Commissioners, I want to thank you for coming today, taking the time out of your busy schedules to listen to us. (Unintelligible).

MS. CRAWFORD: Sir, could you --

SPEAKER: We are not satisfied with the quality of our water. This turns everything brown. That's all I've got to say.

MR. MOURING: Thank you. John Cuttone and Phyllis Cuttone, followed by Rachel Despoches.

MS. CUTTONE: I'm Phyllis Cuttone, 11822 Bayonet Lane. I just want to say (unintelligible) Utilities, Inc. of Florida (unintelligible).

MR. MOURING: Okay. Thank you.

MR. CUTTONE: I'm John Cuttone, 11822 Bayonet Lane. I agree with all that has been said. And I want to say that water is not a luxury; it's a necessity. Thank you for being here today.

MR. MOURING: Thank you. Annabelle Breese and Cecilia Corbin and Richard Schultz.

MS. BREESE: My name is Annabelle Breese, B, like in boy, r-e-e-s-e. I live at 11734 Bayonet Lane. For 30 years I've lived in Pasco and I've had Pasco utilities. I had a pool, I had a big house, I had a family. My bill was about $50. My water was good. I moved here, one person, I called them when my first bill was at $90. They came out and checked it and said, "Oh, no, there's nothing wrong." I said, "How can there be nothing wrong?" (Unintelligible.)

So as far as a rate increase, absolutely not. I mean, they have the nerve. They've been selling us a product for an extraordinarily outrageous price and it is totally inferior.

I lived in New York, and people that live in New York, we got our water from up state. Our water was

good. When I fill my bathtub here, (unintelligible) because it was yellow. I've never had a bathtub of yellow water.

And I appreciate all the help that you're giving us. I really do. I think it's a shame. People are going to have a problem selling houses. Who wants to move to a place with smelly, yellow water? It's not a selling point. Thank you. (Applause.)

MR. MOURING: Thank you.

MS. CORBIN: I'm Cecilia Corbin, C-o-r-b-i-n, 11825 Carissa Lane. And my point is there are a lot of senior citizens in this community, and because of the terrible water we receive from Utilities, Inc., I have to go out and buy bottled water. I'm 82. I have to lift these heavy cases, and it's not easy for me. And I'm sure it's not easy for a lot of other people in this community. And I drink bottled water for health reasons, not only because the water is so bad, but because I don't want to get sick, more sicker than what I am already. As you get older, you have more issues. Believe me. So that's my main point here, besides the water rate that they're asking for is ridiculous. I think we are entitled to better service, and I would like to switch to Pasco, if you would only approve it. Thank you very much. (Applause.)

MR. MOURING: Thank you.

MR. SCHULTZ: Richard Schultz. I live at 11926 Bayonet Lane, New Port Richey. I have been a Type 1 brittle diabetic, only insulin treated for 42 years. My doctor told me that if I drank this polluted (phonetic) water, that it would push me into kidney failure. That's what I have to say. We need good drinking water. (Applause.)

MR. MOURING: Thank you. Rianda Schultz, Robert Calabro, and Roscoe Curry.

MS. SCHULTZ: I thank you for coming today and for listening to our complaints. We have water that smells like sulfur.

THE AUDIENCE: Louder.

MS. SCHULTZ: We have water that smells like sulfur all the time. We have orange water. It's difficult to clean your dishes with orange water. We ask that Utilities sell to Pasco County, and we would like no interconnect rate to increase.

MR. CALABRO: Good morning. My name is Robert Calabro, and I reside at (unintelligible) in the Arborwood section of Summertree. We, the people of Summertree --

THE AUDIENCE: Louder. Speak up.

MR. CALABRO: We, the people of Summertree, as

well as the millions of Americans who are retired and worked hard all our lives, sacrificed for our families and created wealth for ourselves and, by extension, for the country that we all love. Part of the American tradition is we want people to be born in dignity, work in dignity, and retire and die in dignity. We have the right and the expectation for clean water. We deserve no less. Thank you. (Applause.)

MR. MOURING: Okay. At this time -- (Applause).

MR. FASANO: It worries me when I get to the microphone and y'all start writing something down.

Good morning. My name is Mike Fasano. I happen to be the Tax Collector for Pasco County. And most of you know that I was elected --

THE AUDIENCE: The microphone.

MR. DURBIN: Pull the microphone closer. Pull it -- you can take it out -- take it out and hold it close.

MR. FASANO: Thank you. Oh, there we go. How is -- is that better?

Good morning. For those of you who are not aware, I was a legislator for 20 years and came before the Public Service Commission many a time on different issues. I'm back here today -- I'm back here today on

behalf of the constituents behind me, on behalf of your constituents, in fact, on behalf of our legislators, constituents, on behalf of the Governor's constituents. People are suffering. They're suffering because they get filthy, dirty water, they get poor service, and all they continue to see, of course, are rate increases or requests for rate increases.

As you know, the legislature was -- and the Governor was generous in putting something in a budget, approving it, so this community can finally hook up to the County and get some decent water, and yet this company continues to ask for more and more dollars.

So I would ask you to look at it this way. The customers have been outstanding, when you think about it. They've withstood the bad service, bad water for so many years. They've seen their rates go up considerably, but yet what we have seen is a reduction by those customers in the amount of water that they get. So they've done their job and now, because of the good work by the customers, by the County, by our legislature, yes, even by the Governor, this same company is going to be hooked up to the county and not have to spend any dollars to provide good drinking water, water that you can bathe in, water that you can wash your clothes in, water that you can use in your

household, and they didn't have to do anything. Think about it. They didn't have to do anything. That was all pretty much done for them by the state, by the county, by the Governor, and by the good work of this -- of this community, and yet they want more money.

I would ask you to consider that you not approve anything they're asking for. Wait, wait and see what happens, for that hookup to take place, wait and see what happens, and hopefully, hopefully the County takes over this utility.

You've heard lot of people, I'm sure, today, and I wasn't here and I apologize. I was over in Dade City. Of course, you've heard from those who are actually having to deal with this utility company on a daily basis.

How many times does a customer have to come up, not just before you from these customers, from around the state, how many times do we hear from the same people, similar -- similar voices from around the state of the problems they're having with a private water and sewer company? This is not the first time you've heard the issue. How many times before the Public Service Commission will go to the legislature and say, "We've got to deal with this"? It's just too overwhelming.

Look at the issues in regards to Aloha Utilities, which I think some of you are aware of. It took years and years before we got that issue resolved. Don't force these people behind me and in this community to have to wait more and more years before the issue is resolved.

One, I would ask you to tell that utility company, "Enough." Two, encourage the utility company -- no, not encourage them, force them, put them in a spot to work with the County and sell this utility to the County so the people in this community can work with the local community -- local county and local elected officials. And, three, tell them "No more increases. That's it." Get the issue resolved and then come back to us in a few years. I thank you very much. God bless you. (Applause.)

MS. CRAWFORD: Thank you for coming.

There's a group of people coming in, so we're going to take -- I'm sorry, I apologize to the speaker approaching the podium. If we could take just about a ten-minute break, allow folks to use the restroom, and to allow the folks who are coming in to find a seat. If you have been here and you have been heard, you had your say, and you would be willing to make some room so that some of the folks who come in -- if you want to stay and

listen, of course, that's your -- you're certainly entitled to do that. We are trying to recognize there's a lot of people who want to be heard, and we want to make sure we have a chance to hear them. So if we could take about a ten-minute break and allow folks to have a little comfort break and we'll start up again shortly. Thank you.

(Recess taken.)

MR. MOURING: The first group of the morning -- the 9:00 a.m. group, if you guys wanted to just -- if you signed up at 9:00 and you haven't had a chance to speak yet, just go ahead and get in line and we'll just pick you up as quickly as we can.

We do have a tremendous number of folks that have signed up to speak. So, again, if we can just be efficient with our comments, and we want to make sure that everyone has an opportunity to be heard this morning.

We left off with Roscoe Curry and Patricia Curry. Okay. Well, we can move on with the next speaker then. Whoever is ready to provide comment, we can take them now.

MS. ZOLLO: Good morning. My name is Janet Zollo. That's spelled Z, like zebra, o-l-l-o. I live at 11422 Windstar Court, and that is the Cross Creek

section of Summertree. Two years ago I purchased a house here. If I had known about the water here, I would have never purchased the house. I came from Eagles Point Condominiums where I was president for many years, and we had Pasco County water. We never, never had a problem with our water there. Here I've already changed my washer, my hot water heater. I've put in a $2,000 water system, which really doesn't do anything for me. I buy a case of bottled water every month. I have a household of three. Our water bill has never been less than $106 a month, which is ridiculous.

And I think that UIF should not be allowed to be here anymore. Pasco County should be allowed to be taken over of the company, and I should get Pasco County water where I'll be able to drink it, I won't have rashes, I won't have filthy sinks and toilets and everything else. And I also want to be on record that I agree with everything that was said previously, and I'd like to thank the task force for all their help in getting us to where we are today. Thank you.

(Applause.)

MS. ASHLEY: Hello. Thank you for listening. My name is Susan Ashley, and I'm at 11709 Boynton Lane. This is my dad, who also is there, Nelson (unintelligible).

I wanted to add a little bit more to what has been said this morning because I think seeing the evidence is very powerful. So I would like to invite you all to come to my home where I have not replaced faucets, pipes, and sinks because nothing has changed. And if you saw -- one of the bathroom sinks has a hole in it this size from water; a bathroom basin has a hole in it from water.

Another faucet, bathroom faucet is all jagged and pitted from the water. You can't clean it up. It's -- the damage is done. This is also the water I cook with, I bathe with, I feed my pet with, and my 95-year-old dad lives with. So I think it's time for just a different party to take care of our water needs altogether. I really kind of (unintelligible) up the utility company saying that our water meets acceptable standards. It doesn't. This isn't fair. Thank you.

(Applause.)

MS. ZAPPOLO: Good morning. My name is Susan Zappolo. That's Z, as in zebra, a-p-p-o-l-o. I reside at 11639 White Ash Drive in Arborwood in Summertree. I've lived here for five years as a summer -- as a snow bird, and now I am here permanently. I resided in New York with New York water, and it was absolutely fantastic.

I agree with everything that has been said. I cannot believe that we are subjected to the water that we have here. It is absolutely abominable.

I have good hair. I'm a cancer survivor and I did not lose my hair. The thing is I can see the change in my hair since I've been here and it is terrible.

The lady over here said she did not change her faucets and she did not change her sinks. I had to change everything. Our sinks were pitted; our toilet bowls were black. The water had eroded all the things over here. So since we are living here permanently, we have changed our things.

I also see, since we've changed them in the four years we've been here, this is our fifth, that they are starting to corrode again, and that is because of the water that we get -- we have here.

I agree with everything that has been said. I do want to change to Pasco County. Please get our water changed. Thank you very much. (Applause.)

MS. SMITH: Good morning. I'm Lauren Smith, 12045 Loblolly Pine Drive, New Port Richey. My last name is S-m-i-t-h.

You have gotten an earful this morning about the quality of the water. I just want to make an additional comment about the customer service. I know

that's been an issue as well.

My husband and I get our bills online and we pay that way as well. I don't print out my bills and nor do I save the emails that the bills come attached to. And I registered online with Utilities, Inc. a few years ago. But when I went recently to access our account to make sure that I was putting the right name and account number on our customer service ballot, I was unable to get into their site. I tried again the next day. I thought perhaps just that day it was down. I was getting the same denial of access, so I called the number that we had been given for our, quote, enhanced customer service. I was told that their billing comes from a third party that sends an email each month with a .pdf attachment of the bill. Utilities, Inc. changed their website a year or so ago, and I would have to re-register for access there. However, even if I did that, there was no history available of our bills on that site, nor is there a way to access that information from their third-party biller. Because I did not save a copy of our monthly bills on my hard drive, I have no history that I can refer to for our usage other than asking Utilities, Inc. to print and mail me those bills.

I'm very disappointed that they do not have access to their customers like most companies have for

seeing past history of usage, billing, and payments. Although the need for that information may not be that common, you'd think that they would have that available in this day and age, or at least tell their customers that the information is not available. I requested online billing for ecological reasons. I don't think that I need to use up memory -- or I hope that I would not have to use up memory on my hard drive to have that type of record available to me.

Thanks very much for coming day. I appreciate your help. I request that you deny any increase in the request for Utilities, Inc. Thank you. (Applause.)

MR. COPENHAFER: My name is Wilber Copenhafer. I live at 12137 Loblolly Pine Drive, New Port Richey. Really you've heard a lot of stories today that are true. All we're asking for is clean water at a fair price. (Applause.)

MR. SLACK: Good morning. My name is Staffor Slack. I live at (unintelligible) --

THE AUDIENCE: We can't hear you.

MR. SLACK: -- Boynton Lane. And first I'd like to thank the Commissioners for coming out here today. I know you guys have heard a lot of testimony from a lot of the residents here about our concern here with Utilities, Inc. And I'd just like to say that I'm

a retired veteran of the United States Marine Corps. (Applause.) I've lived in (unintelligible) places all across this country, north, south, east, and west. I even lived (unintelligible) years in Costa Rica. And I have to say the water supply here (unintelligible) has been the worst of any place I have ever been stationed, in any state I've ever lived. I don't think it's fair. And I think for Utilities, Inc. to ask for a rate increase is absurd and bordering on insanity (phonetic).

I also think that the only -- and the best issue for us here in Summertree is to connect with Pasco County, and I do believe we'd get better service and a better water quality. I think that what we're asking for isn't unreasonable. In fact, it's very sane. And I hope that you guys will take the time and consider what we're asking and grant us a -- end our association with Utilities, Inc. and give us a connection to Pasco, I think is the way to go. Thank you. (Applause.)

MS. ERICKSON: My name is Jeanette Erickson, E-r-i-c-k-s-o-n. I want to thank Ann Marie for all the work she's done, all the people in red, who'd rather be home having a cup of coffee, if possible. I want to thank the Commissioners, and I want to tell you a little bit about my experience.

I moved in here in 2012 when my husband died.

I came from Pennsylvania. I lived on the edge of Amish country for 44 years in one house. The water was so great there that Perrier tried to buy the local wells.

I did not know when I bought my property here that there was a water problem. Now I'm thinking that when I go to sell it, I'll be in a real jam because the word is out that the water is terrible -- the color of it, the smell of it, the taste of it.

On Sunday morning when I'm done at church, I have the jugs in my car, the gallon jugs. I also go and buy 24 bottles of water, which is pretty heavy for me to schlep. Then I fill up all these jugs because the small bottles are for my drinking but the large bottles are for my cooking. When I go to cook my vegetables or my pasta, I'm not about to use this water that I can see little squiggly things in it.

So I don't drink it, I don't brush my teeth in it, and I have to use the big jugs of water to cook with. And I'm concerned about the selling of the property.

(Unintelligible) and I do not want Utilities, Inc. of Florida to continue managing our Summertree system, and I respectfully ask the Florida Public Service Commission to deny UIF any rate increase.

(Applause.)

MS. VILLANUEVA: Hi. My name is Olga Villanueva. That's V, as in victory, i-l-l-a-n-u-e-v-a. I live at 11538 English Elm Drive here in Summertree.

Now I purchased in 2005 but I did not move in until 2012. At that time, I did all renovations including all brand new appliances, everything, a new water filter, also the refrigerator has a special filter, and I bought essentially a water filter, one of the top of the line and my refrigerator is the top of the line.

Now every single year I have to call in Sears to repair my refrigerator. To make a long story short, they came in -- every year they tell me the same story. The reason why my refrigerator goes bad is because there's a reservoir, and what happens is -- they've been called here to Summertree for the same reason. Other people have the same problem. The refrigerator has this reservoir, and because of the contents of the water, it erodes that reservoir. So as a result, when I try to get water from my refrigerator, I have floaters in the water. Now this goes on every single year. I have to spend all this money to have my refrigerator repaired, and I really am tired.

And I hope that the Commissioners, please, please hear our plea and let us hook up with Pasco. I

urge you -- because I don't want to keep these expenses. I moved here; this was my forever home. There's nothing I -- there's nothing I can do. And with the laws the way they are, these utility companies, who could keep raising and the law protects them, yet -- oh, and their shareholders, their shareholders can't cry. They've been making so much money off of us all these years, that even if they took -- if they had a loss on their tax returns, they still make out.

So, please, I urge you, on behalf of all of us, to please let us go with Pasco County water. Thank you. (Applause.)

MS. GRAZIANI: My name is Elizabeth Graziani. That's G, as in George, r-a-z, as in zebra, i-a-n-i, and I live at 11801 Ivywood Place.

We bought our place in 2000. We had someone from Utilities come out to check the pressure of our water because our water in Ohio is so -- had so much pressure we had to have a reducer put on. Here if I run water in two places at the house at the same time, I lose pressure in both places. While the fellow was there, I also mentioned to him -- first of all, he said our pressure is acceptable. While he was there, I mentioned to him about the smelly water. He said, "Is it the hot water or the cold water?" I said, "It's

worse with the hot water than it is the cold water." "Well, we could do something for it if it was the cold water, but we can't do anything for it with the hot water." Well, isn't that the same water? It comes from the same line.

Anyway, we ended up putting a water softener in. The water softener was taking care of the problem. We still noticed, yes, we are increasing to have more black stuff in the toilet tanks, and now since October I'm noticing more smell again. And the guest bathroom, because I guess it doesn't get flushed quite as often, has a yellow stain in it that it did not have before October. So our water is getting worse instead of better. And here we are, they're asking for more increases, and we don't want the increases and we would like to have Pasco County. (Applause.)

UNIDENTIFIED SPEAKER: Good morning. And thank you for coming and listening to all of us here. A little bit closer? Okay. I'm a little bit short. Thank you.

I moved here -- or we moved here in November from Indiana, and we lived in a small community of maybe 800 people if everybody had company, and we had great water, you know. I mean, I didn't buy bottled water. I used the water right out of the tap. (unintelligible)

whatever. When we moved here, I turned the water on -- I should say they turned it on at the meter, and the whole house smelled like rotten eggs. And, you know, I mean, I opened the windows to help with the smell. I went out and bought the Wallflowers (unintelligible) to mask the smell. I never, ever had that before.

We just had to buy new filters for under the sink and also for the refrigerator, and that was a cost of $9 for just two filters, as well as, you know, I buy the bottled water for my cats' water pump. I've got, like, running pumps for them. In Indiana, I changed their water in it because it aerated, and I would change it about once every six or seven days. I have to wash their fountain out every two days because it's -- everything in there is slimy. I end up having to -- you have to clean out the pumps and things like this. I wouldn't want to drink it, and I certainly don't want to let my cats drink it.

Ms. Warrick said that she had read that, and I read it in the letter too, that the average bill was $50. I won't even tell you what I told my husband when I read the $50 because I'd like to see it. There are two of us in the household, we shower once a day, I do three loads of laundry a week, I don't think the cats are flushing the toilets, and our bill is never under

$80 a month. And in Indiana, I never gave over $45 a month for us to live there.

The water in my washing machine when it fills, because we don't have a water softener, is yellow. So I use the additive for the laundry soap to -- one is to give it soap and for, two, to add suds, and another for the -- to keep clothes clean. And I end up with a pink scum, a brown scum on the bathroom walls. And there's something pink coming out of the holes (phonetic) on my showerhead, and I have to take bleach to clean it. And it takes me about an hour to clean the shower every week.

And, you know, if they want a rate increase, they definitely need to give us more than what they're giving us at this point. Thank you. (Applause.)

MR. MOURING: Thank you, ma'am. Before you leave, give us your name and address and spell your last name.

UNIDENTIFIED SPEAKER: Certainly. It's (unintelligible). I live at 11325 Golf Round Drive here in Summertree (unintelligible). Thank you.

MR. MOURING: Thank you.

MR. JOHNSON: First, I'd like to thank the Commission for coming down. I am -- my name is Jim Johnson. I'm the property manager for Arborwood, which

is one of the communities here.

THE AUDIENCE: Louder.

MR. JOHNSON: I've heard a lot of people talking about how bad their water is, what it looks like, but I think the picture speaks a thousand words. This is after a fresh flush. I couldn't believe it either. And even after that, I didn't believe it, so I turned around and turned on the shower. That's black water coming out of the shower onto the tile.

The other -- the other issue is the Arborwood budget for water, irrigation water reached $178,000. We decided to put in our own wells. In doing so, we reduced Utilities, Inc.'s income, and at this point they're looking to suck it back out of the residents, and I just don't think that's fair. We've had $35 a month per household for irrigation water, and now they want to raise the residents' rates to make up the difference. And I just don't think that the -- that the utility company deserves an increase. So, please, just say no to the rate hike and yes to the County of Pasco water hookup. Thank you. (Applause.)

MR. COOKE: Yes. My name is Ken Cooke, 12017 Boynton Lane (unintelligible). You've heard about the bad water. I would put the same comments in. It's totally true. But there's also the fact that this

company has put zero into the infrastructure as well. They've done very little to actually earn their money.

At my house, I had a problem under the sink. I knocked a tube off the -- one of my supply taps by accident. I ran out to shut the tap off; there wasn't even a handle on my shutoff at the meter. So I contacted Utilities, Inc., after I used a pair of pliers to shut it off, and asked them to put a simple handle on it so if I had an emergency, I could shut my water off. "Oh, yes, we'll pass it along." A month later I made the same request. "Oh, yes, we'll pass it along." Nothing happens. Now two months has gone by. The third month I called, and their suggestion was, "Well, if you have an emergency, just call us and we'll come and shut your water off." No, no, that's not -- you know, this is a simple handle. What would it cost? Like $4 for the handle (unintelligible) on my shutoff. But they weren't even willing to do that. So they really are doing absolutely nothing for the money. They're getting their product for free out of the ground, putting very little treatment to the water, and then they're making the profits, very large. I think we need to have quality water at an affordable price, and I think to do that, we need to switch over to Pasco County. That's all I have to say. Thank you. (Applause.)

MR. MOURING: Before we move on, we're trying to get the last group from the morning, the 9:00 a.m. sign-in. The last couple of names, I think, were from the 11:00 group. So if there's not anyone left from the 9:00 a.m. sign-in sheet, then we'll move on to the -- okay. If we could take the two that have raised their hands, then we'll move on and I'll call the names in order for the 11:00 group. Thank you.

MR. LEOCI: My name is Paul Leoci. I live at 11326 Clear Oak Circle. And (unintelligible) everything that's wrong with our water. I'm here to get the message through. I wish this would get to the CEO of Utilities, Inc. Right? What he has to do is take our poor quality water to his neighborhood. Right? Use it, pay for it. Right? And when the (unintelligible) goes up with the rates if he wants to then, you know, and we'll see how long it takes him to get rid of the scent (unintelligible) if it's in his neighborhood. Okay.

You know, you have to (unintelligible) let people live the remaining years we have in a healthy, happy condition. Thank you very much. (Applause.)

MR. KEHOE: My name is Walter Kehoe, 11613 Bayonet Lane, New Port Richey, (unintelligible) section of this community.

The water coming out that we have is just

terrible, and everybody has alluded to that all through the day today. They have no conscience when it comes to how they serve their customers. In fact, the only company that treats their customers with less respect are the (unintelligible). But they're doing the same thing to our community. They're strangling us one way or the other. If it's not financially, it's with the water. And then (unintelligible). It's all the additional stuff that they don't even take into consideration.

And there's been very few people here that didn't mention what happens to their appliances. That sulfur smell that you have accumulates in rubber, the artificial rubbers that are in (unintelligible) and stuff like that, they're in the washing machine, your dishwasher, your gaskets on your refrigerator, all of those appliances are aging prematurely. So that just throws thousands of dollars of appliances that are going to come apart in five years rather than 15 years, and you add that to the exorbitant rates that they're charging, we're just getting raped here to there. So there should be no reason to consider giving a raise to this company. We should find out ways of having them decertified as a utility. They should not be -- they should not have a certificate to (unintelligible) for

anybody in the state. Thank you very much for your time. (Applause.)

MR. MOURING: Okay. We're going to move forward with calling the names of the 11:00 group as they've signed up to speak. We just wanted to make sure that we got the 9:00 a.m. group in first. Okay. I apologize for that.

MS. SCHEIFLA: Hello. My name is Lorraine Scheifla. I live at 11150 -- pardon me -- Clear Oak Circle in Cross Creek. And I agree with everything that's been said here. Even though I have spent hundreds of dollars on softeners, five-stage osmosis, the water is still totally unacceptable. Thank you. Thank you. (Applause.)

MR. LUCATUORTO: I finally get to talk. My name is Peter Lucatuorto. The address is 12012 Boynton Lane. I've heard a lot of things said today. I kind of agree with all of them. I'd like to cut to the quick as to why I really think some of the -- I have something to say, and that's basically on the characteristics of the companies that service us with water.

We have Utilities, Incorporated. They are a profit-oriented organization. Their loyalty goes to their shareholders. Their responsibility is to enrich their shareholders. There's nothing wrong with that.

That's their job. Okay. But unfortunately they do it on our back.

Now two rate increases ago we were in the 38 to 40 percent area. Now once that goes in, you compound it with the last time, which was in the 20 percent area. This time going in, if you take what they're asking for, that's another 20 percent. I think you know what compounded interest is. So what we're doing is we're not going up 20 percent. We're going up substantially more than that. And what have they done for it? Nothing. What they are doing is what they're paid to do by the corporation. They're making money for them.

The big difference between them and what we're asking for is we want to use Pasco -- Pasco water because Pasco water works for us. They are a real utility. They're not for profit. Okay? When they are -- when we have a problem with them -- we elect the guys who run that, okay, so we have a lot more control over it. And I think that's the biggest difference here. You have two different types of organizations. I want to work for the organization that I have some control over, that there is some fairness involved in this.

Utilities, Inc. is like a leopard that will never change its spots. Every time -- every three years

they're going to ask for an increase. Whether they do something for it or not is something else. So far they haven't. But I think that the people who have experience with Pasco have a good experience, they've said that. There are people here who have tasted that water. And I think it's in our best interests to go with Pasco water.

It's -- you guys have a tough job. You've got to be like Solomon splitting the baby in two and giving them both -- you know, one is his mother -- until one of them says, "Don't do it." Okay. You have to (unintelligible) for the utility as well as for us. So we're asking you really to look into this as fairly as possible, as fairly as possible. And in the future if we do have a situation where you're choosing a new utility company, we would really prefer it to be a public utility, not a private utility. Thank you very much, and thank you for coming. (Applause.)

MR. GRAZIANI: Antoine (phonetic) Graziani, 11801 Ivywood Place. I have a few comments as to what my wife mentioned earlier. I have a problem with my hot water tank clogging at the base of it. I have flushed frequently. And also I have the extra cost of softeners that I have to buy and put into the system so that I can have halfway decent quality water, and I'm still getting

a lot of muck in the bottom of my hot water heater. I appreciate if we could change the system so that we could have quality water. Thank you very much. (Applause.)

MS. LASECKE: Hello. My name is Gail Lasecke. I live at 11738 Bayonet Lane. I'm glad to be here today, and I'm glad you're here today.

I worked for a regulated utility for many, many years, and I worked at a law firm handling these types of cases, and I've been before the Public Service Commission many times on rate cases in other locations. I know that they listen to people when they have a fair complaint, and I know that they can take action. And when they take action, the utility that is supposed to be listening to them are supposed to obey them and do what they have to say.

This utility has taken advantage of people because they know they don't have the money or the resources to fight them. This small group has made a big point, and I, coming from that kind of a background, don't understand why they still have a certificate to provide water here. It should have been revoked long ago. And I hope today that people take action on this, and I thank you for hearing us. (Applause.)

MS. RYAN: I just want to make sure that

everybody knows that they are going to be calling people up in the order that you signed in. They were just finishing up with the 9:00. So please be patient. As soon as this whole group is finished, then they're going to continue on with the sheets. It's really important that you be heard, but also if everybody could be as brief as possible because we want your voice heard. Thank you.

MR. MOURING: Thank you. Lee Webster, Fred Stall, and Linda Smith.

MR. WEBSTER: Good morning. Thank you for being here. We appreciate your support. Peter is handing out some filters. It's kind of a show and tell.

The white filter, if you read the label, it says you change it every six months. The brownish filter I changed about three weeks ago. That's what we get for water. If you go to the website for Utilities, Incorporated, they claim superior quality. "We are dedicated to the purity and safety of our water supply and provide our services in the safest, most efficient, sound manner possible." They also go on to say -- well, they also claim efficient operations and exceptional service. I think they ought to include in there caveat emptor, let the buyer beware.

On this sheet they say, "Why is UIF requesting

a rate increase?" It's requesting a rate increase in order to recover the cost of operating a utility and allow the company the opportunity to earn a fair rate of return on their investment.

My final shot is this, Utilities, Incorporated has a license to steal, and we need to hook up to Pasco County. Thank you. (Applause.)

MR. STALL: I'm Fred Stall, and I'm one of the original task force members. We've been working on this for -- I've been at it for three years. Ann Marie has been at it for 15 years. And I think it's time that we send Utilities, Inc. packing back up to Canada where they came from, you know. (Applause.) We don't trust them anymore.

It's -- I made this comment about two years ago when we were having a meeting, a phone meeting with them, and I got chastised a little bit by them. They didn't like it too well. But I can't really say as I blame them, but it's still -- it's time, folks. It's time. We need Pasco water to take us over and run it like a business should be run. And I hope the Commissioners are well aware of what's going on. And we thank you a lot. Thanks for coming. (Applause.)

MS. CRAWFORD: We didn't get your address, sir.

MR. STALL: Oh, it's 11637 Cocowood Drive.

MS. CRAWFORD: Thank you. Just one comment. Remember, we are broadcasting all of these meetings, and so I appreciate the enthusiasm, but if you're clapping while people are speaking, it's disruptive and it makes it hard for the people who are observing us online. Please, again, your support is well noted. We want to make sure everybody is actually heard, though. Thank you.

MS. SMITH: Good morning. My name is Linda Smith, and I live at 11036 Paradise Pointe Way. My husband and I bought a house here two years -- almost two years ago, and this is the first time in 30 years that I've been in Florida that I've had a problem with water. We don't have quality water here in this community, and I really hope that the Commissioners will help us. I'm here -- I hate public speaking, I'm nervous, but I hope that you help us. All of our residents need your help. So, please, we ask that you deny this increase in the rates to Utilities, Inc. and help us to get Pasco County water. Thank you very much.

(Applause.)

MR. MOURING: Thank you. The next names will be Doug Smith, Frank Micale, Peggy Looney, and Sarah Moore.

Okay. We'll take those.

MR. DONAHUE: Good afternoon. My name is Joe Donahue. I live at 11642 Holly Ann Drive in The Villages.

What I wanted to say has been said time and time again, so I'll make it brief. Thanks very much for coming for us and for giving some serious consideration in denying the request for the increase, and we hope that it's transferred over to Pasco water. Thank you. (Applause.)

MR. MOURING: Thank you.

MR. BERGER: Hi. My name is Dick Berger. I live at 11431 (unintelligible) Place. I'm number 67 on the list.

MR. MOURING: Thank you.

MR. BERGER: I've just got a couple of points. I've been associated with the military for 42 years, both as active duty and reserves civilian. I've been all over the world. In some places I had to drink yellow water. We live in the United States; we don't have to do that.

Second, I just got back after a trip. We had to flush the toilets. There was scum on top of the toilets. The dog dish, we had to empty that out. There was a scum on there.

And the third thing I'd like to say, I'm glad I'm not raising my children drinking water like this. Thank you. (Applause.)

MR. SMITH: My name is Douglas Smith. I live at 11036 Paradise Pointe Way, Cross Creek. And, number one, I want to thank the Commissioners for coming and listening to our complaints, which are (unintelligible). We're doing a lot of suffering, especially the older homes. We bought a home here two years ago, and the first thing I did was, following the water coming out of the faucet, was install a water softener. The plumber came and hooked up the water softener. And as he was leaving, he looked over at my (unintelligible) the check valve for the water source and the backflow preventer, I think that's what it's called, and it was leaking. And he says, "Oh, I can fix that too." And I said, "Well, what's that going to cost?" And he says, "Well, approximately, you know, 100- or $200 to get it cleaned out because of all the chemicals that are sitting in there and deteriorating the rubber seals and the valves that were in there."

This is a brand new home, and it's disgusting, believe me. I've never -- I've never ran into water like this in my entire life. And I think the increase that they're asking is shameful. We should have Pasco

water. In fact, Pasco should take over. I want the other utility company out of here. Thank you very much.
(Applause.)

MR. MICALE: My name is Frank Micale. I live at 11030 Paradise Pointe Way. I'm sure a lot of this is redundant. We appreciate you all being here today.

Our water smells like rotten eggs. It turns tubs, toilets, et cetera, brown. The cost is high. It doesn't cover our cost of so much bottled water we have to buy because it's not fit to even give our animals.

On a sidebar -- as a sidebar, I should say, every week, as I'm cleaning the house, or my wife, our spare bathroom very rarely gets used and I'm in there on a weekly basis with a pumice stone trying to get the yellow ring out of the toilet. I shouldn't have to do this.

So we implore you, implore you to help this community get rid of Utilities, Inc. forever and hook us up to Pasco water. Thank you for your time.
(Applause.)

MS. LOONEY: Good morning. My name is Peggy Looney. I live at 11139 Kiskadee. I have two things to address. The first one is budget. I'm a retired Florida (phonetic) teacher. I am -- I'm on a strict budget. I have $200 per month for food and all. My

water bill is $100 at least. With this rate increase, I will have to choose between the water and the food. I do not want a rate increase. If this should happen, this is going to make me find another place in this area to give me clean water.

Number two, what does horrible water mean to you? When I moved to Summertree, I bathed in rust, mud, and the smell of rotten eggs. I did that for three months. And I saved and I got myself a water purification, an osmosis, a charcoal, and also a softener to get rid of this. It was very expensive. I still have problems with the water quality. This is horrible water, and that's what it means to me. My prayer is get rid of Utilities, Inc. Thank you.

(Applause.)

MS. MOORE: Sarah Moore, 11707 Alderwood Drive. I want to thank you for listening to our concerns today. We moved into our home a couple of years ago when I purchased it from Ohio for a winter residence only. We have had to have filters from the time we moved in for drinking and cooking. The laundry, when we do the laundry, the machine -- the laundry, of course, is wet at that moment. The odor is very pungent. It's always an unpleasant odor and taste. We also implore you to vote against any further increases,

and we'd like to hook up to Pasco. And thank you very much. (Applause.)

MR. MOURING: Thank you. Ruth Silva, Samuel Silva, S.A. Fassnacht, and Frank Ventura.

MS. SILVA: Ruth Silva. I live at 11250 Kiskadee Circle. Thank you for being here and listening to our concerns. I agree with everything that's being said here because I've experienced the same thing as everybody else.

And what I would like to add is please deny the increase, but, more importantly, that we connect to Pasco County. Thanks so much. (Applause.)

MR. SILVA: We have heard everybody say the same thing over and over again. How much more can we say so that something is -- could be done about it? The bottom line is that we want the utility out of here and we want Pasco County to take over. That's it. (Applause.)

MR. FASSNACHT: Yes. My name is Ken (phonetic) Fassnacht. I live at 11507 Pampas Drive in Arborwood. And I just want to say the taste and clarity of the UIF water is very inconsistent. Some days it's just bad, other days it's horrible. However, the rate increase requests are consistent. They never stop coming. I just wish I had about one-half of the cost

over the past years of pitchers and filters and bottled water. I'd be very happy with that.

I also want to thank the PSC, Public Service Commission, members for being here. And also (unintelligible) Congressman Wilton Simpson there, I also want to thank him for being present as well. Thank you all. (Applause.)

MR. MOURING: Thank you. I'm going to call a few more names. Beverly Miller, Dennis Smith, William Carpe -- I apologize, it's difficult to read here -- and Terri Keller.

MR. VENTURA: Hi, how are you doing? I'm Frank Ventura. I live at 11721 Aspenwood Drive. Diane and I, my wife, we live here. We've been here for seven months now. We're new residents. The water sucks.

THE AUDIENCE: Louder.

MR. VENTURA: The water sucks. It's terrible. (Applause.) I (unintelligible) all bottled water.

I had the Utilities, Inc. come in after a month to test my water. They came in, they did test samples, and they're saying -- they said there's nothing wrong with the water. I'm looking right at the wall and the toilet, said, "Look, it's brown. In the sink, it's brown. Are you kidding me?" I said, "You drink it. I

don't want to drink it." Come on, are you telling me this water is good and now you're asking for more money? Are you crazy? There's something wrong. Get them out of here, please. Thank you. (Applause.)

MS. MILLER: My name is Beverly Miller. I live at 11618 English Elm Drive. Hi, everyone. And I'm not good at public speaking. I just want to have my voice heard and let you know that I want a change in this water, please. I've spent thousands of dollars on purification and things and I still have problems. So please help us. (Applause.)

MR. SMITH: Hello. I'm Dennis Smith. 11719 Alderwood. I've been here two years almost. The water is terrible (unintelligible), as you know. I replaced my toilets because I couldn't get the ring out of it, and it's coming back.

And the big thing, I have two towels here. These are both the identical colors. This one, the gray one is four months old. You know, it's unbelievable how bad the water is here. Thank you very much. (Applause.)

MR. MOURING: Terri Keller, Sarah Antunez, Pauline Shaver, and Elaine Park.

MS. SHAVER: Hello. My name is Pauline Shaver, and I live at 11507 Yellow Birch Court, New Port

Richey. I thank everybody here for coming, especially the Commissioners. We appreciate that. I don't know your names, but you've got to get a new picture. I'm just saying you're much better looking in person.

The water here is really, really bad, and we've, like everybody has said, we just want to get Utilities, Inc. out of here.

And I was going to bring you some samples, but that wouldn't have been very nice. Thank you.

(Applause.)

MS. ANTUNEZ: I'm Sarah Antunez, 11304 Mollymawk Court. Thank you, staff and Commissioners, for being here in Summertree. We totally appreciate you coming, especially after we've had to come up there the last time.

I moved into this community approximately eight years ago. I enjoy my semi-retirement here. But it seems like the water in this area has gotten worse. When I moved in, the first thing I saw was they were flushing water. I was told, "Oh, by the way, you better get a system to filter out everything you've got because the water here is not that good." That was told to me by the Utilities, Inc. gentleman that was flushing the water. Which I went out and purchased, and I've had to repurchase because what I had after five years or six

went out. So I've been putting a lot of money into filtering systems, drinking bottled water. My health has actually gotten -- has deteriorated because of this. And I'm sure there's a lot more people in this community that are elderly that have got poor health conditions after they've been in this community. The water stinks, even with all this flushing the systems and all that.

Also they flush continuously in here. And you can almost say that the ecosystem is going to pot back here. We have a lot of animals back here. And for them to have their area to wander around in, I'm sure they're drinking the same darn water we are, and I have (unintelligible) that they don't like it either.

So basically also living on a fixed income, I shouldn't have to be paying $60 a month for water. I'm only one person. I mean, you know, it's -- and I do happen to have a spare bathroom. I do go back and forth because everybody is correct, the water in your toilet tanks are terrible. It's got slime in it, it smells. And we cannot continue to do this.

The management at the -- everyone else should not be getting the extra money that we should be saving. We never got an increase in social security. Why should they get a rate increase? We're on a fixed income throughout this community. Please, please, I prefer to

have Pasco utility water. I've lived in many states and throughout Florida, and I've never had a water problem that I've had here. I don't want to move out of the community, but if it continues, I have to think about myself. And I'm sure a lot of people here would love to stay in this community, but with the rate increases continuing, it's not going to help this community. Please give us a rate -- tell them no rate increase. We want Pasco utility in here. We do not need anybody else but Pasco County. Thank you. (Applause.)

MR. MOURING: Elaine Park, Patricia and Dennis Rutkoski, and Elaine Whitehead.

MS. PARK: My name is Elaine Park. I live at 11641 Rose Tree Drive in the Arborwood section. Years ago I was one of the first bus trips that went up to Tallahassee asking for a stoppage to the rate increase that Utilities, Inc. was asking for, also complaining about the water, the quality of it, and the smell. I ask you, please -- this has been going on for so many years -- please help us. Thank you for coming, and thank you for the senators and all those that are working to help us get improvement. Thank you. (Applause.)

MS. RUTKOSKI: Can you hear me? Okay. Hello, Commissioners. Thank you for being here. My name is

Patricia Rutkoski, and that's 11311 Merganser Way. And I'm so sorry that you have to sit and listen to all of this. I have all the same water problems that everybody else has already said, and I'm sorry that you have to keep hearing and hearing this. It is a big problem.

We've been here about a year and moved here from California, and I have never owned a water system, never bought a water softener. The salesman at the sales office just said, "Oh, you might want to get a water system." And I told my husband, "No way. I've never bought a water system. We don't need that." And we were here two weeks and we had a water system because it smelled so bad. I couldn't stand to brush my teeth with egg-smelling water.

But the thing is, what I don't understand is if you go to Wal-Mart and you buy something and it's defective, you return it, you get your money back. And now we have bad water that's no good. Why -- not only do we have to pay for it at all, we should be getting refunds. They should have to refund us for selling us defective water. (Applause.)

So that's all I have to say, and thank you again. And I hope that we're almost at the end of this so you don't have to hear too much more. And don't drink out of the water faucets. (Applause.)

MR. MOURING: Thank you.

MR. RUTKOSKI: I'd just like to say I agree with everything that my wife said and everybody before us. Thank you. (Applause.)

MS. WHITEHEAD: My name is Elaine Whitehead. I live at 11115 Clear Oak Circle in Cross Creek. And all I could say is I agree with everybody else, the complaints, the water is smelly, very bad, and it's poor water quality at a premium price. And our sinks also are getting all pitted in there from the water. So that's all I have to say. Thank you. (Applause.)

MR. MOURING: Thank you. Arlene Barnett, Robert Barnett, Patricia Jay, Sandra Schweitz, and Lynn Burns.

MR. WHITEHEAD: My name is William Whitehead. I live at 11115 Clear Oak Circle. Everyone has made it very clear how bad this water is. This water is so bad that it's third world water, and third world quality is not acceptable. Fortunately there is a solution. The solution is a two-step one.

One, the company has to be put on notice that they will not get an increase. The second part of that is we really need to connect to Pasco water. Thank you very much. (Applause.)

MR. MOURING: Thank you.

MS. BARNETT: My name is Arlene Barnett. I live at 11539 Aspenwood Drive in Arborwood. We've been here four years. Prior to living here, we lived in New Port Richey, Pasco County, for 15 years. We had Pasco water. We were pleased with the rates, we were pleased with the quality of the water. We would like that again. Thank you for listening to our complaints. (Applause.)

MR. BARNETT: My name is Robert Barnett, and I live with my wife at 11539 Aspenwood Drive. And the only complaint I really have is all the appliances we have to provide while we're living here -- replace this, replace that, refrigerators, washers. I had a brand new washer when I moved in four years ago for $900 and I had to replace it. They couldn't get it apart to take the part out that had to be fixed. That's all I have to say and (unintelligible). (Applause.)

MS. JAY: My name is Patty Jay. I live at 11213 Clear Oak Circle. I've experienced everything they're telling you here, so I'm going to keep it brief. It's time to allow us to go to Pasco County, it's time to let the county do the interconnect, and say no to the rate increase. Decertify the utility. (Applause.)

MS. SCHWEITZ: Hello. My name is Sandy Schweitz, 11621 Holly Ann Drive here in Summertree. We

moved in about two years ago, very happy with this community. Little did we know it was not Pasco water. And that's another story about how everyone figured that it was Pasco. So, anyway, we went right out and bought the softener and everything. Except in this community, with all the elder people, no offense, and with all the people that have challenges, it is hard to maneuver the bags of salt, the cases of water, et cetera.

We really do need good, pure water. Coming from upstate New York, it was never an issue. We come here and now it's a big issue as far as resale. But as far as having good water that you can live with and have every day, I don't understand why Utilities, Inc. has -- they have rights. They have all the rights. We have none. We're just fighting our way through this. Please help us, everyone, to get good, clean water from Pasco County. Thank you. (Applause.)

MR. MOURING: Ray Burns, Barbara Doyle, Betty Capone, Alphonse Prior, and Maria Devasconcellos.

MS. BURNS: Hi. My name is Lynn Burns. I live at 11403 Windstar Court. I've got to tell you, I think this is a joke. I could not believe that these people are asking for an increase. It really should be considered whether you're going to revoke their license, not whether you're going to reward them with more money.

I think the purpose of government is to protect -- government agencies like this, is to protect us all from companies like this that are supplying really a bad product, and I believe that they should actually be encouraged and possibly licensed revoked to get the idea. It's ridiculous. And I just -- I can't believe they're asking for it. I mean, are they for real? I mean, they've got to be kidding.

And, anyway, I do hope that you won't give them an increase and that you will encourage them to go the way like North Carolina did. Florida needs to get on board and kick them out. Thank you. (Applause.)

MR. BURNS: Raymond Burns. Ditto what my wife just said. (Applause.)

MS. DOYLE: My name is Barbara Doyle. I live at 11413 Bloomington Court. I am really tired of paying more and more for water that looks like pee and smells like sewer. We need Pasco County to give us clean water at an affordable price. It's time for UIF to go. Thank you. (Applause.)

MS. CAPONE: Hi. My name is Betty Capone, 11444 Bloomington Court. I just want to thank you all for coming this long distance. I hope that you listen to what we say because it's really important. I moved here 12 years ago, and the water has been terrible ever

since -- black slime in the toilets, you can't drink it. Now I can't carry the water anymore. I got to buy the water, have them put it in the car, I got to go home, take bottles out, carry them individually. It's too much. We need Pasco water. I came from Pasco water, and there's nothing wrong with it. And I hope you vote that way and not give them an increase. Thank you. (Applause.)

MR. MOURING: Thank you. We'll call Rita Cox, John Cleary, James (sic) Cordero, Lorraine Smith, and Terry Truelove.

MS. DEVASCONCELLOS: My name is Marie Devasconcellos. I live at 11601 Golden Rain Drive in Arborwood. I've been here 17 years, and I never thought that every year the water could get worse, but these people outdo themselves every year. It's gotten to a point where it's just impossible to live with water of this quality. Please help us out. We're seniors. It is unconscionable that they want this much money. They should pay us to use their water. That's the bottom line. Please help us. Thank you so much. (Applause.)

MS. SMITH: Lorraine Smith, 11410 Bloomington Court in Cross Creek. The water color is questionable. Should we pay more for this? The water literally stinks. Should we pay more for this? Utilities, Inc.'s

service stinks. Should we pay more for this? I say no, no, no to Utilities, Inc.'s rate increase and yes, yes, yes to Pasco County water. Thank you. (Applause.)

MS. TRUELOVE: Hello. I'm Theresa Truelove, 11427 Windstar Court. I'll make it short. I'm disgusted with the water, and the water, it's bad enough to gag a maggot. (Applause.)

MR. MOURING: Thank you. Jean Brown, Penny Szafran, Pete Szafran, David -- I think it's Viges.

MS. COX: Rita Cox, 11611 Pampas Drive in Arborwood. Asking for a rate increase for the poor quality water Utilities, Inc. provides is unconscionable. We want the Public Service Commission to deny any rate increase and help us to hook up with Pasco County. Thank you. (Applause.)

MS. BROWN: My name is Jean Brown. I live at 11949 Loblolly Pine Drive in The Villas. I just want to say that I do agree with everything that has been said, plus besides the black water in the toilets and all the smells, we have been drinking bottled water for 15 years ever since we moved here.

My first water bill was astronomical, and I could not believe it because I had Pasco utilities before and it was very clear and good water and very reasonable.

I also have problems with my skin from this water. The doctor -- I'm going to the doctor's today again to try and figure out why I have this problem with rashes. Because I'm showering in this water, have been doing it for 15 years, and for ten years I've been fighting rashes. And the doctors keep telling me to use a cream, use a cream. Well, I'm going again today to see what else they can do for me.

And I thank you. We do need Pasco utilities.

MR. MOURING: Thank you.

MR. SZAFRAN: My name is Pete Szafran. I live at 11125 Kisdadee Circle. My wife and I moved here a couple of years ago, and I'm really surprised at the quality of the water. We agree with everybody else that Utilities, Inc. should be decertified and we should be going with Pasco County. My belief is that, you know, there are (unintelligible) in this world like air and water, and governments are taking care of those things. When we turn them over to private utilities, we're doing the wrong thing. We need to go back to government control of that. Thank you. (Applause.)

MR. CLEARY: My name is Jack Cleary, 11907 Boynton. I worked for the government for 38 years and retired. I've lived all over the country with U.S. Marshals, and this is the worst water I've ever drank.

The only way you can clean your toilet is use uric acid. I've never used that in my life to flush a toilet. We should tie up to Pasco County and get rid of Utilities, Inc. Thank you. (Applause.)

MR. MOURING: I have Don -- I think it's Woock, Richard White, Frank Lasecke, and Mary Ann Sheakoski.

MR. VIGES: My name is David Viges. I live at 11543 Holly Ann Drive. And we use bottled water, of course, to drink. And they're asking for a rate increase basically. They say, in order to recover their costs. Well, they're recovering their costs because we're using less water, they say. When I used to work for state government, a state government, and when our services went down, we had to lay off people and reduce our costs, not charge more to the people who we were servicing.

They also say they want a fair rate on return of investment. Well, I would think they would have to invest something before they get a fair rate. Thank you. (Applause.)

MR. WOOCK: Don Woock, W-o-o-c-k, 11451 (unintelligible) Place, Cross Creek. I've been here 14 years. I've been -- I've had two different kinds of cancer since then. I object to the condition

of the water and I object to the -- well, everything. And I thank you for coming. (Applause.)

MR. MOURING: Thank you. I have Sharon Lasley, Vickie Jennings, Stephanie Beonducci (phonetic), and Geno Beonducci.

MR. WHITE: Yes. Thank you for attending. My name is Richard White. That is 11600 Stock Pine Drive. I've been here for 19 years. I have had bad water for 19 years. I set up a (unintelligible) every two months to clean out my toilet tanks because they would turn black. And the flappers, I don't know how many times I've had to replace them because of gunk that won't let the flapper shut. I've had black goop from out of my (unintelligible) faucet, which is in the second bedroom.

Several years ago we got a letter from Utilities, Inc. explaining why they were asking for a large hike in the utility rates. It was to build a new treatment plant and take care of our water problems. It was never done.

A couple of years later, we get a letter and they say that they found a least expensive way of doing it, which was to cut down on chlorine and add ammonia. I can't believe they would add ammonia. Ammonia and chlorine in sufficient amounts is (unintelligible). And I think just -- all I have to say in all fairness,

Utilities, Inc. water will put out a fire. Thank you. (Applause.)

MS. BEONDUCCI: My name is Stephanie Beonducci (phonetic). I live at 11921 Loblolly Pine in The Villas. I want to thank you very much for listening to us today. In the interest of brevity, I want to say I agree with everything everybody else has said, and there is no way a utility should receive a rate increase for undrinkable water. (Applause.)

MR. BEONDUCCI: I live with my wife. There's just two of us, and when we moved here, we lived in Arborwood, and my bill rose to $120 four years ago, five years ago. And so I'm going to cut this short. It's an experience I had with the Commission in Tallahassee and Utilities, Inc. And I called them and complained after three or four plumbing and other -- the Utilities, Inc. plumber came in and determined that we didn't have a leak and we were using that water. So over two months I charted my water use. My neighbors thought I was nuts because I was going out and reading the meter 6:00 in the morning, every other hour during the day, and at 9:00, 10:00 at night. And nobody could come up with the hundreds of gallons of water that they indicated I was using saying I had a leak. The plumber said I didn't have a leak and their plumber said I didn't have a leak.

After several letters sent to various elected officials, I got a call from the Commission in Tallahassee. She investigated it and my water bill went away for four months that they were overcharging. They wanted me to fix my meter. That was not my meter. That was their meter. It was wrong. So they want me to pay to fix their equipment so that they don't overcharge me. I've never heard of anything so stupid.

But the Commission came in and they corrected everything. I got a new meter, my water was charged at base rates. And what I found out after talking to my neighbors is they felt that you have to complain when you first move into this community or your bill will go up. That is an indication of what a predator company is. They prey on their people. We don't need predator companies in this community. No rate increase and Pasco water. Thank you. (Applause.)

MR. MOURING: Gayle Krich, Jeanne Klarman, Deanne Rodriguez, Albert Rodriguez, and Kevin Parrot.

MR. CORDERO: My name is Charles Cordero. That's C-o-r-d-e-r-o. I live at 11138 Clear Oak Circle in Cross Creek.

Ladies and gentlemen, thank you for your presence here. Okay. Is that better? Okay. I don't see -- okay. You've heard all the stories of bad water,

equipment, everything. Okay. To justify a rate increase, how can Utilities, Inc -- when because of the product that they are supplying me, the filters that I was buying at Home Depot and Lowe's was not sufficient to clear up the problem.

I went to a plumbing supply. I acquired a filter that's supposed to be able to filter out 25,000 gallons of water. Well, I'm sorry to say, but it only lasts between 14- and 16,000 gallons because the water is so bad it clogs up the filter. In fact, we lost so much pressure, they came out, they checked the water before the filter. It was at 55 pounds per square inch. After the filter it was 22. I changed the filter and, lo and behold, the pressure on the other side of the filter was fine.

So I have a total cost of filters, bottled water for cooking and coffee and such, and a single bottle of water for drinking -- just those items alone come to over $875 a year. Now how can a utility company justify rate increases when the product that they're supplying me costs me that kind of income that I have to spend? I'm sorry. You know, I don't see how they can, you know, show their faces in front of you. So thank you for your time. (Applause.)

MR. MOURING: Thank you.

SPEAKER: (Unintelligible) 11911 Carissa Lane, Pointe West. Every time we pledge to the flag and say "with liberty and justice for all," where is the justice in giving us dirty, black, gray, stinky water and asking for an increase? This is not justice. And it's certainly our freedom to have pure, clean drinking water.

And as for not being able to turn off our water when there was an emergency or when you go away for vacation for a week and worry should something break in the house, we should be able to turn that water off. I'm 80 years old, have never lived in a place where my father or someone else told me where I could shut off the water. I was always able to do that in an emergency. If I touch my valve, they tell me it's old and it's stuck, and should I break it, I will pay plenty to have it replaced. This is not right. Thank you. (Applause.)

MS. RODRIGUEZ: My name is Deanne Rodriguez, and I live at 11530 Rose Tree Drive in Arborwood. I'm here to speak to -- thank you for coming. Thank you for the water task force. But more than that, I just want to ask Utilities, Inc., what do you think you're doing? Do you think you'd take our water home and feed it to your families? I'd like to see your reaction once you

did. I'm appalled. There's no consideration from one human being to another for the way we've been treated. Thank you. (Applause.)

MR. MOURING: Thank you.

MR. RODRIGUEZ: My name is Albert Rodriguez. I live at 11530 Rose Tree Drive, and I'd like to add one more thing to that. We developed a leak in the front bedroom shower and I didn't have time to fix it. A week went by and, by the time I got to fix it, the drippage turned my tile brown. That's all I've got to say. Thank you very much for coming. (Applause.)

MR. MOURING: Thank you. Judy MacKinnon, Gabrielle Parrott, Peter Garrod, and Peter Holub.

MR. PARROTT: My name is Kevin Parrott. I live at 11220 Clear Oak Circle Drive. (Unintelligible) snow birds. We come down in the middle of the year. And one thing I have to do every time I'm down is drain the hot water tank, (unintelligible), the whole thing. And we do this all the time just to get the smell out of the house. So, anyway, I'd rather not pay these other, other subs. Carry on with Pasco water. (Applause.)

MR. MOURING: Thank you.

MS. KLARMAN: My name is Jeanne Klarman. I live at (unintelligible) Clear Oak Circle, Cross Creek. We moved in here two years ago after we had

(unintelligible) in St. Pete and I sold my house down there. All of the sudden you hear on the TV, a place up in New Port Richey that has a problem with their water. I told my son, "Don't cut the TV off. I want to find out where it is." Lo and behold, it's Summertree. Oh, crap, we just bought a house in Summertree. Nobody said a word to us that there's something wrong with the water.

So when we moved in, we had a whole house water filter system put in. It doesn't help. The water smells, the water stinks. I have white towels that are brown. I have white pants that are gray. Something needs to be done to get rid of the utility. Thank you. (Applause.)

MS. PARROTT: My name is Gabrielle Parrott, 11220 Clear Oak Circle. (Unintelligible). I've experienced a lot of the same problems that (unintelligible) here. I've experienced a lot of the same things as everybody else has. Another thing, especially with the -- when I first did my wash, (unintelligible). I couldn't believe where -- what was happening.

Also, I (unintelligible) these great big brown goop from all over the home and I was wondering what that was also. And I guess it's our yellow water, brown

water or whatever staining our nice home. And also with the sprinkler system, the lawn, it's awful, the smell is awful that's coming out of the (unintelligible). Thank you. (Applause.)

MR. MOURING: Thank you.

MS. MacKINNON: Hello. My name is Judy MacKinnon. I live at 11520 (unintelligible). I've only been here a year. And why should we pay for a rate increase when we have to buy bottled water? And besides, lo and behold, to my surprise today, now I know where my rash has come from. Thank you. (Applause.)

MR. MOURING: Thank you.

MR. GARROD: Good day, ladies and gentlemen. My name is Peter Garrod. I live at 12006 Boynton Lane. We've been here for eight years. When we first noticed it, my wife mistakenly, as we started drinking the water, she became sick. So -- not badly sick but sick enough, a stomach virus. So we stopped using the water. Since then we have only used the utility-supplied water for flushing the toilet, and unfortunately we still have to use it to shower. We purchase all of our water for cooking and drinking.

And to reiterate what other people have said, I have replenished the flapper valves on our toilets every year because whatever they're putting in that

water, the conditioner, is actually deteriorating the rubber on the flapper valves and they don't seal. They deteriorate really fast.

And thirdly, I've lived all over the world. I lived in Brazil for many years in a small community, and our water was way superior to what's being supplied here in Utilities. And this is a fantastic community and actually we deserve to have better quality water. Thank you. (Applause.)

MR. MOURING: Thank you. I've got Richard Friedrich, Richard Marr, Sandy Weber, Helen Cooper, and Michael Burke.

MR. HOLUB: Good morning. I'm Peter Holub. I live at 12004 Bayonet Lane, Pointe West. I've lived here for 15 years. I have the same complaints that everybody else has -- the toilets and the shower. In fact, I've had to put in a new shower and a new toilet over 15 years and I'm working on the other one.

But mainly our problem is that Utilities, Inc. is a monopoly, as you know, and they get their rate increases because the Public Service Commission grants them or doesn't grant them. You're the only thing that stands in the way of us getting Pasco County water. Because they have a defective product: It's smelly water. If I take a shower in the morning, it smells

like a swamp. If I take it a little later and they throw a lot of chlorine in and my eyes will water.

But the point of the matter is they have a defective product and they're overcharging. They do lack competition. Pasco County water is competition, but fortunately for us, we can't do anything about moving to the competition without your help. Because what it comes down to is if -- basically if this was a normal business, not a utility, people would just go to -- get a better product for a lower price. That's the way it works. They wouldn't make a profit. They'd go out of business if they didn't run a more efficient business that could provide a decent product.

But the way things work, they work on the theory that you're going to give them a rate increase because they deserve to make a reasonable profit, a reasonable return on their investment. They don't deserve that because they don't have a good product. If we could -- if we could move without your help, we would. They would be out of business. They wouldn't make anything.

It's up to you, you're the only ones that can help us, it's up to you to refuse the rate increase, make it so that the only business decision they can make is to sell to Pasco County water and give us a fair

break. Because 15 years of this is ridiculous. They never stop with the rate increases. Thank you very much for coming and thank you for listening. (Applause.)

MR. FRIEDRICH: Okay. My name is Richard Friedrich. I live at 11416 Sinatra Court, the same as Frank Sinatra. Now there's nothing profound for me to say anymore. They've said it many, many times over. But I think the most important thing, rather than the rate increase, is to get out of this water. I mean, everyone buys bottled water here. What the heck do we need their water for? We're paying for water that we're not using. The most important thing is to get to Pasco County. If anything, what they should do is decrease the rates. That's all. (Applause.)

MR. MARR: My name is Richard Marr. I live at 11608 (unintelligible). I know you guys heard all sorts of stuff about water. One thing is my daughter lives in Waters Edge, a brand new community. They've been in this home for over six years. They have Pasco water. Their bills, and she does about three times the amount of laundry we do a week, is like half of what we pay. She can cook with the water, she can drink the water, she gives it to our granddaughter. They do not buy water -- bottled water to use. So we have to get rid of Utilities, Inc., hook up with Pasco water, and that will

solve a lot of these problems. Thank you. (Applause.)

MS. COOPER: Hi. My name is Helen Cooper. I live at 12118 Loblolly Pine Drive in The Fairways. I'm relatively new here; I've been here about ten months. I'm a retired teacher from the great state of Michigan where we get some of the cleanest, clearest water in the country. So when I moved to Summertree, the bad thing about it was everything you've heard is true. I've experienced every single thing, every negative thing you've heard. But I'm happy to be here, I'm proud to be here, and I'll tell you the most positive thing is, and I don't know if it's from lifting all those bottles of water and jugs, but these people are strong and we are feisty, and this will not stop until not only is Pasco County providing our water, but Utilities, Inc. is gone. You will see a lot of red shirts until this issue is settled. (Applause.)

MS. WEBER: Hi. My name is Sandra Weber. I live at 11649 Cocowood Drive. Curt, I see that you've been coughing. Would you like me to get you a glass of water?

MR. MOURING: I'm all right.

MS. WEBER: Okay. I've lived here just under two years. And when I moved in, the first thing I did was, you know, contact the water company to get water.

And I've lived in numerous cities in several different states, and this has never happened to me before, but I was told in order to get water service, I had to pay a $300 deposit and that I wouldn't get that money back until I paid my bills for three years. I have excellent credit. So they are still holding my $300. And now if we are lucky enough to get rid of them, I'll probably never see my deposit. So that's my big issue.

When you call the technicians for Utilities, Inc. to come over because you've got a problem or a complaint, they come to your door and say, "Well, we're not allowed to come in your house." So how are they supposed to check your water? How are they supposed to make any improvements if they can't come in your front door even with my permission? And then they do come over, they say, "Oh, well, it's your water softener that's causing the problem. Oh, it's your hot water heater that's causing the problem." My hot water is one year old. My water softener was put in a year and a half ago when I moved in to try to solve the water problems. It doesn't. Now I have to pay for new filters, I have to pay for filters for my refrigerator, I have to buy bottled water. I take a shower with one hand holding my nose shut because it smells so bad I can't stand it. My clothes come out of the washing

machine smelling worse than when they went in. You know, it's just a disaster.

And I live by myself. I don't run the dishwasher more than once a week. You know, my water bill is an average of $70 a month for one person. Ridiculous, just ridiculous. They don't need anymore money from me. I'm a retired teacher as well and I live on a pension, and I can't afford anymore rate increases. Thank you very much.

MR. MOURING: Thank you. I'd like to call Frank McKeehan, Ruth Di Orio, Joe Donahue, and Mary Slattery.

MR. BURKE: My name is Mike Burke. I'm at 11305 Merganser Way. And a lot of this is new to me. I've only been here nine months. I bought the house without me seeing it. (Unintelligible). But it was being built, it was a brand new house. I come from Chicago, a suburb of Chicago where their water pipes are over a hundred years old getting water out of the lake. I have three boys -- or I had three boys, and when water came out, when bottled water came out, I couldn't afford to buy it for them. So we used to refill the water bottles out of our tap. It was great water. And you put them in the refrigerator for a while and they were fine. I, you know, I never drank bottled -- I never

bought bottled water for myself. Now that's all I do is buy bottled water. And I feel sorry because my wife has to carry it. I can't carry if.

And I used to take baths once in a while for the hot water to help my leg. It was a little tough. But there's no way I'm going to make the effort to get in a bath full of this because that's what it looks like. And I'm not going to do it.

And I'm not worried about a rate increase because even if they were to say, "Okay, you don't get a rate increase but, you know, be on your guard," to me that's a loss. I've only been here for nine months. I won't lose that money -- much money. The house will go up for sale if it's not switched over.

You know, I thought I was the luckiest person in the world when we moved in because in seven days Pasco County got 18 inches of water, and now it's dry as a -- there was no problem whatsoever. But now I wish I had had barrels out to save the water that fell so I would -- so I'd have it for bathing. That's all I've got to say. But I will sell right after -- if they don't give them the boot, I'm gone. (Applause.)

MR. McKEEHAN: Frank McKeehan, 11450 Turtle Dove Place. I'd like to read something from the paper. It says, "Summertree still pays the price of smelly

water." This is from the ***Tampa Bay Times***, Friday, March 18th, 2016. It says that "Since (unintelligible) called for giving local government greater authority to use eminent domain laws to require private water utilities to serve their customers adequately. The senate has-- the Tax & Finance Committee approved the amendment in February, but it failed to gain traction and it was removed before the House and Senate approved the bill, which was passed."

The thing is that the rate increase is not the big issue. The issue is Utilities, Inc. needs to go. There's not a person in here that if you live here, you would not accept this water. You would be angry. You would say I'm not -- no one is drinking the water, no one. No one is cooking with the water. They don't even brush their teeth with it. We can use the water for basically toilets, laundry, and you've heard all the issues with the toilets and the laundry, the piping and everything else because the water gets brown, sometimes it's black. I've even called these people. I've got charcoal (unintelligible) water from this. The water softener I had, I removed it and put a brand new one in. I've got (unintelligible), and when we fill up that bathtub, it is still brown. And the water stinks at times. It's not all the time. If the water is being

run enough, it may not smell as bad. But the water is bad. The bottom line is we want the people out. We have no way of doing this without your help. We can't do it. These people have a monopoly on us. We can't get rid of them. No one wants them. We need to get them out of here. And that's the bottom line, they need to go. Thank you. (Applause.)

MS. DI ORIO: Ruth Di Orio, 11338 Clear Oak Circle in Cross Creek. In our previous home of 13 or 14 years we never needed to purchase a water filter. We had all our appliances left there when we moved. Half of them are still in working condition. We never, ever purchased bottled water. Welcome to Summertree. Our bills are outrageous. We purchase bottled water. And the last thing, to add insult to injury, one of our previous house guests, after his third night there, came out of the shower and he said we must have had a water main break. The water all of the sudden came out brown and smelly. It's an embarrassment not only to us but to this whole community. And we're asking the Public Service Commission, and we're sure you have the authority to ask -- to disconnect from public utilities and connect to Pasco water. Thank you.

MR. MOURING: Thank you. David Kozza, Jane Kozza, John McGowan, John Vecere, and George Metz.

MS. SLATTERY: I am Mary Slattery, 11826. I agree with what everybody has to say about the bad water here. I am hoping and praying that we get Pasco water. Thank you. (Applause.)

MR. MOURING: Thank you.

MR. KOZZA: My name's David Kozza, 11317 Clear Oak Circle in Summertree, in Cross Creek. I just wanted to mention my wife and I moved down here about four years ago. We came from an area where we had water equivalent to Summertree, and that was Northern Pennsylvania, Towanda, Pennsylvania, where they're fracking for gas and oil. They destroyed the wells and they destroyed the rivers, so my wife and I thought we'd move down here and get away from that lousy water that was up in Towanda, Pennsylvania. In fact, some people up there have water buffaloes in their yard, these big tanks where they would store water. We lived out in the country in about ten acres, and we didn't have any public water (unintelligible) but the wells were bad. We couldn't hook up to any public water. We had to deal with it. So they had buffaloes where they would bring in water and people would use the water from these big tanks in our yard. Well, we can't have any tanks in our yards down here. The zoning wouldn't allow it.

But there is an alternative. We have Pasco

water and that's the alternative. There was no alternative up there. So to get rid of this lousy water and correct the situation, we need Pasco water desperately down in this area. Thank you. (Applause.)

MS. KOZZA: Hi. I'm Jane Kozza, 11317 Clear Oak Circle. When my husband and I moved here about four years ago, we became aware of just how bad the water was. I went to put a little dish of water out for our cat. She refused to drink it. She smelled it and jerked her head back. Well, we thought we better just open up all the water and just let the water run. So we let the water run, we let it run. Maybe it just needs to clear out of the line.

Then I said, "Before we touch it, let's offer some to the cat again." She jerked her head back again. She would not drink it. Animals are a pretty good judge if there's something wrong with the water. So we started buying bottled water. And then we finally did some research, we realized this is something if you can't drink, you don't want to bathe in it, and we had to buy a whole house water system, and that was over $2,500. And that was four years ago. I can't imagine what they cost now.

So I agree with everybody else, all the other complaints. We need to get rid of Utilities. We need

Pasco, please. (Applause.)

MR. METZ: Sorry to keep you waiting. I heard that -- well, I agree with everything everybody has said, and I concur that it's all true. The thing is when I heard that they were having problems with the calculation for how much money people were being overbilled, this and that, (unintelligible) we have pictures here which, if you want to see them, I'll show them to you. We have a young man, I'm talking about a kid, reading the meter for the father. And this is how -- this is how Utilities, Inc. does their business. Isn't there child labor laws and stuff? How can they allow this? They have a young man reading a meter and his father is clicking, you know, (unintelligible). And if you want to know more, I (unintelligible). Would you like to see the pictures?

MS. CRAWFORD: And while you do that, sir, if we could have your name and address.

MR. METZ: My name is George Metz, M-e-t-z. Can everybody hear that? Thank you. 11629 Holly Ann Drive. And I'm here pissed. Everybody here has been very calm and they're handling everything good, but you've got to see this. Thank you very much. (Applause.)

MR. MOURING: Thank you very much. I think

that's the last name that we've got on our list here. I didn't want to -- if you haven't signed in, make sure -- ask them to sign in.

(Unintelligible discussion.)

MR. MOURING: You can sign in afterwards.

MR. LASECKE: My name is Frank Lasecke. I was born and raised in (unintelligible). All my life I've had fine water for all different kinds of uses, especially for drinking. I came down here to Florida, before I was -- I came down here to Florida, and before I started hearing all this was going on with the water in our location here, I was (unintelligible) different parts of Florida and I was hearing about (unintelligible) water. And I began (unintelligible) About our utility here in Summertree (unintelligible) is literally the (unintelligible). It's referred to as secondary water, and secondary water to me means water that you would use for your irrigation system, not for potable water. This is potable water. Everybody is having to use it nowadays to keep themselves safe. I do it -- I do it also.

Another thing that's been surprising me is when I had been down here about two years, I had -- I was bothered about our water usage, the amount of water usage. And so I was reading my meter and I was reading

it daily. And I found out that average -- we were not using 100 plus gallons per day but we were using closer to 60 gallons per day.

THE AUDIENCE: We can't hear you. We can't hear you.

MR. LASECKE: I was talking about meter readings and I was having a problem thinking that we were using an awful lot of water but we weren't using that amount of water. So I started reading my own meter. And then what happened, of course, is three years ago this gentleman, I had a stroke and I lost my thought about doing anything like this. It's only come back here recently because of some of the things that have been said including this, like this fellow was talking about, a young kid, not a young man, a child was reading the meter and giving the information to his dad. That's illegal. It's illegal. It's not ethical. It's also -- it's illegal.

We came here to talk about, we came here to talk about Utilities, Inc. I don't think Utilities, Inc. should even be here, period. I think that they ought to be prosecuted for what they've done. We should be getting rid of them and having our water system handled only by Pasco County utilities. It's fraudulent to kind of think that Utilities, Inc. has been doing

this and getting away with it, and some of the governmental authorities have probably been helping them with it. But I think it just needs to come to an end. We need to get back to something fundamental -- we need to get back to something fundamental for the people here, including myself, as, first of all, safe water at a fair rate for the water, but also make sure that we can always continuously depend on it and -- on the use of the water and the quality of the water. The only way you're going to do that is to get us into the municipal water system, and I think the best one is Utilities, Inc. And then from there we're going to have to think about -- I mean, there's going to be some private (unintelligible).

I guess (unintelligible) I want to thank everybody what they've done because I didn't do much of anything what they did, but I listened to a lot of it and I saw a lot of different things and I didn't say much until (unintelligible). So I am in consensus with everybody else here who's upset, angry, angry with what is going on here. It has to stop. Thank you very much.

(Applause.)

MR. MOURING: Thank you.

SPEAKER: Hello. My name is (unintelligible) from Alderwood, 11711 Alderwood Drive in Arborwood. I

come down here every six months, so I come long hours to come down here. And I lived on Long Island all my life and never knew about bottled water until, like, six years ago when we started coming down, and it's kind of like a necessity.

Also with the color of the water and the smell of the water, it's not, it's not good at all. When you flush your toilet, you wouldn't want a stranger to come look in your toilet because it's like yellow water. It's not clear water. And we're paying a lot more here than in Long Island. And we need a change in the water company, which would be we want Pasco to come in and get rid of Utilities. And plus they're asking for a rate increase, and I can't understand how they would get a rate increase for a bad product.

Also they do know that there is a problem because you see the hydrant light turned on and they're flushing the water down the street. This isn't a way to correct the problem. And they say water is a very -- you know, there's not much water, good water in Florida, and they're flushing it down the street to try to improve the problem. But we do need to change. We should get Pasco water in and get rid of Utilities. Thank you. (Applause.)

MR. MOURING: Thank you.

(Applause.)

MS. MEEKS: I'm Violet Meeks (phonetic) from 11438 Bloomington Court. This is a sample of water taken from the kitchen sink, from the tap, and I think the color speaks for itself. I just want to tell you today that, first of all, I appreciate you all being here, and also I agree with Commissioner Mariano and Senator Simpson, all of our task force alliance, and my fellow residents. Please, no increase. Thank you. (Applause.)

MS. RYAN: I have a summation. I just would like to thank the Public Service Commissioners for coming down here -- it's a very long journey -- to hear from our community. And I want to thank the staff. They really worked hard with us to make this all happen. And our whole -- this is our task force and these are our associate members who put this together. (Applause.) And from the bottom of our heart, this is really important. You know, there was a question raised as to whether this is something driven just by a task force, and I think that you can see that we would rather (unintelligible) stand up for the community.

I just wanted to let you know that we have selected over 400 letters that we plan to put on -- that will be sent to you as part of the docket, and this

letter is addressed to (unintelligible) on behalf of our community. And so we're just going to stamp it and I'll have it in the mail to you tomorrow. And I thank you very much for coming. (Applause.)

MR. MOURING: Thank you very much. With that being said, I do want to thank everybody for taking the time to come out here and share your comments with us. It is a very important part of the process, and I think we are adjourned at this point. Thank you.

(Customer Meeting adjourned.)

Summertree Water Alliance Taskforce
April 2016 UPDATE & PSC Customer Meeting Information

Taskforce: Ann Marie Ryan, Lorraine Mack, Joe Mitchell, Rich Neilson, Lee Robida, Ed Youngs; **Associate Members:** Maria Cristiano (PW), Chuck Hoehn (GR), George Metz (Villas), Fred Stall (ARB), Violet Weeks (SRF), Bill White (GR)

Tuesday, April 12, 2016: Summertree residents have the opportunity to protest Utility Inc.'s requested rate increase to the PSC staff in person. **We told PSC over 400+ residents would attend...Let's Do This...STOP UIF!**

Public Service Commission Customer Public Hearing – SRF Auditorium (8:45-1:00)

Wear your **RED** shirts...We need to show up in great numbers to push the PSC to deny UIF a rate increase!

9:00 – 9:10 AM	PSC Staff Presentation –All Residents Welcome
9:00 – 10:45 AM	Fairways, Greens, Pointe West
11:00 – 12:45 PM	Arborwood, Cross Creek, Villas

NOTE: A row of residents will be called, say or read a short statement, "No Rate Increase, Horrible water, etc." then they can leave; we plan to make it simple & quick. Every person who stands will be counted in the record!

Golf cart volunteer drivers needed!

BOCCE players bring protest forms – Taskforce will collect them

Bring (2) Return Address Labels plus your completed Summertree Protest Form to PSC meeting.

Summertree Water Alliance Taskforce
April 2016 UPDATE & PSC Customer Meeting Information

Taskforce: Ann Marie Ryan, Lorraine Mack, Joe Mitchell, Rich Neilson, Lee Robida, Ed Youngs; **Associate Members:** Maria Cristiano (PW), Chuck Hoehn (GR), George Metz (Villas), Fred Stall (ARB), Violet Weeks (SRF), Bill White (GR)

Tuesday, April 12, 2016: Summertree residents have the opportunity to protest Utility Inc.'s requested rate increase to the PSC staff in person. **We told PSC over 400+ residents would attend...Let's Do This...STOP UIF!**

Public Service Commission Customer Public Hearing – SRF Auditorium (8:45-1:00)

Wear your **RED** shirts...We need to show up in great numbers to push the PSC to deny UIF a rate increase!

9:00 – 9:10 AM	PSC Staff Presentation –All Residents Welcome
9:00 – 10:45 AM	Fairways, Greens, Pointe West
11:00 – 12:45 PM	Arborwood, Cross Creek, Villas

NOTE: A row of residents will be called, say or read a short statement, "No Rate Increase, Horrible water, etc." then they can leave; we plan to make it simple & quick. Every person who stands will be counted in the record!

Golf cart volunteer drivers needed!

BOCCE players bring protest forms – Taskforce will collect them

Bring (2) Return Address Labels plus your completed Summertree Protest Form to PSC meeting.

RE: Docket No: 150269-WS Summertree Protest Form

Return Address Label or Print Name Shirley & Bill Roemer Date 4/12/16

Address 11144 Paradise Pointe Way New Port Richey, FL 34654

Please PRINT your UIF concerns (ex. water quality, rates, service, etc.) See attached

(Could you find someone who will read this for me? We have to be in Tampa for my husband's appointment at the VA medical facility, which is scheduled at the same time as this meeting. Thanks!)

My name is Shirley Roemer; my husband and I own a home on Paradise Pointe Way. My perspective on the water quality issue may be unique.

About twenty-five years ago I purchased an old house in a city where the water supply consists of melted snow, and is therefore probably as pure as any municipal water supply in the country. Still, because of the age of the house, I decided to replace all the plumbing. When the plumber showed me the deposits on the inside of the pipes, he explained that the flow was restricted by about 50%.

Keeping in mind that that happened where the water supply was first-rate, I wonder what will happen here. Our supplier has flushed the lines a number of times, but that temporarily reduces suspended matter, not the various substance dissolved in the water. How long before our pipes are clogged with corrosion? And when that happens, how will we replace our pipes?

The response, of course, is that because our pipes are imbedded in the concrete slabs our houses were built on, the current pipes would have to be abandoned. The only conceivable solution would be to run pipes through the attic - at a prohibitive cost.

Following this line of reasoning, I ask that those who have the power to do so, allow this community to seek an alternative source of water, water that has fewer contaminants. This is NOT just a matter of taste and smell and color. This is an issue affecting the value of our homes.

Shirley Roemer
11144 Paradise Pointe Way

I'm an original owner of a Villa in the Greens.
It is totally unacceptable for the residents
of Summertree to pay such high rates for water
that's undrinkable.
Most residents have the expense of buying bottled
water or installing a filtration system.

All we want is clean drinkable water.
NOT WATER THAT SMELLS & TASTES LIKE IT
CAME FROM A SWAMP.

To Whom IT MAY CONCERN:

IT is Necessary I TELL
You that after PAYING
Utilities INC for 10YRS
for WATER thats only good
for flushing my money
To You down the toilet
I feel A Change in WATER
Company's is Needed.
Can't drink the WATER
Can't cook with it
turns SINKS toilets + TUBS
IANISH OR BROWN.
IN other words Utilities INC
IS good for 2 things.
1) SHIT + 2) Nothing.

Thank You,
MARIA Sowisch

Return Address Label or Print Name MARY WOODCHEKE Date 4-12-16

Address 11509- PAMPAS DR. New Port Richey, FL 34654

Please PRINT your UIF concerns (ex. water quality, rates, service, etc.)

THE SMELL IS SO BAD I HAVE ~~TO~~ LET IT RUN FOR 10 min. BEFORE SMELL LEAVES. THAT'S A LOT OF MONEY DOWN THE DRAIN.

Voting "YES to Interconnect" will get Summertree, Pasco County water; PSC Customer Meeting attendance & protest forms will show PSC Commissioners how you feel about the UIF's limited rate increase filing!

I have owned my condo here at Pointe West for over 12 years. I used to rent it out only 3 months a year, and the rest of the time I still paid high water bills even though no one was using the water.

I have a filter on my faucet and filtered water in my refrigerator so I don't have to drink the foul water. I won't even cook with it or rinse my fruits & vegetables in it. The only thing I use it for is showering & my shower head & tub show the results! I would drink the water in Mexico, before I would drink the water from Utilities Inc!

I have used a shower head filter before but the first filter used at Summertree was an awakening, black oozed out of the filter. I didn't know what it was, didn't change the filter right away because it wasn't time. DO YOU REALIZE WHATS RUNNING ON YOUR BODY DURING A SHOWER? (what your body is absorbing

I'm a Floridian for 13½ years rented in Hudson, bought in Brooksville settled at Summertree 5 yrs. ago never had any questions or problems. now I'm wondering if I'm fighting for my life! Christine Tsambarlis
