**BY ELECTRONIC FILING**

Ms. Beth Salak, Director  
Division of Competitive Markets and Enforcement  
Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, FL 32399-0866

Dear Ms. Salak:

Attached for filing with the Commission are revisions to the AT&T Local Exchange Services Price List to be effective September 1, 2006. The revisions are as follows:

Section 7            First Revised Page 24  
                          Third Revised Page 25  
                          Second Revised Page 28

This filing introduces language that limits the monthly minutes of use for ISDN-PRI and DS-1 Digital Facilities in the AT&T Local Exchange Services Tariff. If you have any questions regarding this filing, please do not hesitate to give me a call.

Best regards,

*Brian Musselwhite*

## 7. AT&amp;T LOCAL EXCHANGE SERVICES

## 7.9 AT&amp;T Local Exchange Services-ISDN PRI

AT&T Local Exchange Services-ISDN PRI is an optional service arrangement for local exchange access based on the Primary Rate Interface (PRI) arrangement of the Integrated Services Digital Network (ISDN). AT&T Local Exchange Services-ISDN PRI is a high capacity access path for communications providing voice or data transmission over the Company's exchange network. AT&T Local Exchange Services-ISDN PRI is available where facilities and operating systems exist.

Customers using the facilities for data transmission only will be subject to the Monthly Recurring Data Facility Charges in lieu of the standard Monthly Recurring Facility Charge

AT&T Local Exchange Services-ISDN PRI is an alternative for individual local exchange access loop services such as Direct Inward Dialing (DID) and Direct Outward Dialing (DOD). It can also be used as loop transport for circuit switched data.

AT&T Local Exchange Services-ISDN PRI is provisioned on the 1.544 megabits per second (MBPS) bandwidth and uses ISDN architecture of 23 B or bearer channels and 1 D or data channel (Primary) or 24 B channels (Secondary) to provide the Customer with the capabilities of simultaneous access, transmission, and switching of voice, data, and imaging services via channelled transport.

ISDN describes the end-to-end digital telecommunications network architecture that provides for the simultaneous access, transmission, and switching of voice, data, and imaging services. These functions are provided via channelled transport facilities over a limited number of standard user-network interfaces. The ISDN architecture consists of digital switching systems that connect Primary Rate Interface lines to their serving central office.

The B Channel is a 64 kilobits per second (KBPS) channel used for information transfer between users and may be used in conjunction with circuit-switched service. The D Channel is a 64 KBPS per second channel that carries signaling and control for the B channels. The backup D Channel automatically takes over for a failed D channel in case of trouble and is purchased as part of a 23B+Backup D PRI Arrangement.

Call-by-Call Service Selection provides an option to the Dedicated B Channel Configuration allowing B channels to be configured to access multiple services on a per-call basis. With this optional feature, separate facilities are not needed for individual services such as DID and DOD. Separately obtained customer premise equipment is required to signal the local serving central office as to what type of services to access for each call.

## 7. AT&amp;T LOCAL EXCHANGE SERVICES

## 7.9 AT&amp;T Local Exchange Services-ISDN PRI (Cont'd)

(M)

AT&T Local Exchange Services-ISDN PRI is offered in conjunction with the following long distance services provided by AT&T and are described in this price list: AT&T Business Network and OneNet Option.

ISDN PRI may be provisioned as a standalone service or provisioned over an existing or new AT&T ACCU-Ring facility, Dedicated Entrance Facility (DEF) or Ultravailable Ring (UVN). Rates and charges are listed in the RATE SCHEDULE.

At the Company's discretion, the Company may reconfigure the Customer's service to another service provided by AT&T and any of its affiliates authorized to provide you with AT&T service prior to November 17, 2005, if the Customer's usage meets one or more of the following criteria: (1) equals or exceeds 90% utilization for inbound calling on trunks configured for Inbound and Outbound calling functionality, (2) equals or exceeds an average call duration of 10 minutes per call for inbound calling, (3) equals or exceeds CCS (one hundred call seconds or one hundred seconds of telephone conversation) loading of 32 CCS, or (4) equals or exceeds 300,000 minutes of use for inbound calling per DS-1 facility. The Customer will be charged rates for the alternative service as defined in the applicable price list. The Company reserves the right to audit the Customer's usage for the above conditions.

Upon detection of any of the four conditions stated above, the Company will inform the Customer by written notice of its intention to reconfigure the Customer's service and identifying the alternative service available for the Customer's calling pattern. First Class U.S. Mail will send written notice at least 30 days prior to the actual reconfiguration of service. The Customer must either return the written notice indicating its acceptance of the reconfiguration and its associated rates or may terminate the service commitment or contract. Notice of the Customer's desire to accept the alternative service or cancel the service commitment or contract must be provided in writing to the Company prior to the end of the 30-day notice period. If no notice is received the service will be terminated.

ISDN-PRI is subject to a usage limit of 100,000 local outbound minutes per full T1/PRI per calendar month. The Company reserves the right to charge an additional monthly recurring flat-rate fee equivalent to the Customer's term plan commitment for each successive additional full T1/PRI that would be required to enforce the usage limit. The company reserves the right to audit customer's ISDN-PRI usage for these conditions and impose such additional fees on a monthly basis as required.

## 7. AT&amp;T LOCAL EXCHANGE SERVICES

## 7.10 AT&amp;T Local Exchange Services-DS-1 Digital Facilities (Cont'd)

## Description (Cont'd)

Upon detection of any of the four conditions stated above, the Company will inform the Customer by written notice of its intention to reconfigure the Customer's service and identifying the alternative service available for the Customer's calling pattern. First Class U.S. Mail will send written notice at least 30 days prior to the actual reconfiguration of service. The Customer must either return the written notice indicating its acceptance of the reconfiguration and its associated rates or may terminate the service commitment or contract. Notice of the Customer's desire to accept the alternative service or cancel the service commitment or contract must be provided in writing to the Company prior to the end of the 30-day notice period. If no notice is received the service will be terminated.

DS-1 Digital Facilities are subject to a usage limit of 100,000 local outbound minutes per full T1/PRI per calendar month. The Company reserves the right to charge an additional monthly recurring flat-rate fee equivalent to the Customer's term plan commitment for each successive additional full T1/PRI that would be required to enforce the usage limit. The company reserves the right to audit customer's DS-1 Digital Facilities usage for these conditions and impose such additional fees on a monthly basis as required.

After reconfiguration to the alternative service, if the Customer's usage changes so that it no longer exceeds the criteria stated above, the Customer may request that the Company reconfigure the service back to the original service, with its associated rates and features. The Company will review the request and, upon determination that usage no longer exceeds the above criteria after two full billing periods, reconfigure the Customer's service back to the original service within 30 days.

## A. Customer Not Ready Charges

AT&T may begin billing customers the monthly recurring charges for access when the customer refuses or delays installation of service. If the customer reschedules or refuses service after 30 days of their Firm Commitment date, AT&T may bill the customer the monthly recurring charges for access beginning thirty-one (31) days after the original installation date.

## B. Vendor No Show Charges

AT&T may begin billing customers the monthly recurring charges for access as a result of the customer's vendor not showing up at the time of cutover. The first time the customer's vendor does not show up, the customer will be requested to reschedule a new date within 14 days. If the customer's vendor is a No Show twice, AT&T may begin billing the customer the monthly recurring charges for access.
