A3.16 Verizon Local Calling Plans (Continued)

.3 Rates

a. Application of Rates

The rates shown herein entitle the customer to local messages to all telephones of the exchanges of the expanded local calling area listed in A3.16.4 following.

b. LCP Category Determination

The determination of which LCP category into which a particular exchange will fall when optional local calling plans are made available is calculated using two basic factors. The first is the current rate group where the exchange is located, which is based on the number of main station lines and PBX trunks in the existing local calling area. There are five of these groups in the tariff as shown in Section A3.2, Rate Schedules. The second factor is the total number of local access lines in the LCP expanded local calling area for a particular exchange at the time of implementation. These expanded calling scopes are divided into three classifications: 200,000 or less lines; 200,001 to 500,000 lines; and 500,001 and greater. There are nine potential LCP rating categories. Exchanges currently in Rate Groups 1 and 2 that receive LCP capability will be assigned to Categories I, II or III. Exchanges in local rate groups 3 and 4 will be assigned to Categories IV, V, or VI; and exchanges in local calling area 5 will be assigned to Categories VII, VIII, or IX. For example, an exchange in current Rate Group 3 that offers the LCP with an expanded LCP local calling area of over 200,001 local access lines, but less than 500,000 local access lines, will fall into LCP rating Category V.

A13.25 Remote Call Forwarding

.1 General

- a. Remote Call Forwarding (RCF) is a service whereby a call placed from a station (the originating station) to a subscriber's (the RCF subscriber) telephone number in one exchange (the call forwarding location) is automatically forwarded by Telephone Company central office equipment to another station designated by the RCF subscriber (the terminating station).
- b. RCF Service will be provided subject to the following limitations:
 - (1) RCF service is offered subject to availability of suitable facilities.
 - (2) RCF is offered as an Individual service or as an additional feature with multiline hunt Foreign Exchange Service for overflow when the Foreign Exchange Service is busy. Each Remote Call Forwarding service allows for forwarding one call at a given time. An additional service feature is necessary for each additional call to be forwarded simultaneously.
 - (3) RCF service is not offered where the terminating station is a public telephone.
 - (4) The Telephone Company will not provide identification of the originating telephone number to the RCF subscriber.
 - (5) Transmission characteristics may vary depending on the distance and routing necessary to complete the remotely forwarded call.
 - (6) RCF is not represented as suitable for satisfactory transmission of data.
 - (7) Remote Call Forwarding to another RCF number is not permitted.
 - (8) RCF is provided on the condition that the subscriber subscribes to sufficient RCF features and facilities to adequately handle calls to the RCF subscriber without interfering with or impairing any services offered by the Telephone Company.
 - (9) When the RCF number is to be located in a multioffice exchange, the Company will determine the serving central office.
 - (10) Remote Call Forwarding will be provided for local calling where the RCF telephone number and the terminating station are both located in the same exchange. Further, Remote Calling Forwarding will be provided for local calling on an interexchange basis in those instances where the exchange serving the RCF telephone number and the terminating station are within an Extended Area Service arrangement as specified in Section A3 of this tariff.
 - (11) Remote Call Forwarding will be provided when the RCF telephone number and the terminating station are located within Extended Calling Service exchanges as specified in Section A3.15.2a. of this tariff. The usage rates for calls between ECS exchanges will be those specified in Section A3.15.3a.
 - (12) Remote Call Forwarding service cannot be used for toll by-pass.
 - (13) Remote Call Forwarding international is not allowed.
- c. One listing in the alphabetical section of the directory covering the exchange in which the Call Forwarding central office is located is provided without additional charge.
- d. The minimum service period for this service is two months.

.2 Rates and Charges

A13.32 Billed Number Screening

- a. Billed Number Screening (BNS) is a service offering providing for the automatic blocking of third number billing, collect billing, or both. The BNS feature is established for a particular billing number via service order.
- b. BNS is available for residential and business customers on one or more lines, whether or not the lines are billed together or separately.
- c. Subscribers who have requested BNS prior to April 22, 1986, will not be subject to rates and charges as specified in A13.32.3 following until such time as the screened number or numbers are changed for subscriber reasons.

Call attempts which have been screened will not complete. The operator will advise the calling party that alternate billing arrangements will have to be made before the call can be completed.
 - (2.) Where such equipment is not installed:

Call attempts on a third-number basis will complete and will bill. It is the originating point of the call that determines the editing equipment used for verification. Third-number or collect calls may appear on the bill when placed from areas not equipped with editing facilities. Call attempts on a collect basis and accepted will be billed. Payment for these calls will be expected.

- c. This service is offered to customers who request a unique, easy-to-remember, or otherwise specific (i.e., "customized") line number, providing that the exchange prefix number is not changed.

A3.16 Verizon Local Calling Plans (Continued)

.3 Rates

a. Application of Rates

The rates shown herein entitle the customer to local messages to all telephones of the exchanges of the expanded local calling area listed in A3.16.4 following.

b. LCP Category Determination

The determination of which LCP category into which a particular exchange will fall when optional local calling plans are made available is calculated using two basic factors. The first is the current rate group where the exchange is located, which is based on the number of main station lines and PBX trunks in the existing local calling area. There are five of these groups in the tariff as shown in Section A3.2, Rate Schedules. The second factor is the total number of local access lines in the LCP expanded local calling area for a particular exchange at the time of implementation. These expanded calling scopes are divided into three classifications: 200,000 or less lines; 200,001 to 500,000 lines; and 500,001 and greater. There are nine potential LCP rating categories. Exchanges currently in Rate Groups 1 and 2 that receive LCP capability will be assigned to Categories I, II or III. Exchanges in local rate groups 3 and 4 will be assigned to Categories IV, V, or VI; and exchanges in local calling area 5 will be assigned to Categories VII, VIII, or IX. For example, an exchange in current Rate Group 3 that offers the LCP with an expanded LCP local calling area of over 200,001 local access lines, but less than 500,000 local access lines, will fall into LCP rating Category V.

A13. MISCELLANEOUS SERVICE ARRANGEMENTS

A13.25 Remote Call Forwarding

.1 General

- a. Remote Call Forwarding (RCF) is a service whereby a call placed from a station (the originating station) to a subscriber's (the RCF subscriber) telephone number in one exchange (the call forwarding location) is automatically forwarded by Telephone Company central office equipment to another station designated by the RCF subscriber (the terminating station).
- b. RCF Service will be provided subject to the following limitations:
 - (1) RCF service is offered subject to availability of suitable facilities.
 - (2) RCF is offered as an Individual service or as an additional feature with multiline hunt Foreign Exchange Service for overflow when the Foreign Exchange Service is busy. Each Remote Call Forwarding service allows for forwarding one call at a given time. An additional service feature is necessary for each additional call to be forwarded simultaneously.
 - (3) RCF service is not offered where the terminating station is a public telephone.
 - (4) The Telephone Company will not provide identification of the originating telephone number to the RCF subscriber.
 - (5) Transmission characteristics may vary depending on the distance and routing necessary to complete the remotely forwarded call.
 - (6) RCF is not represented as suitable for satisfactory transmission of data.
 - (7) Remote Call Forwarding to another RCF number is not permitted.
 - (8) RCF is provided on the condition that the subscriber subscribes to sufficient RCF features and facilities to adequately handle calls to the RCF subscriber without interfering with or impairing any services offered by the Telephone Company.
 - (9) When the RCF number is to be located in a multioffice exchange, the Company will determine the serving central office.
 - (10) Remote Call Forwarding will be provided for local calling where the RCF telephone number and the terminating station are both located in the same exchange. Further, Remote Calling Forwarding will be provided for local calling on an interexchange basis in those instances where the exchange serving the RCF telephone number and the terminating station are within an Extended Area Service arrangement as specified in Section A3 of this tariff.
 - (11) Remote Call Forwarding will be provided when the RCF telephone number and the terminating station are located within Extended Calling Service exchanges as specified in Section A3.15.2a. of this tariff. The usage rates for calls between ECS exchanges will be those specified in Section A3.15.3a.
 - (12) Remote Call Forwarding service cannot be used for toll by-pass.
 - (13) Remote Call Forwarding international is not allowed.
- c. One listing in the alphabetical section of the directory covering the exchange in which the Call Forwarding central office is located is provided without additional charge.
- d. The minimum service period for this service is two months.

A13. MISCELLANEOUS SERVICE ARRANGEMENTS

A13.32 Billed Number Screening

.1 General

- a. Billed Number Screening (BNS) is a service offering providing for the automatic blocking of third number billing, collect billing, or both. The BNS feature is established for a particular billing number via service order.
- b. BNS is available for residential and business customers on one or more lines, whether or not the lines are billed together or separately.
- c. Subscribers who have requested BNS prior to April 22, 1986, will not be subject to rates and charges as specified in A13.32.3 following until such time as the screened number or numbers are changed for subscriber reasons.

.2 Limitations

- a. Special equipment serving the originating caller's location is required to make this feature operable.

(1.) Where such equipment is installed:

Call attempts which have been screened will not complete. The operator will advise the calling party that alternate billing arrangements will have to be made before the call can be completed.

(2.) Where such equipment is not installed:

Call attempts on a third-number basis will complete and will bill. It is the originating point of the call that determines the editing equipment used for verification. Third-number or collect calls may appear on the bill when placed from areas not equipped with editing facilities. Call attempts on a collect basis and accepted will be billed. Payment for these calls will be expected.

.3 Rates and Charges

- b. Customized Number Service is provided to business or residence customers and is furnished subject to the availability of facilities and requested telephone numbers.
- c. This service is offered to customers who request a unique, easy-to-remember, or otherwise specific (i.e., "customized") line number, providing that the exchange prefix number is not changed.

- g. The Company reserves and retains the right:
 - (1) To discontinue, change or reassign telephone numbers in any exchange area when it is deemed necessary or appropriate in the conduct of its business, or in accordance with the rules and procedures of the Company.
