**From:** Prestarri, Anthony <Anthony.Prestarri@lumen.com>  
**Sent:** Thursday, August 8, 2024 1:23 PM  
**To:** Telephone Tariffs  
**Cc:** Prestarri, Anthony  
**Subject:** TL727 Grandfather DS-1 and DS-3 Services  
**Attachments:** FL2024-12\_TL727\_CLinkFL\_pkg.pdf

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Effective August 15, 2024, CenturyLink plans to grandfather Intrastate Private Line DS-1 and DS-3 services. New contracts or renewal of existing contracts will no longer be accepted for these services, effective immediately. Customers will be able to retain their existing services under CenturyLink's grandfathering plan, subject to the terms described below.

Effective August 15, 2024:

- New orders and moves will be allowed only to the extent permitted by the existing contract.
- Existing contracts for these services will not be renewed.
- Customers with a contract may retain their Intrastate Private Line circuit on a month-to-month basis once that contract expires.
- Circuits billing month-to-month will not be allowed to move, add, or change circuits, only disconnect.

If you have any questions regarding this filing, please contact me by phone or email.

Sincerely,  
Anthony Prestarri

## E7. DEDICATED ACCESS SERVICES

## E7.1 General (Cont'd)

## E7.2 Service Description

For the purpose of ordering, there are three categories of Dedicated Access Service. These are:

- Voice Grade<sup>[1]</sup> (VG)
- Digital Data<sup>[1]</sup> (DA)
- High Capacity<sup>[2]</sup> (HC)

(C)

Each service consists of a basic channel to which a technical specifications package (predefined), channel interface(s) and, when desired, optional features and functions are added to construct the service desired. Each of the Components of the service are described in this section.

The channel description specifies the characteristics of the basic channel and indicates whether the channel is provided between customer designated premises or between a customer designated premises and a Company hub where bridging multiplexing functions are performed.

Information pertaining to the technical specifications packages indicates the transmission parameters that are available with each package. The information is displayed in a matrix found in each service description (e.g., VG matrix in E7.2.2.B. following) with the transmission parameters listed down the left side and the packages listed across the top. Each package is identified by a code, e.g., VG1. The first two letters of the code indicate the category of Dedicated Access Service to which the parameters are applicable.

<sup>[1]</sup> Effective November 1, 2021 Voice Grade and Digital Data Services are grandfathered. Availability to current customers is limited to circuits in service at existing locations.

<sup>[2]</sup> **Effective August 15, 2024 High Capacity Services are grandfathered. Availability to current customers is limited to circuits in service at existing locations.**

(N)  
(N)

Effective: August 15, 2024

E7. DEDICATED ACCESS SERVICES

E7.2 Service Description (Cont'd)

E7.2.4 High Capacity Service – Grandfathered

(C)

**Effective August 15, 2024, Private Line DS-1 and DS-3 Services are grandfathered. New contracts or renewal of existing contracts will no longer be accepted for these services, effective immediately. Existing services are limited to circuits in service at existing locations. Customers with a contract may retain their Intrastate Private Line circuit on a month-to-month basis once the contract expires.**

(N)

(N)

A. Basic Channel Description (Cont'd)

- 1) A High Capacity channel is a channel for the transmission of nominal 64.0 Kbps or 1.544, 3.152, 6.312, 44.736 or 274.176 Mbps isochronous serial data. The actual bit rate is a function of the channel interface selected by the customer. High Capacity services are provided between customer designated premises through serving wire centers or between a customer designated premises and a Company Hub.

The channel termination rate element for DS3 services may vary based on distance. The mileage used to determine the monthly rate for channel terminations located outside a Telephone Company Central Office is the airline distance between the customer's designated premises and the Telephone Company serving wire center. The mileage measurement is determined by utilizing exchange maps and mileage tables located in designated Telephone Company offices for such purposes.

- 2) Fractional DS1 <sup>[1]</sup> channels provide simultaneous, two-way transmission at contiguous bit rates of 128.0, 256.0 and 384.0 kbps. Fractional DS1 channels operate over the combined bandwidth of adjacent channels to create a contiguous bit rate.

Due to technical limitations associated with the provision of Fractional DS1, this service will be offered only in central offices where a compatible channel bank exists and the distance between the central office and the customer designated premises is less than or equal to 12,000 feet.

<sup>[1]</sup> Effective November 1, 2021 Fractional DS1 Services are grandfathered. Availability to current customers is limited to circuits in service at existing locations.

Effective: August 15, 2024

E7. DEDICATED ACCESS SERVICES

E7.2 Service Description (Cont'd)

E7.2.4 High Capacity Service-- **Grandfathered** (Cont'd) (C)

B. Technical Specifications Packages

HC Matrix

Parameters	0	1	1C	2	3	4
Error-Free Thirds	X					

A channel with technical specifications package HC1 will be capable of an error-free second performance of 98.75 percent over a continuous 24 hour period as measured at the 1.544 Mbps rate through a CSU equivalent which is designed to conform with the interconnection specifications contained in Technical Reference Publication GR-54.

C. Channel Interfaces

The following channel interfaces (CIs) define the bit rates that are available for a High Capacity channel:

CI	Bit Rate
DS-15	1.544 Mbps (DS1)
DS-31	3.152 Mbps (DS1C)
DS-44	44.736 Mbps (DS3)

Compatible channel interfaces are set forth in Technical Reference Publication GR-342.

D. Optional Features and Functions

1. Automatic Loop Transfer

The Automatic Loop Transfer provides protection on a 1XN basis against failure of the facilities between a customer designated premises and the wire center serving that premises. Protection is furnished through the use of a switching arrangement that automatically switches to a spare channel when a working channel fails. Spare channel priority is given to the lowest numbered slot based upon slot position. Slot position number one is given highest priority. The spare channel is not included as a part of the option. This option requires compatible equipment at both the serving wire center and the customer premises. The customer is responsible for providing the equipment at its premises. This feature is not available with 1.544 Mbps channels having the B8ZS line code.

Effective: August 15, 2024

## E7. DEDICATED ACCESS SERVICES

## E7.2 Service Description (Cont'd)

E7.2.4 High Capacity Service-- **Grandfathered** (Cont'd)

(C)

## D. Optional Features and Functions (Cont'd)

## 2. Central Office Multiplexing (Cont'd)

## a. DS3 to DS1

An arrangement that converts a 44.736 Mbps channel to 28 DS1 channels using digital time division multiplexing.

## b. DS1C to DS1

An arrangement that converts a 3.152 Mbps channel to two DS1 channels using digital time division multiplexing.

c. DS1 to Voice <sup>[1]</sup>

An arrangement that converts a 1.544 Mbps channel to 24 channels for use with Voice Grade Services. A channel of this DS1 to the Hub can also be used for a Digital Data Service.

f. DS1 to DS0 <sup>[1]</sup>

An arrangement that converts a 1.544 Mbps channel to 24 64.0 Kbps channels utilizing digital time division multiplexing.

<sup>[1]</sup> Effective November 1, 2021 Voice Grade, Digital Data and Fractional DS1 Services are grandfathered. Availability to current customers is limited to circuits in service at existing locations.

Effective: August 15, 2024

## E7. DEDICATED ACCESS SERVICES

## E7.2 Service Description (Cont'd)

E7.2.4 High Capacity Service-- **Grandfathered** (Cont'd)

(C)

## D. Optional Features and Functions (Cont'd)

## 3. Clear Channel Capability

- a. Clear Channel Capability (CCC) is an arrangement that alters a DS1/1.544 Mbps signal with unconstrained information bits, to meet pulse density requirements outlined in TR-NPL-000054 and TA-TSY-000342. This will allow a customer to transport an all zero octet over a DS1/1.544 Mbps High Capacity channel, providing an available combined maximum 1.536 Mbps data rate. This arrangement requires the customer signal at the channel interface to conform to Bipolar with 8 Zero Substitution (B8ZS) line code as described in TR-NPL-000054 and TR-NPL-000342.
- b. CCC is provided on DS1/1.544 Mbps High Capacity channels between two customer designated premises, or between a customer designated premises and a Company Hub location, and is subject to the availability of facilities. This optional feature may be ordered at the same time the DS1/1.544 Mbps High Capacity channel is ordered, or it may be ordered as an additional feature of an existing channel.

<sup>[1]</sup> Effective November 1, 2021 Voice Grade, Digital Data and Fractional DS1 Services are grandfathered. Availability to current customers is limited to circuits in service at existing locations.

ACCESS SERVICES TARIFF

CenturyLink of Florida, Inc.  
By: Robyn Crichton, Director

Section 7  
1st Revised Page 53

Effective: August 15, 2024

E7. DEDICATED ACCESS SERVICES

E7.4 Rate Regulations (Cont'd)

E7.4.9 Term Discount Plan – Grandfathered

(C)

**Effective August 15, 2024, Private Line DS-1 and DS-3 Services are grandfathered. New contracts or renewal of existing contracts will no longer be accepted for these services, effective immediately. Existing services are limited to circuits in service at existing locations. Customers with a contract may retain their Intrastate Private Line circuit on a month-to-month basis once the contract expires.**

(N)

(N)

A) General

The Special Access Term Discount Plan (TDP) applies to Special Access Digital Data Services <sup>[1]</sup> (56.0 and 64.0 Kbps), High Capacity DS1 (1.544Mbps) and DS3 (44.736 Mbps) services, DS3 to DS1 and DS1 to DS0 Multiplexing. The TDP provides the customer with discounted rates for the services listed. The customer agrees to a minimum service commitment per service when the TDP is established. In order for a circuit to be eligible for TDP pricing, the customer must commit a channel termination and/or multiplexer associated with that circuit to a TDP. The commitment level for a circuit will be based on channel terminations and/or multiplexers. Customers may disconnect or move channel terminations and/or multiplexers within the state and not be subject to termination liability charges as long as the commitment levels are maintained.

(C)

B) Commitment Level

All eligible special access rate elements for a given circuit (channel termination, channel mileage termination (fixed), channel mileage facility (per mile) and multiplexing), must be ordered for the same commitment period with the same service date for the same customer. A customer establishes a TDP by committing all or a portion of their in-service channel terminations and/or multiplexers to a minimum term of 3 years up to a maximum term of 5 years. During the term of the selected TDP, the customer must maintain an in-service commitment threshold of not less than 90% or more than 130% of the committed channel terminations and/or multiplexers.

As long as a customer's actual in-service level of channel terminations and/or multiplexers remains within the commitment threshold, the customer will be billed the TDP rate for all eligible rate elements. Additionally, if a customer's in-service level exceeds the initial in-service level by no more than 30%, the customer will be billed the TDP rates for all eligible rate elements. For example, the customer has 200 DS1 channel terminations and/or multiplexers and elects to commit 150 channel terminations and/or multiplexers to a 3 year TDP. The customer will be billed TDP rates as long as the in-service level of the channel terminations and/or multiplexers is equal to or greater than 135 (90% minimum threshold) but not more than 195 (130% maximum threshold).

[1] Effective November 1, 2021 Voice Grade, Digital Data and Fractional DS1 Services are grandfathered. Availability to current customers is limited to circuits in service at existing locations. Customers will not be able to renew Digital Data Services within the term plan.

ACCESS SERVICES TARIFF

CenturyLink of Florida, Inc.  
By: Robyn Crichton, Director

Section 7  
1st Revised Page 54

Effective: August 15, 2024

E7. DEDICATED ACCESS SERVICES

E7.4 Rate Regulations (Cont'd)

E7.4.9 Term Discount Plan-- **Grandfathered** (Cont'd)

(C)

B) Commitment Level (Cont'd)

If the customer's in-service request exceeds the initial service level by more than 30%, the customer will be billed the month-to-month rate for all facilities above the upper limit of the commitment threshold. If the customer's in-service level falls below the minimum commitment threshold, the customer will be billed termination liability charges for the number of terminations and/or multiplexers below the minimum commitment threshold, and the customer's commitment level will be decreased to 110 percent of the customer's current in-service level. For example, a customer whose minimum commitment threshold is 135 channel terminations and/or multiplexers (90% of 150), but only has 125 in-service, will be billed termination liability charges for 10 channel terminations and/or multiplexers and the customer's commitment level will be decreased to 138 (110% of 125).\*

Although the commitment level is based upon channel terminations and/or multiplexers, the following rate elements will receive TDP rates:

- Channel Mileage Facility (per mile)
- Channel Mileage Termination (fixed)
- Channel Termination
- Multiplexing

C) Ordering Provisions

The customer must order a TDP in writing to the Telephone Company. A TDP may be ordered based on the following plan options.

- 3 year
- 5 year

The customer must specify the plan and the length of the service commitment period and commitment level. The customer agrees to a minimum service commitment level per service in effect at one time. For example, a customer that has a specific 3 year plan in effect for DS1 service may not establish a second 3 year DS1 TDP for that area until the current TDP expires. Once a plan has been established and commitment levels are agreed upon, standard access ordering procedures will be followed.

When a customer converts to a TDP, no access order charges are applied toward facilities in-service at the time. If a customer moves from a month to month plan to a TDP, or upgrades from one TDP to another, no access order charges are applied.

\* Customers subscribing to special access term discount plans established or on order prior to November 29, 2002 may elect to discontinue service without incurring termination liability charges within 90 days of that date.

Effective: August 15, 2024

## E7. DEDICATED ACCESS SERVICES

## E7.4 Rate Regulations (Cont'd)

E7.4.9 Term Discount Plan– **Grandfathered** (Cont'd)

(C)

## D) Service Rearrangements

When a circuit committed to a TDP is rearranged as set forth in 7.4.1(B)(3) preceding, the nonrecurring rearrangement charge associated with the month-to-month rates for that service will apply. Changes in the type of service or service termination are treated as disconnects and starts, and the nonrecurring installation charge associated with the month-to-month rates for that service will apply. Changes in the physical location of the point of termination are treated as moves, as described in 7.4.4 preceding, and will be assessed the nonrecurring charge associated with the month-to-month rates for that service.

## E) 90 Day Review Period

No adjustments in monthly billing for a TDP, for being above or below the commitment threshold described in (B) preceding, will take place until 90 days after Telephone Company written notification to the customer that the commitment threshold has been exceeded or has not been met. This will ensure that customers will not be penalized for aberrations in channel termination and/or multiplexer counts caused by timing differentials in disconnection and installation.

Customer's bills will not be adjusted for being outside the threshold described in (B) preceding during the 90 day review period. Additionally, customers will continue to be billed the adjustments (following the 90 day review period) for being outside the described threshold until the commitment level is met or re-established. A new 90 day review period will be initiated if the customer's actual in-service level subsequently falls outside the described threshold.

## F) Increasing the TDP Commitment Level

Customers may increase their commitment level at any time by notifying the Telephone Company in writing. An increase in the commitment level will not change the expiration date of the TDP.

When a commitment level is increased, the actual in-service channel termination and/or multiplexer level at the time of the increase will be used to calculate the new commitment threshold as described in (B) preceding.

Upon written notification to the Telephone Company, customers may elect to have all future channel terminations and/or multiplexers installed during a commitment period automatically placed on the designated TDP.

Effective: August 15, 2024

## E7. DEDICATED ACCESS SERVICES

## E7.4 Rate Regulations (Cont'd)

E7.4.9 Term Discount Plan– **Grandfathered** (Cont'd)

(C)

## F) Increasing the TDP Commitment Level (Cont'd)

Customers may request, upon written notification to the Telephone Company, that the Telephone Company automatically increase the customer's TDP commitment level when the 130% commitment threshold, as set forth in 7.4.9(B) preceding, is exceeded. The adjusted commitment level will be the actual channel terminations and/or multiplexers in service under the TDP at the time the 130% threshold is exceeded. The expiration date of the customer's TDP will not be affected by this change.

The customer may rescind its request to automatically add future channel terminations and/or multiplexers, or to automatically increase its commitment level when the 130% threshold is exceeded, by notifying the Telephone Company in writing.

## G) Decreasing the TDP Commitment Level and Termination Liabilities

Customers may only decrease their commitment level by paying termination liability charges on the number of channel terminations and/or multiplexers by which the commitment level is decreased. Termination liabilities will apply to applicable services covered by the TDP. For example, a customer has a commitment level of 150 channel terminations and/or multiplexers. The customer then decreases its commitment level to 125. The customer must pay a termination liability on the most recently disconnected 25 facilities, inclusive of all associated rate elements as listed in section E7.4.9 B.

If a customer disconnects any portion of their TDP service prior to the expiration of the commitment period, the customer will be billed 50% of the monthly TDP charges for the remaining portion of the committed term. For example, a customer disconnecting in the 12th month of a 3 year plan will be charged 50% of the remaining 24 months of billing.

## H) Rate Changes

In this section, the term "rate" refers to the charges associated with the entire circuit covered by a TDP. Rate increases or decreases will automatically be applied to the monthly term plan rates for the remaining term of the TDP. If a Telephone Company initiated rate increase causes a customer's rates to increase by 10% or more at any one-time, the customer may cancel the TDP without incurring termination liability charges.

Effective: August 15, 2024

## E7. DEDICATED ACCESS SERVICES

## E7.4 Rate Regulations (Cont'd)

E7.4.9 Term Discount Plan– **Grandfathered** (Cont'd)

(C)

## I) Extension of TDP Commitment Period

TDP commitment periods can be extended by the customer at any time during the term of the plan, up to a maximum of 5 years. The number of months accrued in the current plan will apply toward the new plan selected. For example, a customer having completed 15 months of a 3 year commitment can extend the commitment to 5 years and no additional charges will be assessed. The first payment will be considered the 16<sup>th</sup> payment under the new 5 year plan.

## J) Upgrading a TDP Service

When a customer upgrades a digital data service being billed TDP rates to a DS1 service, the digital data TDP commitment level will be reduced at the customer's request (up to a maximum of 24) and no termination liability charge will apply. If the same customer has a TDP for DS1 service, the DS1 TDP commitment level will be increased if the customer requests that it be increased. When a customer upgrades a DS1 service being billed TDP rates to a DS3 service with the same termination points, the customer's DS1 TDP commitment level will be reduced at the customer's request (up to a maximum of 28) and no termination liability charge will apply.

## K) Renewal of a TDP

At the end of the TDP service commitment period, the customer may subscribe to a new TDP at the prevailing rates set forth in Section E7.5.3 following. If the customer does not select a new TDP, the rates will convert to the prevailing month-to-month Digital Data, DS1 or DS3 rates. The customer will have a 90 day grace period to renew their TDP before the month-to-month rates will be assessed.

## L) Cancellation Charges

When a customer cancels an order for special access services being provided under a TDP, cancellation charges, as set forth in 5.2.3 preceding, will be calculated using the nonrecurring charges associated with the month-to-month rates for the service being cancelled.
