PRICE LIST FORMAT

- A. Check Sheets** - When a price list filing is made with the FL-PSC, an updated check sheet accompanies the price list filing.
- B. Sheet Numbering and Revision levels** - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the price list. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between existing sheets 14 and 15 would be 14.1. Revision levels also appear in the upper right corner of each page. These levels are used to determine the most current sheet version on file with the FL-PSC. For example, the 4th revised sheet 14 cancels the 3rd revised sheet 14.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

2.
2.1.
2.1.1.
2.1.1.A.
2.1.1.A.1.
2.1.1.A.1.(a).
2.1.1.A.1.(a).I.
2.1.1.A.1.(a).I.(i).
2.1.1.A.1.(a).I.(i).(1).

- D. Check Sheets** - When a tariff filing is made with the FL-PSC, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the FL-PSC.

4.3. Public Telephone Surcharge

In order to recover the Company's expenses to comply with the FCC's pay telephone compensation plan effective on October 7, 1997 (FCC 97-371), an undiscountable per call charge is applicable to all intrastate calls that originate from any pay telephone, not presubscribed to the Company, used to access Company provided services. This surcharge, which is in addition to standard Pricelist usage charges and any applicable service charges and surcharges associated with service, applies for the use of the instrument used to access Company provided service and is unrelated to the service accessed from the pay telephone.

Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies and interexchange carriers. The Public Pay Telephone Surcharge applies to the initial completed call and any reoriginated call (e.g., using the "#" symbol). The Public Pay Telephone Surcharge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call.

Whenever possible, the Public Pay Telephone Surcharge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Public Pay Telephone Surcharge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.

4.4 Optional Calling Features

The features in this section may be provided as part of a service package or purchased a la carte by the subscriber, subject to availability. Where a feature may not be available for inclusion in a Service Plan, OPEXTEL reserves the right to substitute an alternative feature at its discretion.

4.4.1 Feature Descriptions

Three Way Calling - Permits the Customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The Customer initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming.

Speed Dialing (30) - This feature allows a user to dial selected numbers using two digits. Up to thirty telephone numbers can be selected. The Speed Calling list can only accommodate a number consisting of 15 digits or less.

Call Return - Call return stores the number of the most recent incoming call (including unanswered calls) to a Customer's number. This allows a Customer to dial back any missed or unanswered telephone calls.

Repeat Dialing - automatically redials the last telephone number the Customer dialed in the Customer's local calling area. The system will keep retrying the number attempting to make the connection if the line is busy.

Anonymous Call Rejection (ACR) - Anonymous Call Rejection (ACR) allows a customer to reject calls from callers who have blocked the display of their telephone numbers from a Caller ID device. ACR discourages anonymous calls, since callers must allow their numbers to be displayed in order to reach you. When a customer activates Anonymous Call Rejection, callers who have blocked the display of their numbers will hear an announcement telling them that the Customer are not accepting blocked calls. They will be instructed to hang up, unblock their number and dial again if they wish to reach you. A customer will hear a confirmation announcement whenever the Customer activate or deactivate the Anonymous Call Rejection feature.

4.4 Optional Calling Features (Continued)

4.4.1 Feature Descriptions (Continued)

Call Trace – allows Customers to key in a code that alerts the network to trace the last call received. The traced telephone number is automatically sent to the company for storage for a limited amount of time and is retrievable by legally constituted authorities upon proper request by them. By contacting the company the Customer can use this application to combat nuisance calls. This service may be ordered on a Monthly or per trace basis.

Call Forwarding Variable - Call Forwarding Variable allows the Customer to choose to reroute incoming calls to another specified telephone number. The Customer must activate and deactivate this feature.

Call Waiting - Call Waiting provides a tone signal to indicate to a Customer already engaged in a telephone call that a second caller is attempting to dial in. It will also permit the Customer to place the first call on hold, answer the second call and then alternate between both callers.

Call Waiting Deluxe – provides the Customer with Call Waiting, Caller Id and Call Waiting Id.

Caller ID - allows a Customer to see a caller's number previewed on a display screen before the call is answered allowing a Customer to prioritize and or screen incoming calls. Caller ID records the number, date and time of each incoming call - including calls that aren't answered by the Customer. Caller ID service requires the use of specialized CPE not provided by the company. It is the responsibility of the Customer to provide the necessary CPE.

Caller ID with Name - allows a Customer to see a caller's name previewed on a display screen before the call is answered allowing a Customer to prioritize and or screen incoming calls. Caller ID records the name, date and time of each incoming call - including calls that aren't answered by the Customer. Caller ID service requires the use of specialized CPE not provided by the company. It is the responsibility of the Customer to provide the necessary CPE.

4.5 Directory Assistance Service

A Customer may obtain assistance, for a charge, in determining a telephone number by dialing Directory Assistance Service. A Customer can also receive assistance by writing the Company with a list of names and addresses for which telephone numbers are desired.

A business or residence main telephone exchange line may be registered for exemption from Directory Assistance charges where one of the users of the line is considered to be legally blind, visually or physically handicapped, or where the user's handicap prevents the dialing of a telephone in a conventional manner or permits only the dialing of "0". Requests for exemption must be accompanied by certification of the handicap. Acceptable certifications include those signed by a physician, issued by a state agency qualified to certify such handicaps or preexisting certifications establishing visual or physical inability to use a directory such as those which qualify the handicapped person for an income tax exemption or social security benefits on the basis of blindness or physical disability or for use of the facilities of an agency for the blind.

4.5.1 Basic Directory Assistance

The rates specified following apply when Customers request company assistance in determining telephone numbers of Customers who are located in the same local service area or who are not located in the same local service area but who are located within the same NPA.

A maximum of two (2) requested telephone numbers are allowed per call.

4.5.2 Directory Assistance Call Completion

Directory Assistance Call Completion (DACC) is a service that provides customers the option of having their local or intraLATA calls automatically completed when they request a telephone listing from the Directory Assistance operator. The call may be completed automatically or by the Directory Assistance operator.

The DACC portion of the call may either be billed in the same manner as the DA portion or alternately billed by using a calling card, billing to a third number, or collect. All operator-handled charges apply as appropriate. For local and intraLATA calls, charges for DACC service are not applicable to calls placed by those customers with reading, visual, or physical handicaps.

4.6 Directory Listing Services

4.8.1 General

The following rates and regulations apply to standard listings in light face type in the white Sheets (alphabetical section) of the telephone directory and to the Directory Assistance records of the Company. Directory listings are limited to such information as is essential to the identification of the listed party. The listing of a service, commodity, or trade name is not permitted unless it is the name, or an integral part of the name, under which the Customer does business. A listing is limited to one line in the directory, except where in the judgment of the Company, more than one line is required to identify the Customer properly. In such cases, the additional lines required are provided at no extra charge. Dual name listings are permitted as a regular directory listing for residential service. Listing services are available with all classes of main telephone exchange service.

4.8.2 Listings

A. Primary Listing

One listing, termed the primary listing, is included with each exchange access line or each joint user service.

B. Additional Listings

Additional listings may be the listings of individual names of those entitle to use the customer's service or, for business, Departments, Divisions, Trade names, etc. In connection with business and residence service, regular additional listings are available only in the names of Authorized Users of the Customer's service. Ordinarily, all additional listings are of the same address and telephone number as the primary listings, except as provided for joint user and alternate number listings. However, when it appears necessary as an aid to the use of the directory and provided satisfactory service can be furnished, a listing will be permitted under the address of a branch exchange, Centrex or extension of an exchange service line installed on the premises of the Customer, but at an address different from that of the attendant position of main service. Business additional listings are not permitted in connection with residence service. Residence additional listings are also permitted in connection with business service which is located in a residence and for permanent or season guests residing in a hotel or club. A residence dual name additional listing is comprised of a surname, two first names, address and telephone number. A residence dual name additional listing may be provided for two persons who share the same surname and reside at the same address, or for a person known by two first names.

C. Nonpublished Service

The telephone numbers of nonpublished service are not listed in either the Company's alphabetical directory or Directory Assistance records available to the general public.

Non published information may be released to emergency service providers, to customers who subscribe to Company offerings which require the information to provide service and/ or bill their clients, or, to telephone customers who are billed for calls placed to or from nonpublished numbers and to entities which collect for the billed services. Nonpublished names and/or telephone numbers may also be delivered to customers on a call-by-call basis.

Incoming calls to nonpublished service will be completed by the Company only when the calling party places the call by number. The Company will adhere to this practice notwithstanding any claim the calling party may present, except claims of emergencies involving life and death. In such cases, the Company will call the non-published number and request permission to make an immediate connection to the calling party.

When the Company agrees to keep a number unlisted, it does so without any obligation. Except for cases of gross negligence or willful misconduct, the Company is not liable for any damages that might arise from publishing a non-published number in the directory or disclosing it to some. If, in error, the telephone number is published in the directory, the Company's only obligation is to credit or refund any monthly charges the Customer paid for nonpublished service.

The Subscriber indemnifies (i.e., promises to reimburse the Company for any amount the Company must pay as a result of) and save the Company harmless against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the publication of a non-published service or the disclosing of said number to any person.

When the Company agrees to keep a number unlisted, it does so without any obligation. Customers of record will retain their primary interexchange carrier(s) until they request that their dialing arrangements be changed. Customers of record or new Customers may select either Options A, B, C, D, E or F for intraLATA Presubscription. The Company will process the Customer's order for service. All new Customers' initial requests for intraLATA toll service presubscription shall be provided free of charge.

If a new Customer is unable to make selection at the time the new Customer places an order to establish local exchange service, the Company will read a random listing of all available intraLATA and interLATA carriers to aid the Customer in selection. If selection is still not possible, the Company will inform the Customer that he/she will be given 90 calendar days in which to inform the Company of his/her Additional Line for primary toll carrier(s) free of charge. Until the Customer informs the Company of his/her Additional Line of primary toll carrier, the Customer will not have access to long distance services on a presubscribed basis, but rather will be required to dial a carrier access code to route all toll calls to the carrier(s) of Additional Line. Customers who inform the Company of a Additional Line for toll carrier presubscription within the 90 day period will not be assessed a service charge for the initial Customer request.
