ORDER APPROVING PETITION OF  
CHARGES FOR UNDERGROUND DISTRIBUTION FACILITIES

BY THE COMMISSION:

Pursuant to the provisions of Section 366.06(4), Florida Statutes, and Rules 25-6.033 and 25-6.078, Florida Administrative Code, Florida Power & Light Company (FPL), Tampa Electric Company (TECO), Florida Power Corporation (FPC) and Gulf Power Company (Gulf) filed annual updates to their tariffs and charges associated with the installation of underground residential distribution service. The changes requested by FPL, TECO, and Gulf were approved in Order No. PSC-92-0244-FOF-EI issued on April 23, 1992. All four investor-owned utilities have been handled together for comparison purposes. Due to differences in the filing time of FPC it is necessary that we issue a separate order for its change. The cost of standard overhead service is recovered in the base rates paid by all customers. Proposed changes were accompanied by workpapers explaining the derivation of the charges.

FPC proposes that the following per lot cost differentials be applied to residential subdivisions consisting of single family dwellings (226 lot low density subdivisions) and mobile home parks (176 lot high density subdivisions).

DOCUMENT NUMBER-DATE

FPSC-RECORDS/REPORTING

1991 OVERHEAD VS. UNDERGROUND  
PER LOT COST DIFFERENTIALS

<u>Residential Subdivisions</u>	\$ 1991 <u>Existing</u>	\$ 1992 <u>Proposed</u>	% <u>Change</u>
A. Single Family Dwelling- (Low Density)			
FPC	306.82	285.37	-6.99
B. Mobile Home Park (High Density)-Individual Meters			
FPC	192.31	172.90	-10.09
C. Mobile Home Park (High Density)-Ganged Meters			
FPC	83.02	56.69	-31.72

We have reviewed the updated tariff sheets, charges and supporting data provided by FPC. We find that, overall, the reductions in the cost differential in the various categories of service appear to be reasonable.

In consideration of the foregoing, it is

ORDERED by the Florida Public Service Commission that Florida Power Corporation's updated tariff sheets and charges associated with the installation of underground electric distribution facilities to serve residential customers are approved. It is further
