ORDER APPROVING TARIFF REVISIONS

BY THE COMMISSION:

By letter filed April 18, 1996, Florida Power Corporation proposed modifications to its Energy Monitor Program. The major change proposed is in the charge structure for the Energy Accounting Service. This program provides usage trends and historical usage data based on meter monitoring. In the initial approved program, the charge for this service was \$600 for customers with average annual usage between 0 and 300,000 KWH and \$.002/KWH for customer with average annual usage in excess of 300,000 KWH. The proposed modification charges \$7.50 per meter, without regard for usage levels. The modification is appropriate because the program is more closely tied to the number and types of meters placed on the program - and thus the cost of the program - than to the total KWH usage.

In addition the language under the Energy Accounting Service, the Load Monitoring Service and the Building Commissioning Service programs are all modified to include a requirement for a customer contract. The proposed language also states that the cost of the program will be determined in conjunction with the customer and be based on the cost of services required. It contains a provision for a refund of the charges, if, as a result of the program, energy efficiency measures are implemented by the customer. All refunds will be based on cost effectiveness evaluation under the Rate Impact Measure methodology. The proposed language more clearly lays out the terms and conditions and does not materially change any aspect of the program from what was originally approved.
