Attn: Tariff Section  
2540 Shumard Oak Boulevard  
Tallahassee, Florida 32399-0850

Dear Mrs. Salak:

Pursuant to Florida Statute 364.051 we are filing herewith revisions to our General Subscriber Service Tariff. Following are the affected pages:

<u>General Subscriber Service Tariff</u>	
Section A42	Seventh Revised Page 37.1 Third Revised Page 39.1
Section A142	Second Revised Contents Page 1 First Revised Page 8

The purpose of this filing is to obsolete Calling Name/Number Delivery for BellSouth Primary Rate ISDN service components.

Acknowledgment, date of receipt and authority number of this filing are requested.

Yours very truly,

Jerry D. Hendrix (slg)  
Regulatory Vice President

## **EXECUTIVE SUMMARY**

### **Introduction:**

The purpose of this filing is to obsolete Calling Name/Number Delivery for BellSouth Primary Rate ISDN service components.

### **Description of Proposed Tariff**

Pursuant to FCC requirements, a carrier may provide Calling Name Delivery Blocking at the 'Per Line' level only if they also provide Calling Name Delivery Unblocking at the 'Per Call' level.

Since the PRI is a trunk connected to customer's premises equipment, AT&T Florida is unable to provide unblocking associated with Calling Name/Number Delivery for BellSouth Primary Rate ISDN Service, this filing obsoletes BellSouth Primary Rate ISDN Calling Name Delivery Blocking – Permanent. In this tariff, AT&T Florida clarifies any blocking for these types of trunks are the responsibility of the customer. This capability will remain in place for existing customer arrangements prior to the date of this filing; however, it will not be available for new arrangements, rearrangements, moves or transfers. Also, this filing removes references to blocking in Tariff Section A13.

There is no revenue impact associated with this filing since AT&T Florida does not charge for this type of blocking.

## A42. INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

### A42.3 BellSouth Primary Rate ISDN (Cont'd)

#### A42.3.1 General (Cont'd)

P. (Cont'd)

4. Calls may be overflowed from an ERS Dedicated Route Arrangement to an ERS Final Route Arrangement by utilizing the Overflow Feature for ERS Dedicated Route Arrangements. When all facilities are busy on the Customer's Dedicated Arrangement from a particular target local calling area, the Overflow Feature allows additional calls to be switched over interoffice trunk groups to the customer's local serving central office, where they terminate on ERS Final Route Primary Rate Interfaces and B-Channels, via an ERS FTN. A BellSouth Primary Rate ISDN Access Line or other Company provided transport facility is required for connection to the customer's local serving central office.
5. ERS is jointly provided with other telephone companies only where technically feasible and where mutually agreed upon by the telephone companies involved.

- Q. Calling Name/Number Delivery provides the user who is receiving a call with information about the calling party. Calling names/numbers will be delivered within the Common Channel Signaling System 7 serving area unless delivery is blocked through Per Line or Per Call Blocking as specified in A13 by the customer's equipment.

#### A42.3.2 Regulations

- A. BellSouth Primary Rate ISDN is available on a month-to-month basis or under variable rate periods, with rates based on lengths of twelve to twenty-three months, twenty-four to forty-eight months or forty-nine to seventy-two months under conditions specified in the Channel Services Payment Plan in B2.4 of the Private Line Service Tariff and as stated following:
1. A volume discount schedule is available to customers under month to month or contract rates as described in A42.3.4.E. A rate discount for BellSouth Primary Rate ISDN Interfaces is calculated based upon the quantity of BellSouth Primary Rate ISDN Interfaces on a billing account. In addition, a discount for BellSouth Primary Rate ISDN B-Channels is calculated based upon the number of BellSouth Primary Rate ISDN B-Channels on a billing account.
  2. A Termination Liability Charge is applicable if service is terminated prior to expiration of the contract. The applicable charge is equal to the number of months remaining in the contract times fifty percent (50%) of the monthly rate provided under the contract.
  3. A Termination Liability Charge shall not apply for the termination of B-Channels prior to the expiration of the contract.
- B. Nonrecurring charges associated with the BellSouth Primary Rate ISDN Access Line or Interoffice Channel facilities will not be applicable when upgrading from an existing MegaLink service to BellSouth Primary Rate ISDN. A Type 1 Service Change Charge as specified in A42.3.4.G. will be applicable for the MegaLink service upgrade in addition to nonrecurring charges for other BellSouth Primary Rate ISDN rate elements ordered.
- C. No nonrecurring charges will be applicable when converting MegaLink ISDN service to BellSouth Primary Rate ISDN or for converting from one BellSouth Primary Rate ISDN option to another, e.g., Voice/Data to Inward Data or Inward Data to Inward Data Extended Reach Service (ERS). The term "conversion" means that the Primary Rate Interface(s) remain in place in the same central office. If the Primary Rate Interface(s) are moved in connection with ERS, the change is considered a rearrangement and regulations stated in D. following are applicable. No termination charges are applicable for conversions when:
1. The contract selected for the new BellSouth Primary Rate ISDN arrangement is coterminous with the previous contract or is for a 24 month period, whichever is longer, and,
  2. The service orders to disconnect the previous arrangement and to install the new BellSouth Primary Rate ISDN arrangement are related together and received by the Company at the same time with no lapse in billing of service.
- D. Rearrangement charges stated in A42.3.4.G. are applicable for moves of Primary Rate Interfaces from one central office to another in connection with the initial installation of Inward Data ERS or for subsequent moves of Primary Rate Interfaces from one central office to another for ERS Final or Dedicated arrangements. Termination Liability charges are not applicable if the number of Primary Rate Interfaces is not reduced.

## A42. INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

### A42.3 BellSouth Primary Rate ISDN (Cont'd)

#### A42.3.2 Regulations (Cont'd)

- X. The Company reserves the right to audit the customer's traffic usage for the Incoming Call Extension feature to insure that simultaneous calls are not occurring on the low use option. If such calls are occurring, the customer will be required to subscribe to the high use option.
- Y. The Service Installation Guarantee as set forth in B2.4.17 of the Private Line Service Tariff applies for BellSouth Primary Rate ISDN. (Ⓣ)
- Z. ~~Calling Number Delivery Blocking - Permanent will be provided for BellSouth Primary Rate ISDN to the same customer groups listed for TouchStar service in A13.19 at the same rates and charges.~~ (O)(Ⓣ)  
*(Obsoleted, See Section A142)*
- AA. The provisions stated under B2.4.14 Cancellation of a Service Order apply for BellSouth Primary Rate ISDN with one exception. The customer must accept service within 45 calendar days after the original service date rather than 30 calendar days as stated in B2.4.14 or choose one of the following options: (Ⓣ)
- The service order shall be cancelled and charges as set forth in B2.14.14 will apply, or
  - Billing for the service will commence on the 46th day beyond the original service date of the service order.
- BB. Customer requested changes from BellSouth Primary Rate ISDN to intrastate or interstate Fast Packet Services and associated transport under a contract payment plan are permitted with no termination liability when: (Ⓣ)
1. A new contract is selected for the Fast Packet Service equal to or greater in length than the BellSouth<sup>®</sup> Primary Rate ISDN arrangement being terminated, and (T)
  2. The service orders to disconnect the BellSouth Primary Rate ISDN and to install the Fast Packet Service are related together and received by the Company at the same time with no lapse in billing of service. (Ⓣ)
- CC. ATM Service can be utilized to provide transport for BellSouth Primary Rate ISDN Voice/Data - Flat Rate under the following conditions: (Ⓣ)
1. The Unstructured Circuit Emulation Customer Connection - PRI over ATM rate element specified in A40.8 of this Tariff applies for each Voice/Data Flat Rate Interface transported via ATM. Other ATM rates are applicable as stated in A40.8 of this Tariff.
  2. Interoffice Channel rates stated in A42.3.4 following apply when the Primary Rate ISDN switch and the ATM switch are not located in the same central office.
  3. Rates for the B-Channel to be used with ATM are specified in A42.3.4 following.
  4. In accordance with regulations governing the provisioning of local exchange service via BellSouth Primary Rate ISDN Service, the PVC Segment associated with the Unstructured Circuit Emulation Customer Connection - PRI over ATM may only be mapped to a PVC Segment associated with a local ATM Service Customer Connection whose service terminates to a premises within the same LATA as the BellSouth Primary Rate ISDN Service switch. (Ⓣ)
- DD. The PRI Overflow feature for Voice/Data Arrangements allows calls to overflow from a customer's Voice/Data PRI Arrangement to a telephone number. The calls must overflow to a BellSouth business telephone number residing in the same central office switch as the customer's Voice/Data PRI Arrangement. (Ⓣ)
