BEFORE THE
FLORIDA PUBLIC SERVICE COMMISSION

In The Matter of	:	DOCKET NO. 890148-EI
	:	
In Re: Petition of the Florida Industrial Power Users Group to Discontinue Florida Power and Light Company's Oil Backout and Light Company's Oil Backout Cost Recovery Factor	:	
	:	<u>MOTIONS HEARING</u>

RECEIVED
Division of Records & Reporting
MAR 7 1990
Florida Public Service Commission

FPSC Hearing Room 106
101 E. Gaines Street
Tallahassee, Florida 32399
Monday, March 5, 1990

Met pursuant to notice at 9:30 a.m.

BEFORE: COMMISSIONER MICHAEL WILSON, Chairman
COMMISSIONER THOMAS M. BEARD
COMMISSIONER BETTY EASLEY
COMMISSIONER GERALD L. GUNTER
COMMISSIONER JOHN T. HERNDON

APPEARANCES:

CHARLES GUYTON of the firm of Steel, Hector & Davis,
215 South Monroe Street, Suite 601, Tallahassee, Florida
32301-1804, Telephone No. (904) 222-2300, appearing on behalf of
Florida Power & Light.

JOSEPH McGLOTHLIN of the firm Lawson, McWhirter,
Grandoff & Reeves, 522 Park Avenue, Tallahassee, Florida,
Telephone No. (904) 222-2525, on behalf of the Florida Industrial
Power Users Group.

1 APPEARANCES CONTINUED:

2 ROGER HOWE, Assistant Public Counsel, Florida House of
3 Representatives, The Capitol, Tallahassee, Florida 32399-0861,
4 Telephone No. (904) 487-9330, appearing on behalf of the Citizens
5 of the state of Florida.

6 MARSHA RULE, Legal Staff, Florida Public Service
7 Commission, 101 E. Gaines Street, Tallahassee, Florida 32399,
8 Telephone No. (904) 487-2740, appearing on behalf of the Staff.

9 PRENTICE P. PRUITT, General Counsel's Office, Florida
10 Public Service Commission, 101 E. Gaines Street, Tallahassee,
11 Florida 32399, Telephone No. (904) 488-7464, Counselor to the
12 Commissioners.

CERTIFICATE OF REPORTER

57

P R O C E E D I N G S

(Hearing convened at 9:40 a.m.)

CHAIRMAN WILSON: Read the notice.

MS. RULE: This is Docket 890148-EI, petition of the Florida Industrial Power Users Group to discontinue Florida Power and Light Company's oil-backout cost recovery factor. The purpose is to allow the Commission an opportunity to hear oral arguments on the motions filed by various parties to the proceeding.

Commissioners, there are two motions before you today. FP&L has filed a Motion for Reconsideration and Stay of Order No. 22268. FIPUG has filed a Cross-motion for Reconsideration. FIPUG and Public Counsel filed responses to FP&L's motion and FP&L and Public Counsel filed responses to FIPUG's cross-motion.

If you would like to make a bench decision today, we can make an oral recommendation to you. If you would prefer that we write a recommendation and place it on the agenda, we can do that, too. To my knowledge there has been no time limit placed on the parties. It might be appropriate now to ask them how much time they will need.

MR. GUYTON: Commissioners, I think my opening remarks -- I timed them this morning -- are probably going to run 15 minutes. We filed a lengthy document that I'm going to ask you to go to specific pages in and it's going to take a little time to present it.

P R O C E E D I N G S

(Hearing convened at 9:40 a.m.)

CHAIRMAN WILSON: Read the notice.

MS. RULE: This is Docket 890148-EI, petition of the Florida Industrial Power Users Group to discontinue Florida Power and Light Company's oil-backout cost recovery factor. The purpose is to allow the Commission an opportunity to hear oral arguments on the motions filed by various parties to the proceeding.

Commissioners, there are two motions before you today. FP&L has filed a Motion for Reconsideration and Stay of Order No. 22268. FIPUG has filed a Cross-motion for Reconsideration. FIPUG and Public Counsel filed responses to FP&L's motion and FP&L and Public Counsel filed responses to FIPUG's cross-motion.

If you would like to make a bench decision today, we can make an oral recommendation to you. If you would prefer that we write a recommendation and place it on the agenda, we can do that, too. To my knowledge there has been no time limit placed on the parties. It might be appropriate now to ask them how much time they will need.

MR. GUYTON: Commissioners, I think my opening remarks -- I timed them this morning -- are probably going to run 15 minutes. We filed a lengthy document that I'm going to ask you to go to specific pages in and it's going to take a little time to present it.

1 CHAIRMAN WILSON: Mr. McGlothlin.

2 MR. MCGLOTHLIN: I think that 15 minutes would be more
3 than adequate for me.

4 MR. HOWE: Also for me.

5 CHAIRMAN WILSON: That was definitely the right answer.

6 MR. GUYTON: I would hope to have some minimal time to
7 rebut as well.

8 CHAIRMAN WILSON: Yes.

9 All right. Mr. Guyton.

10 MR. GUYTON: May it please the Commission, my name is
11 Charles Guyton and I represent Florida Power and Light in this
12 matter.

13 FP&L is here today to seek reconsideration of Order No.
14 22268 in Docket No. 890148-EI. This docket is a proceeding by
15 the Florida Industrial Power Users Group to discontinue FPL's
16 oil-backout cost recovery factor.

17 In Order 22268 the Commission ordered the retroactive
18 reduction of FP&L's earned return on its oil-backout cost
19 recovery project for three prior recovery periods. You ordered
20 FP&L to refund some \$3.3 million due to this retroactive
21 reduction in FPL's earned return on its oil-backout project. And
22 it's this particular aspect of Order 22268 for which FP&L seeks
23 reconsideration.

24 FPL's grounds for reconsideration are straightforward.
25 First, a refund of FPL's previously authorized and earned ROE,

1 return on equity on its oil-backout project was totally outside
2 the scope of this proceeding. And second, this retroactive
3 adjustment to FPL's oil-backout return on equity is unlawful
4 retroactive ratemaking.

5 Commissioners, the potential refund of FPL's earned
6 return on equity was never raised as an issue in this proceeding.
7 In a petition filed by FIPUG which should constitute the outside
8 boundaries of the scope of the proceeding, FIPUG did not request
9 a refund of FPL's oil-backout return on equity. FIPUG did seek a
10 refund. Its request was very specific, and I will quote from the
11 Prayer for Relief in FIPUG's petition. They ask the Commission
12 to "direct FP&L to refund to customers all accelerated
13 depreciation revenues associated with the inclusion of the
14 alleged Martin deferral benefits in the calculation of net
15 savings." There was no mention by FIPUG of a refund of
16 oil-backout return on equity.

17 In the Prehearing Order, which is supposed to narrow
18 and refine the issues, there was no issue raised by any party
19 addressing or suggesting a potential refund of FPL's oil-backout
20 return on equity. FIPUG did raise an issue regarding oil-backout
21 return on equity and whether the 15.6 that FP&L was currently
22 charging was appropriate. But neither that issue nor any
23 position taken by a party specifically addressed or raised the
24 question of whether or not there would be a refund of the
25 oil-backout return on equity for prior recovery periods. Because

1 of the import of this issue in this particular case, in our
2 Motion for Reconsideration, I would like to read that issue in
3 its entirety as well as the other party's positions. Issue 6 is
4 as follows: "Is FP&L justified in charging a 15.6 return on the
5 equity portion of its capital invested in the 500 kV transmission
6 lines?" "FIPUG: No, Rule 17.016(4)(e) requires the utility to
7 use its actual cost of capital for the recovery period. Use of
8 15.6 is unjustified. Staff: Rule 25-17.016(4)(e) requires the
9 utility to use its actual cost of capital to the recovery period.
10 In Staff's opinion use of a 15.6 return of equity overstates the
11 cost of capital is and, therefore, inappropriate at this time.
12 In the absence of testimony Staff believes that the reduced
13 equity return of 13.6 used for the utility in the tax savings
14 docket is appropriate and more closely approximates the utility's
15 actual cost of capital. OPC: Public Counsel adopts and supports
16 FIPUG's position on this issue."

17 As you just heard, there was no mention in FIPUG's
18 issue. FIPUG's position or any other party's position, but there
19 should be a refund of FPL's oil-backout return on equity. Staff
20 even went so far as to say that 15.6 was inappropriate at that
21 time.

22 Commissioners, this issue is pretty straightforward. A
23 potential refund of FPL's oil-backout return on equity for prior
24 recovery periods was never put at issue in this proceeding. The
25 refund for prior recovery periods was well beyond the relief

1 sought about by FIPUG. FIPUG had no general prayer for relief
2 such as asking you to grant such other relief as may be
3 appropriate when it filed its petition. The Commission even
4 recognized in Order 22268 that that particular issue was beyond
5 the scope of the proceeding. After restating the relief sought
6 by FIPUG, the order specifically notes at Page 2, "decline to
7 grant the remaining relief requested by FIPUG." That was it.
8 That resolved that petition. FP&L was prejudiced by the
9 Commission's resolving an issue that was not put at issue, and
10 FP&L did not have a proper opportunity to address, therefore,
11 we'd ask that you reconsider this aspect of your decision.

12 FPL's other ground for reconsideration is that this
13 retroactive reduction of FPL's oil-backout return on equity is
14 unlawful retroactive ratemaking.

15 Commissioners, I know you're familiar with the case law
16 in this area so I'll try to be brief. Two of the primary
17 statutes under which this Commission sets rates for electric and
18 gas utilities, Section 366.062 and 366.07 Florida Statutes, have
19 been construed by the Supreme Court of Florida as prohibiting the
20 Commission from engaging in retroactive ratemaking. In the City
21 of Miami versus Florida Public Service Commission, 208 So.2d 249,
22 the Supreme Court found that the Commission could not order a
23 refund for prior periods even though the Commission had found
24 that two different utility companies had overearned in those
25 prior periods. Such a refund, the Court concluded, would be

1 retroactive ratemaking conduct which was precluded by statute.

2 Since the City of Miami case there have been two
3 Florida appellate decisions which have carved out narrow
4 exceptions to this general prohibition against retroactive
5 ratemaking. Richter versus Florida Power Corporation, 366 So.2d
6 798, the Second District Court of Appeals, found that in
7 extraordinary circumstances, such as fraud, the Commission can
8 order a refund of previously approved fuel clause revenues.

9 Commissioners, there is no, and there has been no
10 allegation of fraud in this case. The Commission has known since
11 the beginning of the oil-backout cost recovery factor in 1982
12 that the factor included a cost of equity as was approved in
13 FPL's most recent rate case. That principle has been recognized
14 in 14 separate recovery orders up until October of last year.
15 There is no fraud in this case, so the Richter case is
16 inapplicable.

17 The other exception to the prohibition against
18 retroactive ratemaking is found in Gulf Power Company vs Florida
19 Public Service Commission, 487 So.2d 1036. There the Court found
20 a refund of fuel clause revenues was not retroactive ratemaking.
21 However, the Court's decision was clearly tied to the fact that
22 the issue giving rise to the refund was imprudence. The Court
23 stated, and I quote, "This authorization to collect fuel costs
24 close to the time they are incurred should not be used to divest
25 the Commission of the jurisdiction and power to review the

1 prudence of these costs." In this case the equity issue is not
2 an issue of prudence. There is no question of managerial
3 misconduct here, so the Gulf Power case is also inapplicable.

4 At Page 11 of your order, Order 22268, you have already
5 acknowledged the limited scope of the Gulf Power case and you
6 have found that a refund of oil-backout revenues would constitute
7 unlawful retroactive ratemaking. Now, while that finding was
8 made in conjunction or consideration of the issue of whether the
9 accelerated depreciation revenue should be refunded, the same
10 legal principles govern regardless of the nature of the issue.
11 And the same legal principles governed the attempted refund of
12 the equity return. The law is that absent consent by a utility
13 the oil backout revenues potentially subject to retroactive
14 adjustment -- I'm sorry, absent consent by an utility, the only
15 oil-backout revenues that are potentially subject to refund, or
16 retroactive adjustment, are revenues for recovery periods that
17 are not yet trued up.

18 That brings me to my final point, Commissioners. In
19 ordering a refund of FPL's oil-backout equity return for three
20 prior recovery periods, the Commission Order relied heavily on
21 what is a very serious misreading and misapplication of a
22 stipulation between FIPUG and FP&L approved in February of 1989.
23 That stipulation cannot reasonably be construed as FPL's consent
24 to a refund of its earned return on equity.

25 In the middle of Page 6 of Order 22268 where the

1 Commission determines that a partial refund of FPL's oil-backout
2 equity return should be made, and finds that the refund should be
3 from April 1, '88 through September '89, you find that the time
4 frame reflects a stipulation, a part of which you then quote.
5 And then in the next paragraph you make the following finding:
6 "In keeping with the intent and the spirit of this stipulation,
7 we find that a 13.6 return on equity should be used to calculate
8 oil-backout revenue requirements beginning a April 1, 1988."
9 Commissioners, this is simply not a reasonable interpretation of
10 the February 9, 1989, stipulation, nor a complete quote of the
11 all the relevant passages in that stipulation. When the other
12 relevant passage is read, it is clear that FP&L has never
13 consented to a refund of its oil-backout equity revenues.
14 Attachment C to our motion, and we have lengthy attachments to
15 our motion and I'd refer you to those, contains a complete copy
16 of the stipulation entered between FP&L and FIPUG. There are
17 three pages of a joint motion and then following that is a
18 stipulation.

19 On Page 3 of the stipulation, at the top of the page,
20 is the paragraph that's quoted in Order 22268. Please note that
21 in two places in that quoted paragraph there is a reference to
22 the "issues". The word "issues" is capitalized and placed in
23 quotes because it is a defined term, defined on Page 1 of the
24 stipulation in the first paragraph. And if you turn back to the
25 introductory paragraph of the stipulation you'll see that to

1 properly construe the potential refund agreed to on Page 3, one
2 must review what's referred to as the issues here, and the issues
3 are referred to as, "Issues 15 through 17, and FIPUG's position
4 on Issues 1 through 14." And that refers to a draft Prehearing
5 Order.

6 So to properly construe the stipulation and the
7 paragraph in the back, one must look at these issues and FIPUG's
8 position on them. And we can do that by turning to Attachment D.
9 Attachment D is the final Prehearing Order in the February 1989
10 oil-backout hearing, and if you would turn, please, to Page 21 of
11 that Order. There at the bottom of the page, the last paragraph,
12 it's noted that FIPUG raised Issues 16 through 18, previously
13 numbered as Issues 15 through 17, regarding FP&L. So you'll note
14 that the referenced Issues 15 through 17 in the stipulation are
15 actually at Issue 16 through 18 in this Order, and I would note
16 to you that Issues 11 through 14 referred to in the stipulation
17 were renumbered as Issues 12 through 15 in this Prehearing Order
18 as well. So with that in mind, if you would turn back to Page 16
19 where we begin the discussion of the oil-backout issues, I think
20 we can put it in context.

21 If you will review FIPUG's position on Issues 12
22 through 15 you will note -- and that's the only thing that FP&L
23 consented to -- you will note that there is no reference to FPL's
24 oil-backout return on equity, much less a reference to a refund
25 of the oil-backout return on equity for prior recovery periods.

1 If you look at Issues 16 through 18, FIPUG's oil-backout issues,
2 you'll see they didn't raise a return on equity issue in the 1989
3 prehearing statement. So the stipulation does not reach back and
4 give this Commission authority to order a refund as to FPL's
5 oil-backout return on equity.

6 Commissioners, FIPUG never raised an oil-backout equity
7 issue in the February 1989 proceeding. It was not until July
8 1989, five months after that stipulation was entered and
9 approved by the Commission, when FIPUG first raised any issue at
10 all in regard to an oil-backout return on equity. And I quoted
11 that issue to you earlier, Issue 6; it makes no mention of a
12 refund of the equity return for prior periods.

13 Commissioners, the construction of the stipulation in
14 Order 22268 is simply wrong. It was never FPL's intent to agree
15 to, and FP&L did not agree to, a potential refund of an
16 oil-backout equity return for prior recovery periods. It
17 certainly didn't do that in February 1989 because FIPUG didn't
18 raise that issue for another five months. The stipulation was
19 very carefully drafted. It was limited to refunds resulting from
20 specific issues previously raised, raised prior to that time and
21 it could not reasonably be construed to reach the issues raised
22 five months later.

23 Commissioners, the law supports FP&L on this point.
24 Any attempt to refund oil-backout return on equity revenues is
25 retroactive ratemaking. FP&L has not consented to such a refund,

1 and absent such consent, a retroactive reduction to FPL's
2 oil-backout return on equity is unlawful.

3 Commissioners, I reserve the remainder of my time for
4 rebuttal.

5 COMMISSIONER GUNTER: I've only got one question, Mr.
6 Guyton. Listening as carefully as I can to your oral argument,
7 is it your position that the Commission is prohibited from taking
8 up any issue in the proceeding of an adversarial 120.57
9 proceeding? Are we bound with only those issues that are in the
10 Prehearing Order? Is that your position?

11 MR. GUYTON: Commissioner, I think you're bound to the
12 issues properly raised by the pleadings in the Prehearing Order
13 and anything else that you may give the parties notice of. And I
14 would simply submit being bound by the pleadings in the
15 Prehearing Order, that issue has not been raised.

16 COMMISSIONER GUNTER: Well, you're raising that in the
17 Prehearing Order -- there was not an issue in the Prehearing
18 Order on equity return. Now, it would be your position -- and
19 I'm trying to be very clear about it --

20 MR. GUYTON: Yes, sir.

21 COMMISSIONER GUNTER: It would be your position that
22 the Commission is bound in the conduct of any evidentiary
23 proceeding to only those issues that are in the Prehearing Order.
24 That's a "yes" or "no".

25 MR. GUYTON: Yes, sir, I think the argument we're

1 making is clearly that.

2 COMMISSIONER GUNTER: Okay.

3 MR. GUYTON: And it's a question of basic fairness as
4 to what the issues are that the Commission has been asked to
5 resolve by the petitioner in this case, and that FP&L is apprised
6 what it may very well have at issue in the proceeding, and FP&L
7 here in this instance was surprised by this particular --

8 COMMISSIONER GUNTER: I just asked you a "yes" or a
9 "no".

10 CHAIRMAN WILSON: I think you've got to -- and correct
11 me if I'm wrong, I have been listening to what you're saying,
12 I've read your brief -- you're concerned with those issues that
13 were deferred from the fuel adjustment, and the limitation on the
14 Commission from considering certain issues has to do with the
15 periods over which the Commission can exercise jurisdiction of
16 revenues and order the refund.

17 MR. GUYTON: Yes.

18 CHAIRMAN WILSON: Certainly on a prospective basis the
19 Commission can raise issues in a hearing. I mean issues arise
20 during a hearing as a matter of questioning on cross examination
21 that are not contained in the Prehearing Order. So the idea that
22 the Commission is prohibited from considering issues that are not
23 in the Prehearing Order is not, I don't think strictly speaking,
24 what your position is. It's only to the extent that those issues
25 were defined at that prior fuel adjustment proceeding and those

1 issues were deferred and the Company agreed to the deferral and
2 money -- the Commission continued to exercise jurisdiction over
3 certain monies in the oil backout that related to the issues that
4 were raised by the parties at that time. Is that a correct
5 interpretation of what your position is?

6 MR. GUYTON: Mr. Chairman, I believe so. If you allow
7 me --

8 CHAIRMAN WILSON: It may not have been very clear.

9 MR. GUYTON: Allow me to restate it because it was
10 lengthy. Commissioner Gunter, this goes back to the question you
11 raised.

12 Obviously issues arise at hearing, and if the parties
13 go ahead and try those issues that arise at hearing, and they are
14 outside the scope of the Prehearing Order, and they are outside
15 the scope of the pleadings, then they are properly at issue.
16 That has not arisen in this case.

17 FP&L was surprised with this effort. It didn't see a
18 suggestion of an equity refund until the Staff recommendation.
19 So I want to make sure you understand, we feel like we have been
20 denied an opportunity to address the issue as a matter of
21 procedure and we think it's a basic question of fairness.

22 Now, as to your specific concern, Commissioner Wilson,
23 the question arises here because we have a true-up factor that
24 does look back to prior recovery periods, what's the extent to
25 which the Commission can go back and true that up? We would

1 submit for the equity question that there is not an appropriate
2 true-up. The Commission considered it, it was originally
3 stipulated to, it was a matter never put at issue and there was
4 never a question of prudence associated with this equity issue.
5 But even if one were to go to the argument and say well,
6 nonetheless, the Commission has the power to true-up, certainly
7 that true-up power goes back only to the recovery periods for
8 which there is not yet a final true-up.

9 CHAIRMAN WILSON: And what was that period?

10 MR. GUYTON: At the time that this order was issued,
11 both the April through September 1988 recovery period was final,
12 as was the October 1988 through March 1989 recovery period. They
13 were both subject to final orders approving a final true-up for
14 those --

15 CHAIRMAN WILSON: So the retroactivity of the
16 Commission's order would only be effective from April 1989
17 forward?

18 COMMISSIONER GUNTER: No, '88.

19 CHAIRMAN WILSON: You're saying that the April-
20 September '88 was final.

21 MR. GUYTON: At the time this order was issued, yes,
22 Commissioner.

23 CHAIRMAN WILSON: The October to March '89 was final.

24 MR. GUYTON: October '88 to March '89 was final at the
25 time this order was issued.

1 CHAIRMAN WILSON: So is it your position that the only
2 revenues over which we have continuing jurisdiction would be
3 those from April of '89 forward?

4 MR. GUYTON: Those are the only revenues.

5 CHAIRMAN WILSON: If we have any jurisdiction --

6 MR. GUYTON: If you have any jurisdiction as to this
7 question at all, those would be the only revenues that would be
8 subject to refund in a oil-backout proceedings. You will note
9 that this is a separate proceeding. There is not your 890001.
10 It was consolidated with 890001 only for purposes of hearing.

11 COMMISSIONER BEARD: Was the October '88 to March '89
12 true-up period over, was it trued up at the time the decision was
13 rendered in this case as opposed to the order being issued?

14 MR. GUYTON: I believe the answer to that is yes, but
15 if you'll give me a minute I'll look up that order and -- (Pause)

16 Commissioner, I can't look it up. I would refer to
17 originally Page 14 of our motion where we note that in Order
18 22058 the March '89 recovery period -- the October '88 through
19 March 1989 recovery period, the final true-up had also been
20 approved in Order No. 22058.

21 In that order, and I think it's important to point it
22 out, is that there was an attempt by the Commission to retain
23 jurisdiction to adjust oil-backout revenues recovered for that
24 period subject to the decision in this docket, 890148. We would
25 submit that an attempt to retain jurisdiction there, once you've

1 approved a final true-up order, is beyond your powers. Once the
2 final true-up is approved, it's approved.

3 CHAIRMAN WILSON: Your position is that there are only
4 two ways that the Commission can continue -- I guess there are
5 three ways that the Commission could continue to exercise
6 authority over those revenues. One is if the proceeding that we
7 had and the issues we were considering fall under some exception
8 to retroactive ratemaking prohibition.

9 MR. GUYTON: Yes. Those are very narrow and one of
10 questionable validity.

11 CHAIRMAN WILSON: The second would be as if in fact we
12 were still exercising jurisdiction over that recovery period that
13 we had not issued a final order.

14 MR. GUYTON: That's true. And I'm not entirely sure
15 that that's necessarily true as to the equity return but more on
16 question of prudence that you would normally consider in a
17 true-up proceeding.

18 CHAIRMAN WILSON: And the third ground would be if the
19 stipulation -- by agreeing to the stipulation that the company,
20 in fact, allowed the Commission to exercise jurisdiction over
21 those revenues and time periods.

22 MR. GUYTON: Yes, Commissioner, and that's clearly not
23 what FP&L agreed to as we previously discussed.

24 CHAIRMAN WILSON: All right.

25 COMMISSIONER GUNTER: Let me just ask one thing: The

1 line has been fully amortized now; is that right?

2 MR. GUYTON: Yes, sir. Except for the nondepreciable
3 portion of it, yes, sir.

4 COMMISSIONER GUNTER: Except for the nondepreciable
5 portion, which is the land.

6 MR. GUYTON: Yes, sir.

7 COMMISSIONER GUNTER: Is that right? So is the
8 appropriate treatment prospectively that the land goes in the
9 rate base and that you just go on and there is no oil-backout
10 recovery, your O&M is the normal fashion and it goes on from
11 there?

12 MR. GUYTON: That may very well be the appropriate
13 treatment in FPL's next rate case, Commissioner Gunter. I think
14 until the next rate case the treatment envisioned by your rule as
15 you found in this order was that it should be recovered from the
16 oil-backout cost recovery factor.

17 COMMISSIONER GUNTER: I'm trying to understand the
18 justification for that. I don't understand the justification for
19 that.

20 MR. GUYTON: The justification is that FPL's base rates
21 do not reflect a recovery of any of this investment or cost. It
22 was excluded from the consideration of the Commission's
23 determination of our base rates. And that the rule itself
24 provides that until all those costs associated with the project
25 are recovered, they are to be recovered through the oil-backout

1 cost recovery factor.

2 COMMISSIONER GUNTER: I'm going to go read the order,
3 but it's my recollection -- I can be terribly wrong because
4 that's been a long while ago -- and I thought the sole
5 justification in the order was to -- the reason, and the cost
6 sharing and the logic in the cost sharing, in that order, was to
7 allow you to recover and be able to amortize over that time
8 period those depreciable assets. That will be the subject of
9 another -- I'm not on that panel. I'll just ask those folks to
10 read the --

11 CHAIRMAN WILSON: I believe you'll see it later this
12 year.

13 COMMISSIONER GUNTER: Probably.

14 CHAIRMAN WILSON: Any other questions? Mr. McGlothlin.

15 MR. MCGLOTHLIN: Joe McGlothlin for the Florida
16 Industrial Power Users Group.

17 The nature of the adjustment is this: The Commission,
18 in the course of the hearing in Docket 890148, determined that
19 Florida Power and Light Company had proceeded to calculate
20 revenue requirements on the oil-backout project using a 15.6%
21 return on equity after having volunteered to accept 13.6% for
22 other purposes beginning in 1987, and while the rule requires the
23 utility to incorporate the actual costs of the line.

24 The Commission ordered a refund of a difference between
25 13.6 and 15.6%, and required it to be made effective in, I

1 believe, April 1988. And what we have here is a very narrow
2 grounds for reconsideration. Page 3 of the Motion for
3 Reconsideration, Mr. Guyton says, "The ground for FPL's request
4 for reconsideration is that the refund ordered by Order No. 22268
5 constitutes unlawful retroactive ratemaking," and that's the
6 entire basis for reconsideration offered by the Company.

7 The dialogue so far has already pointed out the
8 stipulation that was in effect and carried over from the fuel
9 proceeding and the exceptions to the doctrine of retroactive
10 ratemaking recognized in case law.

11 I'll be very brief with respect to the stipulation. I
12 would point out it is my view that the order recognizes by the
13 use of the language, such as keeping with the intent and the
14 spirit of the stipulation, that the stipulation was something
15 that the Commission did not have to adhere to but chose to. And
16 it's my belief that the Commission had independent grounds for
17 making that adjustment, and that it does not constitute
18 retroactive ratemaking. FP&L tries to describe the exceptions to
19 retroactive ratemaking as extremely limited and very narrow in
20 scope but they read the case law much too closely. The cases
21 that have been discussed are the Gulf Power case that involved
22 the Maxine Mine decision and the Richter case, and I'd like to
23 visit each of those for just a moment.

24 The Richter case involved a complaint that was brought
25 in Circuit Court by Florida Power Corporation customers who

1 maintained that the Circuit Court ought to require Florida Power
2 Corp to make extensive refunds to its customers from
3 overcollections of fuel expense. And Florida Power Corporation
4 moved to dismiss that case on the basis that this Commission had
5 exclusive jurisdiction over fuel charges. This Commission filed
6 an amicus brief agreeing with the utility. The Second District
7 Court of Appeal agreed that the Commission had exclusive
8 jurisdiction and upheld a motion to dismiss filed by the
9 corporation. Mr. Guyton says that the case should be very
10 limited because the only grounds involved in that case were
11 fraud.

12 Well, the particular allegation with respect to Florida
13 Power Corporation was fraud because that was the instance of the
14 "daisy chain" allegation at the time. But the case contemplated
15 more grounds than simply that. For instance, the decision quoted
16 in an ALR article indicating the ability of an administrative
17 agency to revisit its orders in light of substantial changes in
18 circumstances, fraud, surprise, mistake, or inadvertence. And it
19 also cited with approval an Ohio case in which the Court had
20 viewed the necessity of allowing an utility to remain somewhat
21 current on recovery of fluctuating fuel expenses, and it observed
22 there is a requirement of fairness involved. To the extent the
23 Utility is allowed to recover those fluctuating fuel expenses
24 quickly, there is a need for retrospective reconciliation to
25 exclude charges identifiably resulting from unreasonable

1 computations or inclusions. So it is simply incorrect to
2 describe the Richter case as being very limited, limited to the
3 grounds of fraud.

4 The other case is the Maxine Mine case. And in that
5 decision the Supreme Court of Florida observed that the fuel
6 adjustment is a continuous proceeding and operates to the
7 utility's benefit by eliminating regulatory lag. And I suggest
8 to you that the quid pro quo associated with offering the utility
9 the ability to collect costs through -- on a current basis
10 through an extraordinary clause such as the fuel adjustment
11 clause and such as the oil-backout cost recovery clause is the
12 corresponding ability of the Commission to revisit those in light
13 of needs which arise later in time.

14 In the Maxine Mine case this Commission made
15 adjustments to fuel costs that have been collected in 1980, 1981
16 and 1982, and it's decision was upheld by the Supreme Court of
17 Florida as valid, and did not constitute retroactive ratemaking.
18 FP&L argues that that case also is limited because it involved
19 the prudence issue. But I suggest to you that in order for this
20 Commission to carry out its full jurisdiction, at the same time
21 it allows utilities this extraordinary ability to collect costs
22 on a current basis, it should not view the case as narrowly as
23 FP&L suggests.

24 CHAIRMAN WILSON: Mr. McGlothlin, there was an ALR
25 article that you cited that was cited in Richter, discusses an

1 administrative agency's ability to revisit certain issues. That
2 doesn't really necessarily address the retroactivity argument, I
3 don't think.

4 MR. MCGLOTHLIN: I think it addresses it in this way:
5 I think the subject of that ALR was the general concept of
6 reopening past orders, and so to the extent that this Commission
7 would be revisiting a determination made earlier, which was the
8 authority to collect those costs, and reviewing that again in
9 light of additional information in the categories cited there it
10 does relate to the retroactivity argument.

11 CHAIRMAN WILSON: There is not any question that at the
12 time the utility collected the revenues associated with the
13 oil-backout cost recovery clause that they were -- there is no
14 question they were authorized to do that at the time.

15 MR. MCGLOTHLIN: There were orders approving the
16 amounts that were claimed by the utility. I question whether
17 this Commission recognized the distinction being made by the
18 utility on one hand during the tax saving cases and its decision
19 to go forward with 15.6% in the separate oil-backout clause.

20 It's my reading of the order that this is something
21 that was not Commission policy and that you disapproved when you
22 learned about it, and that became the basis for the adjustment
23 you made reaching back to April 1988.

24 CHAIRMAN WILSON: That may very well be so, but what
25 I'm interested in talking about is exactly what legal authority

1 we have to do that.

2 Do you agree, or would you agree with Mr. Guyton's
3 position, is that the rule is there will be no retroactive
4 ratemaking but that there are exceptions carved to that rule?

5 MR. MCGLOTHLIN: I would state it differently. I think
6 that the rule about retroactive ratemaking is primarily geared to
7 the type of full revenue requirements rate case determinations
8 that are prospective in effect, such as the one treated in the
9 city of Miami case. I view the recovery through these
10 extraordinary clauses to be outside, almost by definition, of the
11 retroactive ratemaking ability. And built into that permission,
12 which is, in terms of the approach to regulation, again the
13 extraordinary nature of it, the necessary ability of the
14 Commission to do more than simply make prospective determinations
15 when it realizes that some of these decisions that are made in a
16 very limited way in the course of a consideration or a clause
17 don't reflect Commission policy; reflect either imprudence or
18 unreasonable calculations.

19 CHAIRMAN WILSON: Okay. So what I'm hearing you say I
20 think is that when you look at a recovery mechanism, such as fuel
21 adjustment or oil backout, I suppose conservation cost recovery,
22 that the quid pro quo for a very rapid and current collection of
23 those costs is it expands somewhat the Commission's ability to
24 revisit expenditures previously made or revenues previously
25 collected.

1 MR. MCGLOTHLIN: Yes, sir.

2 CHAIRMAN WILSON: Review them for prudence or whatever.
3 What's the limit of that review?

4 MR. MCGLOTHLIN: I think you have to take that --

5 CHAIRMAN WILSON: I think you would agree as a
6 practical matter there has to be some limitations for that
7 review. You get an entirely new Commission that goes back and
8 says, "Well, we disagree with what the prior Commission did in
9 1981, so we want you to refund all the monies between '81 and
10 '85." That's probably pretty unreasonable.

11 MR. MCGLOTHLIN: I think you have to take that on a
12 case-by-case basis, Commissioner, and I don't want to try to
13 avoid the answer, but I don't think I could define the limits. I
14 think the Maxine Mine case is one example where prudence of
15 management decisions came into play. I think the fraud that was
16 the specific grounds alleged against Florida Power Corporation is
17 another example. But I believe the discussion of the principles
18 in both those cases gives rise to the recognition that those are
19 not the only possible examples. And I believe that in this case
20 the requirement of the rule that actual expenses be recovered,
21 and the recognition by the Commission that FP&L had agreed to the
22 13.6%, for different purposes, during these same periods, and had
23 continued the 15.6% gives you grounds to invoke the ability to
24 the make some adjustment at this point.

25 CHAIRMAN WILSON: So the exception that we're dealing

1 with here, or the expansion of the Commission's authority is that
2 the 15.6 ROE being used in the oil backout was inconsistent with
3 the 13.6% ROE that was being used in other areas.

4 MR. MCGLOTHLIN: Inconsistent with the requirement that
5 actual costs be used as compared to the 13.6% used for other
6 purposes.

7 CHAIRMAN WILSON: And the argument that Mr. Guyton
8 makes that there were final orders approving the amounts for
9 recovery under oil backout.

10 MR. MCGLOTHLIN: There were orders --

11 CHAIRMAN WILSON: How do you address that?

12 MR. MCGLOTHLIN: There were orders approving the
13 collection of the costs associated with the Maxine Mine
14 transactions, too, Commissioner, but those orders do not prevent
15 the Commission from revisiting that on proper showing.

16 CHAIRMAN WILSON: Okay. Any questions?

17 MR. MCGLOTHLIN: I want to spend just a moment on the
18 Cross-motion for Reconsideration, and I'll rely primarily on
19 written argument on the point regarding the collection of past
20 accelerated depreciation, but I would point out that this
21 Commission, in a very early order dealing with the qualified
22 line, denied an attempt by Florida Power and Light Company to
23 lock in the quantification of deferral benefits. They said, "No,
24 we're not going to do that. We would be able to do that job
25 better with the benefit of experience over time." So it was

1 incumbent on FP&L to factor into its calculation of the
2 in-service date of the avoided unit and the cost parameters of
3 the avoided unit experience gained through that time, and that
4 didn't happen. It simply gave some recognition to rates of
5 inflation applied to the 1982 parameters. And when you consider
6 the amount of money that customers pay, and when you consider the
7 burden that was specifically placed on FP&L, I submit that FP&L
8 did not do enough. And that to warrant the accelerated
9 depreciation of the line when it happened, and when the
10 Commission in its order simply dismisses our witness' evidence,
11 observe the opportunities it had to realize cost services as
12 speculative, we think that puts the burden of proof on the wrong
13 party.

14 There is one more thing to cover and that is the
15 capacity charges paid to Southern Company.

16 Time and again throughout all the issues involved in
17 the Commission's review of this oil backout subject, its primary
18 contention and the primary basis for its decisions has been that
19 this or that contention does not fall within the four corners of
20 the rule. Well, Florida Power and Light Company is paying to
21 Southern Company well over \$300 million a year in capacity
22 charges associated with these contracts to import coal by wire.
23 Those capacity charges do not fall within the four corners of the
24 rule. The rule designates the expenses to be recovered through
25 the oil-backout cost recovery clause. They are the depreciation

1 associated with the oil-backout project, which is the
2 transmission line; the cost of capital associated with the
3 project, which is the cost of capital of the transmission line;
4 the actual tax expense of the oil-backout project, which is the
5 transmission line and the O&M differential and any savings that
6 can be associated.

7 Now, there is no way that these capacity charges paid
8 by contract to Southern Company falls within any of these
9 categories. I submit to you that the decision to allow the
10 company to roll that into the oil-backout cost recovery clause
11 was sheer expediency, and if the Commission, especially if the
12 Commission affirms its decision to allow the accelerated
13 recovery, and allow FP&L to write off that line over seven years,
14 then the continuation of those capacity charges on a energy basis
15 is very prejudicial to high load factory customers.

16 The order recognized that normally those capacity
17 charges would be placed in the base rates in the next rate case
18 and there is a rate case coming down the track. But if that
19 starts in August, we're looking at another year during which high
20 load factory customers will be burdened with these pure capacity
21 charges reflected on a energy basis.

22 We submit that's unfair, not contemplated by the rule,
23 and there should be some decision, especially in light of the
24 order allowing the write-off in seven years, to deal with that
25 subject more quickly than in the next rate case. Thank you.

1 MR. HOWE: Commissioners, I'm Roger Howe from the
2 office of Public Counsel.

3 CHAIRMAN WILSON: Mr. Howe, can I interrupt you? Can
4 we take five minutes and come back.

5 MR. HOWE: Certainly.

6 (Brief recess.)

7 CHAIRMAN WILSON: Mr. Howe.

8 MR. HOWE: Commissioners, considering the way this oral
9 argument has gone, I'm sorry I didn't cite to your order in more
10 detail, but at Page 3 to my response to Florida Power and Light's
11 Motion for Reconsideration, I refer to your Order No. 12645.
12 That was issued on November 3rd, 1983. I believe that order
13 provides ample authority for your ability to revisit cost
14 recovery charges and the costs that underlie those charges.

15 In that order the Commission basically said with fuel
16 cost recovery factors you will address issues as they come up as
17 necessary, and only when you have addressed them in detail, put
18 the parties to their proof and issued a final order on that
19 particular issue will it be conclusive on the Commission for
20 future periods.

21 You have a rule dealing with conservation cost recovery
22 that says you'll handle conservation cost in the same fashion as
23 fuel cost recovery. Inasmuch as the oil-backout cost recovery
24 factor is a component of the fuel adjustment factor, I would
25 suggest that that order controls. Moreover, I don't believe that

1 the prohibition against retroactive ratemaking can apply in a
2 cost recovery proceeding. The reason is under Section
3 366.060(2), which Florida Power and Light correctly cites to, it
4 states that the Commission will set rates to be thereafter
5 charged. And it's that language that the Court seized upon in
6 the City of Miami case and virtually any case dealing with
7 retroactive ratemaking.

8 In a rate case you do set rates to be thereafter
9 charged. Once the company goes out the door, if the company is
10 able to earn its rate of return, well and good. If it earns
11 slightly below, if it wants relief, it can petition for
12 additional rates in the future. If it earns above, the
13 Commission itself or an effected party can petition for another
14 prospective filing.

15 Cost recovery is different. You never really set rates
16 to be thereafter charged. You said, "Here's rates until we true
17 it up again the next time." And the true-up proceeding itself is
18 an ongoing mechanism. I don't think it can be time limited
19 because necessarily the true-up at any six-month period is the
20 sum total of all past costs, revenues, true-ups. So it never
21 really ends in that sense.

22 But more importantly I think the point is that you set
23 rates to be trued up. Now, Florida Power and Light has come to
24 this Commission in succeeding periods, for example, and said, "We
25 did not earn what we thought we should have," or what you thought

1 they should have on their oil-backout cost recovery project and
2 they would be able to true it up.

3 I would submit that if the Commission cannot revisit
4 the cost of common equity, then equity being a residual
5 determining the utility's earnings, that if in a recovery period
6 Florida Power and Light had not recovered all its costs, or had
7 recovered all its costs other than the equity but underearned on
8 equity under the 15.6% it was claiming in past periods, it
9 couldn't have asked you to true those up. Florida Power and
10 Light's past requests for true-up have been an acknowledgement
11 that the concepts of retroactive ratemaking simply do not apply.

12 Now, dealing with a couple of other factors on 15.6%
13 return on equity and the Commission's adjustment to 13.6, Mr.
14 Guyton said that the PSC has known that the oil-backout cost
15 recovery factor included the rate of return used in the utility's
16 last rate case. How have you known? I think everybody was kind
17 of surprised at the hearings when I believe it started in cross
18 examination of Mr. Babka by Mr. McWhirter, Mr. Babka said FP&L
19 uses 15.6% for the oil-backout cost recovery purposes.

20 The reason everybody was surprised by that was this
21 Commission has never required Florida Power and Light to come
22 forward and say "Here's our costs. Here's why they are prudent.
23 We want a final determination." The oil-backout cost recovery
24 factor has been rocking along just like fuel adjustment. As
25 things come up that look like they might be out of line, the

1 company is allowed to recover its cost, and the Commission digs
2 into those particular issues in detail. I don't believe the
3 company ever clearly established to this Commission, certainly
4 not after it agreed to a 13.6% return for tax savings purposes,
5 that it was going to continue using the 15.6 for oil backout
6 purposes.

7 As to whether or not the Commission could make a
8 decision based on a changed return on equity, I'd say the
9 standard is whether the Company had notice and an opportunity to
10 be heard. It certainly had that. It had that opportunity at the
11 hearing. If the Company thought it was being prejudiced in any
12 way, had felt the issue had arisen late in the process for them
13 to meet it, they could have asked for a continuance, they could
14 have asked for an opportunity to put on additional testimony.
15 Instead I think the Company relied on the testimony of Mr. Waters
16 who, I believe, was the witness following Mr. Babka.

17 Moreover, the cost recovery proceeding -- you can't
18 really separate FIPUG's petition from the cost recovery
19 proceeding. By that I mean is had FIPUG filed no petition and
20 the Commission, just in the course of the normal cost recovery
21 proceeding, the oil-backout cost recovery proceeding as part of
22 the fuel adjustment, if they had learned that, they could have
23 made an adjustment. The fact that specific issues were defined
24 with respect to FIPUG's petition in no way prejudiced the
25 Company. It was asking for recovery of costs. It was claiming a

1 cost of 15.6%, and as the party seeking affirmative relief it had
2 an obligation at every point to establish that that cost was
3 prudent and necessarily incurred as part of that oil-backout
4 project.

5 So I don't think you have a problem in terms of the
6 scope of the proceeding because there was notice and a
7 opportunity to be heard. I don't think you have a problem in the
8 sense of retroactive ratemaking because that concept, if it does
9 apply here, means that you can't have a cost recovery procedure.
10 And more importantly, Florida Power and Light's adjustments in
11 the past to true-up its return on equity are a concession by the
12 Utility that the concept of retroactive ratemaking does not
13 apply.

14 If I might, I'd like to -- we find ourselves in a
15 unusual position in the sense that we filed a response to both
16 parties' Request for Consideration.

17 With respect to FIPUG's Cross-motion for
18 Reconsideration, we agree with FIPUG's position on whether the
19 Utility has established its entitlement to accelerate
20 depreciation.

21 Just as the Company never put the Commission on notice
22 that it was going to be charging 15.6 return on equity, the
23 Company never put the Commission on notice or asked for a
24 definitive ruling on whether the deferral of its Martin 3 and 4
25 units, and the unsited 1990 unit, should be used to calculate

1 true net savings and accelerated depreciation.

2 In 1982 this Commission, in its Order No. 11210 said
3 and I quote, this is at Page 9, "FP&L has requested that the
4 assumptions associated with the calculation of deferred capacity
5 benefits be fixed at this time. We do not agree with that
6 proposal. None of the assumptions are such that we cannot fix
7 them more accurately through retrospection than through
8 projection. We do not consider it appropriate to lock ourselves
9 into assumptions prior to the time we will be applying them."

10 I would submit that Florida Power and Light never came
11 to this Commission and said, "Here are our assumptions. Here's
12 why we think they are reasonable." All they did is they just
13 began including those assumptions in the mathematics.

14 We cite to some of the comments that were made by
15 Company's witnesses in our response -- I'm sorry, in our original
16 brief. All that happened was Mr. Babka, in 1987, began including
17 it in the calculation of the cost recovery factor. This
18 Commission never addressed the issues. I think the Commission
19 has itself, though, in a bit of a inconsistency between the rate
20 of return issue and the accelerated depreciation, because
21 basically the Commission is saying we gave -- the Commission give
22 tacid approval for the use of accelerated depreciation, whereas
23 where the rate of return issue, is the Commission is saying, "We
24 never gave tacid approval." In point of fact, I don't think this
25 Commission can give tacid approval where it's a matter of rates

1 that utility customers must bear. If the utility is seeking to
2 recover costs, the Utility has to prove it. And the proper
3 question I think to ask is when did this utility, Florida Power
4 and Light Company, ever come forward, identify issues that this
5 Commission said in 1982 it wanted to address later when they
6 started to recover any -- wanted to recover any accelerated
7 depreciation and put on its proof that the recovery of that
8 accelerated depreciation was appropriate. It just hasn't
9 happened.

10 On FIPUG's Motion for Reconsideration or its
11 Cross-motion for Reconsideration, on the issue of the Southern
12 Company capacity charges, I would just rely on our written
13 response, which essentially is that the Commission, also in 1982,
14 made a specific finding that the Southern Company capacity costs
15 were a cost, and that's, I think, the general tenor of the rule.
16 Recovery of all costs. And if the Commission should roll it into
17 base rates at some future date, so be it. But as for now a
18 decision to roll them in at this time, to roll the Southern
19 Company capacity costs in at this time would be inconsistent with
20 consistent decisions since 1982.

21 CHAIRMAN WILSON: Is there any limitation on the
22 Commission review of past expenses in something like fuel
23 adjustment?

24 MR. HOWE: I would suggest not. I really am sorry, I
25 don't have that Order 12645 with me. But basically what the

1 Commission said there was that there would be no limit. When the
2 Commission first went to the conservation and fuel adjustment
3 recovery mechanism there was some question. What's the effect of
4 a true-up? And in this order the Commission retreated from the
5 idea that there was any limitation at all. And I think they have
6 acted as though there is no limitations. For example, the recent
7 Florida Power Corporation case, with their fourth barge for
8 Electric Fuels Corporation, I think the period at issue there was
9 period 1984 through 1988.

10 But I would suggest also it goes both ways because if a
11 company were to come forward and say, "Wait a minute, we haven't
12 been recovering all our costs." We used to see it with the
13 aerial surveys of coal piles and so forth. The Commission would
14 say, "All right, if you really haven't recovered your cost but
15 you incurred them, we'll adjust them." So I would suggest that
16 in both direction the mechanisms of cost recovery allows for
17 modification based on facts as they become known, and only if the
18 Commission makes a conscious and definite decision that this is a
19 final order on that issue, such as the fourth barge for Florida
20 Power Corporation is it foreclosed from future review.

21 COMMISSIONER HERNDON: What about Mr. Guyton's argument
22 the two prior periods from, I think, April '88 through April '89
23 have been foreclosed by virtue of the Commission issuing orders.
24 Do you say that that -- those orders don't, in fact, dispose of
25 the return on equity?

1 MR. HOWE: I would suggest that they do not. I think
2 what Mr. Guyton was saying was those are orders confirming a
3 final true-up from a previous period where we have -- at each
4 hearing I'm sure you're well aware of projections, the partial
5 projections and final true-up. But those final true-ups, at
6 least under the Commission's Order 12645 from 1983, are just
7 based on what the Commission knows at that time. If you had
8 identified return on equity as an issue then, put the Company to
9 its proof, issued a final order resolving it, then I would
10 suggest it would be final. But it's just part and parcel of the
11 regular cost recovery proceeding; no, it's not final.

12 COMMISSIONER HERNDON: And to the extent that the use
13 of a return on equity in either of those two orders had been an
14 implicit portion of calculation, does that act as an endorsement
15 or not as an endorsement?

16 MR. HOWE: I would suggest it doesn't. And in our
17 initial brief, which we adopted these pages in our response to
18 the Motions for Reconsideration, we said at Page 2, said if the
19 Commission agrees, for example, that Florida Power and Light has
20 not really proven its case in this proceeding, but decides it
21 cannot order refunds, it should restructure the entire process by
22 which it considers and approves cost recovery factors for fuel,
23 conservation and oil backout purposes.

24 The reason for taking that position is that if the
25 Company can come back later and say there was implicit approval

1 because nobody caught the numbers we were using in our math, we
2 can't have quick recovery proceedings. We've got to say -- put a
3 burden on the Company to come forward and identify every issue
4 that they could reasonably anticipate should be considered, that
5 they need a final ruling on and do that. They can't have both
6 the benefit of a rapid cost recovery proceeding and then after
7 the fact say "You didn't catch us earlier."

8 COMMISSIONER HERNDON: So you're saying, and I'm
9 reluctant to use this phrase, but I guess in this instance it may
10 be more applicable, that the cost recovery process, the backout
11 process, are intended to be quick and dirty analyses that are
12 then left in some sort of pending mode based on future more
13 in-depth review. And I go back to Commissioner Wilson's question
14 I guess, because I think in some respects it's really a threshold
15 question. I'm troubled by this notion that 10 years later
16 something occurs, and you've got 10 years of twice-annually
17 orders that have endorsed, even if through omission or inaction,
18 some activity of the Company. And we all of a sudden find
19 something out and we go back and attempt to reopen it, you know,
20 20 orders later, in fact, and that troubles me.

21 CHAIRMAN WILSON: It bothers me both ways to because
22 for a Company to come in say, "Well, you know, back in 1982 we
23 had this little thing that we did and, gosh, we have been
24 reviewing our records we never got to collect those costs, so now
25 we want to stick them in 1991's fuel adjustment recovery or

1 conservation cost recovery or oil backout or whatever. What I'm
2 looking for is what is the reasonable limitation on review of
3 some of these things. The only thing I've heard you say is that
4 if it's a specific issue and it's been specifically dealt with
5 and there is a final order that addresses that, then that's the
6 only limitation. It seems to me like there probably is -- has to
7 be some further limitation.

8 MR. HOWE: There can be, I believe. The Commission has
9 never adopted one. Again referencing this Order 12645 from 1983.
10 I believe the Commission could adopt any kind of reasonable
11 mechanism. For example, you know, what would you like? A period
12 of years, for example, that you think that's conclusive --

13 CHAIRMAN WILSON: No, I think broad -- if you go back
14 and say well, the Company basically fraudently represented these
15 items and they have been doing it since whenever. Well, the
16 Commission obviously ruled on something that was -- they were
17 intentionally misled as were the rest of the parties. If
18 something like that has gone on, I think clearly that probably
19 gives you the authority to go back further than you ordinarily
20 could. If you're looking at the prudence of an item, it may be a
21 little more limited than that. If you're just looking at whether
22 it was, in fact, raised as an issue and specifically ruled on,
23 there may be some different time frame. I don't think you can
24 say five years and that's it for everything.

25 MR. HOWE: I don't know what a reasonable standard

1 would be. I think the Commission can adopt one. But I would
2 suggest you probably don't want one because as soon as you adopt
3 a standard, what you're going to find is, for example, some
4 utility finds, "Wait a minute, four years ago we made an
5 adjustment we have been using --" for example, had Florida Power
6 and Light through some error been claiming a 16, 17% return on
7 equity perhaps because a computer program just cranked these
8 numbers out, would this Commission ever say, "Wait a minute, that
9 wasn't related to your last return on equity; it wasn't related
10 to your stipulated tax savings return on equity." We just need
11 to fix it. And I'm suggesting that the quick and dirty nature of
12 cost recovery means that I don't think the Commission can ever be
13 in a posture of saying because the Commission itself didn't catch
14 it the utility has it conclusively.

15 CHAIRMAN WILSON: See, the things you have described
16 have been fraud, mistake, imprudence.

17 MR. HOWE: Misinterpretation would fit in there.

18 CHAIRMAN WILSON: Well, maybe. Maybe. I just don't
19 want to see a company coming in here with a 1981 expense and
20 based on, you know, some precedent, whatever we establish in this
21 case or have established, say, "Well, okay there was a cost you
22 didn't recover." I think you can clearly say, "Well, the common
23 law theory of laches applied. You just waited too damn late and
24 it's too bad."

25 MR. HOWE: That might be. I don't know if laches would

1 apply in the regulatory context here, but, for example, with the
2 Gulf Power case that has been cited at 487 So.2d, I believe that
3 was a decision in 1986 dealing with refunds for overcharges to
4 Gulf Power attributable to the Maxine Mine for the period '81,
5 '82 and '83, and the Commission's position before the Court was
6 that they could go after those having learned about at a later
7 date and the Court upheld them.

8 CHAIRMAN WILSON: There was a prudence argument there,
9 wasn't there? I mean that those -- it was imprudent for the
10 company to have incurred those expense. It's been a long time
11 since I've looked at the case.

12 MR. HOWE: I think the position of the utilities in
13 these cases have been that all they have to do is initially show
14 that they incurred the costs and seek its recovery. And I think
15 the Court has fairly uniformly rejected that. The Commission
16 rejected it and the Court upheld it in Maxine Mine in another
17 case dealing with Florida Power Corporation, which was dealing
18 with I think it was the decay heat pump issue. Florida Power
19 took the position that having come forward and claimed they
20 incurred all these replacement fuel costs, that the burden
21 shifted to somebody else to prove that the costs were imprudent.
22 And the Court's position was no, that's not the case. The
23 Utility has an obligation to establish that the costs were
24 prudent and did not result from management imprudence. And I'd
25 suggest that in the oil-backout cost recovery area you don't have

1 that type of evidentiary presentation by Florida Power & Light in
2 past periods.

3 COMMISSIONER EASLEY: Maybe that's what's bothering me.
4 If oil backout is intended to be a quick and dirty recovery based
5 on primary projection and then a final order, and the numbers are
6 never in cement, when is the final order a final order under your
7 scenario?

8 MR. HOWE: Well, in case of oil backout fortunately
9 when the project is fully recovered. At least then you do get to
10 a point at which there is finality with oil backout projects. It
11 would be when all the costs are recovered.

12 COMMISSIONER HERNDON: But in the meantime, do you
13 revisit each decision or do you make an adjustment in the next
14 decision and go forward until completion?

15 MR. HOWE: I suggest as a practical matter you go
16 forward in succeeding periods based on the previous one.
17 However, should a specific issue come to your attention that has
18 not been addressed, that could affect past periods, current
19 periods or future periods, that you have the jurisdiction to
20 address it at that time.

21 CHAIRMAN WILSON: Any other questions?

22 COMMISSIONER BEARD: Yeah. I'm trying to follow the
23 theory behind this. Why would you stop at April of '88 then if
24 you deem 15.6 imprudent? Why not April of '87?

25 MR. HOWE: I believe that in the initial brief that I

1 had filed I said you should go back -- on the return on equity I
2 think I said you should go back to January of 1988. I think I
3 tried to --

4 COMMISSIONER BEARD: Why not January of '87?

5 MR. HOWE: Well, I was going to the time period at
6 which they have stipulated to 13.6 return. I was trying to match
7 them. Now, maybe I missed it.

8 COMMISSIONER BEARD: In January, you're saying January
9 of '88 is the point in time where they in some form or fashion
10 accepted the fact that 15.6 was imprudent?

11 MR. HOWE: Commissioner Beard, I honestly don't
12 remember how I came to pick January of '88. I think that was the
13 reason. I don't want to commit that that was it. But I think at
14 the time I was writing this brief I understood that to be the
15 time period which the 13.6 began applying, and I thought it
16 should apply for all purposes from the time at which they agreed
17 to it for tax savings purposes.

18 CHAIRMAN WILSON: I think I recall that being your
19 position in the brief.

20 COMMISSIONER BEARD: Can I ask Mr. Guyton a question?

21 CHAIRMAN WILSON: He's going to have an opportunity to
22 respond to all of this here.

23 COMMISSIONER BEARD: I want him to respond to me first,
24 if I can.

25 Isn't the true-up, isn't that a retroactive process?

1 MR. GUYTON: The true-up is a retroactive process
2 envisioned originally by the Commission when it established the
3 clause, and the true-up goes back two recovery periods. And if
4 you applied that in this case, you wouldn't reach two of the
5 recovery periods that you reached in this order.

6 COMMISSIONER BEARD: Well, let me -- and I want to
7 understand because I got confused. The hearing was in February
8 of '89, right?

9 MR. GUYTON: No, Commissioner, the hearing was -- there
10 were some issues raised in February of '89. The hearing was in
11 August of 1989.

12 COMMISSIONER BEARD: Yeah, but where these issues,
13 where they came to light, okay, was as a result of the February
14 '89 hearing, was it not?

15 MR. GUYTON: No, sir. That's the point of the
16 stipulation. The equity issue was raised for the first time in
17 July of 1989 when FIPUG raised it in its prehearing statement and
18 an equity refund issue was never raised by the parties.

19 COMMISSIONER BEARD: So that was the August hearing
20 dealing with the April to September of '88 -- correction. No,
21 April to September of '89 was dealt with.

22 MR. GUYTON: No, that would have been the October '89
23 through March 1990 prospec actively. The final true-up for that
24 period would have been October '89 to March -- I'm sorry, October
25 '88 to March '89.

1 COMMISSIONER BEARD: Okay. Then the August hearing
2 would have gotten before us in some form or fashion all but one
3 of those periods. The only period that it wouldn't have gotten
4 before us would have been April of '88 to September of '88,
5 correct, because we were doing a final figure on October of '88
6 to March of '89.

7 MR. GUYTON: Commissioner, in that August hearing,
8 which was held in conjunction with this proceeding, but was not
9 consolidated with this proceeding, you issued an order approving
10 a final true-up. In that approval of final true-up we would
11 submit that once that was finally trued up you could not go back
12 to it even though you subsequently in December of '89 tried to
13 effectuate a return on equity refund for that period. There were
14 two separate proceedings. You reached the decision first in the
15 oil-backout proceedings. It became final at that point. And an
16 attempt to effectuate a refund after that order in the other
17 proceeding is retroactive ratemaking. That's why we say the
18 first two of these three recovery periods simply cannot be
19 reached given the timing of the entering of your order.

20 MR. HOWE: No, I'm through.

21 COMMISSIONER HERNDON: All right.

22 MR. MCGLOTHLIN: May I comment before Charlie wraps up,
23 very quickly?

24 To be precise, the return on equity subject matter was
25 raised in FIPUG's oil-backout discontinuation petition, which was

1 filed in January of 1989. We cited the continued use of 15.6%
2 return on equity for backout purposes as grounds why the backout
3 clause should be terminated. We did not ask for a refund at that
4 point. That was developed, but the return on equity subject
5 matter was raised in our petition.

6 The second thing that occurred to me while you were
7 asking questions of Roger that I think belongs in this dialogue
8 is that one consideration as to whether this instance meets the
9 Commissioners' test of something it can deal with is, I think, is
10 whether the Commission was aware that it was continuing to prove
11 15.6% return on equity. And one thing that bears on that is, as
12 I recall, 15.6% was not identified in any of the testimony or
13 evidence submitted by FP&L during the time frames in question.
14 So I think when you ask yourself is this something we have reason
15 to deal with, one question is did I know it was 15.6 when we put
16 these orders in approving these true-ups. Those are my
17 additional comments.

18 MR. GUYTON: Commissioners, one of the best tests of an
19 argument and its validity is to take it to its logical extreme.
20 And I'd like you to ask you to take FIPUG's and Public Counsel's
21 argument to its logical extreme, its arguments regarding that oil
22 backout is a retroactive looking recovery clause, therefore, it
23 essentially never becomes final.

24 Consider the following factors on equity: If that's
25 the law, this Commission today could go back to 1982 when FP&L

1 had a cost of debt in excess of its authorized return on equity,
2 and the Commission, accepting those legal principles, could reach
3 the decision that FP&L had earned too low a return on equity, and
4 it could adjust that equity return up to 16, 18%, whatever it now
5 determines is a reasonable cost of equity. You go back seven,
6 eight years.

7 Commissioners, I think it's pretty clear --

8 CHAIRMAN WILSON: You mean just for purposes of the
9 oil-backout clause?

10 MR. GUYTON: Just for purposes of the oil-backout
11 clause, if the argument postulated by Public Counsel in FIPUG is
12 true. I mean, if they could go back to '88, why can't they go
13 back to '82? There's no cutoff -- as you've heard them say,
14 there is no cutoff point under their line of reasoning. It's
15 always subject to adjustment.

16 I think it's pretty clear that this Commission has not
17 embraced the idea that your adjustment clauses would go back as
18 far as 1982 for an adjustment here.

19 The Richter case has been cited to you. The Richter
20 case is supposedly read as a broad exception to this prohibition
21 against retroactive ratemaking. It is not a broad exception; it
22 is a very narrow-crafted exception for extraordinary
23 circumstances, and I think it's important for this Commission to
24 hear some language out of the Richter case. There, the Court,
25 even though it allowed or said the Commission had jurisdiction to

1 issue a refund, also had this to say about retroactive
2 ratemaking. "It is, of course, vital to both the regulated
3 utility and the consumers that the PSC's rate orders be final.
4 Chapter 366, though it has changed to some degree since the City
5 of Miami decision, still indicates that the PSC cannot
6 retroactively alter previously entered final rate orders just
7 because hindsight makes a different course of action look
8 preferable."

9 The Maxine Mine case and the Gulf case has also been
10 construed by Counsel here.

11 Commissioners, we're asking you to construe that case
12 as you construed it in Order 22268. There you stated that you
13 disagreed with FIPUG's position, that all oil-backout revenues
14 may be properly refunded. And you noted specifically that the
15 Gulf case was limited to questions of prudence.

16 Now, there has been a lot of discussion here today of
17 the recognition of 13.6 and FPL's acceptance of that in tax
18 savings docket as a basis for you to reduce the return on equity
19 in the oil-backout proceeding.

20 Commissioners, I hadn't raised this before but I think
21 it's important to put that in context. FP&L acquiesced to that
22 for purposes of a 1987 tax savings proceeding, and in doing so it
23 signed a stipulation, and all the parties signed a stipulation,
24 and that stipulation said that that return on equity is to be
25 used only for purposes of a tax savings proceeding and not to be

1 used in any other fashion.

2 When that was brought to this Commission for approval
3 and consideration, the Commission, at an agenda conference,
4 specifically noted that it was only having to do with a tax
5 savings issue.

6 "Commissioner Herndon: Am I correct that all we're
7 dealing with for this discussion is the tax issue? Not AFUDC
8 that Commissioner Gunter brought up earlier this morning or
9 anything else.

10 "Mr. Willis: That's correct. Just the tax issue.

11 "Commissioner Herndon: Nothing else.

12 "Mr. Willis: That's correct.

13 "Chairman Nichols: The tax issue for 1987. Mr.
14 Childs.

15 "Mr. Childs: We would accept that number."

16 That's at Page 62 of the agenda conference transcript,
17 and that was specifically revisited at Page 72 by Mr. Twomey in
18 seeking directions for how to write the order. It was to be
19 limited only for tax savings purposes.

20 COMMISSIONER GUNTER: Was that the year '87, you say.

21 MR. GUYTON: Yes, Commissioner Gunter.

22 When a similar stipulation or agreement was brought to
23 the Commission for 1988, there was a lengthy discussion as to the
24 purpose for which it would be used. Mr. Childs, sitting here at
25 the table, noted that the offer was not to be used --

1 specifically noted that it was not to be used as to oil backout.
2 There was a discussion; there was an exchange among several
3 Commissioners. It's clear from that transcript as well that the
4 13.6 was not to be used for purposes of the oil-backout
5 proceeding.

6 So to suggest that our acquiescence in 13.6 is evidence
7 of a lower return on equity --

8 CHAIRMAN WILSON: What was the date of that? Do you
9 know?

10 MR. GUYTON: I'll have to provide that to you,
11 Commissioner Wilson. I don't have it with me. I have the 1987
12 agenda, but I don't have the 1988 with me.

13 CHAIRMAN WILSON: I'd like to end up with copies of
14 both of those.

15 COMMISSIONER EASLEY: Haven't we had a conversation
16 that was similar to that in 1989 since I've been here?

17 MR. GUYTON: Commissioner, you may have. I wasn't --

18 MS. RULE: Staff is going to attempt to get a copy of
19 those transcripts for you.

20 COMMISSIONER EASLEY: Thank you.

21 CHAIRMAN WILSON: I don't need it right now, but I
22 don't believe we're going to make a bench decision so we have got
23 time to get those.

24 COMMISSIONER BEARD: I've got to go back and look at
25 some transcripts because I remember raising the issue multiple

1 times, why not everything else. If it's fair for one, it's fair
2 for everything. And I thought we got past -- maybe not in '87,
3 but I thought some point in time after the first time we started
4 saying no. I could be wrong but I want to read the transcript.

5 COMMISSIONER GUNTER: Me, too, because there was even
6 some discussion about affiliate transactions and what have you.

7 MR. GUYTON: Commissioners, I apologize. I simply
8 didn't get it in the briefcase this morning.

9 COMMISSIONER EASLEY: Well, I've got a slightly
10 different recollection that I'd like to be corrected on or have
11 verified. I've got a recollection of a discussion of this
12 subject -- it may not be this company -- that Public Counsel
13 and/or FIPUG and/or another party took the position that the
14 return on equity we were using was too high to be used in
15 anything else, and I have a recollection of a discussion at that
16 point about it being limited for that purpose only. And I don't
17 know.

18 COMMISSIONER BEARD: The reason that would strike me as
19 not the way I remember is it because the return on equity they
20 were using for taxes, although they considered it too high, it
21 was still lower than anything else they had on the books at the
22 time. That's why --

23 COMMISSIONER EASLEY: It was higher than what they
24 wanted us to use; it was lower than that established in the last
25 rate case because everything is.

1 CHAIRMAN WILSON: This is the reason we have
2 transcripts so we can go back and read them. I mean, some people
3 like to read them anyway just for the entertainment value, but
4 that is really the reason why.

5 MR. GUYTON: Commissioners, a few more points in
6 rebuttal.

7 It has been suggested to you this morning that everyone
8 was surprised that FP&L was earning 15.6 on its oil-backout
9 return on equity. I don't speak for the Commission, but I would
10 be surprised if you were surprised. I mean, the oil-backout cost
11 recovery factor has been audited consistently over a period of
12 time by the Commission's Audit Staff. The return on equity there
13 is covered in an audit review. It's been suggested to you that
14 it was rocking along for seven years and we never really
15 disclosed the return on equity.

16 Commissioners, this issue came up at the very first
17 oil-backout cost recovery factor consideration. FP&L held out
18 and said that its actual cost of equity was higher than its
19 allowed return and, therefore, that's what you should use. All
20 the other parties said, "No, you ought to use what's authorized
21 in the rate case."

22 Before that decision became final we agreed with that
23 position, that you ought to use what's allowed in the last rate
24 case, even though at the time that worked to our disadvantage.
25 That was a stipulation among the parties.

1 Public Counsel and FIPUG was a party to that
2 stipulation, and that's documented in the transcript in this
3 proceeding in Mr. Babka's testimony. This Commission has been
4 fully apprised of what FP&L has been doing on return on equity
5 for oil backout for a number of years.

6 It's also been suggested that you really can't separate
7 the two proceedings, 890148, FIPUG's proceeding, from the regular
8 oil-backout proceeding.

9 Commissioners, FIPUG filed this petition. They are the
10 petitioner in this case. They have the burden of going forward
11 with the evidence; they have the burden of proof. FIPUG tried to
12 consolidate the two. You specifically chose not to consolidate
13 the two cases. The burden of proof in this case rests, as it
14 always should, with the petitioner, and FIPUG was a petitioner.
15 They didn't carry the burden of proof. To suggest that there was
16 no notice to the Commission as to the return on equity, that
17 there was no notice to the Commission as to the capacity deferral
18 benefits associated with the Martin plant and that they were
19 being used in the calculation of the actual net savings is simply
20 misleading.

21 FP&L clearly stated when it first sought recovery of
22 actual net savings that it was reflecting Martin unit capacity
23 deferral benefits in the calculation of actual net savings. It
24 was in Mr. Babka's testimony. It was not a mere mathematical
25 calculation. The Commission was certainly apprised of it. FP&L

1 Public Counsel and FIPUG was a party to that
2 stipulation, and that's documented in the transcript in this
3 proceeding in Mr. Babka's testimony. This Commission has been
4 fully apprised of what FP&L has been doing on return on equity
5 for oil backout for a number of years.

6 It's also been suggested that you really can't separate
7 the two proceedings, 890148, FIPUG's proceeding, from the regular
8 oil-backout proceeding.

9 Commissioners, FIPUG filed this petition. They are the
10 petitioner in this case. They have the burden of going forward
11 with the evidence; they have the burden of proof. FIPUG tried to
12 consolidate the two. You specifically chose not to consolidate
13 the two cases. The burden of proof in this case rests, as it
14 always should, with the petitioner, and FIPUG was a petitioner.
15 They didn't carry the burden of proof. To suggest that there was
16 no notice to the Commission as to the return on equity, that
17 there was no notice to the Commission as to the capacity deferral
18 benefits associated with the Martin plant and that they were
19 being used in the calculation of the actual net savings is simply
20 misleading.

21 FP&L clearly stated when it first sought recovery of
22 actual net savings that it was reflecting Martin unit capacity
23 deferral benefits in the calculation of actual net savings. It
24 was in Mr. Babka's testimony. It was not a mere mathematical
25 calculation. The Commission was certainly apprised of it. FP&L

1 fully discharged of its burden of proof in that case. And now
2 the burden, when FIPUG is trying to collaterally attack a
3 Commission order is on FIPUG, not on FP&L to prove up that issue
4 again.

5 Finally, I'd close with the observation FIPUG is
6 suggesting in its cross-motion that a project -- that capacity
7 charges recovered, associated with the UPS, is not a project O&M
8 cost properly recoverable through the oil-backout rule.

9 Commissioners, you've construed your rule since Order
10 No. 11210, the first oil-backout cost recovery proceeding, that
11 capacity charges were an appropriate project cost to be recovered
12 through that clause. That was the construction of your rule
13 then. It's consistently been applied over seven years in 14 or
14 15 cost recovery orders, and that's the decision that you reached
15 in this case after hearing the evidence. We don't think that's a
16 grounds, proper grounds for reconsideration on the part of FIPUG.

17 Thank you very much.

18 CHAIRMAN WILSON: Thank you. We're going to take this
19 under advisement. Thank you.

20 (Thereupon, the hearing concluded at 11:10 a.m.)
