NOTICE is hereby given that the Florida Public Service Commission will hold a hearing in the above docket at the time and place listed below. All persons who wish to be heard are urged to be present at the beginning of the hearing on June 18, 1991.

**9:30 A.M., Tuesday, June 18, 1991

**101 East Gaines Street  
Room 106 - Fletcher Building  
Tallahassee, Florida 32399-0850**

**PURPOSE AND PROCEDURE**

The purpose of this hearing will be for the Commission to take final action to determine the need, pursuant to Sections 403.501-519, Florida Statutes (1990), for the construction of a power plant, which will burn pulverized coal to produce approximately 440 MW of electricity, to be located in Orange County, and an associated transmission line.

The hearing will be governed by the provisions of Chapter 120, Florida Statutes, Section 403.519, Florida Statutes, and Chapter 25-22, Florida ADMINISTRATIVE Code.

Under Section 403.519, the Commission is the sole forum for the determination of need for the electrical power plant and the associated transmission facilities. In making its determination, the Commission must take into account the need for electric system reliability and integrity, the need for adequate electricity at a reasonable cost, and whether the proposed plan is the most cost-effective alternative available. The Commission must also expressly consider the conservation measures taken by or reasonably available to the applicants or its members which might mitigate the need for the proposed plant and other matters within the jurisdiction which it deems relevant. The Commission's determination of need for the electrical power plant shall create a presumption of public need and necessity and shall serve as the Commission's report required by Subsection 403.507 (2) (a) (2), Florida Statutes. An order entered by the Commission pursuant to this hearing shall constitute final agency action.

Only issues relating to the need for the power plant will be heard at the June 18 and 19, 1991 hearing. Separate public hearings will be held before the Division of Administrative Hearings at a later date to consider environmental and other impacts of the proposed plant and associated transmission line.

*Need 5/8/91 open*

Orlando Utilities Commission, Florida Municipal Power Agency, and Kissimmee Utility Authority's proposed facilities will be located on a site approximately twelve (12) miles southeast of Orlando, Florida in Orange County. The site is located on the certified site of the existing Stanton Energy Center, Unit 1 and the proposed Unit 2 consists of 3,280 acres and corridors for associated transmission lines and associated facilities. This site, including the corridor for the proposed alternate plant access road and associated transmission line for Stanton Energy Center, Unit 2, was certified in 1981 for an ultimate site capacity of approximately 2000 MW.

**PROCEDURE**

Members of the public who are not parties to the need determination proceeding will have an opportunity to be heard.

Written comments regarding the need for the proposed power plant and associated transmission lines may be sent to the Commission at the following address:
