ATTACHMENT II

The proposed water/sewer rates and charges for the tenants of the Ashley Lake Park apartment community will not exceed the current rates and charges of the City of Boynton Beach (suppliers to Ashley Lake Park). This property is classified as WICF apartment and lies **outside** the city limits. As part of the resellers rates and charges schedule, we propose the following for consideration.

Water Minimum Base Charges

The City of Boynton Beach charges their apartment water customers, **outside** the City limits, based on consumption only. The charge from zero gallons consumption to three thousand gallons of water is \$8.31. This would then be considered the minimum charge per apartment.

Metered Consumption

There is no maximum usage. All consumption is measured per 1000 gallons of usage at the rate of \$8.31 for the first three thousand gallons, \$1.98 per thousand from four thousand gallons to six thousand gallons, \$2.08 per thousand from seven thousand gallons to nine thousand gallons. (See Attachment I for all levels of consumption.)

Sewer Minimum Base Charge

The City of Boynton Beach charge their apartment sewer users, **outside** the city, a base unit apartment charge of \$12.66. This would then be considered the minimum base.

Metered Consumption

There is no minimum usage. The charge for all sewer is at \$1.93 per 1,000 gallons of water usage. There is a maximum usage of 7,000 gallons per apartment unit.

ATTACHMENT III

Proposed method of billing

The existing plumbing infrastructure, in each building, at Ashley Lake Park apartments is not conducive to the installation of individual water sub-meters in each apartment. The cold water supply line is not accessible in each apartment because of the confined area where a meter would normally be installed. Any conventional or unconventional installation would be prohibited. Because of this situation we are proposing an allocation system for billing the individual apartments.

Upon receiving the master meter bills from the City of Boynton Beach, the following allocation will take place. Each apartment building at Ashley Lake Park has its own individual water meter. Each apartment in an individual building would be billed a minimum water and minimum sewer charge as indicated on attachment I from the City of Boynton Beach, and as described in attachment II. The allocation of water and sewer consumption will be based upon the number of bedrooms in each apartment. The Ashley Lake Park apartments contains one, two and three bedroom apartments. The total consumption would be divided by the number of bedrooms in each apartment building. Each bedroom would then be allocated its appropriate percentage of consumption and charged at the rates indicated on attachment I with the applicable minimum and maximum charges. Each month an individual bill will be calculated for each apartment according to the number of bedrooms and mailed. The tenant will be expected to pay the amount registered on the bill.

In no case will the total consumption billed to the residents of any building ever exceed the master metered bills from the City of Boynton Beach to the Ashley Lake Park apartments. All vacant units will be the responsibility of the owner (Ashley Lake Park).

ATTACHMENT IV

Typical Rate Schedule

Below is an actual billing received from the City of Boynton Beach Utilities for Ashley Lake Park apartments and the resulting sample individual tenant bill. The actual bill is enclosed as exhibit 'A'.

Actuals

1. Total consumption from the master meter = 88,000 gallons
2. This bill is for building one and contains 32 apartment units
3. Building one contains all one bedroom apartments
4. Total consumption is divided by the total number of bedrooms or 32.

The Ashley Lake Building # one metered bill

Consumption	88,000 gallons	
Water	\$ 265.92	(\$ 8.31 x 32)
Sewer	<u>\$ 574.96</u>	(\$ 12.66 x 32 + 88 x \$ 1.93)
Total	\$ 840.88	

Individual tenant bills (one bedroom)

Basis of calculations:

1. The base charge for water is calculated by dividing the number of apartments (32) into the total consumption. Each apartment is assigned a minimum of three thousand gallons. Any excessive gallons are divided by the number of bedrooms (32 also) and applied to each apartment according to the rates previously indicated. (88,000 divided by 32 = 2,750 gallons)
2. The base charge for sewer is charged as indicated on attachment I, which is \$ 12.66 per unit. The consumption is also charged at the rates on attachment I.

Using these guide lines, each apartment would be charged for their usage.

The individual apartment bill

Water	\$ 8.31 (minimum charge)
Sewer base charge	\$ 12.66
Sewer usage	<u>\$ 5.31 (2.75 x \$ 1.93)</u>
Total bill	\$ 26.28

Accountability

A. Master bill	\$ 840.88
B. Individual bills (32 x \$ 26.28)	\$ 840.96
C. Fractional rounding of gallons creates the above difference

(4) The utility shall provide the customer with a written report of the results of any test performed pursuant to this rule.

(5) A meter shall in no way be disturbed after the utility has received notice that application has been made for a test by the customer unless a representative of the Commission is present or unless authority to do so is first given in writing by the Commission or by the customer.

(6) At the request of the customer, the utility shall make arrangements for a meter test to be conducted by an independent meter testing facility of the customer's choosing. The customer shall be responsible for negotiating and paying to the independent meter testing facility any fee charged for such a test. Such independent meter testing facilities shall, at minimum, conform to the requirements of the American Waterworks's Association Water Meters Selection Installation Testing and Maintenance (AWWA-M6-1972). Where appropriate, the meter may be field tested. The customer shall be responsible for all the costs to the utility associated with a meter test by an independent meter testing

367.045 Certificate of authorization; application and amendment procedures.—

- (1) When a utility applies for an initial certificate of authorization from the commission, it shall:
 - (a) Provide notice of the actual application filed by mail or personal delivery to the governing body of the county or city affected, to the Public Counsel, to the commission, and to such other persons and in such other manner as may be prescribed by commission rule;
 - (b) Provide all information required by rule or order of the commission, which information may include a

detailed inquiry into the ability of the applicant to provide service, the area and facilities involved, the need for service in the area involved, and the existence or nonexistence of service from other sources within geographical proximity to the area in which the applicant seeks to provide service;

(c) File with the commission schedules showing all rates, classifications, and charges for service of every kind proposed by it and all rules, regulations, and contracts relating thereto;

(d) File the application fee required by s. 367.145; and

(e) Submit an affidavit that the applicant has provided notice of its actual application pursuant to this section.

(2) A utility may not delete or extend its service outside the area described in its certificate of authorization until it has obtained an amended certificate of authorization from the commission. When a utility applies for an amended certificate of authorization from the commission, it shall:

(a) Provide notice of the actual application filed by mail or personal delivery to the governing body of the county or municipality affected, to the Public Counsel, to the commission, and to such other persons and in such other manner as may be prescribed by commission rule;

(b) Provide all information required by rule or order of the commission, which information may include a detailed inquiry into the ability or inability of the applicant to provide service, the need or lack of need for service in the area that the applicant seeks to delete or add, the existence or nonexistence of service from other sources within geographical proximity to the area that the applicant seeks to delete or add, and a description of the area sought to be deleted or added to the area described in the applicant's current certificate of authorization;

(d) Submit an affidavit that the utility has tariffs and annual reports on file with the commission;

(e) File the application fee required by s. 367.145; and

(f) Submit an affidavit that the applicant has provided notice of its actual application pursuant to this section.

(3) If, within 30 days after the last day that notice was mailed or published by the applicant, whichever is later, the commission does not receive written objection to the notice, the commission may dispose of the application without hearing. If the applicant is dissatisfied with the disposition, it may bring a proceeding under s. 120.57.

(4) If, within 30 days after the last day that notice was mailed or published by the applicant, whichever is later, the commission receives from the Public Counsel, a governmental authority, or a utility or consumer who would be substantially affected by the requested certification or amendment a written objection requesting a proceeding pursuant to s. 120.57, the commission shall order such proceeding conducted in or near the area for

service as is prescribed by part VI of chapter 403 and parts I and II of chapter 373, or rules adopted pursuant thereto; but such service shall not be less safe, less efficient, or less sufficient than is consistent with the approved engineering design of the system and the reasonable and proper operation of the utility in the public interest. If the commission finds that a utility has failed to provide its customers with water or wastewater service that meets the standards promulgated by the Department of Environmental Regulation or the water management districts, the commission may reduce the utility's return on equity until the standards are met.

History.—s. 1, ch. 71-278; s. 2, ch. 76-168; s. 1, ch. 77-457; s. 53, ch. 78-96, ss. 1, 2, ch. 79-42; ss. 14, 25, 26, ch. 80-99; ss. 2, 3, ch. 81-318; ss. 15, 26, 27, ch. 82-232; s. 4, ch. 91-429; s. 10, ch. 93-35.

Note.—Section 2, ch. 83-213, transferred all existing legal authorities and actions of the Department of Environmental Regulation and the Department of Natural Resources to the Department of Environmental Protection.

367.121 Powers of commission.—

(1) In the exercise of its jurisdiction, the commission shall have power:

(a) To prescribe fair and reasonable rates and charges, classifications, standards of quality and measurements, and to prescribe service rules to be observed by each utility, except to the extent such authority is expressly given to another state agency;

(b) To prescribe, by rule, a uniform system and classification of accounts for all utilities, which rules, among other things, shall establish adequate, fair, and reasonable depreciation rates and charges;

(c) To require such regular or emergency reports from a utility, including, but not limited to, financial reports, as the commission deems necessary and, if the commission finds a financial report to be incomplete, incorrect, or inconsistent with the uniform system and classification of accounts, to require a new report or a supplemental report, either of which the commission may require to be certified by an independent certified public accountant licensed under chapter 473;

(d) To require repairs, improvements, additions, and extensions to any facility, or to require the construction of a new facility, if reasonably necessary to provide adequate and proper service to any person entitled to service or if reasonably necessary to provide any prescribed quality of service, except that no utility shall be required to extend its service outside the geographic area described in its certificate of authorization, or make additions to its plant or equipment to serve outside such area, unless the commission first finds that the utility is financially able to make such additional investment without impairing its capacity to serve its existing customers;

(e) To employ and fix the compensation for such examiners and technical, legal, and clerical employees as it deems necessary to carry out the provisions of this chapter;

(f) To adopt, by affirmative vote of a majority of the commission, rules reasonably necessary and appropriate for the administration and enforcement of this chapter;

(g) To exercise all judicial powers, issue all writs, and do all things necessary or convenient to the full and complete exercise of its jurisdiction and the enforcement of its orders and requirements;

(h) To order interconnections of service or facilities between utilities, and to approve any plant capacity charges or wholesale service charges or rates related thereto, provided the commission first finds that the utility is financially able to make such additional investment as is required without impairing its capacity to serve its existing customers;

(i) To require the filing of reports and other data by a public utility or its affiliated companies, including its parent company, regarding transactions or allocations of common costs, among the utility and such affiliated companies. The commission may also require such reports or other data necessary to ensure that a utility's ratepayers do not subsidize nonutility activities;

(j) To seek relief in circuit court including temporary and permanent injunctions, restraining orders, or any other appropriate order, because the Legislature finds that violations of commission orders or rules, in connection with the impairment of a utility's operations or service, constitute irreparable harm for which there is no adequate remedy at law. Such remedies shall be in addition to and supplementary to any other remedies available for enforcement of agency action under s. 120.69 or the provisions of this chapter. The commission shall establish procedures implementing this section by rule; and

(k) To assess a utility for reasonable travel costs associated with reviewing the records of the utility and its affiliates when such records are kept out of state. The utility may bring the records back into the state for review.

(2) The commission or its duly authorized representatives may, during all reasonable hours, enter upon any premises occupied by any utility and set up and use thereon any necessary apparatus and appliance for the purpose of making investigations, inspections, examinations, and tests and exercising any power conferred by this chapter. Such utility shall have the right to be notified of and be represented at the making of such investigations, inspections, examinations, and tests.

History.—s. 1, ch. 71-278; s. 2, ch. 76-168; s. 1, ch. 77-457; s. 53, ch. 78-96, ss. 1, 2, 5, 26, ch. 80-99; ss. 2, 3, ch. 81-318; ss. 15, 26, 27, ch. 82-232; s. 4, ch. 91-429; s. 11, ch. 93-35.

367.122 Examination and testing of meters.—

(1) The commission may provide for the examination and testing of all meters used for measuring any product or service of a utility.

(2) Any customer or user may have any such meter tested by the utility upon payment of the fee fixed by the commission.

(3) The commission shall establish reasonable fees to be paid for testing such meters on the request of the customers. Current utility customers or users may, at their discretion, pay the fee fixed by the commission at the time of the request or have the utility include the fee with their next regularly scheduled statement. However, the fee shall be paid by the utility and repaid to the customer or user if the meter is found defective or incorrect to the disadvantage of the customer or user in excess of the degree or amount of tolerance customarily allowed for such meters, or as may be provided for in rules and regulations of the commission. No fee may be charged for any such testing done by the commission or its representatives.

(4) The commission may purchase materials, apparatus, and standard measuring instruments for such examinations and tests.

History.—s. 1, ch. 71-278, § 100, ch. 73-233, § 3, ch. 76-168, § 1, ch. 77-457, ss. 16, 25, 26, ch. 80-99, ss. 2, 3, ch. 81-318, ss. 17, 26, 27, ch. 89-353, § 4, ch. 91-429.

367.123 Service for resale.—The commission may require a utility to provide service for resale. However, before requiring the provision of service, the commission shall first find that the utility is financially able to make such additional investment as is required without impairing its capacity to serve its existing customers. Any utility which provides service for resale shall provide such service upon terms and conditions established by the commission, and no utility shall discontinue such service without the approval of the commission. In the event a governmental authority voluntarily enters into an agreement for resale, such agreement shall provide that the service will not be discontinued without 90 days' notice being given to the purchaser prior to discontinuing such service. Nothing contained herein shall be construed to prohibit the governmental authority from requiring adequate security being given to such authority to ensure payments required in the agreement.

History.—s. 1, ch. 71-278, § 3, ch. 76-168, § 1, ch. 77-457, ss. 17, 25, 26, ch. 80-99, § 218, ch. 81-259, ss. 2, 3, ch. 81-318, ss. 18, 26, 27, ch. 89-353, § 4, ch. 91-429.

367.145 Regulatory assessment and application fees.—

(1) The commission shall set by rule a regulatory assessment fee that each utility must pay once a year in conjunction with filing its annual financial report required by commission rule. Notwithstanding any provision of law to the contrary, the amount of the regulatory assessment fee shall not exceed 4.5 percent of the gross revenues of the utility derived from intrastate business, excluding sales for resale made to a regulated company.

(a) A governmental authority to which ownership or control of a utility is transferred is not liable for any fees owed the commission by the utility as of the date of transfer. However, whenever a purchase at wholesale is made of any water or wastewater service and a fee is paid or payable thereon by the selling utility and the utility purchasing such water or wastewater service resells the same directly to customers, the purchasing utility is entitled to, and must receive, credit on such fees as may be due by it under this section to the extent of the fee paid or payable upon such water or wastewater service by the utility from which such purchase was made. All such fee payments and penalties must be deposited in accordance with s. 350.113.

(b) In addition to the penalties and interest otherwise provided, the commission may impose a penalty upon a utility for failure to pay regulatory assessment fees in a timely manner in accordance with s. 367.161.

(2) Each utility shall pay an application fee, established by the commission, for an original certificate of authorization; an amendment to an existing certificate of authorization; a request for rate relief in accordance with s. 367.081 or s. 367.0814; a proceeding pursuant to s. 367.0822; service availability charges filed in accordance with s. 367.101; and when this chapter becomes

applicable to a county in accordance with s. 367.171. The amount of the application fee determined by the commission may not exceed \$4,500 and must be based upon the existing or proposed capacity of the system, extension, or deletion. All such fee payments must be deposited in accordance with s. 350.113.

(3) Fees collected by the commission pursuant to this section may only be used to cover the cost of regulating water and wastewater systems. Fees collected by the commission pursuant to chapters 364 and 366 may not be used to pay the cost of regulating water and wastewater systems.

History.—ss. 19, 27, ch. 89-353, § 5, ch. 90-166, § 4, ch. 91-429.

367.156 Public utility records; confidentiality.

(1) The commission shall continue to have reasonable access to all utility records and records of affiliated companies, including its parent company, regarding transactions or cost allocations among the utility and such affiliated companies, and such records necessary to ensure that a utility's ratepayers do not subsidize non-utility activities. Upon request of the utility or any other person, any records received by the commission which are shown and found by the commission to be proprietary confidential business information shall be kept confidential and shall be exempt from s. 119.07(1).

(2) Discovery in any docket or proceeding before the commission shall be in the manner provided for in Rule 1.280 of the Florida Rules of Civil Procedure. Information which affects a utility's rates or cost of service shall be considered relevant for purposes of discovery in any docket or proceeding where the utility's rates or cost of service are at issue. The commission shall determine whether information requested in discovery affects a utility's rates or cost of service. Upon showing by a utility or other person and a finding by the commission that discovery will require the disclosure of proprietary confidential business information, the commission shall issue appropriate protective orders designating the manner for handling such information during the course of the proceeding and for protecting such information from disclosure outside the proceeding. Such proprietary confidential business information shall be exempt from s. 119.07(1). Any record which has been determined to be proprietary confidential business information and is not entered into the official record of the proceeding must be returned to the person providing the record within 60 days after the final order, unless the final order is appealed. If the final order is appealed, any such record must be returned within 30 days after the decision on appeal. The commission shall adopt the necessary rules to implement this provision.

- (2) For the purposes of this section, the placing of a person on probation without an adjudication of guilt shall be treated as a prior conviction if the subsequent offense for which he is to be sentenced was committed during such probationary period.
- (3) In a separate proceeding, the court shall determine if the defendant is a habitual felony offender or a habitual violent felony offender. The procedure shall be as follows:

(d) A sentence imposed under this section shall not be increased after such imposition.

(e) A sentence imposed under this section is not subject to s. 921.001. The criteria shall be designed to ensure fair and impartial application of the habitual offender statute. A deviation from this criteria must be explained in writing, signed by the state attorney, and placed in the case file maintained by the state attorney. A deviation from the adopted criteria is not subject to appellate review.

History.—s. 3, ch. 93-406.

775.0841 Legislative findings and intent.—The Legislature hereby finds that a substantial and disproportionate number of serious crimes is committed in Florida by a relatively small number of multiple and repeat felony offenders, commonly known as career criminals. The Legislature further finds that priority should be given to the investigation, apprehension, and prosecution of career criminals in the use of law enforcement resources and to the incarceration of career criminals in the use of available prison space. The Legislature intends to initiate and support increased efforts by state and local law enforcement agencies and state attorneys' offices to investigate, apprehend, and prosecute career criminals and to incarcerate them for extended terms.

History.—s. 2, ch. 88-121.

775.0842 Persons subject to career criminal prosecution efforts.—A person who is under arrest for the commission, attempted commission, or conspiracy to commit any felony in this state shall be the subject of career criminal prosecution efforts provided that such person qualifies as a habitual felony offender or a habitual violent felony offender under s. 775.084.

History.—s. 4, ch. 88-121, s. 2, ch. 89-260.

775.0843 Policies to be adopted for career criminal cases.—

(1) Criminal justice agencies within this state shall employ enhanced law enforcement management efforts and resources for the investigation, apprehension, and prosecution of career criminals. Each state attorney, sheriff, and the police chief of each municipality with a population in excess of 50,000 shall designate a career criminal program coordinator with primary responsibility for coordinating the efforts contemplated by this section and ss. 775.0841 and 775.0842. Enhanced law enforcement efforts and resources shall include, but not be limited to:

(a) Assignment of highly qualified investigators and prosecutors to career criminal cases.

(b) Significant reduction of caseloads for investigators and prosecutors assigned to career criminal cases.

(c) Coordination with federal, state, and local criminal justice agencies to facilitate the collection and dissemination of criminal investigative and intelligence information relating to those persons meeting the criteria of a career criminal.

(2) Each state attorney's office shall establish a career criminal prosecution unit and may adopt and implement policies based on the following guidelines:

(a) All reasonable prosecutorial efforts shall be made to resist the pretrial release of a charged defendant meeting career criminal selection criteria.

(b) A plea of guilty or a trial conviction shall be sought on each offense charged in the accusatory pleadings against an individual meeting career criminal selection criteria.

(c) All reasonable prosecutorial efforts shall be made to reduce the time between arrest and disposition of charges against an individual meeting career criminal selection criteria.

(d) All reasonable prosecutorial efforts shall be made to persuade the court to impose the most severe sanction authorized upon a person convicted after prosecution as a career criminal.

(3) This section does not prohibit a plea agreement in the interest of justice when there are codefendants and the prosecuting attorney determines that the information or testimony of the defendant making the agreement is necessary for the conviction of one or more of the other codefendants. The court may condition its acceptance of such plea agreement on the provision of such information or testimony by such defendant.

(4) Law enforcement agencies within this state shall employ enhanced law enforcement management efforts and resources in the investigation, apprehension, and prosecution of career criminals. Enhanced law enforcement efforts and resources shall include, but not be limited to:

(a) Crime analysis, consisting of the timely collection and study of local crime data to accomplish the following:

2. Provide investigative leads.
3. Isolate and identify geographical areas or population groups experiencing severe crime problems in order to improve crime prevention efforts.
4. Provide supporting data for improved allocation of overall law enforcement agency resources.
