

REQUEST TO ESTABLISH DOCKET  
(PLEASE TYPE)

Date APRIL 1, 1996

Docket No. 960401-TL

1. Division Name/Staff Name COMMUNICATIONS/STAVANJA

2. OPR \_\_\_\_\_

3. OCR \_\_\_\_\_

4. Suggested Docket Title REQUEST FOR APPROVAL OF TARIFF FILING TO ADD ADVANCED DIGITAL SERVICES (ISDN) BY ALLTEL FLORIDA, INCORPORATED (I-96-133 FILED 2/29/96)

5. Suggested Docket Mailing List (attach separate sheet if necessary)

- A. Provide NAMES ONLY for regulated companies or ACRONYMS ONLY regulated industries, as shown in Rule 25-22.104, F.A.C.
- B. Provide COMPLETE name and address for all others. (Match representatives to clients.)

1. Parties and their representatives (if any)

<u>ALLTEL FLORIDA, INCORPORATED</u>	_____

## DIGITAL DATA COMMUNICATION SERVICE

### 29.4 ADVANCED DIGITAL SERVICES (ADS) BASIC RATE ACCESS (BRA)

#### 29.4.1 General (Continued)

2. D Channel - The D Channel is a 16 kbps digital signaling channel that carries signaling and control for the B Channels. The D Channel may be optionally used to transmit X.25 packet data (where available) at a maximum transmission throughput of 9.6 kbps.

d. All ADS consist of central office facilities (including certain outside plant facilities) extended from the Telephone Company's switching equipment to the customer's demarcation point.

e. Distance Extension Charges, as set forth in Section 29.4.6 of this tariff, will apply to customers who are within the serving central office and who are served at a transmission range where unusual expenditures are required to make the service available.

f. Directory Numbers

1. Primary Directory Number - Each B Channel includes a single primary telephone directory number. On a given 2B+D Advanced Digital Services line, calls are routed to the appropriate terminal device (voice telephone, computer/data terminal or packet device) based on the type of call (voice, data or packet) presented to the Advanced Digital Services line.

2. Secondary Directory Numbers - ADS may have additional telephone directory numbers. The additional telephone number(s) may originate or receive calls independent of the user's Primary Directory Number, however, each B Channel is allowed only one simultaneous circuit connection at a time.

#### 29.4.2 CIRCUIT SWITCHING SERVICE DESCRIPTIONS

Circuit Switching is a switching arrangement in which an entire circuit or, in a digital switch equipped for ISDN, a specific selection of channels is dedicated to a given call. Circuit-Switched Service provides the ability to originate and receive circuit-switched voice and/or data calls over a 56/64 kbps B Channel. The customer may choose among the following Circuit-Switched features based upon application needs:

a. Clear Channel Capability - A characteristic of the transmission paths on the B Channels that allows the full bandwidth of 64 kbps to be available to the customer. It is also possible to bridge two B Channels together to achieve data transmission speeds of up to 128 kbps. However, ISDN interconnection to or through non-ISDN equipped central offices will be potentially sub-rated to 56 kbps per channel.

## DIGITAL DATA COMMUNICATION SERVICE

29.4 ADVANCED DIGITAL SERVICES (ADS)  
BASIC RATE ACCESS (BRA)

## 29.4.2 CIRCUIT SWITCHING SERVICE DESCRIPTIONS (Continued)

- b. Additional Call Offering - This feature allows the user to be notified of an additional call when the telephone set is busy. Multiple incoming calls to a directory number or secondary telephone number (if purchased) can be terminated to the telephone.
- c. Multiline Hunt Service - This feature allows incoming calls to a busy directory number to search through a predetermined list of directory numbers. This may be another ADS directory number on the same (or a different) B Channel or (for voice calls) an analog line. The hunting arrangement may be linear or circular.
- d. Call Pick-Up - This feature allows the user to answer calls directed to other stations.
- e. Custom Calling Services - Applicable Custom Calling Services (except for those superseded by Advanced Digital Services counterparts) are available at rates and charges specified in the Custom Calling Services section of the Company's tariff. The following Custom Calling features found specifically in this BRA tariff will be charged at rates listed in Section 29.4.6 of this tariff:
1. Call Hold - This feature allows the user to place a call on hold.
  2. Three-Way Calling - This feature allows the user to add a third party to an existing voice call and thus enables a conference between parties at multiple locations. The user may also disconnect the last party added. The Additional Call Offering feature or Additional Call Appearances feature is a prerequisite.
  3. Call Transfer - This feature allows the user to transfer a voice call to another directory number. The Additional Call Offering feature or Additional Call Appearances feature is a prerequisite.
  4. Conference Calling - Six-Way Station Controlled - This feature allows the user to set up a conference call for up to 6 parties (including the originator of the call). The Additional Call Offering feature or Additional Call Appearances feature is a prerequisite.
  5. Call Forwarding - This feature allows calls to be redirected from one station to another station.

## DIGITAL DATA COMMUNICATION SERVICE

29.4 ADVANCED DIGITAL SERVICES (ADS)  
BASIC RATE ACCESS (BRA)

## 29.4.2 CIRCUIT SWITCHING SERVICE DESCRIPTIONS (Continued)

- f. Custom Calling Services - Custom Calling Features and ALLSTAR Services are available at rates and charges specified in Sections 13.3 and 13.11 of this tariff.
- g. Centrex Features - Applicable Centrex features (except for those superseded by Advanced Digital Services counterparts) are available at rates and charges specified in Section 12 of this tariff.
- h. Electronic Key Telephone Service (EKTS) - Electronic Key Telephone Service is a central office based key system implementation that requires no switching equipment on the customer's premise. EKTS requires the customer to provide an EKTS capable terminal set. EKTS provides the customer with the ability to access the following features (where available):
1. Multiple Appearance Directory Numbers - This feature allows a directory number(s) from one EKTS set to appear on the EKTS sets of other users.
  2. Additional Call Appearances - This feature allows the same directory number to appear more than once (by assigning the directory number to additional buttons) on a customer's telephone set, allowing the capability of multiple incoming or outgoing calls associated with that directory number. For EKTS users, this feature provides the same functionality as Additional Call Offering (or analog Call Waiting).
  3. Analog Line Appearances - This feature allows analog users' directory numbers to appear on an EKTS set, thereby allowing the EKTS user to provide call coverage for analog users. It may limit the use of other features and/or functionalities on analog lines.
  4. Bridging - This feature allows more than one EKTS set in the Multiple Appearance Directory Number group to be active on the same call simultaneously.
  5. Automatic Bridged Call Exclusion (Privacy on Answer) - This feature allows only one user to answer an incoming call, thereby preventing bridging on incoming calls. On a call by call basis, this feature can be disabled via Privacy (Manual Exclusion) to allow bridging to occur.
  6. Privacy (Manual Exclusion) - This feature allows the user to press a feature button which will restrict other stations from bridging onto an existing call that is active at that station or picking up an existing call on hold. A user who has the Automatic Bridged Call Exclusion feature can press the Privacy button to disable Automatic Bridge Call Exclusion and thereby allow bridging to occur on a given call.

## DIGITAL DATA COMMUNICATION SERVICE

29.4 ADVANCED DIGITAL SERVICES (ADS)  
BASIC RATE ACCESS (BRA)

## 29.4.2 CIRCUIT SWITCHING SERVICE DESCRIPTIONS (Continued)

7. Intercom Calling - This feature allows for EKTS station-to-station calls. Intercom calls can be made by pressing an intercom button and dialing one or two digits.
8. Display Capability - This feature allows an appropriately equipped telephone set to display a variety of information. For example, when idle, the time and date is displayed. When the user is making a call, call progress information is displayed. The following information is also provided:
- (a) Caller ID - This feature displays the calling number and name if available. Enhanced Calling Services are available at rates and charges specified in Section 13.11 of this tariff.
  - (b) Called Number Display - This feature displays the called number (dialed digits) on the telephone set when an outgoing call is made.
  - (c) Calling Reason Display - This feature provides a display of the directory number from which a call was redirected (via Call Forwarding features) along with the reason (type of Call Forwarding) for the call being redirected.
9. Feature Function Buttons - This feature gives the user the ability to assign features to specific buttons on the EKTS set. When depressed, the button will activate or deactivate the assigned feature.
10. Ringing Options - This feature is used with Multiple Appearance Directory Number Arrangements and allows the EKTS set to apply different combinations of ringing (ringing is turned off after a specified period of time), delayed ringing (ringing is turned off after a specified period of time), immediate ringing, no ringing, or normal ringing. On a per EKTS user basis, each directory number may have a different ringing option.

## DIGITAL DATA COMMUNICATION SERVICE

29.4 ADVANCED DIGITAL SERVICES (ADS)  
BASIC RATE ACCESS (BRA)

## 29.4.3 PACKET-SWITCHED DATA SERVICE DESCRIPTIONS

Packet Switching is a service in which packets of data are individually addressed and combined on a transmission path with other addressed packets. Packet-Switched Data Service provides the ability to originate and receive X.25 packet data calls. X.25 is the Consultative Committee on International Telephone and Telegraph's (CCITT) recommended and internationally accepted standard for connecting data terminals to packet-switched networks.

D-Channel Packet - This service provides packet data on the D Channel at a maximum transmission throughput of up to 9.6 kbps per logical channel.

B-Channel Packet - This service provides packet data on the B Channel at a maximum transmission throughput of 64kbps per logical channel.

The customer may choose among the following Packet-Switched features (where available) based upon application needs:

- a. Hunt Groups - An arrangement that allows an incoming call to a busy packet directory number to search through a predetermined list of packet directory numbers in search of a non-busy logical channel to complete the call. The hunting arrangement may be linear or circular.
- b. X.25 Data Services:
  1. Logical Channels - An arrangement that is a virtual circuit, offering multiple logical connections at the packet level of X.25. Logical Channels allow multiple packet calls (or virtual calls) to be active simultaneously on a single D Channel or B Channel.
  2. DTE Support Feature - The Data Terminal Equipment (DTE) Feature allows the network to prevent any network-to-user signaling on a virtual circuit associated with a directory number that is not included in the X.25 version. Virtual circuit communication is allowed between the subscriber's equipment and remote customer equipment that conforms to the X.25 version. This feature is available on a per directory number basis.
  3. RPOA Selection - The Recognized Private Operating Agency (RPOA) arrangement allows the user to specify an Inter-Exchange Carrier or transit network for inter-network calls on a per call basis.
  4. Incoming/Outgoing Calls Barred - This arrangement can either be used to prohibit a data terminal from receiving an incoming call or from originating outgoing calls.

## DIGITAL DATA COMMUNICATION SERVICE

29.4 ADVANCED DIGITAL SERVICES (ADS)  
BASIC RATE ACCESS (BRA)

## 29.4.3 PACKET-SWITCHED DATA SERVICE DESCRIPTIONS (Continued)

## b. X.25 Data Services:

5. Default Information Rate Assignment Features - This arrangement allows the user to subscribe to a default information rate for each direction of communication for a virtual call.
6. Non-Standard Default Packet Sizes Feature - This arrangement allows the user to subscribe to a larger maximum packet size for each direction of communication than the default 128 octets normally provided. To have this arrangement, the user must also have the Flow Control Parameter Negotiation Feature.
7. Flow Control Parameter Negotiation Feature - This arrangement permits the negotiation on a per call basis of the flow control parameters and automatically negotiates the maximum packet size and window size for each direction of data transmission.
8. Throughput Class Negotiation - An arrangement that allows the user to request specific throughput classes (bits/second) in the call request packet for each direction of data transfer associated with a virtual call.
9. Transit Delay Feature - This arrangement allows the user to indicate a desired maximum transit delay in the call request packet on a per call basis.
10. Non-Standard Default Window Size - An arrangement that allows the selection of the default window size of 1 through 7, instead of the standard window size of 2. To have this arrangement, the user must also have the Flow Control Parameter Negotiation Feature.
11. Fast Select - An arrangement that allows a sending data terminal to forward up to 128 bytes of data along with the call setup and clearing packets.
12. Fast Select Acceptance - An arrangement that allows the switch to transmit incoming call packets with the Fast Select facility to a destination terminal that has this feature.

## DIGITAL DATA COMMUNICATION SERVICE

29.4 ADVANCED DIGITAL SERVICES (ADS)  
BASIC RATE ACCESS (BRA)

## 29.4.3 PACKET-SWITCHED DATA SERVICE DESCRIPTIONS (Continued)

c. Closed User Groups - An arrangement that limits communications to members within a designated subnetwork of packet switching data users. The Closed User Group feature is established on a per line basis. Each data terminal in a Closed User Group can be arranged in one of the following modes:

1. Closed User Group with Outgoing Access - The data terminal makes outgoing calls only.
2. Closed User Group with Incoming Access - The data terminal receives incoming calls only.
3. Incoming Calls Barred Within a Closed User Group - The data terminal makes outgoing calls only to the data terminal in the Closed User Group with which it is associated.
4. Outgoing Calls Barred Within a Closed User Group - The data terminal receives incoming calls only to the data terminals in the Closed User Group with which it is associated.
5. Unrestricted Access - The data terminal receives and makes both incoming and outgoing calls.

## 29.4.4 TECHNICAL SPECIFICATIONS

## a. Transmission Specifications

The standard transmission parameters for Advanced Digital Services utilizing an ISDN Basic Rate Interface (BRA) consists of: A maximum of 38.5db loop loss at a 40Kz test tone terminated into a 135 ohm impedance. The 38.5db loss includes all central office facilities, outside plant facilities and inside wiring (which are owned and maintained by the Company only up to and including the demarcation point).

## b. Customer Premise Equipment and Facilities

Compatible customer premise equipment is required to utilize ADS. All equipment used to interface with these services is required to conform with NI-1 guidelines.

The Company shall not be responsible if changes in any of the equipment, operations, or procedures of the Company utilized in the provisioning of ADS render any facilities provided by the customer obsolete or require modification of such equipment or system, or otherwise affect its use or performance.

## DIGITAL DATA COMMUNICATION SERVICE

29.4 ADVANCED DIGITAL SERVICES (ADS)  
BASIC RATE ACCESS (BRA)

## 29.4.5 REGULATIONS

- a. Unless specifically exempted, ADS shall be subject to all general regulations applicable to the provision of service by the Company as stated in this tariff.
- b. ADS is provided at the option of the Company. This service is furnished subject to central office switching capacity, capability, the availability of outside plant facilities, and the necessary billing capabilities.
1. The availability, functionality, and capabilities of ADS may vary, or may not be available, dependent upon the type of serving central office switch, related software controlling that switch, hardware, and associated outside plant.
- (a) Where facilities are not available, or unusual expenditures are involved in making them available, the customer may be required to pay additional charges to cover the unusual expenditure, or to contract for services beyond the normal service term, or both. (These rates and charges will be determined on an individual case basis.)
- (b) Distance Extension Service: ADS may be provided to a customer's location served beyond the normal transmission range of the serving central office. In such cases, in addition to the charges and rates for ADS, Distance Extension Service rates and charges as stated in Section 29.4.6 are applicable.
- c. The minimum charge period for the payment of services provided under this tariff is one month.
- d. At the Company's discretion, the following nonrecurring service connection charges may be reduced or waived during promotional campaigns and/or as a part of customer negotiations:
1. Nonrecurring per B Channel and/or per D Channel service connection charge.
2. Nonrecurring EKTS service connection charges.
- e. Directory Listings: One directory listing is provided without charge for each ADS customer. For Centrex customers, one directory listing (either an analog or ADS number) is provided per Centrex system. Additional listings may be provided as specified in Section 6.6 of this tariff.

## DIGITAL DATA COMMUNICATION SERVICE

29.4 ADVANCED DIGITAL SERVICES (ADS)  
BASIC RATE ACCESS (BRA)

29.4.5 REGULATIONS (Continued)

f. Billable Call Treatment

1. Normal toll charges shall apply to calls that are made outside of the Local Service Area.
2. ADS customers who use the Call Forwarding or Call Transfer features are responsible for the payment of any applicable charges for each billable call connected via these features over the public network. The charge is applicable to each call answered, including the Call Forwarding set-up call. It also applies to collect and person-to-person calls, which may be refused at the answering station.

g. Customer Premise Equipment

1. This tariff for ADS does not include terminal equipment on the customer's premises. Terminal equipment may be sold or leased separately by the Company (under a separate contract), or may be provided by the customer.
2. The customer is responsible for providing the power required for any and all customer premise equipment connected to an Advanced Digital Services equipped line.

h. The Company shall not be liable for any loss or damages arising out of error, interruptions, defects, failures, or malfunctions of ADS or associated equipment. Damages arising out of such interruptions, defects, failures, or malfunctions of the services after the Company has been notified, and has reasonable time for repair, shall in no event exceed an amount equivalent to the charges made for the service affected for the period following notice from the customer until service is restored.

i. ADS-BRA is not eligible for vacation rates and is not offered for joint use service.

## DIGITAL DATA COMMUNICATION SERVICE

29.4 ADVANCED DIGITAL SERVICES (ADS)  
BASIC RATE ACCESS (BRA)

## 29.4.6 RATES AND CHARGES

## a. Advanced Digital Services Access

1. ADS must be ordered in conjunction with basic exchange access services (e.g., R1, B1, Centrex). The rates and charges below are in addition to the existing rates for these services for providing an ADS capable line to the customer's premises. These charges provide a 0B + 0D ISDN service. ADS is available in 1B + D and 2B + D configurations. The customer must select the desired B Channels and D Channel arrangements to configure the service as required. When the Basic Exchange Access Service is ordered at the same time that ADS-BRA is ordered, the service connection charges in Section 29.4.6 of this tariff apply. Charges in Section 4 of this tariff do not apply to ADS-BRA.

Access	Service Connection	Monthly Rate
Residential Advanced Digital Services	\$75.00	\$12.75
Single Line Business Advanced Digital Services	\$125.00	\$12.75
Centrex Advanced Digital Services	\$125.00	\$12.75
Distance Extension Charge	N/A	\$39.25

## b. Communications Channels

1. Service establishment and monthly charges:

Service Element	Service Connection	Monthly Rate
Circuit-Switched Voice (per B Channel)	\$10.00	\$3.00
Circuit-Switched Data (per B Channel)	\$10.00	\$3.00
Circuit-Switched Alternate Voice/Data (per B Channel)	\$10.00	\$4.00
High Speed Packet Switched Services (per B Channel)	\$100.00	\$120.00
Low Speed Packet Switched Services (per D Channel)	\$25.00	\$7.50
D Channel Signaling (per D Channel)	N/A	N/A

## DIGITAL DATA COMMUNICATION SERVICE

29.4 ADVANCED DIGITAL SERVICES (ADS)  
BASIC RATE ACCESS (BRA)

## 29.4.6 RATES AND CHARGES (Continued)

## c. Circuit-Switched Features

## 1. Recurring charges:

	Service Connection	Monthly Rate
Circuit-Switched Feature		
Clear Channel Capability (where available)	N/A	N/A
Additional Call Offering (per B Channel)	N/A	\$ .75
First 4 call appearances	N/A	N/A
Fifth and subsequent call appearances	\$8.00	\$ .75
Multiline Hunt Service (per B Channel)	N/A	\$ .75
Call Pick-Up (per B Channel)	N/A	\$ .75 (For Centrex, See Note 1)
		(For Centrex, See Note 1)
Custom Calling Services:		
Call Hold	N/A	N/A
Three Way Calling (per B Channel)	Note 1	Note 1
Call Transfer	N/A	N/A
Conference Calling - Six Way Station Controlled (per B Channel)	N/A (For Centrex, See Note 1)	\$2.00 (For Centrex, See Note 1)
Call Forwarding (per B Channel)	Note 1	Note 1
Other Custom Calling Services	Note 1	Note 1

Note 1: Current rates, charges, and multiple feature discounts for applicable Custom Calling, Enhanced Custom Calling, and Centrex Services may be found in the appropriate sections of this tariff. For analog lines, the rates and charges for these services are normally applied on a per line basis. For lines equipped with Advanced Digital Services, the rates and charges for these services are applied on a per B Channel basis (to each B Channel to which these services are assigned).

## DIGITAL DATA COMMUNICATION SERVICE

29.4 ADVANCED DIGITAL SERVICES (ADS)  
BASIC RATE ACCESS (BRA)

## 29.4.6 RATES AND CHARGES (Continued)

## c. Circuit-Switched Features (Continued)

## 1. Recurring charges: (Continued)

Circuit-Switched Feature	Service Connection	Monthly Rate
Advanced Calling Services:	Note 1	Note 1
Centrex Features (Centrex customers only)		Note 1 Note 1

## 2. Service establishment charges

When the above features are ordered as part of an initial service order with an Advanced Digital Services B Channel, there is no service establishment charge for these services.

## 3. Subsequent feature additions and changes

When the above features are ordered or modified after the initial installation of an Advanced Digital Services B Channel, the nonrecurring feature addition and change charge is as follows:

Feature Additions and Changes	Charge
(per B Channel)	\$20.00

Only one service charge will appear when multiple features are added or changed on a B Channel as part of the same service order.

Note 1: Current rates, charges, and multiple feature discounts for applicable Custom Calling, Enhanced Custom Calling, and Centrex Services may be found in the appropriate sections of this tariff. For analog lines, the rates and charges for these services are normally applied on a per line basis. For lines equipped with Advanced Digital Services, the rates and charges for these services are applied on a per B Channel basis (to each B Channel to which these services are assigned).

## d. Electronic Key Telephone Service (EKTS)

1. The monthly rates shown below apply to EKTS features. To have EKTS, a line must have at least one Advanced Digital Services Circuit-Switched Voice or Circuit-Switched Alternate Voice/Data B Channel.

	Service Connection	Monthly Rate
Electronic Key Telephone Service Feature		
Electronic Key Telephone Service (per B Channel configured for EKTS)	\$25.00	N/A
Multiple Appearance Directory Numbers:		
First 4 DNs on an EKTS Set	N/A	N/A
Fifth and Subsequent DN appearing on an EKTS Set	\$8.00	\$ .75
Additional Call Appearances (where available):		
First 4 call appearances	N/A	N/A
Fifth and subsequent call appearances (per EKTS Set)	\$8.00	\$ .75
Analog Line Appearances (per analog number appearing on an EKTS Set)	\$8.00	\$ .75
Bridging	N/A	N/A
Automatic Bridged Call Exclusive (Privacy on Answer)	N/A	N/A
Privacy (Manual Exclusion)	N/A	N/A
Intercom Calling (Per Intercom button assigned to an EKTS Set)	\$8.00	\$ .50

e. Packet-Switched Services

1. The monthly rates shown below apply to Packet-Switched Service. D Channel Packet or B Channel Packet is a prerequisite for these services.

Packet-Switched Service/Feature	Service Connection	Monthly Rate
Hunt Groups (per member)	\$10.00	N/A
X.25 Data Services	N/A	N/A
Closed User Groups (per user group)	\$10.00	N/A
Closed User Groups (per member)	N/A	\$2.00
Non Standard Default Packet Sizes	N/A	\$5.00
Non Standard Default Window Size	N/A	\$5.00

2. Subsequent feature additions and charges

When packet switching features and/or parameters are ordered or modified after initial installation, the nonrecurring feature addition and change charge is as follows:

Feature Additions and Changes (per packet channel)	Nonrecurring Charge
	\$20.00

Only one service charge will appear when multiple features or parameters are added or changed on a D Channel as part of the same service order.
