FLORIDA PUBLIC SERVICE COMMISSION

INSTRUCTIONS FOR PREPARATION OF TERRITORY DESCRIPTION AND MAP

An accurate description of the territory served or proposed to be served is essential. The noticing requirement in Rule 25-30, Florida Administrative Code, and the territory description requirement for each of the certification applications require the territory to be described using township, range and land sections. Failure to use the required format will cause your application to be delayed and may result in your having to renotice. The following information is provided to assist you in preparing a correct legal description and plotting that territory on the service territory map.

TERRITORY DESCRIPTION

The territory description must contain the following:

- 1) A reference to a township(s), range(s), land section(s) and county.
- 2) A complete and accurate description of the territory served or proposed to be served. There are two acceptable formats which may be used.
 - a) Sections - If the territory includes complete sections, the description may only include the township, range, and section reference. If the territory includes partial sections, the description shall either identify the subsections included or excluded.
 - b) Metes and Bounds - A point of beginning which is referenced from either a section corner or a subsection corner, such as a quarter corner. The perimeter shall be described by traversing the proposed territory and closing at the point of beginning. Also, the description shall include all bearings and distances necessary to provide a continuous description.
- 3) References to interstates, state roads, and major bodies of water are acceptable.
- 4) References to government lots, local streets, recorded plats or lots, tracts, or other recorded instruments are not acceptable.

Acceptable territory description formats are shown in the attached Examples 1 and 2.

Territory maps are required in the Florida Administrative Code rules related to applications for original certificates, amendments, grandfather certificates, and in transfers to a governmental agency where only a portion of the territory is transferred. The map is used by staff to verify the location of the existing or proposed territory. The territory maps should not be confused with the system depiction map which is used to locate existing or proposed service lines and facilities.

TERRITORY MAP

The territory map shall contain the following:

- 1) Territory shall be plotted on a Department of Transportation Map, County tax assessor map or any other map with a scale of 1" = 200 ft. or 1" = 400 ft.
- 2) Township, range, section, and county.
- 3) An accurate depiction of the existing or proposed territory. The map should clearly distinguish the existing versus the proposed territory.

An example of a acceptable territory map is attached as Example 3.
