LATE FILED EXHIBIT GWM-1
Docket No. 961153-TL
Glenn W. Mayne (12/5/96)
Page 1

Number of NXXs Used by the State

FPSC Deposition Request: Provide the number of NXXs used by the State and where they are located.

The attached reports show the State's Centrex systems when a block of numbers have been assigned. Locations where a number block has not been assigned (i.e., individual line service provided to the State) are not included. This information is included for area code 904 locations in Late Filed Exhibit GWM-2 where available.

* EFFECTIVE 01-01-02 ALL NEW TNS NOT INCLUDED IN AN ACCEPTABLE HUNDRED-NUMBER RANGE ARE EXCLUDED FROM SUNCOM ROUTING GUIDE *
ANY CHANGES OR CORRECTIONS PLEASE

**DMS Cost Estimates for Reprogramming
PABX and Electronic Key Systems**

FPSC Deposition Request: Provide details on the \$500,000 cost estimate to reprogram the State's equipment for a new area code.

According to my Access Systems Supervisor Sam Houston, the \$500,000 cost estimate to reprogram the State's equipment for a new area code was arrived at through discussion with the State's contract vendors for PABXs and electronic key systems and my staff's own experience. A conservative estimate to reprogram PABXs is \$300 and \$250 for electronic key systems. There are 340 PABXs and 1600 electronic key systems (EKs) owned by state agencies. The cost estimate was computed as follows:

\$300 x 340 PABXs	\$102,000
\$250 x 1600 EKs	<u>400,000</u>
Estimated Total	\$502,000

LATE FILED EXHIBIT GWM-4
Docket No. 961153-TL
Glenn W. Mayne (12/5/96)
Page 1

**State of Florida Cost Estimates for Area Code Changes
in Jacksonville and Daytona Beach**

FPSC Deposition Request: Provide the estimated cost impact on the State if the area code were changed in Jacksonville and Daytona Beach.

Cost estimates for Jacksonville, Daytona Beach, Pensacola, or Panama City were not determined.

State of Florida Cost Estimate for Software Configurations

FPSC Deposition Request: Provide details on the \$1,500,000 cost estimate to upgrade generic programs in the State's equipment to accommodate the North American Numbering Plan dialing scheme.

According to my Access Systems Supervisor Sam Houston, the \$1,500,000 cost estimate to upgrade generic programs and reprogram the State's equipment was arrived at through discussion with the State's contract vendors for PABX and electronic key systems and my staff's own experience. A conservative estimate for a PABX is \$300 each and a conservative estimate for the electronic key systems is \$250 each. The cost associated with the software upgrade to provide the North American Numbering Plan dialing scheme, which is required if the systems are programmed with the call restriction feature, is \$1500 each. Mr. Houston makes the assumption that one half of the electronic key systems (800 EKs) will require the software upgrade. The cost estimate was computed as follows:

340 PABXs x \$300	\$ 102,000
800 EKs x \$250	200,000
800 EKs x \$1500	<u>1,200,000</u>
Estimated Total	\$1,502,000

State of Florida Centrex Reprogramming Estimates

FPSC Deposition Request: Provide details on the \$160,000 cost estimate to reprogram special features on the consolidated systems (ESSX, CentraNet, and Centrex).

According to my Access Systems Supervisor Sam Houston, the \$160,000 cost to reprogram special features on the central office supplied systems (ESSX, CentraNet, and Centrex) was estimated based on 128,000 lines. Mr. Houston assumes that approximately one half or 64,000 lines will require speed call lists and special routing features to change. A conservative time estimate to change the speed call lists and special routing feature is ten to fifteen minutes or an estimated labor cost of \$2.50 per line. The cost estimate was computed as follows:

$$64,000 \text{ lines} \times \$2.50 \text{ per line} = \$160,000 \text{ Estimated Cost}$$

**Estimated Costs to State Agencies for
Area Code Change in Tallahassee**

FPSC Deposition Request: Provide information on how you arrived at the \$2,480,000 cost estimate for state agencies.

The \$2,480,000 cost estimate for state agencies is an extrapolated figure based on information provided by the Division of Retirement, Secretary of State, and Department of Business and Professional Regulation. See attached worksheet.

COST IMPACT TO AGENCIES CALCULATION

\$200,000	Div. of Retirement
60,000	Secretary of State
40,000	DBPR

\$300,000	Total

Divided by 3 agencies for average to arrive at:

\$100,000 Impact per agency

Multiplied by 31 agencies to arrive at:

\$3,100,000 Impact to state agencies based on average figure

Multiplied by 80% (or 20% reduction for agencies with different calling patterns)

- | | |
|------------------|-------------------------------|
| Military Affairs | Veterans Affairs |
| Citrus | State Board of Administration |
| Commerce | Various Commissions . . . |

\$2,480,000 Estimated Overall Impact to State Agencies

ALTERNATIVE APPROACH - DivComm Example

\$50 average cost per employee for replacing public documents, business cards, reprogramming

Telecommunication Systems	\$ 720
Telecommunication Services	1,140
Communications Engineering	3,513
Business cards for 77 employees	982

Estimated Total **\$6,355** or **\$50 per employee (129)**

\$50 x 32,000 Tallahassee based state employees = \$1,600,000

\$108 x 30,000

3,115,000

avg # 2,528,000

another approximation

State of Florida Typical Call Volume

FPSC Deposition Request: Provide details on how you obtained the figure of 600,000 calls for a typical business day (12 million calls per month) coming into the State's Centrex in Tallahassee.

Information is not available at this time.

State of Florida SUNCOM Call Volume

FPSC Deposition Request: Of the 12 million calls per month coming into the state Centrex in Tallahassee, provide information on how many calls are SUNCOM calls and how many calls are commercial public switched network calls.

The SUNCOM calls that are included in the total calls presented in Late Filed Exhibit GWM-8 are shown on the Attachment "Switch History Report/Calls." The SUNCOM node switches are referred to as A to K (see Page 1 of Attachment). To obtain the SUNCOM calls to the Tallahassee node switch (Switch E) from the other ten SUNCOM switches, add the value in the "AVG" column (last column) for A to E, B to E, C to E, etc. where E is the "TERM SWT" (second column) and A through K (except for E) is the "ORG SWT." The summation of these ten values is the number of SUNCOM calls terminating to the Tallahassee node switch. The number of SUNCOM calls is 435,291.

**Daily Average of Incorrectly Dialed Numbers from
the Tallahassee SUNCOM Dialing Switch**

FPSC Deposition Request: Provide information on how many of the 1200 calls per day are incorrectly dialed SUNCOM calls by Tallahassee SUNCOM customers as a result of the December 1995 change in the SUNCOM dialing plan.

In conjunction with the 1 + dialing change implemented on SUNCOM in December 1995, the LECs providing the 11 SUNCOM nodes were requested to provide taped messages to inform SUNCOM users who dial incorrectly that they made an error in dialing and to advise them of the proper procedure. There are two possible dialing errors: not dialing "1" before a 10-digit non-SUNCOM number, and dialing "1" before a 7-digit SUNCOM number.

Attached is a report provided to Robert Davis, Transport Engineering Supervisor, by Sprint Centel on the number of incorrectly dialed SUNCOM calls in Tallahassee for one hour (10:00-11:00 A.M.) for each day of the week beginning October 14, 1996. Each incorrectly dialed 7-digit number is recorded under the heading SCTLH7_ANNS, and each incorrectly dialed 10-digit number is recorded under the heading SCTLH10_ANNS. The average number of incorrectly dialed SUNCOM calls per day in Tallahassee can be calculated as follows: add the five hourly amounts in each category, divide by 5 days, and multiple by 8 hours. The total number of incorrectly dialed SUNCOM calls would then be the sum of the two categories, i.e., 7 and 10 digit.

EXAMPLE:

<u>Date</u>	<u>7-Digit</u>	<u>10-Digit</u>
10-14	80	188
10-15	78	166
10-16	70	158
10-17	108	144
10-18	<u>75</u>	<u>157</u>
	411	793

411 divided by 5 days x 8 hours = 656/day

793 divided by 5 days x 8 hours = 1264/day*

Total 1920/day

****In the prefiled testimony only the 10-digit category of calls were reported (page 7, line 25).**

INCORRECTLY
DIALED
CALLS
EACH DAY
IN TALLAHASSEE
IE, 1+

**Number of Calls Dialed Correctly
Via the Tallahassee SUNCOM Dialing Switch**

FPSC Deposition Request: Provide information on how many SUNCOM calls are dialed correctly by Tallahassee SUNCOM customers.

The number of correctly dialed numbers on the SUNCOM Network in Tallahassee can be determined by reducing the total number of SUNCOM calls by the number of incorrectly dialed SUNCOM numbers (Late Filed Exhibit GWM-10). To determine the total number of SUNCOM calls in Tallahassee, an average per day is determined from two reports provided to Robert Davis, Transport Engineering Supervisor, by Sprint Centel (see Attachment). These reports provide the number of SUNCOM calls originating at the Tallahassee node in 30-minute increments for a two-hour period in the morning of December 3, 1996, 9:00-11:00 a.m., and a two-hour period in the afternoon of December 3, 1996, 2:00-4:00 p.m.

The number of calls per 30-minute period appears under the column heading VFGTOTAL, and directly under the word MEMBERS. Adding these 30-minute increments for the two periods will account for four hours of an eight-hour day; therefore, multiplying by 2 will approximate the total number of SUNCOM calls placed in an 8-hour day. From this, the number of incorrectly dialed SUNCOM calls, as determined in Late Filed Exhibit GWM-10 above, can be subtracted, which will yield the number of correctly dialed calls.

EXAMPLE:	<u>Time</u>	<u>Number of Calls</u>
	9:00 - 9:30 a.m.	4,045
	9:30 - 10:00 a.m.	4,395
	10:00 - 10:30 a.m.	4,647
	10:30 - 11:00 a.m.	4,585
	2:00 - 2:30 p.m.	4,318
	2:30 - 3:00 p.m.	4,338
	3:00 - 3:30 p.m.	4,385
	3:30 - 4:00 p.m.	<u>4,566</u>
		35,279 (4 hours)
	Total SUNCOM Calls/Day = 35,279 x 2	70,558
	Incorrectly Dialed SUNCOM calls/Day (7 and 10-digit dialed calls)	<u>1,920</u>
	Total Number of Correctly Dialed SUNCOM Numbers/Day	68,638
