

VOTE SHEET

DATE: January 7, 1997

RE: DOCKET NO. 961198-EI - Petition for approval of commercial/industrial new construction research project by Florida Power & Light Company.

Issue 1: Recommendation that the Commission deny Florida Power & Light Company's Commercial/Industrial (C/I) New Construction Research Project. Preliminary information indicates that the proposed research project will not yield a cost-effective result. Furthermore, the proposed research project appears to be repetitious of an existing DSM program currently offered by Florida Power Corporation. In addition, FPL's petition contains no clear proposal as to how results from sample points will be extrapolated to the whole system nor does the petition state whether any kW or kWh savings from the research will count toward meeting goals.

**DENIED**

*The Company will implement its program. If it becomes obvious that the program is not cost-effective, the program does not have to be carried to its conclusion.*

Vote Sheet

Docket No. 961198-EI

January 7, 1997

Issue 2: Recommendation that, if the Commission approves Florida Power and Light Company's (FPL) Commercial/Industrial (C/I) New Construction Research project, FPL should allocate individual research project cost to the rate class(es) to which research projects are targeted. Allocation of individual research project cost to the rate classes to which the research project is targeted, will diffuse the impact of the C/I New Construction Research project being used as a competitive tool.

**DENIED**

Issue 3: Recommendation that, if no person whose substantial interests are affected by the Commission's proposed agency action files a protest within 21 days of the issuance of this order, this docket be closed.

**APPROVED**
