CUSTOM CALLING SERVICE

A. Basic Feature Definitions

11. Warm Line - This service places a call to a pre-selected number without the caller dialing any digits. The call is placed after the receiver is taken off the telephone set and a number is not dialed within a specified time. Warm line is particularly useful for elderly, handicapped or young people.
12. Remote Access - Call Forward allows customer to activate and deactivate Call Forward from any access line, remotely, rather than only from the base station.
13. Automatic Off-Hook Dialing - This permits a customer to designate a pre-authorized telephone number, either the operator or any 7 digit number, which will be automatically connected when the customer goes off-hook with his telephone.

definitions
here

B. Advanced Feature Definitions

1. Personal Ringing - Provides two or more different phone numbers and rings for a single telephone line. Used to distinguish incoming calls.
2. Do Not Disturb (DND) - Allows a customer to prevent incoming calls from ringing their line by diverting them to a tone or recorded announcement (determined by company facility specifications). A personal identification number (PIN) is provided to the customer which will override the DND feature and allow the call to ring to the premises.

Section 42, Page 3

14.75

Visual Message Waiting Indication - This feature allows the customer to receive a signal on the message waiting indicator lamp of the station set. Subscribers that wish to utilize this service must subscribe to a voice-mail service and provide the customer premise equipment (Lamp) needed to support this feature.

(N)

15.76

Audible Message Waiting Indication - This feature allows the customer to receive an audible signal (Stutter Dial Tone) when they have a message. Subscribers that wish to utilize this service must subscribe to a voice-mail service.
