TARIFF FORMAT SHEETS

A. **Sheet Numbering** -- Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.

B. **Sheet Revision Numbers** -- Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the FPSC. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc., the FPSC follows in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the sheet currently in effect.

C. **Paragraph Numbering Sequence** -- There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.
- 2.1.
- 2.1.1.
- 2.1.1.A.
- 2.1.1.A.1.
- 2.1.1.A.1.(a).
- 2.1.1.A.1.(a).I.
- 2.1.1.A.1.(a).I.(i).
- 2.1.1.A.1.(a).I.(i).(1).

D. **Check Sheets** -- When a tariff filing is made with the FPSC, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the FPSC.

SECTION 3. - DESCRIPTION OF SERVICE**3.1. Timing of Calls****3.1.1. When Billing Charges Begin and Terminate For Phone Calls**

A Customer's, Distributor's or End User's long distance usage charge is based on the actual usage of EarthCall Communications Corporation's network. Usage begins when the called party picks up the receiver (i.e., when two-way communication, often referred to as "conversation time," is possible). The time at which the called party picks up is determined by either hardware answer supervision whereby the local telephone company sends a signal to the switch or the software utilizing audio tone detection. When software answer supervision is employed, up to sixty (60) seconds of ringing is allowed before it is billed as usage of the network. A call is terminated when the calling or called party hangs up.

3.1.2. Billing Increments

Unless otherwise specified in this tariff, the minimum call duration for billing purposes is one (1) minute for a Completed Call. Calls beyond one (1) minute are billed in one- (1-) minute increments.

3.1.3. Per Call Billing Charges

Billing will be rounded up to the nearest penny for each call.

3.1.4. Uncompleted Calls

There shall be no charges for uncompleted calls.

3.2 Billing of Calls

All charges due to Carrier are payable at any agency duly authorized to receive such payments. Any objection to billed charges should be promptly reported to the Carrier. Adjustments to a Customer's or Distributor's bill or an End User's account shall be made to the extent that records are available and/or circumstances exist that reasonably indicate that such charges are not in accordance with approved rates or that an adjustment may otherwise be appropriate.

Interest charges of one and one-half percent (1 1/2%) per month, or the maximum legal rate if lower, may be assessed on all unpaid balances more than thirty (30) days old.

3.3.2 Returned Check Charges

Carrier will impose a charge for returned checks as follows:

<u>Charge</u>	<u>Amount of Check</u>
\$25.00	\$49.99 or less
\$30.00	\$50.00 up to \$299.99
The lesser of \$40.00 or 5% of the amount of the check	\$300.00 and greater

3.3.3 Restoration of Service

A reconnection fee of twenty-five dollars (\$25.00) per occurrence is charged when service is re-established for Customers who had been disconnected for nonpayment.

3.4 Calculation of Distance

SECTION 3. - DESCRIPTION OF SERVICE (cont'd.)

The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved. The Company uses the rate centers that are produced by Bell Communications Research in the NPA-NXX V & H Coordinates Tape and Bell's NECA Tariff No. 4.

FORMULA:

$$\sqrt{\frac{(V1 - V2)^2 + (H1 - H2)^2}{10}}$$

EXAMPLE: Distance between Miami and New York City --

	<u>V</u>	<u>H</u>
Miami	8,351	529
New York	<u>4,997</u>	<u>1,406</u>
Difference	3,354	-877

Square and add: $11,249,316 + 769,129 = 12,018,445$

Divide by 10 and round: $12,018,445 / 10 = 1,201,844.50$

Take square root and round: $1,201,845 = 1,096.3$
 $= 1,097 \text{ miles}$

3.5 Minimum Call Completion Rate

A Customer, Distributor or End User can expect a call completion rate (number of calls completed / number of calls attempted) of not less than 90% during peak use periods for all FGD services ("1+" dialing).
