TARIFF FORMAT

- A. Sheet Numbering - Sheet numbers appear in the upper-right corner of the sheet. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between existing sheets with whole numbers, a decimal is added. For example, a new sheet added between Pages 34 and 35 would be 34.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper-right corner of the sheet. These numbers are used to determine the most current sheet version on file with the Commission. For example, 4th Revised Sheet 34 cancels 3rd Revised Sheet 34.
- C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level of coding.

 - 2.1.1.A.1.(a).I.(i).(1)
- D. Check Sheets - When a tariff filing is made with the Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new sheets are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some sheets). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current sheet on file with the Commission.

SECTION 3 - DESCRIPTION OF SERVICE AND RATES**3.1 Call Timing**

The customer's monthly usage charges are based upon the total number of minutes use by the customer and the service options subscribed to. Usage begins when the called party picks up the receiver, (i.e. When two-way communications, often referred to as "conversation time," is possible.). When the called party picks up is determined by hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. When software answer supervision is employed, up to sixty (60) seconds of ringing is allowed before it is billed as usage of the network. A call is terminated when the calling or called party hangs up. There are no charges incurred for uncompleted calls.

3.2 Start of Billing

For billing purposes, the start of service is the day following acceptance by the customer of Carrier's service or equipment. The end of service date is the day on which service was discontinued.

3.3 Interconnection

Service furnished by Carrier may be interconnected with services or facilities of other authorized communications common carriers and with private systems, subject to the technical limitations established by Carrier.

Interconnection with the facilities or services of other carriers shall be under the applicable terms and conditions of other carriers' tariffs.

The Customer is responsible for all costs at his premises, including customer personnel, wiring, electrical power, and the like incurred in his use of carrier's service.

The customer shall comply with the minimum protective criteria generally accepted in the telephone industry and other criteria as may be prescribed by Carrier. The customer shall ensure that his terminal facilities are of the proper mode, band-width, power, data, speed, and signal level for the intended use of the customer, and that the signals do not damage Carrier's equipment, injure personnel or degrade service to other customers.

If the customer fails to maintain and operate his terminal equipment properly, resulting in the occurrence or possibility of harm to Carrier's equipment or personnel, or impairment to the quality of service to other customers, Carrier may, upon written notice, require the use of protective equipment at the customer's expense. If this fails to produce satisfactory quality and safety of service, Carrier may, upon written notice, terminate the customer's service.
