Spruce Creek Water Plant Modification For Additional Capacity And Fire Flow \$90,192.00

PROJECTED GROWTH - 10 YEARS

The present Spruce Creek area contains 709 active connections with 148 additional services installed that will become active in 10 years.

We anticipate that 826 installed or proposed services for Ocala Waterway, Forest Glen, and Whispering Pines will be in use in the next 10 years.

This would give us a total of 974 new connections for a grand total of 1683 customers served from the Spruce Creek System.

We do not anticipate any changes or modifications to the supply system.
