===NOTE=====5/12/99==1:39pm=====
CC: Catherine Bedell, Sandy Moses, Tommy Williams

The order in this docket just went out yesterday. Unfortunately, we had the cert numbers reversed. The cert that is being canceled is 3595, and we show 4020 is being canceled. TresCom actually holds Cert 3595--the one which SHOULD be canceled--and Primus holds 4020. We set it up wrong and it went to agenda and finally to order wrong. Is it possible to do an a-order (and not go back to ag)? Order number is PSC-99-0939-PAA-TI. Kay

What's your vote--seems like a scrivener's error to me.

Fwd=by:=Noreen=Davis==5/13/99=10:59am=====

If it went to agenda wrong, then it's not a scrivener's error and needs to go back to agenda. Otherwise the order would be inconsistent with the vote sheet.

Was the "rec" wrong or the vote sheet or what? You can see the answer from Noreen. If we gave the Commissioners the wrong in fo to vote on, we have to go back. If the error was on the vote sheet, it can be corrected??? If the error was only on the order, it would be easy to fix.

When the docket was opened, the certificate numbers were reversed. The error was not discovered until that order went out. Unfortunately, this sounds like it must go back to agenda.

Do we need to fix CMS?

Fwd=by:=Kay=Flynn=====5/17/99==9:04am=====
Fwd to: Linda Williams

Yes. Please do so based on this e-mail.
