Docket No. 981444-TP

Filed: October 15, 1999

**AERIAL COMMUNICATIONS, INC.'S
NOTICE OF INTENT TO REQUEST
CONFIDENTIAL CLASSIFICATION**

PLEASE TAKE NOTICE that Aerial Communications, Inc. ("Aerial"), pursuant to Rule 25-22.006(3)(a), Florida Administrative Code, intends to request confidential classification for its response filed on this date to the Florida Public Service Commission staff's data request served in the above-referenced docket by letter dated September 24, 1999 from Walter D'Haeseleer, Director of the Division of Communications. A copy of the September 24, 1999 staff data request is attached to this Notice. The confidential data and information contained in Aerial's response to the data request is highlighted in yellow. Aerial will seek continued confidential handling by filing a Request for Confidential Classification within 21 days.

Respectfully submitted,

KENNETH A. HOFFMAN, ESQ.

Re: Data Request in Docket No. 981444-TP

Dear Telecommunications Carrier:

Since 1995 the telecommunications industry in Florida has been in a continuous process of implementing new area codes. The Florida Public Service Commission (FPSC) believes that the adoption of number conservation measures is in the public interest, and the FPSC recently received some additional authority from the Federal Communications Commission in this regard. Therefore, the FPSC is undertaking a number utilization study of all area codes in Florida in an attempt to determine whether numbering resources are being used in an efficient manner. The results of this study will be discussed at a workshop scheduled for October 20, 1999 at 9:00 a.m. in Room 148 of the Easley Building.

In an attempt to simplify the data collection process, staff has drafted two spreadsheets (See Attachments I and II) and a list of applicable definitions. Your cooperation in completing this study is greatly appreciated. Please submit your response by **Friday, October 15, 1999**.

If you have any questions, please contact Mr. Levent Ileri at (850) 413-6562.

Sincerely,

Walter D'Haeseleer
Director

For the purposes of data collection, the definitions used in the spreadsheet are:	
NPA	Number Plan Area (i.e., area code)
NXX	Prefix (i.e., the first three digits of a telephone number)
Contamination	Any block in which end user customers have been assigned telephone numbers
Number of Blocks With Less Than 10% Contamination	Example: In an NXX, there are 10,000 telephone numbers. If your company has assigned 1500 telephone numbers, then the ratio of 1500 to 10000 (=0.15) is the contamination rate. Multiplying this number by 100 yields the percent contamination, which in this case is 15%. This calculation would be repeated for every NXX within the same NPA. Similarly, in a 1,000-block, with 50 customers, the contamination is $50/1000 = 0.05$, or 5%. Count the numbers of blocks where the contamination is less than 10%.
Disconnected Numbers	Telephone numbers which are available for reassignment
Reserved Numbers	Any telephone number reserved for special purposes (vanity numbers, test numbers, service numbers)
Reserved Blocks	Any 1,000-block that has been set aside by the Pooling Administrator for some specific future use or purpose
Average Growth	Average number of new NXXs or 1,000 blocks assigned per month
