IV. TARIFF FORMAT

- A. **Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the Tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. **Page Revision Numbers** -- Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Florida Public Service Commission. For example, the 4th Revised Page 14 cancels the 3rd Revised Page 14.
- C. **Paragraph Numbering Sequence** -- There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- I.
 - I.A.
 - I.A.1.
 - I.A.1.(a).
 - I.A.1.(a).(i).
 - I.A.1.(a).(i).I.
 - I.A.1.(a).(i).I.(i).
 - I.A.1.(a).(i).I.(i).(1).
 - I.A.1.(a).(i).I.(i).(1).(a).
- D. **Check Sheets** -- When a Tariff filing is made with the Florida Public Service Commission, an updated check sheet accompanies the Tariff filing. The check sheet lists the pages contained in the Tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages.) The Tariff user should refer to the latest check sheet to find out if a particular page is the most current on file with the Florida Public Service Commission.

P. **Dispute Resolution Program**

In the event of any dispute, claim, or controversy arising out of or relating to any Service set forth in this tariff, the parties to such dispute or controversy agree to first attempt to resolve the dispute informally and promptly through good faith negotiations. The parties shall cooperate with each other during the negotiations and make every effort to resolve the dispute as fairly and quickly as possible. In the event that the controversy is not resolved by informal negotiation, it shall be subject to the arbitration provisions set forth below.

Except as provided below, any dispute, claim, or controversy arising out of or relating to any Service set forth in this tariff, or any dealings between Carrier and/or its employees, on the one hand, and Customer, on the other hand, shall be resolved by binding arbitration before the American Arbitration Association ("AAA") in accordance with the Federal Arbitration Act. In the event claims are asserted against multiple parties, some of whom are not subject to these arbitration provisions, the parties agree, to the extent allowed by law, to sever the claims subject to these arbitration provisions and resolve them in accordance with these provisions.

IX. DESCRIPTION OF SERVICE

A. Timing of Calls

1. On calls other than Operator Service calls, usage begins when the called party picks up the receiver. When the called party picks up is determined by hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. When hardware answer supervision is unavailable, and software answer supervision is employed, up to 60 seconds of ringing is allowed before it is billed as usage of the network. A call is terminated when the calling party hangs up.
2. WxC shall not bill for unanswered telephone calls in areas where equal access is available. Where equal access is not available, WxC shall not knowingly bill for unanswered telephone calls.
3. Unless otherwise specified in this tariff, the minimum call duration for billing purposes is 1 (one) minute.
4. Unless otherwise specified in this tariff, usage is measured and rounded to the higher full minute for billing purposes.

B. Calculation of Distance

1. Usage charges for all mileage-sensitive products are based on the airline distance between Rate Centers associated with the originating Usage charges for all mileage-sensitive products are based on the and terminating points of the call.

The Rate Centers of a call are determined by the area codes and exchanges of the origination and destination points.

The distance between the Rate Center of the Aggregator's equipment and that of the destination point is calculated in the following manner by using the "V" and "H" coordinates found in AT&T FCC Tariff No. 10:

Step 1 - Obtain the "V" and "H" coordinates for the Rate Centers of the subscriber's switch and the destination point.

Step 2 - Obtain the difference between the "V" coordinates of each of the Rate Centers. Obtain the difference between the "H" coordinates

Step 3 - Square the difference obtained in Step 2.

Step 4 - Add the squares of the "V" difference and "H" difference obtained in Step 3.

Step 5 - Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.

Step 6 - Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the Rate Centers

17. **Directory Assistance Service** furnishes telephone numbers or other information when calls are placed to a LEC's Directory Assistance office that is located outside the calling party's area code and crosses Local Access Transport Area (LATA) boundaries. This service is normally accessed by dialing the area code plus 555-1212.

Directory Assistance Service provides the calling party with the following type of information from the LEC's Directory Assistance records: the requested telephone number; or information that the requested telephone number cannot be found. The Directory Assistance Operator will furnish up to a maximum of three of these items per call and limited to a single numbering plan.

- (a) The Directory Assistance charge plan applies to all InterLATA Foreign Number Plan Area (FNPA) Directory Assistance calls which cross Local Access Transport Area (LATA) boundaries with the exception of home NPA or "411" dialing within local area code.
- (b) The InterLATA Directory Assistance charge plan does not apply to calls placed to 1-800-555-1212.
- (c) Directory Assistance Service may be accessed utilizing Switched Access or Dedicated Access.
18. **Debit Card Service** allows a Customer to arrange for payment for telecommunication services prior to using the services. The Debit Card is available to any member of the public. To place a Debit Card call, the Customer dials an 800 number furnished by Carrier. After calling such 800 number, the computer prompts the Customer to enter certain information, such as an authorization code and the destination number. The Customer is then connected to the called number. In real time, the charge for the call is deducted from the remaining usage. If the Debit Card usage expires prior to the Customer completing the call, a recorded announcement will so advise the Customer, and the call will be disconnected. By accepting or using the card, the Customer assumes complete liability for the card in the event it is lost, stolen or if unauthorized use occurs. Carrier is not responsible in such cases and no replacement card or time will be issued. The card is non-refundable, cannot be cancelled and has no surrender value. The card expires on the earlier of the following: (i) three (3) months after date of first usage; or (ii) the expiration date listed on the card.
