**Re:** Florida Power & Light Company's Emergency Plan

Dear Mr. Mills:

Consistent with Commission Rule 25-6.0185, Florida Power & Light Company (FPL) has reviewed its fuel emergency plan and has concluded that no substantive changes to its plan are required at this time and that the current plan continues to be adequate. Enclosed herewith for your reference is an updated copy of FPL's plan which includes non-substantive changes such as reformatting, the addition of an appendix to include a glossary of terms and definitions, corrections reflecting organization and title changes, and, in a few instances, more detailed descriptions of existing processes or components of the existing plan.

Should you have any questions, please do not hesitate to contact me at (561) 691-7101.

Sincerely,

*R. Wade Litchfield*
