Our first knowledge of this  
application was received in a  
letter dated August 16, 2002  
by the mysterious Island Environmental  
Utility and by their apparent legal  
representative Mr. Martin Friedman.

Are the principles of this company  
hiding from us? No notice or  
information prior to the application was  
given as to who this company belonged  
to.

I have since spoken to Mr. Martin  
Friedman, the legal counsel for  
Island Environmental Utility, Inc.,  
who informed me that Mr. Dean  
Beckstead and Mr. Jack Boyer are  
major participants in this company.

You may not know that recently  
a central water system and supply

was proposed by the Little Gaperilla Island Utility, headed by Mr. Jack Boyer. It is my understanding that money was collected from approximately twenty residents, but there is no visible indication of any progress in implementing this water system to date.

Past performance by Mr. Boyer does not make me optimistic about yet another project, i.e. wastewater, by this gentleman, or its success.

Additional concerns:

1. Cost to residents for installation
2. Rates
3. Right of way (there are no roads only sandy paths)
4. Disturbing the very sensitive ecology of Don Pedro State Park on Don Pedro Island.

This project is neither wanted or needed and we strongly object to the project and its implementation

Sincerely,  
John & Zoe Boyer
