# PEOPLES GAS SYSTEM BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

Docket No. 020384-GU

In Re: Application for a rate increase by Tampa Electric Company d/b/a Peoples Gas System.

**Submitted for Filing:** 11/12/2002

REBUTTAL TESTIMONY AND EXHIBITS OF:

**BRUCE NARZISSENFELD On Behalf of Peoples Gas System** 

12336 NOV 128

2	A.	My name is Bruce Narzissenfeld and my business address is 702 N.
3		Franklin Street, Tampa, Florida 33602.
4	Q.	BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?
5	A.	I am employed by Peoples Gas System ("Peoples" or the "Company"), as
6		Controller.
7	Q.	ARE YOU THE SAME BRUCE NARZISSENFELD WHO HAS
8		PREVIOUSLY FILED DIRECT TESTIMONY ON BEHALF OF
9		PEOPLES IN THIS PROCEEDING?
10	A.	Yes.
11	Q.	WHAT IS THE PURPOSE OF THIS REBUTTAL TESTIMONY?
12	A.	My rebuttal testimony is directed to several adjustments proposed by the
13		witnesses for the Office of Public Counsel ("OPC") and Mr. Roger
14		Fletcher, a Utility Systems Engineer employed by the Commission.
15	Q.	CAN YOU PROVIDE A BRIEF OUTLINE OF THE
16		ADJUSTMENTS YOU WILL BE DISCUSSING?
17	A.	Yes. I will be providing testimony regarding the following OPC and / or
18		Commission Staff adjustments:
19		Accumulated deferred income tax increase related to bonus tax
20		depreciation
21		• Expense reduction related to executive stock grants and
22		incentive compensation
23		• Expense reduction related to Supplemental Executive
24		Retirement Plan (SERP) cost allocated from TECO Energy

1 Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

1		<ul> <li>Expense reduction related to advertising</li> </ul>
2		Expense reduction related to sales and marketing
3		Expense reduction related to rate case expense
4		Expense reduction related to the meter sampling program
5		• Rate Base reduction related to non-utility use of land and
6		structures
7	Q.	DO YOU AGREE WITH MS. DERONNE'S PROPOSED
8		ADJUSTMENT OF \$7,992,760 TO ACCUMULATED DEFERRED
9		INCOME TAXES TO REFLECT THE IMPACT OF BONUS TAX
10		DEPRECIATION CONTAINED IN THE ECONOMIC STIMULUS
11		PACKAGE SIGNED INTO LAW IN MARCH 2002?
12	A.	No. The Company agrees that an adjustment is appropriate for the impact
13		of bonus depreciation on accumulated deferred income taxes; however, we
14		disagree with Ms. DeRonne's calculation of the amount.
15	Q.	HOW DOES YOUR CALCULATION OF BONUS DEPRECIATION
16		DIFFER FROM MS. DeRONNE'S?
17	A.	My calculation differs in two respects. First, my calculation reflects
18		Peoples' capital spending as revised in Exhibit (JPH-2) prepared by
19		Company witness Mr. Higgins. Second, as stated in her testimony and on
20		Exhibit (DD-1), Schedule D, Page 2, Ms. DeRonne assumes 100% of
21		the Company's projected additions qualify for bonus depreciation. She
22		also testifies that "the Company's tax department would be more
23		qualified to make an exact determination" of which additions will qualify
24		for bonus depreciation. The Company's calculation on Exhibit

1		(BNN-2) reflects the tax department's review of capital projects and the
2		exclusion of those additions related to contracts entered into prior to
3		September 11, 2001.
4	Q.	WHAT HAVE YOU CALCULATED THE INCREASE IN
5		ACCUMULATED DEFERRED INCOME TAXES TO BE
6		RESULTING FROM BONUS TAX DEPRECIATION?
7	A.	The Company has calculated an adjustment of \$4,278,225 to the 2003
8		projected test year 13-month average accumulated deferred income tax
9		balance, which is detailed on Exhibit(BNN-2). Additionally, it should
10		be noted that accumulated deferred income taxes are temporary in nature
11		and will eventually reverse. Therefore, while the new law does have an
12		impact on the Company's 2003 accumulated deferred income taxes
13		included in capital structure, the Company's revenue requirements in
14		future years will be adversely impacted when these temporary differences
15		reverse.
16	Q.	DOES THE RECOGNITION OF BONUS DEPRECIATION ON
17		ACCUMULATED DEFERRED INCOME TAXES REQUIRE ANY
18		OTHER ADJUSTMENT TO THE COMPANY'S CAPITAL

- 19 **STRUCTURE?**
- Yes. To appropriately reflect the Company's capital structure, it is 20 A. necessary to decrease short-term debt by the identical amount that 21 accumulated deferred income taxes are increased in connection with the 22
- recognition of this bonus depreciation. 23
- WHY IS THE ADJUSTMENT TO SHORT-TERM DEBT 24 Q.
- **APPROPRIATE?** 25

- 1 A. To the extent bonus depreciation generates cash, this cash will be used to
  2 reduce the Company's short-term borrowings.
- Q. OPC'S WITNESS CICCHETTI PROPOSED THAT THIS

  ADJUSTMENT BE MADE PRO-RATA OVER ALL INVESTOR

  SOURCES OF CAPITAL. WHY IS THIS NOT APPROPRIATE?
- 6 A. It is not appropriate because the other sources will not be affected by this 7 adjustment. In addition to short-term debt, the other investor sources of 8 capital are customer deposits, long-term debt and equity. The Company 9 will not refund deposits to customers. The Company, in all likelihood, 10 will not reduce long-term debt because of "make-whole" provisions in the 11 agreements as well as the relatively small dollar amounts in relation to the total debt outstanding. The Company's equity would not be affected 12 13 because the Company already dividends 100% of its earnings to its parent. 14 Thus, what the Company would actually do with the additional funds 15 generated by bonus depreciation is reduce short-term debt, which is why 16 the appropriate adjustment is to short-term debt, rather than a pro-rata 17 application over all investor sources of capital.
- Q. **HAVE** YOU MS. 18 REVIEWED **DeRONNE'S PROPOSED ADJUSTMENT** 19 TO **OPERATIONS AND MAINTENANCE** ("O&M") EXPENSE TO REMOVE PROJECTED EXECUTIVE 20 21 STOCK GRANTS, AND MR. SCHULTZ'S ADJUSTMENT TO 22 REMOVE INCENTIVE COMPENSATION COSTS ALLOCATED 23 FROM TECO ENERGY?
- 24 A. Yes.

#### 1 Q. HOW DO YOU RESPOND TO THESE PROPOSED

#### 2 **ADJUSTMENTS?**

- A. In her testimony, Ms. DeRonne proposed an adjustment of \$444,000 to reduce O&M expense for executive stock grants. Mr. Schultz proposes a similar adjustment of \$289,975 to eliminate restricted stock as shown on
- 6 Exhibit\_\_\_\_ (HWS-1), Schedule H. Neither of these adjustments should
- 7 be made.

### 8 Q. PLEASE EXPLAIN YOUR RATIONALE FOR NOT MAKING

#### 9 THESE ADJUSTMENTS.

Incentive compensation, including executive stock grants, is an integral component of the total compensation package provided to officers. At both TECO Energy and Peoples, the determination of compensation for officers is administered by the four member Compensation Committee of the Board of Directors, which is composed entirely of independent, nonemployee directors. This Committee recommends to the full Board the total compensation package for officers. The objective of the Company's compensation program is to attract and retain the talent needed to manage and build the Company's business. The Committee seeks, therefore, to provide compensation that is competitive. To assist the Committee in its determination of fair and appropriate compensation, the compensation and benefits consulting firm Towers Perrin performs annual studies of the value of total compensation provided to officers, as it compares to that paid in the energy services industry and in general industry. A copy of the most recently received executive summary from Towers Perrin is attached as Exhibit (BNN-3). In determining an officer's compensation, the

Committee first determines the appropriate total value of compensation
and then allocates this total amount among base salary, annual incentive
awards and long-term incentive awards. Towers Perrin compared officers
compensation to a composite in which the energy services industry was
weighted at 60% and general industry at 40%. The results of this study
found that officers' cash compensation (which is defined as base salary
plus annual incentive award) was at the percentile and long-term
incentive awards (which consist of equity-based grants in the form of
stock options and restricted stock) were at the percentile.
Accordingly, the inclusion of both the incentive award and the stock
grants as components of officers' compensation yields results that are
comparable with both the energy services industry and general industry.
These awards and grants are appropriate components of the compensation
package necessary to attract and retain the talent needed to manage and
build the company's business. They are components of a total
compensation package and do not represent "additional," "extra" or
"excessive" compensation as asserted by Ms. DeRonne and Mr. Schultz.

- 18 Q. DO YOU AGREE WITH MR. SCHULTZ'S PROPOSED
  19 ADJUSTMENT TO REMOVE SERP COSTS ALLOCATED FROM
  20 TECO ENERGY?
- A. No. Mr. Schultz proposes an adjustment of \$159,647 on Exhibit\_\_\_\_\_\_

  (HWS-1), Schedule H. This adjustment should not be made.

## 1 Q. PLEASE EXPLAIN YOUR RATIONALE FOR NOT MAKING 2 THIS ADJUSTMENT.

3

4

11

12

13

14

15

16

17

18

19

20

21

22

23

24

A.

The provision of a SERP is an integral component of the total benefits package provided certain officers of the corporation. The objective of the Company's executive benefit program is to assist in the attraction and retention of the talent needed to manage and build the Company's business. Oversight of the corporation's executive benefit program is the responsibility of the four member Compensation Committee of the Board of Directors, which is composed entirely of independent, non-employee directors. This Committee recommends to the full Board benefits for officers of the corporation. The Committee seeks to provide a comprehensive benefit program that is market competitive. To assist the Committee in evaluating the market competitiveness of the corporation's executive retirement program, the compensation and benefits consulting firm Towers Perrin recently conducted a study of the executive retirement program. Part of the study was to determine how TECO Energy's SERP program compares to those provided in the energy services sector, as well as in general industry. Towers Perrin concluded that the SERP program of TECO Energy is within the boundaries of competitive practices for an organization of TECO Energy's size, stature, and industry profile. The program is fully competitive with both general industry and the energy industry. The SERP is a component of a total benefit package and does not represent "additional," "extra" or "excessive" compensation as asserted by Mr. Schultz. Therefore, no adjustment should be made.

1 <b>Q.</b>	HAVE YOU REVIEWED THE ADVERTISING EXPENSE
2	ADJUSTMENT PROPOSED BY MS. DeRONNE AND PRESENTED
. 3	ON HER EXHIBIT(DD-1), SCHEDULE C-4?
4 A.	Yes. In general, the Company finds Ms. DeRonne's proposed adjustment
5	of \$127,757 reasonable. Staff witness Mr. Rohrbacher has also reviewed
6	the advertising that is referred to by Ms. DeRonne and has proposed an
7	adjustment of \$132,285. The Company 's concern is that only one of
8	these adjustments should be made, not both.
9 <b>Q</b> .	HAVE YOU REVIEWED MS. DeRONNE'S TESTIMONY
10	REGARDING PEOPLES' OUTSOURCING OF ITS SALES AND
11	MARKETING FUNCTIONS TO TECO PARTNERS?
12 A.	Yes. She makes a number of observations regarding Peoples' decision to
13	outsource these functions, and on her Exhibit (DD-1), Schedule C-3,
14	ultimately proposes an adjustment to reduce sales and marketing expense
15	in the 2003 projected test year by \$802,122.
16 <b>Q.</b>	DISREGARDING FOR A MOMENT THE PRECISE
17	ADJUSTMENT PROPOSED BY MS. DeRONNE, ARE THE
18	OBSERVATIONS SHE MAKES REGARDING THE COMPANY'S
19	DECISION TO OUTSOURCE THESE FUNCTIONS ACCURATE?
20 A.	No. Ms. DeRonne gives the impression that inadequate due diligence was
21	performed in the formation of TECO Partners and in the decision by
22	Peoples to outsource its sales and marketing functions to this organization.
23	The decision to outsource the sales and marketing function was carefully
24	examined and this decision was discussed with the Commission Staff prior

- to commencement as well as disclosed through Peoples' filing of its 2001
- FPSC Annual Report (FERC Form 2).
- 3 Q. MS. DERONNE STATES SHE WAS TOLD BY UNIDENTIFIED
- 4 "COMPANY PERSONNEL" THAT THE COST REDUCTIONS
- 5 PROPOSED AS A RESULT OF OUTSOURCING THESE
- 6 FUNCTIONS WOULD BE 10% IN THE FIRST YEAR, WITH
- 7 ADDITIONAL 3% DECREASES THEREAFTER. IS THIS
- 8 STATEMENT CORRECT?
- A. 9 I have no idea what Ms. DeRonne may have been told, but her fixation on 10 a 10% savings in the first year of the arrangement is simply mistaken. No 11 one in the Company is aware of any documentation indicating that the 12 savings would be 10% in the first year of the arrangement, nor was it ever 13 the expectation of anyone in Peoples' management that a 10% savings 14 would be realized in the first year. If, in fact, Ms. DeRonne was told by 15 "Company personnel" of anticipated 10% cost reductions in the first year, 16 such personnel was or were uninformed of the facts, and/or whatever 17 statement he, she or they may have made was either spoken, or taken by Ms. DeRonne, out of context. No 10% savings from the outsourcing by 18 19 Peoples of its sales and marketing functions was at any time ever 20 contemplated.
- 21 Q. WHAT SAVINGS DID THE COMPANY ANTICIPATE IN THE
- FIRST YEAR?
- A. The savings contemplated were estimated at 3%, which represented the absorption by TECO Partners of salary increases and inflation.

1	Q.	MS. DERONNE HAS TESTIFIED IT IS CORRECT, AS STATED IN
2		MR. SIVARD'S TESTIMONY, THAT THE MFRs INCLUDE
3		REDUCTIONS FOR BOTH 2002 AND 2003 FROM SALES AND
4		MARKETING EXPENSE RECORDED ON THE COMPANY'S
5		BOOKS IN 2001. HOWEVER, SHE HAS ALSO TESTIFIED THAT
6		THE SALES EXPENSE RECORDED IN ACCOUNT 912 FOR 2000,
7		PRIOR TO OUTSOURCING THE SALES AND MARKETING
8		FUNCTION, INCREASED FROM \$3 MILLION IN 2000 TO \$8
9		MILLION IN 2001. IS MS. DeRONNE'S TESTIMONY IN THIS
10		REGARD CORRECT?

- 11 A. Yes, the increase of \$5 million is mathematically accurate. However, it
  12 does not compare the total sales and marketing expense in various
  13 accounts in 2000 with similar accounts in 2001.
- 14 Q. PLEASE EXPLAIN HOW THESE ACCOUNTS SHOULD BE
  15 COMPARED.

- accurate comparison of sales and marketing costs before and after the separation of TECO Partners, Inc.".
- Q. MS. DeRONNE STATES THAT NO COST BENEFIT ANALYSIS
  WAS CONDUCTED BY THE COMPANY PRIOR TO ITS
  DECIDING TO OUTSOURCE THE SALES AND MARKETING
  FUNCTIONS. IS THIS CORRECT?

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

A.

Yes. No formal cost benefit study was performed. However, as stated earlier, the Company carefully reviewed and thought out the decision to outsource its sales and marketing function. The outsourcing arrangement was not a last minute decision. An analysis was conducted and the characterization of how the amounts to be paid under the contract between Peoples and TECO Partners were determined was appropriately described in Peoples' answer to Staff's Interrogatory No. 106. As stated in the Company's answer to that interrogatory, Peoples did not perform a formal "cost-benefit analysis." Peoples performed an in depth analysis of its 2000 expenses to determine the total cost of its sales and marketing activities regardless of where the costs might have been charged (depreciation expense, taxes other than income, G&A expense, etc.). TECO Partners then agreed to perform the same level of sales and marketing for less than Peoples would have otherwise paid. The decision to outsource was a simple matter of getting the same services for less money. Again, stated in simple terms, it was a very easy decision for the Company to make that they could receive, and are now receiving, the same services for less money.

1	Q.	IS PEOPLES GAS THE ONLY COMPANY FOR WHICH TECO
2		PARTNERS PROVIDES SALES AND MARKETING SERVICES?
3	A.	No. Peoples is only one of TECO Partners' 17 customers.
4	Q.	MS. DeRONNE EXPRESSES SOME CONCERNS REGARDING
5		THE CONTRACT BETWEEN TECO PARTNERS AND PEOPLES.
6		CAN YOU ADDRESS HER VARIOUS CONCERNS?
7	<b>A.</b>	Yes. First, Ms. DeRonne expresses concern because the 2001 contract
8		anticipates a payment from Peoples to Partners of \$8.75 million, but when
9		compared to the revised marketing costs for 2000, it was \$8,751,680. She
10		observed that these amounts are very close, and do not reflect a 10%
11		savings. Her observation that the two amounts are very close is correct.
12		However, as I have previously testified, Ms. DeRonne's impression that
13		there would be a 10% savings in the first year of the arrangement is
14		erroneous.
15		Second, Ms. DeRonne was concerned because the agreements
16		involved the shifting of Peoples Gas employees to a non-regulated affiliate
17		company. These shifts of employees were reported on the FPSC Annual
18		Report (FERC Form 2) which contains a specific area for reporting
19		transfers.
20		Third, Ms. DeRonne states that very little information was
21		provided to justify the contract amounts and the level of expenses included
22		in the projected 2003 test year for these agreements. This is simply not
23		the case. First and foremost, the MFRs clearly state that the level of
24		expenses included for the payments required by the Company's contract
25		are projected to decrease 3% from the 2002 contract payments. Aside

from this, the Company firmly believes that it was more than cooperative in providing to the OPC and the Commission Staff virtually every one of the broad categories of documents relating to TECO Partners and the Company's decision to outsource its sales and marketing functions. The Company also responded to numerous interrogatories propounded by both the OPC and the Commission Staff, and responded to all audit requests on the subject made by the Commission's audit personnel. Ms. DeRonne's concerns are simply unfounded.

# . Q. MS. DeRONNE HAS SUGGESTED THAT THE COMMISSION CONSIDER INITIATING A MORE IN-DEPTH INVESTIGATION INTO THE RELATIONSHIP BETWEEN TECO PARTNERS AND PEOPLES GAS SYSTEM. DO YOU AGREE WITH THIS?

Given the complete disclosures as indicated in the Company's FERC Form 2, discussions with the Commission Staff, and representatives of the Office of Public Counsel (including Ms. DeRonne), the audit recently conducted in this rate proceeding, and the Company's responses to voluminous discovery in this case, Peoples believes the investigation suggested by Ms. DeRonne would be redundant. Nevertheless, the Company would not oppose such an investigation because it firmly believes the actions it has taken in connection with the outsourcing of the sales and marketing functions to TECO Partners have been prudent, appropriate, reasonable, and completely "above board."

Q. DO YOU AGREE WITH MS. DERONNE'S PROPOSED

ADJUSTMENT TO SALES AND MARKETING EXPENSE OF
\$802,122?

1 A. No. The entirety of the adjustment is based on a 10% reduction of the
2 Company's 2000 marketing expense as calculated by Ms. DeRonne. As I
3 have previously testified, the 10% reduction is erroneous and unsupported.
4 Therefore, this calculation is not accurate and no adjustment is required or
5 should be made.

## 6 Q. DO YOU AGREE WITH MS. DeRONNE'S PROPOSED 7 ADJUSTMENT TO RATE CASE EXPENSE?

No. The \$60,000 adjustment proposed by Ms. DeRonne in her testimony is not appropriate. The expense proposed by the Company in the MFRs was based on two components: the dollar amount of rate case expense (\$240,000) that the Company at that time estimated it would incur in the case, and the period of time over which this expense should be recovered (two years). Ms. DeRonne's proposed adjustment is directed to the amortization period component, so I will address that component first.

The amortization period chosen is largely a matter of judgment, giving consideration to past history as well as financial impact to the ratepayers. Through the many cost-saving measures implemented by the Company, which have been discussed throughout this proceeding, Peoples has been successful, until now, in avoiding a proceeding for increased rates for more than 10 years. To look at past history, one must go back to the period from 1981 to 1991. During that 10 year period, the Company had five rate cases, or an average of one every two years. The choice of an amortization period is a matter of judgment, and Ms. DeRonne's use of four years is no more supported than the Company's use of two years.

The other component – the expense estimated to be incurred by the Company in this proceeding – is no longer appropriate. The estimate of \$240,000 at the time the Company's MFRs were filed was based on Peoples' experience in its past rate cases. However, the intensity of the discovery conducted in this proceeding has made past history meaningless. As a result, the Company has experienced, and is experiencing, significantly higher costs than have ever been incurred in its prior cases. Among the areas in which these higher costs have been incurred are higher overtime costs as a result of the Company's almost continuous efforts to respond to a vastly increased number of interrogatories and production requests, higher expert/outside witness costs as a result of multiple depositions, and higher legal costs as a result of the significant increase in discovery and resisting a motion to compel discovery from the Company of documents in the possession and control of its affiliates.

## 15 Q. DO YOU HAVE A REVISED PROJECTION OF THE COMPANY'S 16 RATE CASE EXPENSE?

17 A. Yes. The Company's new and more accurate projection of its rate case expense is \$350,000, or an increase of \$110,000.

## 19 Q. WHAT EFFECT WOULD THIS HIGHER RATE CASE EXPENSE 20 HAVE ON THE AMORTIZATION INCLUDED IN THE 21 COMPANY'S MFRs?

A. Based on a two year amortization period, this higher cost would result in an increase in rate case expense amortization of \$55,000. Thus, the amortization of rate case expense included in the projected test year should be increased from \$120,000 to \$175,000.

- 1 Q. ARE YOU FAMILIAR WITH THE ADJUSTMENTS PROPOSED
- 2 **BY MR. FLETCHER IN HIS TESTIMONY?**
- 3 A. Yes.
- 4 Q. DO YOU AGREE WITH THE ADJUSTMENTS PROPOSED BY
- 5 MR. FLETCHER?
- 6 A. I disagree with two of his proposed adjustments. First, Mr. Fletcher
- proposed an adjustment to reduce expenses in Account 878 by \$1,617,598
- 8 related to the Company's meter sampling program. This adjustment is
- 9 discussed at lines 11 through 19 on page 5 of his direct testimony.
- Second, Mr. Fletcher has proposed adjustments reducing rate base to
- reflect non-utility use of land and structures. These adjustments are
- discussed at lines 1 through 19 on page 4 of his direct testimony.
- 13 Q. IS MR. FLETCHER'S PROPOSED ADJUSTMENT OF \$1,617,598
- 14 TO ACCOUNT 878, RELATED TO THE COMPANY'S METER
- 15 **SAMPLING PROGRAM, APPROPRIATE?**
- 16 A. Absolutely not. There are at least two flaws in the stated rationale for the
- 17 adjustment.
- 18 Q. WHAT IS THE COMPANY'S METER SAMPLING PROGRAM?
- 19 A. In 1998, the Company initiated a statistical meter sampling program
- pursuant to Commission Rule 25-7.064, to replace its former 10 year
- 21 meter change-out program. The new program, which was approved by the
- Commission, is a sampling plan which uses military standard sampling
- techniques to identify how many meters will be removed from the field
- and tested to verify they satisfy meter accuracy standards. Based on the
- 25 total number of meters that Peoples has in service, the military standard

establishes 315 as the <u>minimum</u> number of meters that must be tested in order to insure the accuracy of the sample.

## Q. PLEASE EXPLAIN THE FLAWS IN THE ADJUSTMENT PROPOSED BY MR. FLETCHER.

As I stated earlier, the military standard used in the new program establishes 315 as the minimum number of meters that must be tested in order to insure the accuracy of the sample. Mr. Fletcher incorrectly characterizes 315 as being the normal number of meters tested and proposes an adjustment to normalize expenses to that level. This is an incorrect adjustment to make because it assumes the only meters to be tested are those making up the minimum sample. Mr. Fletcher also contradicts his position regarding what is normal by pointing out that "since the initiation of the sampling program in 1998, each year the statistical sample group has failed to meet accuracy requirements." In other words, each year Peoples has been required to test more than the minimum 315 meters, so to say that 315 is "normal" is unsupported by the facts.

## Q. WHAT ARE THE OTHER PROBLEMS WITH MR. FLETCHER'S PROPOSED ADJUSTMENT TO ACCOUNT 878?

A. Even if one was to accept that some normalization is appropriate (which Peoples does not accept), Mr. Fletcher's proposed adjustment to O&M Expense Account 878 is incorrect. In calculating his adjustment, Mr. Fletcher took into consideration Change-Out Installation Expense (estimated at \$63.03 per meter), Meter Removal Expense (estimated at \$13.45 per meter), and Meter Testing Expense (estimated at \$6.00 per

meter). When, in the course of the sampling program, the Company identifies a failed family of meters, the Company initiates a program to retire the meters in the failed family and replace them with new meters. As such, for the failed family of meters, the Change-Out Installation Expense of \$63.03 per meter and the Meter Removal Expense of \$13.45 per meter are charged to capital, not to O&M Expense in Account 878 as suggested by Mr. Fletcher.

A.

## 9 SHOULD BE MADE TO CAPITAL AND O&M EXPENSE 10 RELATING TO THE METER SAMPLING PROGRAM?

No. In the case of the Meter Testing Expense, which is an O&M expense, no adjustment should be made for the reasons stated above; that is, the expense level included in the Company's MFRs is not abnormal or non-recurring. In the case of the Change-Out Installation Expense and the Meter Removal Expense, no adjustment should be made for two reasons. First, as previously stated, the level of meter change-outs is not abnormal. Second, even if it were deemed to be abnormal, accelerated meter retirements, shortened service life, and the associated removal costs are items that are usually dealt with in a depreciation study. In a depreciation study, average service life as well as higher negative salvage (removal cost) are items that are considered in setting appropriate depreciation rates. Thus, it would be inappropriate to make any adjustment to capital in this proceeding because these costs were prudently incurred and the assets are used and useful in providing utility service.

1	Q.	MR.	FLETC	HER	HAS	PRO	POSED	AN	ADJUSTN	MENT

16

17

18

19

20

21

22

23

24

5 A. In general, I do not disagree with Mr. Fletcher's analysis and the 6 methodology used to allocate a portion of certain land and buildings to 7 non-utility. There is, however, one portion of his adjustment that needs to be addressed.

> As indicated by witness J. Paul Higgins, Peoples' capital spending in 2002 and 2003 will be less than was originally included in the MFRs. One of the items included in this reduction in spending for 2003 is the Company's elimination of its South Florida Regional Office. Mr. Fletcher correctly points out that this office will not be used and useful, and has included this in his proposed adjustment. If an adjustment is made to plant in service based on the Company's Exhibit (JPH-2), then that portion of Mr. Fletcher's adjustment relating to the South Florida Regional Office should not be made as this would result in the adjustment's being doubled counted. Exhibit (BNN-5) shows the adjustment proposed by Mr. Fletcher with the portion of the adjustment relating to the South Florida Regional Office removed.

### WHAT ARE THE COMPANY'S PLANS FOR THE SOUTH Q. FLORIDA REGION OFFICE IF THIS BUILDING IS REMOVED?

In lieu of an owned facility, it is anticipated that office space will be Α. leased. There is currently a proposal to lease 4,300 square feet at an

- annual rent expense of \$67,865. As such, rent expense should be
- 2 increased by \$67,865 annually.
- **Q. DOES THIS CONCLUDE YOUR TESTIMONY?**
- 4 A. Yes.

## Towers Perrin

VIA EXPRESS COURIER

PERSONAL AND CONFIDENTIAL

April 5, 2002

Mr. Clint Childress Vice President - Human Resources TECO Energy, Inc. 702 N. Franklin Street Tampa, FL 33601

RE: 2002 Long-Term Incentive Strategy and Grant Guidelines

Dear Clint:

At your request, Towers Perrin has prepared this letter report detailing our recommended long-term incentive strategy and grant guidelines for TECO Energy executives and management. Our analysis and recommendations include prospective grant levels for approximately 34 executives and management employees.

Mr. Clint Childress April 5, 2002 Page 2. EXHIBIT NO.\_ DOCKET NO. 020384-GU PEOPLES GAS SYSTEM (BNN-3) PAGE 2 OF 6

We hope that this letter and the attached Exhibits clearly portray our recommendations for the 2002 long-term incentive grants. Should you have any questions, please feel free to call me directly.

Very truly yours,

John R. Ellerman
