Re: Approval of Amendment to the Interconnection, Unbundling, Resale, and Collocation Agreement Negotiated by BellSouth Telecommunications, Inc. ("BellSouth") and ANEW Broadband, Inc. pursuant to Sections 251, 252 and 271 of the Telecommunications Act of 1996

Dear Mrs. Bayo:

Pursuant the Telecommunications Act of 1996, BellSouth and ANEW Broadband, Inc. are submitting to the Florida Public Service Commission their negotiated agreement for the interconnection, unbundling of specific network elements, collocation of BellSouth networks, and resale of their telecommunications services to ANEW Broadband, Inc.. The agreement was negotiated pursuant to sections 251, 252 and 271 of the Act. The initial agreement between the companies was filed in FPSC Docket No. 020030-TP.

Pursuant to section 252(e) of the Act, the Commission is charged with approving or rejecting this amendment to the negotiated agreement between BellSouth and ANEW Broadband, Inc. within 90 days of its submission. The Act provides that the Commission may only reject such an amendment if it finds that the amendment, or any portion of the amendment, discriminates against a telecommunications carrier not a party to the amendment or if the implementation of the amendment or any portion of the amendment is not consistent with the public interest, convenience and necessity. Both parties agree that neither of these reasons exists as to the amendment they have negotiated. Therefore, this amendment should be deemed effective by operation of law on April 2, 2003.

Very truly yours,

Marshall M. Criser III

Regulatory Vice President (KA)

EXHIBIT 1

5 Unbundled Network Element Combinations

5.1 For purposes of this Section, references to “Currently Combined” network elements shall mean that the particular network elements requested by ANEW BROADBAND are in fact already combined by BellSouth in the BellSouth network. References to “Ordinarily Combined” network elements shall mean that the particular network elements requested by ANEW BROADBAND are not already combined by BellSouth in the location requested by ANEW BROADBAND but are elements that are typically combined in BellSouth’s network. References to “Not Typically Combined” network elements shall mean that the particular network elements requested by ANEW BROADBAND are not elements that BellSouth combines for its use in its network.

5.2 Enhanced Extended Links (EELs)

5.2.1 EELs are combinations of unbundled loops and unbundled dedicated transport as defined in Section 6. BellSouth shall provide ANEW BROADBAND with EELs where they are available.

5.2.2 BellSouth will provide access to EELs in the combinations set forth in Section 5.4.1 below.

5.2.3 EELs are intended to provide service connectivity from an end user’s location through that end user’s SWC to ANEW BROADBAND’s collocation space in a BellSouth central office. The circuit must be connected to the ANEW BROADBAND’s switch for the purpose of provisioning circuit telephone exchange service to the ANEW BROADBAND’s end-user customers. ANEW BROADBAND may connect EELs within the ANEW BROADBAND’s collocation space to other transport terminating into ANEW BROADBAND’s switch. ANEW BROADBAND may also connect the local loops listed in Section 5.3.1.3 to an appropriate Unbundled Local Channel to form additional EELs which terminate in ANEW BROADBAND’s switch. Provided that the entire EEL circuit meets the criteria set forth in Section 5.3.1.3 below, the circuit may, upon ANEW BROADBAND’s request, terminate to a CLEC’s Point of Presence (“POP”). ANEW BROADBAND will provide a significant amount of local exchange service over the requested combination, as described in Section 5.3.1 et seq. below. Upon BellSouth’s request, ANEW BROADBAND shall indicate under what local usage option ANEW BROADBAND seeks to qualify. ANEW BROADBAND shall be deemed to providing a significant amount of local exchange service over the requested combination if one of the options listed in Section 5.3.1 et seq. is met. BellSouth shall have the right to audit ANEW BROADBAND’s EELs as specified in Section 5.3.3 below.

5.3 Conversions from Special Access Service to EELs

5.3.1 ANEW BROADBAND may not convert existing special access services to combinations of loop and transport network elements, whether or not ANEW BROADBAND self-provides its entrance facilities (or obtains entrance facilities from a third party), unless ANEW BROADBAND uses the combination to provide a significant amount of local exchange service, in addition to exchange access service, to a particular customer. To the extent ANEW BROADBAND requests to convert any special access services to combinations of loop and transport network elements at UNE prices, ANEW BROADBAND shall provide to BellSouth a certification that ANEW BROADBAND is providing a significant amount of local exchange service (as described in this Section) over such combinations. The certification shall also indicate under what local usage option ANEW BROADBAND seeks to qualify for conversion of special access circuits. ANEW BROADBAND shall be deemed to be providing a significant amount of local exchange service over such combinations if one of the following options is met:

5.3.1.1 **Option 1:** ANEW BROADBAND certifies that it is the exclusive provider of an end user's local exchange service. The loop-transport combinations must terminate at ANEW BROADBAND's collocation arrangement in at least one BellSouth central office. This option does not allow loop-transport combinations to be connected to BellSouth's tariffed services. Under this option, ANEW BROADBAND is the end user's only local service provider, and thus is providing more than a significant amount of local exchange service. ANEW BROADBAND can then use the loop-transport combinations that serve the end user to carry any type of traffic, including using them to carry 100 percent interstate access traffic; or

5.3.1.2 **Option 2:** ANEW BROADBAND certifies that it provides local exchange and exchange access service to the end user customer's premises and handles at least one third of the end user customer's local traffic measured as a percent of total end user customer local dial tone lines; and for DS1 circuits and above, at least 50 percent of the activated channels on the loop portion of the loop-transport combination have at least 5 percent local voice traffic individually, and the entire loop facility has at least 10 percent local voice traffic. When a loop-transport combination includes multiplexing, each of the individual DS1 circuits must meet this criterion. The loop-transport combination must terminate at ANEW BROADBAND's collocation arrangement in at least one BellSouth central office. This option does not allow loop-transport combinations to be connected to BellSouth tariffed services; or

Exhibit 1

- 5.3.1.3 **Option 3:** ANEW BROADBAND certifies that at least 50 percent of the activated channels on a circuit are used to provide originating and terminating local dial tone service and at least 50 percent of the traffic on each of these local dial tone channels is local voice traffic, and that the entire loop facility has at least 33 percent local voice traffic. When a loop-transport combination includes multiplexing, each of the individual DS1 circuits must meet this criterion. This option does not allow loop-transport combinations to be connected to BellSouth's tariffed services. Under this option, collocation is not required. ANEW BROADBAND does not need to provide a defined portion of the end user's local service, but the active channels on any loop-transport combination, and the entire facility, must carry the amount of local exchange traffic specified in this option.
- 5.3.2 In addition, there may be extraordinary circumstances where ANEW BROADBAND is providing a significant amount of local exchange service but does not qualify under any of the three options set forth in Section 5.3.1 et seq. In such case, ANEW BROADBAND may petition the FCC for a waiver of the local usage options set forth above. If a waiver is granted, then upon ANEW BROADBAND's request the Parties shall amend this Agreement to the extent necessary to incorporate the terms of such waiver for such extraordinary circumstance.
- 5.3.3 BellSouth may, at its sole discretion, audit ANEW BROADBAND's records in order to verify compliance with the local usage option provided by ANEW BROADBAND pursuant to Section 5.3.1. The audit shall be conducted by a third party independent auditor, and ANEW BROADBAND shall be given thirty days written notice of scheduled audit. Such audit shall occur no more than one time in a calendar year unless results of an audit find noncompliance with the significant amount of local exchange service requirement. In the event of noncompliance, ANEW BROADBAND shall reimburse BellSouth for the cost of the audit. If, based on the audit, ANEW BROADBAND is not providing a significant amount of local exchange traffic over the combinations of loop and transport network elements, BellSouth will convert such combinations of loop and transport network elements to special access services in accordance with BellSouth's tariffs and will bill ANEW BROADBAND for appropriate retroactive reimbursement. If the Parties disagree as to whether the audits indicate that ANEW BROADBAND is not providing a significant amount of local exchange traffic, the dispute will be resolved according to the dispute resolution process set forth in Section 10 of the General Terms and Conditions of this Agreement incorporated herein by this reference.

Exhibit 1

- 5.3.4 In the event ANEW BROADBAND converts special access circuits to combinations of loop and transport UNEs pursuant to the terms of this Section, ANEW BROADBAND shall be subject to the termination liability provisions in the applicable special access tariffs, if any.
- 5.4 Rates

Ordinarily combined EELs not listed in Sections 5.4.1.1-5.4.1.14 shall be billed the sum of the nonrecurring charges and recurring charges for the individual network elements that comprise the combination as set forth in Exhibit B of this Attachment.
- 5.4.3 To the extent that ANEW BROADBAND requests an EEL combination Not Typically Combined in the BellSouth network, the rates, terms and conditions shall be determined pursuant to the Bona Fide Request Process.
- 5.5 UNE Port/Loop Combinations**
 - 5.5.1 Combinations of port and loop unbundled network elements along with switching and transport unbundled network elements provide local exchange service for the origination or termination of calls. Port/ loop combinations support the same local calling and feature requirements as described in the Unbundled Local Switching or Port section of this Attachment 2 and the ability to presubscribe to a primary carrier for intraLATA toll service and/or to presubscribe to a primary carrier for interLATA toll service.
 - 5.5.2 BellSouth shall make available UNE port/loop combinations, regardless of whether such combinations are Currently Combined, as long as such combinations are Ordinarily Combined in BellSouth's network.
 - 5.5.3 Except as set forth in Section 5.5.4 below, BellSouth shall provide UNE port/loop combinations described in Section 5.5.6 below that are Currently Combined or Ordinarily Combined in BellSouth's network at the cost-based rates in Exhibit B. Except as set forth in Section 5.5.4 below, BellSouth shall provide UNE port/loop combinations not described in Section 5.5.6 below or Not Typically Combined Combinations in accordance with the Bona Fide Request process.
 - 5.5.4 BellSouth is not required to provide combinations of port and loop network elements on an unbundled basis in locations where, pursuant to FCC rules, BellSouth is not required to provide circuit switching as an unbundled network element.
 - 5.5.4.1 BellSouth shall not be required to provide local circuit switching as an unbundled network element in density Zone 1, as defined in 47 CFR 69.123 as of January 1, 1999 of the Atlanta, GA; Miami, FL; Orlando, FL; Ft. Lauderdale, FL; Charlotte-Gastonia-Rock Hill, NC; Greensboro-Winston Salem-High Point, NC; Nashville, TN; and New Orleans, LA,

- 5.5.4.2 Notwithstanding the foregoing, BellSouth shall provide combinations of port and loop network elements on an unbundled basis where, pursuant to FCC rules, BellSouth is not required to provide local circuit switching as an unbundled network element and shall do so at the market rates in Exhibit B. If a market rate is not set forth in Exhibit B for a UNE port/loop combination, such rate shall be negotiated by the Parties.
- 5.5.5 BellSouth shall make 911 updates in the BellSouth 911 database for ANEW BROADBAND's UNE port/loop combinations. BellSouth will not bill ANEW BROADBAND for 911 surcharges. ANEW BROADBAND is responsible for paying all 911 surcharges to the applicable governmental agency.
- 5.5.6 Combination Offerings

Such combinations shall not be connected to BellSouth tariffed services. To the extent ANEW BROADBAND requests a combination for which BellSouth does not have methods and procedures in place to provide such combination, rates and/or methods and procedures for such combination will be developed pursuant to the BFR/NBR process.

The electronic service ordering charge currently contained in this rate exhibit is the BellSouth regional electronic service ordering charge. CLEC may elect either the state specific Commission ordered rates for the electronic service ordering charges, or CLEC may elect the regional electronic service ordering charge.															
NOTE: (2) Any element that can be ordered electronically will be billed according to the SOMEK rate listed in this category. Please refer to BellSouth's Business Rules for Local Ordering (BBR-LO) to determine if a product can be ordered electronically. For those elements that cannot be ordered electronically at present per the BBR-LO, the listed SOMEK rate in this category reflects the charge that would be billed to a CLEC once electronic ordering capabilities come on-line for that element. 	UNBUNDLED PORT LOOP COMBINATIONS - MARKET RATES													
	Market Rates shall apply where BellSouth is not required to provide unbundled local switching or switch ports per FCC and/or State Commission rules.													
	This includes:													
	Unbundled port/loop combinations that are Currently Combined or Not Currently Combined in Zone 1 of the Top 8 MSAs in BellSouth's region for end users with 4 or more DS0 equivalent lines													
	The Top 8 MSAs in BellSouth's region are: FL (Orlando, Ft. Lauderdale, Miami); GA (Atlanta); LA (New Orleans); NC (Greensboro-Winston Salem-Highpoint/Charlotte-Gastonia-Rock Hill); TN (Nashville)													
	BellSouth currently is developing the billing capability to mechanically bill the recurring and non-recurring Market Rates in this section except for nonrecurring charges for not currently combined in FL and NC. In the interim where BellSouth cannot bill Market Rates, BellSouth shall bill the rates in the Cost-Based section preceding in lieu of the Market Rates and reserves the right to true-up the billing difference.													
	The Market Rate for unbundled ports includes all available features in all states													
	End Office and Tandem Switching Usage and Common Transport Usage rates in the Port section of this rate exhibit shall apply to all combinations of loop/port network elements except for UNE Coin Port/Loop Combinations which have a flat rate usage charge (USOC - URECU)													
	For Not Currently Combined scenarios the Nonrecurring charges are listed in the First and Additional NRC columns for each Port USOC. For Currently Combined scenarios, the Nonrecurring charges are listed in the NRC - Currently Combined section													
	Additional NRCs may apply also and are categorized accordingly.
