BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for Approval of)
Revised Lighting Tariffs by)
Tampa Electric Company.)
_____)

DOCKET NO. _____
FILED: February 3, 2003

PETITION

Tampa Electric Company ("Tampa Electric" or "the company"), pursuant to Chapter 366.06, Florida Statutes, Rules 28-106.201 and 25-9.030 (4) Florida Administrative Code files this its Petition for Approval of Revised Lighting Tariffs and in support thereof states:

1. Tampa Electric is an investor-owned electric utility operating under the jurisdiction of this Commission and serving retail customers in Hillsborough and portions of Polk, Pinellas and Pasco Counties. The company's principal offices are located at 702 North Franklin Street, Tampa, Florida 33602.

2. The persons to whom all notices and other documents should be sent in connection with this docket are:

Mr. Lee L. Willis
Mr. James D. Beasley
Ausley & McMullen
Post Office Box 391
Tallahassee, Florida 32302

Ms. Angela Llewellyn
Administrator,
Regulatory Coordination
Tampa Electric Company
Post Office Box 111
Tampa, Florida 33601

3. In this petition, Tampa Electric seeks approval for certain Revised Tariff Sheets listed in Exhibit "A" that entail revisions to its Street and Outdoor Lighting tariffs. Copies of the revised tariff sheets in standard and legislative format are attached to this petition as Exhibits "B" and "C", respectively, and incorporated herein by reference.

Revised Lighting Tariffs

4. Tampa Electric is requesting approval to close to new business several offerings under Schedules OL-1, SL-2 and OL-3 for various reasons including lack of customer interest and service issues.

5. Under Tariff Schedule OL-1, the company is proposing to close the 70-Watt high-pressure sodium (HPS) Nema, cobra, and coach post-top fixtures to new business due to low customer interest. The company has seen low to negative growth for these offerings over the past three to four years as many customers, wanting greater illumination than these offerings can provide, have opted to upgrade from these 70-Watt fixtures to luminaries of 100 Watts or greater.

6. Under Tariff Schedule SL-2, the company is proposing to close the 70-Watt HPS cobra fixture to new business for similar reasons. The subscription level for these luminaries has been static over several years and the company anticipates negative growth going forward as municipal street-lighting customers are requesting upgrades of existing 70-Watt fixtures to higher wattages.

7. The company is requesting approval to close of its 100-Watt HPS Nema fixture under Schedule OL-1 due to service issues associated with light trespass (an unintentional and annoying intrusion of light onto a neighboring property) and vandalism. The company is beginning to see an increase in customer complaints related to light trespass and the Nema fixture has backlighting characteristics that contribute to this problem. The standard abatement equipment, a light shield, is not available for Nema fixtures. Customers often select the Nema fixture for security purposes in high crime areas; yet, the Nema fixture's open-bottom plastic lens cannot be properly shielded to

protect it from the vandalism occurring in these areas. The company currently offers, as an alternative, a comparably sized and priced cobra fixture that can be fitted with both vandal and light trespass shields.

8. The company is proposing to close its 250-Watt HPS floodlight offering to new business for service quality reasons. Tampa Electric has determined that the design of the dual-wattage fixture, originally used for both the 250-Watt and 400-Watt HPS floodlight service offerings under Schedule OL-1, is flawed. The fixture's ballast housing is too small resulting in frequent overheating and consequential lighting outages. The company was successful in finding a more reliable replacement fixture for the 400-Watt offering, but has not been able to locate a reliable replacement for the 250-Watt floodlight. The company does offer a 250-Watt HPS shoebox fixture that could be used as a replacement in many floodlight applications.

9. The final OL-1 service offerings that the company is requesting approval to close to new business are the inaccessible pole and the 16-foot fiberglass post top pole. The inaccessible pole is a 30-foot wood pole that is installed in areas that cannot be accessed by a bucket truck. This offering is only available in combination with either the 70-Watt Nema or the 250-Watt floodlight, both of which the company is proposing to close to new business. The 16-foot fiberglass post top pole is only available in combination with the 70-Watt coach post top fixture that the company is also proposing to close to new business.

10. Under Schedule OL-3, Tampa Electric is proposing to close the 175-Watt metal halide shoebox service offering to new business due to a lack of customer

interest. The company has not achieved subscriptions for this three-year old offering at levels high enough to warrant retention among the company's OL-3 service offerings.

11. Although the company is requesting that the aforementioned service offering be closed to new business, existing Customers will continue to receive service to the extent product is available for maintenance.

12. Tampa Electric knows of no disputed issues of material fact relative to the lighting tariff revisions proposed herein.

WHEREFORE, Tampa Electric requests that this Commission consent to the application of the Revised Tariff Sheets as set forth in Exhibit "B". The company requests that such approval be made effective at the expiration of the appropriate notice period pertaining to tariff modifications with that notice period expiring on or before March 15, 2003.

Dated this 3rd day of February, 2003.

Respectfully submitted,

LEE L. WILLIS
JAMES D. BEASLEY
