**TARIFF FORMAT SHEETS**

**A. Sheet Numbering** – Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.

**B. Sheet Revision Numbers** – Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version of file with the Commission. For example, the 4<sup>th</sup> revised Sheet 14 cancels the 3<sup>rd</sup> revised Sheet 14. Because of various suspension periods, deferrals, etc, the Commission follows in their tariff approval process, the most current sheet number of file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the sheet currently in effect.

**C. Paragraph Numbering Sequence** – There are six levels of paragraph coding. Each level of coding is subservient to its next higher level:

2.

2.A.

2.A.1.

2.A.1.a.

2.A.1.a.i.

2.A.1.a.i.I.

**D. Check Sheets** – When a tariff filing is made with the Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the Commission.

**SECTION 2 - RULES AND REGULATIONS****A. Description of Service**

This tariff sets forth the terms under which the Company provides a service that gives a Customer the ability to receive collect calls from a specific station location in another exchange area from which the Customer receives numerous collect calls. The service is provided by means of automatic remote call forwarding. Customer subscribes to the service after obtaining a seven digit telephone number in the exchange area from which it receives numerous collect calls. A collect caller accesses the Customer's number by using the same dialing procedures and operator service as that caller would use in placing a collect call to any other number. All collect calls to that number are routed automatically by the Company to a station location designated by the Customer in the distant exchange area where the Customer is located. The Company's monthly invoice for service contains billing detail about each collect call received during the billing period.

**B. Service Availability**

Service is available 24 hours per day, seven days per week to all those who desire to purchase service subject to the availability of the necessary facilities and consistent with all provisions of this tariff.

1. The Company reserves the right to discontinue service when necessitated by conditions beyond its control or when the service is used in violation of the law or this tariff.
2. The Company does not undertake to transmit messages and will not be liable for errors in transmission or for failure to establish connections.
3. Prior written permission from the Company is required before any assignment or transfer of any service arrangement provided under this tariff.

**C. Billing and Payment For Service****1. Timing of Calls**

Usage charges for the service provided under this tariff begin when the Customer or other party at the Customer's station answers the telephone. Chargeable time ends when the connection is terminated.
