1		BELLSOUTH TELECOMMUNICATIONS, INC.
2		DIRECT TESTIMONY OF SHELLEY W. PADGETT
3		BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION
4		DOCKET NO. 030852-TP
5		DECEMBER 22, 2003
6		
7	I. IN	TRODUCTION
8		
9	Q.	PLEASE STATE YOUR NAME, YOUR POSITION WITH BELLSOUTH
10		TELECOMMUNICATIONS, INC. ("BELLSOUTH") AND YOUR BUSINESS
11		ADDRESS.
12		
13	A.	My name is Shelley W. Padgett. I am employed by BellSouth as Manager -
14		Regulatory and Policy Support in the Interconnection Services organization. My
15		business address is 675 West Peachtree Street, Atlanta, Georgia 30375.
16		
17	Q.	PLEASE PROVIDE A BRIEF DESCRIPTION OF YOUR BACKGROUND
18		AND EXPERIENCE.
19		
20	A.	I graduated summa cum laude from Harding University in 1992, with a Bachelor
21		of Arts degree in International Studies, and I did post-graduate work at The
22		George Washington University. I began my career in market research at
23		ALLTEL Telecommunications, Inc., but left to obtain a Master of Business
24		Administration degree from Texas A&M University, graduating in 1998. After
25		receiving my graduate degree, I began employment with BellSouth in the

1 Interconnection Services organization. I have held various positions involving 2 Negotiations and Product Management within the BellSouth Interconnection 3 Services organization. I have held my present position since October 2001. 4 5 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY? 6 7 A. The purpose of my testimony is to address all or portions of issue numbers 1-3, 5, 8 7-12, 14-18, and 20. For DS1, DS3, and dark fiber loops and transport facilities, I 9 identify the customer locations and interoffice transport routes in BellSouth's 10 territory in Florida where the facilities triggers established by the FCC in its 11 Triennial Review Order (TRO) have been satisfied, and where Competitive Local 12 Exchange Carriers (CLECs) are therefore not impaired without access to 13 unbundled high-capacity loops or dedicated transport. 14 15 The first part of my testimony focuses on the facilities triggers for high-capacity 16 loops. I describe the two triggers the FCC established, explain how they should 17 be applied, and present evidence of where the triggers have been satisfied in 18 BellSouth's territory in Florida. My testimony demonstrates that the triggers have 19 been met for DS1, DS3 and dark fiber loops to approximately 100 customer 20 locations. For these locations, which represent only a very small percentage of 21 BellSouth's 25,000 total locations served by high-capacity loops in Florida, the 22 Florida Public Service Commission ("Commission") must find that BellSouth is 23 not required to continue offering unbundled loops at the capacity level for which 24 the triggers have been satisfied.

1		The second part of my testimony focuses on the facilities triggers for dedicated
2		transport. I describe the two triggers the FCC established, explain how they
3		should be applied, and present evidence of where the triggers have been satisfied
4		in BellSouth's territory in Florida. My testimony demonstrates that the triggers
5		have been met for DS1 dedicated transport on 648 interoffice routes, for DS3
6		transport on 692 interoffice routes, and for dark-fiber transport on 692 interoffice
7		routes. For these routes, which represent only a small percentage of the 4,800
8		total routes between BellSouth's central offices in Florida, the Commission must
9		find that BellSouth is not required to continue offering unbundled dedicated
10		transport at the capacity level for which the triggers have been satisfied.
11		
12	II.	HIGH-CAPACITY LOOPS
13		
14	Q.	WHAT TYPES OF LOOPS DO YOU ADDRESS IN YOUR TESTIMONY?
15		
16		A. I discuss DS1, DS3, and dark fiber loops. These loops are described and
17		defined in BellSouth witness Wayne Gray's testimony.
18		
19	Q.	PLEASE DESCRIBE THE TRIGGERS THAT THE FCC ESTABLISHED TO
19 20	Q.	PLEASE DESCRIBE THE TRIGGERS THAT THE FCC ESTABLISHED TO IDENTIFY CUSTOMER LOCATIONS FOR WHICH COMPETING
	Q.	
20	Q.	IDENTIFY CUSTOMER LOCATIONS FOR WHICH COMPETING
20 21	Q.	IDENTIFY CUSTOMER LOCATIONS FOR WHICH COMPETING CARRIERS ARE NOT IMPAIRED WITHOUT ACCESS TO UNBUNDLED
20 21 22	Q.	IDENTIFY CUSTOMER LOCATIONS FOR WHICH COMPETING CARRIERS ARE NOT IMPAIRED WITHOUT ACCESS TO UNBUNDLED

1 wholesale facilities" trigger (which applies to DS1 and DS3 loops). If, for a given 2 loop capacity, any applicable trigger is met for a particular customer location, this 3 Commission must find that BellSouth is no longer required to offer unbundled 4 loops at that capacity to the location. 5 6 Both triggers are simple, "bright line" tests that require this Commission to count 7 the number of competitors providing loops to a given location. To meet the self-8 provisioning trigger for DS3 or dark-fiber loops, there must be "two or more 9 competing providers not affiliated with each other or with the incumbent LEC, 10 including intermodal providers of service comparable in quality" that have self-11 deployed facilities to a particular location and that are serving customers via those 12 facilities at that location. $(\S51.319(a)(4)(ii)(B))$ and $\S51.319(a)(5)(i)(B))$. To meet 13 the competitive wholesale facilities trigger for DS1 or DS3 loops, there must be 14 "two or more competing providers not affiliated with each other or with the 15 incumbent LEC, including intermodal providers of service comparable in quality" 16 that have deployed facilities to a particular location and that are offering a loop on 17 a widely available wholesale basis to other carriers seeking to serve customers at 18 the location. ($\S51.319(a)(4)(ii)$ and $\S51.319(a)(5)(i)(B)$). 19 20 Q. IF A CARRIER HAS AN OCn FACILITY TO A CUSTOMER LOCATION, 21 SHOULD IT QUALIFY FOR THE DS3 SELF-PROVISIONING TRIGGER? 22 23 A. Yes. As BellSouth witness Mr. Wayne Gray discusses in his testimony, carriers

typically deploy fiber-optic facilities that can operate at a range of capacities

determined by the electronics attached to them. For example, when laying fiber it

24

i		makes sense to deploy high-capacity, OCn facilities so that there will always be
2		enough bandwidth to handle the traffic on a given loop. The carrier then attaches
3		electronics to subdivide (or "channelize") the available capacity, activating the
4		amount of capacity and number of channels needed along the loop. Indeed, this
5		channelization is extremely common given that the vast majority of retail loops
6		sold are at the DS3 level or below - indeed, according to the market research firm
7		IDC, more than 99% of dedicated enterprise loops, excluding switched voice
8		lines, are provided at DS3 or lower capacity.
9		
10	Q.	SHOULD AN OCn FACILITY QUALIFY FOR THE DS3 AND DS1
11		WHOLESALE TRIGGERS?
12		
13	A.	Yes, as long as the competitive carrier offers DS1 and DS3 loop facilities to other
14		carriers on a wholesale basis, the capacity of the underlying facility is irrelevant.
15		As explained by Mr. Gray, a carrier with channelized OCn facilities is
16		operationally ready to provide DS1 or DS3 facilities and its network can support
17		the sale of DS1 and DS3 loops, so whether the carrier wholesales depends only on
18		its choice of commercial strategy.
19		
20	Q.	REGARDING THE DARK FIBER TRIGGERS, DOES THE TRO REQUIRE
21		THE COMPETITIVE CARRIER TO HAVE AVAILABLE UNLIT FIBER
22		STRANDS IN ITS LOOP FACILITY?
23		
24	A.	No. The dark fiber trigger is a self-provisioning trigger and therefore it does not
25		require the provisioning carrier to have additional dark fiber strands (i.e., fiber

1 stands that have not been lit by attaching transmission electronics) to potentially 2 sell to other carriers. The Order is clear that as long as a competitive carrier 3 deployed a fiber loop to a customer location, it should qualify for the dark fiber 4 trigger in that customer location. 5 6 WHAT EVIDENCE DID YOU USE TO IDENTIFY THE CUSTOMER Q. 7 LOCATIONS WHERE COMPETITIVE CARRIERS HAVE DEPLOYED LOOP 8 FACILITIES THAT QUALIFY FOR THE SELF-PROVISIONING TRIGGERS 9 ON DS3 AND DARK FIBER LOOPS? 10 11 A. I used two data sources to identify customer locations where competitive carriers 12 have deployed loop facilities that qualify for the self-provisioning triggers. 13 First and foremost, I used carriers' discovery responses describing the locations 14 they serve with high-capacity loop facilities. I aggregated these responses by 15 building, counting facilities where carriers confirmed that they have deployed 16 fiber towards the self-provisioning trigger for dark fiber loops, and facilities 17 where carriers confirmed transmission capacities of DS3 or OCn towards the selfprovisioning trigger for DS3 loops. (For the reasons explained above, many 18 19 carriers' responses indicated OCn facilities even though carriers rarely sell OCn 20 loops to end users.) 21 22 Since not every party has fully responded to BellSouth's discovery requests and 23 because BellSouth has not received complete data from non-party carriers, I was 24 required to turn to a third-party vendor for data on carriers from whom I did not 25 have adequate responses. BellSouth purchased data from GeoResults, Inc., an

1		independent consulting firm specializing in national business and residential
2		databases, customized database marketing and geo-mapping services, business
3		level telecom bandwidth, demand and spend estimates, a comprehensive set of
4		telecom competitive intelligence reports, proprietary wire center boundary
5		products and spatial analysis tools and services.
6		
7		GeoResults provided its GeoLIT™ Plus Report, listing buildings that contain
8		fiber-based equipment together with the names of the carriers that own the
9		equipment. The GeoLIT™ Plus Report was further refined to exclude instances
10		where a carrier obtained the loop facility from another carrier (including
11		BellSouth) on a wholesale basis, leaving only those buildings where the carrier
12		has deployed its own fiber loop facility capable of providing DS3 and dark fiber
13		loops.
14		
15	Q.	WHY DO YOU BELIEVE THE GEOLIT™ PLUS REPORT IS A RELIABLE
16		SOURCE OF DATA TO USE IN THE TRIGGERS' ANALYSIS?
17		
18	A.	First let me reiterate that using the GeoResults data is the best alternative
19		BellSouth had to overcoming the lack of useful discovery data, and that I have
20		used this data only in instances where a carrier has not provided us with
21		information through discovery.
22		
23		The GeoLIT™ Plus Report is a summary of building locations that have been
24		identified as being served by a fiber facility and lists carriers providing fiber-
25		based services in those buildings. The report is based on the CLONES (Central

1 Location Online Entry System) database from Telecordia, to which carriers self-2 report records of their equipment as it is deployed. This database is widely used 3 in the industry to create, update, and maintain Common Language Location 4 (CLLI) Codes to uniquely identify geographic places and certain types of 5 equipment. GeoResults uses proprietary analysis methodologies and data 6 compilation techniques to determine, from CLONES, which pieces of equipment 7 are fiber-based. 8 9 I also note that the GeoLITTM Plus Report is conservative, because it is does not 10 identify all instances where competitive carriers have deployed fiber-base loop 11 facilities: GeoResults uses a conservative algorithm to identify fiber-based loop 12 facilities, which only identifies facilities as "lit" when it is absolutely clear from 13 the description field in CLONES that the equipment is fiber-based – when in 14 doubt, the facility is not identified as "lit." Moreover, since creating records in 15 CLONES is voluntary, there are not infrequent situations where a competitive 16 carrier deploys a loop facility to a customer location, but fails to create a 17 CLONES record for the facility. Facilities with no records in CLONES are 18 obviously not captured in the GeoLITTM Plus Report from GeoResults. 19 20 Q. WHICH FACILITIES COULD QUALIFY FOR THE 'COMPETITIVE 21 WHOLESALE FACILITIES" TRIGGER FOR DS1 AND DS3 LOOPS? 22 23 Any facility that qualifies for the self-provisioning trigger could potentially meet A.

the wholesale facilities trigger also – the only question is whether the provisioning

carrier chooses to offer loops on it to other carriers on a wholesale basis. Further,

24

1		because any carrier with an OCn or DS3 facility is operationally able to provide a
2		DS1 loop as described by Mr. Gray, the same set of qualifying facilities should be
3		used for DS1 and DS3 loops.
4		
5	Q.	HAVE YOU IDENTIFIED CARRIERS THAT USE THEIR FACILITIES TO
6		OFFER LOOPS ON A WHOLESALE BASIS? IF SO, HOW?
7		
8	A.	Yes. Although I believe it would be rational for any carrier with its own facilities
9		to wholesale, to be conservative I only identified as a "wholesaler" a carrier for
10		which there is actual evidence that it has entered into wholesale deals or that it
11		actively promotes wholesale service. This evidence was compiled from a number
12		of sources:
13		- Carriers' discovery responses, indicating the offer or purchase of
14		wholesale loops and/or transport
15		- BellSouth's experience in losing wholesale contracts to another carrier
16		- A carrier's own advertisements offering wholesale services
17		- A carrier's public statements and filings indicating willingness to
18		wholesale or revenues from wholesaling
19		- Analyst and industry reports identifying carriers as wholesalers
20		A list of carriers that offer wholesale facilities based on these sources is included
21		as Exhibit SWP-1.
22		
23		It is important to note that for a competitive provider to qualify for the wholesale
24		trigger, it does not have to be currently selling wholesale services - the Order is
25		clear that the competitive provider only has to be willing to provide wholesale

service (TRO ¶329). That is, even if it does not currently have a wholesale customer, it would still qualify as long as it is willing to provide wholesale service. Given that, the analysis to determine which competitive carriers offer facilities on a wholesale basis can be conducted by carrier, rather than by customer location, because the decision about whether a carrier wholesales is one of business model, and so is made at the company level rather than on a location-by-location basis. In other words, if a carrier is willing to wholesale high-capacity loops at a given customer location, it is also likely to be willing to wholesale high-capacity loops at all other customer locations where it has deployed its own loop facilities. I don't know of any reason to believe that this is not the case and nothing that we learned through discovery suggests otherwise.

Issue 1: To what specific customer locations have two or more competing providers, not affiliated with each other or the ILEC, including intermodal providers of service comparable in quality to that of the ILEC, deployed their own DS1 facilities, (including leased, purchase or UNE dark fiber with the carrier's own optronics attached to activate the fiber) and offer DS1 loops over their own facilities on a widely available basis to other carriers? For each such location, do the wholesale providers have access to the entire customer location, including each individual unit within the location?

1	Q.	HAVE YOU IDENTIFIED LOCATIONS THAT MEET THE DSI
2		WHOLESALE FACILITIES TRIGGER? IF SO, PLEASE IDENTIFY THOSE
3		LOCATIONS.
4		
5	A.	Yes. The customer locations that meet the definition in Issue 1, and that,
6		therefore, satisfy the wholesale trigger for DS1 loops, are listed in Exhibit SWP-2.
7		Exhibits SWP-1 and SWP-3 provide supporting evidence used in the analysis.
8		Exhibit SWP-3 shows, by location, the carriers with high-capacity loops deployed
9		in Florida and the capacities the carrier is capable of providing to that location.
10		As previously discussed, Exhibit SWP-1 lists carriers that are willing to offer
11		services on a wholesale basis.
12		
13		In its discovery requests, BellSouth asked carriers to specifically identify barriers
14		to access that they faced in particular locations. Unless a carrier identified a
15		specific barrier, BellSouth assumed that the carrier has access to the entire
16		premises.
17		
18	Issue	2: To what specific customer locations have two or more competing providers,
19	not a	ffiliated with each other or the ILEC, including intermodal providers of service
20	comp	arable in quality to that of the ILEC, either (1) deployed their own DS3
21	facili	ties and actually serve customers via those facilities or (2) deployed DS3
22	facili	ties by attaching their own optronics to activate dark fiber obtained under a
23	long-	term indefeasible right of use and actually serve customers via those facilities
24	at tha	it location?
25		

1	Q.	HAVE YOU IDENTIFIED LOCATIONS THAT MEET THE DS3 SELF-
2		PROVISIONING TRIGGER? IF SO, PLEASE IDENTIFY THOSE
3		LOCATIONS.
4		
5	A.	Yes. The customer locations that meet the definition in Issue 2, and that,
6		therefore, satisfy the self-deployment trigger for DS3 loops, are listed in Exhibit
7		SWP-4. Exhibits SWP-1 and SWP-3 provide supporting evidence used in the
8		analysis, as described above.
9		
10	Issue	3: To what specific customer locations have two or more competing providers,
11	not af	filiated with each other or the ILEC, including intermodal providers of service
12	comp	arable in quality to that of the ILEC, deployed their own DS3 facilities
13	(inclu	ding leased, purchased or UNE dark fiber with the carrier's own optronics
14	attach	ed to activate the fiber) and offer DS3 loops over their own facilities on a
15	widely	y available wholesale basis to other carriers? For each such location, do the
16	whole	sale providers have access to the entire customer location, including each
17	indivi	dual unit within the location?
18		
19	Q.	HAVE YOU IDENTIFIED LOCATIONS THAT MEET THE DS3
20		WHOLESALE FACILITIES TRIGGER? IF SO, PLEASE IDENTIFY THOSE
21		LOCATIONS.
22		
23	A.	Yes. The customer locations that meet the definition in Issue 3, and that,
24		therefore, satisfy the wholesale trigger for DS3 loops, are also listed in Exhibit

1		SWP-4. Exhibits SWP-1 and SWP-3 provide supporting evidence used in the
2		analysis, as described above.
3		
4		In its discovery requests, BellSouth asked carriers to specifically identify barriers
5		to access that they faced in particular locations. Unless a carrier identified a
6		specific barrier, BellSouth assumed that the carrier has access to the entire
7		premises.
8		
9	Issue	e 5: To what specific customer locations have two or more competing providers
10	depl	oyed their own dark fiber facilities, including dark fiber owned by the carrier
11	or ol	otained under a long-term indefeasible right of use (but excluding ILEC
12	unbundled dark fiber)?	
13		
14	Q.	HAVE YOU IDENTIFIED LOCATIONS THAT MEET THE DARK FIBER
15		SELF-DEPLOYMENT TRIGGER? IF SO, PLEASE IDENTIFY THOSE
16		LOCATIONS.
17		
18	A.	Yes. The customer locations that meet the definition in Issue 5, and that,
19		therefore, satisfy the self-deployment trigger for dark fiber loops, are listed in
20		Exhibit SWP-5. Exhibits SWP-1 and SWP-3 provide supporting evidence used in
21		the analysis, as described above.
22		
23		
24		
25		

1 III. HIGH-CAPACITY TRANSPORT 2 3 Q. PLEASE DESCRIBE THE TRIGGERS THAT THE FCC ESTABLISHED TO 4 IDENTIFY ROUTES FOR WHICH COMPETING CARRIERS ARE NOT IMPAIRED WITHOUT ACCESS TO UNBUNDLED DEDICATED 5 6 INTEROFFICE TRANSPORT FACILITIES. 7 8 A. There are two triggers set forth in the TRO – the "self-provisioning trigger" 9 (which applies to DS3 and dark-fiber transport) and the "competitive wholesale 10 facilities" trigger (which applies to DS1, DS3, and dark-fiber transport). If, for a 11 given transport capacity, any applicable trigger is met on a particular route, the Commission must find that BellSouth is no longer required to offer unbundled 12 13 dedicated transport at that capacity on the route. 14 Both triggers are simple, "bright line" tests that require the Commission to count 15 16 the number of competitors on a given route. To meet the self-provisioning trigger 17 for DS3 or dark-fiber transport, there must be "three or more competing providers not affiliated with each other or with the incumbent LEC, including intermodal 18 19 providers of service comparable in quality" that have self-deployed fiber transport facilities along a particular route and that are operationally ready to use those 20 21 facilities to provide transport along that route. (47 C.F.R. §§ 51.319(e)(2)(i)(A) and (e)(3)(i)(A)). To meet the competitive wholesale facilities trigger for DS1, 22 23 DS3, or dark-fiber transport, there must be "two or more competing providers not affiliated with each other or with the incumbent LEC, including intermodal 24 providers of service comparable in quality" that are operationally ready and 25

1		willing to offer wholesale transport of a given capacity along a particular route.
2		(47 C.F.R. §§51.319(e)(1)(ii), (e)(2)(i)(B) and (e)(3)(i)(B)).
3		
4	Q.	WHAT IS A "ROUTE," AS THE TERM IS USED IN THE FCC'S TRIGGERS?
5		
6	A.	A route is defined in the FCC's rules as "a transmission path between one of an
7		incumbent LEC's wire centers or switches and another of the incumbent LEC's
8		wire centers or switches" within a LATA. Furthermore "a route between two
9		points (e.g., wire center or switch "A" and wire center or switch "Z") may pass
10		through one or more intermediate wire centers or switches (e.g., wire center or
11		switch "X"). Transmission paths between identical end points (e.g., wire center
12		or switch "A" and wire center or switch "Z") are the same 'route,' irrespective of
13		whether they pass through the same intermediate wire centers or switches, if any."
14		(47 C.F.R. §51.319(e)).
15		
16	Q.	IS IT REASONABLE TO ASSUME THAT A CARRIER HAS A "ROUTE"
17		BETWEEN ANY PAIR OF INCUMBENT LEC WIRE CENTERS IN THE
18		SAME LATA WHERE IT HAS OPERATIONAL COLLOCATION
19		ARRANGEMENTS?
20		
21	A.	Yes. As explained in Mr. Gray's testimony, it is logical and reasonable to
22		assume that a carrier's network within a LATA is fully interconnected and no
23		discovery response received by BellSouth indicated otherwise. Additionally,
24		both FPL FiberNet and Time Warner Telecom indicated that any point on their
25		network may be connected to any other point on the network. FPL FiberNet's

response to the Staff's Request for Discovery states, "All on-net locations are accessible (sic) to all other on-net locations and are not limited to the existing circuits documented below." Time Warner's response to the Staff's Request for Discovery contains a note that states, "TWTC has or can provision over its own facilities transport routes from any of its cages to any of its cages." Another note says, "In Florida where TWTC has its own intercity network, TWTC is able to provision high capacity transport circuits between all cage locations in the state."

Q. IF A CARRIER HAS AN OCn TRANSPORT FACILITY TO A

COLLOCATION ARRANGEMENT IN AN ILEC WIRE CENTER, DOES IT

MEET THE "OPERATIONALLY READY" CONDITION OF THE DS3 SELFPROVISIONING TRIGGER?

A.

Yes. The FCC's rules say that to count toward the trigger, the competing provider should have "deployed its own transport facilities and [be] operationally ready to use those transport facilities to provide dedicated DS3 transport along the particular route." (47 C.F.R. §51.319(e)(2)(i)(1)). In reality, carriers typically deploy fiber-optic facilities that can operate at a range of capacities determined by the electronics attached to them. For example, when laying fiber it makes sense to deploy high-capacity, OCn facilities so that there will be enough bandwidth to handle all traffic on a given route and leave room for growth. The carrier can then attach electronics to subdivide (or "channelize") the available capacity, activating the amount of capacity and number of channels needed along the route. As Mr. Gray explains, the electronics used to do this channelization of OCn facilities into DS1 or DS3 facilities are relatively inexpensive, are widely available, and can be

1		quickly installed whenever the carrier has demand for DS3 transport facilities.
2		The fact that the capacity of the facility itself is at the OCn level is therefore
3		independent of the carrier's ability to provide a dedicated DS1 or DS3 transport
4		route over that facility.
5		
6	Q.	SHOULD AN OCn FACILITY QUALIFY FOR THE DS3 AND DS1
7		WHOLESALE TRIGGERS?
8		
9	A.	Yes, as long as the competitive carrier offers DS1 and DS3 transport to other
10		carriers on a wholesale basis, the capacity of the underlying facility is irrelevant.
11		As explained above, a carrier with channelized OCn facilities is operationally
12		ready to provide DS1 or DS3 facilities - its network can support the sale of DS1
13		and DS3, so whether the carrier wholesales or not depends only on its commercial
14		strategy.
15		
16	Q.	REGARDING THE DARK FIBER TRIGGERS, DOES THE TRO REQUIRE
17		THE COMPETITIVE CARRIER TO HAVE AVAILABLE UNLIT FIBER
18		STRANDS IN ITS COLLOCATION ARRANGEMENT?
19		
20	A.	This requirement in the TRO applies only for the wholesale trigger, which
21		requires the competitive provider be ready to provide dark fiber facilities to other
22		carriers. For the self-provisioning trigger, the TRO is clear that as long as a
23		competitive carrier deployed fiber transmission facilities to a collocation
24		arrangement, it should qualify for the dark fiber trigger in that wire center (TRO

1		¶408). There is no condition on the existence of extra dark fiber strands that have
2		not yet been lit.
3		
4	Q.	HOW DID YOU IDENTIFY ROUTES WHERE COMPETITIVE CARRIERS
5		HAVE DEPLOYED FACILITIES THAT QUALIFY FOR THE SELF-
6		PROVISIONING TRIGGER FOR DS3 AND DARK FIBER ROUTES?
7		
8	A.	I initially hoped to rely primarily on discovery responses from competitive
9		carriers. Unfortunately, to date, BellSouth has received far fewer responses than
10		expected, so we have been forced to rely heavily on our own billing and
11		operations data regarding collocation arrangements and fiber entrance facilities.
12		Using discovery and these internal data, a list of fiber-based collocations for each
13		competitive carrier was created and used to generate all the potential transport
14		routes for a given carrier using the assumption that competitive carriers can route
15		traffic between any pair of fiber-based collocation arrangements in a LATA.
16		Furthermore, if a carrier has a collocation arrangement in a BellSouth wire center
17		and it has pulled its own fiber to the collocation, it is reasonable to assume that it
18		should qualify for the self-provisioning trigger for both dark fiber and DS3
19		dedicated transport (due to the channelization I described above).
20		
21	Q.	WHICH FACILITIES COULD QUALIFY FOR THE "COMPETITIVE
22		WHOLESALE FACILITIES" TRIGGER FOR DS1, DS3 AND DARK FIBER
23		TRANSPORT?
24		

A. Any route that qualifies for the self-provisioning trigger could meet the wholesale facilities trigger also – the only question is whether the competitive carrier chooses to offer transport on it to other carriers on a wholesale basis. Further, because any carrier with an OCn or DS3 facility is operationally able to provide DS1 transport, I assumed the same set of qualifying facilities for DS1 transport as for DS3 transport. Additional DS3 and DS1 facilities that qualify for wholesale are included only if we learned through discovery of facilities that meet the conditions of the wholesale triggers but not the self-provisioning triggers (i.e., the carrier does not own the underlying fiber used in the transport facility). Finally, for dark fiber the wholesale trigger requires the competitive provider to have unused dark fiber to sell to other carriers and that requesting carriers are able to obtain reasonable and nondiscriminatory access to the competing providers' termination points through a cross-connect to the providers' collocations. (§51.319(e)(3)(i)(B)). For the reasons explained by Mr. Gray, it is logical to assume that interoffice facilities have spare fiber strands. Furthermore, our billing records indicate that most CLECs that pulled fiber into BellSouth's wire centers requested 2 cables of 24 strands each, leaving plenty of spare strands to wholesale. In short, unless we learn through discovery that carriers do not have extra dark fiber, it is reasonable to assume that any dark fiber facility that meets the self-provisioning trigger may count toward the wholesale trigger also, if the provisioning CLEC chooses to wholesale them.

1	Q.	HAVE YOU IDENTIFIED CARRIERS THAT USE THEIR FACILITIES TO
2		OFFER DEDICATED TRANSPORT ON A WHOLESALE BASIS? IF SO,
3		HOW?
4		
5	A.	Yes. Since dedicated transport and high-capacity loops are two components of
6		the same wholesale product, commonly known as dedicated access or special
7		access, the carriers that offer dedicated transport on a wholesale basis, where they
8		have facilities, are the same as for loops. A list of carriers that offer wholesale
9		facilities is included as Exhibit SWP-6 (see my loop testimony above for a
10		description of how this list was compiled).
11		
12		As I explained for high-capacity loops, it is important to note that for a
13		competitive provider to qualify for the wholesale trigger, it does not have to be
14		currently selling wholesale services - the Order is clear that the competitive
15		provider only has to be willing to provide wholesale service (TRO ¶412).
16		
17	Issue 7	7: Along what particular routes have two or more competing providers, not
18	affiliat	ted with each other or the ILEC, including intermodal providers of service
19	compa	rable in quality to that of the ILEC, deployed their own DS1 level dedicated
20	transp	ort facilities (including leased, purchased or UNE dark fiber with the
21	carrie	r's own optronics attached to activate the fiber) and are willing to provide
22	DS1 le	evel transport immediately over their own facilities on a widely available basis
23	to oth	er carriers?

1	Q.	HAVE YOU IDENTIFIED ROUTES THAT MEET THE DS1 WHOLESALE
2		FACILITIES TRIGGER? IF SO, PLEASE IDENTIFY THOSE ROUTES.
3		
4	A.	Yes. The routes that satisfy the wholesale trigger for DS1 transport, and that,
5		therefore, meet the definition in Issue 7, are listed in Exhibit SWP-7. Supporting
6		evidence is presented in Exhibits SWP-6 and SWP-8. Exhibit SWP-8 shows, by
7		route, the carriers that have deployed transport facilities in Florida and the
8		capacities the carrier is capable of providing on that route. Exhibit SWP-6 lists
9		carriers that are willing to offer transport services on a wholesale basis and
10		whether the carrier has provided discovery responses to BellSouth.
11		
12	Issue	8: For any particular route where at least two competing providers will
13	prov	ide wholesale DS1 dedicated transport, do both competing providers' facilities
14	term	inate in collocation arrangements at an ILEC premise or a similar
15	arrai	ngement in a non-ILEC premise? If so, can requesting carriers obtain
16	reaso	onable and nondiscriminatory access to those competing providers' termination
17	point	s through a cross-connect to the providers' collocations either at the ILEC
18	prem	ise or similar arrangement if located at a non-ILEC premise?
9		
20	Q.	DO THE FACILITIES US ED TO DETERMINE THE ROUTES IDENTIFIED
21		IN EXHIBIT SWP-7 TERMINATE IN A COLLOCATION ARRANGEMENT?
22		
23	A.	Yes. The methodology used to identify routes that meet the trigger assures that
24		all the facilities used in the trigger analysis terminate in collocation arrangements
25		on both ends.

1	Issu	e 9: Along what particular routes have three or more competing providers, not
2	affili	ated with each other or the ILEC, including intermodal providers of service
3	com	parable in quality to that of the ILEC, deployed their own DS3 level dedicated
4	tran	sport facilities (including leased, purchased or UNE dark fiber with the
5	carr	ier's own optronics attached to activate the fiber) and are operationally ready to
6	use t	hose transport facilities?
7		
8	Q.	HAVE YOU IDENTIFIED ROUTES THAT MEET THE DS3 SELF-
9		PROVISIONING TRIGGER? IF SO, PLEASE IDENTIFY THOSE ROUTES.
10		
11	A.	Yes. The routes that satisfy the self-provisioning trigger for DS3 transport, and
12		that, therefore, meet the definition in Issue 9 are listed in Exhibit SWP-9.
13		Supporting evidence is presented in Exhibits SWP-6 and SWP-8, as described
14		above.
15		
16	Issue	10: For any particular route where at least three competing providers have
17	self-p	provisioned DS3 level dedicated transport facilities, do the competing providers
18	facili	ties terminate in collocation arrangements at an ILEC premise or similar
19	arran	gement in a non-ILEC premise?
20		
21	Q.	DO THE FACILITIES USED TO DETERMINE THAT THE ROUTES
22		IDENTIFIED IN EXHIBIT SWP-9 TERMINATE IN A COLLOCATION
23		ARRANGEMENT?
24		

	A. Tes. The inclinational gy used to identify foures that meet the frigger assures that
2	all the facilities used in the trigger analysis terminate in collocation arrangements
3	on both ends.
4	
5	Issue 11: Along what particular routes have two or more competing providers, not
6	affiliated with each other or the ILEC, including intermodal providers of service
7	comparable in quality to that of the ILEC, deployed their own DS3 level dedicated
8	transport facilities (including leased, purchased or UNE dark fiber with the
9	carrier's own optronics attached to activate the fiber), are operationally ready to
10	use those transport facilities, and are willing to provide DS3 level dedicated
11	transport immediately over their facilities on a widely available wholesale basis to
12	other carriers?
13	
14	Q. HAVE YOU IDENTIFIED ROUTES THAT MEET THE DS3 WHOLESALE
15	FACILITIES TRIGGER? IF SO, PLEASE IDENTIFY THOSE ROUTES.
16	
17	A. Yes. The routes that satisfy the wholesale trigger for DS3 transport, and that,
18	therefore, meet the definition in Issue 11 are listed in Exhibit SWP-9. Supporting
19	evidence is presented in Exhibits SWP-6 and SWP-8, as described above.
20	
21	Issue 12: For any particular route where at least two competing providers will
22	provide wholesale DS3 level dedicated transport, do both competing providers'
23	facilities terminate in collocation arrangements at an ILEC premise or a similar
24	arrangement in a non-ILEC premise? If so, can requesting carriers obtain
25	reasonable and nondiscriminatory access to those competing providers' termination

2	premi	se or similar arrangement if located at a non-ILEC premise?
3		
4	Q.	DO THE FACILITIES USED TO DETERMINE THAT THE ROUTES
5		IDENTIFIED IN EXHIBIT SWP-9 TERMINATE IN A COLLOCATION
6		ARRANGEMENT?
7		
8	A.	Yes. The methodology used to identify routes that meet the trigger assures that
9		all the facilities used in the trigger analysis terminate in collocation arrangements
10		on both ends.
11		
12	Issue	14: Along what particular routes have three or more competing providers, not
13	affilia	ted with each other or the ILEC deployed their own dark fiber dedicated
14	transp	oort facilities?
15		
16	Q.	HAVE YOU IDENTIFIED ROUTES THAT MEET THE DARK FIBER SELF-
17		PROVISIONING TRIGGER? IF SO, PLEASE IDENTIFY THOSE ROUTES.
18		
19	A.	Yes. The routes that satisfy the self-provisioning trigger for dark fiber transport,
20		and that, therefore, meet the definition in Issue 9 are listed in Exhibit SWP-10.
21		Supporting evidence is presented in Exhibits SWP-6 and SWP-8, as described
22		above.
23		
24	Issue 1	15: For any particular route where at least three competing providers have
25	self-pr	ovisioned dark fiber dedicated transport facilities, do the competing

points through a cross-connect to the providers' collocations either at the ILEC

ı	prov	iders' facilities terminate in collocation arrangements at an ILEC premise or
2	simil	ar arrangement in a non-ILEC premise?
3		
4	Q.	DO THE FACILITIES USED TO DETERMINE THAT THE ROUTES
5		IDENTIFIED IN EXHIBIT SWP-10 TERMINATE IN A COLLOCATION
6		ARRANGEMENT?
7		
8	A.	Yes. The methodology used to identify routes that meet the trigger assures that
9		all the facilities used in the trigger analysis terminate in collocation arrangements
10		on both ends.
11		
12	Issue	16: Along what particular routes have two or more competing providers, not
13	affili	nted with each other or the ILEC, deployed their own dark fiber transport
14	facili	ties (including dark fiber obtained from an entity other than the ILEC), are
15	opera	ationally ready to lease or sell those transport facilities to provide transport
16	along	the route, and are willing to provide dark fiber immediately over their
17	facili	ties on a widely available wholesale basis to other carriers?
18		
19	Q.	HAVE YOU IDENTIFIED ROUTES THAT MEET THE DARK FIBER
20		WHOLESALE FACILITIES TRIGGER? IF SO, PLEASE IDENTIFY THOSE
21		ROUTES.
22		
23	A.	Yes. The routes that satisfy the wholesale trigger for dark fiber transport, and
24		that, therefore, meet the definition in Issue 16 are listed in Exhibit SWP-10.

1	Supporting evidence is presented in Exhibits SWP-6 and SWP-8, as described
2	above.
3	
4	Issue 17: For any particular route where at least two competing providers will
5	provide wholesale dark fiber, do both competing providers' facilities terminate in
6	collocation arrangements at an ILEC premise or a similar arrangement in a non-
7	ILEC premise? If so, can requesting carriers obtain reasonable and
8	nondiscriminatory access to those competing providers' termination points through
9	a cross-connect to the providers' collocations either at the ILEC premise or similar
10	arrangement if located at a non-ILEC premise?
11	
12	Q. DO THE FACILITIES USED TO DETERMINE THAT THE ROUTES
13	IDENTIFIED IN EXHIBIT SWP-10 TERMINATE IN A COLLOCATION
14	ARRANGEMENT?
15	
16	A. Yes. The methodology used to identify routes that meet the trigger assures that
17	all the facilities used in the trigger analysis terminate in collocation arrangements
18	on both ends.
19	
20	Issue 18: For any particular route where at least two competing providers will
21	provide such wholesale dark fiber, do these providers have sufficient quantities of
22	dark fiber available to satisfy current demand along that route? If not, should the
23	wholesale trigger for dark fiber be determined to be satisfied along that route?
24	

1	Q.	DO THE PROVIDERS USED TO DETERMINE THAT THE ROUTES
2		IDENTIFIED IN EXHIBIT SWP-10 HAVE SUFFICIENT QUANTITIES OF
3		DARK FIBER AVAILABLE TO SATISFY DEMAND ALONG THAT
4		ROUTE?
5		
6	A.	Yes. For the reasons explained above, we assume that there is enough spare fiber
7		to wholesale unless carriers tell us otherwise through discovery. In those
8		instances, the transport facility is not included in Exhibit SWP-10. Therefore I
9		believe that there are sufficient quantities of dark fiber in all routes in Exhibit
10		SWP-10 to satisfy current demand.
11		
12	Issue	20: If unbundling requirements for loops at customer-specific locations or
13	dedic	ated transport along a specific route are eliminated, what are the appropriate
14	transi	tion period and requirements, if any, after which a CLEC no longer is entitled
15	to the	se loops or transport under Section 251(c)(3)?
16		
17	Q.	FOR LOCATIONS AND ROUTES WHERE ONE OR MORE OF THE
18		TRIGGERS IS MET, AND THERE IS THEREFORE NO IMPAIRMENT AT
19		THOSE LOCATIONS AND ALONG THOSE ROUTES, WHAT IS THE
20		APPROPRIATE TRANSITION PERIOD?
21		
22	A.	BellSouth will continue to offer loops and transport at a market rate so a transition
23		period is unnecessary. However, if the Commission determines that a transition
24		period is required, 90 days is reasonable.

1	IV.	CONCLUSION
2		
3	Q.	ARE YOU SUBMITTING THE FINAL LIST OF ROUTES AND BUILDINGS
4		WHERE YOU CLAIM THE TRIGGERS FOR DEDICATED TRANSPORT OR
5		LOOPS, RESPECTIVELY, HAVE BEEN SATISFIED?
6		
7	A.	No. We reserve the right to expand list of locations and routes based on further
8		discovery responses from carriers.
9		
10	Q.	DOES THIS CONCLUDE YOUR TESTIMONY?
11		
12	A.	Yes.
13
