

December 21, 2003. The data request is similar to the October 3, 2003, data request of the New York Department of Public Service in Case 03-C-0821, modified by a few additional questions.

The trigger-related information is to be provided on electronic spreadsheets: (1) general_questions_FL.xls, (2) switching_questions_FL.xls, (3) transport_questions_FL.xls, and (4) loop_questions_FL.xls. Hard copies of the spreadsheets are attached to the data request and spreadsheet files can also be downloaded from the Commission's website to use in providing responses (http://www.floridapsc.com). The number of spreadsheet rows to which each CLEC will be required to respond depends upon the number of switches, transport routes, or customer locations for which each company has provisioned facilities. Detailed instructions are included in the data request as well as attached to the spreadsheets.

If your company holds a certificate but is not currently active in the marketplace, you may simply check the box at the top of this page and return it.

To the extent you are a party to either Docket No. 030851-TP or Docket No. 030852-TP and information requested has already been provided through responses to interrogatories or document requests, there is no need to provide a full response again. Simply respond by identifying the particular interrogatory or document request (serving party, item number, filing date) where the information can be found.

Once the spreadsheets are completed, they should be saved electronically using the company name in the saved file name; i.e., general_Company Name_FL.xls. A cover letter along with a hard copy of each spreadsheet and an electronic version of each spreadsheet saved on a 3.5-inch diskette or compact disk (CD) should be mailed to:

For proper identification of the data request responses, your cover letter should reference "2003 TRO Data Request in Docket Nos. 030851-TP and 030852-TP". Additionally, your response should include a notarized statement signed by the responding individual and attesting to the accuracy of the information.
