E911 (Location information provided automatically to PSAP).

CALEA (Communications Assistance for Law Enforcement Act).

Telephone Relay Service.

Power Backup (If so, identify time duration below, e.g., 4 hours, 8 hours).

Time duration of power backup (in hours).

Directory Assistance.

Operator Services.

Equal Access to long distance providers.

Local Number Portability.

Local Calling.

Long Distance Calling.

International Calling.

Contribute to Universal Service Fund.

Require VoIP subscriber to also purchase Broadband service.

Offered as primary line service.

Offered as secondary line service only.

Interconnected with PSTN.

Peer-to-Peer only (no interconnection with PSTN).

Use of public Internet.

Use of private IP network.

Call uptime 99.999%.

Use of numbers from the North American Numbering Plan Administrator.

- 6. If you are not offering or providing VoIP service to end-user customers in Florida, do you anticipate doing so? If yes, identify rollout month/year.
- 7. Broadband Internet Access.
 - (a.) With this data, we are interested in reporting on an aggregate statewide rather than a per company basis.

Provide the total number of **residential** lines and wireless channels over which you or an affiliate are providing broadband service in Florida.

Provide the total number of small business lines and wireless channels over which you or an affiliate are providing broadband service in Florida.

Provide the total number of **residential and small business** lines and wireless channels over which you or an affiliate are providing broadband service in Florida.

(c.) How do you provision broadband services? Check all that apply. Over own facilities Over UNE loops Over resold facilities (ILEC) Over resold facilities (non-ILEC) Over loops or channels obtained from unaffiliated entities (non-ILEC) Through line splitting agreements (d.) Please fill out the following table providing the downstream and upstream data transfer rates and the monthly price for each tier of broadband service you offer. Data Transfer Rate Broadband Service Downstream Upstream \$ Price/month Residential 8. Have you experienced any significant barriers in entering Florida's local exchange believe markets? Please list and describe any major obstacles or barriers encountered that you maybe impeding the growth of local competition in the state, along with any suggestions as to how to remove such obstacles. 9. Please provide any additional general comments or information you believe will assist in staff in evaluating and reporting on the development of local exchange competition in Florida. 10. As of December 31, 2003, how much money (in thousands of dollars) have you invested in your network serving Florida customers? 11. FLORIDA PUBLIC SERVICE COMMISSION

2004 CLEC Data Request TABLE-1

(Data as of May 31, 2004)

Reducted Public Version

Company Name: Ernest Communications, Inc.

Company Code*: TX244-03-0-R

* Your CLEC Company code is shown on the label affixed to the envelope in which this was mailed and on the cover letter

CLEC TABLE-1: ACCESS LINES (VGE Basis) DO NOT INCLUDE UNE-P. RESOLD LINES, OR PRIVATE LINES IN THIS TABLE

1 2	3	4 Type of Service (anylog or	5	8	7 If lessed raise of
Exchange Res or Bus	Method of Service	(anylog or digital	Teist VGE:	Owned or Leased Switel	company providing switching service
Gran	i Total				

NOTES/INSTRUCTIONS FOR COMPLETING TABLE-1:

A. The purpose of this table is to obtain your end-user VGE access tines (other than UNE-P and resale) and to whose switches they are connected.

B. An access line connects the end-user's customer premises equipment (CPE) to the serving switch and allows the end-user to originate and/or terminate local telephone calls on the public switched telephone network (PSTN).

-Do NOT include UNE-P or Resold access lines; however you should include UNE-L and EELs obtained from ILECs. Also do not include lines or channels, such as private lines, that are not connected to a switch.

The access line counts in Table-1 above must be based on all of your different types of access lines such as copper, fiber, hybrid fiber/copper, coaxial cable, hybrid fiber/c

C. Each field must be populated. Do not use quotation marks.

D. Report VGE Access Lines based on how you bill the customer. If you bill a customer for 1 DS1, the access line count would be 24 even if the customer isn't utilizing all 24 channels. If you bill a customer for 10 channels in a DS1, then the line count would be 10.

E. Residential and business VGE access line counts may be obtained by querying your billing database, provisioning database, etc. Exchange information is available at NANPA's website at http://www.nanpa.com. Click on "Reports", "Central Office Codes Reports", "Central Office Code Assignment Records", scroll down to "CO Code (Prefix) Status-Excel Spreadsheet Files," click on the link for the Eastern region and open file "EstCodes.zip", tab, then save it to a table in a database and run a query to capture all of your residential and business access line NPA-NXS to identify their respective exchanges (shown in the "Rate Center" column of the NANPA's website).

TABLE COLUMN INSTRUCTIONS:

Column 1. List exchanges in alphabetical order,

Column 2. Enter the abbreviation Res for Residential lines or Bus for Business lines. Each service type must be entered in separate rows,

Column 3. Enter Method of Service as either SP (Self-Provisioned lines), NIL (lines obtained from non-ILECs), UNE-L. EEL (Include only Loop and not transport piece), or Other

Each method must be entered in separate rows.

Column 4: Enter Type of Service as either Analog Digital. Each type must be entered in separate rows.

Column 5. For Analog lines, enter count of all analog loops for each method of service and service type (Res or Bus).

Each count must be entered in separate rows. For digital services, enter line count as voice-grade equivalents (VGEs). Count lines based on how they are charged to the customer rather than how they are physically provisioned. EXAMPLE: Report 8 voice-grade equivalent lines if a customer buys 8 channels that happen to be provisioned over a DS1 circuit. If a customer buys a DS1 circuit that is provided as a channelized service, report 24 voice-grade equivalent lines, even if there is some indication that the customer is only using 8 of the derived lines. Report 2 VGEs for each ISDN-BRI and 23 VGEs for each ISDN-PRI. Lines must be entered without duplication, e.g., Enhanced Extended Link (EEL) loops must not be included in UNE-I, counts and vice versa. Each line count must be entered in separate rows. The Grand Total must be equal to the total number of residential and business VGE access lines connected to the serving switches used by the CLEC.

Column 6. Enter either Owned, if access lines are connected to your own switch, or Leased, if you are purchasing switching service from another company

Column 7. If you are purchasing switching service from another company, provide name of company,

CLEC TABLE-2: DIGITAL ACCESS LINE COUNTS <u>not</u> VGEs) DO NOT INCLUDE UNE-P, RESOLD LINES, OR PRIVATE LINES IN THIS TABLE

112.4	2	3 4
Exchange	Pages Drie	Line Type Total Lines

NOTES/INSTRUCTIONS FOR COMPLETING TABLE-2:

A. The purpose of this table is to obtain a breakdown of digital access lines (reported in Table-1) by line type and actual line counts, not VGEs. Do not include lines or channels, such as private lines, that are not connected to a switch.

B. Each field must be populated. All entries must be made without quotation marks.

TABLE COLUMN INSTRUCTIONS:

Column 1. List exchanges in alphabetical order.

Column 2. Enter the abbreviation Res for Residential lines or Bus for Business lines. Each service type must be entered in separate rows.

Column 3. Enter Line Type & ISDN-BRI, ISDN-PRI, DS1, DS3, OC1, OC3, OCn (Identify value of n), VOB (If you are providing voice over broadband service), et Each type be entered in separate rows.

Column 4. Enter actual line count total, not VGEs, in the Total Lines column without duplication. EXAMPLE: Enter 1 for 1 DS1, 2 for 2 DS3s, etc. Each actual line count total must be entered in separate rows.

^{*} Your CLEC Company code is shown on the label affixed to the envelope in which this was mailed and on the cover letter.

CLEC TABLE-3: CLEC SWITCH DEPLOYMENT DATA

NOTES/INSTRUCTIONS FOR COMPLETING TABLE-3:

A. The basis for this table is to obtain information about the switches you have deployed that are serving end-user customers in Florida. Please provide the requested information even if serving switch is located outside of Florida.

TABLE COLUMN INSTRUCTIONS:

Column 1. List exchanges in alphabetical order.

Column 2. Enter Circuit or Packet to describe the type of switches located in the Exchange.
