Re: Docket No. 050018-WU – Initiation of deletion proceedings against Aloha Utilities, Inc., for failure to provide sufficient water service consistent with the reasonable and proper operation of the utility system in the public interest, in violation of section 367.111(2), Florida Statutes.

Dear Ms. Wrona:

Thank you for your correspondence and petition signed by homeowners of the Natura subdivision concerning the above-referenced docket, a copy of which are attached for your ready reference. Please be advised that the Commission's initiation of deletion proceedings against Aloha Utilities, Inc. relates to deletion from Aloha's service territory of only the following areas: Trinity (south of Mitchell Boulevard and east of Seven Springs Boulevard), Riviera Estates, Villa del Rio, and Riverside Village Unit 4.

Aloha will have an opportunity to protest the Commission's action and request a hearing on the matter. If a hearing is requested, a decision on whether any portion of those areas should be deleted will not be made until after a full evidentiary hearing is conducted.

If your subdivision is not located within one of those areas, it will not be possible for you to be included in the proceeding because the proceeding addresses those specific areas only. By operation of law, the proceeding cannot be expanded to include other portions of Aloha's service territory.

At its January 4, 2005 agenda conference, the Commission declined to initiate deletion of territory proceedings to include areas other than those referenced above. Nevertheless, the Commission will continue to closely monitor Aloha's progress toward achieving a standard of 0.1 mg/L of sulfides in its finished water to combat the black water problem experienced by a number of its customers. At a minimum, Aloha is required to meet that standard at the point where the finished water enters its distribution system. A final determination as to whether Aloha will be required to meet that standard at additional points in the distribution system, and whether removal versus conversion of sulfides will be required, depends on the outcome of a hearing scheduled for March 8, 2005, in Tallahassee.

RE: Aloha Utilities Inc.—PSC DOCKET 050018-WS

Gentlemen:

We are a small subdivision off Seven Springs Blvd., in the Seven Springs area of Aloha's service territory, behind Natures Hideaway subdivision (map enclosed). There are 64 homes in our subdivision, and 51 of the homeowners have signed the enclosed petition. I am sending you this petition on behalf of Natura homeowners who want to terminate Aloha Utilities Inc. as our water provider and instead have Pasco County Water Utility Service supply our drinking water.

Aloha has supplied water to our community, but it comes out blackish from our faucets and showerheads, with a very strong sulfur odor and a strong chlorine taste. In other words, it is unusable and undrinkable. Several of the homeowners have complaints of damaged and corroded water pipes and shortened lives for their appliances.

Please include us in the new Docket 050018-WS, which you will consider in the very near future, to terminate Aloha Water Utilities' license to provide drinking water to some communities that have filed petitions. We also deserve to have better water in our homes.

Enclosed is the signed petition from our homeowners and a list of names and addresses.

Thank you for your consideration.

Sincerely,

Roslyn B. Wrona

Re: Letter and Petition signed by Natura
Homeowners, dated January 27, 2005

Dear Ms. Gervasi:

We received your letter dated February 2, 2005, regarding our petition to become a part of PSC Docket 050018-WS. Since we cannot become part of this Docket, would you open up a new Docket on behalf of the homeowners in Natura, who wish to terminate Aloha Water Utilities as our water provider and instead be serviced by Pasco County Water Utilities.

Aloha has stonewalled any improvement for almost 10 years and we believe that the methods being proposed to cleanup the water, will be inadequate. We are also on wells number 8 and 9, as are the Seven Springs communities listed in your letter. As stated in our petition, the water comes out blackish from the faucets and showerheads, with a strong sulfur odor. These wells are not providing us with acceptable water.

Thank you for your attention to this matter

Sincerely,

Roslyn B. Wrona

Re: Docket No. 050018-WU – Initiation of deletion proceedings against Aloha Utilities, Inc., for failure to provide sufficient water service consistent with the reasonable and proper operation of the utility system in the public interest, in violation of section 367.111(2), Florida Statutes.

Dear Ms. Wrona:

Thank you for your letter dated February 8, 2005 concerning the above-referenced docket, in which you request that a new docket be opened to address the petition for deletion of territory signed by homeowners in the Natura subdivision.

As I mentioned in my previous letter to you, the Commission's initiation of deletion proceedings against Aloha Utilities, Inc. (Aloha or utility) relates to deletion from Aloha's service territory of only the following areas: Trinity (south of Mitchell Boulevard and east of Seven Springs Boulevard), Riviera Estates, Villa del Rio, and Riverside Village Unit 4. Should Aloha request a hearing on the matter, a full evidentiary hearing will be conducted in that docket, after which the Commission will determine, based on record evidence, whether Aloha has violated its statutory duty to provide water service that is not less sufficient than is consistent with the reasonable and proper operation of the utility system in the public interest because of the black water problem experienced by customers in those areas. At its January 4, 2005 agenda conference, the Commission considered the scope of the service area to be included in the proceeding, and, after discussion, declined to initiate deletion of territory proceedings to include areas other than those referenced above.

It would be premature to open another deletion of territory proceeding pending the outcome of Docket No. 050018-WU. If the Commission determines that the utility has not violated a statutory duty in that docket, or that the utility has violated a statutory duty but has since minimized the black water problem such that deletion of territory is unnecessary, it would be fruitless for the Commission to have initiated deletion proceedings to include other portions of Aloha's service territory for the same reasons that Docket No. 050018-WU was opened.

Moreover, Aloha is in the process of implementing a hydrogen peroxide treatment method to combat the black water problem in your area. The adequacy of that treatment process will not be known until after the process is implemented and optimized. Aloha continues to submit monthly progress reports to the Commission on this treatment process. In its most recent progress report

Ms. Roslyn B. Wrona
Page 2
February 21, 2005

submitted this month, Aloha indicates that the Department of Environmental Protection (DEP) has issued the initial permit for construction of a portion of the project design and that the company is preparing detailed project engineering drawings and readying the project documentation for supplemental DEP permit application submittals. It is my understanding that the pilot project will include areas that are served by wells 8 and 9. Therefore, your area may be one of the first areas within Aloha's service territory to benefit from this new treatment process.

Please be assured that the Commission will continue to closely monitor Aloha's progress toward minimizing the black water problem in your area. Again, thank you for your correspondence.

Sincerely,

Re: Petition from Natura Homeowners

Dear Ms. Gervasi:

Charles Beck told us you need additional information concerning Natura's Homeowners petition to the Florida Public Service Commission seeking to have the commission initiate a show cause proceeding against Aloha Utilities to delete our area from the company's certificate of authority. We are therefore enclosing a copy of original petition letter to the Public Service Commission dated January 27, 2005 and our letter dated February 8, 2005 to you.

We are asking you to open up a new docket. All the information you requested is in the letters. In our original petition letter received on January 31, 2005, we enclosed the original petition signatures, a map indicating our area and a homeowner's list of names.

This afternoon, I attended Pasco County Florida's Ad Hoc Committee Re Aloha Utilities and they adopted Aeration to solve the sulfur problem by a 5 to 7 vote. Aloha's representatives voted no. Again let me emphasis that Aloha is stalling and has no intention of improving the water supply. The method that they are proposing has never been used and not approved as a way of eliminating sulfur, which causes black water and corrodes water pipes. Aloha has been allowed for the last 10 years to provide an inferior product to us. We have a right to expect water that is not discolored and smells and tastes bad. We do not wish to wait another 10 years for Aloha to clean up their product.

We are therefore asking the Public Service Commission to take up our petition and deleted Aloha as our water provider.

I hope this information will help to you initiate a new docket.

Sincerely,

Roslyn B. Wrona
