SECTION 2.0 (CONTD) -RULES AND REGULATIONS

2.2 - Minimum Period of Service

The minimum service period for any invoice / billing period for all services provided by the Company is one month (30 days) except as otherwise explicitly provided in this Tariff. The customer must pay the regular tariffed rate for the service they subscribe to for the minimum period of service for each invoice / billing period. If a customer disconnects service before the end of the minimum service period, that customer is responsible for paying the regular rates for the remainder of the minimum service period. When the service is moved within the same building, to another building on the same premises, or to a different premises entirely, the period of service at each location is accumulated to calculate if the customer has met the minimum period of service obligation. (T)

If service is terminated before the end of the minimum period of service as a result of condemnation of property, damage to property requiring the premises to be abandoned, or by the death of the customer, the customer is not obligated to pay for service for the remainder of the minimum period. (T)

If service is switched over to a new customer at the same premises after the first month's service, the minimum period of service requirements are assigned to the new customer if the new customer agrees in writing to accept them. For facilities not taken over by the new customer, the original customer is responsible for the remaining payment for the minimum service period in accordance with the terms under which the service was originally furnished.

CONTENTS
