Managerial and Technical Capability – Resumes

WLS has the managerial experience and capabilities needed to enter the local exchange market in Florida.

WLS's President and CEO, Paul Stamoulis, brings with him over twenty (20) years of experience in the telecommunications industry. In the early 1980's, Mr. Stamoulis was involved in sales for ITT-USTS during the industry's early successful rollout of long distance services and equal access in the U.S. In the 1990's, Mr. Stamoulis was a sales manager for RCA during telecom's migration from analog to digital technology in data network technology and helped establish a standard of efficiency for int'l digital networks within the NY financial community. MCI acquired RCA's international network division in 1990 and Mr. Stamoulis was charged with managing all international network sales within the burgeoning financial industry. Mr. Stamoulis founded World-Link in 1992 and has been its leader, visionary and day-to-day manager ever since. Mr. Stamoulis was awarded a Master of Business Administration from Fordham University in Information Technology and is an active industry speaker in multiple trade associations.

In his capacity as President and CEO, Mr. Stamoulis is responsible for all facets of WLS's operations, including day-to-day management, administration, sales and implementation of WLS's long-term expansion and growth strategy.

Mr. Stamoulis and WLS are supported by an experienced and well-qualified management team. Additional biographical information regarding WLS's Management is attached hereto.

B. Technical Qualifications

As demonstrated in the professional biographies of WLS's key management personnel, the Company has the technical experience needed to provide telecommunications services, including local exchange services. Because WLS is primarily a reseller of telecommunications services supplied by licensed, facilities-based wholesale suppliers (such as Broadview), WLS will rely on its underlying carriers to provide the necessary technical services and for maintenance of their networks. WLS management maintains a close liaison with its underlying carriers and is therefore able to quickly resolve any technical difficulties which may arise.

World-Link Solutions, Inc.
Management Bios

Paul Stamoulis - President & CEO – Paul has been involved in telecom for over 20 years. In the early 1980's Paul was in sales for ITT-USTS during the industry's early successful rollout of long distance services and equal access in the US. In the 1990's, Paul was a sales manager for RCA during telecom's migration from analog to digital technology in data network technology and helped establish a standard of efficiency for int'l digital networks within the NY financial community. MCI acquired RCA's international network division in 1990 and Paul was charged with managing all int'l network sales within the burgeoning financial industry. Recognizing the opportunity of ethnic and international marketing within the USA, Paul founded World-Link in 1992 and has been at the helm ever since. Paul was awarded a Master of Business Administration from Fordham University in Information Technology and is an active industry speaker in multiple trade associations.

Konrad Nierwinski – Vice President of Sales and Marketing – Konrad has been a key member of World-Link's management team for over 5 years, where he held multiple senior positions, such as Director of Operations and Managing Director of the retail business unit. In 2004 he directed the successful launch of local telephone service to ethnic communities in the State of New York. Konrad and his team were awarded on multiple occasions by trade associations and industry partners, such as the 27th Annual Telly Awards for the best TV commercial spot in 2006 or the Most Creative Invoice Message Award by OSG Billing Solutions in 2005. Konrad holds a Master of Business Administration in International Business from Lubin School of Business at Pace University, and is an active industry speaker.

Iulian Ionescu – Vice President of Finance – Iulian is the newest member in the World-Link Management team and he held various positions in the company over the last 4 years. His expertise and knowledge helped develop the wholesale unit and he was an active member in the team that created the WLexchange service. With a major in Economics, Iulian was able to help improve the business processes of World-Link over the last 4 years and successfully manage the entire Finance Department. Coming from a banking environment he quickly adapted to the Telecommunications Industry and became a key member of World-Link's management.

When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between Sheets 14 and 15 would be 14.1.
- B. **Sheet Revision Numbers** – Revision numbers also appear in the upper right corner of each sheet. These numbers are used to determine the most current sheet version on file with the FPSC. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. that the FPSC follows in their Price List approval process, the most current sheet number on file with the Commission is not always the Price List sheet in effect. Consult the Check Sheet for the sheet currently in effect.
- C. **Paragraph Numbering Sequence** – There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(A).I.
 - 2.1.1.A.1.(A).I.(i).
 - 2.1.1.A.1.(A).I.(i).(1).
- D. **Check Sheets** – When a Price List filing is made with the FPSC, an updated check sheet accompanies the Price List filing. The check sheet lists the sheets contained in the Price List, with a cross reference to the current revision number. When new sheets are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some sheets). The Price List user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the FPSC.

The Public Pay Telephone Surcharge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call.

Whenever possible, the Public Pay Telephone Surcharge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Public Pay Telephone Surcharge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.

SECTION 4.0 – MISCELLANEOUS SERVICES AND RATES (Cont'd)**4.5 Custom Calling Features**

The features in this section are made available to Residential Customers on a per use basis. All features are provided subject to availability. Customers may utilize each feature by dialing the appropriate access code. The Customer will be billed the per feature activation charge shown in the table below each time a feature is used by the Customer. Transmission levels for calls forwarded or calls placed or received using optional calling features may not be acceptable for all or some uses in some cases.

4.5.1 Feature Descriptions

Call Forwarding – Fixed, Busy Line No Answer – This feature, when activated, redirects attempted terminating calls to another Customer-specified line. Call originating ability is not affected by Call Forwarding – Fixed, Busy Line No Answer. The calling party is billed for the call to the called number. If the forwarded leg of the call is chargeable, the Customer with the Call Forwarding – Fixed, Busy Line No Answer is billed for the forwarded leg of the call. Calls cannot be transferred to an International Direct Distance Dialing number.

Speed Calling – This feature allows a user to dial selected numbers by means of an abbreviated code. This feature is available in either an 8 number or a 30 number capacity. The Speed Calling list can only accommodate a number consisting of 15 digits or less.

Caller ID - Allows a Customer to see a caller's telephone number previewed on a display screen before the call is answered. Caller ID requires the use of specialized CPE not provided by the Company

Caller ID with Name – Allows a Customer to see a caller's name and number previewed on a display screen before the call is answered. Caller ID with Name requires the use of specialized CPE not provided by the Company.

Call Forwarding – A Customer activated feature that automatically transfers all incoming calls from the Customer's telephone number to another dialable telephone number until the Customer deactivates the feature. If forwarded to a long distance number the Subscriber will incur the long distance charges.

Call Trace – Allows a called party to initiate an automatic trace of the last call received. Call Trace is available on a usage basis only.

Call Blocking – Allows Customer to block calls from different telephone numbers. A screening list is created by Customer either by adding the last number associated with the line (incoming or outgoing) or by pre-selecting the telephone number to be blocked. Callers from such numbers hear an announcement that the calling party is not accepting calls and Customer's phone will not ring.

4.5 Custom Calling Features

4.5.1 Feature Descriptions (Cont'd)

Call Waiting - Call Waiting provides a tone signal to indicate to a Customer already engaged in a telephone call that a second caller is attempting to dial in. This feature permits the Customer to place the first call on hold, answer the second call and then alternate between both calls.

Call Waiting with Caller ID with Name – Call Waiting with Caller ID with Name provides a tone signal to indicate to a Customer already engaged in a telephone call that a second caller is attempting to dial in and allows a Customer to see a caller’s name and number previewed on a display screen. This feature permits the Customer to place the first call on hold, answer the second call and then alternate between both calls.

Three Way Calling – Permits the Customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference.

Call Return - Allows Customer to automatically dial the number of last incoming call, whether or not Customer answered phone.

Anonymous Call Rejection - Allows you to refuse calls from those who have blocked their numbers.

Repeat/Auto Dial – A feature that, when activated, automatically checks a busy number and when the line is free, rings the Customer back and completes the call.

Caller Identification Blocking: Allows the name and number of the calling party to be blocked from being transmitted when placing outbound calls.

Per Call Blocking: To activate per-call blocking, a Customer dials a special code prior to placing a call. Blocking will be activated for that outgoing call only. There is no charge for using per call blocking, and it is provided on an unlimited basis.

Per Line Blocking: When blocking is established on the line, it can be deactivated by dialing a code before each call. This one call unblock allows the name and/or number to be sent for that one call only. There is no charge for per line blocking.

A Customer may obtain assistance, for a charge, in determining a telephone number by dialing Directory Assistance Service.

4.7 Busy Line Verification and Emergency Interrupt Service

Upon request of a calling party, the Company will verify a busy condition on a designated local service line. The operator will determine if the line is clear or in use and report to the calling party. At the request of the Customer, the operator will interrupt the call on the busy line. Emergency Interruption is only permitted in cases where the calling party indicates an emergency exists and requests interruption and is performed once the line status has been determined through the Busy Line Verification process.

If the Customer has the operator interrupt a call, both the Busy Line Verification and the Emergency Interrupt charge will apply.

No charge will apply when the calling party advises that the call is to or from an official public emergency agency. Busy Verification and Interrupt Service is furnished where and to the extent that facilities permit.

The Customer shall indemnify and save the Company harmless against all claims that may arise from either party to the interrupted call or any person.

4.8 Directory Listing Service

4.8.1 General

The following rates and regulations apply to standard listings in light face type in the white pages (alphabetical section) of the telephone directory and to the Directory Assistance records of the Company.

Directory listings are limited to such information as is essential to the identification of the listed party. The listing of a service, commodity, or trade name is not permitted unless it is the name, or an integral part of the name, under which the Customer does business.

A listing is limited to one line in the directory, except where in the judgment of the Company, more than one line is required to identify the Customer properly. In such cases, the additional lines required are provided at no extra charge.

Dual name listings are permitted as a regular directory listing for residential service.

Listing services are available with all classes of main telephone exchange service.

4.8.2 Listings

A. Primary Listing

One listing, termed the primary listing, is included with each exchange access line and each joint user.

Ordinarily, all additional listings are of the same address and telephone number as the primary listings, except as provided for joint user and alternate number listings.

Special Types of Additional Listings include:

Duplicate Listings – A listing of another name by which the customer is known, such as a nickname, abbreviated name, a name commonly spelled in more than one way, and a name consisting of several words which the public commonly rearranges. The listing may be complete or in a cross-reference form.

C. Nonpublished Service

The telephone numbers of nonpublished service are not listed in either the Company's alphabetical directory or Directory Assistance records available to the general public.

Incoming calls to nonpublished service will be completed by the Company only when the calling party places the call by number, and no exception will be made, nor will the Customer be called to determine whether he/she wishes to receive the call, even though it appears that the calling party desires the connection because of an emergency.

The Company is not responsible for any claims made or liability arising from failure to receive calls because of this arrangement.

The Subscriber indemnifies (i.e., promises to reimburse the Company for any amount the Company must pay as a result of) and save the Company harmless against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the publication of a non-published service or the disclosing of said number to any person.

D. Nonlisted Service
