BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition by BellSouth
Telecommunications, Inc. for Waiver of
Rule 25-4.079(5), Florida Administrative Code

) Docket No. _____
)
)
) Filed: June 1, 2006

BellSouth Telecommunications, Inc.'s Petition for Waiver of
Rule 25-4.079(5), Florida Administrative Code

BellSouth Telecommunications, Inc. ("BellSouth"), pursuant to Section 120.542, Florida Statutes, and Rule 28-104.002, Florida Administrative Code, hereby petitions the Florida Public Service Commission ("Commission") to waive the requirements of Rule 25-4.079(5), Florida Administrative Code, regarding BellSouth's provision of specialized Customers Premises Equipment ("CPE") for lease or sale to hearing/speech impaired persons for the reasons set forth below. Specifically, BellSouth seeks the following:

1.   BellSouth is a local exchange company lawfully doing business in the State of Florida whose regulated operations are subject to the jurisdiction of the Commission pursuant to Chapter 364, Florida Statutes.

2.   BellSouth's principal place of business is 675 West Peachtree St., NE, Suite 4500, Atlanta, Georgia 30375. Pleadings and process may be served upon:

> James Meza III
> Manuel A. Gurdian
> c/o Nancy H. Sims
> 150 South Monroe Street
> Suite 400
> Tallahassee, Florida 32301

3. Subsection (5) of Rule 25-4.079 requires LECs, pursuant to tariff, to provide specialized CPE, for lease or sale, at cost, to hearing/speech impaired persons.

4. Specifically, Rule 25-4.079(5) provides as follows:

(5) Each LEC shall, pursuant to tariff, provide specialized customer premises equipment (CPE), for lease or sale, to hearing/speech impaired persons. This specialized CPE shall be priced to cover fully allocated costs without inclusion of a rate of return on investment component. Each LEC shall provide at least one type of each of the following categories of specialized CPE:

     (a)   audible ring signalers;
     (b)   visual ring signalers;
     (c)   TDDs;
     (d)   volume control handsets.

5. Rule 25-4.079 cites to Florida Statutes § 350.127(2) as the "specific authority" for the Rule. Florida Statutes §§ *364.01(4), 364.02, 364.025, 364.03 364.04* are cited to as the "Law Implemented."

6. The Rule's purpose is to provide to hearing/speech impaired persons the same telecommunications opportunities that are available to other subscribers at reasonable costs. See *In re: Adoption of Rule 25-4.079 – Hearing/Speech Impaired Persons*, Docket No. 870744-TP, Order No. 18789 (February 3, 1998).

7. Subsequent to the Rule's enactment, in 1991, the Florida Legislature passed the Telecommunications Access System Act ("TASA") (§§ 427.701-427.708). The intent of TASA is to provide access terminals required for basic telecommunications services for Deaf, Hard of Hearing, Speech Impaired

and Dual Sensory Impaired persons, in the most cost effective way. *See* F.S. §
427.702.

8.   TASA required the Commission to designate a non-profit
corporation to administer the telecommunications relay service system and
distribute specialized telecommunications devices, such as TDDs, volume control
handsets, and ring signaling devices. *See* F.S. § 427.704(1). In response to this
mandate, the Commission directed LECs to form a non-profit corporation to fulfill
the TASA requirements.

9.   The non-profit corporation formed by the LECs is known as Florida
Telecommunications Relay, Inc. ("FTRI").

10.   The costs incurred by FTRI of providing telecommunications relay
services and distributing specialized telecommunications devices is spread
equitably among and collected from customers of all local exchange
telecommunications companies in the State of Florida. *See* F.S. § 427.702(3)(i).

11.   FTRI's equipment distribution program and the Florida Relay are
funded by a monthly surcharge billed to all telephone customers in Florida. *See*
F.S. § 427.704(4)(a)(1). Through this program, FTRI loans specialized telephone
equipment and ring signaling devices to all qualified permanent residents of
Florida for as long as they need it, at no charge. *See* documents obtained from
FTRI's website at www.ftri.org attached hereto as Exhibit "A."

12.   FTRI provides, *inter alia*, at no charge, a Volume Control Phone for
the Hearing Impaired; a Volume Control Phone for the Speech Impaired; a Text
Telephone, also known as a Telecommunications Device for the Deaf; an

Audible Ring Signaler; and a Visual Ring Signaler. *See* list of FTRI products attached hereto as Exhibit "B."

13.   FTRI has contracted with non-profit organizations throughout the state to be Regional Distribution Centers to meet the needs of hearing and speech impaired residents. At these centers, a hearing/speech impaired person may have an equipment application processed, see a demonstration of the equipment, receive equipment training, receive ongoing equipment maintenance service and obtain local support services. *See* list of the FTRI's Regional Distribution Centers attached hereto as Exhibit "C."

14.   FTRI's application process is a simple process. *See* FTRI application forms attached hereto as Exhibit "D."

15.   Since the enactment of the Rule, BellSouth has been providing specialized CPE to its hearing/speech impaired customers in Florida.

16.   Currently, very few hearing/speech impaired customers purchase or lease specialized CPE from BellSouth. Specifically, for the last three year period from January 1, 2003 to December 31, 2005 only a total of 608 pieces of equipment were sold or leased in Florida.

17.   The Commission's requirement that BellSouth provide specialized CPE to customers imposes a financial burden on BellSouth because it forces BellSouth to incur administrative costs in complying with the Rule. In addition, the Rule requires BellSouth to only charge its costs for the equipment. Such a requirement is no longer necessary given the FTRI's provision of this same equipment for free. Further, to the extent a hearing/speech impaired customer

desires to purchase/lease the equipment from BellSouth instead of receiving it from FTRI, BellSouth should be allowed to charge competitive prices consistent with other providers of the same equipment. Indeed, there are numerous competitive providers who are providing the same or substantially similar equipment at prices that are below, the same or higher than the prices that BellSouth is currently charging for the specialized CPE for those individuals who decide not to obtain the specialized CPE from FTRI. *See* documents obtained from the websites of competitive providers attached hereto as Exhibit "E."

18.   Based upon the Commission's direction to the LECs to create FTRI, it is quite evident that a Commission rule requiring a LEC to provision, pursuant to tariff, specialized CPE, for lease or sale, to hearing/speech impaired persons, is no longer needed to protect Florida consumers and is an unnecessary regulatory and financial burden on LECs. No hearing/speech impaired persons would be prejudiced by such a finding because they can obtain substantially similar equipment from FTRI for *free*.

19.   The specific facts provided above clearly demonstrate that BellSouth suffers a substantial hardship that would justify a waiver for BellSouth.

20.   Accordingly, based upon the foregoing, BellSouth requests that the Commission permanently waive the provisions of FPSC Rule 25-4.079(5) requiring BellSouth to provide, pursuant to tariff, specialized CPE, for lease or sale, at cost, to hearing/speech impaired persons.

WHEREFORE, BellSouth requests that, having demonstrated good cause, the Commission waive the provisions of Rule 25-4.079(5) that require

BellSouth to provide, pursuant to tariff, specialized CPE, for lease or sale, at cost, to hearing/speech impaired persons.

Respectfully submitted this 1st day of June, 2006.

About FTRI

About Us

Florida Telecommunications Relay, Inc. (FTRI) is a statewide not-for-profit organization that administers the Specialized Telecommunications Equipment Distribution Program for citizens of Florida who are Deaf, Hard of Hearing, Deaf/Blind and Speech Impaired.

The Florida Legislature passed the Telecommunications Access System Act (TASA) in 1991. The intent of TASA (F.S. 427) is to provide access terminals required for basic telecommunications services for Deaf, Hard of Hearing, Speech Impaired and Dual Sensory Impaired persons, in the most cost effective way.

In response to TASA, the Florida Public Service Commission (FPSC) directed local exchange telephone companies to form a not-for-profit corporation to fulfill the TASA requirements. FTRI registered with the Florida Department of State as a not-for-profit corporation, effective June 13, 1991, and is a 501(c) (3) corporation.

TASA mandates that the FTRI equipment distribution program and the Florida Relay be funded by a monthly surcharge billed to all telephone customers in Florida. Click here for TASA Surcharge Report.

The specialized telephone equipment and ring signaling devices provided through this program is loaned to all qualified permanent residents of Florida for as long as they need it, at no charge.

The following chart is a brief summary of the equipment distribution program, recently and since its inception in 1991.

Florida Telecommunications Relay, Inc.

LET FREEDOM (((RING)))

We provide specialized telecommunication equipment that enables people who are Deaf, Hard of Hearing, Deaf/Blind, or Speech Impaired to place and receive their own phone calls. If you qualify, FTRI will provide the equipment and training at **NO CHARGE**. Available equipment and their descriptions are listed below.

Qualifying residents may receive one piece of equipment from each category at no charge.

Specialized Telephones (Category A)

Volume Control Phone for the Hearing Impaired (VCPH) 40 dB

* Makes incoming speech clearer.
* Includes a volume control adjustment.
* Ring volume up to 95 dB.
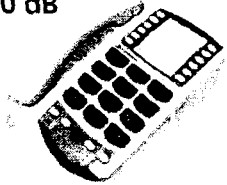

Text Telephone (TTY), also known as a Telecommunications Device for the Deaf (TDD)

* Used to type a message to another TTY user or a person using a standard telephone through the relay service.
* Built-in ring flasher that lights up when the phone rings.

Voice Carry-Over/Hearing Carry-Over/Text Telephone (VCO/HCO/TTY)

* Used as a standard telephone, VCO, HCO, or TTY.
* Allows you to listen to the caller and type a reply on the telephone keypad.
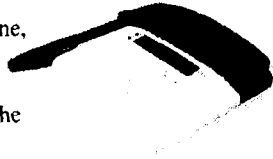

Voice Carry-Over Telephone (VCO) 30 dB

* Allows a person to receive a text message through a relay service and verbally reply to the caller with his or her own voice.
* Ring volume up to 85 dB.

Volume Control Phone for the Speech Impaired (VCPS) 18 dB

* Provides more volume when speaking.
* Ring volume up to 75 dB.
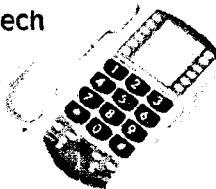

Captioned Telephone (CapTel)

* Displays every word the caller says.
* Allows user to listen to the caller.

Ring Signaling Devices (Category B)

Audible Ring Signaler (ARS) 95 dB

* Plugs into a jack away from the telephone.
* Or connects directly to the telephone.
* Rings when the telephone rings and allows you to adjust the tone and volume.

Visual Ring Signaler (VRS)

* Connects to a lamp.
* Makes lamp flash on and off when the telephone rings.
* Has a remote receiver that allows lamp to flash in other rooms.

Eligibility

Specialized Telephone Equipment

-- VCPH...Volume Control Phone for the Hearing Impaired (40dB)

-- VCO...Voice Carry-Over Phone

-- VCPS...Volume Control Phone for the Speech Impaired

-- VCO/HCO/TTY... Voice Carry-Over Hearing Carry-Over Text Telephone and Standard Telephone

-- TTY...Text Telephone (Also known as TDD - Telecommunications Device for the Deaf)
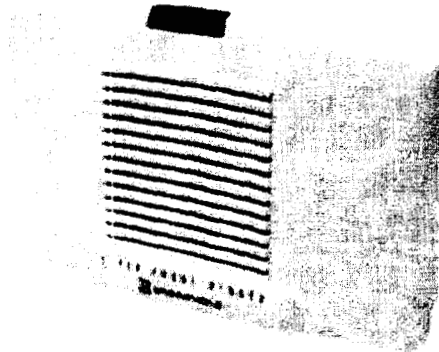

-- ILA.. In Line Amplifier

-- LVD...Large Visual Display for deaf and sight impaired

-- RC 200 - for individuals who are both hearing or speech impaired and mobility impaired

-- Gewa - Jupiter Telephone

-- TeliTalk Speech Aid Telephone - for individuals who have had laryngectomy surgery

AT NO CHARGE to qualifying residents
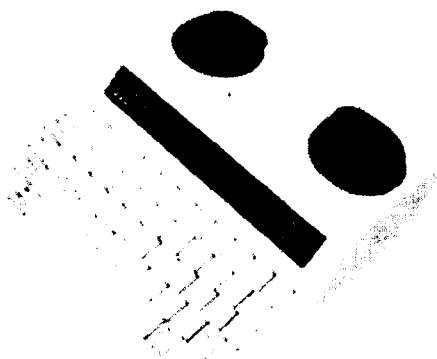

TTY...Text Telephone (Also known as TDD - Telecommunications Device for the Deaf)

- Used to type a message to another TTY user or a person using a Relay service
- Built in ring flasher that tells you when someone is calling
- Turbo Code communication protocol. This feature transmits signals to other Turbo Code TTYs as fast as you type. Turbo Code also lets you interrupt the other person's typing
- Auto ID alerting system that automatically alerts the answering party that you are calling by TTY
- Call progress displays ringing or busy status of the telephone line
- Auto-answer answers calls while you are gone and plays back messages when you return or when you call from another TTY
- Relay voice announcer that sends a voice message saying "Please use text telephone or dial relay," followed by the number of your relay service
- Keyboard dialing from the keyboard or memory, and redialing of the last number called
- 32K memory - enough to save hundreds of memos and telephone numbers
- Normal, bold, or wide print sizes
- Automatic printing of date and time on conversations
- Extra telephone jack for a signaler or telephone
- Sticky keys, a feature that allows typing with only one finger if necessary

Exhibit D

Qualifying is a simple process.
Just meet these eligibility requirements:

- Be a Florida resident.
- Be three years of age or older to receive the Volume Control Phone for the Hearing Impaired (VCPH), In-Line Amplifier (ILA), Audible Ring Signaler (ARS), or Visual Ring Signaler (VRS).
- Be five years of age or older to receive a Text Telephone (TTY).
- Be certified as having one of the following impairments:
  - Deaf: You must have permanent hearing loss and be unable to recognize speech sounds during telephone conversations with or without an amplification device.
  - Hard of Hearing: You must have a permanent hearing loss severe enough that you need to use amplification devices to recognize speech sounds during telephone conversations.
  - Deaf/Blind: You must be deaf and blind or have both a permanent hearing and visual impairment.
  - Speech Impaired: You must have a permanent speech impairment so that you cannot use a standard telephone.

Receiving the specialized equipment is easy.
Just follow these three steps:

1. Meet the eligibility requirements listed above.
2. Fill out the attached FTRI equipment application. (See the instructions that follow.)
3. Have the application certified by one of the following:
   - Deaf Service Center Director
   - Hearing Aid Specialist
   - Audiologist
   - Licensed Physician
   - Speech Pathologist
   - Appropriate State or Federal Agency Representative
   - State Certified Teacher for the Hearing Impaired
   - State Certified Teacher for the Visually Impaired

Filling out the application is simple.
Just follow these three easy steps:

Step 1: Fill in Section 1.
- Fill in this section by printing clearly or typing the information.
- Make sure to fill in every blank and box. If you forget to fill in any part of the application, we will have to return it to you. This will cause a delay in receiving your equipment.
- Check the equipment that you need in both Categories A and B.
- Call FTRI toll free at **1-800-222-3448 (Voice)** or **1-888-447-5620 (TTY)** if you have any questions.

Step 2: Fill in Section 2.
The person who is certifying your application must fill in this section. Professionals in Florida who can certify your application are listed on the application in Section 2.

Step 3: Return your application.
Florida residents have choices as to how they receive their equipment. They may visit one of FTRI's Regional Distribution Centers (RDCs), or they can have their equipment application processed through FTRI by mail. They also can request to have their equipment shipped to their certifier, if appropriate.

Processing your FTRI equipment application.

- Visit one of the FTRI Regional Distribution Centers (RDCs). With one appointment, you can
  - Have your equipment application processed.
  - See a demonstration of your equipment.
  - Pick up your requested FTRI equipment.
  - Receive equipment training.
  - Obtain other local support services.
  - For a listing of RDCs, call FTRI at 1-800-222-3448 (V) or 1-888-447-5620 (TTY).
- Or, mail your application to the Tallahassee office if you live in an area not supported by an RDC. FTRI will process your application and ship your equipment to you through UPS.
- Clients who wish can have their equipment sent to their certifier. Please note this request on your application under shipping address.

Mailing in your equipment application:
- Mail the original (white) copy of the application and the RDC (yellow) copy to FTRI at 1820 E. Park Avenue, Suite 101, Tallahassee, FL 32301.
- Keep the instruction page and the client (pink) copy of the application for your records.
- Allow 4–6 weeks for processing and shipping after FTRI receives your application.

Note to Certifiers:
By signing this application, you are attesting to the following:

- You are eligible to certify under the provision of the law.
- You have reviewed the applicant's hearing loss or speech impairment to determine applicant's eligibility.
- You have reviewed the information provided by the applicant to ensure that the form is completed properly and all requested information has been provided.

FLORIDA TELECOMMUNICATIONS RELAY, INC.

CONDITIONS OF ACCEPTANCE

OWNERSHIP

Equipment is provided to residents of the State of Florida for their use but remains the property of FTRI. It is the responsibility of the individual using this property to care for it and to return it to FTRI if they are no longer a Florida resident. **The applicant agrees to protect the equipment from damages caused by rain, heat and physical abuse and maintain care of original box, container, accessories and instruction manual. If equipment is abused, the applicant can be held financially responsible for replacement or refurbishment cost.** _____

(applicant's initials)

THEFT/FIRE

In the event equipment is stolen or destroyed, the applicant will be required to provide a copy of the police/sheriff/fire report before a replacement will be issued. If the loss is covered by insurance the proceeds from any claim will be forwarded to FTRI at the address below.

LOST

If the equipment is lost, the applicant must write to FTRI at the address below. The applicant understands that he/she will not be immediately issued (loaned) a replacement piece of equipment.

DAMAGE/REPAIR

Should the equipment fail, the applicant is responsible for contacting FTRI, or a local regional distribution center. If equipment is damaged, the applicant will **NOT** try to repair or disassemble. FTRI or a local regional distribution center is responsible for replacing equipment in need of repair. DO NOT CALL THE LOCAL TELEPHONE COMPANY FOR REPAIRS OF FTRI EQUIPMENT.

TRAVEL

The applicant understands that this equipment is the property of FTRI. The applicant can travel out of Florida with equipment for no more than 90 consecutive days.

CHANGE OF ADDRESS/MOVING

The applicant is responsible for notifying FTRI of any change in address or telephone number within twenty (20) business days. If the applicant moves out of the State of Florida, he/she must contact FTRI or a local regional distribution center at least three (3) weeks **BEFORE** he/she leaves the State of Florida for instructions on returning equipment.

SALE OR LOAN

Because the equipment is the property of FTRI, the applicant will not sell it. The applicant will not give it or loan it to others. The applicant understands that if the equipment is sold or loaned, the applicant can be held responsible for replacement cost.

FALSE STATEMENT

The applicant understands that it is against the law to file false statement regarding loss, damage or stolen property. The applicant further understands that false statements filed by the applicant can result in loss of participation in the program. **The applicant does hereby swear and depose that he/she is a legal citizen of Florida and has a hearing loss, speech impairment or dual sensory impairment, such that the use of assistive listening devices obtained from this specialized equipment telecommunications program is medically necessary and does not already have specialized equipment from this program.** _____

(applicant's initials)

LIABILITY AND LIMITATION OF RESPONSIBILITY

The undersigned agrees to defend and indemnify FTRI from any and all claims, damages and expenses arising out of use or misuse of the equipment by anyone. FTRI does not make any representation as to the merchantability of the specialized equipment and assumes no responsibility or liability for the use or performance of the equipment. FTRI does not extend any warranties of merchantability of fitness for particular service in connection with the transfer of this equipment. The user of the equipment is responsible for the use and operation of equipment received by him/her.

DENIAL

Failure to comply with these Conditions of Acceptance can result in the applicant's being denied participation in the Specialized Telecommunications Equipment Distribution Program.

Having read the above conditions or having had them explained to me, I agree to comply with (follow) all of the conditions. I further understand that this in no way impinges on (interferes with) my ability to use the Florida Relay Services.

RINGMAX Amplified Ringer
MSRP: $52.00
Have you been missing important phone calls? You don't have to anymore. If you have difficulty hearing the phone ring, the RINGMAX can help. The RINGMAX is an amplified phone ringer that lets you customize your phone ring for better hearing. With the RINGMAX, you can quickly and easily increase the volume, then set the tone and "warble" to a pitch that's best for you. Four specially selected tone settings emphasize those frequencies easiest to hear. Total sound output is 95 dB SPL at 1 meter. The RINGMAX is perfect for the shop, garage, or other noisy environments.

PAYPHONE TTY model: K-PPTTY
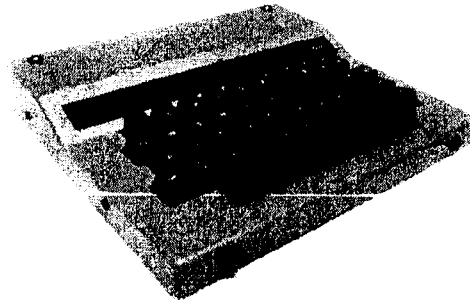

What is a Public Phone TDD?
The Public Phone TDD is a TDD (or TTY) which has been designed to work with any public telephone. TTYs are devices that people who are deaf, hard-of-hearing, or speech impaired use to make telephone calls.

This low profile TTY may be mounted on an existing pay phone shelf with any available flat surface measuring 9.5" W X 8.5" L X 1.25" H. The high-tech, stainless steel unit consists of a vandal-proof, sealed keyboard (to resist spilled liquids); bright, 16-character display screen; call progress indicator. This is a direct-connect TTY that is hard-wired through the tip and ring terminals of the public telephone. Simply turn the power on press any key to turn power on and proceed with the TTY call as usual. We can supply the cabinet enclosure at an additional charge.

Feature:

- BUILT-IN LARGE DISPLAY
- Fast Type
- Works with almost all types of public telephone and popular enclosures.
- Does not affect the use of the telephone by the hearing users.
- Approved by the RDD - has also been accepted by several major telephone equipment providers.

Efforts that began years ago with the installation of wheelchair ramps for access to public buildings now continue with the installation of Public Phone TDDs for access to public pay telephones.

The people who use TDDs can have direct, reliable access to public telephones, a necessity that the hearing population takes for granted.

Public Phone TDDs have been installed and are now working in airports,

KROWN VTouch TTY model: K-VTTTY
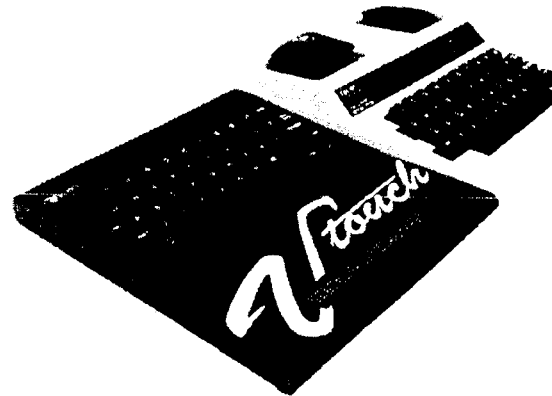

Communication with Krown VTouch TTY will be faster and more convenient for the Deaf-Blind.

To aid the Deaf-Blind in having a conversation over the telephone, Krown Manufacturing Inc. has developed a new Krown Braille-TTY telephone. This device allows the user to communicate with a Relay Operator, another TTY, or even a Braille-TTY user in the United States and all over the world. The conversation is shown on the Braille display from the VTouch Braille Terminal.

Features:

- Keyboard: 2 modes: TTY keyboard with 47keys 14 function keys. Perkins style 7 keys Braille keyboard with soft-switch.
- Display: 20 characters Blue vacuum fluorescent
- DC adapter: 9V, 1200mA Communications: Baudot 45.5 or International speed selectable
- Battery: Heavy duty Ni-Cad 5 pack 1700mA/h

- Large conversation memory. Up to 32,768 characters and 4 programmable buffers. It's great for greeting messages, memos, or to save time on a long distance call.
- Directly connects to the telephone line or acoustically couples to the telephone handset.
- Automatic Answering machine records unlimited messages up to 30,000 characters total.
- Remote message retrieval with password protection.

Amplified Telephones > TTY Phones >

What does TTY stand for?
TTY stands for text telephone or teletypewriter. TDD is another common acronym that is referring to the same communications device. TDD stands for **T**elecommunications **D**evice for the **D**eaf. TTY and TDD means that a phone is enabled to send text over the telephone lines.

Uniphone Series

Combination TTY, Telephone and Amplified Phone - All in One!

The Uniphone is an exciting new concept in TTYs, combining a telephone, TTY and amplified phone - all in one! Now, people who are deaf, hard of hearing, or hearing can all share one phone. It's the one phone your whole family will enjoy.

A full-featured TTY, the Uniphone includes a bright 2-line display and a comfortable keyboard to make TTY conversations easy. Its modern, attractive design complements any room or office.

It is perfect for making Voice Carry Over (VCO) calls. With VCO, you speak directly to the other person and read their typed responses on the display. VCO calls can be made through a toll-free relay service, or directly between Uniphone users for absolute privacy. In a similar way, people who can hear but cannot speak can make Hearing Carry Over (HCO) calls.

The amplified handset lets you adjust the volume to the most comfortable setting.

The Uniphone 1140 answers calls with your personalized greeting, and takes TTY messages when you are unavailable. The 8k memory lets you save and review Auto-Answer messages, conversations and your personalized greeting.

Ten speed dial locations let you reach frequently-called

numbers with the touch of a button. It even includes special keys to store emergency phone numbers.

The Uniphone 1000, a basic unit without memory or Auto-Answer, is also available.

The Uniphone 1140 & 1000:

- Totally NEW concept in TTYs!
- Volume control for telephone handset (20dB gain)
- Special convenience keys: Dial & Volume control
- Direct connect
- Keyboard dialing, follow-on dialing
- Call progress (says "ringing" or "busy")
- Turbo Code® and Auto ID™
- 2-line, 2 x 24-character LCD display
- Baudot code (45.5 baud)

The Uniphone 1140 also features:

- 10 speed dial keys
- Special emergency, menu, and arrow keys
- Display with backlight
- 8k memory
- Built-in ring flasher
- Auto-Answer with programmable message
- Printer port to connect an external printer

Superprint Series

*Advanced
printing TTYs
for home or
business use*

Put the power of advanced
technology at your fingertips with the deluxe
Superprint 4425. This feature-packed TTY includes
sophisticated capabilities, giving you more choices than
ever!

It features direct connect with two built-in telephone
jacks and advanced calling features like auto-busy
redial, three way calling, and TTY transfer. Call progress
tells you if the phone you are calling is ringing or busy.
Auto-Answer records messages when you are
unavailable.

The 32k memory lets you save hundreds of telephone
numbers, memos, and Auto-Answer messages by name.
You can personalize greeting messages, memos, and
outgoing Auto-Answer memos. Convenient arrow keys
make it easy to review information saved in memory.

Plus, it includes Turbo Code for more natural
conversations with interrupt capability and E-Turbo for
simplified relay calling.

The TTY Announcer lets hearing people know you are on
the line. The User-programmable Relay Voice Announcer
tells hearing callers to use a TTY or use relay, and gives
the phone number for your relay service. Auto ID lets
everyone you call know that you are using a TTY.

A more basic model, the **Superprint 4225**, is also available. This model has memory but does not have direct-connect features.

Perfect for businesses or people who rely on TTYs all the time, the Superprint TTYs make a great impression!

Superprint 4425 Features:

- Built-in, 24-character printer
- 3 selectable print sizes
- 32k memory
- Date/time printed at the beginning of each call
- Turbo Code® and Auto ID™
- E-Turbo* for simplified relay calling
- User-programmable Relay Voice Announcer
- Direct connect (with 2 jacks) to standard telephone line
- Built-in ring flasher
- Call progress
- Auto-Answer capabilities (with programmable message)
- Auto-busy redial, Wait for Response and 3-way calling
- Remote message retrieval
- Arrow keys for easy review of memory
- Convenient GA/SK keys
- Easy-touch greeting memo
- Tone or pulse dial
- Keyboard dialing, follow-on dialing, call transfer
- Memory dialing/redial
- TTY Announcer™
- Baudot code (45.5/50 baud rate)
- Sticky key feature (for single-handed typing)
- ASCII code is available

* E-Turbo currently available with Sprint Relay only.

Telephone Ring Signalers

Never Miss a Call

Make sure you are alerted to *every* telephone call. These signalers plug directly into the telephone line then alert you when you receive a call. Choose from two styles: **wall-mount**

or **desktop**.

Both models can flash a plugged-in lamp to alert you or signal **Remote Receivers** to alert you in other rooms. As an alternative, the wall-mount models can be used with the **Add-On Strobe**. This makes the wall-mount models ideal for areas where a lamp is impractical such as in small areas like hallways and dorm rooms.

- > Buy online!
- > Which signaler is right for me?

Model L

- Plugs directly into telephone line.
- Built-in outlet to flash your plugged-in lamp.
- Flash patterns follow the ring pattern.
- Can plug in the Add-On Strobe in place of a lamp.

Remote Receivers

Simply the Best Way to be Alerted

All the Simplicity components work together to alert you anywhere in your home or workspace. Mix and match the components you need choosing from two styles: wall-mount

or desktop. Compatible with individual Simplicity signalers (Doorbell, Sound or Telephone Ring), the **Remote Receivers** flash a lamp or strobe to alert you to sounds in different rooms throughout the house. Different flashing patterns make it easy to tell which signaler has sent the transmission.

- > Buy online!
- > Which signaler is right for me?

Model LR

- Built-in outlet to flash your plugged-in lamp.
- Has switch to allow lamp to be turned on and off for normal room lighting.

Ultratec Simplicity Receivers

The Signalers and Receivers in the Ultratec Simplicity group are easy to install and can be used individually or together. The units are available in desktop or wall-mount styles - some units may even be used with an add-on strobe for areas where a lamp is inconvenient. The Simplicity system is designed to allow you to add more signalers as your needs change. All units have a two year limited warranty.

Remote Receivers: Receive signals from Simplicity Signalers to alert you to sounds in different rooms. Option of desktop or wall-mount units as well as a desktop unit with a built-in strobe.

CrystalTone

Ultratec's popular *CrystalTone* gives you exceptional flexibility to fine-tune the sound quality to your individual hearing requirements.

Customer Favorite!
Click on the picture to view a larger image

It includes the features you depend on, such as the powerful 35dB gain and a convenient 3.5 mm audio jack for use with headsets and other assistive listening devices. The adjustable Volume Control, positioned on the face of the phone, is in easy reach. The Mute button lets you temporarily silence your outgoing voice.

CrystalTone is also powered by the telephone line, instead of an electrical adapter, and can be positioned anywhere within your home or office.

- Outgoing voice amplification up to 12dB
- Two settings (A & B) available to enhance the incoming sound quality for individuals with high or low frequency hearing loss
- High contrast dial pad is extra large and easy to read
- 10 Memory buttons plus 3 Emergency speed-dial keys
- Bright ring flasher alerts you visually to incoming calls
- Super loud ringer (up to 90dB) with adjustable ring pitch

Superprint Pro80 Series

TURBO. A Break in Technology

Maximize your conversations with the deluxe Superprint Pro80. This state-of-the-art TTY has a built-in, 80-column printer that uses standard-sized (8 1/2" wide) thermal paper. You'll enjoy typing comfortably on the Superprint Pro80's full-size computer style keyboard. Convenient "one touch" function keys simplify everything from dialing your relay service to calling for help in an emergency. And, for the first time ever in a TTY, Caller ID* capability is included.

Shown: Superprint Pro80
Click on the picture to view a larger image

This top-of-the-line TTY includes all the advanced features such as Auto-Answer to take messages for you, a full dialing directory to make calling fast and easy, and 32k memory to store conversations, memos, and Caller ID information. Plus, Turbo Code is included for more natural conversations with interrupt capability.

Choose from 3 different display screens for easiest reading:

Superprint Series

Advanced Technology at Your Fingertips

TURBO.

Put the power

Shown: Superprint 4425
Click on the picture to view a larger image

of advanced technology at your fingertips with the deluxe **Superprint 4425**. This feature-packed TTY includes sophisticated capabilities, giving you more choices than ever!

It features direct connect with two built-in telephone jacks and advanced calling features like auto-busy redial, three way calling, and TTY transfer. Call progress tells you if the phone you are calling is ringing or busy. Auto-Answer takes messages for you when you are unavailable.

The 32k memory lets you save hundreds of telephone numbers, memos, and Auto-Answer messages by name. You can personalize greeting messages, memos, and outgoing Auto-Answer memos. Convenient arrow keys make it easy to review information saved in memory.

Turbo Code lets you control the speed of your conversations and enjoy "real-time" communication with other Turbo Code TTYs. It also lets you interrupt one another.

How do you know when you have a Video Relay phone call? *It's Simple!*

Click **here** for details

The TTY Announcer lets hearing people know you are on the line. The User-programmable Relay Voice Announcer tells hearing callers to use a TTY or use relay, and gives the phone number for your relay service. Auto ID lets everyone you call know that you are using a TTY.

A more basic model, the **Superprint 4225**, is also available. This model has memory but does not have direct-connect features.

Perfect for businesses or people who rely on TTYs all the time, the Superprint TTYs make an impression!

Superprint 4425 Features:

- Built-in, 24-character printer
- 3 selectable print sizes
- 32k memory
- Date/time printed at the beginning of each call
- Turbo Code® and Auto ID™
- E-Turbo for simplified relay calling**
- User-programmable Relay Voice Announcer
- Direct connect (with 2 jacks) to standard telephone line
- Built-in ring flasher
- Call progress
- Auto-Answer capabilities (with programmable message)
- Auto-busy redial, Wait for Response and 3-way calling
- Remote message retrieval
- Arrow keys for easy review of memory
- Convenient GA/SK keys
- Easy-touch greeting memo
- Tone or pulse dial
- Keyboard dialing, follow-on dialing, call

transfer
- Memory dialing/redial
- TTY Announcer™
- Baudot code (45.5/50 baud rate)
- Sticky key feature (for single-handed typing)
- ASCII code is available

**E-Turbo currently is only available with Sprint Relay.

Miniprint Series

Right balance of ease and features

Shown: Miniprint 425
Click on the picture to view a larger image

Simple yet sophisticated, the **Miniprint 425** includes advanced capabilities that are already programmed for you, making TTY conversations easier than ever.

This attractive TTY features direct connect with two telephone jacks. Auto-Answer takes calls for you and prints messages when you are unavailable. A built-in ring flasher notifies you of incoming calls and interruption requests.

It includes Turbo Code, which lets you control the speed of your conversations. With Turbo Code, you can enjoy "real-time" conversations with no delays. You can also interrupt one another.

A more basic unit, the **Miniprint 225** is also available. This model is for acoustic use only and does not have a ring flasher.

Miniprint 225 and 425 Features:

- Built-in, 24-character printer
- 3 selectable print sizes
- Turbo Code® and Auto ID™

Uniphone Series

The Phone for Everyone

Shown: Uniphone 1140
Click on the picture to view a larger image

The Uniphone is an exciting new concept in TTYs, combining a telephone, TTY and amplified phone - all in one! Now, people who are deaf, hard of hearing, or hearing can all share one phone. It's the one phone for your whole family.

A full-featured TTY, the Uniphone includes a bright 2-line display and a comfortable keyboard to make TTY conversations easy. Its modern, attractive design complements any room or office.

It is perfect for making Voice Carry Over (VCO) calls. With VCO, you speak directly to the other person and read their typed responses on the display. VCO calls can be made through a toll-free relay service, or directly between Uniphone users for absolute privacy. In a similar way, people who can hear but cannot speak can make Hearing Carry Over (HCO) calls.

The amplified handset lets you adjust the volume to the most comfortable setting.

The Uniphone 1140 answers calls with your

personalized greeting, and takes TTY messages when you are unavailable. The 8k memory lets you save and review Auto-Answer messages, conversations and your personalized greeting.

Ten speed dial locations let you reach frequently-called numbers with the touch of a button. It even includes special keys to store emergency phone numbers.

The **Uniphone 1000**, a basic unit without memory or Auto-Answer, is also available.

The Uniphone 1140 & 1000:

- Totally NEW concept in TTYs!
- Volume control for telephone handset (20dB gain)
- Special convenience keys: Dial & Volume control
- Direct connect
- Keyboard dialing, follow-on dialing
- Call progress (says "ringing" or "busy")
- Turbo Code® and Auto ID™
- 2-line, 2 x 24-character LCD display
- Baudot code (45.5 baud)

The Uniphone 1140 also features:

- 10 speed dial keys
- Special emergency, menu, and arrow keys
- Display with backlight
- 8k memory
- Built-in ring flasher
- Auto-Answer with programmable message
- Printer port to connect an external printer

EZcom Pro

Easy to Use, Easy to Carry

Intended for direct connect use only, the EZcom Pro is one of the first TTYs that does not have acoustic cups. Just plug it into a standard telephone line and you have a TTY at your fingertips!

Includes Turbo Code!
Click on the picture to view a larger image

Simple enough to use anywhere and small enough to carry with you, the EZcom Pro offers the latest technology, including Turbo Code for a more natural, back and forth feel to your calls. The convenient dial-by-name directory lets you store 20 phone numbers for quick access. A programmable greeting message answers your calls personally with the touch of a button. Auto ID alerts everyone you call, including 911 and emergency services, that you are using a TTY.

The EZcom Pro works with an existing telephone, or use it in place of a telephone. It is perfect as a second TTY in the house.

- For direct connect (with 2 jacks) use only to standard telephone lines
- Turbo Code and Auto ID™
- Keyboard dialing, follow-on dialing
- Display with backlight
- Programmable one-touch greeting message

Simplicity Telephone Ring Signalers

Make sure you are alerted to every telephone call. These signalers plug directly into the telephone line then alert you when you receive a call. Choose from two styles: wall-mount or desktop. Both models can flash a plugged-in lamp to alert you. As an alternative, the wall-mount models can be used with the optional Add-On Strobe. This makes the wall-mount models ideal for areas where a lamp is impractical such as in small areas like hallways and dorm rooms. Choose the signaler with the right combination of features for you.

Shown: Wall-mount model
Click on the picture to view a larger image.

There is also a combination **Telephone/Doorbell Signaler** which is a cost-effective way to signal both sounds.

What the Model Names Mean:

L - Flashes plugged-in lamp.
T - Transmits to Remote Receiver.
D - Desktop model.
W - Wireless Doorbell capabilities

Simplicity Remote Receivers

Simply the Best Way to be Alerted

Click on the picture to view a larger image.

All the Simplicity components work together to alert you anywhere in your home or workspace. Mix and match the components you need choosing from two styles: wall-mount or desktop (desktop models available soon!). Compatible with any of the Simplicity signalers (**Doorbell**, **Sound** or **Telephone Ring**), the Remote Receivers flash a lamp or strobe to alert you to sounds throughout the house. Different flashing patterns make it easy to tell which signaler has sent the transmission.

What the Model Names Mean:

L - Flashes plugged-in lamp.
R - Remote Receiver.
D - Desktop model.
