NOTES/INSTRUCTIONS FOR COMPLETING TABLE-1:

- A. The purpose of this table is to obtain CLEC retail access lines on a VGE basis, exclusive of VoIP, wholesale platform (lines formerly known as UNE-P), any UNE-P lines that have not yet transitioned, and resale (whether leased under an Interconnection Agreement or a Commercial Agreement).
- B. An access line connects the end user's customer premises equipment (CPE) to the serving switch and allows the end user to originate and/or terminate local telephone calls on the public switched telephone network (PSTN). **Do NOT include VoIP lines, Wholesale Platform lines, UNE-P lines or Resold access lines (including those leased under a Commercial Agreement). Do include UNE-L and EELs obtained from ILECs even if leased under a Commercial Agreement.** The access line counts in Table-1 above must be based on all of your different types of access lines (including fixed wireless) with the exception of those used to provide VoIP service.
- C. Each field must be populated. Do not use quotation marks.
- D. Residential and business VGE access line counts may be obtained by querying your billing database, provisioning database, etc.

TABLE COLUMN INSTRUCTIONS:

- Column 1. List ILEC Territory in alphabetical order (e.g. BellSouth, Verizon, etc.).
- Column 2. Enter the abbreviation Res for Residential lines or Bus for Business lines. **Each type must be entered in separate rows.**
- Column 3. Enter line count as voice-grade equivalents (VGEs). Report VGE Access Lines based on how you bill the customer. If you bill a customer for 1 DS1, the access line count would be 24 even if the customer is not utilizing all 24 channels. If you bill a customer for 10 channels in a DS1, then the line count would be 10. Report 2 VGEs for each ISDN-BRI and 23 VGEs for each ISDN-PRI. Lines must be entered without duplication, e.g., Enhanced Extended Link (EEL) loops must not be included in UNE-L counts and vice versa. **Each line count must be entered in separate rows.**
