## **Comments**

21. Have you experienced any significant barriers in entering Florida's local exchange markets? Please list and describe any major obstacles or barriers encountered that you believe may be impeding the growth of local competition in the state, along with any suggestions as to how to remove such obstacles. Any additional general comments or information you believe will assist staff in evaluating and reporting on the development of local exchange competition in Florida are welcome.

TelCove's experience in entering the Florida local exchange market has been consistent with

that of most other CLEC's. Interconnection negotiations with ILEC's have always been difficult, and the recent regulatory developments in Washington, D.C., have not improved the process. At this stage, TelCove most needs regulatory certainty so that it can tailor its business plans to the regulatory realities of the market. It is only with that regulatory certainty that TelCove can maximize its ability to provide viably competitive alternatives to the services offered by the ILEC's

#### CLEC TABLE-1: TRADITIONAL ACCESS LINES on a VOICEGRADE EQUIVALENT (VGE) Basis

DO NOT INCLUDE VoIP, WHOLESALE PLATFORM LINES (lines formally known as UNE-P), ANY UNE-P LINES THAT HAVE NOT YET TRANSITIONED, RESOLD LINES (INCLUDING THOSE SOLD UNDER COMMERCIAL AGREEMENTS) OR PRIVATE LINES IN THIS TABLE

#### NOTES/INSTRUCTIONS FOR COMPLETING TABLE-1:

A. The purpose of this table is to obtain CLEC retail access lines on a VGE basis, exclusive of VoIP, wholesale platform (lines formerly known as UNE-P), any UNE-P lines that have not yet transitioned, and resale (whether leased under an Interconnection Agreement or a Commercial Agreement).

B. An access line connects the end user's customer premises equipment (CPE) to the serving switch and allows the end user to originate and/or terminate local telephone calls on the public switched telephone network (PSTN). Do NOT include VoIP lines, Wholesale Platform lines, UNE-P lines or Resold access lines (including those leased under a Commercial Agreement). Do include UNE-L and EELs obtained from ILECs even if leased under a Commercial Agreement. The access line counts in Table-1 above must be based on all of your different types of access lines (including fixed wireless) with the exception of those used to provide VoIP service.

C. Each field must be populated. Do not use guotation marks.

D. Residential and business VGE access line counts may be obtained by querying your billing database, provisioning database, etc.

#### TABLE COLUMN INSTRUCTIONS:

Column 1. List ILEC Territory in alphabetical order (e.g. BellSouth, Verizon, etc.).

Column 2. Enter the abbreviation Res for Residential lines or Bus for Business lines. Each type must be entered in separate rows.

Column 3. Enter line count as voice-grade equivalents (VGEs). Report VGE Access Lines based on how you bill the customer. If you bill a customer for 1 DS1, the access line count would be 24 even if the customer is not utilizing all 24 channels. If you bill a customer for 10 channels in a DS1, then the line count would be 10. Report 2 VGEs for each ISDN-BRI and 23 VGEs for each ISDN-PRI. Lines must be entered without duplication, e.g., Enhanced Extended Link (EEL) loops must not be included in UNE-L counts and vice versa. Each line count must be entered in separate rows.

## FCC Form 477 -- Local Telephone Competition and Broadband Reporting Part II: Wireline and Fixed Wireless Local Telephone OMB NO: 3060-0816 EXPIRATION DATE: 05/31/2008 05/31/2008

TelCove, Inc. for Florida December 31, 2005

Complete Part II if you provided one or more voice-grade equivalent lines or wireless voice-grade equivalent channels used for local exchange or exchange access service in the state. See Instructions about including lines provisioned over channelized high-capacity facilities, including PRI circuits used to provide local connectivity to dial-up ISPs. Also see Instructions for definitions of "voice telephone service", "voice-grade equivalent", "end user", "residential lines", "presubscribed interstate long distance carrier", "own local loop facilities", and "UNE-Platform".

If in Part II you report voice-grade equivalent lines or voice-grade equivalent wireless channels for service provided to end users, you must provide in Part V a list containing the 5-digit Zip Codes of the locations to which you provide those lines or channels. See Instructions.

Do not report anywhere in the form special access lines or any high-capacity connections between two locations of the same end user customer, ISP or communications carrier. Note that competitive LECs (CLECs) typically do not provide either Total Service Resale or UNE arrangements. Therefore, on Line II-3 of Part II, CLECs typically report any wholesale switched voice lines and channels sold to unaffiliated communications carriers.
