ORIGINAL

Item 16 is staff's posthearing recommendation on the petition for determination of need for the Seminole Generating Station Unit 3 electric power plant in Putnam County, By Seminole Electric Cooperative, Inc.

Staff would like to make an oral modification to Issue 1 of the recommendation. The modification addresses SGS Unit 3 contributions to fuel diversity, which was stipulated in Issue 1 of the Prehearing Order, but inadvertently omitted in staff's recommendation.

Staff would like to add the following language before the last sentence in the conclusion of staff's analysis of issue 1 (page 4).

"In addition, Seminole's election to build a 750 MW coal unit allows Seminole to avoid an undue reliance on natural gas generation, thereby maintaining a fuel mix that is sufficiently diverse to limit Seminole's vulnerability to the price uncertainty of natural gas and reliability issues related to natural gas. The additional of SGS Unit 3 would also reduce the State of Florida's reliance upon natural gas generation and improve its fuel diversity and supply reliability (TR 128-129)."
