Re: Verizon Access Transmission Services, Inc. - Response to the 2006 Competitive
Local Exchange Carrier (CLEC) Local Competition Data Request

Dear Ms. Bayo:

This is in response to staff's follow-up questions regarding the annual local competition data requests. The questions regarding the response from MCImetro Access Transmission Services LLC d/b/a Verizon Access Transmission Services ("Verizon Access") pertained to tables 1 and 2.

Regarding Table 1, because the ILEC exchange/territory is not directly relevant to Verizon Access's business, its systems do not track ILEC exchange or territory information. Verizon Access understands that Staff has previously informed a former employee that providing the NPA NXX would be sufficient, and Verizon Access has provided this information in response to the Commission's data request for at least the last two years. For Table 2, Verizon Access cannot complete the table because its systems are not constructed to track the number of actual lines (i.e., physical connections with customer premises) or to always know the type of service (i.e., voice or data) the customer is providing over a particular facility.

As with all FPSC data requests, Verizon Access makes every effort to respond in a timely and accurate manner and feels that it has done so in this case. If you have any further questions, please contact me.
