FPSO-COMMISSION CLERK

**Issue 12:** What is the appropriate methodology for calculating over and under recoveries of projected fuel costs, pursuant to Commission Order Nos. 13694 and PSC-98-0691-FOF-PU?

**Staff Position:** To ensure consistency in the electric IOU's interpretation of Commission Order Nos. 13694 and PSC-98-0691-FOF-PU on a prospective basis commencing January 1, 2007, the appropriate method to determine whether actual fuel costs are ten percent greater than or less than projected fuel costs is to divide the estimated "End-of-Period Total Net True-up" for the last month in the current recovery period by the current period's total actual and estimated "Jurisdictional Fuel Revenue Applicable to Period." The denominator of the percent calculation consists of actual "Jurisdictional Fuel Revenue Applicable Period" for the current period's past months and estimated "Jurisdictional Fuel Revenue Applicable Period" for the current period's future months.

The estimated "End-of-Period Total Net True-up" calculation for the last month in the current recovery period should exclude any previous periods' true-ups for which recovery has been deferred, by order, until after the current recovery period. For calculating the net true-up as a percent of revenue, "Jurisdictional Revenue Applicable to Period" should be reduced by non-period expenses or expense adjustments that are not included in "Jurisdictional Total Fuel and Net Power Transactions" and are included in "Jurisdictional Fuel Revenue."

Schedule A-2 – Calculation of True-up and Interest Provision contains the amounts Jurisdictional Fuel Revenue (Line C1), "Jurisdictional Fuel Revenue Applicable to Period" (Line C3), Jurisdictional Total Fuel and Purchased Power Transactions (Line c6) and "End-of-Period Total Net True-up" (Line C11).

**Issue 13:** At what point in time should a utility notify the Commission that an over or under recovery exceeds 10% of the projected fuel costs?

**Staff Position:** Any time the absolute value of the estimated "End-of-Period Total Net True-up" for the last month in the current recovery period divided by the current period's total actual and estimated "Jurisdictional Fuel Revenue Applicable to Period" is ten percent or greater, the utility should notify the Commission.

Schedule A-2 – Calculation of True-up and Interest Provision contains the amounts "Jurisdictional Fuel Revenue Applicable to Period" (Line C3) and "End of Period Total Net True-up" (Line C11).
