Aqua Utilities Florida, Inc.
Docket No. 060368-WS
Accounting Deficiencies

Accounting Deficiency No. 2

Schedule A-1, Water Rate Base – The utility is required to provide a calculation of the average Water Rate Base for the test year, showing all adjustments.

The utility did not provide the average balance per books. Instead, the utility put the average rate base along with adjustments all in the adjustment column.

Response:

This deficiency pertains to Adjustments to the Historical Base year 2005 adjustment column (3) for systems identified by Aqua as FWS systems. Unlike FWS systems which began with zero balances on the individual system books, ASI systems do not begin with zero balances in Column (2), and do not have Average Rate Base (beginning) balances included in column (3).

A footnote at the bottom of each FWS system A-1 MFR Schedule states “Note: 2005 per book balances are zero since system’s balances were aggregated at an Administrative level pending the PSC’s Order regarding proper balances at 6/04 acquisition.” The PSC’s Amendatory Order dated February 27, 2005 contained the FWS balances at 6/04 Acquisition. Entries were made in May 2006 to the system’s General Ledgers to reflect the Amendatory Order Balances and activity since June 2004. Consequently, FWS systems must include average rate base and any adjustments in column (3). The Schedule A-1 Adjustments in column (3) for the Historical Base Year 2005 reflect the adjustment to each system’s average book balances (zero) to reach the adjusted average balance for 2005.

Detailed Rate Base workpapers for each system showing monthly and average balances for historical and projected test years were previously filed with the Commission. See AUF’s First Notice of Filing Ratebase Workpapers, filed on January 19, 2007 and AUF’s Second Notice of Filing Ratebase Workpapers, filed on January 24, 2007.

Accounting Deficiency No. 4

Schedule A-3 – Schedule of Adjustment to Rate Base – The utility is required to provide a detailed description of all adjustments to rate base, with a total for each rate base line item.

The utility did not provide a detailed description of all adjustments.

Response:

Attachment 1 describes total year adjustments shown in UPIS Schedules A-4, Accumulated Depreciation Schedules A-8, CIAC Schedules A-11 and Accumulated Amortization of CIAC Schedules A-13 for the historical year 2005 and the projected test years 2006 and 2007 for all ASI systems.

Adjustments for all FWS systems are the result of Florida IT Investment balances that have been allocated to individual Florida systems. Those allocated amounts are shown in the Acct. 340-51-Computer Equipment and 390.71 lines of Schedules.

Accounting Deficiency No. 11

A review of the MFR Schedules E-2, page 139 contained in Volume 1 for the Jasmine Lakes water system indicates billing determinants for a 3" meter size for General Service. However, based on MFR Schedules E-14 contained in Volume 7, Book 1 of 2, pages 116-122 indicates that there is no billing analysis that supports a 3" meter size for General Service.
