

PROGRESS ENERGY FLORIDA

DOCKET No. 080001-EI

**GPIF Targets and Ranges for
January through December 2009**

**DIRECT TESTIMONY OF
ROBERT M. OLIVER**

1 **Q. Please state your name and business address.**

2 **A. My name is Robert M. Oliver. My business address is P.O. Box 1551,**
3 **Raleigh, North Carolina 27602.**

4

5 **Q. By whom are you employed and in what capacity?**

6 **A. I am employed by Progress Energy Carolinas Inc. as Manager of Portfolio**
7 **Management for Fuels and Power Optimization.**

8

9 **Q. What are your duties and responsibilities in that capacity?**

10 **A. As Manager of Portfolio Management for Fuels and Power Optimization, I**
11 **oversee the management of energy portfolios for Progress Energy Florida,**
12 **Inc. ("Progress Energy" or "Company"), as well as Progress Energy**
13 **Carolinias, Inc. My responsibilities include oversight of planning and**
14 **coordination associated with economic system operations, including unit**
15 **commitment and dispatch, fuel burns, and power marketing and trading**
16 **functions.**

17

18 **Q. What is the purpose of your testimony?**

DOCUMENT NUMBER-DATE

19

0790 | AUG 29 2009

FPSC-COMMISSION CLERK

1 A. The purpose of my testimony is to provide a recap of actual reward /
2 penalty for the period of January through December 2007 and also to
3 present the development of the Company's GPIF targets and ranges for
4 the period of January through December 2009. These GPIF targets and
5 ranges have been developed from individual unit equivalent availability and
6 average net operating heat rate targets and improvement/degradation
7 ranges for each of the Company's GPIF generating units, in accordance
8 with the Commission's GPIF Implementation Manual.

9

10 **Q. What GPIF incentive amount was calculated for the period January**
11 **through December 2007?**

12 A. PEF's calculated GPIF incentive amount for this period was a reward of
13 \$2,167,933. Please refer to my testimony filed April 1, 2008 for the details
14 of how this incentive amount was calculated.

15

16 **Q. Do you have an exhibit to your testimony in this proceeding?**

17 A. Yes, I am sponsoring Exhibit No. ____ (RMO-1) which consists of the GPIF
18 standard form schedules prescribed in the GPIF Implementation Manual
19 and supporting data, including unplanned outage rates, net operating heat
20 rates, and computer analyses and graphs for each of the individual GPIF
21 units. This 113-page exhibit is attached to my prepared testimony and
22 includes as its first page an index to the contents of the exhibit.

1 **Q. Which of the Company's generating units have you included in the**
2 **GPIF program for the upcoming projection period?**

3 A. For the 2009 projection period, the GPIF program includes the same units
4 that are in the current period, with the addition of Hines Unit 3. The
5 following units are included in the 2008 GPIF program: Anclote Units 1
6 and 2, Crystal River Units 1 through 5, Hines Units 1 through 3, and Tiger
7 Bay. Combined, these units account for 76% of the estimated total system
8 net generation for the period. The Company's Hines Unit 4 was not
9 included for the upcoming projection period since there is not sufficient
10 performance history to use in setting targets and ranges for this unit.
11 Hines Unit 4 is forecasted to account for 8% of the estimated total system
12 generation for the period. The Company's future Bartow combined cycle
13 unit was also not included for the upcoming projection period because
14 there is not any history to use for setting targets and ranges for this unit.
15 The future Bartow combined cycle is forecasted to account for 10% of the
16 estimated total system generation for the period.

17
18 **Q. Have you determined the equivalent availability targets and**
19 **improvement/degradation ranges for the Company's GPIF units?**

20 A. Yes. This information is included in the GPIF Target and Range Summary
21 on page 4 of my exhibit.

22
23 **Q. How were the equivalent availability targets developed?**

- A. The equivalent availability targets were developed using the methodology established for the Company's GPIF units, as set forth in Section 4 of the GPIF Implementation Manual. This includes the formulation of graphs based on each unit's historic performance data for the four individual unplanned outage rates (i.e., forced, partial forced, maintenance and partial maintenance outage rates), which in combination constitute the unit's equivalent unplanned outage rate (EUOR). From operational data and these graphs, the individual target rates are determined through a review of three years of monthly data points during the three year period. The unit's four target rates are then used to calculate its unplanned outage hours for the projection period. When the unit's projected planned outage hours are taken into account, the hours calculated from these individual unplanned outage rates can then be converted into an overall equivalent unplanned outage factor (EUOF). Because factors are additive (unlike rates), the unplanned and planned outage factors (EUOF and POF) when added to the equivalent availability factor (EAF) will always equal 100%. For example, an EUOF of 15% and POF of 10% results in an EAF of 75%.

The supporting tables and graphs for the target and range rates are contained in pages 57-113 of my exhibit in the section entitled "Unplanned Outage Rate Tables and Graphs."

- Q. Were adjustments made to historical unplanned outage hours to exclude the impact of performance anomalies?

A. Yes. Historical unplanned outage hours for Crystal River Units 1, 2, and 3 were adjusted to exclude the impact of certain performance anomalies.

Q. Please describe the performance anomalies at Crystal River Units 1 and 2.

A. Crystal River Units 1 and 2 experienced unplanned derations due to point of discharge (POD) during June, July, and August of 2005. In May 2006, Progress Energy installed temporary cooling towers to minimize future POD related derations. Based on the satisfactory experience with the temporary cooling towers to date, it is anticipated that this equipment will be retained for service in 2009. Thus, the historical outage hours for these events were excluded when setting the EAF targets for Crystal River Units 1 and 2.

Q. Please describe the performance anomalies at Crystal River Unit 3.

A. Crystal River Unit 3 experienced unplanned derations and outages due to a main transformer replacement during December 2005 and January 2006. As a result of replacing the main transformer, Crystal River Unit 3 is not expected to have main transformer related events in 2009, thus the historical outage hours for this event were excluded when setting the EAF target for Crystal River Unit 3.

Q. Please describe the overall impact of the adjustments on Crystal River Units 1, 2, and 3 equivalent availability targets.

1 A. The adjustments raise the equivalent availability targets for Crystal River
2 Units 1, 2, and 3 making the target higher than using the unadjusted
3 historical average.

4

5 **Q. Please describe the methodology utilized to develop the**
6 **improvement/degradation ranges for each GPIF unit's availability**
7 **targets?**

8 A. The methodology described in the GPIF Implementation Manual was used.
9 Ranges were first established for each of the four unplanned outage rates
10 associated with each unit. From an analysis of the unplanned outage
11 graphs, units with small historical variations in outage rates were assigned
12 narrow ranges and units with large variations were assigned wider ranges.
13 These individual ranges, expressed in term of rates, were then converted
14 into a single unit availability range, expressed in terms of a factor, using the
15 same procedure described above for converting the availability targets
16 from rates to factors.

17

18 **Q. Have you determined the net operating heat rate targets and ranges**
19 **for the Company's GPIF units?**

20 A. Yes. This information is included in the Target and Range Summary on
21 page 4 of my exhibit.

22

23 **Q. How were these heat rate targets and ranges developed?**

1 A. The development of the heat rate targets and ranges for the upcoming
2 period utilized historical data from the past three years, as described in the
3 GPIF Implementation Manual. A "least squares" procedure was used to
4 curve-fit the heat rate data within ranges having a 90% confidence level of
5 including all data. The analyses and data plots used to develop the heat
6 rate targets and ranges for each of the GPIF units are contained in pages
7 34-56 of my exhibit in the section entitled "Average Net Operating Heat
8 Rate Curves."

9

10 **Q. How were the GPIF incentive points developed for the unit availability
11 and heat rate ranges?**

12 A. GPIF incentive points for availability and heat rate were developed by
13 evenly spreading the positive and negative point values from the target to
14 the maximum and minimum values in case of availability, and from the
15 neutral band to the maximum and minimum values in the case of heat rate.
16 The fuel savings (loss) dollars were evenly spread over the range in the
17 same manner as described for incentive points. The maximum savings
18 (loss) dollars are the same as those used in the calculation of the weighting
19 factors.

20

21 **Q. How were the GPIF weighting factors determined?**

22 A. To determine the weighting factors for availability, a series of simulations
23 were made using a production costing model in which each unit's
24 maximum equivalent availability was substituted for the target value to

1 obtain a new system fuel cost. The differences in fuel costs between these
2 cases and the target case determine the contribution of each unit's
3 availability to fuel savings. The heat rate contribution of each unit to fuel
4 savings was determined by multiplying the BTU savings between the
5 minimum and target heat rates (at constant generation) by the average
6 cost per BTU for that unit. Weighting factors were then calculated by
7 dividing each individual unit's fuel savings by total system fuel savings.

8

9 **Q. What was the basis for determining the estimated maximum incentive
10 amount?**

11 A. The determination of the maximum reward or penalty was based upon
12 monthly common equity projections obtained from a detailed financial
13 simulation performed by the Company's Corporate Model.

14

15 **Q. What is the Company's estimated maximum incentive amount for
16 2008?**

17 A. The estimated maximum incentive for the Company is \$15,472,071. The
18 calculation of the estimated maximum incentive is shown on page 3 of my
19 exhibit.

20

21 **Q. Does this conclude your testimony?**

22 A. Yes, it does.

Progress Energy Florida
Docket No. 080001-EI
