COMMISSION  
CLERK

This office has received the attached letter from Rafael Rodon, Executive Vice President, Flagler Development Group, regarding the above-noted docket.

The correspondence has not been viewed or considered in any way by Commissioner Klement. Under the terms of the advisory opinion from the Commission on Ethics (issued July 24, 1991 as CEO 91-31-July 19, 1991), the following letter does not constitute an ex parte communication by virtue of the fact that it was not shown to the Commissioner. Because it is not deemed to be an ex parte communication, it does not require dissemination to parties pursuant to the provisions of section 350.042, Florida Statutes. However, in such cases Commissioner Klement has requested that a copy of the correspondence be placed in the record of the above-referenced docket.

David E. Klement  
Commissioner  
Florida Public Service Commission  
2540 Shumard Oak Blvd.  
Tallahassee, FL 32399-0850

Dear Commissioner Klement:

As you can imagine, energy costs can be a significant expense for a large organization like ours, and managing these costs takes on added importance during times of economic difficulty. We have worked extensively with our electricity provider, FPL, on energy-efficiency initiatives and are always looking for ways to do more.

We have recently learned that FPL is seeking approval for a rate increase and a various other system and plant expansions and enhancements. Their investment in this smart technology will give us more control over our energy usage and will save us money and further improve our power reliability. We're very interested in new technologies that can help us gain more control over our energy consumption and further our own "green" initiatives.

We also understand that these investments will take large amounts of capital investments on FPL's part and we support the fact that they will need to raise rates in order to help provide for these improvements. In the long run we will save money in our energy consumption because of FPL's modernized plants and distribution system will provide efficient service.

We see tremendous long-term benefits with these improvements to the power plants and infrastructure. Having worked with FPL for many years, we know that it has the size, strength and experience to take on a project of this magnitude. I urge you to approve their requests.

Sincerely,

Rafael Rodon  
Executive Vice President  
Flagler Development Group
