BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In Re: Fuel and Purchase Power) Docket No. 100001-EI
Cost Recovery Clause and Generating)
Performance Incentive Factor) Filed: November 10, 2010

**PETITION FOR APPROVAL OF FUEL COST RECOVERY FACTORS AND
SUBMISSION OF MID-COURSE FUEL REPROJECTED AMOUNTS FOR THE
PERIOD ENDING DECEMBER 2011**

As required by this Commission and pursuant to Rule 25-6.0424, Florida Administrative Code, Progress Energy Florida, Inc. ("PEF") hereby files its mid-course reprojected fuel costs as of November 1, 2010 and petitions this Commission for approval of PEF's final Fuel and Purchased Power Cost Recovery ("FCR") factor for the period ending December 2011 as filed in Hearing Exhibit 71 ("Exhibit 71"). In support of this Petition, PEF states as follows:

1. PEF's mid-course filing meets all the requirements of Rule 25-6.0424, FAC. Along with its petition, and as ordered by the Commission, PEF is filing the following Exhibits:

- Exhibit A – Mid-course with CR3 replacement fuel costs and all supporting schedules;
- Exhibit B – Mid-course without CR3 replacement fuel costs and all supporting schedules; and
- Exhibit C – Mid-course with 50% CR3 replacement fuel costs and all supporting schedules.¹

BACKGROUND

2. The FPSC held a Hearing on November 1-2, 2010 to hear the testimony of PEF witnesses pertaining to PEF's fuel cost recovery factors for the period of January 2011 through December

¹ As PEF noted during the November fuel hearing, PEF objects to the Commission adopting any type of "split the baby" approach to replacement fuel costs, as being, among other things, arbitrary and capricious and contrary to law. By providing this "Mid-course with 50% CR3 replacement fuel cost" schedules, PEF is not waiving any of its rights to challenge the adoption of any such schedule.

FPSC-COMMISSION CLERK

2011. Throughout the course of 2010, PEF has filed the required petitions, testimony, and exhibits supporting its fuel factors as required by Procedural Order #10-0154 dated March 18, 2010. During the deposition of Marcia Olivier that took place on October 21, 2010, witness Olivier provided Late-filed Exhibit #2 which showed a high-level manual calculation of the decrease in its fuel cost projection due to projected decreases in natural gas prices. Late-filed Deposition Exhibit #2 showed that a net decrease in fuel costs of \$126 million amounted to a midcourse percentage of 6.77% when applying natural gas market prices as of October 18, 2011. During the hearing, the Commission asked to see what the fuel factors would be implementing the 6.77% variance. PEF agreed to do so expeditiously and on November 1, 2010, PEF filed its “REVISED Positions and Supporting Schedules” which implemented PEF witness Marcia Olivier’s Late-filed Deposition Exhibit #2 and was entered into evidence at the Hearing as Exhibit 71. Exhibit 71 provided revised positions/amounts to Issues 8, 9, 10, 12, 13 and 15 as noted in Prehearing Order #10-0654 (dated October 29, 2010). Exhibit 71 provided two scenarios to the revised amounts: (1) fuel costs including CR3 replacement fuel costs, and (2) fuel costs excluding the CR3 replacement fuel costs. Interveners questioned the validity of the revised numbers by stating that gas prices have continued to decline and inquired when PEF was going to reforecast its fuel costs. PEF noted on record that it was in the process of running an updated November Fuel & Operations Forecast (FOF) and would file an updated fuel projection based on this FOF on or before November 10, 2010 if the Commission ordered PEF to do so to allow the Commission and parties to see what the fuel factors would be using the most current fuel forecast.

At the conclusion of the hearing, Staff recommended a bench decision and approval of the revised positions and supporting schedules found in Exhibit 71 as preliminary amounts (Issues 8, 9, 10, 12 13 and 15). The Commission made a bench decision and approved Staff’s recommendation on November 2, 2010. In addition, the Commission ordered PEF to file a mid-course correction with its most current forecasted numbers on or before November 10, 2010. In its mid-course filing, PEF was ordered to include three scenarios for Commission consideration: (1) the inclusion of all CR3 replacement power costs, (2) the exclusion of all CR3 replacement power costs, and (3) the exclusion of 50% of CR3 replacement power costs. (Transcript at 499).

The Commission made a bench decision on all issues except Issue 1D, “*Should PEF be permitted to collect through the fuel clause, amounts related to replacement power due to the extended outage at CR3 prior to the determination of the prudence of such costs in a separate docket?*” Issue 1D is the only remaining issue for Commission determination. However, the decision on Issue 1D will impact the ultimate costs to be approved in Issues 8, 9, 10, 12, 13 and 15. The Commission directed the parties to file post-hearing briefs on Issue 1D to allow the Commission more information and time to decide on Issue 1D. Staff will issue their recommendation on November 16, 2010 to be heard at the November 30, 2010 Agenda Conference. As required, PEF filed its Post-Hearing Brief on November 8, 2010.

MID-COURSE FILING

3. As instructed and ordered by this Commission, PEF hereby files its mid-course filing and supporting schedules. The filing meets all the requirements of Rule 25-6.0424, FAC. As a result of the November FOF, total fuel costs have been reduced by \$78,181,682, from \$1,857,187,298 (Exhibit MO-2, Schedule E1, Line 33, attached to the direct testimony of Marcia Olivier, amended 9/27/10) to \$1,779,005,616 (Exhibit A, Schedule E1, Line 33). This reduction (4.18% variance shown on Schedule E1-A, Line 15) is approximately \$48 million lower than the \$126 million reduction calculated in Exhibit 71 (6.77% variance). The majority of the difference results from higher average natural gas prices in the mid-course filing than in Exhibit 71 by approximately \$.30/MMbtu, due to timing. The midcourse filing includes natural gas market prices, as of a different date compared to what was used in the calculation of the Exhibit 71 prices. Day to day volatility in natural gas market prices can have a significant impact on total fuel costs due to PEF’s large volume of natural gas burned. In addition, approximately \$15 million of the decrease is due to updating the sales forecast in the midcourse filing, in which 2011 retail sales are expected to increase by 266,734 MWHs. Finally, actual activity for the period July through October 2010 resulted in a higher under-recovery than originally estimated by approximately \$11 million.

CONCLUSION

4. PEF has met the requirement set forth by this Commission and filed its mid-course filing on November 10, 2010. Since the rate reduction in Exhibit 71 (6.77%) is larger than the rate reduction filed herein (4.18%), PEF recommends the Commission ignore the November 10, 2010 mid-course filing attached and approve the Exhibit 71 factors with all CR3 costs included for the reasons stated in PEF's Post-hearing Brief filed on November 8, 2010.

WHEREFORE, PEF respectfully requests the Commission ignore the mid-course filing attached hereto and approve the factors previously and preliminarily approved by this Commission on November 2, 2010 including all CR3 replacement fuel costs. PEF's request will result in lower comparative fuel costs for PEF's customers and should be granted.

Respectfully submitted,
