Re: Request for Administrative Correction for Business New Construction Roof Insulation Program

Dear Mrs. Triplett:

Commission Staff has reviewed Progress Energy Florida, Inc.'s (PEF's) revisions to the program standards for its Commercial New Construction Roof Insulation Program. This program was previously approved as part of PEF's Demand-Side Management Plan by the Commission in Order No. PSC-04-0769-PAA-EG, issued August 9, 2004, in Docket No. 040031-EG. Commission staff previously approved program standard modifications to this program on April 11, 2012 to reflect changes in the Florida Building Code. As noted in your letter dated August 9, 2012, the company had accidentally failed to include the roof insulation value changes with the other updates.

The program standard revisions for the Commercial New Construction Roof Insulation Program are consistent with the program's description and objectives. The proposed revisions will not change the incentive payments already determined. As a result, the revisions to the program standards submitted for the Commercial New Construction Roof Insulation Program are administratively approved.

Regards,

A handwritten signature in black ink, appearing to read "Phillip Ellis".
