Comments:

Recently the PSC made a determination that Duke Energy could raise it's rates to residential customers \$9.23, starting in January Of 2014. Please explain, if you can, why the residential customers (tax payers) of Citrus County should feel that PSC made this determination in their best interest? Did politics or graft have anything to do with this determination?

Re: Docket 130009

Please suspend further approval of nuclear cost recovery, as is being considered under Docket 130009. I am a (Florida Power and Light / Duke Energy) ratepayer that has watched my bill creep further upwards, just as the cost of these new nuclear projects has been pushed ever higher and the completion dates pushed ever further into the future. And now the speculative nature of these plans has unfolded as Duke has cancelled both the Crystal River and Levy County reactor projects. Though I think it's best for those projects to be cancelled sooner than later, what's in store now for FPL customers given the proposed Turkey Point reactor project?

Florida's ratepayers need Commissioners that stand up for the public's interests in addition to the needs of the utilities, not just one that "decides what's best" for the public and agrees with whatever bad recommendations the PSC staff offers up. We need more transparency and more consumer protections in these proceedings.

Thank you,

Re: Docket 130009

I am a (Florida Power and Light / Duke Energy Florida) ratepayer, writing to ask that you please reject the utility's request for nuclear cost recovery in Docket 130009. The PSC staff made a mistake by recommending approval. I have watched powerlessly as my bill has risen year after year. In the past, I heard utilities state that they have not even committed to building these reactors. Now Duke has cancelled the Levy reactors and Crystal River and customers have to foot that bill – with no refund. I'm glad that happened before even more of our hard-earned money was wasted. But FPL customers are still at great risk as well, given the continued pursuit of the costly Turkey Point reactors. This cannot be allowed to continue – please protect us from these bad utility plans.

Re: Docket 130009

Please consider the impact that nuclear cost recovery rate increases are having on Florida's consumers. My bill, for instance, continues to go up, yet the promises of new nuclear generation is getting ever more expensive with continual delays. And now that Duke has cancelled both Crystal River and the two new reactors in Levy County, a decision I support, customers are having to pay for the utility's bad pursuit that began years ago. That is not fair.

I believe that Florida needs to focus on tangible, affordable energy solutions such as energy efficiency, not expensive new nuclear reactors that may never even be built!

Please deny approval of nuclear cost recovery, as is being considered under Docket 130009.

Subject: Rate Hike

Dear Commissioner Balbis,

I truly can't believe you guys voted yes on this. We pay a HUGH percentage over other utilities because some Knucklehead decided we should pay for speculation. And you Keep Increasing it! If you or I make a home repair as a DIY and it fails miserably, do you get a discount from the professional who comes in to clean up our mistake.. Hell NO.. We probably pay even more because we made it worse. This is exactly what happened.. How do you sleep at night?! I hope your not teaching your kids or family that it is OK to mess up, you can always get the tax payers or in this case electric payers to pay you back for your mistake, with an additional % increase so you don't feel bad about yourself..

Hey sign me up for this plan! How do I get someone to fix my mistakes and pay me a bonus for doing it wrong in the first place, I have a lot of home improvements I would like to tackle with this kind of incentive!!

Your team are a bunch of idiots.. You should all have to pay this yourselves out of a % of your pay being on this commission!!!! *And your even quoted "I'm still not comfortable with raising customer rates without one shred of evidence in the record," PSC Commissioner Eduardo Balbis said.*

How do you get to keep your job, are they hiring??? I want in on this good old boys club!

Ashamed, you should be so Ashamed of yourself. You have failed us all.. good day sir.

Sent: Tuesday, October 15, 2013 12:38 PM
To: Office of Commissioner Brisé; Office Of Commissioner Edgar; Office Of Commissioner Graham; Office of Commissioner Balbis; Office of Commissioner Brown
Subject: Public Service

Dear Commissioners;

I am writing you out of concern for a pending vote on Wednesday, October 16, 2013 to allow Duke Energy to raise rates on consumers for mismanagement of their recent now defunct projects. As a Commissioner, you each took an oath and have a moral and legal obligation to make decisions in the best interest of the public and the consumer of this monopolized utility. I am disappointed that you have not acted to penalize this utility, or its predecessor, Progress Energy, but instead penalized consumers by allowing the utility to force us to pay for services not delivered.

None of us, as a consumer of goods and services, would go to any place of business and pay a bill or invoice when we received nothing in return.

There is a way that you could act in the interest of the public and consumers of utility services in the State of Florida. You could open up (deregulate) services provided by utilities encouraging competitive utilities services and rates. This will certainly stimulate the industry by creating a competitive market for energy throughout the state. Just as the telecommunications industry was deregulated back in 1984, the same should be done to the utilities serving this state, thereby giving consumers choices. This deregulation for energy utilities is way overdue.

Another suggestion, since consumers already paid over \$1Billion in rates to Progress/Duke is to require Duke to return the monies back to consumers in the form of Solar Energy rebate incentives. Their current \$2Million rebate program is quite underfunded and inadequate to make a difference. This will stimulate the economy by employing more workers, reduce the load on the power grid, thereby reducing the need for additional power generation facilities. Solar energy benefits everyone and at the same time provides a public service to all as well. After all, Florida promotes itself as the Sunshine State but ranks nowhere near the top state in the US for Solar PV installations or Solar PV power generation.

Please take a deep look inside your hearts and your minds and do what you know that deep down inside of your being and make the right decision for the public good and public benefit.

Thank you for taking the time to read this correspondence.

Sincerely,

Kenneth Gagliano

To: Office of Commissioner Brown
Subject: Please oppose nuclear cost recovery requests

Re: Docket 130009

Please consider the impact that nuclear cost recovery rate increases are having on Florida's consumers. My bill, for instance, continues to go up, yet the promises of new nuclear generation is getting ever more expensive with continual delays. And now that Duke has cancelled both Crystal River and the two new reactors in Levy County, a decision I support, customers are having to pay for the utility's bad pursuit that began years ago. That is not fair.

I believe that Florida needs to focus on tangible, affordable energy solutions such as energy efficiency, not expensive new nuclear reactors that may never even be built!

Please deny approval of nuclear cost recovery, as is being considered under Docket 130009.

Thank you,

Jorge Garriga
9581 Fontainebleau Blvd Apt #110
Miami, FL 33172

Comments:

I strongly object to the approval of Duke Energy settlement without hearings into what went wrong, why it occurred and where the money went. The citizens of Florida that pre-paid for nuclear power that it never received deserve answers, Duke Energy should be held accountable. I beg you, stop your rubber stamp approval ways, do your job as the "Public Service Commission" and defend the citizens of Florida for once.

Shawna Senko

From: Christina Aikman <quazixie@yahoo.com>
Sent: Wednesday, October 02, 2013 12:58 PM
To: Consumer Contact
Subject: Nuclear Recovery Fees

Dear Commissioners,

I fail to realize the importance of continuing Duke Energy's Nuclear Cost Recovery program when it is very well known that Crystal River is permanently shut down and Levy will never be happening.

And yet, I continue to pay. Why?

And at the same time, money set aside for what was Progress Energy's Sunsense program are extinguished within minutes!!!!

I petition you, within the commission, to make Duke not only continue, but expand this amazingly underfunded program. If Duke's customers all had energy plants on their roofs, everyone would benefit; starting with the out dated and overused grid!

It's ridiculous that so much of our money is given for an investment that we will never reap the returns of, or even see come into reality. The Sunsense needs to be an ongoing program; and have continuing funds so every person that wishes to put solar on their roof, can benefit.

Thank you very much for your concern and your representation,

Christina Aikman

Comments:

You state that it's not the PSC job to regulate yet it still passes a bill to allow FPL to charge/tax us consumers more \$ for so called NUKE upgrades without so much as a flinch. We're already being overcharged which only shows that the \$ they currently charge isn't going where it's supposed to. The PSC is just as CORRUPT as the rest of the official "regulators" in SoFL.

Re: Docket 130009

To: PSC Chairperson and Commissioners:

I am a Florida taxpayer and FPL ratepayer. I am requesting that you reject FPL's request for nuclear cost recovery in Docket 130009. I believe that PSC staff made a mistake by recommending approval. Duke Energy Florida has cancelled nuclear gen projects in Levy County and Crystal River. Customers have already paid for part of those projects and will not get refunds though the projects are now cancelled. But millions of FPL customer like me are still at risk for the same happening to us, given the continued pursuit of the costly Turkey Point reactors. Please do not allow these bad decisions to perpetuate. Please give the "public service" portion of your Commission's name some meaning and do not approve passing these costs on to us, the Florida residents.

Thank you,

Susannah Troner
