CLERK

Re: Docket No. 130209-SU
North Peninsula Utilities Corp. (NPUC)
Application for Wastewater
1. Expansion of Certificate (CIAC)
(New Wastewater Line Extension Charge)
2. Flat Rate adjustment of 3% per year starting 4/1 of 2015, 2016, 2017,
2018, and 2019

Dear Commission Clerk,

This letter serves as a follow-up to our letter dated July 25, 2013 that was filed with the Florida Public Service Commission (FPSC) concerning our Application for Wastewater and will address the following:

1. Notice of Application

Pursuant to Section 367.045, Florida Statutes, NPUC has provided notice of the application to amend its Wastewater Utility Certificate No. 249-5 and to add territory in Volusia County. A copy of the notice as well as a list of parties notified is included as **Attachment A**.

2. Service Availability Policy – Main Extension Charge

Request for a Main Extension Charge in the amount of \$730.00 per Equivalent Residential Connection (ERC) pursuant to the cost analysis completed by GAI Consultants, Inc. and included as **Attachment B**. This is a modification of our Original letter, which stated a charge of \$500.00 per ERC.

3. Flat Rate adjustment of 3% per year

NPUC is formally withdrawing its previous request for the flat rate adjustment of 3% per year starting 4/1 of 2015, 2016, 2017, 2018, and 2019. With this letter, NPUC is still maintaining its right to do annual indexing pursuant to the FPSC Deflator Index.

Thank you for your attention to this application request. Please advise if any additional information is needed.

Sincerely,

Mr. Robert L. Hillman
Vice President
North Peninsula Utilities Corp.

October 31, 2013

Ormond Beach, FL 32176

**North Peninsula Utilities Corporation
Service Availability Charge Development**

Dear Mr. Hillman:

GAI Consultants, Inc. (GAI) is pleased to present herein the development of the Service Availability Charge including the Main Extension Charge for North Peninsula Utilities Corporation (NPUC). These charges have been developed based on the Guidelines for Designing the Service Availability Policy, Section 25-30.580, Florida Administrative Code as required by the Florida Public Service Commission (FPSC). This letter will discuss the development of the Service Availability Charge as well as several of the items needed to file the Application for Approval of New or Revised Service Availability Policy or Charges with the FPSC (Section 25-30.565, Florida Administrative Code). **Attachment A** includes a copy of both of these sections from the Florida Administrative Code.

Development of Service Availability Charge – Main Extension Charge

NPUC is in the process of trying to expand its certificated service area. As included in the Wastewater Facilities Plan for North Peninsula Utilities Corporation prepared by GAI and included in NPUC's application to expand its wastewater certificated service area filed with the FPSC, there are approximately 907 units within the North Peninsula unincorporated area that are being provided service by various package plants. NPUC has both verbal and written requests to provide service to some of these customers. In order to provide this service to the 907 units as well as other customers on septic tank systems within the North Peninsula area, upgrades to NPUC's sewage collection system will be required. The improvements currently being proposed include constructing an 8.0" transmission force main along Ocean Shore Boulevard (A1A) as well as constructing a 6.0" transmission force main along John Anderson

Drive. Based on GAI's preliminary engineering analysis, the 8.0" force main is anticipated to cost approximately \$600,000 and will provide the capacity to serve approximately 800 Equivalent Residential Connections (ERCs) based on a planning usage of 175 gallons per day (gpd). The 6.0" transmission force main is anticipated to cost approximately \$400,000 to construct and will provide the capacity to serve an additional 400 ERCs. For purposes of the Service Availability Charge development, the 8.0" force main is anticipated to be constructed in Year 2 of the analysis and the 6.0" force main in Year 7 of the analysis. Additionally, upgrades to the Wastewater Treatment Plant of approximately \$900,000 are anticipated in Year 6 of the analysis.

Schedule 1 included in **Attachment B**, presents the Utility Plant in Service by NARUC Account. The beginning balance is based on information contained in the 2012 Annual Report. As shown, the Utility Plant in Service costs for the system are \$892,604. After the aforementioned improvements are put in place, the Utility Plant in Service will total approximately \$2,854,604. **Schedule 2** presents the anticipated annual depreciation for the 10-year projection period. **Schedule 3** presents the current and projected Accumulated Depreciation for the Plant in service for each year in the projection period. **Schedule 4** presents the Net Utility Plant in Service based on the annual and accumulated depreciation calculated on **Schedules 2** and **3**.

Based on the Guidelines for Designing a Service Availability Charge (Section 25-30.580, Florida Administrative Code):

- (1) The maximum amount of contributions-in-aid-of-construction, net of amortization, should not exceed 75% of the total original cost, net of accumulated depreciation, of the utility's facilities and plant when the facilities and plant are at their designed capacity; and*
- (2) The minimum amount of contributions-in-aid-of-construction should not be less than the percentage of such facilities and plant that is represented by the water transmission and distribution and sewage collection systems.*

The Utility's current collection system has the hydraulic capacity to serve approximately 600 ERCs. With the additions of the 8.0" force main and the 6.0" force main, that total hydraulic

capacity of the system will be increased to 1,800 ERCs. With these two improvements in place, the total Utility Plant in Service for the Sewage Collection System will be approximately \$1,326,938 (Accounts 360 and 361 on **Schedule 1**). Dividing the sewage collection system costs by the total hydraulic capacity of the sewage collection system ($\$1,326,938 / 1,800$ ERCs) results in a Service Availability Charge related to the Main Extensions of approximately \$730.00 per ERC or \$4.171 per gpd). As stated in NPUC's application to extend its Certificated Service Area, the Utility will not pursue a plant charge at the present time.

As of October 31, 2013, the Utility provides service to 569 connections which represent 582 ERCs. Of these 569 meters, 568 are provided service through 3/4" meters with 1 utilizing a 3.0" meter. As shown on **Schedule 5**, through Year 10 of the projection period, it is anticipated that there will be approximately 1,609 ERCs connected to the system. While there are existing developer agreements, they are minimal and represent approximately 10 of the over 1,000 ERCs anticipated to connect to the system throughout the projection period.

Based on the Utility Plant in Service in Year 10, the Minimum level of Contributions in Aid of Construction (CIAC) is 46.48%. **Schedule 5** presents the CIAC Analysis for the 10-year projection period including annual projections for Utility Plant in Service, Accumulated Depreciation, Contributions in Aid of Constructions, Accumulated Amortization of CIAC, and the Contribution Level. For the 10 years included in the analysis, the maximum calculated contribution level is 65.94% which is projected in Year 5.

Summary

Based on our analysis, we recommend that NPUC update its Service Availability Policy and related Main Extension Charge to \$730.00 per ERC. As calculated above, this charge will recover the costs associated with the sewage collection system as is provided for in the Florida Administrative Code Guidelines.

We appreciate the opportunity to provide technical expertise you desire. If you have any questions, comments, or need additional information, please do not hesitate to contact me.

Sincerely,

GAI Consultants, Inc.

ATTACHMENT A

Section 25-30.565, Florida Administrative Code, *Application for Approval of New or Revised Service Availability Policy or Charges*

Section 25-30.580, Florida Administrative Code, *Guidelines for Designing Service Availability Policy*

25-30.565 Application for Approval of New or Revised Service Availability Policy or Charges.

- (1) Each application for a service availability policy or charges shall be filed in original and six copies.
- (2) Upon filing an application for a new or revised service availability charge or policy, the utility shall provide notice pursuant to Rule 25-30.4345, F.A.C.
- (3) A filing fee as required in Rule 25-30.020, F.A.C., shall be submitted at the time of application.
- (4) Each application shall include the following, if applicable:
 - (a) A statement describing how the notice provisions have been complied with, including a copy of the actual notice(s).
 - (b) The name of the applicant, the applicant's principal place of business and each local office from which company operations are conducted. The applicant's name shall be as it appears on the certificate issued by the Commission if one has been issued.
 - (c) The number of the Commission order, if any, which previously considered the charges or service availability policy for the system involved.
 - (d) A statement explaining the basis for the requested changes in charges and conditions.
 - (e) A schedule showing the original cost of any existing treatment plants, the water transmission and distribution system, and the sewage collection system, by Uniform System of Accounting account numbers as required by Rule 25-30.115, F.A.C., and the related capacity of each system as of 90 days prior to application.
 - (f) A detailed statement of accumulated depreciation for the plant listed in paragraph (e) above as of 90 days prior to application.
 - (g) A schedule showing the number of active customers on line 90 days prior to the time of application by meter size, by customer class, and the related equivalent residential connections (ERC) as defined in subsection 25-30.515(8), F.A.C. Describe the method by which an ERC is defined.
 - (h) A detailed statement defining the capacity of the treatment facilities in terms of ERCs as used in developing the proposed service availability charges.
 - (i) A detailed statement defining the capacity of the distribution or collection system in terms of ERCs as used in developing the proposed service availability charges.
 - (j) Provide a list of outstanding developer agreements.
 - (k) For each developer agreement state whether the agreement is designed to result in contributed property, other than the approved system capacity charge, within the next 24 months; an estimate of the value of the contributed property to be added to the utility's books; and a description of the property.
 - (l) A schedule showing total collections of contributions-in-aid-of-construction (CIAC) as of 90 days prior to the date of application. Detail any prepaid CIAC by amount, the related reserved ERCs, and the anticipated connection date. Reference any appropriate developer agreements.
 - (m) A detailed statement of accumulated amortization of CIAC as listed in (l) above as of 90 days prior to application.
 - (n) Copies of approvals or permits for construction and operation of treatment facilities.
 - (o) A detailed statement by a registered professional engineer showing the cost, by Uniform System of Accounting account numbers, and capacity of proposed plant expansion, and a timetable showing projected construction time.
 - (p) A detailed statement by a registered professional engineer showing how the proposed construction will affect the capacity of the existing systems.
 - (q) If the expansion or plant upgrading is being undertaken to comply with the mandates of local, state or federal regulatory authorities, copies of the order(s) or correspondence directing the expansion or upgrading.
 - (r) A schedule showing the projected growth rate for utilization of the existing plant and line capacity and future plant and line capacity.
 - (s) A summary schedule of how the proposed service availability charge was calculated.
 - (t) A schedule showing, by meter size, the cost of meters, connecting fittings, meter boxes or enclosures and also showing sufficient data on labor and any other applicable costs to allow the determination of an average cost for meter installation by type.
 - (u) A statement of the existing and proposed on-site and off-site main installation charges or policy.
 - (v) The company's present capital structure, including the cost of debt in the present capitalization. The availability and cost of other sources of financing the proposed expansion or upgrading of the system also shall be given.
 - (w) An original and three copies of the proposed tariff sheets.
- (5) Upon filing of the application and supporting exhibits, the utility shall place copies thereof at its local office of the utility

serving the area affected by the charges and conditions, and such copies shall be made available for public inspection.

(6) Each utility shall demonstrate the appropriateness of the requested service availability charges and conditions.

Specific Authority 367.121(1), 367.101 FS. Law Implemented 367.101 FS. History—New 6-14-83, Amended 11-10-86, 11-30-93, 5-29-08.

25-30.580 Guidelines for Designing Service Availability Policy.

A utility's service availability policy shall be designed in accordance with the following guidelines:

(1) The maximum amount of contributions-in-aid-of-construction, net of amortization, should not exceed 75% of the total original cost, net of accumulated depreciation, of the utility's facilities and plant when the facilities and plant are at their designed capacity; and

(2) The minimum amount of contributions-in-aid-of-construction should not be less than the percentage of such facilities and plant that is represented by the water transmission and distribution and sewage collection systems.

Specific Authority 367.101, 367.121(1) FS. Law Implemented 367.101 FS. History—New 6-14-83, Formerly 25-30.58, 25-30.058, Amended 1-31-00.

Note (1): As shown in the 2012 Annual Report.

NOTICE IS HEREBY GIVEN on this 24th day of October, 2013, pursuant to Section 367.045, Florida Statutes, of the application of North Peninsula Utilities Corp. to amend its Wastewater Utility Certificate No. 249-S to add territory in Volusia County, Florida as follows:

Bounded on the east by the Atlantic Ocean; bounded on the west by the Halifax River; and lying within Section 8, 27 and 28, Township 13 South, Range 32 East.

A more detailed description of the area proposed to be served may be found on the Public Service Commission's website in Docket No. 130209.

CONNECTION TO NORTH PENINSULA UTILITIES CORP. IS NOT REQUIRED.

Any objection to said application must be made in writing and filed with the Office of the Commission Clerk, Florida Public Service Commission, 2540 Shumard Oak Boulevard, Tallahassee, Florida 32399-0850 within thirty (30) days from the date of this Notice. At the same time, a copy of said objection should be mailed to the applicant whose address is set forth below. The objection must state the grounds for the objection with particularity.

North Peninsula Utilities Corp.
115 East Granada Boulevard
Suite 12
