

Dianne M. Triplett
ASSOCIATE GENERAL COUNSEL
Duke Energy Florida, Inc.

April 29, 2014

VIA ELECTRONIC MAIL

Ms. Carlotta Stauffer, Commission Clerk
Florida Public Service Commission
2540 Shumard Oak Boulevard
Tallahassee, FL 32399-0850

Re: Docket No.: 130200

Dear Ms. Stauffer:

Enclosed for filing in the subject docket on behalf of Duke Energy Florida, Inc., is the corrected page 7 of Helena T. (Lee) Guthrie's testimony. This page corrects a scrivener's error to line 21 of this page (specifically correcting 5,000 to 15,000) and should replace page 7 of the initial filing.

Thank you for your assistance in this matter, and please feel free to contact me if you have any questions.

Sincerely,

A handwritten signature in black ink that reads "Dianne M. Triplett".

Dianne M. Triplett

DMT/emc
Enclosure
cc: Parties of Record

1 The Company's proposed goals are based on a collection of measures and
2 programs that pass both the Participant and Rate Impact Measure ("RIM")
3 tests. Specifically, DEF is proposing a goal of 419 MW of winter peak
4 demand reduction, 259 MW of summer peak demand reduction, and 195
5 GWh of energy reduction over the 2015-2024 time period. The proposed cost-
6 effective DSM goals meet the requirements of Rule 25-17, Florida
7 Administrative Code (F.A.C.). DEF proposes that the Commission set DSM
8 goals using the Participant and RIM tests, because these tests are well-
9 balanced and ensure that the perspectives of participants and all other
10 ratepayers (including non-participants) are fairly considered.

11 Therefore, as supported by my testimony and the accompanying exhibits,
12 DEF requests that the Commission adopt its proposed numeric goals in this
13 proceeding.

14

15 **GENERAL STATE OF ENERGY EFFICIENCY IN FLORIDA**

16 **Q. How long has DEF been offering demand side management and energy**
17 **efficiency measures to customers in Florida?**

18 **A.** DEF has a long and proud history of offering energy-reducing measures and
19 programs to customers. DEF has demonstrated success in implementing
20 cost-effective programs that have resulted in customer energy savings of over
21 \$1.2 billion dollars through 2011 and more than 15,000 GWh in energy
22 consumption with demand savings of over 1645 MW effectively eliminating
23 approximately 18 peaking power plants. These impressive savings have been
24 achieved within a regulatory environment committed to establishing
25 meaningful conservation goals that support the achievement of impressive
