Re: Docket No. 140158-WS - Application for increase in its Water and Wastewater rates in Highlands County by HC Waterworks, Inc.

Dear Mr. Deremer:

We have reviewed the revised minimum filing requirements (MFRs) submitted on November 17, 2014, on behalf of HC Waterworks, Inc. (HC or Utility). At this time, the revised MFRs are still deficient and the specific deficiencies are identified below:

1. Rule 25-30.437, F.A.C., requires that each Class A utility applying for a rate increase shall provide the information required by Commission Form PSC/AFD19-W (11/93), titled "Class A Water and/or Wastewater Utilities Financial, Rate and Engineering Minimum Filing Requirements." The following MFR schedules, as filed, do not comply with Rule 25-30.437, F.A.C.

Water System – MFR Schedule E-2, E-3, and E-14 - Billing Determinants

- a) The residential consumption presented in each inclining block (block) indicated on MFR Schedule E-2, column (3) does not reflect the consumption presented on MFR Schedule E-14, column (7). This indicates that the Utility did not use the consolidated factor column to calculate the appropriate consumption in each block. Please correct any fall out calculations necessary on MFR Schedule E-2 due to this correction.
- b) The general service bills for 3" meter size presented on MFR Schedule E-2 do not match bills for the same meter size on MFR Schedule E-14. Please reflect the appropriate bills on both schedules. Furthermore, please correct any fall out calculations necessary on MFR Schedule E-2 due to this correction.

If the required reconciliations above require a corresponding change to any MFR schedules, those corrected schedules must also be submitted in accordance with Rule 25-30.436(4)(e), F.A.C. Your petition will not be deemed filed until the deficiencies identified in this letter have been corrected. These corrections should be submitted as soon as possible, but no later than December 31, 2014 to the following address:
